Then another attachment is, say, to your family. Normally there are no such things in the West. People are not attached to their family much, you see. They drink, they do all kinds of things. Suddenly they become Self-realised and it's like a boomerang, they come back to the family. It is so attached to the family, attached to the house, attached to everything. I just can't understand. If you are becoming the Pure Spirit then you are detached, because you are just a reflection, but the reflection of God Almighty.

All these identifications drop out. Now one may say, how? How to drop it out? I've never dropped them.

But still I can suggest certain things, which you can try.

First is meditation. You should discover about yourself, what's wrong with you, which side is catching, is it right or left side? With meditation you can find out. Are you attached to money, are you attached to business, are you attached to your family, are you attached to your

country in a way which is not Sahaj or to your culture, which is not Sahaj. Then try to get rid of this attachment by meditation. You know how to get rid of the right and the left. This attachment will show on your fingertips and you have to see for yourself what centers you are catching, in which way are you in trouble. And then you can clarify it very simply by taking a very simple Sahaj treatment.

I think here we fail, that once we get attached to something we don't even think we are getting attached.

We think we are doing very great thing because now we love this person, love that person, Shiva's qualities, the compassion part. You start getting attached to people. That is no compassion. That is no compassion of any kind, to be attached to any such things is no compassion and you cannot have compassion of Shiva, though people think it is the Shiva's compassion that is working within us. It's not. Because that compassion is very pure. It is like as I've told you many a times, it's like the sap in the tree which rises and goes to various parts of the tree and then either it evaporates or goes down into Mother Earth. It's not attached. If it gets attached to one flower or to one leaf or to one fruit, then the whole tree will suffer and also the flower will disappear.

So this kind of attachment to a particular thing, to a particular idea is not proper.

In Sahaja Yoga I've found people are very adaptable and understand what they should do, but the main thing is meditation. In meditating on your heart, on the Shiva Tattwa, on the principle of Shiva, you can definitely detach and then the joy will be the maximum, joy will be

the maximum. I've seen people have interest in, say, food or in clothes or in house, anything. You can have interest, you should have interest, but in that interest there should be enlightenment, that you cannot get attached to it.

Some people, say, who are say, from South India, they don't like North Indian food. Those who are from North India don't like South Indian. It's a big problem. I asked the people in Indian Airlines: “Why don't you have some standard food?" He said: “What is the standard food of India? Tell me." But it was a question. Indians are very particular about the taste and food.

So it's a fact we don't have any standard food in India. But in the same way, we can say in so many other ways that in the West people run after things, which are not necessary. They do things just out of fashion, or I don't know, because their personality is not grown-up. If your personality is grown up then you see everything, everything from an angle, which is much higher than others and you don't get dissolved with others. What you know is much higher, much greater and much more joy giving.

Now these attachments, people think that it's very joy giving. If you get a child and if you have say, a wife and everything, are joy giving. It's a very wrong idea. The joy comes from your own source of your Spirit. Whether your husband is good, whether your children are good or bad, whatever they are, they cannot give you joy. It's only you can enjoy yourself and this is why one becomes very forgiving.

When nobody can harm you, then whom are you going to be angry with? That is another great quality of Sadāśhiva, is that He is extremely forgiving. He goes up to a point, till He destroys the whole world of Ādi Shakti. But otherwise He is very, very forgiving and He also is very balanced about it.

Once the Ādi Shakti got very angry with the whole world, was so decadent and all that and She started destroying everything.

So He put a little child under Her feet and such a big tongue came out with such a shock, She stopped Her destruction.

So His ways are such that a person who is to develop the Shiva principle within himself should be extremely forgiving. I know there are people who are very cruel and who are very torturesome. If you cannot bear it, alright, finish it off. I'll stand by you there; but if you can bear it is better to bear and undergo this experience of bearing it, because it's not difficult to bear than to get out of it.

For example, a lady came to Me and she said: “I'm going to divorce my husband." I said: “Why?" “Because he comes home very late and I get very little of him." But I said, “When you divorce you'll not get him at all! What's the logic? At least now you see him, whatever it is, whenever, whatever the time is there. But this is no solution. If you divorce him you'll never see him.

So what's the use of such a divorce?" So many things like that can be understood once you are a detached person, that you are not to be attached to anything. Now who can aggress you if you are not attached to anyone? Nobody can.

Only thing when you feel that you have to protest, you should. But with detachment. In protest also is important to absolutely to have a complete detachment.

Now the main problem before us today is something else. Is that we all have to ascend and ascend with equal strength. There's a story about some birds who were caught in a net, so they decided that we should get out of this net and they tried. Everybody tried to get out. But nobody individually could work it out.

So they all decided to fly together, “One, two, three, go!" and they took all that net with them. And they said, then they requested the rats that “Please come and cut our net!" and they were freed.

So if it can happen between the rats and the birds, why not between us? So in collectivity, you'll be amazed in the collectivity how we could be helpful and joyous with each other.

Now say something is wrong with your mother, father, sisters, somebody, doesn't matter. After all you have the Ocean of Joy here with the collectivity and your problems can be solved if collectively, if you want to solve your problem.

So we have to depend on the collectivity. Very much to be one with the collective. I feel once you jump into the sea of Sahaj, the joy itself draws you together. Meeting each other is such a joyous thing. We have had so many experiences of that, of Sahaja Yogis who have told Me how happy they were to find Sahaja Yogis somewhere out of the blue and how they felt happy.

So this tie between the Sahaja Yogis is really the most joyous channel and that is what is the source we should

say, of our becoming one together. Once you start enjoying each other...

I've told you once a story of a great poet in India whose name was Namadeva, who was a tailor. And there was another one who was a.... potter.

Sometimes I miss out in English words. This potter was another poet and he was called as Gora Kumbhar.

So when Namadeva went to meet him, a saint only feels like meeting a saint, looked at him and he just stood back and then he said a beautiful couplet.

He says that: “I came here to see the form, formless Chaitanya, but here the Chaitanya is in the form: `Nirguṇachah beti allo saguṇashi'. I came to see the formless, to see the vibrations but here the, it is in the form that I see it." Only a saint can say this to another saint. This kind of appreciation, this subtle appreciation is only possible between the two saints, or between the many. They don't see he was kneading the clay; he was wearing a dirty dhoti, doing that work. He never saw all these things. He never saw his body, face or anything, but he saw that the Divinity personified in him.

This sensitivity of feeling for other Sahaja Yogis should really develop within you. Then you won't care for nonsensical, superficial things and this is one of the great principles of Shiva. He doesn't bother.

Now see, His hair are all matted up, He sits on a fast-moving bull with both the legs like that going for His wedding. Can you imagine? And all His friends, all His followers are somebody has only one eye, another has only one hand, one is bent like that, because for Him the outside personality doesn't matter.

What matters is the spirituality. Whether you have one eye or whether you have a crooked body makes no difference to Him. To Him all of them are His own people, because nothing that is superficial attracts His attention, but the divinity in a person.

We have so many ways of understanding His principle, because He is all-pervading. If you feel compassion for someone it works. It definitely works. Recently there was a case of some sort of a, incurable disease in Mexico. And the lady, who was Mexican, who was working in the UN, she's still working in UN, she wrote to Me two letters, that Mother I'm going to lose my son because he has this horrible disease. I mean, just she wrote to Me. I just felt such compassion for her, because she wrote a letter, which brought tears to My eyes. And imagine, those tears have cured that boy! [Aside in Hindi.] Has cured that boy completely and she wrote Me a letter of, thanking and all. I was amazed, because My compassion is not mental. It's just there, just flows and works it out.

In the same way you can also become that. I want you to have all My powers. But first is the compassion. And a Sahaja Yogi cannot ill-treat another person, anyone, whether he's a Sahaja Yogi or not a Sahaja Yogi, that's not important. But nobody can aggress other Sahaja Yogis. If you say even he's a non Sahaja Yogi, Sahaja Yogi, Sahaja Yogis should never aggress. That's not a sign of a Sahaja Yogi.

Sahaja Yogi is different.

Like the other day somebody said, I said: “You are very hot-tempered." “Yes, yes, I am. When somebody provokes me." I said: “Everybody when he's provoked

only gets angry. Only the mad are such who do not get angry when they are provoked, you see.

So if you get angry when you are provoked, is nothing so great. Everybody gets angry like that, when you are provoked. But if you say that if you are not provoked then you will not get angry, that sort of a state is very different." So what I find, that in the whole atmosphere of today in the modern times, there's a big struggle going on, which is not Shiva's culture. Shiva's culture is the, I should say, the Sahaj Culture. If you are Sahaja Yogis you should have compassion in you, understanding of others' feelings; and also should have readiness to look after not only Sahaja Yogis, also non-Sahaja Yogis, then your compassion will become effective.

Now as you know today, the biggest problem of today's civilization is the Western culture has gone to dogs. They are going, I mean when you read the newspaper you are shocked the way things are happening.

I don't know how many will realise it before their destruction. It's really self-destructing. On one side this is the self-indulgent and permissive society, which is working. Now on the other side I find the Islamic culture is trying to oppose it. That's correct. Their trying to oppose it is correct. But the way they are opposing is creating problems. If you oppress somebody, “Don't do this, don't do that", then they'll do it much more.

I'll give an example, that if you go into the north of India the culture is more Islamic and the people are very licentious and all the time looking at women, not all, but many; though they are say, they are Hindus or they say this and that. But still they have all these bad habits,

which have come from Islamic suppression. When a woman is completely covered and nobody can see her, they become much more curious. I have some people who came to Bombay [Mumbai] and somebody was travelling with Me and he was looking at every woman on the street. I tell, I said: “Your neck will break now, the way you are going on." But is a common practice there. Not only that, but this curiosity goes too far and people can become extremely immoral, just like we are in the West.

So the suppression of your desires is also wrong. Also this culture, which outwardly suppresses, but inwardly people are very immoral. Once I was travelling from Rio to London and I went off to sleep. When I got up, I saw some other people sitting there all very nicely dressed up with short skirts and women with, all the bow ties and this and that, so I asked the air hostess. I said: “Did we stop somewhere?" She said: “No, no, we have been going directly." I said: “Then who are these people?" “Same." “They are so much changed!" I mean, I was surprised that they were wearing such long, these chadur and all that and now here they are with all these funny dresses. I couldn't understand. That's what happened. The curiosity created by suppression also is not healthy.

In Sahaja Yoga there's no question of suppression. You become innocent, just become innocent. That is the principle of Shiva. This Sahaj Culture is in the center. It has neither too much of licentiousness nor too much of suppression, but it is in the center, which is the, Shiva's greatest principle is to be innocent.

And this innocence just shines in you. I have seen it. You people, whatever you might have done before, but I see you are so pure. You don't have these stupid ideas of behaving in a manner that is so Western.

Also, so many Islamic people I've seen who have come to Sahaja Yoga, have become very, very Sahaj and are leading a very good life. We have some Iranians who sent Me letters of their confessions and I was shocked. I never read them because it was too much for Me. And now I find them to be the most moral people that way.

So going to one extreme is wrong, or to another is wrong. But to be in the center, in the Sahaj is the best way to understand, what is so important for life is morality. And that comes from your innocence. And that is the quality of, of course Śhrī Gaṇeśha, who is the Son of Shiva, but is emitted through the innocence of Śhrī Shiva.

Now I think in next lecture of Shiva I'll talk about innocence to you, but for this one you have to understand the detachment. The detachment that should evolve within. It cannot be forced, but through meditation you can develop that detachment within you, which will be really joy giving.

So many qualities of Shiva can be described and I think in so many lectures I have told you about Him.

I have to just say that you should have also collective meditation in your ashrams. Will be a good idea if you can try collective meditation, will be nice. But you don't have to give vibrations to anyone. You don't have to look after the Chakras of others. You just bother, yourself, what's wrong with you.

And now whatever is the solution for your ascent you should do it, because the responsibility of the whole world rests on Sahaja Yogis. This you know, that there's no way out, without Sahaja Yoga. To save humanity from all kinds of problems, Sahaja Yoga has come on this earth.

So it is your responsibility to keep yourself in proper shape, as far as Sahaja Yoga is concerned. Get rid of your left and get rid of your right and then to spread Sahaja Yoga, not by bombastic words or aggressiveness, but with love and compassion. I'm sure we have done a lot, we have achieved a lot, but there are still some points here and there which is a very unpleasant task for Me to correct them. But whatever it is I have to say that it's working and everybody should look at themselves and feel happy from where they have come here and how far we have to go.

May God bless you.

Contents: 1995-02-28 **Talk to Sahaja Yogis, Airport, Sydney, New South Wales, Australia**

Shri Mataji: I'm sitting on the wrong chair I think. I should sit there. Which one is Mine? Sir C.P: Whichever you like.

Shri Mataji: You must sit to the left of your husband.

[Shri Mataji actually remained on the right of Sir C.P.!] We have had really a very beautiful Shiva Pūjā here. It was never so good before and so many people there. Everybody's heart was opening. It was really, in the land of, as if Shiva we were in there.

So I've told you about what is to be done, to develop detachment and to understand. I know lots of things from

your Kuṇḍalinī and some people still have problem with Āgñyā, left Nābhī, right Nābhī. This all can be cured, if you, just know that you are the Pure Spirit and you have to become that. This is not difficult.

Only thing is you must have confidence in yourself and also respect, respect for everything. What we have in this culture so-called, no respect. Respect your body. Respect your relations. Āgñyā can, run away you see, fast, all the problems of Āgñyā, if you know how to respect. Respect the Mother Earth and everything will be fine. It doesn't mean if you respect somebody that means you are subservient. You are not. Respect shows your growth, your maturity.

I find it difficult even, to tell people when they are very very wrong. It's very difficult, very embarrassing and to publicly tell that is even more embarrassing, but supposed to be My job so sometimes I have to do it. But I don't like it. All those people whom I've tried to tell they should really, work it out, because you'll be lagging behind. Sahaja Yoga is moving very fast. It has taken a speed, everywhere, even in your country.

So best is to, understand that we cannot be stuck now with our own Āgñyā and our problems and our, this thing, prestigious, so-called prestige.

I really enjoyed all the program very much and, specially the music. John is really great I must say, the way he's handling music part, and, the way you are composing very beautiful music also. But you shouldn't have somebody from outside I think. See there's, they're not worth it. I enjoy your music more than anybody else's. It

comes from heart. My stay has been, very very comfortable and very joyous.

I'm learning a lot about the ships now. Every day there's some sort of an activity and I thought these Australians are really very hard-working, the way they look after their ship, they unload it and load it.

They put lot of labour on it themselves but if they have to work as labour they are horrible absolutely.

They charge so much that the labour problem here is the most, difficult one I don't know how you will solve it, because they ask so much, so much money.

Long time back C.P. told Me that these Australian laborers are the difficult, most difficult because they're asking even for bending some money, bending their body. I mean if they have to lift something they have to bend then you have to pay them every time they bend. And today you can see the effects of this labour. If the labour improves and, then maybe things will improve a lot. And what do they need money for? Just for alcohol, that's all. Why do they need so much money? This alcohol that they consume, this is the only way they are wasting all the money that they are getting it. But nobody can talk to them about it. It would be nice if you can get some labour people in Sahaj so they'll feel satisfied and will understand that they are causing so much trouble, just for their bad habits of alcohol.

Your newspapers are also really, very heavy and very little news, but I've been watching it, I've been reading about it, trying to understand the politics and this and that because I think it's quite complicated.

In India they have already, started one Sahaja Yoga political party, but it's not Sahaja Yoga, I told them not to take Sahaja Yoga's name, but Sahaja Yogis. They call it Satya Marga, meaning the, path of truth and two Sahaja Yogis are contesting elections. Only they are Sahaja Yogis but I said don't take My name or take the name of Sahaja Yoga. We have to be careful about the name of Sahaja Yoga. Very important.

[Marathi.] What I have to tell you that for example now, Angela, is she here? You should go to France see because it's close to, Cabella and they come for every program.

So instead of, asking him to come here, he has a government job you see and it's, he gets his gratuities and everything. You should not call him here. It's, what's the use of him coming here, I just don't understand. And you should settle your matters, whatever it is, the way can do it and you should really go to France and that's why I married you there. But then the proposal came that you want him to come here and all that, but I think it's not fair. Also you can do a lot in France because France is a place where, photography is very important. Not like this country. You'll be incurring more debts and more debts and you won't be able to produce much. Also, Kay, I've said that you should pay more attention your son that doesn't mean you come with him and stay in Sydney. First of all, I've already told you you have a weakness for that boy and that's why he's spoilt.

It's the mother who spoils the child.

So what, you should not be with him. You can put him with somebody else here who should really look after him

because he's a well-known, mischievous boy. Very mischievous. His brain is so wonderful I don't know, as if some crooked brain is there. You can't correct him. You just can't correct him.

So this attachment is wrong. I've already told, that you can send that child to somebody who will handle the child with great, attention. It's needed. Don't spoil your children.

Don't spoil. By spoiling them you'll create problems for your self.

And the children also should not stick to their parents. They should be, also detached. That's the sign of a good child. In Sahaja Yoga, if you find children who are very much sticking to parents, they don't do well in schools. They are very mischievous, very troublesome. You have to correct. That's your job. It's the job of the mother to correct the child. Shouldn't bother about the father. It's the mother who has to correct the child and put him on right path because the same child will, become a troublesome thing.

Today I read in the newspaper, a eleven year old child joined some others to kill some old man. Can you, eleven year old. Who should we blame? For Sahaja Yogis it is very important to see how the children are behaving. They should not be rude, they should not be arrogant, because if you send such a lot, to Dharamshala they have big problems.

So to teach them how to be humble, how to be respectful, because in Dharamshala Australian children are in majority and they have a very good name, people

like them very much there. But some of them are so horrid, I mean exceptionally horrid.

So I would say that one should, try to be little strict with them, doesn't matter and that's how you are going to help your children, very much.

I think I have individually talked about everybody else. I'm sorry I had to ask Stephan Taylor to, come down and we have put Michael Fogarty there. I've told him what mistakes he has committed which are very serious, which he was, may not have been aware and all the Sahaja Yogis of the world have decided that we have to change the leader here. Moreover he's not keeping very well, so is all done after complete scrutiny. Please try to understand I would not put down any leader unless and until I find something really seriously wrong. Again I have to tell you that if you are taking any step, anyway, you must ask Me.

I'm available on the phone, or, if I'm not there they'll tell you where I am. But anything important if you have to take a decision you must ask and don't rely on other people or other leaders because sometimes they can mislead. Anything important please try to telephone to Me and I'll definitely look after.

Sahaja Yoga is collective, is massive, is big, but also individual is very important and I have to pay attention to every individual, I have to understand every individual, I have to look after every individual problem.

So try to understand that any collective thing you do please, please telephone to Me and ask Me. Don't do things arbitrarily, because it can shock people. It can really shock.

So try to understand that Sahaja Yoga is a collective organization. It's a living organization.

Like if there's a pin, pricks on one finger the whole body is concerned. In the same way if you do not consult Me, do things, everybody gets upset and they start asking Me, Mother how it has happened? Another little handicap is that Australia is very far away and naturally, it's not so much connected, with the European or American people, but still I am there.

So you can always telephone to Me, ask Me, or, leave message for Me, or send Me a fax. You must ask Me. This is, dangerous to do things without asking.

It's very dangerous.

So please don't do anything. I'm telling all the leaders. If they have problem they can talk to their own leader and the leader can talk to Me, but without asking don't do things, which are injurious or which is dangerous. You see these days, nobody is far away. I mean you can telephone from here, anyone. We saw the telephone works so fast from Australia, telephone system is so good here. I've not seen like this anywhere and quite cheap.

So why not we use this good system and ask Me because we are a little bit cut off as you know. But My attention is here and I have stopped going to Europe and America maybe this year only but I'm coming to Australia again and again and I'll be back again.

Also about school, one girl wrote to Me about one Mary someone Mary, that she has been punished and she's very unhappy. She shouldn't, she need not go, because nobody has told Me this, all the children are anxious to go so I think something wrong with the child.

So such a child should not go. I mean there's no problem, we have already more children than we can really afford to have. But I've said those who are in the seventh class should repeat this year, seventh class.

Also those who are going for My Birthday should inform people in, Delhi, also to Yogi, how many are coming, so for their stay we can arrange some proper place. Got it. You got it now? Lots of miracles have happened about My passport also. Already the size is so big like a book you know.

So C.P. is also very much thankful you see, for all that you have done for him. But you know he's a difficult person in one way. He's been arguing with Me that I can't live here free, you see must do something about it and till this morning there was discussion going on. I said: “You'd better talk to them directly." So now we have compromised, that he can donate 5,000 pounds for Sahaja Yoga activities here.

We have never had a holiday before. This is the first time, through your, kindness, we have been able to have a holiday together. Otherwise not even for one day I should say we really enjoyed any holiday because as soon as we reached the place he was called back by his office.

So this was very unique, that we should come to Australia and have such a nice time.

Then another is that I have to thank all those who have worked so hard, for launching of the book. I think this book is very important. Today we need it very much and one should try to find people who could sell these books and, could read, actually main is we must have proper,

comments and all that, so that people should read. It's, a good book which can give us confidence in our good values, value in the truthful lives.

So is going to help, many people to see that there has been a living person like that. Any why not we do it.

Specially in the politics, everywhere I find is too much of corruption. Because perhaps they don't understand that politics is the only way they can get fame, fame, in the future, even after their death. If they have money like business people, this that, nobody is going to, have respect for them. Also some of them marry their secretaries and things like that you see. Is absolutely, I can't understand. Even the level of their thinking is so low, so what can they guide other people, what can they do for others because they are so self-centered and they are making money and taking bribes and this and that, is bit too much.

Italy is the worst. But now it has come to some, trial now. Let us see what happens. But it's very corrupt, very very corrupt place. I have never seen such corruption. Even in India you can't think of corruption that exists there.

We bought a plot of land and, they took Me to a Rotary, you see the officer and he had a big calculator he did something and he told Me that so much black money to be paid. I said I've no black money, how can I pay? All money is in the bank, white money what to do? He said “all right, tell me your bank, what is your bank." He telephoned to the manager, he organized, I don't know how. He organized it. I said but how can you do it, you are a Rotary. He said nobody wants to pay, Income Tax you see. Openly. That's the limit, I was so shocked. How

could he do it like that? So it had gone to such a level that now it had to come out and now corruption in Italy is completely exposed and everywhere it should be exposed. Everywhere. Otherwise the situation in any country cannot improve. India is also very bad but I'm sure now, something will happen and maybe, this corruption, which is so much now grown up.

When My husband was a collector and all that I never knew anybody who was corrupt not one person except for this peons and something like, I can say very low level, but he used to pay two rupees or one rupee to them. But now it's so openly they ask.

So it has to go now and it has to work out, that they should know that they have to do public service and they have to have name and a fame. Even I've seen very few simple people like, Police Inspector or something, becomes very famous if he is honest and can reach very great heights.

So, you have to pray that this corruption should go and it will work out I am sure. But the more difficult thing is immorality. Marrying your secretary. I mean it's too much immoral.

I think she's like your servant because she is paid by you, she's under you and to marry her means that you are using her helplessness. Thus I'm sure you can all pray for it and work it out. I'm sure it will work out in this country.

Only thing very good about Australia is they are particular about cleanliness. The way they have kept their seashores clean and all that is remarkable. It's really an example for others. But morality wise, I don't

know, how far they are with others or competing with other people. It's quite stupid things they do.

If you people want and desire, that morality should come down, I'm sure it will work out.

And as I told you the other day that if people become very immoral you will find another kind of thing growing up which we call as fundamentalist, whether they are Christians, Muslims are just the same, so this immoral, behaviour of people somehow or other generates, that another kind of people. It has happened at the time of Hitler, in the same way it will happen here.

So you have to be very, alert about it. If you see in the newspaper something give it a bandhan. If you read about somebody who has been very immoral give it a bandhan, because it will work. You are all saints and you can do a lot. Whatever you desire will happen.

So that's one thing why I feel is, very much dragging and this alcoholism drinking, drugs also.

So whenever you read in the newspaper just give it a bandhan. It will work out. That can bring prosperity, happiness, joy, even to other people.

So now I'm off to, Japan where I'll stay I think for only, one night and then I have to go to Hong Kong. Hong Kong has done well with Alex. I know Alex has done it very well and he has really, very good influence there. Even China is so corrupt. Once upon a time they were so honest. When we were there when Mao was sick I think, one of My toe rings, came out, while I walking or whatever it is. In Peking.

And, they sent it to, to Shanghai. They sent it, one toe ring of silver to Shanghai. They were so honest out of fear and just the fear went away. They have become mad now. That's how they are becoming rich they think. But how long will it last, this kind of riches? It's very sad that, when the Sahaja Yoga is prospering so much and is so many countries are accepting it and at the same time corruption is growing very fast. It's very sad.

So Sahaja Yogis have to know they have to be, very honest, about money. Do you have any problems, any one of you?

Sahaja Yogi: I have a very bad temper.

Shri Mataji: Who is that one? You are a liver patient. Treat your liver all right? Take out the heat with ice and also from the brain on this side [left of head].

So many are liver patients here. I know that.

She's not the only one. Better try to take out the heat from your liver and from your head on this side.

Now what do you want? You come here. I can't hear.

Sahaja Yogi: For about three years now I've been seeing these circle things.

Shri Mataji: In the brain?

Sahaja Yogi: Yes, It's my eyes and there's like a membrane.

Shri Mataji: Do you have diabetes?

Sahaja Yogi: I've never been diagnosed as a diabetic officially but I know if I have too much sugar my spleen gets very painful but my liver is also very hot when I meditate and when I go to a certain level I can feel terrible pain in here.

Shri Mataji: You try. You try the same. With the ice. It will work out. All right?

Sahaja Yogi: And also in the Āgñyā when I meditate.

Shri Mataji: That will also go away then. Once you treat it, the heat, it will go away. The heat in the body is very bad and that's why. What else?

Sahaja Yogi: [question about school].

Shri Mataji: You see whatever may be, Catholic Schools, you see they are showing very bad results in any class, you see in the matriculation and all that, only two or three children are passing from these schools.

So what is the higher standard I don't know. You can't afford to send them to India?

Sahaja Yogi: My husband…

Shri Mataji: He's Catholic is he? You can tell him I don't want to send them to Catholic church.

You can as a mother, you can put down your foot. Put them in any other school but Catholic School.

What's it? Osteoarthritis. Who has? You should do your left side three-candle treatment. All right? No water treatment. Three candle treatment. No water treatment at all. All right?

Sahaja Yogi: [question about not feeling vibrations].

Shri Mataji: Even in England you never had? I didn't know this. Oh, My goodness. Work on him and find out why he has no vibrations. I didn't know this.

Sahaja Yogi: I feel them but not very much.

Shri Mataji: Then steady down. You have to steady down. You can. You see, we have to be, very alert about it and,

to get up in the morning, early in the morning and do meditation. Then it works better.

If you are lethargic, it won't. Just push yourself.

Joe Salomon: Shri Mataji, on behalf of all the people here we would like to invite You back again.

Shri Mataji: Of course.

Joe Salomon: To spend some time.

Shri Mataji: I'm coming even without invitation! I'm coming without invitation.

Michael Fogarty: And also to Sir C.P. Srivastava.

Sir C.P: There's not much time now to enable me to express my feelings of thankfulness and gratitude to all. Please accept my very sincere and deep feelings of gratitude. I have come to regard Australia very highly, the country and the people. I hope, this is not a diplomatic statement is it? This comes straight from my heart. I think this country is beautiful and people are beautiful and you know you have given us a chance, my Wife and me, to have our first good, first holiday, why `good', first holiday for life! Now if someone in his seventy-fifth year as I am says this, can you imagine how important this must be? When I retired from government service a few years ago, they looked for my service record and didn't find any, for I had never taken any leave. You won't believe it. But I was given one job after another; I completed one, went to another and my wife was telling me all the time: work for your country.

So I'm working for my country. And then we didn't know that we would have eventually the gift of Australian people, this lovely gift of a holiday.

So thank you all very much. I have enjoyed my stay here. I'll be here for a while more and my wife's birthday is coming soon: I think on behalf of all of you shall I say, from now on a very wonderful Birthday to Her and very many, many happy returns.

So thank you, thank you very much, thank you.

Contents: 1995-03-01 **Quotes on Potatoes and Seaweeds, Tokyo, Japan (other date 03-02)**

[Shri Mataji is offered niku jageer, that consists of sliced meat, potatoes and vegetables with sauce. Shri Mataji eats all the meat and vegetables but not the potatoes:] You people eat too many potatoes, but potatoes are not very good for the Nābhī. Thank you very much for the dinner, I have never eaten so much in My life.

[Another time when Shri Mataji is offered onigiri, rice balls with a kombu seaweed inside and wrapped with nori seaweed:] Seaweed is very good for the Nābhī. Oh and inside the rice ball there is another kind of seaweed, how delicious.

[On the way to the Stanley Market in the car, when Lily Chen points out the house of the richest man in Hong Kong:] The only use for money is for giving. What does this man do with his money?

Contents: 1995-03-04 **Chopsticks and Presents, Banquet Lunch, Repulsive Bay, Hong Kong, China**

[When Sahaja Yogis start giving presents.] I didn't really want you to give Me presents.

Contents: 1995-03-04 **Shopping after Lunch atWestern Market, Hong Kong, China**

[On the way to the Stanley Market in the car, when Lily Chen points out the house of the richest man in Hong Kong:] The only use for money is for giving. What does this man do with his money? [After lunch in the car, about the surrounding trees:] I know every single tree.

[Before getting out, concerned that it is too windy and the Sahaja Yogis might catch cold:] Let's give a bandhan.

[The wind slows down:] Bandhans do work.

Contents: **1995-03-0x Advices to Talk to Sahaja Yogis, Taipei, Taiwan**

[SYNOPSIS!] [The numerous pearls of precious advice from Shri Mataji to the Taiwan collective during the four nights and five days were so sweet that we can only listen to them over and over.] [Truth is love. Sahaja Yoga talks only of God's love. When we love someone we have to know each and every detail about the other person. We have to develop the dynamic of love and manifest it in each one's daily life.] [Introspection is not a mental activity. When we are in the state of thoughtless awareness, automatically we are in introspection. We become the witness for ourselves.] [During meditation, listening to music is all right as long as we have no reaction to the music. There should be enough light for us to see the picture of Mother; too strong or complete darkness is not good.] [To see is not to be; to be is to be

there. Very often Sahaja Yogis in Sushupti state (deep sleep) see the future but sometimes it is very confusing and mistaken.] [To spread Sahaja Yoga is everyone's responsibility; it is not just the leader's responsibility.] [All should remember to do liver treatment in the summertime.] [In order for new people to feel the vibrations after Self-realisation, they have to forgive.]

Contents: **1995-03-xx Advices, Kuala Lumpur, Malaysia**

Detergents: in 1995 some foreign yogis were also visiting at the time Shri Mataji was in Malaysia. One of them became very ill and when this was reported to Her Holiness, She explained that in the West people are obsessed with cleanliness and use too much detergent which is not good for us. Westerners make their environment so sterile that they have lost their natural immunity: just a little dirt and they get very sick.

Contents: **1995-03-xx Conversation during a Meal with a Hand Written Line, Kuala Lumpur, Malaysia**

Shri Mataji: You are KT.

KT Tan: [replies that KT are the initials of a very difficult Chinese name].

Shri Mataji: What is this difficult Chinese name? KT Tan: Shri Mataji, it is Kean Tean.

Shri Mataji: But this is good. It is Kattyayeni. [Shri Mataji teaches her how to pronounce it and then asks her if she has been to Kolhapur.] KT Tan: [answers that she has not been to Kolhapur].

Shri Mataji: You must have been. It is on the way to Ganapatipule and is famous for wedding jewelry.

KT Tan: [answers that she has never been to Kolhapur].

Shri Mataji: [explains that Kattyayeni killed the demon Kolhasur and this is why Kolhapur is called as such].

[As KT Tan is concerned that she might forget this Indian name, she asks Shri Mataji to spell it.

As even spelling turns not that easily, Shri Mataji takes a piece of paper and writes:] Kattyayeni killed Kolhasur.

1995-03-xx Conversation during a Meal with a Hand Written Line, Kuala Lumpur, Malaysia

***Contents: 1995-03-12*, Public Program, Kuala Lumpur, Malaysia**

I bow to all the seekers of Truth.

At the very outset I have to tell you that truth is what it is. You cannot change it, you cannot transform it and unfortunately, at this human awareness, you cannot know it. In the evolutionary process you have come to a state of human awareness. But at this point you do not know the absolute truth. If you had known the absolute truth there would have been no quarrels, no fights, no wars, because everybody would have known it.

Now whatever I'm going to tell you here today please do not take for granted. We've had enough problems with blind faiths.

So whatever I'm telling you, you should have an open mind like a scientist and treat it, My lecture as a hypothesis. If it proves then you have to accept it as honest people. Because it is for your benevolence, it is

for the benevolence of your family, it is for the benevolence of your cities, benevolence of your country and for the benevolence of the whole world.

We have to understand that we have problems because we try to rationalise everything with our mental capacity. Everybody has a different style of rationalizing but if you can go somehow beyond this mind then you can see the reality.

You have been told about this instrument that is within you, is all created during our creation. One by one we went through it during our evolutionary process. It's beautifully done and there is a power has been shown there which all of you have whether you're Hindu, Muslim, Christian, anybody. This is the power which has to give you your second birth.

So what is the truth? The first truth is that you're not this body, this mind, this intelligence, emotions, your ego or your conditionings. But you are the pure Spirit, you are beyond this.

So you have to become the Spirit.

Another truth is when we see these flowers so beautiful, very beautiful they are, then, we do not think even that it's a miracle to have these different flowers with different colours, hues and different fragrance.

Who does this work? Who runs your heart? If you ask a doctor he will say it is autonomous nervous system. But who is this `auto'? That is the Self, that is the Spirit. When we talk like “My hand” “My body” “My head” “My emotions” “My intellect” but who is the owner of this “My"? Is your Spirit.

There is such a seeking in modern times. I'm really surprised, because all these modern lifestyle has given us a kind of illusions. We live with illusions and once we discover these illusions we get very frustrated.

In Sanskrit it is called as branthi. It's not only that Indian saints have talked about this. Also Tao, Tao of Lao Tze. Chinese know about it but they just don't know what to do. For Japanese there was Zen who has also said the same thing. I'm not saying something new to you.

This work of giving awakening to this Kuṇḍalinī was just like a seed, you put it in the Mother Earth, it sprouts. How? Because the seed has built-in capacity to sprout and the Mother Earth also has built-in capacity to sprout.

So it is spontaneous. Sahaj means born with you. Saha is with, Ja is born. Also it means simple. It's born with you, spontaneous happening that should take place, is your birthright as seekers. Of course you cannot force on people. You have to have a desire to get this higher awareness.

This Kuṇḍalinī is your Mother. She is your individual mother and She knows everything about you, about your past, about your aspirations, everything She knows. Like a tape recorder She has taped your life, of many lives are there. And She's anxious to give you your second birth, very anxious. And now when you are seeking the truth, She works it, spontaneously. It's a living process, like we put the seed in the Mother Earth and it works. We don't pay any money to the Mother Earth for that, do we? So first thing we should know you cannot pay for this. It's your birthright to get it and you will get it tonight.

So I have to tell you also about people who have commercialised because they know there are people who are seeking. They're commercialised and they're trying all kinds of tricks which is absolutely absurd.

As a Mother I have to tell you the truth. For example, I went to Chicago and there was the head of the Hare Rāma. He was wearing a dhoti in that cold, severe cold and he had shaved his head. I asked him, “Why are you wearing dhoti in this cold, what is the need?" He said, “My Guru has told me if you wear a dhoti you'll get your Nirvāṇa." I said, “Really?" In our country, India, at least eighty percent people wear dhotis. If they get Nirvāṇa then where will you be? Then I said, “Why have you shaved your head?" So he said, “I've shaved it because again my Guru has said you have to shave if you have to take Nirvāṇa." On this, Kabīra, a great poet has said that by shaving your head if you can go to heaven what about the sheep which is shaved every year twice? All such things, you see, “You go to Himālayas, you stand on one foot” or die there. They started also something called Shambala that you go in the Gobi Desert and you get Nirvāṇa. In any case if you go in the desert you'll die, what is there? Then there are people who are now saying that you can fly at three feet height, imagine. What is the need to fly at three feet high, I can't understand. As it is, in this Kuala Lumpur, there're so many cars that it's very difficult to go even for a small distance, you know and if you have these people going about at three feet, what would happen? There is another one who gives diamonds, this that, now he's exposed, thank God, because he used to mesmerize people. Another one is

now teaching people how to move pendulum and he's made lots of money. I was in Washington, they came and said, “We have lost Mother, all our money, what to do." I said, “For what? For this moving pendulum? Have you come on this earth to move pendulum? Is that the value of your life that you lost all your money, everything?" So here the seekers are earnest and they're trying to seek. Here there's a market of these people who are commercializing and we start following them because, I think they're stupid, that's all.

The greatest number of stupid people I've found in America. They're really idiotic. They take to all kinds of nonsense and they accept it. They're supposed to be very developed. I think they have no wisdom at all and then they come to Me crying, “Mother, this has happened." I said, “But why did you do it?" So one has to understand that something has to happen to your awareness. It's not just, “I believe in this, I believe in that." No. You have to believe in yourself and you have to know everything about yourself. This is very important that we should understand our own value. Otherwise anybody can exploit you. Because now you have money, you've cars. They see this, they want all that.

So money has nothing to do with spirituality, God doesn't understand money. He doesn't understand banking and all that. See that is your headache. You have created money.

All right, so now when this Kuṇḍalinī rises, what happens? First thing is that She nourishes all these centers. And these subtle centers are for your physical, mental, emotional and Spiritual being. Complete benevolence.

But when they go into jeopardy then you create problems. It helps physically very much.

In India there are four doctors from university who have done their M.B.B.S., have got their M.D. in Sahaja Yoga, M.D. in Sahaja Yoga, for curing some incurable diseases. But people get cured just like that and I was amazed that in Russia people are sixty-five percent extremely spiritual. They're not materialistic, they don't want material things, they're not. Their government said, “All right you take your ats and look after them, you take your houses, look after them." They said, “No no, we don't want, you better look after them, why should possess a headache." Sixty-five percent. And they understand spirituality very well, very well.

All the developing countries like India and others are, we're now trying to make money. All right, not that you should not make but also you must have a balance. You must know the bad effects of money. See America is what? Sixty-five percent people they say will become schizophrenic, means half-mad. In India we don't have half-mads. We either have full or no. But in America you have. They're all right, suddenly they become mad. The again they're all right, suddenly they become mad. All funny diseases. Then they have AIDS and all sorts of diseases they have.

So one has to understand that this kind of progress, imbalanced, has not brought any happiness to people. There are more diseases now than they were ever before.

So it is important for us to see. Supposing somebody goes and falls into a ditch.

So we should see, he's fallen into ditch now, what should we do, how to protect ourselves.

So with this happening, physical being gets completely corrected. Many incurable diseases, blood cancer, all kinds of diseases are cured with this. But in getting cured you also get other things that is complete mental peace you get. Many mental cases have been cured, many mental cases.

Some of them were also people, children who were suffering from, handicapped and also some were mentally handicapped. All these could be cured, not that all will be cured but all these problems can be cured in a person. With your own power you are the doctor, you're not to pay for it, it's your own power that will cure. People don't believe it because they have no faith in themselves but it'a a fact I'm telling you that it works.

Now when this Kuṇḍalinī rises what another thing She does is that She gives you complete peace of mind. How it happens like you're standing in the water, you're afraid that you'll be drowned with the waves. But supposing if you get into the boat then you don't mind looking at those waves and enjoying them. But supposing you know how to swim then you can just jump down and save people. This is exactly what happens in Sahaja Yoga.

We are all the time thinking about the future and the past. We cannot be in the present.

So we are jumping on the cusp of these thoughts which rise fall, rise fall, rise fall, we're jumping like that. In between them there's a little space, a pause where there is peace, when you are in the present. Future is over, it

doesn't exist and past we don't know. But we are all the time jumping with these thoughts.

So when the Kuṇḍalinī rises She elongates these thoughts, elongates. And by elongating these thoughts, She creates peace. And we become absolutely peaceful. Then we become the witness; the whole thing looks like a drama. You are out of your problems so you can solve them. And with this peace you become very dynamic but very peaceful. At My age as you know, all of you, seventy-two years of age, I'm travelling everyday, practically third day, fourth day I'm out. But I'm peaceful, I never think I'm travelling; I think if I am sitting here on a sofa, there also I'm sitting.

So this thinking stops and you become thoughtlessly aware. In Sanskrit it's called as Nirvichar Samādhi, where there is no thought but you are absolutely aware, very aware. Your memory improves, if you see something, I'm seeing these flowers, now it's all in within Me, the joy that is within these flowers starts trickling down. Now supposing this carpet is beautiful, I look at this carpet, thank God it's not Mine otherwise I would have had a headache, to insure it, to worry about it, this that.

So I look at it and the joy that is put inside this by the artist in a subtle way starts pouring down Me, I become absolutely filled with joy of this creation.

So you become thoughtlessly aware and then the real inspirations come to you. And you're dynamic at the same time. Your attention now becomes enlightened by the Spirit. If the attention is enlightened then what happens? This attention works. Sitting down here you can find out about anyone you want to. On your central

nervous system you can feel it, the center of that person, you know the Chakras which are catching and you know what's wrong with that person, what's going to happen.

If you know how to correct yourself, your own Chakras, you can correct the Chakras of others.

So then you also put them into proper shape and life becomes very beautiful. Your attitude towards life changes, towards your relationships, towards your society and then you start understanding what wrong we have been doing. It's like this. Supposing I have a snake in my hand. It's all darkness here and I'm very obstinate and you tell me that you have a snake in your hand. I will say, “No, it is not, it is a rope." Till the snake bites me I'll be holding on to it. But supposing there is little light, immediately I'll throw away.

In the same way you give up all destructive habits. Overnight people have given up drugs, very surprising.

Because you have the light and this light makes you wise. You get your wisdom. Then also we go to one extreme, to another extreme. Like you can see the Western culture is such that there's abandonment. You don't have to worry about anything, go ahead, live like a very licentious, permissive person, is allowed.

It's freedom.

The other ones are, other religions are very strict. “You can't do this, you can't do this” this and that.

These are two extremes. But with this you come in balance. You actually become religious. You become righteous. You don't do wrong things, you just don't do it, because there is light. This is enlightenment.

You know about saints, how they lived. They were married, they had children. But what was their life? That's what exactly happens to you, that you become extremely wise and enlightened.

It is that on your central nervous system, when this Kuṇḍalinī rises and pierces through, She connects you to the main. Like this instrument had to be connected to the mains, otherwise it had no meaning, no identity. In the same way you get connected to that All-pervading vital Power. And then you start feeling the vibrations on your hand, of like a Cool Breeze. When it happens to you, you can ask any question.

Like a computer, you ask any question, the answer comes to you, on your finger tips.

So to know the truth on your central nervous system. Like we are human beings, all right. We know so many things. But say, there's a dog or a horse if you want to take him through a dirty lane, he'll go away, he won't think about it. But we can't go because our awareness is much higher. But with this we don't do anything wrong, just don't do it, because our awareness becomes much higher.

Then comes that in this enlightenment you see everything on your finger tips. You know everything on your central nervous system. This is what has to happen which is called as in Sanskrit, Bodh. Bodh, or wave from where, vida, means from where the wave word has come and from Bodh, Buddha has come.

So it not just a mental idea, it is not just somebody's thoughts that you are carrying. No, it is something that happens to you, actually that you can feel it on your

central nervous system. This is what is Sahaj Yoga, means spontaneous union with the Divine Power. Now this Divine Power of love is, for your information, so this Divine Power is the ocean of knowledge, of absolute knowledge. It's the ocean of compassion and love. It is the ocean of miracles. Not this kind of gifting a diamond and all that. But so many miracles take place which are very different and people are writing books, on this I said, “Don't write to Me, you can write it yourself” because so many things small and big they tell us.

So in short you enter into the kingdom of God.

Now this kingdom of God is very efficient, very alert. And how it helps you, you'll be surprised in every day to day work, in your business, in everything. And the attention is so alert that there are so many artists who have suddenly become well known. You must have heard of Amjad Ali, Safar Hussain Khan, so many in India, Debu Chaudhuri, all these were ordinary artistes, have suddenly become very great. In Australia we have some painters who are now world-famous. Because your attention becomes very clean and pure, no more confusions. Confusions of modern times just disappear. And you start creating beautiful art which is appreciated. It's not grotesque, vulgar, but people appreciate and you get a name for that. I've seen people who are doing ordinary business have become big business. But they're very humble. They don't take to bad things, otherwise normally you give somebody hundred dollars, immediately he'll go to the pub, immediately. But then such a person who is enlightened has to do every day to day mundane work, his attention is absolutely pure.

Also, you'll be surprised in this attention your relationships with everybody improves. You can see a person have this. You don't have to give up your family, you don't have to give up anything. Also you don't have to fast for God, why should you fast? You can fast for your health but not for God. He's father, most loving father; He's Father of all the fathers and which father would like his son to fast because the son wants to meet Him? Absurd things. You fast and give all the money to the Brahmins or to the priests.

It's all nonsense. There's nothing of this kind which is Divine. Divine is love and love of a kind that makes you really enjoy a detached love.

Now the detached love is like this, that like a sap in the tree rises. It goes to various places and gives nourishment to different things and ultimately it evaporates or it goes back to Mother Earth. It does not stick to something. Supposing it sticks to something like a fruit or a flower the whole tree will die and the fruit and flower will also die.

So we get stuck, you see, “For my children, for my sons, for my this” this is what people do for corruption, what do they do. What's the use, whatever you have to do it, you should do it for everything. It is a category of people, very selfish, they just don't do for anybody else.

Some think better will do for their relations, some think better will do for their communities. But in Sahaja Yoga we work for the global peace.

Another point which is very important to understand that we respect all the religions equally the same.

All religions came on this earth as flowers of spirituality, all of them. But then people plucked it, “This is my religion, this is my religion” and now they're fighting with the dead religion. Why should you fight in the name of God? Simple question. All over the world they're fighting in the name of God, it's very shameful. But once you become one with the Divine, you become one living organism like that.

We have seminars everywhere, even in India we have seminars, we get people from sixty-five nations and I've not seen anybody fighting or anybody saying even a bad word to somebody. Such respect, such love. It's a new world, it's a new age, it's a new race that has to come. Such help, if something happens to somebody in Kuala Lumpur the whole of the world will try to help. All the people will try to help. It's such a one understanding that we are part and parcel of the whole. Then who's the other? Everything belongs to you. It's a great feeling, you expand and you'll be amazed once you get your realisation, once you become Sahaja Yogi all over the world you will find your brothers and sisters, all of them. You're not small, you're not just for your family, your house, no, but you must expand and this expansion comes when you have the light of the Spirit. You don't have to pay or you don't have to do anything, just to feel oneness, it's very beautiful.

Now the another quality of Spirit is that it is the source of absolute truth. If they put hands towards like that and ask questions, for anybody, immediately they know, immediately, what's wrong with that person.

Say if you take ten children, tie up their eyes, they're realised Souls, you ask them, “What's wrong with this person?" they will all show the same finger. Supposing they show this finger, means he's something wrong with his heart and you ask the person, “What's matter with your heart?" he'll say, “How do you know?" You don't have to go for diagnosis, you don't have to do anything. You can diagnose yourself and you can diagnose other people. It sounds very fantastic but we are fantastic. Like if you have a television and you take to a remotest corner of a jungle and tell people that you can see hear pictures and everything, ah, they'll say, “What, this is just a box, how can you see?" But once you put it to the mains it starts working and it is so fantastic that these ignorant people are all so amazed, how it is working. In the same way, it works.

So we have to know our own value. We have to know what we are. The greatest thing that happens that we jump in the ocean of joy. Joy is not like happiness and unhappiness. If your ego is pampered you feel happy; if it is punctured you feel unhappy, it's not like that. Joy is a feeling which is unique and you are just joyous, in joy within yourself. You've come here to enjoy, not to weep and cry and beat yourself, no. Your wrong idea. God who has created us is a very sensible person, isn't He? Why will He create us to be unhappy? But we in our ignorance and stupidity try to make everyone unhappy.

So this is the time, special time, I call it the blossom time where there are many seekers and who get Self-realisation. I was really amazed, of course in India it's growing very fast, no doubt, but in Russia, we have to

always take a stadium where at least eighteen thousand people could be seated and it is spreading so fast all over. It's like one light which is enlightened, enlightens another light. Now that light which is enlightened, enlightens another.

I'm surprised to see so many Sahaja Yogis in this country because we started with two or three to begin with. And suddenly it has now become so big. You don't have to pay, you don't have to worry. You don't have to read also much about it. Because by reading also what people get conditioned, you know.

Same Kabīra has said by reading too much people have become stupid. I've met many like that. You talk to them, they'll tell you, “Did you read this book?" You read yourself, why do you want Me to read all these books? It is spreading all over and it should spread here also and as it is, you are very great seekers, I know that and that you have come here all the way. I'm sure it will work out for you. But for that you must have self-confidence. You must have self-confidence, very important.

Another thing I confess I cannot force it on you because I respect your freedom, absolutely. It will take hardly fifteen minutes. But one thing, nobody should leave the hall when we are working it out. If they want they can go now but when people are working it out they should not disturb others.

Whether you sit away or near Me, you all will get your Self-realisation. It doesn't matter where you are sitting. The children can come in front, let the children come in front. If some people want to come in front, they can come also.

Now I have to tell you that there are three conditions which are very simple. One of them is that this All-pervading Power is the ocean of forgiveness.

So you have to forgive yourself. That means you should not feel guilty. On the contrary you should be very pleasantly placed towards yourself. You might have done some mistakes in the past; forget the past. What's the use of harping on it now? But if you feel guilty then you catch on this center here on the left hand side which is very dangerous. This gives you a disease called angina, a kind of a heart trouble. Also it gives you spondylitis. Also it can make your system of your organs very weak. Also you can get cervical cancer. It's a very dangerous thing.

So why should we worry about the mistake we have committed, finished now. If you were really guilty, you would have been in jail, you would not have been here.

So be pleasantly placed towards yourself.

Now the second condition is that we have to forgive everyone, without even thinking about them.

Whether you forgive or don't forgive, you don't do anything. But when you don't forgive then you play into wrong hands and you torture yourself, while those who have troubled you are happy. But at this moment very important thing is the center on the Optic Chiasma is like this, absolutely constricted and if you don't forgive it won't open and how will the Kuṇḍalinī pass through? So only thing you have to do is to forgive, by saying, it's a mantra, you can call it, that, “I forgive everyone in general." Don't even think about it because it's a headache.

Third one is very simple, is that you have to take out your shoes, because in England, first time when I told them, “Take out your shoes” half of them walked off. That's why I'm requesting you.

As you know there are two powers, left and right and the central path of ascent.

So the left, left side and right side being two opposite powers, one for desire and one for action, we have to keep our both feet apart. Those who are sitting on the ground are all right. Those who are sitting on the chair please put your both the feet apart from each other, that's all.

Now when we'll close our eyes, when I tell you, you can take out your glasses, when I tell you, not just now, not just now. Just now I will ask somebody to show you. Anybody, you can come. To show you how we will be nourishing, you will be nourishing your own centers.

So the first, we put the left hand on our left side lap, very comfortably. You'll get it very comfortably, I told you you don't go to Himālayas or anything, here you will get it.

So now put your left hand on your left lap, comfortably. This symbolizes one thing, that you're desirous of getting Self-realisation, Ātmā sākṣhātkar. This is to express your desire. Now Kuṇḍalinī is the pure desire while other desires are not pure. Because today we want to have, say, a house, then you want to have a car, then you want to have a helicopter and it goes on and on, we're never satisfied. It's a, it's a economic law that in general wants are not satiable, that means they're not pure, that's why. This is the pure desire. You may be aware or not, but it is the desire to be one with this Divine Power.

So you put your left hand which is meant for the mundane desire, left side is mundane desire, by which you should desire to have your Self-realisation. And with the right hand we'll be nourishing our centers, on the left hand side.

So we put our right hand on our heart. In the heart resides your Spirit; it's the reflection of God Almighty, while Kuṇḍalinī is the reflection of the primordial feminine power.

So you put your right hand on your heart where resides the Spirit. Now if you become the Spirit then in the light of the Spirit you guide yourself, you become your own master.

So we take down our hand, in the upper portion of our abdomen, on the left hand side which is the center of your mastery. Surprisingly, the center of pure Divine knowledge is in the lower portion of your abdomen on the left hand side.

So then we raise our right hand in the upper portion of our abdomen. Then on your heart. Then in the corner of neck and shoulder and turn our head to your right. This is the center which is in jeopardy when you feel guilty. Now, please take your right hand on top of your forehead and put down your head, as far as possible. This is the center where you have to forgive everyone, please put down your heads, forgive everyone. Now please take your right hand on the back side of your head and push back your head. Here you have to ask forgiveness, for your own satisfaction, without feeling guilty, without counting your mistakes from All-pervading Divine Power.

Now, please stretch your palm fully, like this. Now put the center of your palm on top of the Fontanelle bone area, the Tālu, which was a soft bone in your childhood. Through this bone, Kuṇḍalinī emerges out.

Now please put down your head as far as possible. Now important thing is to press back your fingers nicely so there's a good pressure on your scalp. Now please move your scalp seven times clockwise slowly. Push back your fingers, push back your fingers. Put down your head, please put down your head. Then you'll do it better, please put down your head. Now move it seven times slowly. This called as Brahmarandhra in Sanskrit language. Now that's all we have to do.

Now again see to it that you put your both the feet apart from each other. Put your left hand on your left lap and take out your spectacles now. You'll have to now close your eyes, not tightly but lightly as you sleep and please don't open them till I tell you.

Now take the right hand on your heart. Please keep your eyes shut. Now here you have to ask a very fundamental question about yourself. You may call Me Mother or Shri Mataji, whatever you like. In your heart you've to ask three times, `Mother, am I the pure Spirit?' Ask this question three times. I have told you that when you become the Spirit, in the light of the Spirit, you become your own guide, your own master.

So now please take your right hand in the upper portion of your abdomen and press it hard. Here you have to ask another fundamental question about yourself. `Mother, am I my own master?' Ask this question, three times, `Mother, am I my own master?' I have already told you

that I respect your freedom and I cannot force the pure Divine knowledge on you. You have to ask for it.

So please take your right hand in the lower portion of your abdomen on the left hand side and here you have to ask six times because this center has got six petals. `Mother, please give me pure Divine knowledge.' Ask this six times.

Now, as soon as you ask for the pure Divine knowledge, the Kuṇḍalinī starts rising.

So we have to nourish our higher centers with our full self-confidence.

So raise your right hand in the upper portion of your abdomen on the left hand side. Here, with full self-confidence, you have to say, full self-confidence, `Mother, I am my own master,' ten times. `Mother, I am my own master,' ten times. I've already told you that you are not this body, this mind, this intelligence, these emotions, this ego, these conditionings, but you are the pure Spirit.

So now raise your right hand on your heart and here you have to say again with full self-confidence, twelve times, `Mother, I am the pure Spirit.' Please say it twelve times.

I've told you this All-pervading Power is the ocean of knowledge, ocean of bliss, ocean of compassion, but above all, it is the ocean of forgiveness. And whatever mistakes you might commit, all can be dissolved into this ocean of forgiveness.

So forgive yourself and put your right hand in the corner of left shoulder and left neck. Press it hard and put your head to the right. Here you have to say with full

confidence, sixteen times, `Mother, I am not guilty at all,' sixteen times, `Mother, I am not guilty at all.' Please put your head to your right, turn your head to your right, please. I've already told you whether you forgive or you don't forgive, you don't do anything. But if you don't forgive, then you play into wrong hands. And at this moment, if you don't forgive, this center won't open and you won't be able to get your Self-realisation.

So it's very important at this time for you to forgive everyone in general, not to think about it.

So now please put your right hand on top of your forehead across and please put down your head and here not how many times but from your heart you have to say, `Mother, I forgive everyone, in general.' Please put down your head, that's very important.

Now, without feeling guilty, without counting your mistakes, just for your satisfaction, you have to ask forgiveness from the All-pervading Divine Power.

So now please put your right hand on the back side of your head and push back your head, push back. Here you have to say, again from your heart, not how many times, `O Divine Power, if I have done mistake knowingly or unknowingly, please forgive me.' Now, stretch your hand, the palm, fully and put the center of your palm on top of the Fontanelle bone area which was a soft bone in your childhood, all right. Now again please put down your head and you have to stretch back your fingers. Here again, I cannot force Self-realisation on you.

So now move your scalp slowly, seven times, saying seven times. `Mother, please give me my Self-knowledge, Self-realisation,' whatever you want to say.

Please say it seven times. Move your scalp, please. Not the hand but the scalp because you put, push back your fingers otherwise it won't move, push back your fingers to give, no no, push back your fingers, means outward, push back outward.

[Shri Mataji blows into the microphone.] Now please take down your hands and open your eyes, slowly, you can wear your glasses. Now please put both the hands towards Me, like this.

Some of you are already feeling the Cool Breeze but don't doubt. This is the Cool Breeze of the All-pervading Divine Love. All right, let's see. Now put your right hand towards Me like this. Right and put down your head and see for yourself, if from the Fontanelle bone area, you're getting any cool or hot breeze-like vibrations. Just put down your head and see for yourself.

Sometimes people get it close, sometimes nearer. It's coming out of your head, don't doubt. It's coming out of your head. All right, now put the left hand towards Me. Now with the right hand, please see if there's a cool or a hot breeze-like vibrations are coming out. Put down your head, but one thing is there, if you have not forgiven yourself or not forgiven others it will be hot.

So please try to forgive now. Now some people get it very close, some get it far away so move your hand and see for yourself.

Now please put your right hand towards Me again and with the left hand again you see on top of your head, if you're getting any cool or a hot breeze-like thing on your hands, on your palm. All right, now please put both the hands towards the sky like this and push back your head.

Here again you have to ask one of the three questions I tell you. One question is, `Mother, is this the Cool Breeze of the Holy Ghost as described in the Bible?' This you can ask three times, otherwise you can ask, `Mother, is this the All-pervading Power of Divine Love?' that is, Rūh, as described in Koran; or you can ask, `Mother, is this the Param-Chaitanya?' as described in the Indian scriptures. `Is this the Param-Chaitanya?' Ask anyone of these questions three times. Now, push, come down. It's all right.

Now please put both hands towards Me like this and watch Me without thinking. You can do it. Now all those who have felt cool or hot breeze on their fingertips or on their palm or out of their Fontanelle bone area, please raise both your hands. I bow to you. The whole of Kuala Lumpur has got it, I bow to you. Your saintly life has started but you must value it, you must grow. For that we have a center here, centers everywhere. Please attend, you don't have to pay, again and again I am telling you. But respect your Self-realisation. You have to become like trees now. I hope all of you will take care and look after your Self-realisation.

Thank you very much. Now enjoy yourself and enjoy everyone.

I'll come next year again.

Contents: 1995-03-13 **Talk to Sahaja Yogis, Kuala Lumpur, Malaysia**

So yesterday you had so many people, most unexpected and I was discussing as to how will you have your follow-up program. How will you do that? Because every house

at the most, thirty, even if you have ten houses, you will have only three hundred.

So these ten houses, which are the ten houses raise your hands, I would like to see, all right. Now near your house is there any hall, your houses. It's better that you book a hall, all right? Later you can also charge the people for the hall, doesn't matter, they can pay. All of you should book a hall close by, all right? So that when people come in you can make them sit there because I don't think you can manage with thirty people coming in your house and the rest will be standing outside.

So the best thing would be to find out some hall which is close to your place that will solve your problem, all right? Already we are so many.

So today I'm going to tell you what we have to do in dealing with these people, it's very important.

First of all you must know that they have come for the first time for Sahaja Yoga. And Sahaja Yoga is the power of love and compassion, not of fighting or arguing. Supposing somebody is arguing too much then what should you do? You should just give up. They cannot understand Sahaja Yoga with argument because it is beyond the mind. If somebody argues too much or speaks too much, just keep quiet with him. You cannot explain to a person like that, you'll just have a Āgñyā and all that from that person.

Now somebody who has been, say, to some Guru or somebody, you should not say that, `Your Guru was bad,' or anything. But you can say that, `I was also like you but it will be all right,' something like that doesn't hurt them. Then gradually they will realise that their Guru was

wrong. Now with some people I've seen TM people are dangerous. They come to Sahaja Yoga but they seldom settle down. We had about two hundred people from TM out of which I think only five, six who have settled down. They're all the time troublesome people.

Some people are from this Satya Sāi Baba. They have mostly heart trouble or eyes. Their eyes are affected. That's how you should make out people, their eyes are affected. We have say, somebody from this Rādhā Swāmī, they have heart trouble.

So immediately you will know also, their left Swādhiṣhṭhāna will be catching and their heart will be catching.

So with these people you should not argue or anything, just tell them, `Have you got these problems?' Then you will find people, I don't know which other Guru has come here, can you tell Me?

Sahaja Yogi: Guru Mahārāji.

Shri Mataji: My goodness! He is a..., he is now settled down with big money in America and he's married already but his disciples are absolutely useless. Don't try them because they are brainless, absolutely. Which else? See, this Rāja Yoga is a misnomer. What is Rāja Yoga, is like this. That when the Kuṇḍalinī rises then what happens that the centers open, to begin with and then they close, to keep the Kuṇḍalinī up there so it's called as bandha, all right? When it comes to Viśhuddhi also what happens, first the Kuṇḍalinī rises, then the tongue is little bit pulled inside, you don't feel it, Sahaja Yogis don't feel inside and this is called as Khechari Mudra. Khechari means it is pulled inside, Khechari Mudra. You see these

things happen automatically, like if there is a car. Now if you switch on the car it starts moving, its wheels, its everything, naturally. There's nothing unnatural.

So what these people do, they cut the tongue here, push it back, saying this is Khechari, now that has stopped because there was one organization called `Self-realisation', they used to do that. Then some people are doing bandha, but artificially for the Kuṇḍalinī should rise for which you are doing the bandha.

So these Rāja Yogis are doing artificial things. Supposing you start moving the wheel will the car move? Or you start moving the, one of the tires or something, it will all be spoilt. It has to be, first of all the connection like the connection of the telephone. If there's no connection and you go on moving it then what, the telephone will be spoilt. All these prayers and all these things are like this.

In the same way, mantras. They give you some mantras somewhere, all kinds of stupid mantras. If your Kuṇḍalinī has not moved up, if you're not connected whatever you say mantra is useless, isn't it? There's no connection. But the mantras should be very scientifically said whenever necessary. For example, supposing it is stopped here. If you say the mantra of the Nābhī you're doing wrong. That is how their life is ruined because they've spoiled their Chakras. By saying wrong mantras they've spoiled their Chakras, their brains are useless, I mean, they cannot become good Sahaja Yogis.

So what you have to tell them, if they have got this problem put your left hand towards the photograph with the light, put right hand here and they have to say, `Mother, I am my own master,' ten times. If they go on

repeating the `master' will run away, the false one who is there.

So this is the problem with the left-sided people. Now left-sided people suddenly become also prone to cancer and all these psychosomatic diseases, so they should take all the time three-candle treatment, but it should not be taken as a ritual, it should be taken as a Bhakti , as a devotion. Otherwise if it's just a ritual it doesn't work out. It's a Bhakti , it is devotion, you have to feel that devotion within your heart and then you should do it. Yesterday I felt very much the devotion of the people who were there, I felt very happy, I was very clear, I was very happy because the people who had come were mostly very clean people, they've not been to any Guru, to anything nonsensical, very nice people. Now even if you have been to some Guru it can be cleared out. But you must know that this Guru has ruined your capability to become a real Sahaja Yogi, to become a real Sahaja Yogi you have to have a very clean mind and a very clean central path.

Now one should say also harsh things, `You're a bhoot, there's a bhoot in you, you're possessed,' never talk like that. Sahaja Yogis must be extremely, extremely compassionate and kind. And don't argue, don't fight, nothing. Every Sahaja Yogi must support another Sahaja Yogi. You see, it's not that when there's somebody talking, another Sahaja Yogi should go and support the person who is arguing. You must always support each other because we are one, we are collective, see the point? So this one is a test also of our Sahaja Yoga, how we deal with other Sahaja Yogis. You have to respect

them, you have to show compassion, you have to understand them, you have to have patience. If they have any questions you should write it down and we'll write to Mother, in case it is difficult. If it is easy you should explain to them. But argument should be avoided because you'll catch from them. All bhootish people argue, they start saying, `This is not good, that is not good,' finding faults here and there. If you find anybody like that you ask him, `You get out of Sahaja Yoga, we don't want you here.' They're very troublesome people, so we don't want them, we want people who understand Sahaja Yoga and Sahaja Yogis. They always find fault with other Sahaja Yogis, they'll find faults with Sahaja Yoga. All such people you should say, `You go to some journalist and join journalism.' They're absolutely useless and troublesome people, all right.

Now second point is very important is that they have to recognize Me as one of the main conditions of Sahaja Yoga.

So far they've not recognized anyone of the incarnations, so far. And all incarnations tried their level best but nobody recognized them. But for Sahaja Yoga, this modern Sahaja Yoga, you have to recognize Me, it's a fact I'm telling you, very humbly. There's nothing, I don't want anything from you, nothing. I don't want anything. What is it, what are you surrendering? Is your ego. That's what Mohammad has said, Islam means surrender.

So surrender your ego. I'm trying to tell you that when you surrender your ego you'll open out completely. Unless and until you can easily be, absolutely dissolved into the ocean of joy, you're not a Sahaja Yogi. If you are

still dissatisfied, if you still think, `No, no, no, Sahaja Yoga could be better,' this thing, that thing. It's nothing, you have to be better and as yesterday we saw so many people coming down, we have to understand our responsibility. See, if I could do the work Myself, I would not have come all the way to Malaysia and Australia. But I need you people as channels for this energy. This energy has to flow through your channels. If the channels are defective, how can you flow the energy? So instead of correcting others, instead of finding faults with others, you better look after yourselves. Your leader is quite capable, he can look after the people, he knows what's wrong with what.

The third thing is very important that we respect all the religions, not only that, we worship all the great incarnations and all the seers, prophets with the same reverence. There's no difference. For us every religion is great but there are defects in every religion which we start seeing easily once we get out of this outside religion. Then we see what's wrong with this and then we start understanding and then we start correcting it. Not only that but also when we see our own community, immediately you will find, for example, I was saying that Malaysians have too many cars. And every car has one passenger, so all the Malaysians laughed because they don't mind, that's a fact.

So they do not identify themselves, they do not identify with their children or with their husbands or government or anyone. They identify themselves with Me in Sahaja Yoga.

So what is wrong in your community you should see, if you cannot see then you are not a Sahaja Yogi. Because you're outside, outside that community now, you're a Sahaja Yogi now.

You see what's gone wrong with your community, where they went wrong, what wrong they did and that's how you can really show them by your own behaviour.

In your life, how you behave, how you talk, how you love others, how you respect others, it's very important. Your image is the one that is going to carry Sahaja Yoga very far. Just one article has brought so many people. You will be surprised that, of course, forget about Australia, because Australia I've been going for years together and there's too much of Australia. But otherwise Japan or, say, other places I go to, here and Hong Kong, tomorrow I'll be going to Thailand, I'm sure we can never get so many people as we got here. We can say because there are so many Chinese and Indians who are culturally about the same people. It's very difficult to teach anything to these Western people. I used to break My hands, you know actually, because they're so conditioned, they have no tradition, nothing. But now they are changed so much, so much changed. They are such wonderful people, you know. I'm going tomorrow to Thailand, twelve people from France are coming to help us, can you imagine? All the way they're coming to help people in Thailand, they've no relationship with Thailand.

So that shows that we have to help each other.

If you need any help, I told him that if you need any help in money or in anyway, all the Sahaja Yogis will help. Have a proper things to do and one can work it out. He

said we're self-sufficient, now you'll be much more than self-sufficient. And if you tell them that we have to pay for this hall, all right give one dollar each, they'll definitely give. You're not paying for Self-realisation, for anything, you're paying for this hall, clear-cut, one should be honest and clear-cut. And say we're doing this or that because we don't have any Guru business here, you see, they're all commercial people. What we need is a hall to meet every weekend, that you find out near your house, all right? Now, another thing is that I was saying that every month end or maybe two months end you should go out somewhere for picnic or something where you all should meet. That's how it has spread in Australia.

If it is possible or if you can meet in one big hall but it is better to have a picnic-like thing with all the children there, food there, enjoying yourself for the whole day. You've such beautiful forests, such beautiful greenery here, you can go anywhere if you like and the company you'll enjoy is only of Sahaja Yogis, nothing else you'll enjoy, if you become the real Sahaja Yogi. Talk about this to your friends, tell them about this and try to get more and more people into Sahaja Yoga.

I think I was really so impressed yesterday, it's all due to your own great help, I should say, the way you have worked and brought it to that level. It is unexpected, absolutely unexpected and it has really given Me the greatest pleasure.

Now if you have any question you ask Me.

Question: Is there any swayambhū in Malaysia?

Shri Mataji: I don't know, I haven't seen any. Must be, they're everywhere. It's not important because

swayambhū, only thing is that is created by Mother Earth spontaneously and emits vibrations. If you go there you can testify it, that it is emitting vibrations but it cannot cure people, it cannot talk to people, it cannot give realisation to people.

So you're much greater than a swayambhū, you see? Much more effective. What are these swayambhūs doing for years together? Nothing. They can protect of course, protect you, but they will always protect you as soon as you become a good Sahaja Yogi you're always protected.

Now the miracles are quite a lot. Also I'll tell you about some miracles that have taken place, they are taking place everywhere. But last miracle that I heard about was in Delhi when one girl about fourteen years of age by mistake put a revolver of her father here. And she triggered it. And this bullet came out of here with some blood and there was a hole here, small and a big hole here and she was quite conscious.

So they took her to the hospital and she was conscious, x-rayed her, everything. They were amazed at it that this bullet has not touched any bone, any lung, any muscle, anything. And as if it has strolled like that, it came out. I think her all the ganas must have helped to come and make it out, but it's a big miracle and it's a fact.

So there are so many miracles like that that happens suddenly you are, spontaneously find things, spontaneously everything works out and you're amazed how these things work out. Now when this happens you can write it down, you can send it over to people in America, maybe in India. There're so many miracles like that that are happening. But there are some people who

start suddenly thinking that they're Mahā Yogis, they're very dangerous people. They start seeing things, they start talking big, they think, `I'm a Mahā Yogi.' There was one who said, “I'm Ādi Shakti." I said, “All right, you send him some of My sarīs, I've too many of them." So there are stupid people like that also. They think they're something very great, Mahā Yogis. And they start saying, `I'm this thing, I'm that,' it's horrible.

So such people if you find you should immediately let Me know and also tell that person, `All right, you Mister Mahā Yogi please go away.' There are everywhere like that, they do all kinds of things and talk like this without any sense in their head.

So you have to be careful about it, not to be impressed by such persons who say this is this, this is this. There is nobody like Mahā Yogi in Sahaja Yoga, everybody is the same.

Question: [about boy in Canada who had seen Shri Mataji in his meditation.]

Shri Mataji: He has not seen Me or what? He's not seen Me before? Where is he, Toronto? Quebec? I've not been there but could be possible he's a great soul, it's possible. If you see Me in dreams it's good, very good to see Me in dreams. He must be seeing Me in dreams, I think. Could be, now I give up. You see, so much is happening. Like we had some photographs taken in Jaipur.

So I'm not there at all, I mean, just all vibration everywhere, you have to see very microscopically I'm somewhere, My face.

These vibration are, sometimes you cannot explain. Have you seen all the vibration photographs? It's so much, with deities sitting, this, that. I give up now because this is all done by Param-Chaitanya, it can do anything. These vibrations might appear in some mosques, in some temples, might.

Question: [about ascending beyond the Sahasrāra.]

Shri Mataji: First fix it up the one you have got it, all right? Now don't go on futuristic, then you'll become mahayogi. You go automatically, grow automatically, spontaneously in a Sahaja way when you're in thoughtless awareness. Try to increase that area, thoughtless awareness. Then you will automatically grow. Does this flower thinks how to grow? No, grows spontaneously, all right? In the same way you will grow when you just become thoughtlessly aware. And you will know your growth and you'll become doubtless about it, all right? You can watch on My Āgñyā in the photograph, can become thoughtless.

Thoughtless awareness is very important for, the first to establish yourself. Once you start establishing thoughtless awareness the doubtless awareness comes and then you are just settled down with yourself, you don't think of future or past or anything, you are with yourself, all right? Real growth is natural and Sahaj. This is not artificially growing isn't it? In the same way, it's a living process of growth.

Question: [on environment.]

Shri Mataji: No, we should be careful, at least as far as we are concerned you should be concerned about the nature and you should be worried about it, no doubt. But

as Sahaja Yogis, you'll be amazed that environment clears, it clears out as Sahaja Yogis and you won't be so much affected by environment so much. It clears out environment also. There is one experiment Hamid has done. He's done it in Austria where many trees were, had become dwarfed and burnt away like with this acid rain that comes from the environment.

So he went there and experimented with some vibrated water but with so many trees, he didn't know how much to put vibrated water for them. It worked a little bit.

So then what he did, he took the badges you wear, you see and pinned them on every tree. Not every tree but every ten trees.

So he said that he went after two months and he found the whole thing had come up except for the trees which were about sixty years were not responding so much. Otherwise every tree had become great.

So you just can imagine what happens.

He also experimented for growing more wheat.

So he couldn't put the vibrated water to the whole field, it was very difficult. There's a pipe going like this.

So what he did, in the pipe he put the ring that he was wearing with My photograph and he experimented with that, can you imagine? So it is very effective but I think it's more your Śhraddhā in that photograph works out. But in India we get a kind of a dosa, we call it, like a funnel it is, it has two sides in which you can fix the two sides of a pipe and you can put vibrated water in that. It's so remarkable that one of our fields had been put with the raw cowdung by somebody and all the small little, all

kinds of insects, they crawled up to the leaves and were eating them.

So we put the dosa and put the vibrated water, they all run away.

Vibrated water is very good. Tomorrow I'm going to leave vibrated water in NG's house, everything vibrated but it depends also how you treat it, it's very important, with respect. Respect is very important in Sahaja Yoga. If you do not respect that vibrated water it may not act because it thinks, vibrations can think, it loves and it thinks, must understand this point, it thinks. I've seen people who try to make some money out of Me and absolutely in big trouble. I didn't give them trouble Myself, they're in big trouble.

Anything they try to do to Sahaja Yoga immediately they have some sort of trouble. I think these deities, you see, when My attention is not there they try to do something to them.

So one should not in any way be disrespectful and nobody should think that they have a special relationship with Me, some people think like that, that they have a special relationship with Me, such people will go of in Sahaja Yoga in no time. Nobody have special relations, I'm alone.

So this idea also that, `I have a special relationship with Mother,' all these things can be very detrimental to your growth.

No you have in your houses, say, little gardens or even tree or something is a good idea and put vibrated water, also you can drink vibrated water. Take little vibrated water and you can increase it in another bottle with other

water but never put your hand into it, just take out with a spoon which is kept separately for that. It's very important because everything has vibrations, bad and good. What other question? Question: [about havan ash.]

Shri Mataji: Havan is very good. Apart from three-candle treatment you can do also an Ār.ti with the camphor, you can do havanas, it's very good. But this is for the left-sided, not for the right-sided people.

Question: [about Dharamsala school.]

Shri Mataji: Yes, why not? You can but first find out how many seats are there and things. It would be nice, please send them. Everybody is allowed. You have to pay, how much? You should find out how much to pay, it's not much compared to what we pay in schools, in Western schools or in Malaysian schools, it's a very good school, no doubt, it has changed the children completely, made them beautiful, no doubt. But only thing you should find out is if there's a seat for the Malaysian children also. You write to Yogi or to Dharamsala school, you have no address of Dharamsala? Nobody has? You tell your leader and he can find out. You find out first how many children are going, you can telephone to Yogi. Yogi is nowadays in Delhi and now if you have to send you have to do it fast because they're opening after My birthday. You need a visa for India? You need! Because you see these people started having for us, so Indians are vindictive now. They are after all Indians, why should they need. For no one they should have visa business, nonsense it is. But still the world has to be one. What else? Question: [about life being meaningless.]

Shri Mataji: Because you're not working for Sahaja Yoga, your life is now for Sahaja Yoga. You dedicate it to Sahaja Yoga, that's why, all right? If you dedicate your life to all kinds of nonsensical things then you think like that. But if you dedicate to Sahaja Yoga then there's a meaning to it because now you've found our your identity, all right? Question: *[UNCLEAR]*.

Shri Mataji: You can do it, nothing like it. I've done it on stations and on the roads, today in the shop but if you can do it properly then you do it. You see, by talking to people they will find you are very peaceful, you're very quiet, then they'll ask you, “How are you so quiet? How are you so peaceful?" And your face also shines, so then you should say about this, specially if you are wearing My badge then they'll ask, “Who is this?" See wearing a badge is a very good way of propagating Sahaja Yoga, I've seen.

Now you should put it here, why the bag. Not in your job but on the way going somewhere and on your table you can have it in your job. If they ask, “Who's this?" you say, “My Mother” finished. I look like Chinese, I look like everything. When I'm in Russia I look like Russian, when I'm in Spain I look like Spanish, so it's all right I look like Chinese. In China many people thought I was Chinese. It's better to have photograph when you're travelling around, also you're protected. People will ask, “Who is this?" You should say. But for job you can have it on the table if you like.

Question: Can we give realisation on the spot to a person?

Shri Mataji: So you see, what is it you should pray to Me that, `Mother please give him Selfrealisation,' finished.

Question: *[UNCLEAR]*.

Shri Mataji: There's no difference at all. You see, My own daughters are not as fair as Myself and My own brother is very dark so you can't say in India we have all complexions. Yes, what is it? Question: *[UNCLEAR]*.

Shri Mataji: It has to begin with, you see you're conditioned by that. By your previous life your Karmas, you're conditioned in the beginning but the whole thing drops out, whole thing drops out. On the contrary whatever good you were comes out. All bad things drop out. Supposing you were a seeker, you went to wrong people, you did wrong things, doesn't matter, all will drop out, your goodness will come out. May God bless you.

Question: [of playing Shri Mataji's tapes in the car.]

Shri Mataji: It's all right. You see you must only ask for forgiveness, that's all. Respect is the thing.

It's not like other tapes, so you have to respect, respect is the best way to grow in Sahaja Yoga, I've seen, respect.

Question: [about Sahaja Yogis being put to the test by Mahāmāyā.]

Shri Mataji: Who told you that? They just create stories, you know, like that. On the contrary it's very different this year I must give you a good news that two people came to Me for their blessings, you see, one was known as Mister Advani and his wife. They belong to the Bharatiya Janata Party, you see.

And then the other *[UNCLEAR]* is absolutely at My feet.

So they both are now elected and this horrible fellow,... ah... [Hindi].

Sahaja Yogi: Sharad Pawar.

Shri Mataji:... ah the prime... the chief minister who was there in Maharashtra, Sharad Pawar, one of the worst, he's resigned already.

So I mean, now in Maharashtra we have our own people [Bharatiya Janata Party], not only that but the same party [Bharatiya Janata Party] has come in Gujarat. Moreover I'm sure with this thing they will also succeed in coming into Delhi. Then we'll have our own say, Sahaja Yoga will have its own say because I've given realisation to both of them.

So there is no Mahāmāyā testing going on. They just try to frighten you. It's your stupidity sometimes that people don't realise and do things which they should not. I do not want to test anyone. Say you are under My protection fully but if you want to go away from My protection, I can't help it, there are negativities all around, they catch you.

So it's not My testing but it's your own testing yourself. Delhi people just want to frighten, they're very anxious that I should have My birthday in Delhi. All right, now they are getting Seshan, you know Seshan, the fellow who was busy with the elections, he's going to come and speak for Me. He met Me in a train and he was very sweet and humble, he touched My feet and he said, “Mother please protect me." And now he's going to speak.

So all such good people are coming up, so it's a nice idea.

So Mahāmāyā is working on the other way round I think, getting good people here.

Question: *[UNCLEAR]*.

Shri Mataji: The less said the better, terrible people. I've been to Madras [Chennai] so many times.

When I go there the hall is full. After that everybody disappears. One Mister Moorthy was there, he said, “Mother all the goodus are born here” I said, “Why?" They do all kinds of funny rituals, you see.

They take out the hair of women, put the water on them. These Brahmins, you know, terrible. They have befooled everyone there, they have befooled even the Brahmins, what to do? I'm trying My level best. I want to go Kerala also, we're trying. Last year I went there, I was very disappointed. And the Sahaja Yogis also some of them are very funny, very funny. It's all right, I think gradually everywhere it will work out but see, Punjab, it's growing so fast. They said you cannot control it, it's so fast, they said this time Mother had to come to Punjab. Otherwise I will go to all Delhi. Then in north India, you'll be surprised in place like Haryana where people didn't know who was Dattātreya, you know even in U. P., nobody knew Dattātreya. Such Sahaja Yogis. There were thirty five gates they raised for Me on the road when I went there, thousands and thousands and thousands. In Delhi itself there are sixteen thousand Sahaja Yogis. I used to call *[UNCLEAR]*, now that has happened.

So you can't say, maybe some turning point.

Bengal another place, I always have now My program in a stadium. First time I went there in the hall there was only one person and all were looking at one Tantrik who

was beating himself like this. Now same Bengalis you see, you ask them they said, “We're *[UNCLEAR]*" means some Guru has put something on their heads, all kinds. And when that was over now gradually you can imagine in a complete stadium full in Calcutta [Kolkata]. I'm surprised at Punjab also, how the Punjab has taken on. Last time when I went, of course, to Chandigarh the whole hall was filled, at least four times bigger than this and Sahaja Yogis had to go outside and so many Sikhs came there.

Question: *[UNCLEAR]*.

Shri Mataji: What do you mean dry? You start crying? It's all right, it happens, you'll be all right.

You see emotional things are there now within us, many people who see Me, first time they start crying and I also cry with them. This is love for Mother. It's all right. That is conditioning that you want to touch My feet. My feet are everywhere, all right? The thing is if you touch My feet everybody will touch My feet. In the beginning I allowed, so My feet swelled like that, you know and in Maharashtra then one gentleman he said, the leader, that nobody should touch Mother's feet, so they started beating him.

Indians unless and until they touch My feet they never feel satisfied. But you must have some mercy on My feet, you see, they have to do a lot of work. They get very swollen up.

Question: [on vegetarianism.]

Shri Mataji: Vegetarianism is not a bad thing and it's not something purnivan also, if you don't like, don't eat. If you like it, eat it but you shouldn't say that eating meat

is a wrong thing because the animals aren't made for us, everybody used to eat meat, Śhrī Rāma used to eat meat also and also Śhrī Kṛiṣhṇa.

So because they were Kṣhatriyas, you see, they were Kṣhatriyas, are you a Brahmin? You are a what? Kṣhatriya? You're not a Brahmin? It's all right, if you don't like, it is, you see, whatever suits you.

Now for Me I will be surprised, I can't eat vegetarian food much, immediately I will get diarrhea, no the Goddess has to have meat. Though I may like or may not like I have to eat it, what to do. That's My swabhava.

Question: [on the pronunciation of mantras.]

Shri Mataji: It won't have any effect bad on you but you have to use My name with the mantra so that you are doing all right and nobody will trouble you. But you don't say wrong mantras normally but if you are saying something wrongly then better get it corrected but My name should be there otherwise nobody will listen to you, it's a recommendation.

[Shri Mataji speaks in Hindi.]

Contents: 1995-03-16 **Talk to Sahaja Yogis, How to Talk to New Comers, Bangkok, Thailand**

We had lots of people, I should say for the program. By the time I started the program there were many people coming. Now the problem faces you is this that when I go away, there are very few Sahaja Yogis left here and they have to look after the newcomers. And the problem is like this that you have to deal with them very carefully, because, you know, they are now yet not such Sahaja

Yogis as you are and they don't understand what is Sahaja Yoga.

To get realisation is very easy, but to become a Sahaja Yogi is a difficult thing. It's a very deep growth that you require to become a good Sahaja Yogi. As it is they are coming just now from that human awareness, which you have to make a Divine awareness.

So it's a very difficult task I must tell you, so with all compassion and love you must deal with them, should never talk sharply.

Sometimes Sahaja Yogis will say, “Oh, your, this Chakra is catching” or they say, “You have got this bhoot in you” and all sorts of things. Then they get, you know, quite shocked. You shouldn't say all these things. Then if they tell you, “He has been to this Guru, that Guru” in the beginning you should not condemn also any Guru or anything.

So, all right we have many like this, but they are all right now. But you can take also upon yourself: “`I was also like you, you see." Somebody says, “I doubt." “All right, I was like you, now I'm all right” so they don't feel so hurt. It's the most important thing is public relations.

Now I'm surprised at Myself, because I'm a foreigner everywhere and so many come. And when it comes to the program and all that follow-up, they disappear.

So can't understand what's the matter with them. Why should they disappear? The reason may be, I don't know whatever the reason is, that they are not such serious seekers, maybe they are Guru-shopping, maybe you see, they are going to many places.

You just can't say why it is so.

And this will be a very big challenge to all of you, because you are few and they are maybe more.

So they will see from your own character, from your own style how you behave.

So always support each other.

See, many people start supporting other people instead of supporting Sahaja Yogi and sometimes they even discuss and argue.

So between Sahaja Yogi there should be no discussions, no argument, nothing.

You understand? Anything that you have to do it, you should do it separately, not before the newcomers, because that creates the worst impression and they think that there's something wrong with these people: “Why were they arguing among themselves?" So you have to just support only Sahaja Yogis and nobody else. Others are others, we are all one.

Once they come to Sahaja Yoga they will also realise. But this sometimes also upsets them very much that we are all the time quarreling, fighting, saying things, as if we are not one.

Now only thing you have to tell them that, “You see, now if you have a Guru, what has he given you?" is the point. “Whatever you have given is all right, but what have you given him is not the thing. What he has given you? Has he given you the knowledge? Has he given you Realisation?" You have to tell them" “Did you get your peace? What did you get?" This is what you have to tell and what you can get in Sahaja Yoga.

Best thing would be to play My video tape and let them see for themselves. You can play it for half, whatever way you like. And then see if they have any questions, you should very silently answer them.

Then you put them into meditation. Don't talk to them too much in the beginning, because that will spoil you and spoil them. All right you sit down for meditation, let us see. Then you can just go and see on their heads if there is Cool Breeze coming, hot breeze coming. And also tell him how to meditate. Then they will ask you how to meditate. Then you have tell them this is how you have to meditate.

Now you should see whether they are right-sided or left-sided. And accordingly you have to tell them what they have to do. But in a very gentle and a sweet manner assuring that you will be all right. There's no problem. Now if they have anything to report, they are sick or something, you should say that, “We'll tell you how to do it, but we'll also write to Mother” and you can write to Me through your leader.

Now we should know that we are believers in the power of love. And so we have to be very gentle with people. And not to be angry, upsetting them or saying things which can upset them. Like a businessman when he has to get people, he's selling something, he is extremely nice and gentle.

So now we should say we are selling Sahaja Yoga for nothing. Now you have to give them that security that peace that love, among yourselves you should really behave in such a manner that they should really feel that you are people, who are deep and you are enlightened. If

one person is talking, another should not jump in. Let one person talk and another should look after another person. All this is going to help you very much to make the Sahaja Yoga grow here.

Now you know I've been to Kuala Lumpur at least five, six times and this time it was about more than four thousand five hundred people, four thousand five, apart from Sahaja Yogi. Sahaja Yogi also increased a lot.

So to begin with we had about three, four people like that, doesn't matter. I've been here only twice, so of course it is going to take time. I'll come again and again. And I'm sure within three, four visits you'll have large and large numbers of Sahaja Yogi. Firstly I was surprised in the market all the ladies were bowing to Me and they were saying, “Give us blessings." All the men were bowing to Me.

Anybody who sees Me bows to Me. It's very surprising. That means there is already the awakening has come. The people are realizing there's somebody, who is something, who can do good to them.

One other very encouraging thing is that we got a princess, who became a nun and who is looking after the misery of women in this country. She is very influential. She got her realisation and she appreciated what I told her. Then another gentleman, who is very influential, he and his wife both got realisation and I cured his wife.

So they have a great influence in the society, so they can definitely help you very much in getting people of elite societies, educated people, all kinds of people.

So that your *[UNCLEAR* I think] will be strengthened. Also there are lots of Sikhs and Punjabis here. It will take

some time. Like I used to go to Delhi; I went there for about at least ten years and what we find, nothing happened, very poor. But now there are sixteen thousand Sahaja Yogi, who are practicing Sahaja Yoga and it spread to other places: Noida, then Ghaziabad, then in Haryana, Faridabad and Yamuna Nagar and all that, then in Dehradun, also in Haridwar.

I was surprised, I got into the train at Dehradun and the train went to Haridwar and I heard people singing My jay jayakar and also the music. I said, “Who are these people?" And there were at least three thousand people at the platform. Then I came onto the door, I stood there. They behaved so well; nobody tried to touch My feet or anything. Such love, such understanding I cannot forget. Unexpectedly suddenly you find people are singing your praise there. Very, very sweet *[UNCLEAR]* and it was so sudden. Last year it happened, this year again. I couldn't go to Haridwar, I could only go to Dehradun. I think in Dehradun we are twenty thousand people.

You see the Western people are very conditioned people. It takes time, but once they get it, they get into it. They understand. I don't know how I could achieve all these things with the Western people and also Indian people, but the greatest surprise is Russia. Where in one place we have twenty one thousand Sahaja Yogi, who are practicing Sahaja Yoga. See, for example in France there are no practicing Christians, the practicing are Muslim, there in majority. Was it surprising? And that's why they are after the Muslims to get them out and they are also after us. But by getting after us, they are not going to

establish themselves, this they should know. They cannot establish themselves.

Things will improve now in France. We'll have to do lots of things about it, how they are racist and how they have been misbehaving. And the Catholic Church has taken over there, I mean I can't see any sense in. The Pope is another horrible fellow. And then they are doing all kinds of nonsensical things everywhere. In Canada they are spoiling children, molestation, horrible things they are doing. In France itself, but in Italy is the worst. They found one man dressed up like a lady, walking on the street, he was a priest. And then Austria, Austria is the limit. They got hold of one priest with some lady and this priest confessed there are many priests who are like us. And they go in the daytime, they have their friends, means these ladies, married ladies and some of them have children from them. And they go on a bicycle in the daytime so that there is no noise. But when Vatican was asked, “Why don't you allow them to marry?" So they said that, “You see, because we have no money to pay for the widows." Can you imagine? This is the situation of this Catholic Church and they think no end of themselves.

So we are going to bring all these things out, now there's one fellow writing a book about it. One should not worry; everything will work out very well now in every country, wherever there is Sahaja Yoga.

I never expected Americans to come to Sahaja Yoga. They are in now in thousands also. It's very surprising how they have taken to Sahaja Yoga.

So we have to be very careful, we are the messengers of God. We have to be careful not to use any bad word, angry word, but very gentle and sweet words. And to each other between husband and wife there should be full understanding. And the children should be treated very kindly and sweetly.

So best of luck and I want to thank all the Sahaja Yogi, who came from France. Shows our collectivity is so strong and how they got the ticket also, just see the Divine how it helps you. I can't believe this ticket of yours, can't believe it.

So everything works out and works out beautifully.

So I hope to see you again on My birthday. They are already five hundred, who are coming from abroad and some of them are already there. I wish I could have brought some presents for you, but you know this travelling business and then customs, very difficult.

So now I have to get ready to go and I am very thankful to you to do this job. I'm asking him to come here permanently. Prakash should be here permanently. That would be such a help to you.

Thank you.

May God bless you.

Contents: 1995-03-18 **Holi Pūjā, Holi Message, Sahaja Temple, New Delhi, India**

[SYNOPSIS!] [People Celebrate Holi only on the outside, the real Holi is to be burnt within first. This means the negativity within has to be burnt first. Delhi being the capital is full of politics. Sahaja Yogis absorb this politics and it spreads in the Sahaja collectivity like u. We cannot

ascend by it. We should not form any groups or believe to any caste.

Some one like Narad muni comes along and fans the flames of animosity one against the other. But we should not play into the hands of such people. We should realise that our relationship is with Mother only.] [Delhi people should not fall into wrong identifications, like they belong to Delhi, etc. When we are talking of the ocean how can we name or count the drops that form the ocean. Only giving importance to your own people is not a good thing. Don't gossip and don't listen to gossip.

Some people are gossip mongers, ignore them. People will be able to see through them. Keep everyone happy.] [We should wash away all our sins of this life time so that next life we come as saints. Do not allow negativity to creep in. Firstly, negativity comes from aggression secondly from badhas, but thirdly from hypocrisy where you deceive yourself. This negativity is hidden within so we cannot see it, but we go on doing the wrong thing. Śhrī Kṛiṣhṇa said, first burn the holi you get from anger, desire for vengeance, badhas, jealousy after that you celebrate the festival of holi. Don't be jealous or pretend all the time.

Don't do this otherwise you will get badhas. The best way to overcome negativity is to forgive. Say the Mantra `I forgive', our greatest Shakti is forgiveness.] [The door of Sahaja Yoga is open for everyone. All kinds of people come in. If some one tries to deviate you from the path of truth, shun such person. Beware that you are not being influenced by negative people.] [If you truly believe that I am the Goddess, then more than My powers try to

imbibe some of My qualities.] [When we introspect we cleanse ourself. Negativity spreads very fast in collectivity, on the other hand one strong Sahaja Yogi can transform the entire collectivity. This is the miracle of Sahaja Yoga.] [Don't look at other's faults, Mother is there, She knows about everyone. You should only look at your own faults.] [When you burn the inner negativity, you become pure gold, then you can give joy to others. Increase your power of forgiveness then your right side aggressiveness will go. People aggress on Shri Mataji to remove their badhas, but you should say how dare any badha stays' when a person has a badha he should not associate with any other with a badha.] [Some people assert a right on Sahaja Yoga like one Sahaja Yogi had a problem because there was bandha in the house. Shri Mataji told the person to shift from that house. That person did not shift but insisted on constantly Phoning Shri Mataji to remove his badhas. If people do not listen to Shri Mataji how will the badhas go.] [People with badhas should keep away from Shri Mataji for a year and stay in the background, otherwise the badha will not leave.] [Protocol towards Shri Mataji is very important for your ascent.] [Inner awareness and a good attention is very important for burning your inner negativity. Only when it is burnt can you ascend on Nirmalā Tattwa. Then you celebrate the real holi, enjoy and play with colour.

Sahaja Yoga's Holi should be the Holi of Śhrī Kṛiṣhṇa. But people do the opposite of Śhrī Kṛiṣhṇa. Śhrī Kṛiṣhṇa never took any bhang.] [Our aggressive nature and `bhoot' is the same thing. To enter the sea is easy but to swim in it is difficult. The same is the case with Sahaja Yoga. Those

who want to stay in Sahaja Yoga should increase their Sat Guṇa. Such a person shines with the power of truth.] [Talking too much interest in food is not a good thing. I am not fond of any particular food. I only taste delicacies to please you. Too much interest in food spoils the attention. The expression of one's likes and dislikes is not good. It is the ego.] [Christ has said, “hate the sin, love the sinner" love cleanses everything. Sahaja Yoga will spread through love only. Increase your love. Look to the comfort of the spirit, not the body. First the leader, his wife should *[UNCLEAR* clearne] himself and then through love they should spread it to others. Sahaja Yoga is spreading very fast but people are not deep. You grow in depths by your dedication. Prayer should come from the heart, it should not be lip service. If you want to find pearls then you have to dive deep in the ocean. Keep on going deeper and deeper, increasing you depth. Go on burning the negativity within.

Likewise you can also burn the negativity of others because you are their leader.] [This is the essence of Holi.] [May God bless you.]

Contents: 1995-03-20 **Birthday Pūjā (Hindi+English), Nizamuddin Scouts Grounds, New Delhi, India**

[Chief Election Commissioner T.N. Seshan speech is MISSING.] [Shri Mataji talks in Hindi: MISSING.] [Shri Mataji talks in English:] I am sorry I had to speak in Hindi language because the majority of the people know, understand Hindi.

In the Western civilization, suddenly I find people have taken to a very licentious, vulgar, despicable life.

I can't believe how can they be so stupid and idiotic. It seems they have no wisdom even to see that this is stupidity.

Thank God, you have achieved this Self-realisation, you got the Light, you are so transformed, you look so beautiful. And that you have given up all those funny ideas of freedom. It's so clear-cut. This must be, I don't know what to say, that in those Western countries, to find out people who have such wise understanding of pure love and respect for your own purity. As if suddenly you have come out of that darkness and have bathed in the light of the Divine. It's not possible otherwise. See the history of the Western countries is they never had very great kings, you know. One king in England, killed seven wives, you know. If you, In India if one wife was killed he would have been killed, first of all, before he killed the second one.

So, one sees that, despite all that kind of a history and that kind of a vulgarity that has been going on for days together and now it is the worst after war.

Suddenly you people have come up like lotuses and have made those countries so fragrant and so beautiful. But now they are afraid because they believe in licentiousness, they believe in vulgarity. They think it is their freedom, so they do attack, but you are not to be bothered because you have achieved something that is real, that is for eternal life. They supposed to be Christians, Jews and also Muslims there. Among all of them I am surprised to see how they have interpreted these three great religions, in the most contradictory way. For Christ has said that if you make any sin with

your eyes, commit some sins, then remove your eyes, yourself. If one hand does anything wrong, you cut that hand. I have never seen anybody without an eye or without a hand in the whole of this Christian kingdoms, nowhere. They can cut other's, but their own eyes I have never seen.

It is very difficult to be a Christian, I tell you, because this is an impossible situation. For that, we can say that it, this was for angels, must be, for the fallen angels that you take out your eye and cut your hand. And then Mohammed Sahib has said, he thought that why only the men are handled by Christ.

So he says no no, not that you cut it, but let others cut your hand and take out your eyes. And for women it is so, that they should be buried in the Mother Earth half way and should be stoned. Think of American women, what would have happened to them? So, very difficult to follow Islam also. Impossible.

They were very great people, very pure and they thought that this is the only way people can be kept pure. No, on the contrary with all these thing, compulsion they become extremely immoral. This suppression doesn't help. And then also, this they call it one that is Islamic laws, Sharia, was actually given by Moses to Jews. You can find it out in the Bible. It was given by Moses to Jews and the Jews would not accept it because they were sensible to say, we can't accept this much, too much.

So that was taken over by Mohammed Sahib, better put it for these people. But with all this doing, people become extremely immoral, extremely quarrelsome and go to the other side and such an imbalance is created.

But after Self-realisation, the Sahaja Culture is born within you. With the Sahaja Culture you come into balance and people are surprised at the Western Sahaja Yogis, that Mother how have you made their eyes so pure? How can they get rid of these bad habits of looking at every woman or every man? What have you done to their eyes? How have they become so pure? It is the light of your own spirit, which is shinning through your eyes. It's very important.

Again, I would say, that the women in the west have to understand what is Sahaja Yoga. Not dominating anyone. Here the women are dominated, not always but to great extent. And there what you find that women are dominating. Firstly they believe in divorce and they try to harass people with that. This domination, may be we can say comes from their upbringing. But Sahaja Yoga should change completely your ideas and there should be no domination but a complete understanding about which I have told you many a times and explained to you.

Still I must say I am overwhelmed by the response. And on behalf of the Divine Power, I would like to thank you very much. It is really a new race that has come up, really.

Somewhere, somebody goes wrong or something happens. Doesn't matter. On the whole it's such a beautiful race of people. I face them before Me. Even in dreams people could not have believed it. They don't yet believe. But it has happened, you must now have an enlightened faith, which we call as `Śhraddhā'. With that enlightened faith I am sure you will adhere to the emancipation of human beings. It's your duty now. It is

all given free. Of course, Sahaja Yoga is free. You can have it free; you don't have to pay anything, all right.

But, you have to give to others. That is very important. It is free to you and you cannot keep it to yourself. If you keep it to yourself, you can never be happy, you can never be joyous.

So you have to be absolutely collective and then you will see how it works out. Very surprising in all the European countries, in America, South America, Australia, Japan, Hong Kong, Taiwan, Kuala Lumpur, everywhere. I have seen people have become collective and they told Me “Mother, there is no greater joy than seeing people getting Self-realisation." That is the greatest joy one has. And this is what, one has to have in your mind.

Of course there are some people who start criticising Sahaja Yoga, why this, why that? All nonsense.

But actually if you see, everybody who is a deep Sahaja Yogi wants that Sahaja Yoga should spread in their own countries and then to see that it is accepted all over the world. It is such a wisdom, which has come into their mind.

Otherwise, one fellow told Me, “Mother, I was only worried about my own house, my family, motorcar and this and that. Now forgotten all that Now I am only worried how will I be able to give this joy to others. I cannot be happy alone. And that's what it has happened." And I am very thankful to you, for all of you, who have come here all the way to celebrate My birthday.

And this is just your love and affection for Me and I also love you very much.

May God bless you.

Today's Pūjā is going to be bit short. Because I don't know what, ah, in My birthday which deity's Pūjā you are doing. Where there are all deities, all of them are there.

So it has to be short, with all of them being worshipped together, it works out much faster, I think. As when you, all of you are together, things work out much faster.

Contents: 1995-03-21 **Letter from Ayatollah Dr. Mehdi Rouhani, Birthday Felicitations, New Delhi, India**

To Her Excellency, Her Holiness Shri Mataji Nirmalā Devi, President of the universal and spiritual movement of Sahaja Yoga.

It is with truly profound respect and heartfelt joy that I offer to you, all my sincere felicitations for this grand birthday of yours, this tremendous day of your birth which exactly corresponds with the New Year which our ancient nation of Iran is about to celebrate, according to her ancestral traditions.

You have dedicated you entire life to the establishment of morality and to the evolution of the consciousness of humanity through love and compassion with the aim of Self-knowledge. You have for this, founded a movement which all we Muslims believe to be a teaching whose ultimate goal is the knowledge of God. Has not the Prophet proclaimed: “He who knows himself, knows God." It is obvious that humanity will not find fulfilment until they have established the balance between the material world and spirituality. If once glance through the combined history and culture of our two countries, Iran

and India, we can easily perceive that these two nations have offered humanity similar civilizations and have continually raised the flag of peace and peaceful coexistence throughout the world. We still need today to continue this historic mission.

I am convinced that by constant effort and commitment, we can transform this sacred and ancient dream into reality. Thus we must permit all those who are trapped within the wheels and machinery of Western civilization, to lighten the loads on their lives; to establish themselves in morality and to warm their hearts with the joy of spiritual life.

In closing I would like to express to you my intense feeling of gratitude and recognition, which I know are shared by all the Muslims of Europe and in particular the Shiite community, for all your effort and sacrifice in the pursuit of peace.

It is my humble wish that gratitude and recognition which I hold for you, be conveyed to the Government and the people of the India.

Ayatollah Dr. Mehdi Rouhani

Contents: 1995-03-21 **Birthday Felicitations, New Delhi, India**

The great son of India, Mr. Seshan, all the respected friends and guests, all My children Sahaja Yogis: It is true that Chaitanya organizes many things which are most unexpected. I have been a great admirer of Mister Seshan. I saw a new rising sun, hope for Me. As you know My past that My father, My mother, sacrificed everything

to get freedom in this country. Also, as you know about My life how I worked very hard as a young girl.

But when we got our freedom I don't know what happened to us. We forgot many things. One of them was Gandhiji, with whom I have lived as a little child, who loved Me very much; and he said, “Let our country be free. First let our country be free. People who are slaves cannot talk of emancipation." We became free quite all right, but then, I don't understand how, people did not realise their responsibility.

Some of them who were very sincere thought it's impossible to work out anything in this country. Then, to My surprise, I saw Śhrī Lal Bahadur Shastri, who was a realised Soul. He knew Me very well and I was hoping that he will work out the spiritual side of our country and will try to bring a great name for this great Yoga Bhumi. India, as you know very well, is really a country where so many saints, Incarnations, poets, of such high understanding and deep feeling were born. He died and I felt that now all our greatness, all our traditions, all our culture, which has come to us from saints; Indian culture has not come to us from Freud but has come to us from saints. And gradually the deterioration, when I saw, I was really amazed how people are taking to things which are destructive for our country, no way constructive.

So when I read about Mister Seshan, again a tremendous hope kindled into My heart.

I never knew I will meet him suddenly when I'll be travelling. I was coming from Dehradun and I *[UNCLEAR* formed there] lots of military people standing with machine gun and all that.

So I asked Yogi “What's is going on here?" He said, “Mister Seshan is travelling." So the other lady who was in the compartment she said, “I'm going to get down." I said, “Why?" “If they burn this train, we'll all be burnt you see." I said, “Don't worry, nothing will happen” and then suddenly I find him entering into our compartment, just tears came into My eyes, of admiration.

I know My husband is another person whose birthday is today, who is not here. He sacrificed everything for honesty. For him, honesty was so important. He was wedded to it to such an extent that if I tell you any story, you won't believe to what extent he was honest. One day, I had gone to a library and I was coming out, in Lucknow, he was City Magistrate at that time, and it was raining heavily, there were no rickshaws, nothing; and, as government servants, you are really poor, you can't afford many things. He came on a police jeep, so I stopped him. He said, “I can't stop. I'm going for important work and I can't take You in the jeep." I said, “All right, you go ahead; doesn't matter” because patriotism is very important. If you have no feeling for your country, you cannot do anything good. Any kind of sacrifice is not sufficient to satisfy that desire to do something for your country and countrymen. One thing, if our politicians know, that they're not in the business, they are not here to make money, but to get the fame. Even now, today, you take the name of Lal Bahadur Shastri, people just stop thinking about, just stop, they get lost. I know about My father, same thing. I forced My husband, of course I forced him, to write a book about

Shastriji. You'll be surprised, as soon as it was published, all the books are already sold, all over the world.

So, one thing, one must realise and have hope, that innately there are so many people in this world who are seeking the truth and who want peace of mind and the global peace. It's a fact, it's a fact. Apart from the Blessings of the Divine, even the people, as he has said that he had the experience of the people of violence, this, that; is true, there is violence; people have tortured us also and troubled us. It's all right; better to forgive, because they are ignorant and they are in darkness. What we can do is to give them light. If you give them the light they will throw away everything that is destructive.

You all know, in your own lives, how you have transformed yourself. I was surprised that, in England, overnight, people gave up drugs; overnight. They got Realisation; from second day, no drugs at all. There are people who are using military, this, that, to stop drugs. When the enlightenment takes place, your attention itself becomes so beautiful.

Now, when we talk of Christ; He was a very great soul. I think He never understood human beings; they never understood them. But He has said that: “If your one eye does anything wrong, take it out. If your one hand does any sinful thing, cut it out." As I told you, I haven't seen one man with one eye taken out or, one hand cut. Same with Muhammad Sahib: He took, what He said was, “Why only make the men responsible for religion? Why not make also the women?" So He passed laws about women and He said: “All right; women who have immorality in

them should be put half way into the Mother Earth and should be beaten and killed with stones." Now this was not for human beings, I tell you; this is for angels.

They are so great that They never realised that you cannot be a Christian, Muslim or a Jew; and the Shariah is given to Jews by Moses, which is now taken over by Muslims. It's a misunderstanding about human beings. I think They never had human realisation. They didn't know what's the problem with human beings.

I haven't done anything. Kuṇḍalinī awakening has been in this country for thousands of years and also we have had people like Ādi Shañkarāchārya who has talked about it; Gnaneshwara, in the twelfth century, has talked about it; but the people in charge of the religion, Dharma-martandas, always thought, “That's no good, that's no good." And that's how we have forgotten. Even many people in the North [India] do not know what is Kuṇḍalinī. They think Kuṇḍalinī is horoscope [kundalee].

So all of this was kept in a very secret, I should say, secret way. Only the Nath Panthis kept up the awakening, but the tradition was that one person could give Realisation only to one person, one Guru had only one disciple. This was the tradition. At the time of Gnaneshwara, in Maharashtra, in the twelfth century, He requested His Guru, His own brother, that: “Allow Me at least to talk about it." And in the sixth chapter of Gnaneshwari He wrote it. But again the Dharma-martandas said, “No." How they tortured Ādi Shañkarāchārya, how they tortured Gnaneshwara, Guru Nanaka, all of Them. All these Saints have never been recognized by these Dharma-martandas and they were in

charge, general public understood Them, but they were in charge of religion. Thus, all this great heritages that we have was all lost into wilderness.

What Gandhiji had told Me: “After realisation You start Your Sahaja Yoga." What Shastriji had told Me: “Let me solve the problem of Pakistan and of Kashmir and then You can start Your Sahaja Yoga." He used to only talk to Me on Sahaja Yoga, nothing else. But the problem is, if you go on postponing, it goes on like that. Now, in My small way, I have... he is a great person, he has worked as a great bureaucrat and all that; and I have seen many bureaucrats. I mean, he's a rare one, I must say, who thinks of spirituality; very rare.

The essence of secularism also was lost completely. Gandhiji's secularism, because I stayed with him in the ashram, he was extremely a strict man, I must say, he was another very, very strict person. I was, you see, a person who could eat anything, get up any time; I mean, I had no problem. But the way he used to make everyone get up at four, have your bath, come for the Pūjā, sit down for pratana *[UNCLEAR]*; and there used to be some snakes also, in front of you. But his quality was that what he said, what he did, he believed into, he followed it; there's no hypocrisy about it. Also he used to get into temper with people who would misbehave and I used to put some cool water on him, because I was a little girl, you know. He would really understand it and he used to say, “How is it You keep so peaceful about all such things?" I said: “That's the solution, that's the solution." Reaction is not the way we can really work it out. In this, I would say, Buddha has that, you must forgive everyone.

Forgiving, itself solves the problem by, I think, ninety percent at least.

In Sahaja Yoga we have various activities and one of them that we regard family as a very important thing. We don't believe in Sannyāsa or anything to be given up and go to Himālayas, because we have seen, where ever these things are practiced, is very unnatural and people indulge into all kinds of immoral things.

By force you cannot bring morality; you cannot. What Shankara has said is true, what Vivekananda has said is true, in this point, that you cannot force morality. Then what should we do? This side is indulgences, in the West; this side is just a force, according to the Muslims and according to the Jews; then what should we do? Both sides do not help you to be moral. You move from one end to another. Only way is to awaken the Kuṇḍalinī which pushes your attention to the center, pierces through your fontanelle bone area and gives you the connection of the Divine Power all around. But nobody believes, you know, if you tell them there is a Divine Power. If you ask them: “Who runs your heart?" the doctor will say, “Autonomous nervous system." But who is this `auto'? They don't know. Science cannot answer the question he said: “Who am I?" It cannot; Sahaja Yoga can. You are the Pure Spirit; you have to become the Pure Spirit.

This is the answer which has worked out in all of you.

Of course it gives you health, also it gives you wealth, because of your attention, but not the wealth as we see, but Lakṣhmī's Blessings, that you keep a balance. It gives you creativity. I know of so many artists who have

become world-famous after coming to Sahaja Yoga. Musicians, artists, they have suddenly gained. It gives you wisdom, it gives you intelligence; also I know of many children, who have failed in their classes, have become first-class students. You all know I am not telling a story, you all know very well. All of you can write one book about the miracles you have seen in life. It is all there, it's truth, because this All-pervading Power is not only the Ocean of Knowledge, It's not only the Ocean of Bliss, Compassion and Love, but It is the Ocean of Miracles; and so many miracles have worked, that now we have decided not to write any book because how can you write so many volumes? From where to get so much money to write these volumes also? But all of you know very well that there are so many miracles in Sahaja Yoga. Even, you have seen the photograph of this All-pervading Power which has light.

So many photographs we have, to convince people. But it's said that you cannot give Realisation to people who are idiots, who are muras, who are stupid; then to people who are arrogant and adamant. I think it has something to do with your previous lives that people are so ready to get Realisation.

I would like to quote the Russians, Russians in thousands are there in *[UNCLEAR* Satyin] in thousands, unbelievable, they don't know Me, I'm a foreigner, they don't know anything about Me; but for them My program is always in a big stadium, all full. And in the stadium they get Realisation, they settle down with it, they practice it and they are Sahaja Yogis and they get cured. Even the scientists, I was surprised; two thousand five hundred

scientists were there for the conference where they conferred upon Me an honourary award for being the greatest scientist and the philosopher. Can you believe it? And they had only given ten awards, out of which, so far, it's a very ancient university of St. Petersburg, I was one of them.

And I said, “How could you give Me this award? It is too much, because Einstein has got it also." They said, “What Einstein? What work has he done? He has worked on matter; you have worked on human beings." I was rather shy about the whole thing. I couldn't believe it. Now the government of Russia has given Me award. Can you imagine? My government has not but government of Russia has given. My husband has got, I think, hundred and thirty-five awards: N.K.C., M.G., all this; and he said, “Actually, You should get an award." I said, “For what? For what am I... This is My Love that is working. I am not paid for it, nothing.

It's just My Love which pays." This Love is something... is a feeling of oneness with you, oneness with My country, oneness with your countries, oneness with you, your families, everything. It's something I always feel that they are part and parcel of My Being; they are all part and parcel of My Being. And that is how I remember you; I remember every person through the picture of their Kuṇḍalinī, as it was and as it is today; for which I don't exert, assert anything.

Now, people say, “You travel so much.", My Passport is so big; this is the third passport I have; so big I cannot put it through the slit, but I don't travel; I am just sitting there. I don't think, I don't travel; I am sitting there as I

am sitting here. I can sit anywhere. Just not to think, to be in thoughtless awareness, is the first sign that you have achieved your ascent, Nirvichar Samādhi.

So many of you achieved it.

On My birthday I don't know what to say; it comes and goes and comes and goes. Seventy-two years have passed; I don't think about it. I also don't feel My age at all, in any way. Because I don't think about it. It is there; till I have to live I'll live. When I don't have to live I won't live; that's all. That's not My job. My... if there's anything My Love wants to do, it's to give Realisation to everyone in the world; whatever they are. And only after Self-realisation, I have seen, people show their love for their country; immediately they know what's wrong with their country, immediately. They are the ones who told Me that: “Mother, this is wrong with our countrymen." Another one will come and tell Me, “Mother, see, this is wrong with our society." Another, “With our politics." I was amazed; so far they could never see these things, they are so proud of their country that they could never see anything wrong with them.

And here is somebody who has seen the wrong, what is destroying this great country. But it can never be destroyed; it's a country of eternal nature; it cannot be destroyed. Again and again people of this quality will come up and save this country from complete destruction. Corruption, of course, is the worst thing, but because they believe that it's a business. Actually they should know that it is through politics: people like Abraham Lincoln, Sadat and so many people; have such a love.

I went to Turkey and Ataturk Kemal Pasha, whose life I had read when I was very young, it's really made those people so conscious about their own country. But with the influence of the Germans it's all getting spoilt. They worship Germans. Even, they have such a nice food; I mean, I must say, the best food you can get is Turkish. They get their food from Germany and now they have become poor. And that is what another thing we Indians have to learn. We should not try to copy others and get their products on our head, which are just plastics. We should try to help our own country. Every portion of every country, if it grows, the whole world will be strengthened; but by copying and by becoming slaves, it's not going to, in any way, is going to improve.

Till this Sahasrāra was open I used to wear pure khadi [homespun cotton]. My husband was collector and all that and he's a little fond of clothes; and he said, “At least take to something better." I said, “This is the best." And I was wearing khadi throughout. And I felt great satisfaction because this is My country, where people make khadi in the villages. This sarī also is made in the villages. If we gave up sarīs, what will happen to them? Like this, a concern about your own countrymen has to come.

Once it starts, within you will be surprised, you'll solve your problems that you talk of ecology. Gandhiji always used to say: “No, don't have too many machineries"; always. Now I can see why he said so. Handmade things; he preached for hand-made things; wear hand-made things which are artistic and that's how you will solve. Now in the West, I was surprised, people pay so much for

hand-made things because they cannot make it anymore. Now the computer has come, the brain has given up. Now all these things are coming. We can calculate very well because we studied in the old style of education but now people can't calculate even two plus two. I mean, what has happened to their brains? So one should not take to artificial things too much; if you are in Sahaja Yoga, keep to natural things.

I don't say you become hippies or anything; nothing of the kind. In Sahaja Yoga you should be decently dressed, properly dressed according to your country; nothing to be given up, but you should not take to artificiality, because this artificial domination of matter kills our Spirit. There's a struggle going on between matter and Spirit.

So we come to materialism and spirituality. The other day somebody asked Me, “Mother, You always say: `Make beautiful things with your hands and things,' so You also talk of materialism." I said: “I don't. Matter can only be used for expression of your love nothing else." For example, if I have to please you, what should I do? I give you a very small thing and you think it's a very great blessings. This carpet which is here is beautiful; I see it and I may say that this carpet is very beautiful. If it is Mine it's a headache because I may have to insure it; but supposing I don't think; then all the joy of this carpet starts trickling down Me, making Me peaceful completely.

So thoughtless awareness, if you establish it, then you will realise that you can conquer materialism fully because you don't get any joy. You know the economic law is that, in general, wants are not satiable.

You want: today a house, tomorrow a car, then a helicopter; I don't know, like going on like that. But if you are in thoughtless awareness, whatever you have you enjoy. You enjoy everything, in the present tense, not in the past, nor in the future. And this state is what you all have achieved and you have to also achieve another state of doubtless awareness, which also many of you have achieved.

I'm happy that he has seen the good work. Now, today, on your faces, he can see how they are glowing with joy, peace and freedom. They are free to do what they like but they won't do it. I always give an example that, supposing I am very obstinate and conditioned and I have a snake in My hand and you tell Me, “Mother, you have a snake in Your hand” but I am obstinate and there's darkness, I'll say, “No, I don't listen to you. It's a rope"; till that snake bites Me, I'll hold on to it, but if there is little light, I drop out that, I throw away that snake immediately; nobody has to tell Me. That's how, now, you have become your own guide, you have become your own masters; you don't need any master.

This is a country where Mother is respected. It's a country of Motherland and people understand the value of Mother. I think only the Mother could do this kind of a job, which is requiring so much of patience and love. If it was Father, like Śhrī Kṛiṣhṇa, He would have used His Sudarshana [discus] and would have killed all of them, finished, solved the problem. Christ would have crucified Himself. But it's not that; you have to work it out.

This is, of course, Ghor Kali Yuga [worst part of the dark age] but this is the time only when people will be seeking

the truth because of the problems of Ghor Kali Yuga and you will be blessed. Is written already, prophesized by Bhrigu Muni, so it's nothing special about it, I've done nothing special. Only thing, if you say, I knew about it since I was born, I knew about Myself. If I've done anything, is to understand human beings, what's the problem. They follow Christ, they follow Muhammad Sahib, they follow Rām, they follow Śhrī Kṛiṣhṇa, they follow everyone; but nothing inside. What is the matter? Nothing penetrates; that was the thing, I thought, they are not yet connected, they are to be connected to all this. And then, only what I have done is to work out the permutations and combinations of human beings, what goes wrong with them. What's not very difficult because there are only mainly seven Chakras one has to work it out and how can you raise the Kuṇḍalinī to break the Sahasrāra. And it worked, it has worked, is working out, in thousands.

In this country, also, we have thousands of people. I have been coming to Delhi for so many years but, you know, everybody is a politician here, everybody is a prime minister, nothing short of. I told My cook that, “You are from Delhi and while this servant, another one, is from South [India]; he is much better in work and one day you'll be all displaced." He said, “Doesn't matter; we'll all become Prime Minister." So with this identification they lived here and in this Delhi itself there are so many beautiful Sahaja Yogis.

I'm very proud of you. Also we have so many people from abroad, so many countries are here represented.

All the way they came for expression of their love for Me; from Japan, South America, from America, from Africa; every country: Switzerland, Italy, Spain, France, Russia, Bulgaria, Romania, Turkey; also from Tunisia. My Heart knows no bounds. In Kali Yuga nobody bothers about Mother, but the way My children are expressing their love, I don't know how to express My gratitude. Just try to love others. That is much more than loving yourself.

Just try to give love, just try to forgive; you'll be amazed that you will realise how glorious you are, how great you are and suddenly you will discover that you are a global personality. This expansion is working out and I'm hopeful that in My lifetime I'll see this world coming to some peaceful state. As I've told you that the peace is within ourselves. It is not by organizations or by getting peace awards; it is within yourself, the peace which is to be established.

I've known many people, because of My husband, who have got peace awards, very big, big people; they are so hot-tempered that you can't go near them, you see, you have to use a barge pole.

So that shows, I don't know from what angle they got peace award but those who have no peace within cannot create peace. You have to be peaceful; and this peace gives you that witness state. With that you see the whole world like a drama and really you enjoy the humour of it, then you don't get annoyed, you don't get worried.

I read in the newspaper that today he has to face some sort of trial, in the witness box and I was following him throughout; I've been always following him and then I just put My Attention, I said, “I hope he will have energy

to come to our program and enjoy us also." This has been such a great occasion for Me because suddenly I find many doors are opening out and there are so many responses.

So many mayors of many countries have written letters to Me, especially from Brasilia who came to the airport and gave Me the key of Brasilia and said, “Mother, please keep Brasilia in Your Attention so there is peace in Brasilia." Actually I didn't know what to say, what to answer; just tears came into My eyes, that's all. I was trying to control them. I just couldn't say anything. I mean, this Mayor of Brasilia, of all the persons, suddenly appears at the airport.

So many mayors, even in New York, in Canada, in Australia; they have written beautiful letters because they had some good experiences of Sahaja Yogis. It is you who can do the job; not Me. If I could do it, I would not have bothered about it. But we have to have good channels and that is what, where ever Sahaja Yogis go they create such a beautiful image of Sahaja Yoga that everybody is impressed you see. And that's how they have given us this kind of a beautiful response.

Now, as Mister Seshan asked Me, “How are we to expedite and spread Sahaja Yoga fast?" It's such a good question. I said: “It is spontaneous; we cannot force on it; we respect everyone." But the way it is growing everywhere, I have great hopes that one day, all over the world, it will spread very fast.

Actually we don't plan anything; we cannot plan and it just works like that. Everything works so spontaneously that I am surprised, now, they came, these people from

Punjab and asked Me, “Mother, why don't You come to Punjab? You see, very important." I said, “Let there be shanti” because My husband doesn't allow Me to go to places like that, that's the trouble.

So next year it became all very peaceful; I went down and now I'm told that in Punjab we are getting the maximum number of Sahaja Yogis; mostly Sikhs. Same with Kashmir, I know. Kashmir is the Ādi Shakti's place and I'm sure one day we can work out Kashmir very well.

In every religion there is some sort of a stupid stuff pushed forward; in everyone; nobody could really stop it, because those people who are in charge of religion have no enlightenment, they have nothing to do with it, anywhere. And that's how, I have seen, people, say in Japan, they follow one religion and in China they follow another religion. Both are just the same; one is Zen, another is Tao, but the misunderstanding is that they think: “We are exclusive." They are not; none of them are exclusive. Muhammad Sahib described all of them: from Abraham to Moses, to Christ, to the Mother of Christ; and He said, “There have been more than one lakh nabis on this Earth." But now, why to feel that we are exclusive? This exclusiveness comes from where? With Christ also He described all of them. Tao, the one religion that they follow in China is nothing but Sahaja Yoga, Tao is Kuṇḍalinī. Zen is nothing but Sahaja; Zoroaster, everyone. But this exclusiveness has brought this problem and they are fighting among each other.

But there are also some stupid things, like I met one fellow from Bosnia very much interested in Bosnia and he was a Muslim of course and, with great gusto, he was

saying, “We must die in the name of God." I said, “Are you sure you are dying in the name of God?" He said: “I am very sure." All right.

So it is written in Koran, I think I have read Koran well, but they say so it is written in Koran, that if you die in the name of God and if you are put in a proper grave, in a proper way, in an Islamic way; then your body will be resurrected at the time of Qiyamah, resurrection time. This is the resurrection time, this is the resurrection, *[UNCLEAR* outan], this is the time. And I told him, “Are you mad? After five-hundred years, what will be left in that grave? What bones are going to rise?" Actually that way, I must say, in Indian philosophy is clearly said that your souls will rise. That seems sensible, because soul is eternal. But then another question I asked that, “You believe in a formless God [Nirakar]; why are you fighting for the land?" I tell you, I feel so concerned, the way people are fighting for God, this thing, that thing; and killing themselves. Do you think God will be happy with this kind of an idea? So one has to really get Realisation, otherwise there's no solutions, I must say. There has to be transformation, otherwise there's no solution. One can talk, talk, talk for hours together; nothing works out unless and until you are transformed.

So only thing is that, for Me, I feel that, as long as possible, I would strive to see that people get their Self-realisation and settle down. There's no hanky-panky about it, there's no miracle of a stupid type.

Actually the person who has transformed himself knows he is transformed. Then he gets all the powers; like one light which is enlightened can enlighten many people.

And so he himself [said], “You mean to say I have given Realisation to all of them?" “Maybe; some; but not all." Even the people now who are living in Delhi City go abroad and give Realisation. They go to villages, give them Realisation. All over it is spreading like that. But when he asked Me the question, I have to just say that all the Sahaja Yogis have to realise what they are; they have to know, they should know, their identity. They are now the lights and they have to spread the light. They are busy with business, they are busy with politics, they are busy with this; it's all there. I am also very busy; I have a family, I have grandchildren, I have My children, I look after My family also; at the same time, the main attention should be in giving Realisation to others; that's the only way we can expedite it. A person who is not a realised Soul, who starts talking on religion bus, he'll start collecting money; or I don't know what he'll do. But you people have that essence in you which you have to give to everyone; and nothing more enjoyable than giving Realisations to others. You may get the wealth of the whole world; it cannot be compared with that.

So this is the answer I want to give him, that I would request all the Sahaja Yogis, whether they are women or men, even children; can spread Sahaja Yoga, because they have got the powers in them to spread it, they have the Shakti to do it.

So then, that should be a case, not only for India but all over the world it can be done; and this is the promise, as a present, you have to give Me on My birthday, if you think it's nice.

Thank you very much, thank you.

As an appreciation and admiration, I have this for Mister Seshan, which I have openly said it; it's not secret, everybody knows what I think of him. I don't know what to give him more than My innate Love, but the Sahaja Yogis wanted to give him some present, which he cannot refuse, something he cannot refuse. It's no bribe, because we are not having any political party.

People only want My darshans or Pūjās. What is the use of My darshans, it is better to have their own darshans. Without meditation, darshans or Pūjās cannot help. Even very good Yogis fall because they do not meditate.

Contents: 1995-04-09 **Rām Navamī, Mumbai, India**

[Guidelines to the centers:] Only My tapes should be played in the centers. Only what was in the tapes was authentic. No one should give treatments, lectures or try project himself at the centers. There is nothing special about leaders. They were appointed simply to communicate My messages. You need not worry about false Gurus; I am taking care of them. People will come to Sahaja Yoga after seeing you.

Contents: 1995-04-14 **Easter Pūjā (English+Hindi), You have to Crucify your Ego, Kolkata, India**

[Shri Mataji talks in English:] Today is the day we are celebrating Easter. Easter is extremely symbolic, of, not only of Christ, but also for all of us. In that the most important day is that of resurrection. The resurrection of Christ has the message of Christianity, not the cross.

Through resurrection Christ had shown that one can be resurrected with the body that you have. And without His resurrection, we could not have managed the crossing of Āgñyā Chakra, no doubt.

His life was very short of, we can say three and half years only, He lived there.

He came to India and He met Shālivāhana and Shālivāhana asked His name. He told him His name was Isa Masih. But He said, “I am coming from the country where there are malichchas, mala-icchā. They have icchā of mal, desire to get dirty and I don't know how to live there. To Me, this is My country." But Shālivāhana said that, “You should go back and save Your people and give them Parama Nirmalā TatTwam." So He went back and as it is, within three and half years He was crucified.

At the time of His death He said so many beautiful things for forgiveness, but ultimately He said “Behold the Mother." That means you should hope for the Mother. And in His lifetime He also said that, “I'll send you the Holy Ghost Who will comfort you, counsel you and also redeem” means resurrect you.

All these things He had said it because He knew what was the whole plan.

Also He said that, “You may say anything against Me or do anything against Me, but anything against the Holy Ghost I will not tolerate. I will not tolerate at any cost." Which is true also, so it is very dangerous also to go against the Holy Ghost. No doubt about it. It's not Me that is dangerous, but these Deities are extremely dangerous.

So, in Sahaja Yoga you are all resurrected with your body. Before this you were not connected to the All-pervading Power and whatever you did was through your mind or through your emotions. But you did not come out of that grave of emotions and your desires, your actions and your ego. After realisation now you know how free you have become. How you have developed your own personality.

There are so many instances which we can talk about Christ, that He said, “Know Thyself" throughout.

He knew without knowing yourself, you won't be resurrected. But Sahaja Yoga is the other way round.

You get your resurrection and you know yourself. It's a very Sahaja, sweet way of getting realisation.

But if you see to the life of Christ, He has talked about murmuring souls. We too have in Sahaja Yoga, because it's open to everyone, all kinds of people come. We find very shallow people coming to Sahaja Yoga who try to express their shallowness and talk in a very, in a very loose way, about Sahaja Yoga, about the work of Sahaja Yoga.

So that was inevitable, but what Christ has said that you have to be careful about the murmuring souls. And this is exactly, we have to be very careful. When you come to Sahaja Yoga, in the beginning, you may come across such people who are murmuring souls, you may be enticed by them because they are a kind of, we should say, messengers of negative forces. And these messengers of negative forces, you should try to find out. They'll complain about this, complain about that, they talk in a very loose manner and when you see that they

are not talking in a positive way, you should run away from them. Because only by getting your resurrection you are not all right. After getting your resurrection, after your Self-realisation, you have to grow. And for that growth we have to be very careful about how we get impressed by all these, I should say, very frivolous people. Those who grow into it become beautiful angels. No doubt about that. But that is one thing one has to know is to respect your Self-realisation. You shouldn't worry about what others are talking, what others are saying, what they are criticising, but you should look at yourself and all the time try to grow into your depth.

It's a very great chance of life that you are being resurrected and this is the last breakthrough, as you know, of our evolution. But now you should leave your mind on one side; because this mind, if you go on working with it, you cannot go beyond mind and Sahaja Yoga you can achieve by going beyond your mind.

Then you know yourself, because you get Self-knowledge. You know about your centers. You know about the centers of others. All this is available to you, but you have to become a subtler and subtler person.

Not a gross personality. If you become subtler and subtler, you will be amazed how you will develop your inner powers in so many different ways.

But there are people in Sahaja Yoga, I have seen, who are very ambitious. And they start saying that, “Mother, we want to be God realised. I want to be this and do that." There is no office going on here that you give somebody a promotion. You have to grow yourself. Then

they start proclaiming, “I am this, I am that." We call them `Mahā Yogis'.

Some of them had started saying that they have reached very high positions and they ended up in the lunatic asylum. All such suggestions if people give you, then you should shun such people. But there are also other people who join such a bombastic fellow.

So, you must remember that this last judgment is working and all the time there is a big sieving out, a very big arrangement of choices. Those who are subtle, start getting subtler and subtler and subtler. But those who are frivolous, gross, idiotic, stupid, they start frittering away.

So this last sieving starts very fast, working out where we realise that where are we.

Now what is the criteria for that? First is your compassion. Your compassion must be discrete.

Sometimes people only have compassion for negative people. After Sahaja Yoga you should know for whom you should have your compassion. With vibrations you can find out, very easy to find out with vibrations, what sort of a person you are facing. But first you must have vibratory awareness. If you don't have vibratory awareness, you won't be able to find out at all what is correct and what is incorrect.

So it is important that you all must mediate. Without criticising yourself, anything, you can just meditate everyday. Is very important! I immediately know who is the person who is meditating and who is not meditating. Immediately! The person who meditates is very clearly an angel. The whole reaction, the whole behaviour, the

whole attitude of such spiritual maturity manifests. And you are amazed. As you know Sahasrāre Mahāmāyā. It's not easy to understand Me. For the time being you might know what I am, but suddenly you will forget.

That's the trick. Because if you know Me in full ways, you won't even sit here. You won't even come nearer to Me.

So that Mahāmāyā is acting all the time, but that's the only way you can judge people.

This last judgment is not a[n] easy thing. Even if you put thousands of judges, they cannot do this judgment. All the time you have to know what is what. And somehow I know everything, but I will never show that I know. That's how I work it out and gradually I know what I have to do about that person.

This resurrection of yours is much more blessed than that of Christ. He was alone; people wouldn't recognize Him. He had to show His marks where they had put nails on His hands and feet. But today that is not the situation. Only thing is, first of all you have to recognize Me. That's all. Need not know Me. It's not easy. It's difficult to know Me, but if you recognize Me, that's all. And it all depends on your sensitivity. Your resurrection has to be complete and you have to mature in Sahaja Yoga. If you cannot mature, I will say you should leave Sahaja Yoga. Go out for a while, where you will understand what's going on, then you'll come back.

In Sahaja Yoga, like Christ sacrificed His life, is not expected of you to sacrifice your life. Your Mother doesn't want that. But you have to do some sacrifices, like you have to stay in uncomfortable places in Ganapatipule sometimes, or somewhere. You have to face many odds

while travelling, also coming down here may not be so comfortable as you are at your place. But the main sacrifice is of your ego. You have to crucify your ego. The ego is the one, which teaches you all these nonsensical Tantrums that people know. If you can surrender your ego, just surrender your ego, that surrendering can help you. But if you surrender your ego by thinking about it, then you are using your mental capacity. Everything you do like that is through your mental capacity, by which you are using your ego.

So the best way is to meditate, to go into thoughtless awareness and there automatically you are surrendered.

Now what do I have to have from you? Nothing! I don't want anything. I don't want to have anything.

You are the ones who try to give Me this and give Me that. I am trying to run away from all that. Just for your satisfaction also, I agree. I don't have to do Sahaja Yoga Myself, but that's the love of your Mother. That She wants to save as many as possible, all that are created on this Earth, to give them their resurrection. This is a special time and you are My channels. You can go all over and spread Sahaja Yoga and try to help others to come out of it.

Today is a day of promises, where we have to promise ourselves that we'll grow in a very deeper understanding, or feeling, or in sensitiveness of Sahaja Yoga. This growth has to take place for which I have to meditate. This is a very important thing.

Secondly, people say that here people are very miserly. They are not willing to do this. They don't want to pay

any money for this, pay any money for that. I think generosity is one expression of your love.

You will give Me, all right. When it comes to expenses, either I pay or somebody bears the burden. Now things have improved, but still we should know that this tremendous work has to be done and we need money for that. I don't need, I spend My own money. But generosity is the best and this generosity is very, very important for Sahaja Yogis.

I have seen people are very meticulous sometimes, very calculating. They will tell Me, “Bring some sarīs for them." Take some sarīs, all right, very good idea. And they say, “We don't like it, we don't want to buy." I am not doing any business. I buy it because you wanted, I have selected it. Then to say, “We don't want to have it." There's no business, there's no marketing going on. And this is the problem when I don't understand Sahaja Yogis that they should know Mother, Herself, has put in Her money.

So what is there also, they should say, `Take little more for Sahaja Yoga.' After all such a big organization going on and there are so many countries who cannot pay a single farthing, for them also one has to pay.

Now, Christ was sold for thirty rubles. You can imagine, He was sold for thirty rubles.

So that shows that when you do not try to understand the financial difficulties of the organizers and you do not help, you are really selling the Christ within you. You cannot sell Christ, you cannot sell Sahaja Yoga. But that doesn't mean you exploit it.

So I have to tell you that I was Myself surprised in north India where I least expected people are extremely generous, extremely generous. And then generosity helps you, in a way that our Lakṣhmī Tattwa is to be awakened.

I had to bring in this point because I have complaints from people that people are reluctant to pay for anything like this. It's very remarkable that some people take over, but everybody must contribute. It's important, because you are doing God's work. You have to also come forward to do other things that are there without grudging. Enjoying it! I was happy the posters were put by the Sahaja Yogis and you can see the whole place vibrated. You could see how it has worked out.

So everybody must go all out to do everything that is possible. Nothing else is needed but your full heart into Sahaja Yoga. Then you will see how you will grow. It is only through your heart you will receive all your nourishment for your spirituality.

So open your heart, do not calculate so much.

[Shri Mataji talks in Hindi:] I have to talk to you all in Hindi too. It is very important. On this day, Christ came out from the world of death and He was resurrected. Your body should be resurrected in the same way as His did. Not after dying, but now, when you are alive. You are resurrected when you are alive, but you should understand the special features of ascent. After resurrection you should become subtler. Even now after coming in Sahaja Yoga you have in your mind to make money, do business and have ambitions, then you have come in a wrong place. You should go elsewhere. In

Sahaja Yoga you should only think of your spiritual ascent.

And no other thoughts should enter.

But now everyone asked Mother why that in Bengal `Lakṣhmī Tattwa' is not awakened. This is because here there are many Tāntrikas [black magic]. Where ever these Tāntrikas go, from there Lakṣhmīji runs away. Not only this but even because of liquor. It will be OK for some time but afterwards Lakṣhmī will go away because of liquor. There are many Tāntrikas in Bengal.

The reason for this, I think is that the people in Bengal are very simple and emotional and when anyone comes and tells them that they are messenger of God, they believe them. They don't even think about it.

Like Hare Rāma movement it started from Bengal. Like crazy, people ran on the road. Hare Rām, Hare Rām. What was the benefit? More poverty came in. In Bengal whatever anyone will say they will start following it.

Someone told Me that she does not eat green coriander leaves, I asked her the reason, she said because her sister didn't eat so even she stopped eating it. They will get into all kinds of ritualisms and with the help of these ritualism we get lost. We get fully lost. We should find out what is behind these rituals. In Sahaja Yoga there is no ritualism, no castism and no criticism for any religion. And the greatest thing is that the feeling of worldwide brotherhood, is established and it is from the heart. The day we have these feeling of world wide brotherhood we will be able to throw these Tāntrikas away. Even a single Sahaja Yogi can throw these Tāntrikas away with his Shaktis. In Bombay there is a place called Girgaon and

here one such lady would dance saying that the Devī had entered her body. The day one of the Sahaja Yogini went there, this lady stopped her dance, she ran away. Because Devī Shakti is very powerful than these worldly Shaktis. Now that you have been resurrected, you have become clean, pure, then the inner Shakti of purity starts to manifest.

Sahaja Yogis should cleanse themselves and become pure. But instead they get so involved in Bhakti and in their mental world, It is OK but the best is to wander in their own inner selves. You should build your Shaktis. The day your Shaktis increases, all the Tāntrikas will run away with their bags and baggages.

So on this day of resurrection you have to take a vow that you will transform into a very high level and become very deep Sahaja Yogis. And for this we have to meditate. You do not have to meditate for three hours but meditate for ten minutes with your heart in it. It is very necessary to put your whole heart in it.

In Bengal people have big hearts and are very loving but you must see the Patra? If you are a Sahaja Yogi then first you must love yourself, when you start to love yourself then you will find your love will spread to others also. You get angry, you have desires and conditions, but when you cleanse yourself away from all this, then you are resurrected. And when your personality gets cleansed from all this, then no Tāntrikas can stay here. No Tāntrikas can stay here! Secondly, you have such a nice art of singing, then those ladies and men can hire some big bus or a truck or anything and announce it in the village that there will be Bhajans of Mātājī. Then you

all go there sing Bhajans, give lectures and slowly play My cassettes. In this way many have got their ascent in North India, U.P., Bihar, Haryana. This has helped to spread Sahaja Yoga in many places. When you people have this art of singing, then why don't you'll go from villages to villages and with your singing entice the people there and help them in their resurrection. By doing this all the Tāntrikas will run away.

The very mention of My name makes them shiver.

So when you will sing My bhajans, then who knows what all you can achieve? What love you have received from your Mother, you should share it. In this state people have so much desire for love that you should go there and see and by your there, Lakṣhmī will come there. By your going there even their physical condition will improve, mental condition will improve and the biggest thing is their spiritual growth will improve. In this way we have to transform the people of our country and for this you have to go and work.

Today is a very important day which shows how human beings can attain their ascent on their own, as Jesus Christ had done. But the conditions which Christ had laid are not possible for us. He had said that if you do anything wrong with one eye, then take it out on our own, if you misuse your hands, then you cut that hand out. I have stayed among so many Christians, but I have not seen anyone in the Christian community with one hand cut or an eye taken out.

So at that time they kept this away on the shelf. Now, you all should not do enmity with yourself in Sahaja Yoga. You should introspect yourself and see if you have

any faults. If you really love yourself then remove the faults you have. By doing this you will attain your ascent in it's full form.

Once these faults are removed, you will be surprised to find how joyous, peaceful and powerful you are. These hindrances which are coming in the way of your Shakti, you should drop all this at any cost.

These hindrances comes in our way because we do not give importance to our resurrection, but we give importance to other things. Other things are important to us. We are resurrected, now we are in the kingdom of God, but to take our seat there we have to cleanse ourselves. By wandering on other things you will not attain anything, you will be only complaining that you are not getting this or that.

First, you have to stop degrading yourself and stop yourself from going on wrong path, otherwise how will you find peace? It is very difficult. People say, Mother we have no peace, that is why we do this or that thing. It is not difficult at all to get peace, but one must meditate and do all work with your heart in it, then nothing is difficult. In our Sahaja Yoga I find many have reached to such heights and find that their love has such powers.

Today I will mention about one such person. This man is very much devoted towards Mother. We were going from Prague station to the Airport. We were going to Holland and one of the Sahaja Yogis told us that the plane will leave at 11 o'clock.

So we got ready accordingly. But then he said the plane is leaving early, so you must reach there as soon as

possible. How could we reach there? We were late by fifteen minutes.

So this Austrian woman, who was a ground hostess there, got very angry because first this plane was going to Austria. This woman screamed at us that you people are like this, you all have no value for time. Now this man could not bear all this because he was the one who had told Me about the timings.

We all went and sat inside the plane. This man got very emotional, tears started to pour from his eyes.

He is a German. He was sitting on the back seat, all the other Sahaja Yogis told him to stop crying. I just glanced at him and told him to quieten down and not to worry. At this time we were told that this plane will not leave as it had broken down. But the minute I saw tears in his eyes, there were big black clouds all over the sky. The Sahaja Yogis were wondering from where did these black elephants come? Just look at the power that his love had! They told us to go to the airport as the plane would not leave.

When we reached the airport, it started to rain heavily. Not even a single plane could fly from there, we were told only our plane would leave at five. Then this man went up to that lady and asked her now that we are getting late, should we too scream at you now. She went to the manager and told him all about this. Now these people believed that we were some Shaktishali people. There wasn't even a single cloud.

Then they told us that we could go out and come in as we pleased. They arranged everything for us.

When we were about to go by another plane, one lady who was watching came towards Me and requested Me, if I could kindly cure the pain in her hand. I put My hand on her. Then she put her hand up and said that the pain had gone. The chief of the Airport came up and said that he was suffering from back pain and requested if I could cure him. I then told him that we were getting late, so he said “I will walk in front of You and You just put Your hand on my back." This is how we walked towards the plane. And he turned around and said that he was cured. See how come these people knew that we had some Shakti.

Look at the love this man had and the Shakti of love! If you love yourself, then you must correct yourself.

Sometimes you'll run for positions, money and sometimes for other things. You must give some time to yourself too. Sahaja Yogis are working in Bengal.

But the conditions in Bengal will only change if Sahaja Yogis go from villages to villages. You all have been resurrected, today I am asking you, that you should not only sit in Calcutta but go to other places and villages and work. This priceless thing that you have will only increase if you share it with others.

Just like knowledge which increases when you share it with others. In the same way Sahaja Yoga will spread if you share it with others and this will benefit the whole of Bengal.

It is very joyous to see that so many people have come here for Pūjā, but I hope when I come next, there would be people from villages who will come. Use this rich culture and art of singing that you possess to spread Sahaja Yoga all over Bengal.

May God bless you.

Contents: 1995-05-00 **Comment on Journalists Searching Interviews in relation to the negative ADFI campaign against Sahaja Yoga**

The way people get after you when you talk of Truth!... It is also a very hazardous task to fight those who are just always wooing to cruelty, to untruth, to aggressiveness. These are self-destructive elements.

But in this chaos, in these problems, people will find the Truth.

Contents: 1995-05-00 **Press Interview**

Shri Mataji: [stresses the need of] One religion where you can be one with God.

Interviewer: We don't want one global religion.

Shri Mataji: You don't want to accept because you want to fight.

Contents: 1995-05-07 **Sahasrāra Pūjā, Achieve Complete Freedom and a Beautiful Heart, Cabella Ligure, Italy**

Today it's a great day for us, for all the Sahaja Yogis, that on this day I would say, we are late by one day, or two days, the Sahasrāra was opened out. It was just a miracle, I should say, because I did not think that I am at a point where it could be done.

So, I wanted to wait, but some things happened that made Me think that it has to be opened. It was in such a situation that I felt that if I delayed anymore now, it may

help these false Gurus to spread their nonsense all over. This just is, I should say, a Sahaj way of doing things.

Now, twenty-five years have passed, you have all gathered here during this time and we have so many others who are not here, who have achieved so many things. But perhaps we are not aware as to what we have achieved, in the real sense of the word. You've got your vibrations, you can feel this All-pervading Power, you are, as they say, swimming in the Ocean of Joy, you are all enjoying the collectivity and that you have transcended many of your limitations. All this has happened to you because it is your right to have it.

I don't take any credit for it, only thing, all the time I have been pointing it out to you, one thing, that now, you have entered into the Kingdom of God and enjoy yourself.

We have to see around ourselves the whole nature enjoys itself, it doesn't bother, doesn't bother about anything. They haven't got Realisation, they haven't felt the Param-Chaitanya, but how is it they know that we have to enjoy? The flowers that come out for a short time and fade out, but as long as they live they are very happy. They don't think of their past or of their future; but they enjoy the present and in the present they enjoy, what is that, they are fragrant and giving fragrance to others. They are beautiful and they are soothing others, the whole nature is like that. If you look at the birds, or anything that we call as natural, is all sort of in a meditative mood, all these hills and big, big mountains. They look as if they are witness to whatever has been happening.

Now, we have to really first look back what we have achieved. That is important, because if you are climbing up on a hill, if you look back, you get a shock and you may fall down. So, normally people say never look back. But, a person who has earned some treasure, he again and again goes and counts it and finds out how much he has got and every time he sees that he enjoys.

So, to know relatively what we have got and how we have achieved something, will definitely give you greater strength of mind and richness of life.

The first thing that has happened to you, I would say, which is very important, is this: that you have felt this All-pervading Power. That shows that you must have been great seekers of Truth, honest, sincere, sensible, that just coming to My program you felt the vibrations and after that you started settling down into it.

So many of you have felt it, suddenly and they were amazed and they were shocked and surprised and they wanted to test whether it is true or not. But then you were confident, you found it, that you've got definitely a new dimension in your life and that you are feeling this All-pervading Power of Divine Love. I'll take one lecture, sufficient to describe this All-pervading Power.

But what you've got out of it is the essence of it, one has to know, is a complete freedom, you have achieved your complete freedom. First of all, the freedom has come to you; first of all, most important, is from your Ego, this wall of Ego you have crossed. You have got out of the bondage of this Ego, which was really so much, full of problems for you. So many things this Ego does of which you are not aware.

Firstly, a person who is an egoist doesn't mind hurting anyone. He hurts, but if he's hurt he doesn't like it, immediately he'll start crying. Especially, I have seen people who have too much Ego are very easily hurt, but they don't understand how many people they have hurt already and how many are really frightened of such a person.

So, you got rid of your Ego. It is sinful to hurt any other human being, for anything, for whatever may be the reason, that you feel you should hurt another one. The first is the revenge, the idea of revenge is there, that I must take a revenge on the person who has hurt me, or has done some wrong to me, or something of that kind. This idea of revenge comes when you react. Some people react very violently.

I have seen some people murdering each other in the name of revenge, killing their own kith and kin, killing their fellow men, their countrymen. All over the world is some sort of a stupid idea of revenge; but if you go to the subtle side of revenge, what is it? What revenge have you taken? Supposing there is somebody who has troubled you, you are angry with that person and you have killed that person; so you have actually saved him! He won't have to suffer from guilty conscience, he won't have to do anything, he's just finished. What is the revenge is? The revenge should be only by which a person gets out of his idea of killing others. Like a sword never fights a sword, it fights the shield. In the same way, the revenge that we think we can take on another person is not a revenge, because any action you take in

the name of revenge comes back to you and hurts you much more.

So many things can happen if a person, in the name of revenge, starts acting.

Now, for example, these days, you know, in the whole world there's so much of revenge going on. Even in the name of God, taking revenge because certain people are following some religion, or they are doing something else that you aren't doing. Working out this kind of a revenge, what is happening is that you are just killing people, destroying them, who do not even understand what sort of a revenge you are taking.

People are putting bombs and putting all kinds of things and by that thousands of innocent people, one is killing.

So what kind of a revenge have you taken? They don't deserve any revenge.

So this revenge, when it explodes, can destroy so many innocent people and it will definitely react on you. You cannot get away with it, it's a very long process of this revenge.

I have told you about Bermuda Triangle, what they say, that so many blacks were taken slaves and were drowned in that area, so their spirits, they are saying, are haunting on the people who are passing by, mostly the whites and they just drowned them.

So it's a very long process and all that I need not discuss at this auspicious occasion, but I have to say that when we take a revenge, every action has a reaction.

So somehow you have got out of that idea of revenge, just out of that idea.

There is another thing, that if you don't take revenge and leave it to God, it acts. It acts, not only that, but the Divine power takes into its own control how to really give a good lesson to that person, or to that community, or to that kind of organization which is taking a revenge on you. You don't have to worry. I'll have to tell you that in these twenty-five years I have seen, people have been extremely unkind to Me.

Many organizations, many so-called `religions', all kinds of things, have been after us, media has been after us. Take the example of French media, they tried to trouble us so much and tried to bring a bad name to us, doesn't matter. The media people, now three of them who went to India, are now under warrant and if they go to India they will be arrested. I didn't do anything, we didn't do anything. Secondly, the same media, I mean the same newspapers, are all bankrupt. You didn't do anything about it, you didn't go and say that they should become bankrupt, you didn't take any revenge. Why should we? Why should we take any revenge? Because we are not bothered as to what happens, we are not bothered as to what these people have done to us. But legally they are now involved in such a way that they are under warrant and if they go to India, they will be arrested and the whole of French government is with them, all of them are trying so much, but this punishment is on their head. In their lifetime, they didn't have to die or anything, in their lifetime they have got it.

So you have got this special power that you do not have to take revenge, or you have to just forgive, just forgive and the forgiveness will look after the whole

arrangement of how to bring the other person to his proper path.

So, once you are out of this idea of revenge, you really feel very peaceful, extremely peaceful. Because this peace that you have within yourself, is not unnatural, it's not mental, but it just happens to you. “It's alright, so what” if they have said, if they have done anything wrong to us, why should we bother.

So many things are there, which I can tell you, which have worked out automatically.

Now, in Turkey, they have told Me that there is some boy who is from England and he went and told the media something against Sahaja Yoga and it was all published, but in the court he confessed that “whatever I said was wrong." Nobody, went and told him, nobody threatened him, nothing happened.

So, from your point of view you must understand, that you are not going to get into any mess of taking revenge of any kind, because you belong to the government of God and this government is extremely alert, very genuine and also extremely efficient. As far as you are concerned, you are a citizen of that great Kingdom.

So what you have achieved is the citizenship of this great Kingdom of God, where you should feel absolutely secured. The man who is secure is never afraid, never afraid.

So, you have also got rid of your fear. Man is in the, I don't know why he is afraid of this and afraid of that and worries about this and worries about that. It is something surprising how they worry about their health, worry about their family, their children, their house, I mean, all sorts

of things. But Sahaja Yogis don't, they don't, we have no worry, it all works out. Why should we worry? That instrument of worry is over, is finished I think, it's gone out of order. And what you are now, in a state where you just have no time to worry because you are enjoying yourself. This fear I have seen in people works so much that so many diseases people get out of fear, so many diseases. Especially most of these left-sided diseases people get out of fear, what is there to fear? It's like you beat the Mother Earth saying that there's a snake, there is no snake, but you may just feel that way and you may go on with this fear. Anybody, any kind of an idea about a phantom or some sort of a big devil standing somewhere. It is all nonsense, for you it doesn't exist. Say in the darkness you are walking, so you see forms and things and some people say I saw one on a tree, some sort of a form. It doesn't exist actually, it doesn't exist, but this fear in man makes him think like that. He is afraid of this and afraid of that and then, as a result, he loses his freedom, he becomes a slave. Slave to so many people he is afraid of, that such and such man will harm me, such and such man will trouble me. And the whole concept of fear has ruined our family lives.

For example, a wife is dominating, husband is dominating, there's nothing to fear, nothing to fear. By fear only you play into their hands.

So, supposing the wife is dominating, just make fun out of it, if you cannot make the fun in the presence of say, your wife or your husband, better make it outside, thinking, “Oh!, look at that!" It is your special quality now that you can really get rid of your fear completely. What

is there to be afraid of wife or afraid of husband? What can he do to you? At the most he'll kill you, so what, you are going to die in any way.

So, the fear of death is another nonsense people have. First time when I started My work everywhere they asked Me, “What about death?" I said “but just now you are living, why are you asking,`what about death?' " So many people ask Me the question, “What about our death?", why do you want to know about it? I'll tell you what about today, just now.

So this is another mad idea that we should know about our death, what is going to happen and whatever happens. Once you are dead you are finished, you don't have to do anything after that, so what's the use of knowing when you will die, what will happen to you? Whatever has to happen will happen. We never ask that `when I sleep what will happen to me?', do we? And this is a permanent sleep and we worry so much about it, that we should know what will happen after death. One has to die at the time whenever it has to die, because whatever is born has to be dead.

But you do know that you have got eternal life. You can never die, death is not this body disappearing.

Death is where you are absolutely without any control of your soul's life. Once you are a realised Soul you have all the control, all the powers to take your soul wherever you feel like; to be born if you like, if you don't want, you will not be born. To be born with the people in the families, in the communities, wherever you like. There are many great souls, I know that, have taken birth daringly into societies which are very much, I should say,

deteriorating and are in danger of getting destroyed, because of stupidity they do.

So this happening, that we are afraid of death, is absolutely absurd for Sahaja Yogis. What is there to think, even about your death? There is nothing like death for you because you have got eternal life. It's not that you continue with the same body, you may go on changing your dress, but you are living, you are aware and you know, even if this body is not there, you will be there all the time available for Sahaja Yoga, for anything that is to be done in the name of reality.

So, you must know your position as eternal being, what is your work, what is your idea, what you have to do.

So one has to get rid of this idea of death because death doesn't exist for you. It's finished.

Moreover, all such people who are afraid of their death go on having insurances, this, that, all headaches, you see. And ultimately, what happens? All these worldly things you leave here and you depart. There is, I don't think anybody, could carry even a little dust with that soul which is departing. But in your case, when you people are no more on this Earth, so-called, then you don't carry all these material things because you have already given up. You have no interest in them, you are not materialistic.

So, your spirit is free and when you die, what happens to you is a very simple thing, that you feel very liberated, absolutely and then you feel your freedom, completely and you can decide what you want to do. It is all under your own guidance, your own desire, everything works out. You don't feel that you have come out of your body

and this is what should tell you that there should be no fear of death. But, on the contrary, it should be welcomed, because you will feel much more liberated, much more at ease. You don't have other problems that you have to, in any case, carry on in this world because of this body. Now see, “I have to take some medicines, I have to take vitamins” you don't have to take anything, you don't need anything.

This body is finished is a very good idea. It is so troublesome, you see all the time, despite the fact you may say that “I don't care for this body and all that” but this body won't leave you. This is the most sticky thing we have, is our body.

So to forget about death should be the easiest thing for you.

We have broken many walls, as you know very well, that the conditionings that we had we have finished that, it is very surprising. I have seen people, when they get their realisation, immediately after that they start seeing around them. They'll immediately tell you what is wrong with their religion, then they'll tell you what's wrong with their country, what's wrong with their culture. It's through them I have come to know so much. I didn't know that this was so, but they themselves told us. Now, for example there's a Frenchman, take it. If a Frenchman gets his realisation, I mean, you know everything about French. The things you could never even imagine what sort of people they are, they will tell you everything. Same with the English, I've seen English, they may, they laugh at themselves alright, but actually when they become realised Souls, you see, they give you a

complete picture of English people, what sort of people are there, what is wrong with them, how they are egoistical, this, that. I was amazed, I mean I never knew so many things, which I came to know through Sahaja Yogis who got realisation. Because they have seen all these things very thoroughly and very closely and they knew what was it.

Now when you become so clean, washed-up, your mind completely cleaned out from all kinds of conditionings, you see, you become like a mirror, a beautiful mirror and in that mirror one can see a complete picture of the society in which we live, the complete picture of the government which rules you, everything so clear-cut. And it is absolute, it is not biased. For example, you ask somebody then he will say “what is your politics?" If I say “My politics is... I have no politics” he will say “What! you have no politics, how can you exist without politics?" “I have no politics." So they will go on asking questions to you which are very much unknown but for a realised Soul it is just the other way round. He not only sees, but also shows and expresses very clearly. I have been amazed at the way people have been really so reflective of the society into which they live and the country which they represent.

So the identification is lost, complete identification is lost. You don't feel identified much, you just see what's wrong with that person.

Then another point is, you start seeing how you can help, what you should do, how you can work it out. And the importance of that becomes your main thing in life. Everybody, I see yesterday, the way you brought all

these flags and all that, behind that flag I could see all of you wanted that peace should prevail in those countries, they should get all the joy and beauty of Sahaja Yoga. What a feeling it is, it is not like yourself becoming Sahaja Yogis and sitting in the corner, no, they want to do it for that country about which they are not identified, but without identification they have that deep feeling that they have to work out, correct it. It is a very different type of personality you develop. Normally, you see, if you say a word against somebody that is in your country they do like this “Oh, what are you talking about, what about your country!" Immediately, they will never accept. If you just try to say one word against their country or their government, which might be the most rotten government, but no, still “what? We are all right!" That kind of stupid identification which keeps you completely glued to that society. Like some people will say, “no, I have to go to the pub” I said “why, why do you have to go to the pub?" “That's our society, that's our culture. We have to go, we have to go to the pub, get drunk and fall down, all of us together. That's the sort of thing we are. We can't help it, you see, this is what it is." You tell anybody, “Why do you do like this? What is the need to do?" “Well, because I have to live in this society, after all, after all I belong to this society and I just can't do what I like." But when you get your realisation you can do what you like. You can do what you like because you only like that is righteous, that is good, that is constructive, that is helpful.

So you can do whatever you like after realisation, there is no restriction for you. All these restrictions of “don't,

don't, don't don't." These clearly enslave you, I think it very much enslaves you, but after realisation you are such a free bird that nothing can enslave you.

For example, there are many preachers who preach that you should not drink and you should not smoke, you should not take drugs, you should do this and do that, but it doesn't stop, it doesn't help, people struggle, try everything, ultimately they commit suicides. But they cannot get rid of those habits, while now you are so powerful that nothing can stick to you. That is the purity of your character that has come up. It doesn't allow any nonsensical things to stick to you.

I have heard of so many Sahaja Yogis telling Me how their eyes have steadied down, how they have become so righteous, how they have become so pure and they can't understand. They said “Mother, is it Your power, Your purity, You have given us? Or it is our purity You have awakened?" Of course yours, no doubt, all these things you have and you become aware of it and thus you get absolutely misidentified, I should say, with all these nonsensical things and you don't like it. You just don't like it and you go on criticising. I have been to all these countries also before and I have met people who are very much identified and diplomatically I was not supposed to say anything whatsoever that would make them feel that they are doing something wrong. But after Sahaja Yoga the same people are telling us and making fun of the whole thing. For example, I have heard some Sahaja Yogis talking to each other. He says “you see in my country this is such a stupid thing going on." Another one said, “Nobody can beat mine, it is much worse." It is

a very common competition among Sahaja Yogis going on.

So then, we have to see how pure we have become and in this purity, anything that is dirty, murky, anything that will spoil this purity, we don't like it. We don't like it. We are washed clean from inside and we won't want to take anything like that within us anymore.

Then I have seen also the way people have become so compassionate. It is very surprising how they have become compassionate to each other. For example, there were two Sahaja Yogis who were not very happy with each other, not compatible, whatever you say that is. And I did not know flow to make them feel that, you see, the other Sahaja Yogi is alright, it doesn't matter after all, what is it. “No, I don't like this thing about him” and the other would say “I don't like this thing about him." So it went on “I don't like” he says “I don't like” I mean they were seeing each other's defects or whatever you may call them.

So I said “alright, now will you meditate for some time again, meditate, meditate." And I said “now...

do you love Me?" One says “I love You more that he loves” I said “it is a difficult situation, how to make them understand now that you cannot weigh your love, you cannot make a chart out of it, it is something within yourself and if you love somebody then you enjoy it. I mean, you cannot qualify it, you cannot quantify it." But this was going on with these two gentlemen together and I thought, now what to do? They are very important and still there is no understanding between the two.

So the Divine power took over, I think. One of them fell very sick suddenly, very sick and I had sent word also that “you'll be sick, be careful” but they thought that the other fellow might be trying to be funny or something. It was not understood, he was very sick. When he fell sick, the other one felt such a tremendous love for him. It is something nobody can explain. That he went and sat with that patient for 24 hours and said, “if you need any money, I have got." He paid wherever he could pay.

So, this gentleman, who was a very sensible, reasonable person on his own, felt this love, this affection in this hard task-master, the other one and such understanding grew up within them. It is, I think, the Divine's play that they were brought together so close and such compassion.

So the force of compassion within you is so much, it is very subtle, you don't see it, because on a mental level I was telling them, arguing, trying to pacify him, pacify him, like that was on, it would not work out. But when this force of compassion started acting, suddenly into one of them, another one saw the compassion, the pure compassion and just they became great friends.

So one has to feel the compassion within yourself. I have seen many a time that there are many Sahaja Yogis and sometimes I have to correct them or say something. Immediately another one will say, “Mother, can You forgive him? You can't forgive?" I say, “I've forgiven, I'm not saying anything." “Please forgive, please” I feel so happy to hear that, that in one point, in one condition, when it comes to a Sahaja Yogi, you support him, even

against Me, I feel happy. Shows that you are not only generous, but you are filled with your compassion.

So, this source of compassion which is within your being, in your heart, you just have to open your heart. If you open that heart it is like opening the Sahasrāra. You'll be amazed how you can forgive people and how you can live with them. I have reports which disturbs Me, many a time that people are forming different groups and having different ashrams and they don't come to the collective and all that.

I feel very much concerned. Now what is missing is, of course there are also some people who think that they must have a separate, their own organization and why should they be in the collective and all that.

So that it is definite that such a person has not yet achieved that state of compassion. In the state of compassion you like that somebody tells you that don't say anything to such and such person, “I don't want you to say this." It is very, very joy-giving to Me.

Like, we had one couple who were quarreling throughout, they used to send Me letters after letters, I was fed up, telephones after telephones, both of them quarreling. Quarreling so much, I did not know what to do with them.

So, I thought it is better that they divorce and finish it off and I told them separately, that “You better divorce each other and get out of it. But the complaints you have are such that they cannot be solved." She said “How?" I said, “You are saying that `my husband does not give me more time, he is always out and he doesn't spend any nice moments with me, we don't go out,' and all these complaints are there." And the husband says that “she

always troubles me that I must take her out and I must do this and I must do that, I want to do it, but I can't do." So, I said but when you take a divorce you'll never claim anything. Permanently the husband is lost and you are lost, so why do you want to do such a thing? Immediately this compassion started working and then I put in a word. “Supposing any one of you is sick tomorrow, then you will look after each other?" This just put them out.

You know such little, little moments in life come in the lives of Sahaja Yogis I've seen, that suddenly this heart opens and with that they combat all this petty nonsensical ideas which keep them out from each other and out of the collectivity. What gives Me the greatest enjoyment is to see how you love each other, care for each other, joke with each other and dance with each other. This is the greatest thing that I enjoy. I don't want to get rid of this idea of mine, despite the fact many times it is hard to believe how Sahaja Yogis could behave like this and try to create rifts and distances between the people who are realised Souls. Because realised Souls anywhere in the world, if you see them, they respect each other and not only respect, care and never talk ill of another realised Soul. Never, I don't know if you have known about the private lives of these saints, but in India as we have had so many of them, when you see them, how they have behaved towards each other, the way they have looked after each other, it is so beautiful, it is so noble, as if they care for the other Sahaja Yogi, or yogi, or realised Soul, more than for themselves.

And the whole thing makes, you feel like in a new world of new people who care for the feelings of others and not

what they want to say or what they want to have, or they are something special.

Also, in Sahaja Yoga you have lost your specialities.

Some of them think they are very special.

Supposing I call some lady to put, say, some altar on My Feet. She starts thinking she is very special, but I just call her because I know she has a horrible Āgñyā and I have to clear it out. And when somebody told Me, “Mother, she thinks she is something very special” I said “really, what makes her think like that?" “Because You call her to put some altar on Your Feet." I said, “I just call her that she has such a horrid ugly Āgñyā, that she will trouble everyone, so I want to clear it." So, either I should have told her that `you are a very egoistical, horrible,' and all the words that are possible, otherwise she won't understand.

It is so surprising. There is one lady who was really very nasty to her in-laws and everybody in India and she came to see Me. I actually scolded her, I said “what business you had to behave like this here? Your father, who was such a racist, you never said a word against him, now why are you talking so much against these people?", I scolded her! And she went out and told, “Oh, look at me, Mother has called me, nobody is allowed to see Her", I said, “What's this?" It's a very funny situation with people, I sometimes feel. The way they think they are something special and they should make themselves special, it is becoming really difficult. Now, just to show My love, to appreciate something, people have, gone down! and if you give some present to that person or you show concern about that person because he's done some

good work or something, he starts thinking he's something special. I mean, it is an impossible situation, because I expect that if I have done anything good to that person, or in anyway suggested My concern about a person, that person has to become a very good Sahaja Yogi, in the sense, the most humble and honest and loving person, otherwise it has no meaning. No use being good to anyone if that means that person jumps into hell.

So, this one is also another idea of speciality, that they have lost their sense of speciality.

When a drop becomes the ocean, it has become the ocean but it's not the drop anymore. If anybody thinks I'm a special person then know that you are no more an ocean, you are still the drop, because, unless and until you are the drop, how can you feel that I'm something special.

So, you have lost your speciality, you have lost it because all these ideas of speciality comes from your past.

One lady I met once, a long time back, she was a very rude, loud, arrogant woman.

So, this was in Delhi where people are very conscious of their husband's jobs and this and that. I didn't even know the destination or even the designation of My husband.

So, she was very rude. I said, “What's the matter with you? Why are you so rude? What's the problem?" She said, “You don't know?, I'm the wife of such and such." “You are the wife or the husband?" “I am the wife of such and such"! So, she asked Me “What are you doing here?", I said “I am a housewife." Then My husband came, she

said “Do you know him?" I said, “Yes, I know him, why?" I thought there must be something wrong there also.

So she said “No, I just want to know” ah, “How do you know him?", Why? As if I was some criminal or what! I said “He's My husband” “Oh, my God, he's Your husband!" What happened?, as if ten serpents had bitten her. Maybe her husband was at a much lower position than My husband, maybe, something which I am not conscious of it. But this is what is “I am something special." This stupid idea of being special has to be completely negated in Sahaja Yoga. Not mentally, not mentally. Mentally if you are again saying “I'm not special, I'm not special” like a mantra, you'll become much more, because you will say “I've said this mantra 23,000 times, who can say like me." So this idea, I'm something special, I'm something great, I'm something out of the blue, something superior to others, just vanishes. Like as I said, you are a drop in the sea. You have become the ocean but you are no more a drop to have it a relative value system, there's no relative value system. There's no system by which you can say that I'm higher or he's lower, all that has created all the problems of the world. See, from our cast system in India, the social systems in the west, the racialism in the west, also self-consciousness of, my religion is better, yours is worst, we are the best. All these things have created problems. It has done no good, it has failed and failed and failed.

So, in Sahaja Yoga, at least don't bring this disease anymore, that I'm better, our country's better. This speciality you should drop and the real beauty of your

personality reached. For that, you don't need a special skin, you don't need a special body, you don't need a special, what you can call, a glamorous look. What you need is a beautiful heart! And, I tell you, it is the beautiful heart that attracts, nothing else. It's the beautiful heart that you want to have.

I've known people, many like that. There was one gentleman who divorced his first wife. She may be, not be so good looking, ugly or whatever it was. Then he married another good looking woman and he ran away from the house.

So, I asked him “Why?", you didn't like that woman because she was ugly or whatever it was, Why have you now been running away from this one?" “She has no heart, She has no heart." And, this is what you have, a very great, generous, beautiful, Dharmic, heart, you have got it, as a present from the Divine and which you must respect. You should be proud of and enjoy it, as you should enjoy your generosity, you should enjoy the way all this nature is enjoying itself. To be very meticulous about things, to be all the time correcting others, it is a headache, it's a headache. The best thing is to correct yourself and laugh at yourself, that's the best way you can do it. Everybody has some funny things about themselves. I also have, I must admit and I enjoy them because I think I try and try but always I forget. For example, the spectacles, I always forget them. Before coming, you see, I must always forget it, I tell Myself that I need it, I should take it, I must remember, but invariably I forget.

I don't know why, I mean, I can't do without it, but still I forget. There's so many things, for example, I don't know how to count money, if you may give Me a 100 rupees, I'll count it 200 rupees. I tell you, I'm good at mathematics but I can't count. I don't know how to sign a check, can you believe it, I can't sign it. You have to write the check for Me, otherwise I can't. And, somebody asked Me say, for say 100 rupees, I'll give him 500 and forget about it and that person will say “Mother, you gave me 500" and I'll say “No, no, I gave you a hundred only", “No, you gave me 500." I went home and found out, it's alright, after all if he's dishonest, he's dishonest, if he's honest, his honest, so why to worry about how much money you gave and this thing and that? Meticulously, you see, finding everything like this and I've seen with all these meticulous people they always fail, because you see this brain plays some tricks on them.

For example, there was one fellow who told Me that the size of your car is such and such, alright then, So, the size of the garage should be such and such, I said, “Alright." So, when he built the garage, the car won't get in. I said, such a meticulous architect and such a well-known person who has got so many awards, this, that, how could he make such a mistake? I still didn't understand it, you see? He said, “Now, you better buy a smaller car." I said, “At least now you made this garage in a proper way, otherwise again if I buy something it won't enter in." So, you see, what I'm saying, we are so particular, so meticulous. Now, see these little, little flowers, I see them here, they are not meticulous, they are growing on their own, freely, everybody gets the

suns rays and they are quite happy. But the way we are particular, those people who are very particular are headaches to themselves and then ultimately they find that it is not so. You have lost that, you have lost that meticulousness.

I know of a Sahaja Yogini, she was running a shop and she said, “Mother, I knew each and everything and I knew each and every price and every thing I knew in the shop, but since I've got realisation I've forgotten everything." “So, are you happy or unhappy?" “I'm very happy." “Why?" “Because, now I'm making a big profit." Profft is the main thing, why should you try to remember each and every thing.

So, it is to be very meticulous to be very systematic, where you see around there, no tree is systematic, it is unsystematically systematic.

Some leaves are this side, some are that side, some branches are on that side, there's no system, because then you become a military, if you form a system.

So, in Sahaja Yoga, there is no system. We are beyond time, we are beyond all kinds of systems, we have no systems.

All our system is what is the unison within ourselves. Like these two hands, they have no system built in, nothing, but they move, especially telling you if you want. Both the hands move like that, all the time like anything and I don't know what it means but they all do the same thing. But, there's no system built in, nobody said to them that, do these gestures and all that but they do it and they do it naturally, all of them together, without any system.

So to build up mental systems is wrong and against Sahaja Yoga.

Some people have written to Me “Mother, we want to translate your transcriptions", that, do this, do that and plans, I said, “Forget it, forget it." Because, if you start planning, you see, you will definitely, definitely fall into the trap of systems. You'll have to follow systems, this system is good, that system is good, why not have this way and because, I don't mean, I don't say that is wrong because you have been used to systems. Especially in the West people are over systematic, over systematic. In everything, like they'll have courses, you see, built up, then the spoons, then the forks, then how to move and what to eat and how to eat, I mean, it is too much. If you have to eat food it is straight forward, you can eat it with your hands, there's no system needed. For all these systems, anorms [and norms], are too much in the West and you should really try to cut them down. As a result, they had anti-culture and all that nonsense, another kind of stupidity where they were building up another kind of a system. You see, then they said, “We are hippies now", alright, so they must have hair never washed, never clean with lice in their heads and it must be all, like, you can say, the `shañkara style'.

So, all of them have to have that, again a system. There's no variety, one hippie means, another is the same, you cannot make them out one from another. If somebody puts a ring here, everybody will put it, if he puts a ring here, then everybody will put it. Without any brains, without any understanding and they talk of individuality, a personality, where is the individuality. Because you

take to anything that your gang, you can call, or you can call the crowds, they are taking to, very fashionable. In India, if you say it is very fashionable, it means it is very expensive and very beautiful and I mean it's a very elite, elite word. But when it's very fashionable, means everybody likes it. It could be a punky thing or anything, it's fashionable, it's the fashion. Means you do not have your own idea, your own personality, your own individuality. In Sahaja Yoga you are not bound to any fashion, no fashion.

If you like, wear this, wear that, whatever you like. You are free to do what you like. You can wear whatever you like but as I said, again that you will govern yourself, you will be your own Guru, you will be your own master and you will do whatever is good, whatever is decent, whatever the deities will like.

You'll just do it that way because now you are a Sahaja Yogi.

So, the life becomes so much easier, so much easier, you don't worry about things which are not there and you are not also worried about the things which are there, because you think, now, you see something, alright, I have got this nice one now, I must keep this one for somebody, I must give it to somebody.

So, I got a ring which was quite big. I was thinking whom should I give this, who has got thick fingers.

So I started looking at the fingers of everyone, you see, whosoever has a thick finger, I'll give him this one.

I mean the thought was just the other way round, supposing you are not a Sahaja Yogi, then you will say, “Oh Ma, such a big thick finger, why don't you take out

some gold and use it, sell it off, or else you see you can take out the stone from here." I mean all kinds of nonsensical things you'll think but you'll not think that you better give it to somebody because you can't wear it, it's too big for you. Why not give it to another? What's wrong? After all, it is not fitting you, so give it to another, but this is only possible in Sahaja Yoga. I've seen people, very kind, very, very kind people who have been very sweet to each other and exactly what the other person wants they'll buy and give it to that person or may say, oh no, I have one I'll give it to you, they do it like that, all the time thinking of others, What should I give?, What should I do? It's the expression of that joy, the compassion within you, you use your matter for that, all the time, all the time.

Like somebody's house was burgled in Canada.

So she writes to Me, “Thank God, my house is cleaned out now, I didn't know what to do with it, with the junk." So you see, this kind of an attitude comes in, so that if you have to give to someone then give it to someone who is a Sahaja Yogi to express your love. But normally, people will do, with whatever, is the junk in the house, whatever is rotten, finished you see, that they will give as a present. But when you are a Sahaja Yogi, you want to give something really very special because your whole being has become so beautiful. Just like a flower, I should say, which wants to give fragrance to others all the time, the fragrance of your compassion and love, affection and security. It's a new age, what they would say, but I would say it's a new human beings that are before Me and all this newness has so many beautiful *[UNCLEAR* assets], that

they really sparkle like diamonds, no doubt. My only blessings to you is that you grow and grow in it and become greater and greater people. Never thinking that you are greater than others. Never thinking that you are more special than others, this will definitely soothe you down completely.

Somebody might have hurt you somewhere, doesn't matter, somebody must have scolded you, doesn't matter. What is your capacity is to love another person and to be affectionate and kind.

I'm really amazed how these twenty-five years have passed, with all kinds of stupid problems and nice things, such a mixture and all those things have never disturbed Me, I was never disturbed. I used to act sometimes, that I'm angry or sometimes I used to say things which I should not have, normally said because it was needed to be said. But, on the whole, like sitting in a very big ship you can say, we all are elevated into the realm of Divine Love and this is what one has to achieve. One person, if he has that love and compassion and that pure love then that person can emit it to others and the rapport of this compassion is extremely beautiful which cannot be described in words. Like yesterday, I couldn't speak, with what words I could put My feelings. I thought there are no words that are created on this earth to express My deep feeling that how you people have taken to Sahaja Yoga so well and have understood it.

May God bless you.

You cannot weight your love, you cannot qualify or quantify it.

If you open your heart, it is like opening your Sahasrāra.

Contents: 1995-05-00 **Quote on Theatre of Eternal Values, Pizzeria Overlooking the Sea, Genova, Italy**

It must be professional, to the highest artistic standards.

Contents: 1995-06-04 **Śhrī Ādi Shakti Pūjā, Desires Against Real Joy, Cabella Ligure, Italy**

Today we have gathered here to do the Kuṇḍalinī or the Ādi Shakti Pūjā.

There's a difference between the two. Ādi Shakti is the total power of God, of His desire; while Kuṇḍalinī is the one that is reflected, part which is reflected in the human beings as Kuṇḍalinī.

So there's a difference between the Ādi Kuṇḍalinī and the Ādi Shakti. Ādi Shakti is the ParaShakti, is the power, which is beyond all the powers, which controls all the powers and one of the powers of Ādi Shakti is Kuṇḍalinī.

For example the Kuṇḍalinī which is placed within Me in the triangular bone is not totality of Me. In the same way the Kuṇḍalinī, which is placed within you, is not the totality. Of course it is the power, which is there to give you your Self-realisation. Is the power that redeems you, that nourishes you, that enlightens your centers. But there are two other powers as you know very powerful, which are working through Iḍā and Piñgalā and the third one is Mahālakṣhmī which is in the center.

Now Kuṇḍalinī's main job is to give you your Self-realisation because She is your individual Mother.

Everyone has the Kuṇḍalinī within himself or herself reflected whatever maybe the quality of that person.

Now as you see reflections fall on everything. Say, the reflection of the Moon falls on the stone; you don't see any reflection. It then falls on a better reflector, say the water, then we can see the reflection. But when it falls on a mirror, which is very nicely made, say in Belgium, it reflects better.

So that is how the reflection gradually goes on improving.

In the same way we have human beings who have different reflectors but they can be improved and they can be made absolutely top class, it's possible.

It depends now, here it comes to other powers that are within.

One power which is the desire. Though the Kuṇḍalinī as you see is the power of pure desire that it doesn't want anything. But it wants to give you Self-realisation.

The other two powers, one of them is the mundane desire. This mundane desire, if it becomes nothing but pure desire, then Kuṇḍalinī has no problems from the left side. But if it is not a pure desire, but full of other desires, for example: the first desire of human beings, which comes from animals I think, is food.

He wants food to nourish himself. But human being don't only take food to nourish, also for the taste of it, or for the beauty of it, which is innately working in them. That's why we run after food, which is very good, very tasty, all kinds of ideas we have and there's no standard.

Somebody can like this, somebody can like that, but the one who understands that the taste of the food is not

important and can practice it, then it works. It works wonders because the lowest desire, which is of food, comes under your control.

If you can sometimes go without food, of course not for God but for yourself, God doesn't want you to starve. If you can live without food, if you can enjoy every type of food, then you have done a lot to improve the path of Suṣhumnā for the Kuṇḍalinī.

I've seen in many cases that Kuṇḍalinī just doesn't rise, She doesn't rise. Even if She rises, She falls back. This happens when a person is very self-indulgent, is all the time thinking of things, which are not of very great importance for Spirituality. Apart from this there's another horrible one desire we have is to grab as much money as possible, to think about money. This time I had a bad experience because Sahaja Yogis came down to Me and told Me, “Mother they are asking if I, if we should reduce the Pūjā money or something?" I was shocked because I never decide about it. It's all decided by the leaders. I said, “I am not concerned." Then they would like to have a bargain as you have in the shop you see or maybe some sort of a sale or some sort of a thing. This is one of the greatest dangers in your ascent. For a Guru people pay millions and millions. Where you know I am working it out for your projects, I am buying lands for you, I am doing things for you and for which you need money. But nobody comes forward with any donations as such. They won't, they don't understand that it is for you I have to have all these things not for Me and they pestered people many a times like this.

Once suddenly they decided that we could have fifty percent payment. Immediately so many telephoned 938, “Ah are you going to have fifty percent less the bargain price? We are coming for the bargain." Is the sale programming. For example in the sale what do they do? They offer you something, so that they can get a lot more customers or things like that. Sahaja Yoga is just the opposite of that. You don't have to give anything but you get lot. But this is not for sale; this is not for sale by any chance. It is a thing where you have to pay because we have to have all these things and I have to pay so many things which you do not know, like last time we had about I think fifty people who came just free.

Some of the leaders know. But some of the leaders, they just go on asking like this because I don't know perhaps they want to save money or they want to popularize themselves among the disciples maybe, that is the reason.

So this thinking about money itself is a very detrimental force for your spirituality. Otherwise what others are doing is the same. All the time they are thinking of money, thinking of money. Now if you are thinking of money and thinking of earning more, for Sahaja Yoga, to help Sahaja Yoga, it's all right. But it is for yours own ideas. In the West it's very common. Not in India I must tell you; we, India is the poor country but one day Yogi told Me, “Mother I need some money for the school." I said, “All right I'll give you." “No, no” he said, “I'll collect." And he collected in one meeting eighteen lakhs of Rupees. Of course I told him, “Now don't take it, I've got money to pay, don't collect." But so much of money

orientation all the time. Thinking about money, saving money, these things are absolutely against Sahaja Yoga.

You can ask anyone how much I understand about money. I don't understand banking, I cannot count, even thousand pounds I cannot count. I'll count them two thousand or three thousand; I don't know what I do. My brain goes off when it comes to money. I don't know how to count. I am not worried about what money we have, what we have, what we have to do is this money is here let us do something about it.

Today I don't know why I have to tell about this gross subject. But it has been pointed out to Me, “Mother you never say anything about it and the people are getting really materialistic." That's a very sad affair. Even one person, who is materialistic, will have to go out of Sahaja Yoga. Gradually it will work that way and you'll be surprised that you are out of Sahaja Yoga. It is very amazing how after getting realisation also, getting on top of the world, we still live in small little holes like rats of this money business.

This money has brought so much problems to our world, you can see it clearly. All this Economics and all this knowledge of Economics where it has gone? Is the world better by it? There's recession going on everywhere, everybody is unemployed. In every country you go there's unemployment so much; this is so much. That shows that this Economics is also a very artificial science and dealing with the weaknesses of human being, not with their strength. If they could know the strength of human beings, they would have done much better than they have done so far.

I'll give a simple example: Now, we have very sophisticated places in the West, very sophisticated.

You know they have everything electrical, you push the button and everything is there. Specially in these modern planes when I travel, I don't know which one to push because they are so slim and so delicate you see, need a special artist to do that. All this is for what for getting more money and more money and impressing people. But at the same time people are fed up; when all these sophistications are on. They are fed up with computers, they are fed up with electricity, they are fed up with cement, they are fed up with all kinds of artificial thing, is a fact. More, more, much more in the West than in the developing countries They are just fed up.

Now this is the force, this is the strength. Why are they fed up? They are fed up because they have realised it doesn't give you joy. It doesn't give you soothing feeling. It irritates them.

So it is against human mind, human character or human civilization, something inhuman.

So now what to do? I went to America once and went to see a friend of ours and all the houses were covered with the cow dung colour you see.

So I said, “Why do they have these cow dung all over these houses you know? What is the matter with them? Why don't they have nice white, or another people like very much is this sand colour?" He said, “Nowadays these Americans want to have cow dung." I said, “Cow dung! For what?" “Because they are fed up of cement. Now they can't get so much cow dung here.

So they have a special way of making cement look like cow dung. They mix up things so the colour comes out like cow dung." I said, “Why the cow dung of all the things you see?" So they said that some of them went to India and they had to sleep in some huts, which were covered with cow dung.

So they found out logically that cow dung if we have, it will be the most soothing colour for us. And so there were articles about it and people have started using cow dung.

So what is the force now behind? What is the strength? The strength is that they want to live in natural way; they don't want to have artificial things.

So they go to another extreme to have cow dung.

Sahaja Yoga is in between. Now one has to understand that whether you put cow dung or you put cement or anything, it's not going to give you joy. Say, for India, people who have got cement houses are great, you know? According to them cement represents luxury and also wealth. But in the West if people see cement, My goodness, cement means to them it is something like a grave.

So now the positive thing that is in with them is that they now want to live with a natural things. They want to use natural material. Natural life. But to the extreme if they go you see we had anti-culture like hippism and all that.

It brought no luck.

So to get from one end to another extreme it also not conducive to a human life because; and you see a human being cannot become primitive. Even if he tries to dress up like a primitive person his brain is modern.

So when they get fed up from one to another, they don't realise that what is the missing point? In both the things whether you live like a rustic person or a very cementy person, any type you might live, the missing point is that in everything there is a competition.

Once it starts the fashion all right everybody will have cane chairs; everybody is having cane chairs.

Now in this competition, they miss the point is the joy. A person who is a realised Soul will not desire, whether it is cement or anything or anything doesn't matter it's just the same. But it will come to his mind that all these artificial things are ruining human beings.

So he'll say no. But he will not have hair like the primitive people; he'll not behave like primitive people and lead a very normal, natural life.

So when the mind starts thinking something about it, it will never get to the point of joy, from one end to another.

So they think that they are going into a balance, they are going into Dharma. My experience is different. Even those who were hippies I know them, they used to eat like real gluttons and they are very much interested in their comforts and they would go to any extent of snatching anything of that belongs to somebody else. They thought they now become hippies so they're already the landlords, because they have given up this, they have given up that.

So the mind that suggest that to overcome your money orientation, your competition and all these artificial things you should change your lifestyle. But that doesn't

help, never. It's just a play of the mind from one to another.

So how to detach yourself from this idea of money orientation? Whether you wear a Sannyāsī's dress or you wear a wonderful, some very expensive dress, is the same to the body. You can't even see your own dress.

So is the same to the eyes. But with the mind you start convincing yourself that now I've become a big Sannyāsī because I am wearing a saffron dress. By wearing that kind of a dress you can never get rid of this nonsense.

So first thing you have to be a normal person. There is no need to be abnormal outside. That you are deceiving yourself. If you think by changing your dress, attire, your lifestyle you have become a great Sannyāsī or a great, detached person from this money orientation then I must say, “don't deceive yourself." A person who is detached from within helps the Kuṇḍalinī to rise constantly without any catches.

So for a Sahaja Yogi it is important to introspect and see for himself what is your level? As I told you about the reflector what sort of a reflector you are? No use deceiving yourself because Sahaja Yoga is for you, for your benevolence and your Kuṇḍalinī is for your benevolence. The ascent is the aim of your life and to perfect it is your job.

So you don't have to take to anything outside. It is inside you have to see yourself what sort of attachments you have.

The second force which is, I am surprised how has suddenly come up among Sahaja Yogis that they don't have immorality problems. They have just become moral,

most of them. Ninety-nine point nine, nine, nine, I think are moral people in Sahaja Yoga. There may be here and there because they enjoy their morality. Because they enjoy their morality they want to be that.

Not only that they want their children to be moral, their families to be moral. And that is how morality is spreading in Sahaja Yoga very fast. In that also one has to understand that it is the innocence, which is the force. Not the morality like some people write to Me, “Mother I get up in the morning, I sit before the photograph, I do this, I do that, then I take my bath and then I do this." I don't, I can't understand this, no not necessary. You have to cleanse yourself once in the night as you cleanse yourself, your body.

And once in the morning you have to pray, that's all. Is not necessary to have this ritualism, this kind of a rigmarole, all the time you go in, everyday morning till evening nonsensical these things and they become fanatic. They start becoming absolutely fanatic about Sahaja Yoga and this fanaticism can be very dangerous because they try to remember everything by heart this and that. No, not necessary. It should be in the heart because it amounts to the lip service there and with the lip service gradually you start feeling you are great, your father is great, you this and that.

So you are thrown away. You yourself throw yourself out like a, I can say like a, you hit a ball and it comes back like, I've seen people, many who try to thrust themselves in Sahaja Yoga just are repelled back by themselves, not by Sahaja Yoga.

Sahaja Yoga attracts you, no doubt. But you must have gravity. If you don't have gravity, how can you be attracted? The seriousness about it is only this, that you should introspect, seriously.

Find out what's wrong with you. Because this is a great chance for you to ascend. With this kind of a mind, which becomes fanatic in Sahaja Yoga, starts saying harsh things to other and disturbing the peace of others because they think they are very great Sahaja Yogis. Then I think one should introspect and find out why am I doing it? So many people have the same defects but for that they'll scold others. Perhaps maybe they think by correcting another person they might be corrected. I don't know what is the idea of their procedure is? But it is very absurd sometimes; the way people look at their, look at their problems as if these are the problems of others.

Now, if I am saying this to you somebody must be counting, “Ah I know this one Mother is saying about that one." Never will say that it's for me and I have to see myself and introspect and find out what is dragging me down.

So this is one of the most important things is that you cannot be harsh, you cannot hurt people, you cannot misbehave in that manner and if you can't do that then you are thrown out of Sahaja Yoga by yourself, nobody has to throw you. You have to correct you, people have to like you and you have to be one of them. If the collectivity is not there, your Kuṇḍalinī will never rise. Because She's rising, She's trying to give you a second

birth so that you become one with the whole. The drop becomes the ocean.

That's Her job, She'll never rise. A person who thinks he's very exclusive, special should not come to Sahaja Yoga.

This is another great hurdle in rising the Kuṇḍalinī when people think that they are something special.

We have no priesthood. And leadership is also is a myth I think, people whom I think are better off with their Kuṇḍalinī I can communicate better. But sometimes they too behave in such a manner that one is shocked. How could they behave like this? And these serpents you see just suddenly come up and you see them. You are shocked! What are they doing? Where is their attention? What are they worried about? So such stupid ideas if they walk into your mind tell them, shut up now I know myself very well. That's the best way to keep you out of it all these nonsensical things that are working.

First of all you must remember that you are seekers of truth. Have been seeking truth for ages, for years together and now, I would say for many lives and now you have found it.

So grab it and hold it fast, by understanding that this is what you wanted you've got it now.

The another big problem that comes in the awakening of the Kuṇḍalinī which I feel is very important to be told to you is that some of you think that you are very close to Me. That you have a special right on Me. You don't know your Mother is a Mahāmāyā, be careful. I am telling you again and again. Never think that way. Nobody can be My favourite, I assure you, cannot be. It is like a mercury if you put it on another metal or something doesn't stick

you know. My mind never sticks to anyone, never sticks. Now supposing somebody is in trouble, somebody has written to Me, there's some problem, then the thought comes in. But I don't stick to that, I don't stick to anyone nor do I have any attachment to anyone because that will be against the principle of pure love. I cannot be attached, of course I see your problems very intimately. I would love to solve them, I get worried sometimes, you can call it worried, but the thought, attention is going towards that person. You've seen when there's a tide, the Moon when it is full Moon the tide is much bigger. Does the ocean think? What about the Moon, does he think that it has to attract the particular ocean or someone? It's just the nature, the swabhava, the nature itself that acts.

That's the nature, you can't help it and this nature is the one you should also try to adopt and adore because it's very helpful. This gives you a great relief from your mind, which is always thinking, thinking, thinking and doesn't allow you to have thoughtless awareness.

Get attached to someone, you are worried about some problems, even your problems sometimes, all the time your problem. Thinking about your problem or about somebody whom you are attached to. Then this mind starts working. How to solve the problem, what to do, this and that? But then you stop your Āgñyā completely, how will the Kuṇḍalinī rise? In any walk of life for a Sahaja Yogi, it is the best way to stop thinking is to think how he's going to spread Sahaja Yoga. Just divert your attention. This is the greatest pleasure for you, for which you don't have to pay or anything; just know what

powers you have got. At this point I find many people are not at all aware of their powers and not using them.

When you don't use your powers also Kuṇḍalinī falls down. Why should She work? She's not stupid; if you don't want to use Her for what She has to achieve then why should She worry about you? So She just drops down, She has nothing to do with you. Then suddenly you come out, “Mother I got this trouble, I've got that trouble, this happened." Especially troubles like arthritis and all such troubles come from people who don't use their vibrations. Give it to the flowers, give it to the trees, give it to anything that is living but don't shirk it. You need not touch the person but the desire should be `whom should I give vibrations?' Only worry should be `whom should I put attention to? Where should I put this energy of mine?' Once you start using, this Divine Power it starts flowing much more, much more and your Mother the Kuṇḍalinī is very happy. And then you start seeing wonders what's happening.

For that you have to have first of all attention on compassion and love; but compassion and love of God, God Almighty.

But when I talk of compassion I find people are more interested in the people who are, Sahaja Yogis who are suffering, who have problems, who are thrown away from Sahaja Yoga. They will write to Me, “Mother please, please somehow or other take them back." That's My job not yours. But those who don't love God, they are not going to achieve much. They have loose tongues, they talk funnily, they don't understand they are dealing with God Almighty and this kind of frivolous talking and

frivolous behaviour; you must understand that angels are around you all the time, all the time they are with you. They watch you. They will help you, they'll support you, they'll elevate you, they'll cross all kinds of hurdles but you have to love God from all your heart and all your soul. You can't say things, which are not full of protocol.

All this is only possible when you surrender your ego. God doesn't want anything from you. What can you give to God? It's a funny idea people have. But it's all right you can give anything to God. Kṛiṣhṇa has said that you can give Me flowers, you can give Me water, you can give Me this presents, this, that, I'll accept. But what does He say? That only thing that you have to do is to be one with Me. You have to be one with Me, you have to connect, be connected with Me. And this feeling of connection is so satisfying, is so joy-giving, so nice, which cannot be described in words. Thus you find your Kuṇḍalinī is just flowing out with joy for yourself and for others.

Also the right side, ambitiousness, domination, showing off, harshness, cruelties. I don't know how many things there are on the right side. But they can be unlimited. I mean the limit is Hitler you can say, so far. God knows some other may come to compete with him, but so far he's the last word.

So all these also start destroying this Kuṇḍalinī. I've seen also Kuṇḍalinī of people which is hurt, wounded, just can't rise, finished.

Then I feel that let them take a second birth; only then one can work it out because is impossible for such a Kuṇḍalinī to make Her rise. If you are selfish and you are cruel then this Kuṇḍalinī becomes hurt.

A good mother feels hurt when her child misbehaves.

So this Kuṇḍalinī gets very hurt because She wants you to have your second birth and She can't just bear it and this makes Her absolutely incapable of rising. She becomes sick, ill and wounded.

So all kinds of aggressiveness should be given up.

That's not going to help because you have come to Sahaja Yoga not for saving money or bargaining or anything. You have come here because you are seekers. I've seen invariably people who have been to false Gurus always have this kind of a money orientation because they must have been lynched completely by the previous Gurus, maybe, I don't know what to say.

So it is we who can rise through our own goodness and beauty. And it is we who can come up to a level of great Sahaja Yogis. Don't keep this power with yourself. It is to be distributed and given to others and make others also very happy and joyous. Is a duty of every Sahaja Yogi to do it. Also thinking about Sahaja Yoga, not about yourself is the best way to avoid many problems.

But once they start thinking about Sahaja Yoga, they start thinking about the defects of the Sahaja Yogis; that's not going to help. You have to develop that peace of mind within yourself by which you can become the witness of yourself first. You should be able to witness yourself and see what are the things, which are putting you down. Because today the world is absolutely chaotic, from this chaotic world you have to rise into a very peaceful, beautiful world and you have to take many to that.

For that you have to have the quality. It's not just you become Sahaja Yogis, put My badge here and all that. In every way you can spread Sahaja Yoga.

But be careful because one should not feel that you've done a great job. Whatever you are doing is for your own good not for others.

Now we have to see what a great thing that has happened because Kuṇḍalinī was a big mystery before.

But now it is not anymore, it's all open. You all know about it. You know about its powers, you know how you can achieve your highest goal.

So just to balance, just to lead a mediocre life is not the way a real true seeker of truth should do.

But if you are the real seeker of truth, then you should see what's wrong with what I have been doing, whatever I have been following and what I have to achieve. All the scriptures have said that you have to be the Spirit. All the scriptures had said that you have to be born again, I am not saying that *[UNCLEAR* anymore/at all]. Only thing what I am doing is, what they have said I am trying to do it and requesting you that you should do. Sahaja Yoga is not going to [be] like other religions where people abuse children, do what they like, make money, this, that, all nonsense, like a Mafiā. We are people who are chosen and are special people who believe in a good moral life and a peaceful life.

May God bless you all.

***Contents: 1995-06-24*, Public Program, Royal Albert Hall, Kensington Gore, London SW7, UK.....**

So you have to humbly go and develop yourself. You can save the world! England is the Heart of the universe, you don't know that, circulates everywhere; any small thing happens in England circulates. But the media is so horrible, that sometimes I feel they are suffering from angina or what? This media can be corrected, once they know the reality and work it out.

So your ascent is very important, when I have gone up and down, fully from the north to the south in all directions in England… because it's very important.

People are somehow or other in circulation with the British. British have a special responsibility, that they should not publish something nonsensical without verifying it, nor they should do something nonsensical here. Because everything, more than America, is accepted from England, very surprising.

So the responsibility of the English is much more than anybody else I feel, but I don't know how many are going to see this responsibility……

…… Sahaja Yogis are trying their level best to spread Sahaja Yoga, there's no conversion, no branding, nothing. But what happens is that you become a spiritual personality, so easily, without going into any problem.

So easily, isn't it, such a remarkable discovery is there which can change the whole world! So I put more responsibility on the English to do it more, accept it more, not only to My lecture, but to come up with something that is substantial for your country and for the whole world! May God bless you.

Contents: 1995-06-25 **Talk to Sahaja Yogis, Picnic in Richmond Park, London, UK**

In the nature one goes absolutely thoughtless. For Me it is such a pleasure to meet you all here under the trees. There is a beautiful atmosphere created by these trees. How much they work hard for us, think about that. All is built-in, in them, built in to produce this chlorophyll, this greenery. All that is built in, in them. But see how collective they are. You have to learn a lot from them. Every leaf is allowed to get the sun, every leaf. How they grow, how they are organized, how they behave like this, nobody thinks even and what is it working it out in them? They haven't got realisation, but how do they work it out in such a beautiful manner? Because they are under the complete control of the Divine, absolutely, they don't have to worry. Even the animals are, that's why they are called as Pashu, means they are under the complete Pash. Pash is the complete control of the Divine and Shiva is called as Pashupati, he's the one who looks after all this. Affectionately and in a very delicate manner. All this is created for human beings.

These human beings don't understand that all this world, which is created, is for the use of human beings, not for abuse, but use.

And this is one thing which has to be really felt in this atmosphere, that how they are collective. They have no problem, how they live together creating a good atmosphere for us. How they keep to the cycle, it's a global cycle. First, for example, we can see that the sap rises, then it gives whatever is needed for every part of

the tree. Then whatever is left over it can go into the atmosphere or it can go down.

So it does not get stuck into one place. This I've told you a long time back that, you should not get stuck into anything. If you are detached then everything works out, very well. But if you are attached, you just get worries and problems, thinking too much about it, your life becomes miserable. But if you are detached, then the nature takes over and it has taken over for these and you feel extremely relaxed then, absolutely relaxed. But when you are thinking, we have to do this, we have to do that, we have to achieve this and you start worrying.

So two things can happen. One is, you will get confused, you'll not achieve any results, one thing and you'll go on thinking, thinking, thinking. And the second thing that will happen is that you will exhaust yourself completely. But if you are detached, then as Sahaja Yogis, you will be amazed how things work out. After getting your realisation you should try to detach yourself, by getting into thoughtless awareness. Just detach.

Now see our attachments, after so many things. This detachment you can just practice, that, you can see yourself in the mirror and know that you are not this reflection that you see but you are much more than what this reflection is. And what is that within us which looks after everything, even before realisation, which looks after the parasympathetic nervous system. Little, little things you know, it looks after. It tries to keep us on the right path and gives us a conscience. What is that? What is within us that does that? The spirit has not yet come into our attention, but there is something within us,

which makes you, think about the truth, to seek the truth, to know that there is something wrong in the society.

What is that within us? Can you tell Me? God has not left you without his care. There is something that looks after us. Kuṇḍalinī is sleeping, then it is in our hearts. What do these have to feel within them? It is the Soul, it is a Soul, which lines our spinal column.

Sometimes when people die, or are about to die and they come back to life they always say they passed through some sort of a tunnel, somehow a black tunnel, somehow a bright tunnel, somehow a light tunnel and all that. This is what is the soul, which is within us, which starts going up and with that our attention goes and we feel we are passing through a tunnel. Alright? These Souls you can see now in the sky, all hanging. With seven loops you can see them. Only after realisation, not before that.

So this soul guides you. This soul has brought you to Sahaja Yoga. This soul has told you that you have to seek the truth and you have to get to the truth. This is also the, I should say, the pursuit, perseverance or the way this soul gets out to you. You have to seek.

Some people really get so restless about it. All this comes from soul before realisation and this soul starts working. This kind of a search that you have had.

When a person dies, then his soul comes out and his Spirit also guides him.

So we call it a dead Soul, like that. They hang in the air, sometimes, sometimes when they are realised Souls they need not. They become one with the Divine and whenever they want they can always be born again. But

these Souls who are still attached to something, maybe the children, maybe the house, maybe the drinking habits, maybe something nonsensical, still hang around and they are the ones who trouble us, who bother us too much.

They can be in groups, they can be many of different types, they could be with a very bad subconscious activity or could be with the super-conscious also. But about this we cannot talk to anybody else, because they don't know, they don't want to believe that there is something like that. They believe in a religion, which says that there are dead Souls and there are bad spirits but that's only in the Church or in the Mosque or in the Temples. But in private life they don't believe that we have all those things hanging around.

Now some difficulties that you face which cannot be solved could be coming from these dead Souls.

So the best way to get rid of them is to develop a detached attitude towards life. Now somebody is very much attached, say to a house, or to a building or to something like that.

So what happens these Souls who are trying to find out somebody through whom they can satisfy their wishes, enter into you, enter into your mind and then everything goes wrong. You cannot do well, you cannot achieve anything, you feel horrible. Especially with false Gurus, you get this curse upon yourself. All these things have to be corrected through detachment to things. What are you attached to? Some people are very much attached say, to their children. Then the children will be attacked by these Souls. If you are too much attached say, to your

money, then something will happen and you will loose the money. We have known so many people who were multi-millionaires, but the greed was still there.

So the spirit, or whatever, entered into them, started telling them “invest here, invest there, invest here" and no money was left. Especially the Western business is like that. It goes on telling you “now you invest there" then you invest there and nothing is left with you but loans and debts and that is how you get into trouble.

So one has to be very detached about everything.

You know the story of My getting into business of terra cotta. It so happened that, you see, some of these big Johnnies from Delhi, who are retired, thought they must still serve their country by having export. But they cannot carry on with each other with their bureaucratic nonsense. Everybody thinks that they are the best.

So they fought and the whole firm broke up completely. But still My husband said we will have our own and so many of them had their own, I don't know what they are selling.

So, I asked him “what will you export" he said “fans” I said “Fans to where, to Switzerland?", exporting fans. Like that, he told Me various things, which are all to be imported, not to be exported.

So he said, “What will you export?" I said “I'll export terra cotta” he said “What, it's clay! That's clay!", “that's what I'm going to do." But, I don't know banking, I don't know anything about business, nothing, I'm so detached about it. I don't know what it is like to do business.

So that headache I don't have, but terra cotta is selling very well everywhere because I know that now people want hand made things and they love it and it is doing well. And then I'm helping some people in a far-fetched village, or villages, who have only one cloth to cover their body, one cloth.

So it helps by also charitable nature. Also a global need today that people should use hand made things. It is working out very well, you would be amazed. It is working so well. I don't understand anything of business, but it is alright. I don't have to know anything about it, it's just working out.

So, the detachment that I have about it... like somebody said, I gave so much money to Shri Mataji, so Mister Srivastava asked “who counted? She doesn't know how to count!" Really I don't know how. If I have to count thousand, I count two thousand. I don't know what happens to Me. Otherwise I'm good at mathematics. But when it comes to counting, My fingers just go on slipping. I don't know. I don't know how much money I have in the bank. Never: It's terrible with Me. I don't know how to count money, I don't know banking, I don't know how much money, what is the return, how much I have put in, nothing.

I'm buying things whatever I think are good, hand made nice things and they are selling, I don't know if they are selling for the same price or a lower price, I don't care. I have taken no headache upon Myself.

No headache of any kind.

It is such a pleasure to see these poor people making something so nice. It's such a pleasure. Everywhere.

In Russia they make such beautiful things, Bulgaria, Turkey. Turkey is another great country, I must say.

They are so capable, they make the best terra cotta. Better than even the Indians, in a way. You can cook in them food, you can wash it, you can do what you like. Such capable people are there. But in these modern times you see, they are not successful, they have to have computer, you have to have competition, you have to do this.

So if you develop a detachment, through thoughtless awareness, God will take over, he will do your work. He will look after you. You should have faith in God that is the main thing which people don't understand what it means to have faith in God. That He is almighty, He does everything, He looks after everything, why should we worry? This is a very good way of life, is not to worry. You have gone beyond now, you have gone beyond time, you have gone beyond all the three Guṇas, you have gone also beyond thought.

So, whatever you have been through, your thought waves and through your mind, you can stop it. In America I gave realisation to one girl, she had a shop.

So she told Me one thing, “Mother I knew all about my things I had, I had a complete list with me, I knew this way, I knew this way, all that I had, clearly, now I don't care. I don't know what I have in my shop." “What is the result, I am making big profits” she said. I said “that's the best thing that you are making big profits, after all what is the use of carrying all the load on your head and making no profits." So one should be prepared to surrender completely, absolutely to the will of God.

Whatever he does is for our good. Say, for example, yesterday in the program, I didn't want people to have rain, that's all, I didn't say anything to anyone, it just worked out that it was cloudy so nobody came to this park.

Nobody came out for a holiday, nothing, they were all jolly well there. Otherwise imagine how could I have worked out this Sahaja Yoga, in the west especially. It is an impossible situation but it has worked and it is growing and people are enjoying it. But it was not any kind of a, what should I say, a deliberation, a worry, nothing of the kind. It all worked out and it is there, you can see it very well.

In the same way you also should not worry about anything whatsoever, any worry comes you just say `shut up', any worry comes up just say “no." Don't worry. See there are mothers who worry about their children, I get such thick letters you know. Such thick letters I have no time to read, I don't know.

Ultimately the whole thing you read is about their children. Before Sahaja Yoga perhaps they were not so much attached to their children, perhaps. But now after this they are glued down.

Then there are worries about husband and wife, which is very common nowadays. There's a husband and wife they say they would go to Ganapatipule and there they get into the mood of marrying. And as soon as they come out of Ganapatipule they don't want to marry.

So what is this? I have known many kinds of mad, but this kind I have never known. It is very difficult. There they are so enthusiastic with this thing, they apply, they

give you a big list of people, four hundred applications and then they suddenly declare now we don't want to marry! But if it is mutual it is better but one will say I don't want to marry.

Some English girls have misbehaved very much.

So much so that now the names of English girls is cancelled, they are like black-listed. We don't want to have any more English girls.

Surprisingly, how can they be like that? You had such great writers as women, I have read them. You have had so many people like even Shakespeare, always praised women. I can't understand why should you make this kind of a mistake. If you don't want to marry, alright don't marry. Then if you want to marry then at least know what is your responsibility as Sahaja Yogis. Complications after complications.

I'm not saying only from England but more from England.

I have told you before also that this should not be done. There are girls who are not married for say 34 years, fifty years, still we find boys, I mean some older people for them also. And then after that suddenly you find they say no, we don't want to have this man we want to have another one.

English men are very good husbands, no doubt, but they are like cabbages sometimes. That part I don't like.

Sometimes they are really cabbages.

So, one should understand that as a husband you have to get things corrected. And as a wife you are a part of the society, which you have to not only, create but also to preserve and to advance, is the duty of women. They

don't know what their duties are and it's not their duty to work like secretaries or some sort of politicians. What their main duty is to become a very active member of their society. Of course we have some very great ladies, I shouldn't say that, it's not that we don't have, but some of them are exceptionally funny, they don't realise that marriage is not meant just for a kind of a shopping center. It is a mission you know. It is very sweet to be a wife and to be a mother. But they lack sweetness for small small things if you are going to fight, alright then you had better not marry in Sahaja Yoga because you tarnish the name of Sahaja Yoga, which has given you realisation.

So you must know how to manage your marriages and to do some justice.

Of course in Sahaja Yoga we have divorce. We allow people to divorce if they want, because it is a question of freedom. You can divorce anyone you like but it is better to make your marriage successful if you want to help Sahaja Yoga.

Another problem, which always crops up sometimes, which is very dangerous. Like somebody has the habit of forming a group against the leader. We have had recently a very bad case from America. Wherever she went she formed a group against the leader. And was creating such a problem, so I told her “now you go back to India now, we have had enough of you." She wouldn't go. She went to commit suicide. Two miles she ran up to the River Hudson. She didn't jump of course, she didn't jump. And nobody threw her in also. But she was threatening I'm going to commit suicide and she took

some panadol or something, with that you don't die, must have been some aspirin, must be something like that, but she didn't die. I don't know if she took it also.

So all this Tantrumism, you are going against yourself. What is the use.

When I told her you go back to India, now we don't want you here, she did all this... she said “I will not go, I'll do this, I'll do that." Her father got such a big heart attack, she had to go, next day. I didn't do that. I would hate to do such a thing.

So she had to go. I said, “Let her jump into the Hudson River and finished." So this kind of Tantrum nature of women is very bad. You are deceiving yourself, you are Sahaja Yogis, you should know how to absorb the problems, you can. You can pacify, you can cool them down. You can do everything, you have the power. Women should understand their own powers, it is very important.

Because they don't know what powers they have. I am a woman Myself and if the women start behaving like this, it's very difficult. Also some men have this habit that they start forming a group.

The third type some of them who maybe leaders or maybe something, maybe leader's wives, they become extremely dominating, somehow or another, it's kind of a bumping station they are nearby or something. The whole air goes into their ego and they start, see, like floating in the air and kicking everybody around. Now, this kind of a thing is also a sinful thing to do. Because you are the wife of a leader, you have to behave. You cannot try to hurt people and trouble them because you

are the wife of a leader. Actually, according to Shāstra, there are five mothers we are born. One of them is the wife of the leader, wife of the Guru, is your mother and she has to behave like a mother. She has to treat all the disciples like a mother and if supposing the leader is angry or upset with someone, she should try to soothe him down, she should try to talk to another person and say see now, this you should not do. This is her job. Not to dominate others. They are doing just what they are not supposed to do.

So if anyone of them have problems and he cannot talk to the leader he'll go to the lady and tell her, see this is the situation.

And then she can really bring you down.

I remember one case in our life, it was really remarkable, My husband had somebody in the office who went out to another company, because this was a Government company and was not paying him so much, naturally, he got a good job so he went to another company. But he didn't like it very much the way they were doing some things.

So he came back and he asked My husband that I want the job back. He said “You get out, I'll have nothing to do with you. Why did you leave the job?" So he didn't know what to do, he tried but that didn't work.

So, he came to Me. And he told Me that, see I want to come back. I am a very good officer, I have done a very good job, but it was stupid on my part to have taken on another job, which I hate and I want to come back and serve my country.

So when C.P. came home I told him that this gentleman came to see Me.

So he came to the right one you see. He said, “Now, are going to eat my head off” I said “No, I'm just telling you he came to Me because he thought I was more generous than you are." He said “What?" I said “Yes", “I'm no less generous" [Sir C.P.], I said “alright, you do what you like." So, the next day he gave the job back to him.

So the job of the woman is much bigger, much deeper and much higher.

My husband had at least one hundred relations, very close. He told Me that “you have to look after my people." Then he got so fed up with Me he said “I just told you to look after them, you're making them sit on my head now." I don't feel that way. Not only those hundred but hundreds of their relations also I tried to help, as far as possible. You see this is something so satisfying that when I go to Lucknow they all come and see Me, no one comes to see My husband, never.

So, you see, you create a committee of your own. Your own community you also produce out of that. They are your own. If you need anything they will be there to help you, they'll be there to look after you.

So what is most important is to just love and try to please others. If women can do that they have achieved their womanhood. All the time telling against somebody to your husband, all the time criticising somebody to Me, that's not the way. On the contrary, never tell or complain about anyone, unless and until that person harms you. And always tell something nice, that's the best way. For example, somebody comes to tell Me about

somebody “Mother, see he did this to me, he did that." So I tell him a lie and say, that's allowed and I tell him “now I don't understand how do you say things about him. He was just praising you all the time. For one hour he praised you." Finished. Really, they trust Me. They think I'm telling the truth. That's how you can run the family, you can run everyone around and Sahaja Yogis.

The first thing the women must know they have to become compassionate and loving. Their main power is in compassion. I think that is My power too. Why are you here? Some of you can't even hear Me, but you don't mind sitting down here. It's just love. Just love, you know. It's so great to feel you know, this beautiful atmosphere of love, give and take. What else can we give each other? This is what I'm trying to tell you that this is the heart of the universe. What does the heart have. Compassion and love and enlightenment.

So we have to understand that it is only through compassion you will be satisfied.

I've known so many people in this world who are very great, who think no end of themselves, who are very well known, great writers and I don't know what else. All kinds. But they always complain that nobody comes to see us when we are old. I said it is the other way around here. The older I'm becoming, I've more visitors. Nobody seems to know about My age. They say “how do you do it?", I said “just love, just compassion, just pure love, nothing else." But they never loved anyone all their lives and they lived like this.

So now they are lonely, they are alone. They are talking to their fridges. Can you imagine, they talk to their

fridges now. You can't purchase a friend like that. You see, so this is a situation in which no Sahaja Yogi should land.

So you should see how much collective you are, how much you help each other, how much you are kind to each other. This is very important to introspect and find out, more than anything else. It doesn't matter if your vibrations are bad, doesn't matter, they will be alright. But first your attitude has to be alright. In Sahaja Yoga I see people who don't have good attitudes, can never progress.

Love should be pure. If you have love for someone you won't see bad points of the other person, never.

You will always see the good points of that person, always support that person.

Sometimes I'm faced with such problems that there are people who are to be told, so I prepare Myself first. Before the mirror, “I'll stand up and say like this, I'll say like this, I'll say like this." When the person comes in, half of it is lost.

When I'm talking about 25% of this gets lost, whatever, 25% I have left, I tried it. It's very easy to give up that than to keep it, very easy. It is better if you practice that, I'm sure.

So little, little things you can suggest to them.

Like yesterday, you know what a nice present the English Sahaja Yogis gave Me, was a beautiful miniature of Royal Albert Hall. Can you imagine, beautiful. With handwork on that, beautifully done, so beautifully done. It really, it was so from the heart, because I loved this hall

somehow, since long. And shows the Queen Victoria, for whom I have such tremendous respect. Like she built it in the name of her husband. This kind of thing shows such a deep reverence for her husband, love for her husband and she remained like a widow, when he died, throughout. She didn't attend any functions, nothing. Like an Indian, we don't, the women. And she enjoyed her widowhood. She was all the time with it and she did so many good things after that. She's the one who created all this terra cotta patterns you see around.

She, in the seclusion she became extremely creative. But she was a deep person and I think her example should be a good example for the, especially, the women of this country. It is very, very much a personality, which is respected, especially in India, very much. You know in a riot there was a statue of her, her nose, somebody had cut and all the newspapers and everything and everyone went with the banners “who cut the nose, how dare you, how dare you do that" and they saw to it that it was put back. See, she's a woman who is adored by a country, which was under her domination, in a way. But this is what is the personality of a woman.

We have to understand what we can do. When it comes to war a woman can become like Joan of Ark or if it is not, it is in peace time. She prepares for neutralizing wars, for bringing peace. She's the one who is the creator of peace. She's such a powerful thing because that is the real power. Not in doing some sort of a work like men and competing with them. But a deeper potential that you have. Use it for creating a very compassionate and beautiful place. In the field of peace, of global peace and

bringing this compassion into action. It's possible because you are all Sahaja Yogis. Husbands also must respect their wives. Very important. Where women are not respected, calamities come in, like Bangladesh. See Bangladesh is full of calamities because they don't respect their women. Pakistan is full of calamities, now there are wars are going on, this is going on, because they don't respect their women. What about Saudi Arabia, always in threat of wars. What about Iran. All these countries where women are not respected they are in trouble.

But women also must respect themselves, not like the women in the west the way they throw themselves at the men. Why should you try to attract men all the time? Why should you try to be all the time dressed up that they should run after you? Why should you run after men, they should run after you. See this one is a culture which really debases women to I don't know to what level. They are not prostitutes! So we should have our own self respect.

I have told you of 3,000 women who committed suicide in India because Muslims were going to invade so they burned themselves suddenly, just to protect their chastity.

So the power of the woman is compassion but her vehicle or we can say the one that works out is her chastity. We should respect our body, respect our husbands, respect our children, respect everyone. That's important. It's very important, very complimentary, men and women are complimentary. Just like I always say that say, for the west though they have done very well in the Science

field, the blacks are very complimentary because how can they win their rugby's if they don't have the blacks, what about losing, all these things are complimentary.

So we are a sum total as one, we have to have Indians also here, we have to have English also because we are all complimentary, like the left hand has to have also a right hand, it's like that, it's all a sum total together. But if you see complimentary powers like left side is complimentary to the right side. But they cannot be the same, they have to be opposite, otherwise how are they to be complimentary.

So men should respect their wives and the wives must respect husbands because they are complimentary and in a proper way we have to understand the importance of married life in Sahaja Yoga. I spend so much time on these arrangements of marriages and this and that, you have no idea. If I could be spared of that I can write one more book. Because first, you select, then you marry, then you get all the changes, this, that, letters after letters. All the leaders, leaders are always worried about individual cases, always, they will write to Me “Mother, there's a problem, this woman doesn't want to live with him, then this man doesn't want to live with her." I mean, you do something and then suddenly what you find is there are problems out of that. There are even worse, the whole year they will last, then comes another marriage. These people, I spend so much time on this. Now, this time those who don't want to marry should not marry and if they marry and do like this they will never be allowed to come to Sahaja Yoga, finished. [GAP] They think they can do what they like, both of them are to get

out of Sahaja Yoga and get a divorce and then they'll blame Sahaja Yoga. I say so because I have had lots of problems from all over the centers, all over the world.

So, now under the tree we have to promise, because they are living beings that we are not going to do all such nonsense and we are not going to create problems among ourselves and we are going to live very happily as husband and wife and enjoy life. Of course, there are very difficult cases, alright we can work it out. There could be exceptions, but out of hundred marriages, if the sixty marriages fail you're better not to have it. And they discover after three years, somebody discovers, or four years, so God knows what is going to come up, it's very difficult.

So it's not a marriage, what you call institution, it is a thing for having these great souls, which want to be born to you. For that we are having marriages but if you do like this then it will never work out. Or if you want to have divorce then at least no more marriages. Will be good idea.

I am so very happy to see so many children here. All are beautiful, born realised, sweet things and so joy giving and we should really know that between ten to fifteen years you will see the force that is coming out and they'll correct you. They will remove all of your complications.

So allow them to grow, allow them to be grown-up Sahaja Yogis and then you will see the difference. How sensible they are. How beautiful they are. Support them, help them, understand them.

Some Sahaja Yogis who are lost to Sahaja Yoga I know that the children are dynamites. Let them grow they will put them right, I know that.

So we lead to a point to understand that now we have to move a step forward. Forget about all these nonsensical things and petty things and useless things and your problems. What are we going to do about Sahaja Yoga. We have the powers to go one jump higher and this will work. Everybody, must think on those lines and I'm sure it will work out, very sure it will work out.

May God bless you all.

Contents: 1995-07-16 **Guru Pūjā, Watch Your Mind and Attention, Is it Towards God Almighty, Cabella Ligure, Italy**

It is a very important Guru Pūjā today because we have completed twenty-five years of Guru Pūjā. Also, it is extremely beautiful to see so many Sahaja Yogis who are, really have become, very great. It's a question of understanding what Sahaja Yoga is.

It's a very unique discovery, I feel now, that, people who were seeking the Truth have found it and have now got it absolutely on their central nervous system. Yes, in some places it's difficult to explain how it has happened, how it has worked out and how, in these twenty-five years, we have been able to achieve this expansion of Sahaja Yoga.

The main thing, I feel, is that you all should know that as the tree grows, the roots have to grow much deeper and they should spread also. If it doesn't happen, the tree cannot be sustained only by Mother Earth.

So the roots are in your own life, in your own heart.

When we say we have become our own Guru, we should really try to find out with our introspection: Are we our Guru or not? Because, before this your mind was on one side and your heart was on another side and your attention was in another dimension.

So these three things were creating confusion within you. If you understand a human being, then you will be surprised to see how these three things act separately in a human being. And sometimes they fight also.

First is your intellect and your mind.

Second is your heart, your feelings, your emotions.

And the third one is your attention.

In these modern times this confusion is the worst, because all the time your attention is outside. It could be towards beautiful things, or beautiful women, or beautiful men or all kinds of nonsensical way of wasting your energy. Such attention, then, is absolutely like a horse which is let loose. You cannot control such an attention. And this attention runs wild from one to another.

It's a fashion also, it's sort of a very popular thing to keep the attention moving all the time. But this attention, that has to be towards the Divine, towards the Almighty, is just being frittered away. Thus, attention doesn't grow its own roots. First is to find out about yourself: where does your attention go? What makes you feel like looking after, or concern, or attention. You see, the attention comes from various problems and could be your upbringing where you are not controlled, could be your education, could be your atmosphere in which you live, or could be your own ego or your conditioning.

So, this attention is being attacked by all these outside energies or negative forces and it gets entangled.

Like a river flowing straight into the ocean can get lost in a barren place. In the same way this attention, which has to go towards the Divine, gets frittered away and is punished. This weak attention cannot take you towards the Divine. Ultimately you find that, all this attention is being completely absorbed or frittered away by the nonsense that's going on.

Unfortunately or fortunately you are born in these modern times. And in these modern times, as you know, it's a very chaotic condition. In these chaotic conditions you don't know what is right and what is wrong. And there are all kinds of attractions which can take away your attention and reduce the energy of your attention. It is possible more for the people who are very right-sided. Also the left-sided people can be very much affected.

Right-sided people as you know go up to a point and become extremely dry, self-opinionated and aggressive. All their attention is in aggression.

While the people who are on the left side are indulging too much into their own whims and their desires and their own temptations.

Both sides can fritter away your attention which is the most important thing. It is the most valuable thing is your attention. But the attention cannot be controlled by a person who has a weak mind or a weak heart.

Now supposing you take somebody who is a very intelligent person. The intelligent person puts all his attention in capturing the attention of others. I don't know why, but it's a kind of a paradox: The person who,

himself, is having such a lot of aggressiveness and all that, tries to be very sweet, tries to be very nice with people just to keep good relations or, we can say, the good behaviour towards people, so that they pay attention to that person. This is a very subtle thing. They are not even aware about it, that we do such a thing just to make others pay attention to us. That is how we have seen that in these modern times so many stupid things people do just to attract the attention of others. Most of the fads that had come up in modern times are just to make something stupid so that people should pay attention to them. Of course, the Sahaja Yogis are not like that. But I am just pointing it out, how, in the modern times, you have to be very careful that you should not try to attract the attention of others.

Instead of that, what you have to do is to pay attention to others in a very subtle way. Not with any expectation that if you are paying attention to somebody, that person should pay attention to you. It's a very big struggle, I have seen, in Sahaja Yoga also, that people try to, say, become very popular or become very outstanding, or something of a very great qualities: to show off that they are something better than others.

A person who is really in connection with the Divine is least bothered about how people pay attention to that person, but automatically the attention of such a person is on others, which is very, very subtle, very subtle. You cannot make out that the attention of such a person is on you. But it works and it works beautifully.

We have to understand that we have now come to the Realm of the Divinity. We are in the Kingdom of God and

we are Divine people. We are very powerful people, but if we fritter away our attention we become very, very weak people. It's easy to feel that, “we are Sahaja Yogis” “we have done so much of realisation of others" or “we have helped so many people." All this consciousness, if it comes within you, then know that you are still not fully developed Sahaja Yogi. There should be no consciousness of what you are doing or what you are committing. There is no need to boast about it. There's no need to advertise it. Whatever you are, is, already can be seen by everyone. But even that desire is not needed because you are doing just for the satisfaction of your Spirit.

So then, when we come to our heart: in the heart resides the Spirit, as you know very well.

Now, when it is the heart which has to work over your brain and which can work, what becomes of you is nothing but you become a source of love and compassion. A source, I am saying. You do not assert on others. You do not say that `I've done so much for you and what are you doing to me? What is this that I should have so much expressed in so many ways and here you are, you are forgetting me and not doing anything for me.' So the expectation of reward, if it is there, then you must know it's your mind which is giving you these ideas and is working it out that way: that you just now put attention to the amount of love the other person has given you for whatever you have given to another person. It's very subtle.

So in Sahaja Yoga you should see, now, yourself as just a source of love, which is just flowing.

In that you do not say that you have to have this or that, or you have to achieve this goal, or you have to become that. It's finished now. Once you have become the source then how can you become something? The thing is, those who are receiving from the source want to have some sort of a reward or some sort of a recognition. In this subtle way, if you move, your mind is very clever. In Sahaja Yoga we have very clever, intelligent people. But this mind, you have to be very careful, because this mind can cheat you.

So ask your mind, `Why are you in Sahaja Yoga? What is the purpose of your Sahaja Yoga?' Gradually this mind will shut up.

And then you have to ask yourself that: `What is my own desire now? What do I want? What do I want to achieve? Why I am in Sahaja Yoga?' If you ask this question, you will see you'll just dissolve. You will become thoughtless, because there is no desire left now. There is no ambition left. No competition.

All these qualities are of the brain, or, we can say, of the intellect, which makes you competitive, which makes you also jealous.

So, jealousy is also a product of this competitiveness, because when two persons are competing or many are competing and one is selected, others become jealous. I mean instead of feeling happy: “Alright.

So, one of us has become something, so we should be very happy that he has become." On the contrary, the other people feel jealous: “Why has he become? Who is he? What does he think of himself?" Then they go further. Not you people, but on the whole, people go

further with it and what do they do is to harm another person.

In Sahaja Yoga, people are also sometimes very worried and frightened. There is no need to be worried or frightened because now you have become a Sahaja Yogi and a Guru. Nobody can touch you. Anybody who tries to touch you will be subsided somehow or other. Of course, I don't do anything as such. But today only I heard that in Turkey there were two newspapers who were after Sahaja Yoga, writing all nonsensical things.

So, the first one met with an accident and died. I didn't do that.

The second one had two people, editor and subeditor, were killed and somebody cut their throats. Of course, I didn't do that.

Some fundamentalist must have done, or somebody must have done. Now, we don't have to worry as to who criticises you, they say it about you, because you must know they are blind people. They are absolutely blind, they are not matured as far as the wisdom is concerned. For them to understand Sahaja Yoga is not possible. They go up to a point and then they stop. They cannot go further, because this dissolution of your being, as I said, the drop becomes the ocean, is difficult, specially in the West, where there are so many ideas of their own identifications and of their own personalities.

Now, it is quite, again, a paradox that we don't want people to dress up indecently or we don't want people to behave indecently. Decency is a very big part of Sahaja Yoga.

So one can ask that “Mother, when you say you have to completely dissolve, then why should we have this dignity? Why should we worry about having the dignity?" It's quite alright. This question is alright.

The answer is like this: Supposing, you put a drop of some filth in the ocean, then the ocean can become dirty. If you put some poison, then the whole ocean can become poisonous. In the same way, whatever is not congenial to the ocean, to this Divine Power, should not be done. Otherwise you will spoil the whole of It. We have had experiences. We have had Sahaja Yogis who were leaders also and they tried to be quite funny and the whole collectivity was spoilt. One person who is not a good person can spoil the whole collectivity. The one who is then a leader, on top of that, is even worse.

So, one has to understand that, when you are becoming a drop of the ocean, this ocean is the pure ocean of love. In that you should not do something that will create repulsion, frustration, or even sometimes it can create a very grotesque image of the whole ocean. That is why we have to be decent people, decorous people.

It is not that in any way we want you to be like a dandy people or anything, but what it means that you must respect your body, respect yourself and a respectable personality you should have. Too much indulgence to that is not proper. But it should be such that you should respect yourself, is very important.

If you cannot respect yourself you cannot respect at all the Divinity within you. It's like a decoration of the Divinity that your whole behaviour, your whole attire has to be in such a way that people should know that he is a

decent man. Indecent things have come out and have become now an everyday fashion. And they go on coming one after another because of the entrepreneurs and we are playing into the hands of entrepreneurs.

But if you know what dress you have to wear and what is good for you: once [and] for all you have to decide. Now the attention should not be also wasted in that, “I will today, I will wear this kind of a sarī, tomorrow I'll wear that kind of a dress, third day...", because that also spoils the attention. But if it is a decent thing, it's perfectly all right and that will really make you feel dignified within yourself. In modern times, as the people are, I don't think they have much respect for themselves.

You see very highly posted people, highly placed people doing all kinds of nonsensical things like cheating, like having relations with people who are of dishonourable position. All this is happening, if you see in the newspaper you are shocked how these people at the helm of affairs could be like this. Because they are still not matured enough to know where are they, what is their position, how they have to be.

If you are matured enough then you will understand that, say, I'm a housewife, I'm such a minister, I'm prime-minister, how I should be. That, all that achievement they have outside remains outside, doesn't go inside.

But for a Sahaja Yogi it should be absorbed within. It has to be absorbed within, so that the attention is not wasted too much.

The another part which one has to see is the heart.

Some people are saying, “Mother, if our heart is ruling the head then we become too much emotional, we get

too much attached to people, we get, you see, sort of individual friendships and things like that." On this point one has to know that why do you get attached to one person? It's not your heart. It's not your heart. You get attached to a person because you have some sort of a, we can say, a relationship, maybe, or maybe you like the hairdress of that person, maybe, you like the dress that person has.

Something outside quality is attracting you towards that person.

It is not something inner quality that is attracting. For example, if you are attached to your children too much, you will spoil them. They will not come up to your expectations.

Anybody you get attached to, you must verify, why are you attached to such a person, what is the reason? Now, in Sahaja Yoga people are attached to each other very much, I know that. But it is not for any external reason. Because somebody is rich, because somebody is famous, because somebody's doing some sort of a extraordinary work. No. They are attached to that person because that person is a bundle of vibrations, that it gives you tranquillity, it gives you joy and it gives you a kind of a immense dissolution of your being.

So, that happens when you are very much there, as I have told you the story of once this potter was kneading the clay and his name was Gora Kumar and when Namadeva, who was a tailor, but very well known poet, both of them were poets, he went and he saw this potter was doing such a, I mean, it was not a very respectable work he was doing, he was busy kneading the clay, he

looked at him and what he says that “I have come here to see the Chaitanya, to see the formless. But what I find that the formless has got into a form." This only, I always say, is only possible between the two Saints of the same level, that, the way they appreciate, that the way they feel, there are no words for what I want to say, but the way they feel the oneness, the unity, which is a subtle one between each other. Such a feeling if you have for each other, then know that you are really now dissolved and you are in the Ocean of Joy. But on the contrary, those who are sitting on the shores cannot feel that way. They judge, they try to find out what's wrong with that person, “This is not so." They can never appreciate another person.

What they feel is that they have a right to criticise, to find out faults with others and that they are something special. And the other person also finds some faults with this one.

So it's a fault-finding society I find sometimes and you get fed up with it. But when you see that the another person who is there, the person who is another saint, you feel such rapport, such oneness, such a spontaneous feeling for that person which is absolutely pure.

There's no expectation, there's no mental activity to find out what's wrong with that person. There's no judgement about what he, the person is like, but just oneness with that person you feel and you feel that your quality of your love has got a new shine, a new dimension.

So it [what] comes to [is] that, what we should appreciate within ourselves is the purity of our love.

When you are pure, the purity is there, you do not get attached to anything, but in that detachment you are enjoying. In attachment you cannot enjoy, because in that you are bothered more about the superficial relationship with the other person.

Now, in a wider way, if you see Sahaja Yoga, you are all very important people, extremely important, because in the history of spirituality there were not so many saints sitting together. Never can you see so many people from so many countries thinking about Divinity and morality.

It is impossible to get so many people together, on any point whatsoever, who are feeling the oneness, the, we can say, the most soothing feeling with each other. Whether it is comfortable or not, whether it is very much according to the norms of comfort: people who are saints are absolutely happy with other saints and other saintly people. They rush to people who are saints.

Once it happened to Me when I was in Kolhapur that they told Me “There is a saint who talks about You." “So where is he?" They said, “He lives up there and it will take at least three hours for You to climb up. He only lives there, he does not come out." I said, “Alright, I would like to go and see him." So I was walking and it started raining.

So they said, “Mother, You never go to anybody like that, why are You going to him?" I said, “No, just I want to go up and see him." Now this fellow, they said, had a control over rain, but it was raining, raining, raining very heavily and when I climbed up I saw him sitting down and going on like this with great anger.

So I said, “Let us go and sit in his cave because this fellow is now not in a normal mood." So, I went and sat in

the cave there and there he came. He couldn't walk because his, they say that his legs became absolutely lame because of the vibrations that were too much in him, whatever it is, he couldn't walk.

So, they brought him there, he sat down.

So, the first thing he asked Me is, “Why did You not allow me to stop the rain? It was raining so heavily and when You were coming up, I didn't want You to get drenched the way now You are all full of water and I didn't want You to suffer like this, because it's not a good welcome to You.

So, did You do it just to control my ego, because I must have developed ego because I can control rain, that's a fact?" So I just smiled at him. I said, “See, you are My son, isn't it? And you have bought a sarī for Me. But you are a Sannyāsī, so I can't take a sarī from you because Sannyāsī Dharma is different. I'm a gṛuhastha [householder], I can't take a sarī from you.

So I deliberately got drenched so that you could give Me a sarī." The whole temper, the whole unnatural behaviour, all dropped out. He became extremely sweet.

“Yes, yes" he said, “How do You know I bought a sarī?" “At least” I said, “in love you know everything." And then he brought a sarī for Me and he did Ār.ti and everything.

But, you see, all these things show that how the love masters everything so easily. [With] small, small things, if you are expert in expressing your love, how it works out. There are so many incidents I can give you like this. But the main thing we have to see within ourselves, “Do we really love each other? Do we really have affection and compassion for others who are not even Sahaja

Yogis?" Those who are not Sahaja Yogis are also the blind people. You should have compassion for them. You should feel that, these people are so unhappy and they cannot come to Sahaja Yoga and they cannot become Sahaja Yogis and only in their ego they are satisfied.

So you must have real compassion for them. If you have this compassion you might be told by people that “Why are you wasting your energy, you are doing this, you are doing that?" The compassion is, actually unites all these things within ourselves. That's the uniting factor.

First is your attention, first, which is very, very important, I think. And the second one is your intellect, or you can say your mind and the third one is your heart. They all get somehow or other united together once you have this capacity to have compassion. You don't quarrel with anyone, you don't have to think about it. You just, you just feel absolutely at home when you are compassionate and with this compassion you are having relations with others. Now, this compassion is not studied out or worked out or manoeuvreed.

It is just there. It is there. In that compassion it forgives, it forgets all nonsensical things. The forgiveness is only possible if you have this compassion within you.

Now, even there are Sahaja Yogis who asked Me, “Mother, how can we have love and compassion?" [Laughing.] I mean, this is a question which many have asked Me. Now, the simple thing is that if you develop your thoughtless awareness in your meditation, in thoughtless awareness, you watch anything in thoughtless awareness, any relationship you see it in thoughtless awareness, then you'll be amazed how the

gates of this compassion will open out. Thoughtless awareness opens your heart, but it doesn't go to one person or to another person, but it is throwing lights on all the sides of your being. Everybody is benefited, everybody has a Divine feeling for you. Because, this compassion is not linear, nor is it aggressive, but it just flows and smooths and soothes everything that is chaotic, that is troublesome and that is painful.

This is what you have now. You know, these things were done by saints long time back, but then nobody liked them and they crucified them, out of jealousy. Because, if somebody became a saint then people felt very jealous of that person.

So they killed them or tortured them and troubled them. The situation is not so bad now. Of course there are some useless people. There are some people who are really monsters, I agree. Forget about them. But on the whole our attitude should be that, these are blind people. Now, looking at somebody who is, maybe, something wrong with that person, may not be good-natured, may be anything. But in your heart you should not have any grudge, you should not have any complaints about them. You can talk to that person about it. You can tell him in a way that will be absorbed, but you should not try to make an issue out of it and try to, in any way, trouble or torture anyone.

You have seen already, in Sahaja Yoga, those people who came and were troublesome and were not of any worth for us, just dropped out by themselves. We didn't have to do much about it. They just dropped out and they have gone into some sort of a problematic life.

I, even now, receive letters from them saying that “We have this problem, we have that problem and how to solve this and solve that." But it's automatically happening, because, after all, there is a big choice going on and the Divine is trying to decide who are capable of receiving the blessings of the Divine.

This is the only thing you have to achieve. That's why you have come to Sahaja Yoga. Nothing else is important. There are people who are very highly placed: tomorrow they go into dust. There are people who are regarded as very great, famous people: they go into dust. It's all the time is happening in your presence. Everyday you read a newspaper and you find how they are behaving. Like today, somebody told Me that in the newspaper there was there that, now one bishop is going to discotheque, can you imagine? He's going to a disco. Now what people must be thinking, they must be breaking their heads. Now what to do, this stupid fellow whom we call as the bishop and everything, is now going to disco! What they, I mean, all whatever he had respect, maybe it is artificial, but it's all lost, finished. Because, you see, as they are, they have no value of themselves. They just live with their ego, “I'm such a big man. I am this, that. I am a bishop." They walk in a different way, they talk in a different way. And suddenly how they go down! Now what was the need for this old Johnny to go to the discotheque, I can't understand? So, because of this kind of life that he is leading, thinking no end of himself, he could never see that `one day I will go down like that.' Another thing, which you should see in a very wider way, that he had no feeling why people respected him. He

never knew why people had respect for him, or he was not conscious of it. At least he would have preserved that. He did not. Why should he go to a place about which he has been always denouncing and saying that these are bad places, one should not go there.

So, in your case you have to be conscious that you are Sahaja Yogis. If you become the ocean doesn't mean that your consciousness has vanished, but it has enlarged. You have got the consciousness of the ocean.

You are not the one who has become like a mesmerized person or a person who has no connection with oneself. On the contrary you are connected with yourself much more than you were before.

So, when you become the ocean you don't loose your personality but you expand your personality. You become a greater person. And this is happening in Sahaja Yoga. I am noticing many people are developing that kind of a personality and they are expressing it and manifesting it. It gives Me great joy to see: in My lifetime I could see such people who are doing this kind of thing.

So, whenever you are doing something, whatever is your enterprise, whatever your lifestyle, whatever it is, that's all outside. One should not lose your attention, which is towards God Almighty. If that is lost, you are lost. There's a very nice poem Namadeva has written about that, there was a boy who was flying a kite and the kite was floating and this boy was looking after the kite. And while he was talking to everybody else, but his attention was on the kite.

Then it goes further. He says that a lady is having the little child on her body, on the waist and she's cleaning

the house. She's cleaning with a little broom. She has to move from here to there and after that cleaning she has to do other work also, but the child is here.

So, her attention is on the child that he should not fall down, something should not happen. Though she's doing all kinds of work, everything: her attention is on the child. In the same way your attention should be on your Divine Power of Kuṇḍalinī.

There's third one he's described that: There are many ladies who are taking water from a river.

Sometimes they have three pitchers on their heads and walking. And when they are walking, they are talking to each other, they are telling stories about each other and anything, but their attention was on the pitchers, which are on their head. In the same way, whatever we are doing, our attention should be on our Kuṇḍalinī.

We should find out what are we doing. As it is we have the light. But you must take light into every corner of your life, every aspect of your thinking, every kind of an effort you make. And you'll be amazed, if you really watch your attention you will really know what you are doing. It's the attention to be watched so much that ultimately you'll be surprised that the attention is no more frittering away.

Without the attention you cannot work out Sahaja Yoga. This is the main problem of Sahaja Yoga, is that your attention has to be towards God Almighty. Otherwise nothing can work out. Your ascent cannot work out.

Ha [Yes], if you have come to Sahaja Yoga to make money, alright, you will make money and get out.

If you have come here to show off your knowledge and all that, you will show it and get out. If you have come here to show your power and your authority, you stay there and get out. Like that many people have gone out, if you know. And this is what is to be really taken care of, that you don't try to use Sahaja Yoga for all these stupid things, which are not permanent, which are not eternal. Sahaja Yoga is to be used just for cleansing yourself, for becoming the ocean, the Ocean of Love.

Now, many people also feel that love is rather difficult, because you can be harmed by others, or somebody can take advantage of you. The main thing about love is, if it is not a pure love, then it creates problems. Supposing you trust somebody because of money, trust somebody because of some relationship or anything and you go on indulging into it, ultimately you'll find that you will be very disappointed.

Very disappointed. But supposing you show your love, just with purity about that person. It's so subtle.

It's so innate within you, built in. It's there. We have to just open out. Every human being is a bundle of love.

And when he is afraid of others, specially in the West, there is so many ideas they have created that you are afraid of this kind of love and that kind of love and you see the way the perversion and all nonsense is there, but in pure love there is a kind of a Beautiful Light which protects you, which guides you and which enlightens your life completely. This light is just nourished and also, we can say, like the lamp has to have the oil, this is the one that is for our spirituality: the Love of a person. You are [the] embodiment of love, take it from Me, because

you are a human being. Even the animals are there who know what is love is. You see, I know that, if you love a tiger, the tiger will never harm you. If you love a snake, it will never harm you. If you try to love anybody who is very cruel and very bad, gradually he'll come around.

He will harm you little bit, he'll do this, he'll see things and he might be mean with you, do all kinds of things. But then, gradually you find your love works and works and works. And ultimately it is your love, which is important to that person.

Now, your love is really firstly appreciated more by innocent people, like children. Children know what love is. If the children see you and they run away, that means something wrong with you. I've seen people like, once we were in Japan and there were two foreigners who were there, ladies, who were dressed up, I don't know from which hairdresser they had dressed up themselves and they were very much overly decorated and they came with us, you see. And we climbed up a place to see something and when we came down there were some children standing there. They had gone before us.

So they said, “Where are those witches?" I said, “Which?" “Which went with you" I said, “What do you mean?" “They came, you know, we were frightened, we ran away to our houses. Now we have come to tell you they are witches." These small, small little Japanese children, you know. “They are witches, you know, they are witches. Be afraid of them." And they had decorated themselves so much, so much hair dressed up. They have tried to make such a beautiful show of themselves, but the... for the children, they were witches and they ran away. And

when we came, they came running and telling us, “Don't be with them, they're witches." So, the judgement of the innocent people is the best judgement. If they are innocent, they are extremely well equipped to judge a person: who has love and who does not have. And they are the best people because they will appreciate you the best. They will understand that these are people of some high quality. But if they are not innocent, [they are] cunning, some people are extremely cunning, that's the intelligence part of it, they can never appreciate you. They will appreciate something which is, something very, very abnormal, which from Divine part, Divine angle, is very, very obtuse and funny. But they will never appreciate you. Never, [they] cannot. Up to a point they may, but may not, doesn't matter.

You have to appreciate yourself. You have to know that you are not unkind to anyone, you are not judging others and that you are appreciating everything in that person, whatever is good in him as a human being. It works. You have seen, this all has worked through My love and compassion. But I'm not conscious that I'm giving you love or compassion or anything. I'm not conscious even that I am giving you anything. I'm not even conscious as to [whether] I have created such a lot of beautiful people. I am not conscious of it. It's just happening. Just like this tree is here, see, it is not conscious as to what it is and what it looks like. It's just is there. In the same way, if it happens to you, I tell you, you become really the source of such a joy for everyone.

Now, what do we have to do for this world? What is needed to be done for this world? People talk of peace,

this, that. There's no need to do anything. It just... you become a personality of that kind, you emit peace, you emit love, you emit joy to others. Now, this power is within you because it is built-in, is within you. It is in a potential form in every person. Only thing, it has to be brought out. Now, with affection, you may not, but with love and feeling that is innate within you. Because there are no words for such subtle things that are within yourself.

Because so far people don't know what are these things that make you feel oneness with others. All this, all this can happen to you very easily, very easily, when you understand that you are not this mind, you are not this body, you are not this attention: you are the Spirit. Then you introspect, `Am I the Spirit? Alright, if I am the Spirit, what is... what am I doing?' Once you become the Spirit, then you feel, “Why not others?" Out of love and compassion. Not for becoming some leaders or anything. Just out of love. “If I am that why not make others like that?" And that is how Sahaja Yoga has spread so much and we have such gems of people, such beautiful people that I really never expected so much to happen in My lifetime. It has never happened with any saint, any incarnation, any prophet.

So now, you people have become absolutely khalis [hollow], means absolutely you have vacated yourself fully.

There's story of Rādhā and Kṛiṣhṇa [which] is very beautiful where Rādhā said that “Why do You take this flute to Your throat? Why do You take this?", because `Mur.lī' is such a sweet thing na? `Flute' is not so sweet,

“but why do You take this flute to Your lips?" After all She, She must have been jealous, I think so.

So, it's a story, just a story.

So, He said, “Why not go and ask the ute?" So, flute She went and asked, “Why Śhrī Kṛiṣhṇa takes you to His lips all the time?" So she said, “You know, I have become completely hollow. There's nothing in me. He puts me to His lips and people say that I am playing the tune. It's He who is playing the tune. Where am I? I'm not there. I'm just enjoying the same tune, which is passing through me." That is the expression. But then Rādhā told Śhrī Kṛiṣhṇa, “Why don't You make [Me] the same way as the ute?" So, this is what you have to be, the ute, means you have to be hollow within yourself. All these little-little things, you know, which come into your life are not important. What is important is, have you become completely hollow? This is where, I would say, introspection will help you. The One who makes the flute is also within you.

So let there be a flute made out of you by your Self only. This is the way you make yourself what you have to become.

In Gītā Śhrī Kṛiṣhṇa has said “Ātmānyeva Ātmāna tushta" means “the Spirit gets satisfied by itself." Isn't it [a] very difficult thing to understand? How can the Spirit be satisfied by itself? But now you can understand what Śhrī Kṛiṣhṇa has said: that your own Spirit becomes satisfied with itself. Then it doesn't require any other satisfaction. You seek the comfort of your Spirit, you seek the joy of your Spirit, you seek the beauty of your Spirit. You don't

even seek, but it is, in itself, is filled with that joy of the Spirit and it only can be satisfied by Itself.

There are many people who say, “I'm not satisfied, you see, this I'm not very much satisfied, it's not yet I am satisfied." In the same way the Spirit can say, “I'm not satisfied." But the Spirit can be satisfied with Spirit only. It's like the reflection in the mirror. When you look at the mirror you see, there, your own reflection. Now, if the mirror is not alright, I'll say, “I'm not satisfied with what reflection we are getting out of this mirror." So you'll change the mirror, you'll bring the better mirror, you'll try to get a better picture of yourself. In the same way the Spirit, which is reflected within you, wants to see Its own image. And then what you do is to, you go on, somehow or other, changing, cleaning, making it alright through your meditation so that your Spirit is satisfied with the Spirit.

Śhrī Kṛiṣhṇa wrote Gītā in such a ambiguous manner because He was very clever. He knew human beings cannot take things straight, so tell them this way, that way, that way, so that they'll run around and then ultimately they will come to Truth. But Truth is very simple. Truth is extremely simple. You don't have to go here and there and you don't have to stand on your legs or feet all the time. You don't have to fight with anything. You don't have to take to some sort of a tapasya, abstinence, nothing. Only just you become like a flute. You become hollow. It's not difficult. It's not difficult at all for Sahaja Yogis because already the Kuṇḍalinī has made you hollow. It's not difficult.

But still, I find people deviate. Their attention goes here and there.

So many people have told Me how their problems were solved without doing anything about it. I said, “What did you do?" “No, Mother, we just put it at Your lotus feet." I said, “Really?" “Yes, that's all!" or “We were just looking at the problem, what the problem is. We were standing outside and looking at the problem and the problem got solved." Even the most difficult problems that you think, can be solved very easily, because you have powers, your powers are great. You are saints, but more than saints, much more than saints because you are born at such a volatile times.

Like, supposing, you have a light in darkness, you are finding something, you bump into that and you bump into that. But supposing this is a place full of gas, [if] you bring one light, the whole thing becomes enlightened. Like that you have powers, but you must get out of this nonsense of `me', `my' and `mine'.

I don't know how to say you get out, It's not like a swimming pool, that you jump into it and get out.

It's not like that. It is another kind of a very subtle understanding that our roots have to grow. And for growing our roots, we have to go within ourselves and find out within ourselves what is the area we are occupying, in what areas in our lifestyle we are taking these roots inside.

Also, Śhrī Kṛiṣhṇa has said that the tree of life has the roots in the brain and grows downward. It's very interesting to understand that the roots are growing in the brain. That means your own intellect is just covered

with compassion, it's just being absolutely one with compassion. I had told you a story about a saint who was to take water for the Deity in Gujarat and he walked one month to go there with a pitcher of water. And there at the... because it was a very high mountain on which this Deity was and he reached at the foothill. There he found a little donkey dying of thirst so he poured all the water for that donkey.

So those who were with him, they asked, “What are you doing? You brought it all the way and why are you putting it for this donkey?" He said, “You don't know, the God has come all the way down, just to meet me here. He doesn't want me to climb up." This kind of a absolutely simple understanding of another's feelings and another's problems: you can solve them, you can sort them out. And the person will tell you that “You sorted out my problem." But you will not know how you have solved, because this love is the power. This love can see things. It is everything. It's like a... you see a television, alright, it's a television. If you see a telephone, it's a telephone. If you see anything you do with the power, is all is embodied inside, is love. You need not have telephoned. I never telephone to anyone. Mostly I never telephone. I mean, if somebody forces Me then it's alright. I never telephone. But not to save the bill, but I do not telephone because there is no need.

The whole subtle of the ether is at your feet. Just you want to do something you can just do it, just with the vibrations.

Now, many people say, “Mother, cure this person, cure that person." There's no need. You all can cure, you are

so many. You can cure anyone you want to, but you bring that person to Me. It's not needed.

Just you can cure anybody you feel like. You can solve all their problems yourself. One little bandhan can solve it. But for that you should be the source of love. Once you give a bandhan the... this powerful love takes over, “Alright, I'll do the job." But for that you have to be the master of this beautiful thing.

Now, one thing is very different from other masteries. In other masteries, you see people try to dominate or to, try to use it for destroying others. But the mastery of love is that you know how to build a rapport with the Divine Love. And this Divine Love is not only powerful, but it is such a efficient, I should say, it is such an alert instrument which works out everything in such a manner that you are amazed how things have worked out. And everybody has noticed it. I know you all know it, not that you don't know. But you don't use. You have to be on the vibratory awareness and use that. Even giving yourself is a bandhan itself clarifies you.

Imagine in your hand there is this great power of giving you this balance, this love, this affection and all the protection while you can give it to others also. You have become now the part and parcel of the Divine power. You are now in the Kingdom of God and whatever you want to do can be done by this Divine Power.

With all this telling you I still feel, sometimes, you are not confident. You get upset. You feel that how can this be. You have no trust in yourself, you have no faith in yourself. And also there are some people, sort of, who

feel they are neglected, or something should have happened to them. Once a lady started crying.

So, I said, “Why is she crying?" She said, “Because Mother didn't smile at me." I didn't smile at her! But I never smiled at anyone. I don't know why she thinks like that.

So, I asked her, “Why do you want Me to smile at you? What's wrong with you? You are alright. Why should I smile at you?" So, you see, also this kind of a feeling that comes up sometimes that, in Sahaja Yoga, Mother should all the time be only attached to you. She cannot get attached! It's a helpless condition I have. There are so many, you don't know, defects I have, which you have no idea. I don't know how to count money. If you give Me hundred rupees I'll count it two hundred rupees. You see, I don't know many things: I don't know banking. I don't know many things and one of them is I don't know how to put attention to this person or to that person. Like politicians would do, “You see, ah, you must look after this man, because he is very important." Nothing. To Me you are just part and parcel of Me, finished, nothing more than that.

So, you see, everybody should know that you are very close to My heart, you are very much there, I am very proud of you.

And something, really it's a miracle that has happened, that you people have taken to Sahaja Yoga.

So on that point also, that “How much Mother cares for me, what She does..." Now, supposing I tell somebody, “Alright, you don't sit here, sit there” they feel bad.

Anything you do, they feel bad. This kind of a person has no sense of love. He doesn't understand Mother's love.

So, at the end of the whole thing I must tell you, that when you are a Guru, you are also a mother. You have to express yourself like a mother. She's kind, she's gentle, she forgives, she also corrects whenever it's necessary, but in her own sweet way she corrects so the correction takes place, is not that a rebellion starts.

So all that wisdom of a mother is within you, is already there, so please try to use.

I am sure it will all work out and as it is we are a very beautiful group of people who are something out of the blue, who are so much in peace and in joy together.

May God bless you all.

Contents: 1995-07-25 **Talk to Representatives of Ecoforum and the Vice-minister of Health, Sofiā, Bulgaria**

Vice-minister of Health [questions]: [Why the International Forums had not so far succeeded in solving the ecological problems].

Shri Mataji: The reason behind is that people involved had artificial ideas and were not collective.

People did not realise that deeply inside they were collective. This collectivity might be expressed as a common action of spirituality. The solution of the ecological problem is the ecologists must become the Spirit.

***Contents: 1995-07-26*, Public Program, How to Solve Ecological Problems, Centre of Hygiene, Sofiā, Bulgaria**

[Shri Mataji receives a golden medal and an honourary diploma for Her work as UN Peace Messenger.] I bow to all of you, who have come to know, how to save humanity.

It is not our problem only of Bulgaria, but of the whole World. Everyday all over the world there is awareness about ecological problems. But means that are adopted are not sufficient enough to stop our deterioration. Now I am here to tell you about some truths, which if we achieve, we can solve our ecological problem in a much better way.

Outwardly we understand that we have to reduce the machinery. The industrialisation, the way it has gone out of proportion, has created lots of problems. If we go back about say fifty years in India, we were having our struggle for independence. Then Mahatma Gandhi suggested, “Why not we use hand made things, handmade clothes, hand woven clothes, handmade things from the villages?" And it worked because we could stop the machinery of Manchester, who were selling us all these clothes from England.

In the West, there is a big urge to use hand made things, is more expensive. I was surprised that Bulgaria is so much full of artists, there are so many artists, very beautiful. They do not only make, you can say, pictures and paintings but also they are very good hand at making things, which are functional with hand.

Now to out rate the growth of industry, we have to take something simple life, by which, we do not use too many things.

In India say for example every family will have one plate either of Brass or of Silver, depending on the status for each person that is all. But these days the plastics are created, which are disposable. In America even in the drawing room, they have a waste paper basket of big one like this for disposable things, they are always disposal. I think it is a labour saving, because such a lot of waste has been created. In America that they do not know what to do with it.

If you fly to New York, you will be surprised to see that the whole sea is filled up with all kinds of rubbish. It spreads miles together.

With all that kind of water, the fish cannot survive. And there are so many industries that their waste has to go into the Hudson River. There is a way of understanding that we have unnecessarily expanded our acquisition temperament. They say, it is for our individuality we have this one type of plates, plastic plates one has, another one has another kind of plastic.

But plastic is not good for health. And the beauty of it is that it can penetrate into anything, it can penetrate into clothes, it can penetrate into *[UNCLEAR]*. Now this is a difficult thing it will take too much time to change the people of their awareness to understand.

As you know there are all kinds of pollutions that are troubling us. They are using lots of cars and all such vehicles which create pollution. But if you say that you

should use bullock carts or you should use horses or donkeys, nobody will like that idea.

Because this modern world has become very speedy and because of the speed people just want to do things much faster than that is required.

There is a big slavery of the watches. This is what modern life is. All these things cannot be reversed very easily, I understand. And these factors which create pollution cannot be controlled very easily by just by protesting, or by shouting, or by doing all kinds of things.

Now they said that there was bomb explosion in Paris railway station because it is suspected that the people are against Chirac, who planned a sort of atomic experiment in the South Pacific.

This kind of violence also is not going to deter people from doing wrong things. Because of these, all these happenings and very aggressive people at the helm of affairs, what we find is that human being themselves have become very chaotic. They are very much confused.

So to keep up the speed also we have these computers and all those things, but what it is doing to us we do not know.

It is a money orientation of men, which is working out his whole lifestyle. And nobody is worried about the future what is going to happen. They lack complete wisdom and balance. Once they start doing something they must go to the extremes. There is no moderation in anything; it is a kind of a desperation they take.

So we have to now think, what should we do. In the evolutionary process, as you know, people developed immunity to different obstacles. Animals developed new type of limbs and things according to the atmosphere they have to face.

Is there a possibility that we human beings in these modern times can develop immunity to this attack of ecological problems. If we could do that then there is a question of great survival of the person.

The first is all kinds of new diseases that have come up. The latest one what you call as [Epis] disease you see, this is when the whole conscious mind becomes paralyzed. When people go to the extreme of too much thinking and planning, they develop this disease.

Now this is happening very much more in America and also in England. Very successful people become, what you can say, paralyzed as far as their body is concerned. Their brain is working all right, but consciously they cannot do anything. Unconsciously they may do some things, but consciously they cannot even pick up a glass like this. They become like really like reptiles and you have to carry them like big fish on your body. But when they talk, they talk like a great scientist, great professionals.

This is I think is the last word now as far as the checking of the nature is concerned about over activity.

Also ecology, also this also, acts a problem with that. Because their breathing is very difficult and so in this polluted atmosphere, they cannot breathe properly.

So we should probe into the matter to see is there a way out. If the science does not help, we should go beyond

the science. The trouble with the science is that is amoral, it is amoral, there is no morality. And once it goes into the hands of people who are aggressive, it becomes very destructive.

So today I am here to tell you about the solution. It is Meta science you can call. You should not accept Me blind folded. We have had enough of problem of blind faith. But whatever I am telling you, you should accept it as a hypothesis, like scientists are. And please keep your mind open. Now if you find what I say can be proved and there is evidence you should believe, because it will solve ecological problems. It is benevolent for you, for your family, for your country, for the whole world.

I am talking about the last breakthrough of our evolution. We have reached up to this human awareness.

But still we are not perfect and we do not have absolute knowledge and we have not much immunity either.

So let us find out if there is some other mechanism within us, which can work it out. Here is they have shown that mechanism that works it out within us, the immunity part.

In the triangular bone, as you see, there is an energy, which is a residual energy, which is for this last breakthrough.

This energy was sacred because Greeks knew about it, they called it Sacrum bone. Now this energy exists, we have evidence of that and you can even see it pulsating at a certain stage of this process of evolution. Also as far as we know that we have three types of autonomous nervous system, left-right sympathetic and the parasympathetic.

And the fourth one is our central nervous system, which you can say is recording whatever happens in our evolution.

So these three energies that are there are run by autonomous nervous system as the doctors call it. Now we should ask who is this auto? There are so many things science cannot answer. For example these flowers, we don't know how they are created by Mother Earth. Because it is a living process. In the medical science there are many things they cannot answer.

As a rule anything that is foreign in this body is thrown out. But when the foetus, the baby foetus is formed. It is not thrown out, it's preserved, looked after, nourished and at the right time it is thrown out.

There are other many things like there are two chemicals Acetylcholine and Adrenaline. They are chemicals but they act differently in the body. You cannot explain why it happens, that means we must explore much deeper within ourselves.

Now according to Me, just take it as a hypothesis, there are seven centers, energy centers within us.

And when this power, which I told you, is in the Sacrum Bone, rises through these centers it integrates it and also it nourishes it.

Now I will tell you how cancer is caused. We have these centers from the left and right sympathetic nervous system in the parasympathetic nervous system. Now if you are moving too much of your right side for physical and mental activity, when the energy from this center is drawn out too much and if something happens on the left side it breaks. And it loses its connection with the main.

And then the malignancy settles. There is no control of the brain on it.

By this awakening I assure you, we have cured cancer in India all over. Without any medicines only through your own energy it has happened.

There are so many other diseases especially I will tell you about the one, which one gets when he is over acting, when he thinks too much. Now this attack I am telling can come from ecological problems.

I think it becomes mostly it comes. Now the one center I will discuss with you today, because they said, “There will be some doctors sitting here." Are there some doctors sitting here? Will you raise your hands, if you are doctors please? So this is for everyone. Whether they are doctors, or they are planners, or they are doing some sort of an enterprises, for all the people, we call it right-sided people. Who think too much, who are spending too much time in making something or doing something, or you can say constructive so-called.

With these over activity what happens you should see, firstly over activity of human beings have created ecological problem. If they could little bid settle down, it would be less problem for us.

For example one man starts a factory than he earns some money out of it than he starts another factory than another factory than another factory, or it could be somebody who, say studying for M.A., than he wants to do M. Phil., than he wants to do Ph.D. And go on just like that. Also the bureaucrats, who are planning too much, politicians, all the time intriguing using their limited brain energy. They all face this right side problem.

According to us the right side channel is this one which is used for mental and physical work. And there are so many problems with that like stress and strain and this [epis] disease also.

One of these seven centers, the second one as you see there we call it Swādhiṣhṭhāna, which also looks after the Aortic Plexus in the Medical terminology. But it supplies energy for the grey cells in the brain.

When you think too much it has to do this job is to supply energy for the grey cells of the brain.

This one center has to look after the Liver, the Pancreas, the Spleen, the Kidneys and Intestines, especially in the lower part of Intestines. Now when you are thinking too much, what happens first of all, the Liver goes out of order, the job of the Liver is to take out all that is poisonous in the body, in the form of heat and give it in the blood circulation. But when it is out of gear, than the heat is transferred upward and there is a minor center there called at the right, right Heart we call it, it's the one which gets affected, which looks after the lungs and then one gets asthma of a serious type. Also this ecological problem active because heat is created and that sort of coagulates the Lungs.

The second problem comes, when young people play tennis, very heavy physical exercises also drink a lot and think a lot then they get a heart attack, heart is collapsed. Very massive heart attack, which is fatal. And very young people die; say from eighteen to 25, there are many common cases like that.

Also there is craze for people to go to the sea shore and take to heat. As it is their liver is out of order, which is

giving a lot of heat and then they want to go and sit in the sun so they get skin cancer.

About twenty-five years back nobody knew about these horrible diseases. They didn't ever go out, they sat in the house, talked to each other, but nobody knew that people went out to the holiday, spent all their money.

But some entrepreneur came up with this smart idea and started this business.

Some people say in England I have seen them from South [UK] to they will go to the North [UK] and North [UK] will come to the South [UK]. And the whole weekend they are plodding with their children up and down, whole weekend is just wasted in a very hectic life. They save all the money just for the holidays and the women also try to get there body in such a way that they could expose it to the Sun.

The second thing that happens to you is that your pancreas doesn't get energy from this particular center and becomes sick. And you develop a horrible disease called diabetes. Most people who are sitting and planning, planning, planning are the ones who get, they get diabetes. But not the people say in Indian villages, who just earn sufficient, eat their food and sleep off. They don't bother. They don't worry for tomorrow. There are no insurances and they eat such a lot of sugar that in a cup of tea the spoon must stand up to 90 degrees. And they were never known what is diabetes is.

So by reducing sugar, we are not going to get rid of your diabetes. This pancreas has to be improved.

Than we have another thing called spleen. Spleen is like a speedometer within us. If supposing you eat your food and suddenly you run you get a pain in the spleen.

So this spleen is a speedometer, which has its own rhythm. But modern life is such that in the morning you must read newspaper. And they never publish anything that is good or peaceful but always so many bombs, so many died, so many killed. If you read it, if you are sensitive, you really feel so upset and at this spleen starts putting more RBCs out.

Then in the car you find the jam and you get upset. Then in the office the boss is angry because you are late and the whole life is so hectic. You have to do this and you have to do that, you have to do that.

So this poor spleen doesn't know how to cope with the crazy manner this.

So the whole rhythm changes and suddenly what you develop is blood cancer. I have seen 3-4 architects in India now are alright, they had horrible blood cancer. Also one of the leaders of some party in India, he also got cured. All such people, they cannot look after themselves, how can they help others? Then the kidneys, the kidneys also get coagulated with the heat.

So you get kidney trouble. You are put on the dialysis artificially till you become bankrupt. And then you die. There was a doctor who came to see Me who had this trouble, kidney trouble. He was doing dialysis.

So he said “Mother can you cure me?" I said “I will try but, if you are cured promise Me that you will not do any more dialysis." Luckily he got cured but he is still busy

with the dialysis. Because he said “I have invested so much money, what I have to do?" Better sell it off.

So this is what happens to kidneys.

Now intestines become also very constricted. All kinds of Intestinal problems start. Worst is permanent constipation. This is only in the lower part. In the upper part now even you may survive for some years, your heart is always under attack. And suddenly you just become a victim of a massive heart attack at any age can happen. Then also you can get your paralysis of the right side. But last not the least, is this [epis] disease. All these things happen only by one center going into jeopardy.

Now if even you can correct this center and if your centers are cured than you become immune to ecology. Because, also, you get connected with the All Pervading Divine Power. Actually that does all the living work. I know all the religions have failed because, because they are money oriented or power oriented. But they are not spirit oriented. With this process, when it happens when you become the Spirit, you become immune. Because nothing can kill that spirit and that immunity you develop. Now I am running My 73rd year and I am practically travelling every third day and I am at peace with Myself.

And the whole things look like a drama to Me. I have never been to a dentist, also glasses I started about four years back because of this light. Also because of this light which was on some times nine hours, ten hours, I developed little spots. But I have no *[UNCLEAR]*, no what

you call other problems of the blood or anything nothing. Of course I have no time to exercise still I am normal.

So what one should desire is to become the Spirit, so you develop immunity to this ecology.

The first thing I find in the West, I don't know about Bulgaria, but they are so sensitive to noise. They can't bear any slightest noise. I am surprised, in these modern times you have to live on the Himālayas, if you want to avoid noise, isn't it. But they are so sensitive to this kind of noise, any other noise but if there is horrible music going on dha-dha-dha, they don't mind.

Yesterday we were listening to the news and one old American lady, who is a tourist, was sleeping in another room. I mean mostly in America they travel when they are above 70 years like this. They are shaking with the sticks in their hands and I mean at this age why should you travel for nothing at all.

They want to compete I think with the young people, so she complained that she cannot sleep with this news going on in our room, which was very faint. I think it's ego but then they started some sort of disco down below. Till about 5 o'clock in the morning and who could she complain? But what is it that, we have to develop this immunity because we become a witness of the whole thing.

And as a result you also get powers to make other people who are evolved fully. You know the absolute knowledge; you get the absolute knowledge on your fingertips. It is the Saint knowledge about yourself and because you become also collectively conscious, you get information about us.

Now if you know how to cure yourself. You can cure others also.

I am very thankful to this organization, which has invited Me and I could have spoken much more about the sea preservation and all that. Because I travel a lot and I see a lot.

We can learn from Australia, from Tunisia, how they have made their sea all right safe, so much to be learnt from some people, but one must have wisdom and humility.

It is a serious problem and we have to think about ecology.

So I am thankful to this organization which has invited Me and because of that I could tell you about the immunity, how to develop within yourself.

Some may say, it takes time, I think it does not. Because say in a country like Russia where I never expected in one program there are always more than sixteen thousand people. And they get their realisation without any trouble. I am amazed because I never thought that Russians would be so sensitive to this. May be they are so frustrated that they took to it. Of course India knows all about it so no problem but so many countries now 65 countries people, 65 countries have accepted Sahaja Yoga.

Even Romania, which is hardly any distance, just imagine these people don't know Hindi language, they don't know our music system, which is very difficult. They have to, in India; they have to study for years to pick up these. But not only that they can sing very well, but also they understand what they are singing.

People who were never used to Indian music are so appreciative of it, I just can't believe it. Even to say one sentence of Sanskrit, was impossible for an Englishman, even ordinary Hindi words. How these people from all these countries, have picked up all kinds of languages, is very much surprising.

We have many doctors, who are in Sahaja Yoga, I was thinking of having a conference of doctors here sometime. And they are going to bring all the evidence and all about. I am sorry, I have to leave you because this hall is only available for a short time and I hope you don't mind.

If you want to have your Self-realisation, we have very good, very very good centers here, where you can go and do it.

So I wish all the good luck to this organization and all the help that is needed we are willing to do.

Thank you very much.

And don't forget, you have to save the world.

Contents: 1995-07-30 **Evening Program, Ballroom, Movenpick Hotel, Istanbul, Turkey (date not sure)**

[After Romanian Qawwalis.] The Gandharvas have taken birth in Romania.

Contents: 1995-07-31 **Invitation and Diploma in Cognitive Sciences Received, Movenpick Hotel, Istanbul, Turkey**

[From Department of Psychology and Paranormal Phenomena, Ecological University, Bucharest, Romania.] [Later in the night:] I don't know what made them give Me the highest award. For what I do not know, but they said you are even higher than science. They said, Mother this is Cognitive Science and like that everywhere they gave Me awards. I never knew what Cognitive Science is but this is the knowledge that is beyond the mind. It is absolute knowledge.

***Contents: 1995-08-01*, Public Program, Bucharest, Romania**

I bow to all the Sahaja Yogis and all the seekers of Truth.

It seems Romania is a special place where there are so many seekers of truth. And very deep and truthful they are about it. Sahaja Yoga is the power of compassion and love of God Almighty. But it's not just talk, just not giving you a lecture or a sermon, but it is actualisation of the experience of this Divine Love. It is spirit-oriented, not money-oriented, nor is power-oriented. All the religions have failed outside because they are not spirit-oriented. Now, of course, they are challenging us and saying all kinds of wrong things about us because they are frightened that they will be exposed.

But truth will prevail now. The time has come for truth to prevail. It is surprising that people don't understand that truth is love and compassion. If you really love somebody, you know everything about that person, that is how the Divine Love is, which knows everything about everything. It is the knowledge that you get when you fall into the ocean of love, an ocean, you fall into the love's

ocean. One has to know that truth is what truth is, you cannot change it, because it is absolute. You cannot transform it, you cannot sell it. You cannot pay for it. It has to be really understood that if you have to know the truth you will know because the time has come and that you are the human beings at the epitome of evolution.

So, this is how we are working out Sahaja Yoga in thousands. Sahaja, Saha means with, ja means born.

Is born with you the right to achieve this union, this Yoga with the Divine. There is no obligation and there is no compulsion, it's all free, because it is your own power. It works spontaneously, Sahaj and also it is manifesting very fast. These are the centers which are within you and when they go into jeopardy, you get physical, mental, emotional and spiritual problem. No doubt, there are many people who are cured of incurable diseases without paying anything, without taking any medicine, with their own power.

Many people have been gifted with the esthetics. See, these are Romanian boys and how well they sing Indian songs in different languages. It's not possible. Normally it is not possible because very difficult tunes and very difficult words. But it has worked and I see in every country which have no idea of Indian language or Sanskrit are now getting all this talent to express their love. Also, Indians are singing your song, Western song, I don't know how they picked up from you.

Then their problems are solved. Even financial problems can be solved. It is very surprising how people get their attention absolutely becoming innocent and the attention becomes very steady. This steady attention penetrates

deeply into any enterprise you take up. Thus, you become very successful in your education, in your daily life. But the greatest success is that you become ocean, like the drop falling into an ocean dissolves. That means you become a universal being.

Now Sahaja Yoga is working in 65 nations and when they come together I've never seen them quarreling, fighting, but they enjoy each other, whatever country, race or community they belong. Such brotherhood, such love, such oneness, unity you can see. Because who is the other? They have become part and parcel of that ocean of love, like the cells in one body. The best part of it is that when Kuṇḍalinī rises She puts your genes in proper shape.

So you develop Sahaj genes by which you become extremely righteous, extremely kind and honourable. You are that, no doubt, but, you see, maybe there is some sort of a problem with your genes, but once you are all right, you are great. You don't know how great you are, how fantastic you are.

If you take a television in a remote village of India, those who have not seen anything like that and tell the villagers that when it is connected you can see all sorts of things on the screen, so they will say that: “You are just telling us a story. How can that be? This looks like a little box." In the same way, we think we are little boxes, but once you are put to the mains, you discover how fantastic you are. The time has come for the whole world to change. Unless and until human beings are transformed you cannot solve the problems of this world. This is reality, one must understand. No use having big,

big meetings, conferences, all kinds of things which bring forth nothing. Also, what has religion given us, outside religion? Nothing, but the idea to fight everyone thinking that yours is the best religion.

What has science given us? Science is amoral, it has no morality about it. That's why they are creating atom bomb, hydrogen bomb, all these destructive things to kill their own fellowmen. There are no limitations of science and it has reached such specialisation, that you may have one doctor for one eye and another doctor for another eye.

So there is no synthesis, no synthesis. All this makes people think there might be something beyond that can happen to us.

So when this power, Kuṇḍalinī, which is a residual power, raises through these six centers it nourishes those centers and integrates them and then pierces through your fontanelle bone area and connects you to this All Pervading subtle power for the first time. You have to experience this power. Just, say, talk about it, it's nothing but web of words.

So the Sahaja Yoga is actualisation of your baptism. It is not some priest comes and put water on your head and says you are baptized.

So one has to understand that there is our Creator who's very anxious that we all should enter into His Kingdom.

Now the first thing that happens to you as a result of this awakening is that you become thoughtlessly aware. Thoughts come to us from our past and future and we are not in the present. In between the thoughts, there is the space which is the present. Past is finished, future

doesn't exist. But when this Kuṇḍalinī rises, She elongates these thoughts and we stand in the present. We are absolutely aware but thoughtless. This is called as thoughtless awareness state. Patanjali has called this Nirvichar Samādhi.

Then the second state, where you become doubtlessly aware, when you yourself start using this power and giving Realisations to others. And you receive so many blessings that you are amazed how these miracles are taking place. Then you become doubtlessly aware, very powerful; at that stage, nobody can harm you. The Divine power looks after you and you settle in the Kingdom of God. The government of God is very efficient, alert and loving. It loves and looks after you. We have had many miracles in Sahaja Yoga.

About a few months back there was a lady when I was in India, she wrote to Me a letter saying that in her family there is some sort of a Mexican disease which everybody gets. It is a fatal disease but most of them get at the end of their life. But her son, who is young, studying in Harvard University, has got it and that they are saying it's not curable and that he may die within one or two months. She wrote to Me three letters asking Me if she could come to India or meet Me anywhere I am. The fourth letter came saying that the son, when he went to the hospital, they found nothing wrong with him. It was really a very great miracle, I must say, the way she was doing this work for Sahaja Yoga, she is being blessed. She came to Cabella and about before at least two thousand people, she told this.

This is what it is, that it is beyond human conception how this Divine Power could be compassionate and attending to our needs. Then, with your attention, you can know what's wrong with you: this is Self-knowledge. You know about your Chakras. You develop a right attitude towards yourself and you want to correct them. Also, you develop a new dimension in your awareness, which we call as collective consciousness, that is, you can feel the centers of others on your fingertips. If you can correct your Chakras, your centers, you can correct others also and you can cure them without taking them to the hospital.

There are three doctors in India who have got their M.D. in Sahaja Yoga for curing incurable diseases. On your fingertips, you know absolute truth.

Like one fellow came and told Me: “I've been to church, I've seen these people have no faith in God, how can there be God and these people so bad?" I said: “All right, put your hand like this and ask a question: `Is there God? Ask three times.' " And from his fingers he started feeling the Cool Breeze of the Divine Power, saying: “Yes, there is God." So the time has come to prove the existence of God Almighty, His Divine Love and our importance. Thus, you develop your identity. Then also, you know what is the purpose of your life, why you have come on this Earth, for what purpose the evolution took place. It is not something in the air but it is really actualisation.

I don't know but people in Romania really extremely sensitive for spirituality. In Sanskrit language, Rāman means to enjoy.

So now, above all you have to enjoy yourself, others and the Divine blessings.

That's all you have to do, because this whole world looks like a drama, sometimes a tragedy, sometimes a comedy. But you are not involved, you just watch. And your watching with your attention is very helpful, it works out many things which normally very difficult, on a global level also. Actually you become absolutely peaceful within, the peace is within you.

I've met many people who have got awards in peace and all that, but they are very hot tempered. All full of wrinkles, you can count them. How can they be peaceful, how can they get awards, I don't know.

The source of energy is so great that you don't feel tired. As you know, I travel every third day and I'm so very old, about 73 years of age. And I am all right.

So the life changes and you really enjoy human life which you *[UNCLEAR* detested/desisted] and also you were frustrated with it.

So we create a new world of transformed people, who are innately pure, innately. You enjoy your virtues and you enjoy your Self. But there is no false pride or there is no Ego, nothing, is just enjoyment. For Sahaja Yogis, it's a festival every day. Even the children become so sweet and so beautiful. Of course, there will be people who are of false Gurus and false religions and all that, they will talk against, doesn't matter. And thank you very much all of you. And My heart is full with such joy for all of you. Thank you very much! Now we'll have the session for Self-realisation, Kuṇḍalinī awakening. And you should sit in a relaxed way, not to be tensed up about it. Of course, I cannot force Self-realisation on you and also is not

meant for arrogant people or who want to just criticise us. It's not meant for idiots and stupid people.

So those who do not want to have Self-realisation are welcome to leave the hall. They should leave because they should not disturb other people. To be civil to others is very important. It will hardly take ten to fifteen minutes, but one should not leave the hall when we have started this process of Self-realisation.

So there are three conditions which are very simple. The first one is that you have to forgive yourself.

At this moment, you forget your past. People say is difficult to forgive, but whether you forgive or you don't forgive, you don't do anything. But if you don't forgive, then you play into wrong hands and torture yourself. At this juncture, when you cannot forgive, the center here on the Optic Chiasma is like this constricted. And at this important time if you don't forgive, the Kuṇḍalinī won't be able to rise.

So, why keep this myth and miss the point of your Realisation? The second condition is that you have to forgive everyone and yourself. When you have to forgive everyone also, in the same way, if you don't forgive yourself you catch here, the center which we call as left Viśhuddhi. This is very dangerous because this can give you spondylitis, can give you angina which causes heart trouble or it may give you very lethargic organs.

So we have to understand that we have to forgive ourselves.

The third condition is also very simple, is that those who are wearing shoes have to take it out, because this

Mother Earth helps us a lot. Those who are sitting on the ground should also take out their shoes.

But those who are sitting on a chair have to keep both the feet apart from each other like this, because there are two powers, left and right. Left is the power of our desire, mundane desire. Kuṇḍalinī is the Power of pure desire. And the right side is the power of action. If you have pure desire, I'm sure it will work out.

So you have to place both the feet apart from each other; on the ground, you are all right. Sit comfortably, that's all. Don't put strain on your body of bending back too much or slouching in front.

You should be really pleasantly placed towards yourself. You are about to enter into the Kingdom of God.

Now, somebody will show you how we'll nourish our centers. *[UNCLEAR]* we should say.

Please, put your left hand towards Me, like this, on your lap, comfortably on your lap, indicating that you have desire to get Self-realisation. Now, please, put your right hand on your heart, where resides the Spirit. Now, if you become the Spirit, you become your own guide in the light of the Spirit.

So now, please take your right hand in the upper portion of your abdomen, on the left hand side. Here is the center of your mastery. Now, please, take your right hand in the lower portion of your abdomen, on the left hand side. This is the center of pure Divine knowledge. Now raise your right hand in the upper portion of your abdomen, on the left hand side. You are only working on the left hand side. Now on your heart. Now, in the corner of your neck and shoulder and turn your head to your

right. I've already told you about this center, that when it is in jeopardy, you get diseases like angina and spondylitis. Now, take your hand on your forehead across and put it down. This is the center where you have to forgive everyone, without thinking about them, in general. Now take your hand on the back side of your head and push back your head. Now this is the center where without feeling guilty, without counting your mistakes, you have to ask forgiveness from this All-pervading Divine Power. Now the last center is very important, so stretch your palm fully, put the center of your palm on top of your fontanelle bone area. Now push back your fingers.

Bend your head. You have to move your scalp seven times, slowly, clockwise. Bend your heads. Bend your heads. That's all we have to do. Now, see that your legs are apart from each other those who are sitting on a chair and the left hand towards Me. Now you have to close your eyes, so take out your spectacles.

That will help. And, please, don't open your eyes till I tell you.

Now. Put your right hand on your heart. Here resides the Spirit. Close you eyes and ask a fundamental question about yourself. You can call Me Mother or Shri Mataji.

So please ask three times: `Mother, am I the Spirit?' I've told you that when you become the Spirit you become your own guide, your own master.

So now, please take your right hand in the upper portion of your abdomen and press it hard with your hand, with your fingers. Here you ask another fundamental question three times: `Mother, am I my own master?' I have to

confess that I cannot force Divine Knowledge on you. You have to ask for it.

So, please, take your right hand to the lower portion of your abdomen, on the left hand side. Here you have to ask six times: `Mother, please, give me pure Divine knowledge.' Six times, because this center has got six petals.

As soon as you ask for pure Divine knowledge, your Kuṇḍalinī starts rising.

So now, we have to nourish our upper centers with our full self-confidence.

So raise your right hand in the upper portion of your abdomen, on the left hand side. Here you have to press it and say with full self-confidence: `Mother, I am my own master.' I have to tell you that you are not this body, this mind, these emotions, this intelligence, this ego or conditionings but you are the pure Spirit.

So you have to say with full confidence, when you put your hand on your heart that: `Mother, I am the pure Spirit.' Now you have to put your right hand on your heart and you have to really say with full confidence: `Mother, I am the pure Spirit.' I have to tell you that this Divine Power of love is the ocean of bliss, is the ocean of knowledge, but above all, it is a ocean of forgiveness.

So, whatever mistakes you might have committed can be easily dissolved in this ocean of forgiveness.

So forget the past and put your right hand in the corner of your neck and shoulder and turn your head to your right. Here you have to say with full self-confidence, sixteen times: `Mother, I'm not guilty at all.' I have

already told you whether you forgive or don't forgive, you don't do anything. But when you don't forgive, then you play into wrong hands. Specially at this moment, it is important that you have to forgive.

So now, raise your right hand on top of your forehead and put down your head as far as possible. And here you have to say with full confidence again, not how many times, but from your heart: `Mother, I forgive everyone in general.' And without feeling guilty, without counting your mistakes, you have to ask forgiveness from the All-pervading Divine Power, for your own satisfaction.

So, please, take your right hand to the back side of your head and push back your head as far as possible. Here you have to say, three times again, or maybe without counting, from your heart: `Oh, Divine Power, please forgive me if I've done anything wrong knowingly or unknowingly.' Say it from your heart. Say it from your heart.

Now, the last center, as I told you, is the most important one. For that you have to stretch your palm fully and put the center of your palm on top of your fontanelle bone area, which was a soft bone in your childhood. Now stretch back your fingers so that there is a proper pressure on your scalp. Here again I cannot force Self-realisation on you, you have to ask for it.

So now bend your head and move your scalp seven times clockwise slowly saying: `Mother, please, give me Self-realisation.' Bend your heads.

[UNCLEAR].

That's all. Now, please, take down your hands. Now, please, put both the hands towards Me like this, put the

right hand towards Me like this, like this, not like this, like this. Now, push the right hand like this and see with your left hand if there's a cool or a hot breeze like say vibrations are coming out of your fontanelle bone area. Please bend your heads and see. Now, please, take your left hand like this towards Me again, projected like this and bend your head and see for yourself again, with your right hand, if there's a cool or a hot breeze like vibrations are coming out of your fontanelle bone area. If it is hot that means you have not forgiven yourself or others.

Some people get it far away and some closer but don't put your hand on top of your head.

So forgive now, forgive yourself and forgive others. Now put the right hand towards Me and put down your head and see for your left if there's a cool or a hot breeze like vibrations are coming out of your fontanelle bone area.

Now raise your both your hands, push back your head and ask a question: `Mother, is this the Cool Breeze of the Holy Ghost as described in the Bible?' Or, ask this question three times, or `Mother, is this the Divine Power of Love of God?' Or, `Is this the Param-Chaitanya?' Anyone of these questions you ask three times.

Now put down your hands. Put this hand like this towards Me and watch Me and don't think. All those who have felt cool or hot breeze on their fingertips, or on their palm, or out of their fontanelle bone area, please, raise both your hands.

That is Romania, I tell you. I bow to Romania and I bow to Romanians and to all the saints. It is very kind, really.

Thank you very much! You can have a song and you can clap your hands. Once.

Contents: 1995-08-02 **Medical Conference, Department of Psychology and Paranormal Phenomena, Ecological University, Bucharest, Romania**

So all the professors, the Vice Chancellor who was so kind to invite Me here to talk to you about something which is very different, I would say in a way, very different from the medical science I have studied. I would not call it different but it is, I would say, it is the basis of our medicine. For example if you want to treat the tree for its sickness and you start applying things from outside it doesn't work out so well. It may have reactions also. But if you can somehow go to the roots, then the whole tree can be treated.

Our medical science now, in the modern times, has become very specialised, to such an extent that you may have a doctor for one eye and another doctor for another eye and there is no synthesis. There's no treatment to the totality of the human being. This leads to problems and has created many kinds of reactions.

So today I'm going to talk to you about the subtle system that is within us. You should not take Me for granted, there should not be any blind faith about it but if it is proved, this hypothesis that I put before you, then as scientists you must keep your minds open and then you can accept it as honest people because it is for the benevolence of yourself, your family, your country and the world at large.

The fundamental thing about us is that we have these seven main centers of energy within us. We know about

different plexuses which work on the physical side but the ones which supply energy to these plexuses on physical, mental, emotional side, also spiritual are these centers. Also I would like to tell you about a energy that resides in the triangular bone known as `sacrum'. That means Greeks knew about this bone that they call it as `sacred' bone. Now, this energy is the fifth energy that we have, we should say. We have left and right sympathetic nervous system even autonomous nervous system. They are supplied by two subtle channels on the left and right side. Then we have parasympathetic nervous system in the center.

Supposing you are afraid and you run fast in emergency, so your heart starts pumping more blood and you get higher rate of your pulses. As you know that this is done with sympathetic nervous system. But what brings it down is the parasympathetic, cools it down, is the parasympathetic. This parasympathetic nervous system is also supported by another channel.

Now the fourth energy that we have is a energy by which whatever we achieve in our evolution is recorded, that is our central nervous system. This central nervous system has recorded whatever we have achieved up to this human awareness. We have so many types of higher awareness than animals. For example animals don't understand filth or dirt... they don't understand beauty, they don't understand colours.

So many subtle things that we understand, animals don't understand. Of course they have many things built-in them, accordingly they behave. But human beings have freedom.

Now this energy within us is the fifth energy as I call it. We call it as Kuṇḍalinī in Sanskrit language.

Kuṇḍalinī, because it is in three and a half coils and a coil is called as kundala. It's called as Kuṇḍalinī because it is a feminine coiled energy. This knowledge was known in India since long time, that this energy, if it is awakened it passes through six centers and pierces through your fontanelle bone area which is the actualisation of your baptism and connects you to the All-pervading Power of Divine Love. In Koran they call it “Ruh". In the Bible it's called as the Cool Breeze of the Holy Ghost or All-pervading Power of Divine Love, in Sanskrit it is called as Param-Chaitanya.

So when we see these beautiful flowers, we don't even see and never even think that what a miracle it is.

If you ask a doctor who runs your heart he'll say the “autonomous nervous system." But who is this `auto'? That question if you ask they can't answer. There are many things in medical science that we cannot answer. For example anything foreign that goes in our body has to be thrown away, that's the nature of our body. But when the foetus is embedded in the womb it is kept there and nourished and is thrown out at the right time.

So who does that? There are many questions science cannot answer. Because science is amoral, it has created lots of problems. It can produce hydrogen bomb, atomic bomb, anything and no one can control it.

So we have to go to something deeper and find out if there's any solution within ourselves.

Now as I have to talk to doctors, I would like to explain about one center, how it can create problems when it is

in jeopardy. As you see, there is left and right, two sympathetic nervous systems. When I was studying medicine that time they didn't know that they have different functions. But they have absolutely two different functions. The left side caters to your emotional side, the psychology as you can call it and the right side caters to your physical and your mental, means your brain functions. English `mental' word it is ambiguous you know. I mean the activity of the brain and the physical activity.

Now we can talk of the second center because in this short time, whatever is possible, I think I'll explain about one center. This is very useful for doctors, for bureaucrats, for people who plan, for politicians how one center when in jeopardy, how it can create problems. Now there's one thing yet not known to the medical science this time: when we think too much, what thing gives energy to our gray cells? We are using the energy of gray cells but who replaces it? According to Sahaja Yoga it is the second center within us, we call it Swādhiṣhṭhān, which replaces the energy in the brain cells. Now this working takes place like this we can say, the left and the right sympathetic nervous system meet like this and form the center, parasympathetic. And this center is the center of energy. In medical terminology we can say it looks after the aortic plexus. Now this center, when on the right side, it supplies energy to your brain cells when you think too much, or the conscious effort. Now, when you start using this power too much, you neglect other organs which are dependent on this center. The first and foremost is liver. Liver is affected by that.

As you know, liver is responsible for taking out all the poison from the body as heat and put it in the circulation of blood. Now when the liver goes out, the heat accumulates in the liver. It starts passing upward.

So we have another center which we call as right Heart, which looks after the lungs.

So you get asthma. Now in India, one doctor has done research on asthma, with Sahaja Yoga he has proved you can cure asthma completely.

So then, this heat can also pass to the heart. Supposing a young man of say eighteen-nineteen, plays tennis, too much physical exertion, drinks a lot, thinks a lot, at that young age he might get a very massive heart attack which is fatal, always. But later on in age also it might accumulate and people can get massive heart attacks, not angina, massive heart attacks. Then it goes further still, that people can get paralysis of the right side. The latest is yuppie's disease, I don't know if you have heard about, yuppie's disease they call it in America, very common, where the conscious mind becomes absolutely paralyzed because you have used too much of your conscious mind. The brain is in working order, but not hands, feet, nothing, one becomes like a reptile. Very common now in America. And you have to carry the patient like a fish. But he speaks all right, his brain is all right, otherwise he cannot do any action, of walking or...

Now when this heat goes towards the left side of your abdomen it creates another problem, because of the pancreas, it gives you diabetes. Only people who sit on chairs and are futuristic, who are planning, politicians, this that, doctors also, they get diabetes. For example in

India, we have farmers who earn their living and then sleep nicely, they are not worried about anything. They are not money oriented, they are not thinking of future, they don't insure anything and they drink in their tea at least four spoons, full spoons of sugar. But they don't get diabetes. Never. We have never heard of any case with these farmers getting diabetes. Then also because of too much attention for thinking, no energy is supplied to your spleen. Spleen is for our rhythm, a speedometer, for our rhythm of life.

So these days the modern life is so chaotic. Early in the morning if you read the newspaper you are really shocked. Newspapers always describe horrible things, nothing else. Nothing to soothe you.

So, you go into chaos. Then as you know that spleen produces RBCs when there is emergency. For example, if you are eating your food and just you start running you get pain in the spleen.

So, in the morning, people don't take their even breakfast, just rush somehow or other, because they sleep very late and then they get into the car. In America, I'm told that they even brush their teeth in the car. They have no rhythm of life. Then they'll see the traffic jam and they are very upset and in their office now the boss is boiling at them. With all this, this poor speedometer doesn't understand, it becomes crazy.

Of course, the other side how the cancer is caused, I've not told you but suddenly the movement goes to the left, some sort of a shock, accident, anything and you develop a very serious disease called blood cancer. With Sahaja Yoga we have cured many people of blood cancer. Then

it goes to the kidneys and kidneys also go on late, with the heat and you stop urinating. Then you are put on the dialysis where you just become bankrupt and die. Ultimately you die. There's no way of saving such people. But with Sahaja Yoga you can. There was a doctor who was expert as he had lots of machines of dialysis. And he got kidney trouble.

So he came to Me, I said, “You can be cured but on one promise, that you will not put people on dialysis anymore because you must admit dialysis cannot cure." He promised, he got cured but he's still using his machines. He told Me he has spent so much money that he has to make money somehow now. He's so much money oriented, you know.

So, lastly is the worst is that lower part of your intestines, also intestines suffer a lot because you get constipation. But the worst type of constipation you can get, piles you can get. In Switzerland I was surprised that in the bread they put something we call as the cottonseed. And actually we give this in India only to buffalos. I was shocked. Why are they using such a hard thing? “Because” they said, “we suffer from constipation." And you know they may start eating grass after some time.

So this is the situation with one center and so many diseases are caused, so if you can cure one of your centers, you can cure all these diseases.

Of course about cancer also I would like to tell you in short. As this left and right side meet and form a center, now if you are very futuristic you are using right side too much like this and using the limited energy of your

center too much. It could be anywhere, it could be in any center.

So you go on using it too much, ultimately it happens that it's exhausted. And sometimes with some shock or anything it may just break.

So there is no connection with the mains. As a result malignancy is formed. The cells become on their own, there's no connection of control. This I've told you in short but cancer is curable through Sahaja Yoga.

Psychologically also many people have been cured. That is the left side. On the left side we have our subconscious of today, subconscious of yesterday, subconscious of our all lives. And we have beyond that is collective subconscious and this collective subconscious has everything that has been created.

So many things have died in the evolutionary process, have gone out of the process of evolution. Like there might be some plants which we call as bacteria and all these viruses also, the same.

So, once they enter into your conscious mind or conscious side, you get affected.

So for cancer, doctors call it... protein 53, 58..., they have given names like that.

So in Sahaja Yoga your attention is pulled out from the left side brought into the center. As a result of that you become all right. Also, the highest type of left side affectation is lunacy. Also can be cured.

In this short lecture I cannot give you the list of all the diseases that are curable. But if you have the knowledge of medical science it's much easier. But the best part of it

that when you become the Spirit, when you become one with the Divine Power, then on your fingertips you can feel the centers. There are five, six and seven for the emotional side and again five and six and seven for your right side, meaning for your physical and your... not mental but brain activities. Also the stress and strain you have from these modern times, even ecological problems, you become quite immune to it. That's another subject, where you become just thoughtlessly aware. The thoughts rise and fall, another thought rises and falls and it comes from either from the future or the past. But when the Kuṇḍalinī rises then She elongates these thoughts and you stay in the present. You are thoughtless but fully aware and then all the inspirations come in.

The greatest thing is that the database of the genes are corrected with this. We have known many people who were called as very bad people, evil people are completely changed. All your habits which are destructive just drop out because you become the Spirit. Actually you are not this body, this mind, you are not these emotions, your intelligence, your ego or your conditionings, you are the pure Spirit. When you become that, in that light, you achieve tremendous powers. Like many people want to give up alcohol and drugs, they can't, but overnight they will give up.

It's like this, supposing there is a snake in My hand and there's darkness and I'm very adamant and if you tell Me, “There's a snake." I'll say: “No, it's a rope” because I'm obstinate. But if there is little light I'll definitely throw it away. In the same way all habits which you cannot fight,

just run away. Everything sounds so fantastic, I must say. But you are fantastic. Like in our country, in a remote village, if you take a television and say, “This box can show you so many things” they won't believe. They will say, “It is just a box." We also think we are just boxes. We have no identity. But when you put the television to the mains, then you see how fantastic it is. In the same way we are. We are built-in that way. But when we don't take to this natural breakthrough of the evolution, also there is ecological problem inside. Yes. Because I've seen people with cancer, when they suffer and they take to Sahaja Yoga, the whole room gets heated up without a heater. I mean, even if they are sick, if supposing. Supposing you are feeling any pain here and if with Sahaja Yoga you touch it, it's very hot.

So this is the Cool Breeze, we can call it, has a cooling effect.

Also in the Western science there's nothing for cooling. In Ayurveda they have, some things, not many but we have so they go on heating up and heated up and heated up, even the brain gets heated up, everybody gets heated up... even the nerves get heated up... and you have no strength left to fight any illness. But this is your own Power. There's no obligation at all. You feel much younger, very energetic.

Now, I'm seventy-three years of age and I travel every third day and I enjoy.

So it's very easy because it's your own. But medical studies helps you a lot to understand the physical help of Sahaja Yoga. You don't have to go for diagnosis, when

the patient dies halfway when he's diagnosed, by the time.

So is best is to diagnose a person on your fingers, which is absolute knowledge, absolute.

Even if you have ten children and tie up their eyes and ask them, “What is this gentleman suffering from?" they will all say the same thing. Now supposing they show you this finger, so you ask the person, “Do you suffer from heart?" So he'll tell you, “Yes, very much, how do you know?" Now, if you know how to cure yourself, you can cure others also. You can feel the centers of others on your fingertips. They may be anywhere, might be dead even, you can feel. This is a very subtle subject and also very easy. The knowledge is all within yourself but after medical studies it relates to science very clearly.

So it's very useful for doctors. And in a country where we are not so rich like Americans are, we need not waste too much money.

It's a very large subject and I was telling your authorities that I'll send a doctor who was the Head of the Physiology, Dean of Physiology from Delhi University, who has written a book on Sahaja Yoga. His granddaughter was dying of kidney infection and she got cured in Sahaja Yoga and his wife had migraine, also she got cured in Sahaja Yoga.

So then he started researching Sahaja Yoga. He's written a very good book and was inaugurated by our President in India.

Of course I would like you to ask Me some questions if you have any.

Question: I'd like to know, what is in Your opinion the spiritual mission of the Romanian people?

Shri Mataji: Oh, they are wonderful. Oh, they are very sensitive. I must say they are the best in the Eastern Bloc. They are very spiritual. I just don't know, we have now, I think, five thousand Sahaja Yogis and I have no words to... really I can't praise them enough. It's true. And they have grown too much.

Question: You said that lunacy can be cured in Sahaja Yoga. What do You understand by lunacy: paranoia, schizophrenia,...?

Shri Mataji: All kinds. All kinds. But not always. You see, schizophrenia has been cured, lunatic personality has been cured, lunatic persons from the lunatic asylum. We have got three, four people from lunatic asylum in India who got cured. Yes, it's possible. Even AIDS. But these AIDS people are extremely aggressive. They think they are martyrs.

So, with this martyrdom, you know, they think no end of themselves. They are very proud that... they think they are fighting a big cause.

So we cured about six people in Australia, one was TM fellow, TM, Transcendental Meditation, two, two of them... Transcendental... two of them. And they told Me that in the beginning in the TM you are not even supposed to talk to your wife.

So they became homosexual. For years. Both of them. Then they got cured, but they fell back on the same habits and after five years they died. Then there was one who got cured, he's nine years now, he's still there. And two were married, a couple who were Catholics, I think,

so they got a fright. I think the priests must have told them to be frightened so they also ran away.

I don't know how they are. It's very difficult people, it's a world movement, you see, they think they're very great soldiers marching towards death. It's a psychological problem, very egoistical and they are not afraid of death they say. Their immune system is in trouble, which is curable through Sahaja Yoga.

It is the... here, sternum bone. Till the age of twelve years, we develop antibodies here and then the whole... they are distributed all over the body.

So, whenever we are frightened, the sternum bone gives like a remote control, gives palpitations.

So behind the sternum bone that guides it we call as the central Heart. If you can cure this central Heart then we can cure so many diseases, say like breast cancer and many others.

Question: What do You think about a research study performed here in Bucharest on various patients to prove that Sahaja Yoga can cure and so to blast the medical world?

Shri Mataji: Ideal. Ideal if you start. We already have a Center of Research in India, in a place called Washi, close to Bombay [Mumbai]. We have... But you can see, it would be good idea if you want.

[UNCLEAR].

Question: Isn't it dangerous to work on children? For instance there are many children sick of AIDS in Romania.

Shri Mataji: No, that's the best thing. Children, it's harmless, absolutely harmless. Best for children! Because they're so innocent you can work very fast.

Question: He's Doctor Damian Nicolae Sandu from Brāila. He is a bit skeptical and he said that “Can't Sahaja Yoga degenerate into a sect and fanaticism?"

Shri Mataji: You see, it depends on...

Some people who become fanatic, I agree, but they are corrected because they lose all vibrations. Very few. They are thrown out, automatically.

The Rector: We can come to an end at our Conference and we thank Mrs. Shri Mataji Who's presented us very short form Her new medical theory. I *[UNCLEAR]* for me it is a bit shocking because it does not come in any way close to my paradigm. But this does not mean anything. We are open and what I admire in Her is Her optimism. Nothing is worse for a doctor than pessimism and to give up in front of illness.

So that I congratulate Her, especially because She introduced this high note of optimism even for diseases that we consider nowadays incurable. Thank you very much.

Another person from the University: Please, allow me, on behalf of the Senate of the University, to give the Diploma of Doctor in Cognitive Sciences to Mrs. Mātājī Nirmalā Devī Srivastava Who made us a great honour to be here today among us. [Applause.] [Before leaving to an unknown gentleman:] How do you do? [The gentleman, an army general and department head of the Central Military Hospital, later on sends a message that

he would like to meet with Shri Mataji. A meeting is arranged for the next morning at 9:00 a.m.]

Contents: 1995-08-02 **Talk to Sahaja Yoga, Evening Program, Sala Constructorul, Bucharest, Romania**

We have had such a nice music from our Romanian Sahaja Yogis. There's some sort of a musical atmosphere in Romania, I think. Because when you all sing also, you sing it in a very melodious tune. Like celestial music, that was sung long time back, I feel has come back to Romania.

They used to say, that the music that was appealing to God was done by gandharwas and I find those gandharwas are in Romania only. If Nābhī Chakra is Black Sea and that in Greece Athena lived, then all this area must have been the area that is described as Heaven in India. And must have been the olden days when people of Romania or of Greece must be singing praise of God. It seems that these great gandharwas are born again in your country. Even people who came from India were surprised at the esthetic and the supreme mastery over all kinds of difficult songs by these musicians. Of course, everywhere people sing now Indian songs with great ease but the melodies that you people produce, is not effective by everyone.

In Turkey we had invited some people from Hyderabad who were singing qawwali. But when they heard these young boys singing so well, they ran away. I asked: “Where are they gone? I can't see them." They said: “They have run away, Mātājī." Because it was too much for them to bear that these boys from Romania who don't

know our language, have mastered these qawwali so well.

I have of course invited them now to India and they are going to go to the Music Academy. Also they are coming to attend the wedding of My granddaughter. You are also... You all are invited also for the wedding. I used to think, India is the only country where the classical music of such a level could be sung.

Because it is quite innocence and also attention which is concentrated. One has to study this music from very childhood. But how these young people have picked it up so fast, I don't know; we may say it is due to Sahaja Yoga. And I don't know whether it is Sahaja Yoga or these prodigies who have taken birth on this land of Romania. Ramana word, in Sanskrit means `those who enjoy the spiritual life.' If Romania has come out of that word I can see clearly how you are enjoying spiritual life.

Moreover you don't understand word by word of this music but the way you are enjoying it's very surprising. We have a very well-known musician in India, Hamzat Ali, who deliberately came to listen to their qawwali. And he was so enamoured. He said: “What have You done to them? Have You completely transformed them?" I told him: “They are transformed, all of them are transformed by their own Kuṇḍalinī.

I've done nothing. Only thing, I think, My love, you see, runs after them." So, this was a very nice time we had together and really it was very successful all the programs. Now, you will be facing new people, who are very good, I felt that way. First thing in Sahaja Yoga is to respect each other and to respect all those who come to

Sahaja Yoga. You know so much about Sahaja Yoga, they don't know, they have come for the first time, so be kind to them. And the second thing you have to do is to really love them. In the program, each one of them got Realisation, very surprising, each one of them. I was amazed really, that not one person did not raised the hand, everyone.

So it is going to be a pressure on you and you must look after them, no doubt. But I'm sure you can do it very well.

Also you must go to other small villages and cities and see that you spread Sahaja Yoga. Now don't worry about Orthodox Church or anybody talking ill about Sahaja Yoga. They have no truth with them.

And they are all fighting among themselves.

So they have to say something against us because they are afraid. One day, they will all come to Sahaja Yoga. May not be the ones who are in charge but those who have been misled by them. From your life, from your behaviour, people will realise that you are really saintly people.

One thing I have to confess. [MISSING.] Moreover, there is a big problem of customs, they don't understand love of Mother. But somehow...

So you know I have to go down to Hungary, to Czechoslovakia and also to Poland and then in Cabella we have Śhrī Kṛiṣhṇa Pūjā. All these countries have not come up to your standards but I'm sure they will be very soon working it out.

So I thank you very much all of you from My heart, for doing so much for Sahaja Yoga and for the whole world. You must know that you have to meditate every night before sleeping and maybe for five minutes in the morning. If you do not meditate then you will not grow in Sahaja Yoga, you will not grow in spirituality. Just for ten minutes you must give some time to yourself.

I'm sure all of you will see how nice it is to meditate and to enjoy the peace and the bliss of the Divine.

So many miracles are happening and also people are becoming very deep and enjoying their spirituality.

They also have developed lots of powers. But you must use these powers. If you don't use these powers you may find that you loose them.

So, you must try to give Realisations to others. But you can't force.

So try to learn how to convince people without forcing.

I bless you all from My heart. If you have any problem you can always write to Me.

Thank you very much.

Contents: 1995-08-19 **Talk to Sahaja Yoga, Evening Program, the day before Śhrī Kṛiṣhṇa Pūjā, Cabella Ligure, Italy**

It was really a surprise to see this combination of two great artists. They come from two different religions as we call them gharanas. That shows that Indian music is such a harmonious thing, built in the oneness, the unity of understanding that, whatever tradition they come in, they can play together so well, support each other and melodies can be mixed up so beautifully. I'm happy that

you understand this music and enjoy it very much. I saw you all absolutely engrossed. There's a saying that when Kṛiṣhṇa used to play his ute, then it's said that *[UNCLEAR* chitra...], everybody was like a picture, eyes were not moving, hands were not moving, nothing, just chitra. Like that I saw today, all of you so much engrossed and I'm so thankful to all of these artists for bringing out the beauty of this great art of music. Now also you can see that it's a combination of east and west because this bansuri, ute, is from the east and the violin is from the west. But the way it combined together shows that there is a harmony even in the instruments, the way we play and the way we manifest the beauty of music.

Music is very important for Sahaja Yoga as you know that, through music the vibrations spread very well and one can go very deep into your own meditation through music. I am very happy that they have taken out a CD now, both of them and we have got those now, those who want to buy can buy from Guido. It's a nice thing, I appreciate, because they are very young, very young people coming up in Sahaja Yoga gives Me such a great hope, that, one day, these artists will rise so much higher and that this music will spread all over the world. It's very important that young people should take to music because the older Johnnies are now practically... none of them are willing to come, even to Cabella I think, it's too far for them. But we have these second generation which is doing so well and learning music even from their mother and father and also from very old artists of India.

It's a very traditional art, no doubt, but it has so much of Eternal Joy that it cannot be called as something of the past or of the present but it is also of the future.

I think you all have appreciated very much and I must thank Americans for organizing this program in their own understanding of the music. America is taking to music now, Indian music also and are coming up into a proper shape I think in rendering something that is extremely spiritual. Though sometimes I find it's very noisy, but somehow or other they are taking to harmony and to a question of rapport with the people who are going to listen. I mean if they are just going to jump and dance and not to listen to the music then how is it music? I can't understand. If you have to just jump to the tune all the time in a particular manner so it cannot be music. Music has to be listened to, otherwise it goes in the skin I think.

It works the other way round.

So, I'm just saying because the American music is now taking over, I think.

Some of the things I heard.....

Contents: 1995-08-20 **Talk to Sahaja Yogis, after Evening Program, early morning before Śhrī Kṛiṣhṇa Pūjā, Cabella Ligure, Italy**

[Last item of the Evening Program was an American video. After it, Dave Dunphy cries at the Holy Feet of Shri Mataji.]

Shri Mataji: I walked with Dave in America and he was crying all the time. I asked him why he was crying. He said, “Mother look at this chaos. How can America be saved.".....

Nothing to worry. I am coming to America and we are going to work it out.

Contents: 1995-08-20 **Śhrī Kṛiṣhṇa Pūjā, You Have to be Festive or False Freedom and America, Cabella Ligure, Italy**

Today we are going to worship Rādhā and Kṛiṣhṇa. It's a very festive feeling because Śhrī Kṛiṣhṇa came on this earth at a time when people had become extremely serious about religion, about spirituality and that made the whole aspect of religion as a joyless achievement.

And that's how people became very serious; also the attention of people was diverted into a kind of a drama, which created aloofness from the society. People became individualistic, secretive and all such people's children also became the same style because a kind of a fear, perhaps, developed among the people who were in pursuit of religion and truth.

Now the family does make a difference and has a big influence on the personality of the people.

So they got it from their parents and then their grandchildren also got the same type of a feeling.

So, for 2,000 years after Śhrī Rāma went away, the whole situation became a very separate pursuit and they would not tell each other what they have found.

They did not tell even their parents what they are seeking, what they wanted. In this secretiveness they got lost and that's how there were lots of false Gurus and false type of paths, were discovered.

Still it was not so bad, but this aloofness made the society look so disintegrated. The collectivity was thus,

even in the family it was not there. The father wouldn't talk to the son, he wouldn't talk to his wife or maybe the wife may not talk to her children. They religiously followed, in India especially, followed the Dharma part. But they went to the right side, I would say. In such an austere manner they followed Gītā without seeing through the lines what was written there.

As I've told you many a times, that when he talked of Karma Yoga, he said that action should become non-action, Akar. How, he said, put everything at the Lotus Feet of Śhrī Kṛiṣhṇa, but that never happened.

You see because, unless and until you get your Self-realisation, you always think you're doing something, you're achieving something and when you start doing like that, then you also start sometimes overpowering others, dominating others. And there is another group that starts thinking that, I'm being aggressed, I'm so much in pain, in trouble.

So there, two types of people developed, one aggressive type and another were the people who were absolutely crying and weeping. In those days, of course after Kṛiṣhṇa, before Kṛiṣhṇa came, all these things were such.

So, Kṛiṣhṇa started talking about the quality of a Sahaja Yogi.

He said that a Sahaja Yogi is a balanced person. For him, happiness and unhappiness has no meaning, whatever he does he feels it's all done by God Almighty, but you have to be a Sahaja Yogi to be that way. Though he described a Sahaja Yogi, there were no Sahaja Yogis at that time. Mostly people were extremely austere, they

went to Himālayas and all the places for seeking truth, what Gītā had told, they followed it.

So, the another thing started was a Bhakti cult. In the Bhakti cult, I mean when they moved in a collective. See they thought we should have a Bhakti of Śhrī Rāma. And in that Bhakti also, they were secretive, they wouldn't tell anybody what they were doing and what was it.

But, Śhrī Kṛiṣhṇa came and he talked about Bhakti , that, he said that, you have to have Bhakti when it is absolutely surrendered to God, Ananya. Means that “you are not the other", you become one and this is what people missed, because they thought Ananya means complete, full, from the heart, it was not so.

So, Śhrī Kṛiṣhṇa was also misunderstood by these people and they went to another extreme with this Ananya Bhakti . You know now a big wave started in Bengal only and people used to run on the street, Hare Rāma, Hare Kṛiṣhṇa and used to do all kinds of things all over without understanding what he said about Bhakti , how to have Bhakti without connection, there is no Bhakti according to him.

So, some people got lost into that kind of a Bhakti , which was not at all meant for your ascent, for your evolution.

But with that, you see also, so many saints who came; they didn't know what to tell people about because they couldn't give them realisation.

So, they said you should remember God. You should remember the name of Śhrī Rām, Śhrī Kṛiṣhṇa and all that. Especially in Maharashtra there were many saints who said that, that try to remember the name of God. But it didn't mean, just remember means, just all the

time to say, Oh, do whatever you like and say “I remember God." So, you see, they also have failed that way, I should say. Because they never understood what sort of human beings they were facing.

Also, the saints became very intimidated by other priests and other people.

So, in that, we have two types of saints where we have people who are talking of `Birahar' means, separation from God. Even Ravindranath was like that to begin with.

And then they start talking about the meeting of God.

So, this another type of saints were the real saints who talked about it, but very few people really showed any interest in becoming that.

They would say, we have regard for this, we respect this, we believe in this, we believe in Śhrī Kṛiṣhṇa.

They used to go to a place called Pandharpur in Maharashtra.

Everywhere you go you will find Śhrī Kṛiṣhṇa's thing all over the country. Especially in Gujarat, because Śhrī Kṛiṣhṇa ruled there, so they are all believers of Śhrī Kṛiṣhṇa.

What he came for was forgotten. He was talking about realisation, he was talking about connection.

So in all these preachings they could not read between the lines and they started doing on their own.

In our, I mean, history, we have horrible things done in the name of Śhrī Kṛiṣhṇa. Not only Hare Rāma, Hare Kṛiṣhṇa, but we have a temple of Śhrī Nath Ji and that temple was created for a deity which was very vibrated,

was the deity of Śhrī Kṛiṣhṇa, when he ran away from the field of battle, Ranchordas.

Now, when he ran away from the field of battle it was because he wanted to deceive one monster and to get him killed.

So, this Ranchordas state was very important because how he tricked this horrible monster and how he managed to take him to a cave where a saint was sleeping and who was given a sort of a boon, that anybody who tries to wake you up, you can open your third eye and kill him.

So, Śhrī Kṛiṣhṇa played a trick, he ran into his cave and this monster also ran after him, running away from the battle field and he put his shawl on top of this saint who was sleeping, so the monster came behind him, he said “so now, you are tired [from] running and sleeping here" and he pulled the shawl and as soon as he pulled the shawl this saint got up and he burnt him. And that's how he killed this rākṣhasa, the devil.

So, the lifestyle of Śhrī Kṛiṣhṇa was very different from that of Rāma. Rāma was the one who accepted everything, he went in the exile and he also spent fourteen years, then he went out in search of his wife and also his children did not accept him much.

Now, the aspect of Śhrī Kṛiṣhṇa's life was very different. First thing, he came to know about human beings that they are very cunning people and if you tell them about God or anything, they will never accept. They will do the way they think about it.

So he said, let us try the other way round.

So, he played a trick with his preaching, that you have to do your Karmas or your actions, which become non-actions, which is an impossible situation and the second one that your devotion should be Ananya, when you are connected.

Now, these two conditions, nobody could fulfil, he knew.

So, they'll go on working on this and at the time of Sahaja Yoga, they'll come round knowing that they have not achieved anything by practicing all those things, whatever Śhrī Kṛiṣhṇa has said.

But his lifestyle was different. When he came as a little boy, he first tried to kill all the monsters who were invading the Gokul, the place where he was living. In a different, different manner he killed Pūtana, who was a horrible woman, she was a rākṣhasi, whom he killed just by sucking her breast because she wanted to poison him with her poison and that's how he did it.

So this shows you see, that the first thing he took to was extreme aggressiveness against all the negative forces that were working, which Rāma did not do. Rāma succumbed to everything, whatever was happening to begin with, later on then he killed Rāvaṇa. But as a child, he was a sweet little child and lots of descriptions are there about him.

So, from very childhood, the attitude of Śhrī Kṛiṣhṇa was more action as far as the negativity's concerned and he killed many Rākshasas until he killed Kamsa.

So, the first part was killing these people. Because they were very aggressive and they were sucking the energy of the people and they were also becoming like a megalomaniac, as you call that, they used to think no

end of themselves, so there, you see, he killed their ego, he killed them, so many of them and then he helped the Pāṇḍavas to establish the truth. To help the people who are truthful, who are for truth. But he could not give them realisation, he didn't give them realisation. Up to a point he brought them to understand that always the truth wins. They call it `Satyamewajyati', truth wins.

This happened at the time when it was very important to show that those negative forces cannot overpower. To show how useless they were, to show how they had been active and have been dominating and everybody had fear but all of them were neutralised by him. That he can kill all these negative forces.

This is one of his styles which is very important for modern times. Now, in America, as you see, there are so many negative forces that have come up. They are in a different form, they are not like monsters. But they are by temperament, are monsters.

The collectivity that he preached through Rasadena and all that, that he brought in his, I should say adolescent age, was also remarkable. That he made people dance together, pray together, to be festive and to know that you are a witness, you are not a slave of religion or of your meditation, but you have to be festive.

And he got this introduction of Holi festivals and many others, like Rakhi bandhan, all these he brought in because he thought this is how the society will be cleansed and also they will have a lot of enjoyment.

So the idea of enjoyment he brought it into the lives of people. In the little childish pranks he used to play on

people just to teach them and make them turn to something that was a very great enjoyment.

Now, his enjoyment was enjoyment of the spirit, the enjoyment, pure enjoyment. You see all these things reflected in the American life today, but in a perverted way. Now, the sense of enjoyment in American life is absolutely perverted, because it is self-destructive. Whatever they take to is self-destructive. You tell them anything they'll say “what's wrong?" Why all these Gurus prospered there because they pampered the ego of Americans and said “it's alright, you can do whatever you like, as long as you give us money." And this suited them very well and they started doing all these things of, a sort of, in a way going into perversion.

Like Rajneesh now. Rajneesh came to America and how people liked him. He had a Rajneesh *[UNCLEAR]* this, that and he established there thousands and thousands of people. But then again Śhrī Kṛiṣhṇa's power worked on him and he was defeated then. Everywhere you find there are so many Gurus like that. They all were defeated, really, by Śhrī Kṛiṣhṇa's power, because he has all the tricks of the trade.

He knows how to make a fool out of them. Just imagine, this Rajneesh was so powerful and an idea came into his head that he can become the lord of that place, or whatever it is and they conspired, but it's over, it's finished. One must know also how much also we have achieved.

Then there was another one, Muktananda and this 16-year-old fellow, so many of them. One by one all of them are finished, I would say that it is Śhrī Kṛiṣhṇa's power

that has worked. Because his lifestyle was, from the very beginning like that was, that to kill all those who were negative. Now, if you see in America, I think, except for one or two leftovers, most of them are finished.

Now, there is one more who will be finished also I'm sure, within no time and you will see that the influence of these people, negative people, will be finished. As a result of that, as a result of all that, what has happened that people have lost faith in anyone. They have no faith in anyone. They think if these people could deceive us like that, take away our money, we have no money even to educate our children, we have sold our houses, so all these things, you see, made them absolutely flabbergasted and they decided not to have anything to do with the Gurus who are coming from India and that goes against us, in a way.

But all of them, you see, what they did, we should find out, is that, to make a very absurd, queer type of organization.

We are not, we are very normal, absolutely normal people. We haven't made any absurd type of religion or absurd type of following or absurd type of meditation like you'll fly in the air and all sorts of things.

But the people of America are not so matured to understand, otherwise they would not have fallen to these horrible Gurus.

So, on one side we have people who are very much affected by these Gurus, on the other side we have people who think that I must be also one of them and on the third aspect is this, that the people are extremely

simple and extremely, I should say immature, they are like children.

So many Americans also told Me they are like children and to approach them you have to say that a Mother's love can only put them right.

Now, as far as I'm concerned, that was the first country, I should say, I visited for any program. In 1971 [1972], I went there.

So you can imagine, we got realisation on this Sahasrāra Day in 1970 and went to America in 1971 [1972] and I gave realisation to people, no doubt, to many, but what I felt was, that they didn't care for deeper things, firstly.

So we lost many Sahaja Yogis like that. Then there were some people who were sick they wanted their treatment that's all, nothing more.

Then came some people who were taken away, I should say, by other bombastic Gurus who told them lots of stories and they claimed so much, so, so many joined them.

Like that it was, I found that the people were absolutely not prepared for Sahaja Yoga. They were seekers, no doubt, no doubt they were seekers and they had that restlessness of a seeker, no doubt. But they were not for Sahaja Yoga, they didn't know what to seek, what to get. That was the part where I felt they were very immature.

So I, after that I didn't go for nine years, because I thought, better to devote your time to something else till these people mature and understand what's wrong with them.

Now, they have been to Gurus and they are lost, there are some who have this restlessness still. I see in many things, the articles they write, sometimes the books they write, that there is this kind of a restlessness, which is very important for Sahaja Yogis.

Most of you have been seekers in your last lives and you had this restlessness within you.

But with this restlessness we didn't know what to do, where to go and with that restlessness some people went even up to Japan, some Australians came up to America and all kinds of things happened.

That restlessness you cannot describe, but these Gurus found a good market so they came down and tried to overpower them.

With this restlessness you see, it was very reasonable, logical, to see that if you go to somebody, Do you get rid of your restlessness or not?, minimum of minimum, but that never happened.

So when it never happened, you see, they thought that this is missing, somebody said, “no you have to have another program or you have to go through another course", this, that.

So they went on falling more and more and more.

At the same time, at the same time, negativity of immorality took place. Though if you read the constitution of America you will be amazed. In very subtle ways it has just supported complete morality.

I mean, I was surprised, there's a law that when you go out of the house you cannot wear funny dresses, when you are in the swimming suit, also that is regulated and

nobody can be absolutely nude, like in Italy, you can find on television such things.

So, you see, the constitution was made with great idea of morality, I mean the whole basis was, people have to become moral. But always if you make any law, human beings have a capacity just to sort of blast it, to say: “Why this law? I don't want anything." And that's how the idea of control started. How can you control? How can you say one should not do like this? Now, the whole this explosion started in the family also and the children started disobeying the parents.

The parents themselves were the same style. Then the children become the same style, now the whole thing started exploding and they thought, there's no freedom.

Those who don't know how to use freedom, should not get any freedom, I think. They must know what is freedom is, those who respect freedom and understand freedom can only be free people.

So in that freedom, with this explosion, they were thrown away and they started taking to lives which are really absolutely absurd, calling it most reasonable, most logical.

So, the people became homosexuals, it's absurd, it's not natural at all, it is absolutely absurd.

But when this idea of freedom exploded in them, then all the bhoots came, took over their freedom.

And it's from the bhoots they got these ideas. And in such a large scale they are taking to it, it's very surprising.

Such a large scale these bhoots are affecting and people are getting into it. As a result of that they started getting all these diseases and all. The worst was, I would say, that at that same moment, the most negative personality from Austria, was Freud. He was a Jew and he was not respected by the people of America's at that time.

So he got hold of some Jews and all that and then he made up this story about the mother and all that. And he's the one who ruined their lives, because as soon as they became free they thought, anybody who writes anything black and white is the bible. They started following this fellow and some others also from France and just it's a sign of complete immaturity, a mature person won't take to this or won't take to that.

I've talked to some Americans, at that time and they were, I mean, they were not Sahaja Yogis, not seekers, I think. They said “we enjoy every part of life, see, we never have any problems, we enjoy everything, we do this, we do that. The enjoyment is important, 100% of our life is full of enjoyment." Now, after that phase, I think this was so when they came to India about 1960's or 50's, they were talking like that. Now, they are talking about all the problems they are facing out of these enjoyments.

They say that 65% people might become schizophrenic, 30% will become lunatic. Means who are left, no more then, I can't understand.

All kinds of statistics you see, you are shocked. How could such a big number of human beings get into trouble of this kind? And the diseases they have is also very funny, that they have most of the diseases of

Mūlādhāra, where the constitution is based on Mūlādhāra.

England has no constitution, no constitution at all, but they believe more in Mūlādhār than the people in America.

So there, because when I was like, you see, a wife of a diplomat and all that, I found such a wretched temperament these ambassadors and all these diplomatic people had. I couldn't believe, how could they be at the helm of affairs and from America, especially you know, they would wink at every woman and they would twitch on their faces and the way they would talk about women was so degrading so demeaning and also women would talk about men. I told you the story of the one who came to England and she wanted to see a pub and she told Me, “Have you visited this particular pub?" I said, “What?" And then her two sons, when she went back... she told Me, “We are very free, we have given all freedom to the children, do what you like." And they were celebrating, these two children, were celebrating their birthday and they had a party with lots of drinks and the whole house got burnt, the children were dead and the parents were dead, She went to see the pub and she had a list of the interesting pubs that there are in England. I mean this interest in the pub itself shows what sort of a personality she was. She had two children, she had a husband, her husband was a very big man of a very high repute and all that and his wife was like that.

He also used to join her, yes, we gave all freedom to our children, we asked them to do what they like, but they must enjoy life.

Now enjoyment at what point? Where do you enjoy? You enjoy in your heart, you can enjoy in your Sahasrāra, but with Mūlādhāra there's no question, because if you go on like this there is no end to it and that has created now tremendous problems in America.

I know, I feel very sorry, that was the first country I went to because I could see that there are lots of seekers, but all of them were not there, some had gone to this Guru, some had gone to that Guru.

And there is one lady, actress, she came to My program and she noted down what I was saying and she used it for her own purpose and she started teaching Sahaja Yoga there. Is beyond Me, how they are also very money oriented. To them, money is success, money is joy, money is everything.

Now, this third quality, from where did it come I can't say but at the time of Śhrī Kṛiṣhṇa, people were very money oriented. In the sense that they used to take their milk to sell, milk and butter and everything, to sell in the Kingdom of Kamsa, who was a devil.

So he used to break their pitchers, so that they did not pay.

But just to make money they would starve their children, but to make money, they used to take this to the monsters because he had lots of armies and things and they needed milk.

So these women would not give milk to their own children, would not give them butter, but would take all that for these horrible people.

So that money orientation you see now, I mean it is like a shadow and a light. If light is Śhrī Kṛiṣhṇa, see what you find in the shadow. It's just the other way around, people behave. He was such a detached person, such a detached person, that he can never commit any wrongs, he could not do any immoral things.

Whatever he did was absolutely moral. Because if you are detached and you are doing something, then nothing touches you. He brought in this idea of Leelā, of this play, the play of the Divine.

Now we see in our lives also how the play of Divine works. The Sahaja Yogis first when they come they are really restless and they go on asking Me a hundred questions or they start also dominating others, doing all kinds of things. But once they get the experience of the Divine power then they start settling down. Now then they see that there are so many coincidences that happen, so many miracles that happen, then they start understanding that there is some power which is looking after us, which is guiding us, which is taking us to the right path.

So, unless and until this happens, that this understanding, even before realisation, if people start getting this realisation that there is a power that is helping us, something beyond what we know, then things will start changing.

Now, we have to work out in America, we have to tell them and we have to tell that, this is the power that is beyond, is wanting to transform you. There is going to be a global transformation, I can see it so clearly now, in every country I go I see this, that it works, it works,

whether it is a Turkish country, or it is Tunisia or if it is Russia, any country I go to, all those people who come, it works, this global transformation, I never thought I'll be able to see it in My lifetime. But has really reached it's highest, I would say I think so, is the highest point of development.

So you are all transformed, this was predicted, long time back in India and also I must say, it must have [been] predicted somewhere else also. Now when you start feeling the vibrations and you start using it, then you understand that there is this power, it works, now then you start seeing energy centers of Swayambhū's and all that, then you start understanding this. Goes on, your understanding increasing.

But first thing is that they have to believe that there is a power beyond. They may not believe in Kuṇḍalinī, it doesn't matter, but once you know that there is a power beyond then they'll try to work it out.

And this is what is very, very difficult to convince people, that there is a power behind. Because they are so conditioned by Science, also by their family traditions, also all nonsensical ideas about ego, that they cannot see, that's the point is, that the nature is helping.

Now, why America is such a rich country, why? They never ask such a question, Why is it so rich? What have they done? What are their Puṇyas? Now, one of the reasons is that Śhrī Kṛiṣhṇa is Kubera. He's doing his job, I should say, he's working it out. But people not understanding that this is a Divine blessing they think that this is their right to have it and they boast about it, they are very boastful people, they talk about their own

wealth, they'll talk about everything, it's a very different situation and a culture.

For an Indian, if somebody starts boasting about his wealth, they would think he must be mad coming from a lunatic asylum because it is regarded as bad manners.

So there is nothing like bad manners, you see, in the west as it is, but the worst is in America.

I mean they can abuse their father with a very dirty word, all the time they are using, even the judges.

I saw one film in which a judge used a dirty word, I did not know much of that meaning, but it was not a good word that he used.

So they become sort of, what's wrong, type of people, with this arrogance I don't know how we are going to convince them about Sahaja Yoga. I'm going to try also something like approaching these top class people to talk to them about it. Maybe, you see, they might feel influenced that these top class people have taken to it, so there must be something about Sahaja Yoga.

I wonder if they would talk about us so much, what is Sahaja Yoga is, what it can do to this country.

Because we have to save, really save this country. It is from all the sides, is under attack, from all the sides. You take morality part, it is under attack, you take from the artist's point of view, it is under attack.

They are not creating many artists there, I went to see their paintings there, their latest paintings with modern painting and all that, they haven't got the depth at all. It's all full of filthy things about it and they talk about absolutely filthy things. There is one artist from India, he

went to America and when I saw his paintings I was surprised. I said “What are you doing?", he said “This is what sells here." I said “And what about India?", he said “No, no, they will never touch it, it's horrible." He himself knows, but he said this will sell here, so he has made it like that. It's a point of judgement, whether you think it is worth selling or not is the point.

Now whom do you sell to these people who are not mature enough, who are so much enticed by the Mūlādhāra problem, how can you help them? How can you bring them around? It is a question of people maturing for which of course this Param-Chaitanya will help, I am sure, the way yesterday you felt it, I'm sure, Param-Chaitanya has to do something about it, it has to work it out, it has to enter into different dimensions in human beings to understand.

Like creating coincidences and all that and then bringing them down to Sahaja Yoga.

Can work out, no doubt. Also Sahaja Yogis must work there, I know they are very few and that's why they were upset about it because they were really working very hard and it didn't work out there so they feel that there is something basically wrong.

I have told you already what is wrong with them, is this, that they lack maturity as far as evolution is concerned. Even those who have come now to Sahaja Yoga have done very well. There are, of course, some who I would say not yet so much of it.

So what you have to do is to get to reality, to know what's the problem is really and what we can do about it.

Now, so many European leaders, or we can say European Sahaja Yogis are free because I am not going there to Europe, so they should take charge also and can go sometimes and have some sort of a program, conference, whatever you want and get in contact with them and talk to them in such a manner that they do feel that this is something very remarkable.

Something very much what they wanted, something that is the future of the whole world.

So this global transformation is taking place and you have to talk on those lines little strongly.

But with media we had very bad experiences because we arranged a hall and we spent a lot of money there and not one person came from media, not one.

So we did not know what to do, we had prepared so much food, everything and everything was wasted, not one person from the media came.

So also we can start a kind of a newspaper, could be, could be some sort of a media of having cable TV or something like that by which we can propagate Sahaja Yoga and tell them what good it has done and what it can do.

It's quite a mad place because they have so many books, everything is so much, every number is so much, that if you write a book also I do not know where it will be lost.

Now for today, I have to announce that My book is ready now, I have done it and I would like to publish it now so that it will be available to you and I'm sure you will enjoy it. Not only that but it will help you to understand the problems of the west. I have not dealt in that the

problems of the east but I have dealt in that with the problems of the west, what problems they have and how to tackle them.

So this book they will be bringing now and showing you. We'll see how it is published and how people like it, that part I will do.

I would say I would not have liked to write a book like that, to be very frank, because for a person like Me I should only write all the splendor of spirituality, all the beauty of heavens, everything, all poetic things, but I thought reality is very different and people must be told what is the reality.

So, I have ventured to write this, otherwise I would have liked to write something like Amṛutananya written by Dyaneshwara, but there's no controversy, nothing, just sweetness and just overflowing compassion, I would have been very happy, but that doesn't work out you see, it will float in the air I think.

So I thought first I must write this book and point out where are we wrong and to make you aware of it.

Then what we can do is to have another book, I could have, with all My experiences with Sahaja Yogis and Sahaja Yoga. It would be another interesting thing.

One of the defects of these incarnations that they never wrote a book themselves. You see Christ never wrote any book, Kṛiṣhṇa never wrote any book, Rāma never wrote any book. They knew how to read and write but they never wrote. And then we have people; like Nanaka, who has written, not himself so much as he has compiled all the great literature of the realised Souls. Alright, then still what happens is something that they just read it word by

word then they have to finish it in 2½ days the whole thing.

So one person reads it puts the finger at one point, finished, then another one comes, starts from there, puts the finger here, it is finished. Nothing goes in the head, you see that's the problem is.

Same with Mohammed Sahib, he never wrote the book. If he had himself written the book it would have been very different but somebody else in the 5th calipher [caliph], who was a very cruel and a bad man, who wrote it. The same thing has happened with bible.

So you see it's like such a great diamond is put in the mud and everywhere there are complications because of this. You cannot blame these great people, but only thing that is happening is all bad name is coming to them.

They are not the ones who wrote anything wrong, they are not the ones who would say anything wrong, but if the book falls into the hands of some people who are absolutely adharmic, who are cruel, then this is what happens.

Now, you see what's happening with Catholic Church, you see what's happening with Moslems. Everywhere you find there is violence, there's corruption and there's fighting, this is no religion, nobody could have preached that thing, but it is doing that way.

So now you all stand out, out of all this where you love each other, you care for each other, you enjoy everything, despite that, your enjoyment is absolutely pure. And this is what is to be seen by others and it can work out.

I'm sure, one day in America, we will be there very successful.

May God bless you.

Contents: 1995-08-23 **Talk to Custom Officers, Customs, Airport, Rio de Janeiro, Brazil**

[The chief manger of customs, who had not been very cooperative prior to Shri Mataji's arrival, changed miraculously when Shri Mataji arrived. He surprised everyone by asking Shri Mataji to sit down and tell them about spirituality. They said they were deeply needing some spiritual light. For about half an hour Shri Mataji spoke to about twenty customs officers an after asking them to take off their shoes, gave them Self-realisation. A lady was in tears after receiving Self-realisation. Shri Mataji hugged her and said:] This is what happens when you meet your Mother.

Contents: 1995-09-10 **Śhrī Gaṇeśha Pūjā, You Must Project Your Energy of Innocence, Cabella Ligure, Italy**

With all the Gan.

apatis sitting around Me and you all the ganas sitting in front of Me, I don't know what to say. It's remarkable, very remarkable because most of you come from a culture, which has never shown any respect of Śhrī Gaṇeśh. They never realised how important it was that, without Śhrī Gaṇeśha's qualities, we cannot achieve anything in our life. The idea of every day, moment-to-moment enjoyment has destroyed them. And also the desire to know the Divine vanishes also in thin air

because you get lost into this moment-to-moment enjoyment till you get destructive, completely destroyed. But I really don't understand how you have achieved this state where you see the purity is so important to life that Gaṇeśha's qualities, His value system and His innocence to be imbibed.

I feel very gratified that such a thing has happened now in your lives and you all are so much in place for Śhrī Gaṇeśha. Śhrī Gaṇeśha is there from our childhood. Yesterday you saw the children, how they were so beautiful and entertained us the most. Everybody had a smile on their face and I said, “Don't laugh because if you laugh they feel a little offended and they think that you are laughing at them." The enjoyment that we had from that drama of children was more than what one would expect from adults doing that kind of a drama just to entertain us. It might be some sort of a very subtle joy of Śhrī Gaṇeśha that made us so happy. We all have Śhrī Gaṇeśh settled very nicely within ourselves and in you awakened, awakened in such a manner that in your free will also you do not want to do things that will go against Śhrī Gaṇeśha. His manifestation within you is so evident. You see your faces. They are so beautifully shining, so very different from other people.

One day I was travelling from London and there was one Indian lady who came to see Me and she said, “I was surprised to see your disciples. Their faces were shining with such light. I've never seen any disciples like that." I asked her, “Who are you?" She said, “I'm married in Guru Nanak's family and all the people in his family are just the opposite to what Śhrī Guru Nanak was." So I said,

“Because they worship Śhrī Gaṇeśha." So she said that “In our family nobody worships Śhrī Gaṇeśh." I said, “It cannot be possible? How is it?" They believe in the *[UNCLEAR]*, the formless God of Chaitanya. I said, “But who is the source of that Chaitanya? Why don't they find out who is the source?" So they said that Nanaka has only talked up to this point. He's not talked about the source. I said, “Better find out. Because in this book maybe some things have been taken away." And then somebody gave me a passage [Japuji 30 from Guru Granth Saheb] where He [Śhrī Guru Nanaka] had described the innocence, the Deity of Śhrī Gaṇeśha also. He had described that the whole creation was done by the Mother and not by the Father. It's very surprising because *[UNCLEAR]* is for people, who don't believe in the forms of God, always talk of Father, not of the Mother. It is true also about Christianity, also about Islam, also about the Jews. All of them, they talk of the Father and not of the Mother, nor about Śhrī Gaṇeśh. It seems in the ancient times they believed in the Child God, even in China, even in Greece and also in many other countries who were supposed to be primitive. But they all believed in the Child God.

So now, when we deal with our children, we should know that they are just like Śhrī Gaṇeśh. They are very innocent, very simple. Except in cases sometimes, they're affected by some things and they lose their moorings. But Śhrī Gaṇeśha's greatest contribution to Sahaja Yoga is that He makes you feel My vibrations. He makes you feel the beauty of purity and simplicity, only possible if Śhrī Gaṇeśha is awakened within you. Also the Kuṇḍalinī won't rise without the sanction of this

chancellor. He's the one sitting on Mūlādhāra. But you should know He's on every Chakra. Innocence cures all the maladies, physical, mental, emotional, specially the spiritual. But Śhrī Gaṇeśha's qualities, the most important is that He believes in emitting vibrations. He believes in projecting His vibrations to everyone. That is the quality now I feel all of you, as Sahaja Yogis, can use. You got your Realisation without any effort I should say. It was Sahaj.

The life before Self-realisation was different. You got your transformation and you have jumped into the new era of, as I say, of Meta Science. But here now we have to see whatever we have got, what are we to do with it? You, of course know, that you have to give realisations to others. You have to cure people, you have to love them and you have to be compassionate. But apart from that, now the deliberations about yourself have to start. That is through Śhrī Gaṇeśha's powers that are within you. You should see that you can emit your powers your energy to others. You can project it to others.

Now, for example. If somebody comes to you, meets you, if you know how to deliberately project your energy. This is a new type of meditation you have to practice, that to emit your energy, project your energy to others. You don't have to say anything, you don't have to talk, but just feel deliberately, again I say deliberately. It's not Sahaj. It's not spontaneous. This is what you have to practice, is to emit your energy of your innocence of Śhrī Gaṇeśha to others.

So when they see you their innocence would be awakened.

Now, for example, say we had some problems in London and Sahaj Yogis told Me, “Mother, there are still, you know, some men are looking at us." And some said that “There are many women who are looking at us." It was a mutual sort of a thing going on. I said, “You can project your energy in such a manner that that projection will stop all that kind of stupid behaviour of other people and also make them understand, respect you and feel your dignity." Not very difficult.

But on the contrary, as the culture is to attract men and attract women, it will diminish. The energy will diminish. When you feel your own dignity and serenity and that you are now Self-realised people, you are not ordinary people, a kind of majestic personality develops within you. That majestic personality really can have a tremendous effect on the surrounding people. Tremendous. It's a kind of a deliberate projection you should start. I don't know that side, that how to project it or how to deliberately do this.

It's just spontaneous with Me. It just happens. But you can achieve it yourself with a little practice. Try to face such people with not disdain or contempt, but just your majestic personality. This personality, see, is here, now you see, just sitting in such a majestic manner and is also giving the vibrations to others.

The whole figure is doing something suddenly to people. To expect that the whole world will change spontaneously, is I don't think is all right because you know the world is so chaotic, full of so much chaos, so much ego, so much conditioning. But something within you can rise above others with your sense of dignity, with

your complete Selfhood. Where you stand with yourself, you're not to be rude; you're not to be egoistical. You need not say things if you don't want to say anything. Just that silent personality can emit such beautiful vibrations, which you have. You have stored up a lot of vibrations within yourself and this storing is showing on your faces, which I said are shining. But the innocence that you have, you have to be proud of it, very much proud of it. Even now sometimes you feel that people will say you're not properly dressed up or maybe you are ugly looking or all kinds of things that they expect the other person to be.

It's a funny thing that in this world all human beings expect others to be very good. Everybody should be a hero or something. Whatever themselves never think.

So now you have become heroes in the sense that spiritually you are much higher than all of them.

So this projection, when it starts, I'm saying again deliberate, then you should not be afraid that I will develop my ego, should not be afraid that I'll get some conditionings, but just, in the way, with the understanding that you have these powers within you beautifully expressing themselves as a child does. You see, these just one child, it can entertain at least hundred people. What is so sweet about the child is? The innocence, the way he speaks, the way he talks the way he behaves, the way he expresses his love. It's so simple, but it has something in the essence, this innocence of Śhrī Gaṇeśha.

Anywhere there's a question of children, the whole world get worried about it. The whole world wants to solve the

problem. If a child is in trouble anywhere, all over the world it will be circulated that such and such a thing is happening to such a child and everybody will be worried. If they see a child anywhere, the faces change, you see, the faces change, the expression changes automatically because that child is emitting that innocence without any deliberations, without any special way of doing it, but just spontaneous. But then you grow, you start growing, growing with others who are also not innocent. You have to meet them.

You cannot run away from the society. You start getting all the rapport with such people who are talking about things, actually, those who are criticising Śhrī Gaṇeśha.

Gradually, your innocence starts dying out and you feel sometimes inferior to all those who are supposed to be very great warriors against innocence in the sense that, when I was in London I saw they all used to laugh at Me because I had this kumkum. But I used to think they don't know why I'm wearing it.

So ignorant they are, very ignorant people that they don't know in India all the married women have to wear this. Even the Muslims wear that. They also wear mangal sutra.

So I said that this is just written down on My head that I am a married woman, is just to tell people don't bother Me. I've got My husband behind Me and he can take you to task.

This kind of ignorance is so much in the West and still they think they are a higher race, they are greater people. They don't know even small, small things about life. For the innocence, I think they have lost any

knowledge about it long time back. And that's how it is in society today, which is absolutely lost, its own moorings. Every individual is suppressed, every individual is doing something and they don't know each other. Without innocence you cannot have a rapport with other people. Because that means you have some sort of a lust or greed behind the whole thing.

So much so now, it's become so boring the whole thing that even once I told this Sahaj Yogi that, if you are going there, there's a family and they have a daughter, so just give this present to her. Simple thing. Now this yogi was quite an elderly person, not a young boy. He said, “Mother, I'd better not go." I said, “Why?" “Because they will misunderstand." “What will they misunderstand?" “Why am I giving a present to this girl?" But I said, “I am giving.

What is the harm?" No. That's the psychology. He was himself a psychologist. That's the psychology.

So “I cannot take this present for that girl." I mean, for Indians, you know, you don't understand this kind of a fear. But then I noticed this too much, that they don't want to be with any woman. They don't want to be alone with any woman. And they said Mother, “You don't know these women. They will make a rape case out of this." “But how?" “They do." So the whole idea is to challenge the innocence of them. For that, I must say, they made this Freud into a god because of his writings. I don't know how they accept also such writing can't understand how they accept because I think they have no idea as to what they are.

Somebody asked Me about Freud, then what did he say? Why are people so much against him? Why are they so? I said, “He said that there's a bad relationship between the mother and the son." He just jumped. “He said so? My goodness. Thank God he never came to India, otherwise we would have cut him into pieces and put them in the Indian Sea." I said, “But why spoil the purity of Indian Sea also?" He was so annoyed and angry, he said, “How could they tolerate such a nonsense? How could they accept such nonsense against the mother? They have no purity?" I said, “That's the trouble with them." Now the trouble is that the brain developed too much. Ego developed too much and any such stupid idea, it's much worse than stupid, was accepted. And that is how I find it's so boring. Every time anywhere you go it's nothing but this sex business. It's too much. I can't understand how people go on tolerating. It's all right, at the most, in some adult films you might show some sometimes, but every time you see something you find suddenly this kind of nonsensical scene is coming, this bedroom scene and people like it. They pay for it. They want to have all aspects of it. It is such a natural thing. What is there to talk about it all the time? I don't understand. It's only the development of the brain of such a manner that every kind of nonsense it wants to accept. “So what? What's wrong?" You're all mad. That's what. You go to lunatic asylum. Lunatics also talk like that. “So what's wrong?" Same way. Because they have such acceptance, they don't know how much people have ruined their family life, their children's life. In every way, we find that the

whole society is full of this nonsense and specially in the television.

Italy specially. I mean, certain buttons you should not press. You should be very careful, otherwise you don't know what you face and you go for vomiting. You see, as Indians, first reaction is to vomit. But for people who have not yet realised the value of this innocence can be easily taken up by this kind of nonsense that's going on. Whatever it is, through the blessings of Śhrī Gaṇeśha, you are all transformed.

You are on a different line.

Yesterday these two musicians were surprised how you were praising Gaṇeśha. They couldn't believe it. How could you praise Śhrī Gaṇeśh because you haven't even heard the name of Śhrī Gaṇeśha before? I said, “They see what Śhrī Gaṇeśha has done to them, how He has made their attention so beautiful that they enjoy all the beautiful things of the world, all the innocent things of the world." And there are many people like that, I can tell you, who are struggling. Not that all the society has accepted this nonsense.

There are many who are struggling because I know in England they published a book about what children have to say about the politicians, very sweet, sweet things, very sweet. And those books were published were five thousand books because if you publish five thousand, you get it cheaper or something like that.

And in one day all the books were sold out. In one day. That shows that there are so many people still who are respecting their innocence and they want to be innocent and they want to enjoy it. But a society has to be created

of that now. For that, you must have a kind of a personality.

You know that I was in London and once I went to Greece. And the minister's wives also came to meet Me. I was surprised. Normally they don't go.

So they said, “You see, our husbands told us if you want to see serenity personified, then you must see Mrs. Srivastava." I was surprised and pleased they're talking of serenity. In these modern times anybody talking about purity. I just couldn't understand, but I felt at the back of their mind the tradition. Whatever it is, these men could see that simple thing in Me and they went and told them. And they all enjoyed My company very much. I was making them laugh and telling them things and all that. And one of them turned around and said, “Mrs. Srivastava, you're just like a child." “I said, “Really?" “No, we enjoyed your company so much." And when I was coming, they were in tears.

So what I'm saying that whatever innocent personality you have, you have to project that, to project towards others. Say, somebody trying to be funny with you. Just with one glance you can put that person right. “I don't like it." Just to say you don't like it, in a way that's a projection. Around your society, around where you are working, you'll also find people who have no sense of innocence. And it's disgusting to be with them. But as you have powers, you must use. Is to project. I see with Sahaja Yogis, they don't even cure people. They'll tell Me, “Mother, he is to be cured. That is to be done." But you are so many, why do you need Me to do that now? You all can cure a patient. You can help the patient. Why can't

you do it? What is the need for Me to do it? You have those qualities within you because potentially you had them before and now they're enlightened through the grace of Śhrī Gaṇeśha.

Now, what you have to do is to assert. In that, of course, you must remember not to use your ego. Not to use your mind.

So somebody would say that “Mother, without mind how can you impress others? How can you have a rapport with others?" Very simple. Just go thoughtless. Once you are thoughtless, you are in the realm of the Divine. And then the Divine takes charge. And it will start emitting such beautiful vibrations that you'll be amazed at yourself, how things are working out. It is not a coincidence we should say.

Like once I was going somewhere and they told Me to be very careful. I said, “Why?" “Because in the night, you see, these Nasikites *[UNCLEAR]* are here and they might just kill you." I said, “It's all right." He said, “No, it's very late. You be careful." So, the gentleman with Me was very much worried. He said, “You take out your ornaments, everything." He put them under the seat and did all.

So, as soon as we reached that place where many Naksalites *[UNCLEAR]* were standing with their lanterns and with their sticks, so I told the driver, “But for one minute you stop the car." He said, “I will not. I won't stop." I looked at them and I don't know what happened. They just moved on. I said, “Now speed up the car." You see, it is the power that you have. Unless and until you use this power of love and compassion, you will not know what

you have got yet. And that comes from your Śhrī Gaṇeśh. You see, how children understand love. If you're nice to them, how they react. Maybe sometimes they do not, but ninety-nine percent children I have seen, they really react to love.

In our school in Dharamsala, there were two children and they were very troublesome to begin with and the parents were very worried about them. They sent them to Dharamsala and otherwise they were very demanding, as the modern children are. “You buy this. You buy that. Go here. We want MacDonald." This that was going on. When they went to the school for one year, they came back and the parents asked them, “Now, what do you want?" They said, “We don't want anything." “You don't want anything? Want to go to McDonald?" They were Americaṇ”No, no, we don't want to go to McDonald. We want to sit here and watch Mother's videos." They said this. Suddenly, what has happened to them? They were so troublesome. Why are they now so much changed? What's the matter with them? So then they said, “What about food? Whatever you cook, we'll eat. We are not bothered." They were amazed how these children had changed. But then they said, “We must go out somewhere. We must see the river. We must see the mountain." “All right, that we'll do." Then again they came home. No demands, nothing. They didn't want to go for any shopping or asking for any shirts or blouse or nothing. Very much satisfied, dignified.

So they said, “What's the matter with you? You don't want anything?" “No we want something but we don't know how to tell you." “What is it? “Because you don't

have that. You can't get it in the market." “Well, what is it?" They said, “Can you get us a pendant of Shri Mataji?" So sweetly, you know, they said. That's all. But they said, “You don't have?" “No, we don't have any.

So you just get us the pendant of Shri Mataji, that's all." I mean so deep expression. You don't want anything else. I mean, I know the children, I've met them, but I've not been with them for a long time, I've never been so close to them, nothing, but look at the love that they have. And they were telling Me in the school in the beginning that anybody was to trouble us, we said, “Now we are going to inform Shri Mataji." “No, no, no, don't inform Her." “Why?" “Because She will not love me any more." Can you imagine? The value of My love is so much understood by these little, little children and so much they admire, they want it. It has no material gain by that. Nothing. All this really shows that Christ has here said it, that you have to be like small children to enter into the Kingdom of God. Without that, you cannot enjoy anything. Like yesterday's program was really, I must say, these Swiss have worked very hard. They're very hard working I know, but not to this extent that they started singing Indian music so well in such a combination. And we enjoyed all that very much. Now imagine these Swiss, you see, who are overactive, always working, I don't know. They have no time to think about creating something innocent, creating something sweet of this kind. And the way they did it, I mean, shows, really, that they love Śhrī Gaṇeśha and they understand the value of Śhrī Gaṇeśha's manifestation in them. I was really surprised how they could learn all this Indian music

and so many sitting together and singing that song. And there were some Indians, I said, “Can you sing like this?" They said, “No." I said, “Look at these Swiss." This is the power of Śhrī Gaṇeśha's love. Because they were to celebrate Śhrī Gaṇeśha's birthday, so they got equipped from within. But if they had not projected it, there would have been nothing.

So whatever He is giving you, whatever He is creating in you, this beautiful innocence, this beautiful fragrance of your living every moment, when you are enjoying also know that we have to give it to others. We have to pour this into others. By this, it will work out. I know it will work out. It is so tremendous. His powers are so tremendous.

Yesterday you saw that in the children's program that nobody could beat him, even Shiva, anyone.

And Shiva had to cut His head because He didn't know how to overpower Him otherwise. This is what we have to understand, that if you are innocent, nobody can cheat us, nobody can trouble us. Because in innocence you become a person who doesn't care for what is happening to you. You become a person who tolerates everything thinking these are, you don't even think. You feel they are something, stupid people, that's all.

It is a story about a King in China, as I'm going to China. There was a king in China. They're very wise people, I must say Chinese are extremely wise. And he decided to win a, what you call cocks' fight.

It's a cocks' fight. Imagine the King thinking like that, but it's all child's play.

So he went to one great saint and told him that “How will you train a cock to fight the other cocks?" Said leave the cock with him.

Left the cock and he trained him very well because when the king arrived after one month before the fight, he said, “See now, take this cock as you've done." He said, “This one, this one is not doing anything, just standing straight. He's a *[UNCLEAR]*. That's it. You take him." So he took that cock and put him in that contest.

So all the cocks were together. They started troubling this cock, which was just standing like this as “Some stupid people are trying to trouble me." He wouldn't touch them. He wouldn't react, nothing of the kind. He was just standing straight.

So all the cocks were surprised that this one is not protesting. He's just bearing up everything and he's not bothered as to what we are doing. One by one all the cocks disappeared from the field where they were having these fights. And this was the only cock, which stood up.

So the king was surprised. He took him to the saint and he said, “This one has become a saint now.

So it's better you keep it with you." He's such a saint that they were all trying to trouble him and he was least bothered. He was looking like this, left side, right side, both sides, thought, “What's going on with these people? Why are they behaving like this?" So this is what I have to tell you, that your personality itself is made like that and now you worship Him so much He's within you. And any kind of problems that you have will be really solved very easily if you take to your innocence. And that will create coincidences, as they call it. But I would say it's

not coincidence. It's the vibrations, that you'll be amazed how things are solved. They'll say, “Mother this had happened, that had happened." Now see, the other day, it rained so much. It rained so much so that they said, “It has become knee-deep mud here and Mother what are we to do?" I said, “It's all right. Leave it to Him." Next day it was very hot. Imagine underneath these things, the whole thing got dried out and today you are here for the Pūjā. It's an impossible thing that there could be such a change in the weather that one day it rains so heavily and second day the whole thing gets absolutely dried out. It's His work because He's so much powerful.

You have come to worship Him, so first of all cleansing has to be done. And He did the cleansing by putting the rain. Here is so heavy rains and some of the part of the rains which came here, this Palazzo Dorio [Doria], they turned into ice, I don't know what the English word is.

So they all started and the whole thing went round the house, you see. They were all forming into little, little ice balls, falling nearby.

Now it is something unbelievable that all over it has just rained. Only near our house it is the ice balls are. We can call it miracles. We can call it anything, but it is Śhrī Gaṇeśha's, we should say, sensitivity that thought that `Now this rain is going near my Mother's house, so let us make some sort of a beautiful ice balls.' And I went out and I saw and I was amazed how it was all around My house. There were ice balls.

What He can do, what he's capable is absolutely unbelievable. How He guides you and how He helps you. How He takes you to the right path. Not only that, how

He protects you. All the time He's with you because you have become His ganas now. You are His ganas, so He protects you, looks after you, gives you all the guidance. He takes you to the right path. He takes you to the righteous road. He gives you all that is Dharmic to enjoy. You always meet friends here and there. You think it's a coincidence. It is not. And that is how He works. He works with all His beautiful, sweet, loving attention on you because you are His ganas. But the ganas have to work. As I say that in our body there are ganas and they fight the disease. They fight the problems that are in the body, those antibodies which are the ganas of Śhrī Gaṇeśha. In the same way, you are also His ganas. He does all this for you. He protects you, loves you.

He gives you all the good time. Then what are we doing about it? It should not be one-sided. When He does all this for you, then what should we do about Śhrī Gaṇeśh? What can we do as antibodies? You don't have to fight the enemies with a sword or any kind of a weapon. The enemies you can conquer by two simple methods. One is try your love, your pure love on them. Try that. You may melt away many people. Or else, if that is not working, then what you should do is sit down and meditate and give bandhans. There are ways of giving bandhans. The bandhan works so fast and so beautifully that you are amazed how it has worked. Because you are so powerful. The way you give bandhans, anybody else can give, it is not going to work. It's only you, the Sahaj Yogis, can give bandhan. There are different types of bandhans you have to give. And all that works out so well, so we have to have now faith in our own powers and we have to know

that we are now empowered by Śhrī Gaṇeśha to do the work of Sahaja Yoga.

To do the work of Sahaja Yoga is not to feel that you are doing it, but is Śhrī Gaṇeśh who is doing it. You'll be surprised giving realisations to people is the greatest joy Sahaja Yogis can have. And then you don't have to think that you have done it. Then is the best. But if you think you have done it, then “I'm very tired" or “I have done this." Many people come and tell Me, “Mother, we have done this, we have done that." That means they are just feeling the strain of doing any work. But you are not to feel any strain. His powers are within you. You can see it. Believe Me. Believe in yourself. Have confidence in yourself, confidence and faith in yourself. And that, you are a storehouse of innocence, which is nothing but compassion and love.

If you have that faith, you definitely develop a beautiful way of talking to others, of having relationships with others. It is something that is really a gift of Śhrī Gaṇeśh. I don't think I every shouted at anyone.

Even on My children, I've never shouted. Never. I've never got into a fury or a temper because I think I can manage without it. Of course, I have to correct, I have to tell people, but one thing I've seen that everybody has been afraid of one thing, that somehow I should never drive out somebody from Sahaja Yoga because Sahaja Yoga is such a joy. It is such an energy-giving thing. It is such a light that you feel absolutely confident about yourself.

So to ask you to leave Sahaja Yoga is the greatest punishment because you can't leave Me now. It's

difficult. You just can't leave. Is impossible. And that is what it is that you also develop those qualities that you can't leave.

See, a child, if it is lost, I mean, the parents just go off. They don't know how the child is. But supposing, some son of theirs is a very bad boy, is misbehaving, is doing all kinds of wrong things, they don't mind, but when they are young, they're innocent. It's some sort of a tremendous attachment to them and understanding that they're our children, we have to look after them.

So this innocence that attracts you, that keeps you wondering about your children, about other children and I was very happy the way you gave a present to Guido because he's doing a very difficult task, I must say. And this appreciation shows that to you it's very valuable that your children are looked after.

But you are also a child of your Mother. As a result, you have all these powers within yourself. But you must know how to smile. You must know how to win over people.

Still there are some Sahaj Yogis and some Sahaj Yoginis who are still rather stiff. I find them little stiff type and they can't give up their stifiness. Maybe they think no end of themselves or whatever it is.

Then they will not enjoy Sahaja Yoga. Of course, mentally of course they understand Sahaj Yog and all that, but they cannot enjoy fully Sahaja Yoga and all its mirth, its joyous moments.

Today's to celebrate His birth and He was the first God that was created on this Earth because he's also auspiciousness. He's also Holiness, so the Primordial Mother didn't want to create this world without first

creating the holiness, the auspiciousness, the purity. And that's why he was first created. Created on this Earth with vibrations, just bundled up now, vibrations, so that He can look after all the people who are going to come from ages to ages to guide them always on the right path.

So He is supposed to be in charge of our conscience, the conscience that eats you up sometimes, that says, “This is not all right, this I should not have done, that I should have not done." But one should try to take very great pride in it, like there was one gentleman, an Indian, Indians can be exceptionally innocent sometimes, exceptionally, you can't understand them, so I told him, “Why did you give up your land?" He said, “Mother, I thought that later on, when my children will grow, I might become greedy and I may not give this land to my brother, who deserves it because I'm too clever, I can cheat you.

So I thought it's better to give up.

So I gave up the land to my brother." He's so innocently was telling Me that I should not become greedy because “maybe that my children will grow up and I will feel that I must give all this to my children, so I decided to give up the land just now to my own brother." But I said, “What about your brother?" He said, “He deserves. He needs. I don't need so much land. I'm doing very well in life.

That's why I've given." But legally, legally said, it was not in his name, but I thought it's better that I give it to him now. Later on I might become a bad man.

So the innocence works out in such a manner.

Very sweet, sweet stories I've got to tell you. There's one Sahaj Yogi was a little boy, say about sixteen years. He came to Me and he said, “My mother has some badhas and the father, too I don't know what to do. Now supposing I leave my father and mother, then will the badhas also leave me?" I said, “Maybe, may not be, depends on." “Then what is the need for people to leave their parents when they're eighteen years of age? Why do people leave their parents at the eighteen years of age? Because, you see, it will be a big loss." I said, “Why?" “Firstly, you know, that if I start smoking, who will stop me?" Such an innocent. “If I start smoking, only my father can slap me on the face, nobody else.

So he can save me from the smoking." I was amazed at his innocence, the way he was saying that “I want my father to be there to slap me." You see and then he said, “And then my mother, she's the one who corrects me every point.

So if she goes away, if I'm not with her, who will correct me? Who will tell me don't do this and don't do that?" I've never understood that look at this boy of sixteen years, he's an Indian, he's telling Me that his parents' utility is that they are the only people who can stop him from doing wrong things because he was born realised and you can see that, “if I try to do something wrong only my parents can tell me." So this innocence always seeks virtuous life, this better life and it doesn't sort of assert on others, but it somehow or other, even if there is innocence, just like you people are now Self-realised people. In the light of your Self, you don't want to do something that is not innocent, that is not simple. For

example, I've never seen such honest people as we have in Sahaja Yoga. Absolutely honest, I mean, they don't want to take even a single pi out of things. Of course, there have been some horrible people also who made lots of money out of Sahaj Yog, doesn't matter, but most of you have become so honest. I mean there's so much corruption in this world and to see people who are so honest.

Now the greatest quality, as you know, of Śhrī Gaṇeśha's was told yesterday, that for them their Mother is the most important. What Mother says and what Mother does, that's the most important. I mean, it is so much that I really can't understand how you people [are] so much fond of Me. Because I think that, whatever you think about Me, mentally, is nothing compared to what you have within yourself. And that is Śhrī Gaṇeśha's, again, the quality because He's so attached to Me that he will fight his father, he'll fight everybody. That's what you are. Anything against Me, you cannot tolerate. Anything wrong said against Me, you cannot follow. I've seen people getting furious if somebody said a word against Me.

So this quality of love for Me is coming from Śhrī Gaṇeśha within you. But another quality, as I said, that He makes the ganas work and so you have to work it out.

Yesterday's thing has shown Me how this collectivity of Switzerland has come up so well, so well.

And it was really showing how we can progress. You all have talents. Not that only Swiss have. You all have talents. You all have understanding. You're all intelligent. All of you are special people and you have to work out in

collective way and also individual way to show your quality of Śhrī Gaṇeśha, the way He has the rhythm within Him. He's very rhythmic and yesterday those two musicians sitting, He said, “Mother, they are so rhythmically clapping. They're rhythmic. There's no ha, ha, hoo, hoo, just clapping and so rhythmic. Nobody makes a mistake." Then they said, “When they sing also, nobody's out of tune." Normally, if ten people are singing, without proper training, then this are in alto, tenor, bass, everything, they go on. And you don't know on what swar [musical note] they have taken, on what note they are singing. But they were yesterday very amazed that all of you were singing on the same note. You wouldn't leave the note and come onto another note. That shows that the rhythm of Śhrī Gaṇeśha is working in you and His understanding of music, which is one of His qualities is that He dances on the music of which Nataraja, the father Shiva has taught Him. It's very rhythmic. That part, I think, a little bit, Sahaja Yogis are missing, that when they dance they need not be all of them in very rhythmic pattern. They're all right, but still one has to learn. Little more rhythmic pattern would be a good idea. As Śhrī Gaṇeśha, what such a big stomach He has, He dances so well.

So lightly, He lifts his body in the way He works it out, it's amazing. How does He do it with such a and a short person with such thick legs? He is very light and the lightness comes because of innocence, Mūlādhāra. If the Mūlādhāra is all right, then lightness is there.

You have seen in Maharashtra how these people were playing the lejun *[UNCLEAR]* with such speed, with such

lightness. They were lifting their legs and hand. It was really amazing how they were doing it. And it is only the innocence of these people of the villages that they don't understand much of this nonsense. They don't know what is going on with all these things. They earn their living, they're farmers and then in the evening they just sleep off in complete innocence. They do not plan, they do not sit down and find out how to kill somebody, maybe something how to rob somebody or another bad things that people think the bad action that comes into their minds. There is no time for that. They work the whole day. In the evening, nicely they sleep or else they will have a bhajan mandeley *[UNCLEAR]* where they will all sing together in a very beautiful manner.

So it's a real Sahaja style where we don't have to think about killing anybody or to murder anybody.

Like all these cults, they have weapons with them. I can't understand. Even I was told that in Poland our Pope *[UNCLEAR]* sent lots of weapons there. What is the need for anybody who is spiritual to have weapons around and think of violence and killing people? Because there is no innocence at all. You can see that. If you're innocent, your power is your innocence. You don't have to have weapons and guns and things. All these religions, so-called, are using nothing but weapons and guns and all kinds of killing objects and they are also killed. It's a funny thing going on in the name of God, in the name of Śhrī Gaṇeśh. There is no need for us to fight. There is no need for us to think that we'll kill this man or kill that one. Only you have to just desire, project your energy. And you see the person will disappear. He'll either

become a transformed person or he will not be there to trouble you.

So one thing I have to again stress that we must know our qualities and our powers. Many people, I know, could never come on the stage and speak also. I said, “You get along. Finished. Start. Anything.

You just project." “I can't do it. Why can't I do it?" To say, “I can't, I am sorry." Sorry is so common now. On the telephone also people will say sorry. Well, I said, “What's sorry? All the time sorry, sorry, sorry." Used to “I beg your pardon” used to say, was sensible, but the way people are “Poor me, you know. How can I do it?" All such people are not yet aware of their powers that they have. You can do it, everything. You can. Everything can be managed. After all, you have the power. In that power, you must know that you're not going to do something indiscreet, you're not going to spoil anybody, but your power itself will show that this power is really of love, affection, compassion for the transformation of the whole world. I'm thinking of the complete global transformation, which, I know, is a mad dream, but still I think like that. Because I see you all, then I think you all can do it and when I see the Śhrī Gaṇeśha in you, I'm sure it will work out.

So in My lifetime I have seen so many Sahaj Yogis, all over, how things are worked out. You have heard about in Brazil and also in Argentina, most unexpected. The people came to program from twelve o'clock in the morning when we were going to have the program at seven o'clock. I reached there at about eight, as usual and they said, “Mother, You won't believe there was a big

drama here." “What drama?" “They were sitting here from twelve o'clock, so all those who had come early got into inside, but those who came at the last minute would not be allowed and they are sitting there and fighting, `No, we are going to come inside somehow.' " So then, one of the Sahaja Yogis sensibly went and talked to the manager and told, “Baba, let them come. There is room." So there were four tiers. One was the ground, then one more, one more, one more.

When I came I said, “What's this?" All over the whole thing was filled with these people. I'd never seen them before, but they were there and so respectful, so much absorbing the vibrations. And I found it difficult to control My tears out of real feeling of such gratitude for Śhrī Gaṇeśh. He's the one who worked it out. That's why they say always first worship Śhrī Gaṇeśh before starting any work because then it gives you that peace, that tremendous powerful peace which works out so many things that you never thought of it would.

So we have to request Śhrī Gaṇeśha that all the problems of our land owning should be solved by Him and by Śhrī Gaṇesh power. We are still hoping to get the land and I want to install this properly for you because every time I don't want you to suffer like this. It's a pilgrimage, but rather difficult this time you all had, but you managed it very nicely and you never showed any kind of reluctance to accept this challenge. Śhrī Gaṇeśha was testing you I think also a little bit. But all that has worked out so well and now we are here to do the Pūjā of Śhrī Gaṇeśh.

May God bless you.

Contents: 2235.1 Japuji 30 from Guru Granth Saheb Obeisance, obeisance to Him, the Primal, the Immaculate, without beginning, without end, Constant through all ages.

The One Mother existed Alone in some mysterious way and She created the three Deities.

One was the Creator, one the Sustainer and one the Destroyer.

The world moves as He ordains and as He pleases.

He sees all, but no one sees Him; This is a great wonder.

[Return to ***1995-09-10***-.]

Contents: 1995-09-13 **Conference Talk, On the Global Problems Facing Women, Inter-Regional Round Table, Fourth World Conference on Women: Action for Equality, Development and Peace, Guanjunyuan Hotel, Beijing, China**

Moderator: Dear Mother Srivastava, Who is a spiritual Mother and the present head of Sahaja Yoga, which I'm very much looking forward to hearing what You have to say, because I'm sure that You have such desires for many women around the world. I'm looking forward to being touched by You today.

Shri Mataji: Brothers and Sisters of the World, It is a great honour for Me to talk about global problems of women in front of this distinguished assembly.

First of all, I would like to offer My profound gratitude to the government and people of our host country, the People's Republic of China. I have had a privilege of visiting China on two previous occasions and I am a great

admirer of the wisdom and culture of this great nation that I have visited.

This is beyond My imagination the most glorious time in the history of the world, that at this time we are so much aware of the problems of women. Women as a whole have definitely suffered over the ages, as the previous lady has told you, because we have not realised what their importance is and what their proper role is in human society.

Society itself, which is her creation, tries to control or put down the womanhood. In the East, we can say, that due to fundamentalist influence women have been under great pressure and their morality is based on fear rather than freedom. In the West they have fought for their freedom, but what they have attained is spurious freedom. The women in the West have freedom to abandon all social and moral values. Thus in the East, we can say, that most of the women are timid, oppressed and cannot express themselves, while in the West we find most of the women are reduced to a sex symbol. They are keen to expose their bodies. Their anxiety is to appear in fashion advertisements and very cheap popularity. Most of them accepted this position because otherwise they could not have survived in that chaotic world of the West.

What most of the women in the East would regard as very humiliating and degrading is regarded as something very glorifying in the West. I have seen both the worlds very deeply and I feel that unless and until you bring a new culture by which women from the East and West can both rise in their own esteem and express themselves in

such a way that they create high moral standards for their society, women neither in the East nor in the West will rise to their full stature of feminine speciality. The speciality is that if women are respected for their womanhood, understanding what they are capable of and how they can empower themselves with all the education needed, all the security will be provided to them and they will provide security to the society.

All the fundamentalists who talk of religion expect women to be absolutely moral and the men can do whatever they like. I feel we have to educate men more than women, because the idea of war comes also only from the men, in the beginning. I must admit it is not difficult to collect money for poor women in the developing countries and help them to get out of their poverty, but unfortunately My knowledge is that the money we are collecting may not reach the poor women but may end up into the pockets of the corrupt ministers, bureaucrats and other people in charge and ultimately it will end up in the Swiss Bank.

I do not want to criticise any U.N. organization because I know they are very honest in their purpose, but they must be made aware of what is happening under the table. [Applause.] We in India have two very big states called as Uttar Pradesh and Bihar which are very much helped by UNICEF as well as the World Health Organization. UNICEF started a project called Angan, meaning `courtyard', where the children were to be educated and brought up in a proper shape. This project is not working at all for the children, but all the money goes into the pockets of all the corrupt people who are in

charge of that project and the children do not even get two percent of what is being sent for them. Same with the World Health Organization, which is sending medicines and equipment to India. These medicines are sold in the market and are completely used by the recipients for their own gains. The same happens to WHO equipment.

So the poor people never get any benefit and they remain all the time helpless.

All this money is called dirty money but goes to the clean Swiss bank. A large part of the loans which the World Bank gives to the developing country is also siphoned back to the personal account of the corrupt officials maintained in Swiss Bank. Thus all the developing countries are indebted to the World Bank but have no money. The money is in the Swiss Bank.

So I would request you all to take this up with the Swiss Bank and request them to return all such money which has been siphoned in the Swiss Bank [applause] by very corrupt people and give this money to the U.N.

So that the U.N. can utilize it for the education of women and other purposes as well as what is to be given to people under very effective vigilance.

One has to have a very good network of people, especially women, who are involved and who are honest, compassionate and who would like to make the best out of this money, helping the women who have to achieve social equality. The main work of womanhood is to create a good society that would enjoy peace better.

Immorality, corruption and violence are the two horrible monsters which are eating up our society. I would blame

the mothers of these corrupt and immoral persons because they failed in their duty as mothers in their childhood. The loving training of the mother is the first and most effective influence in shaping the children into beautiful citizens. Mothers who never tried to guide with great concern and love, or the wives or the daughters who are falling into the fear of the men or of the destructive culture, have not done their duty as integral members of the family to strengthen the moral fibre of the men.

It is important also to see how children are treated in these two cultures of East and West. What we see in the East is that the children would listen to their mothers if they are not under fundamentalist culture. This culture relegates women to the level of an inferior human being, fit to be dominated by men and children. In the West also the same thing happens. Children don't respect their mothers, neither do they listen to them. I feel this is because, generally, the Western women spend more time looking after their bodies and looks than on looking after and loving their children. The nexus between the mother and children weakens and then it is for this reason that many children become street urchins and violent.

Fortunately there are still many families in the East and some in the West who deeply defy the corrupting influence of today and look after their children and bring them up properly.

But still I must say that the children in the East are not that much ruined as they are in the West. The reason, also, is that in the East there are many people who have

not taken to fundamentalist culture or to the Western culture and have a very good society and produce children who are exceptionally good, though this number may not be very great. But whatever culture they have inherited, since long, traditionally, is very much ingrained in them and to them the moral value system is the highest, more than money or power.

The West is full of problems. Though they have money, they don't have peace within themselves. The truth is that women are the potential power of every civilization and every country. It is evident that women are the creators and the preservers of the entire humankind. This is the role which the almighty God has given, assigned to them. Seeds cannot create anything by themselves. It is the Mother Earth which provides the flowers and the fruits and other bounties. Similarly, it is the woman who create the child, who nurtures the baby and eventually brings up the citizen of tomorrow. Women must therefore rank with Mother Earth as the ediffice of the entire humanity. Unfortunately, men have utilized muscle power to gain a dominating position over women. They have not recognized that women are complementary and equal, but not similar partners in human endeavours. A society that does [not] recognize this fundamental truth and does not give to women their rightful role is not a civilized society.

In My own country there is a saying in Sanskrit [in `Manusmriti'], “Yatra narya[stu] pujyante tatra ramante Devatā” which means that “Where the women are respected and respectable, there resides the Gods of our well-being." So it is for us, at this moment, to understand

the value of this great power that is given to us by our Creator. But what do we find? Whether in the East or in the West, women have not been able to give a full manifestation of their greatness. I am not suggesting at all that the only role of women in human society is that of the mother, the procreator and preserver of children, or that of a wife, or a sister. Women have a full right to participate as equal partners in every aspect of life, social, cultural, educational, political, economical, administrative and the rest. In order to prepare themselves for this all-pervading role, they must have the right to education in all branches of knowledge. But if they are mothers, they have a great responsibility towards their children as well as their society. Men are responsible for politics and economics of the country, but women are responsible for the society. Women can also support men and they can take a leading part, of course, in any post, but it is very important that they should not forget they are women who have to manifest deep motherly concern and love. If they become manly and aggressive, the balance of the society cannot be maintained.

At the same time I must submit that, while we ask for the rights of women, we must also stress the fundamental duties of women to the human society. The women in the West, or those who are educated in the West, also some others I have seen, have gone to the other extreme when they are taking to political, economical or administrative roles. To compete with men they have become much too self-willed, selfcentered and ambitious. They have no more their soothing, pleasing qualities which can bring

peace and balance. On the contrary, they become dominating, pleasure-seeking individuals. They are far more worried about their physical attractions than about having a pleasing, sweet and dignified personality.

They give into their baser self much faster than men, wittingly or unwittingly. All this leads to chaotic societies and children grow up into street urchins, preparing for wars.

What we need is a balance between the two extremes. We need women as equal but not similar partners with men, but with a subtle understanding of the nature of men and how to bring them into the center with their inner balance. We need balanced women in order to have a balanced human race with peace within itself. You might say all this is excellent in thought, but how do we achieve this state of balance? How do we stem the tide of diseases, corruption, immorality, immaturity and violence? How do we end the present state of conflict and confusion? How do we bring about peace within every mind and heart? I very humbly submit that there is an answer to these questions. There is a new way...

[To Moderator:] Do you want Me to tell the new way? Moderator: Just tell them. You have three minutes.

Shri Mataji: Whatever I am going to tell you now is not be taken for granted. You should, of course, have your minds open like scientists and treat whatever I am stating as a hypothesis. If this hypothesis can be proved, then you have to accept it as honest persons as the absolute truth because it is for your benevolence. It is for the benevolence of your family. It is for the benevolence

of your country and for the benevolence of the whole world.

I am here to tell you about the last breakthrough of our evolution. This breakthrough of our evolution in our awareness has to happen in these modern times and has been, moreover, recorded in the writings of many seers. These are the times called as the “Decadent Times", last called by the great saint Vyāsa who has written the Gītā and it is the decadence of humanity that we see around in every way possible and unless and until we improve that, war cannot be avoided.

Now I would like to tell the secret knowledge of our inner being which was known in India thousands of years back. For our evolution and spiritual ascent there is a residual power within us which is located in the triangular bone at the base of our spine. This residual power is known as Kuṇḍalinī. Though the knowledge of this power was available thousands of years back in India, the awakening of the Kuṇḍalinī was done, traditionally, on an individual basis only. One Guru would give awakening to one disciple. As a result of that awakening, what happens is that you achieve your Self-realisation, your Selfhood. Secondly, when this power is awakened, it rises and passes through six subtle energy centers in your body, nourishing them and integrating them. Ultimately, this power breaks through the fontanelle bone area called as the Tālu or the Brahmarandhra and connects you to the All-pervading Power of Divine Love, which is described in the Bible also as the Cool Breeze of the Holy Ghost also in the Koran as Rūh and also in the Indian scriptures as

Param-Chaitanya. Patanjali has called it as Ṛitambhara Pragñyā.

Whatever the name, this is a power which is all-pervading, which does all the subtle works of living process, of evolutionary process. The existence of this All-pervading Energy is not felt before Realisation, but after Self-realisation you can feel it on your fingertips or at the center of your palm or above the fontanelle bone area.

Moreover, this process has to be spontaneous, Sahaja. Saha means with and ja means born. That means the right to get this union with the All-pervading Power of Divine Love is the birthright of every human being. Our mental energies are limited. Our limited mental energy, which is linear in movement and has no sustenance of reality, reaches a point and stops. From there it boomerangs and all mental, linear movement comes back to us as a punishment sometimes.

So now we need more energy, higher energy, deeper energy and for that this happening has to take place if we don't want to have another war.

I must say that in the West, I have met many people who are true seekers of Truth and are fed up of artificiality of the Western life. Also they didn't know what they were seeking sometimes and they have made lots of mistakes. They have gone to false Gurus who have taken lots of money and the people have become bankrupts and mentally and physically handicapped.

The one thing you must note that the awakening of the Kuṇḍalinī and thus achieving Self-realisation is a living process of evolution for which we cannot pay anything. It

is like putting a seed in the Mother Earth. It sprouts because Mother Earth has the power to sprout it. Which shows, in the same way we have this germinating power in the triangular bone which Greeks called as Sacrum which is a three and a half coiled energy which shows that the Greeks knew that this was a sacred bone and hence they gave the same name, Sacrum. Actually in some people you can see this triangular bone pulsating and the Kuṇḍalinī very slowly rising, but there are many who have got Self-realisation. Now this Sahaja Yoga is working in 85 nations and they have all become extremely peaceful with each other. In their hearts, they're integrated and they have become extremely loving and compassionate.

I'm sorry I can't tell you more, but the time is over. I hope you don't mind. Thank you very much.

Moderator: Thank You very much. I'm so sorry You had to rush over the method... There are copies of this paper that we can all have and I think the beauty of it is that it points to a method that we can all use for Self-realisation that we can also become peaceful people and have peaceful relationships with others. That's what I gleaned so far from what You said. I hope I got the right message.

Shri Mataji: Thank you very much.

Moderator: Thank You very much.

[Shri Mataji had prepared a longer talk to be delivered at the conference. However, due to time constraints, She was not able to read the entire talk. The following is a transcript of the prepared talk.] Brothers and Sisters of the World, It is a great honour for Me to talk about global

problems of women in front of this distinguished assembly.

First of all I would like to offer My profound gratitude to the government and people of our host country, the People's Republic of China. I have had the privilege of visiting China on two previous occasions and I am a great admirer of the wisdom and culture of this great nation that I have visited.

This is, beyond My imagination, the most glorious time in the history of the world that at this time we are so much aware of the problems of women. Women as a whole have definitely suffered over the ages as the previous lady has told you because we have not realised what their importance is and what their proper role is in human society.

Society itself, which is her creation, tries to control or put down the womanhood. In the East, we can say, that due to fundamentalist influence women have been under great pressure and their morality is based on fear rather than freedom. In the West they have fought for their freedom, but what they have attained is spurious freedom. The women in the West have freedom to abandon all social and moral values. Thus in the East, we can say, that most of the women are timid, oppressed and cannot express themselves, while in the West we find most of the women are reduced to a sex symbol. They are keen to expose their body. Their anxiety is to appear in fashion advertisements and very cheap popularity. Most of them accepted this position because otherwise they could not have survived in that chaotic world of the West.

What most of the women in the East would regard as very humiliating and degrading is regarded as something very glorifying in the West. I have seen both the worlds very deeply and I feel that unless and until you bring a new culture by which women from the East and West can both rise in their own esteem and express themselves in such a way that they create high moral standards for their society, women neither in the East nor in the West will rise to their full stature of feminine speciality. The speciality is that if women are respected for their womanhood, understanding what they are capable of and how they can empower themselves with all the education needed, all the security will be provided to them and they will provide security to the society.

All the fundamentalists who talk of religion expect women to be absolutely moral and the men can do whatever they like. I feel we have to educate men more than women, because the idea of war comes only from the men. I must admit it is not difficult to collect money for poor women in the developing countries and help them to get out of their poverty, but unfortunately, My knowledge is that the money we are collecting may not reach the poor women but may end up into the pockets of the corrupt ministers, bureaucrats and other people in charge and ultimately will end up in the Swiss Bank.

I do not want to criticise any U.N. organization because I know they are very honest in their purpose, but they must be made aware of what is happening under the table. We in India have two very big states called as Uttar Pradesh and Bihar which are very much helped by UNICEF as well as the World Health Organization. UNICEF

started a project called Angan, meaning Courtyard, where the children were to be educated and brought up in a proper shape. This project is not at all working for the children but all the money goes into the pockets of all the corrupt people who are in charge of that project and the children do not get even two percent of what is being sent for them. Same with the World Health Organization, which is sending medicines and equipment to India. These medicines are sold in the market and are completely used by the recipients for their own gains. The same happens to WHO equipment.

So the poor people never get any benefit and they remain all the time helpless.

One has to have a very good network of people, especially women, who are involved and who are honest, compassionate and who would like to make the best out of this money, helping the women to achieve social equality. The main work of womanhood is to create a good society.

Immorality and corruption are the two horrible monsters which are eating up our society. I would blame the mothers of these immoral and corrupt persons because they failed in their duty as mothers in their childhood. The loving training of the mother is the first and most effective influence in shaping the children into beautiful citizens. Mothers who have never tried to guide with great concern and love, or the wives or the daughters who are falling into the fear of the men or of the destructive culture, have not done their duty as integral members of the family to strengthen the moral fibre of the men. It is important also to see how children are

treated in these two cultures of East and West. What we see in the East is that children would listen to their mothers if they are not under fundamentalist culture. This culture relegates women to the level of an inferior human being, fit to be dominated by men and children. In the West also the same thing happens. Children don't respect their mothers neither do they listen to them.

I feel this is because, generally, the Western women spend more time looking after their body and looks than on looking after and loving their children. The nexus between the mother and children weakens and breaks. It is for this reason that many children become street urchins. Fortunately there are still many families in the East and some in the West who deeply defy the corrupting trends of today and look after their children and bring them up properly.

But still I must say that the children in the East are not that much ruined as they are in the West. The reason, also, is that in the East there are many people who have not taken to fundamentalist culture or to the Western culture and have a very good society and produce children who are exceptionally good although this number may not be very great. But whatever culture they have inherited, since long, traditionally, is very much ingrained in them and to them the moral value system is the highest, more than money or power.

The West is now full of problems. Though they have money, they don't have peace within and without.

The truth is that women are the potential power of every civilization and every country. It is evident that women are the creators and the preservers of the entire

humankind. This is the role that the almighty God has assigned to them. Seeds cannot create anything by themselves. It is the Mother Earth which provides the flowers and the fruits and other bounties. Similarly, it is the woman who creates the child, who nurtures the baby and eventually brings up the citizen of tomorrow. Women must therefore rank with Mother Earth as the ediffice of the entire humanity. Unfortunately, men have utilized muscle power to gain a dominating position over women. They have not recognized that women are complementary and equal but not similar partners in human endeavours. A society that does recognize this fundamental truth and does not given to women their rightful role is not a civilized society.

In My own country there is a saying in Sanskrit, “Yatra nayra [naryastu] pujyante tatra ramante Devatā” which means that “Where the women are respected and respectable, there resides the Gods of our well-being." So it is for us, at this moment, to recognize the value of this great power that is given to us by our Creator. But what do we find? Whether in the East or in the West, women have not been able to give a full manifestation of their greatness. I am not suggesting at all that the only role of women in society is that of the Mother, the procreator and preserver of children, or that of a wife, or a sister. Women have a full right to participate as equal partners in every aspect of life, social, cultural, educational, political, economical, administrative and the rest. In order to prepare themselves for this all-pervading role, they must have the right to education in all branches of knowledge. But if they are mothers, they have a great

responsibility towards their children as well as their society. Men are responsible for the politics and economics of the country but women are responsible for the society. Women can also support men and they can take a leading part, of course, in any position but, it is very important that they should not forget that they are women who have to manifest deep motherly concern and love. If they become manly and aggressive the balance of society cannot be maintained.

At the same time I must submit that, while we ask for the rights of women, we must also stress the fundamental duties of women to the human society. The women in the West, or those who are educated in the West, have gone to the other extreme when they are taking to political, economical or administrative roles. To compete with men they have become much too self-willed, self-centered and ambitious. They have no more their soothing and pleasing qualities which can keep the balance. On the contrary, they become dominating, pleasure-seeking individuals. They are far more worried about their physical attractions than having a pleasing, sweet and dignified personality. They give into their baser self much faster than men, wittingly or unwittingly. All this leads to chaotic societies and children grow up into street urchins, thieves and even murderers, as we read everyday in the paper.

What we need is a balance between the two extremes. We need women as equal but not similar partners with men, but with a subtle understanding of the nature of men and how to bring them into the center with inner balance. We need balanced women in order to have a

balanced human race with peace within itself. You might say all this is excellent in thought, but how do we achieve this state of balance? How do we stem the tide of diseases, corruption, immorality and immaturity? How do we end the present state of conflict and confusion? How do we bring about peace within every mind and heart? I very humbly submit that there is an answer to these questions. There is a new way...

Whatever I am going to tell you now is not be taken for granted. You should, of course, have your minds open like scientists and treat whatever I am stating as a hypothesis. If this hypothesis can be proved, then you have to accept it as honest persons as the absolute truth because it is for your benevolence. It is for the benevolence of your family. It is for the benevolence of your country and for the benevolence of the whole world.

I am here to tell you about the last breakthrough of our evolution. This breakthrough of our evolution in our awareness has to happen in these modern times and has been, moreover, recorded in the writings of many seers. These are the times called as the “Decadent Times", last called by the great saint Vyāsa who has written the Gītā and it is the decadence of humanity that we see around in every way possible.

Now I would like to tell the secret knowledge of our inner being which was known in India thousands of years back. For our evolution and spiritual ascent there is a residual power within us which is located in the triangular bone at the base of our spine. This residual power is known as Kuṇḍalinī. Though the knowledge of this power was available thousands of years back in India, the

awakening of the Kuṇḍalinī was done, traditionally, on an individual basis only. One Guru would give awakening to one disciple. As a result of that awakening, what happens is that you achieve your Self-realisation, your Selfhood. Secondly, when this power is awakened, it rises and passes through six subtle energy centers in your body, nourishing them and integrating them. Ultimately, this power breaks through the fontanelle bone area called as the Tālu or the Brahmarandhra and connects you to the All-pervading Power of Divine Love, which is described in the bible also as the Cool Breeze of the Holy Ghost also in the Koran as Rūh and also in the Indian scriptures as Param-Chaitanya. Patanjali has called it as Ṛitambhara Pragñyā.

Whatever the name, this is a power which is all-pervading, which does all the subtle works of living process, of evolutionary process. The existence of this All-pervading Energy is not felt before Realisation but after Self-realisation you can feel it on your fingertips or at the center of your palm or above the fontanelle bone area.

Moreover, this process has to be spontaneous, Sahaja. Saha means with and ja means born. That means the right to get this union with the All-pervading Power of Divine Love is the birthright of every human being. Our mental energies are limited. Our limited mental energy, which is linear in movement and has not sustenance of reality, reaches a point and stops. From there it boomerangs and all that mental, linear movement comes back to us as a punishment sometimes.

So now we need more energy, higher energy, deeper energy and for that this happening has to take place.

I must say that in the West, I have met many people who are true Seekers of Truth and are fed up of artificiality of the Western life. Also they didn't know what they were seeking sometimes and they have made lots of mistakes. They have gone to false Gurus who have taken lots of money and the people have become bankrupts and mentally and physically handicapped.

The one thing you must note is that the awakening of the Kuṇḍalinī and thus achieving Self-realisation is a living process of evolution for which we cannot pay anything. It is like putting a seed in the Mother Earth. It sprouts because Mother Earth has the power to sprout it and the seed has an inbuilt germinating quality within it. In the same way we have this germinating power in the triangular bone which Greeks called as Sacrum. Actually in some people you can see this triangular bone pulsating and the Kuṇḍalinī very slowly rising, but where there are no obstructions and if the person is a balanced being, the Kuṇḍalinī rises from the Sacrum just like a jet and passes through the fontanelle bone area to become one with the All-pervading Power. This Kuṇḍalinī is the spiritual mother of every individual and She knows or has recorded all the past aspirations of Her child. She is anxious to give second birth to Her child and, during Her ascent, She nourishes six energy centers.

When a person is not connected to the All-pervading Power, he is like an instrument which is not connected to the mains and has no identity, has no meaning, has no purpose. As soon as it is connected, all that is built in

inside this instrument starts working and manifesting itself. When this Kuṇḍalinī rises it connects you to the All-pervading Power, which is vital and which is an ocean of knowledge as well as an ocean of bliss. After the awakening of Kuṇḍalinī, you experience many coincidences which are miraculous and extremely blissful. Above all Kuṇḍalinī is the ocean of forgiveness.

So what ever mistakes you have committed in the past are forgiven and instead you get your Self-realisation as a blessing.

The consequences of the awakening of the Kuṇḍalinī and thereby the attainment of Self-realisation are numerous. First and foremost, such a person is constantly in contact with or is in fact a part of the All-pervading Divine Power. He seeks the truth by using his new awareness. And truth is one. All Self-realised persons see this same truth. Thus conflicts are avoided. Purely mental activity without Self-realisation, leads to conflicting ideas and even wars. All this is avoided after Self-realisation.

Now, let us see how many other things happen in a person who gets realisation. Firstly you start feeling the Cool Breeze of the Holy Ghost on your fingertips, which represent the subtle energy centers.

Thus you know the truth on your fingertips. You transcend all the limitations of race, religion and other ideas and you go beyond your mind to see and feel the reality and understand it.

The next thing that happens is that you become thoughtlessly aware. We live in the future and the past through our thoughts. They come to us from these two areas of time but we cannot be in the present.

While these thoughts are rising and falling we are jumping on the cusp of these thoughts. But when Kuṇḍalinī rises She elongates these thoughts and thereby creates some space in-between, which is the present, which is the reality.

So the past is over and the future doesn't exist. At that time you have no thoughts. You reach a new state as you become thoughtlessly aware about which Jung has written clearly.

At this moment whatsoever happens is recorded in your memory well and you enjoy every moment of this in reality. When you become thoughtlessly aware then you become completely peaceful within yourself.

A person who has achieved this peace also emits peace and creates a peaceful atmosphere around himself. This peace is very important. Unless and until we have this peace we will never truly understand whatever our ideas are, whether universal or just limited. You can feel your own seven centers on your fingertips. Also you can feel the centers of others because you develop a new level of awareness which is called as Collective Consciousness. When such new awareness is established into you, you start feeling also the centers of others. I must tell you that these centers are responsible for our physical, mental, emotional and spiritual well-being and when they are affected or they are in jeopardy, people suffer from one disease or another. As a result of the awakening of the Kuṇḍalinī and the nourishment of these centers, an important development would be that you will feel an inner balance and you will enjoy good health. Many diseases, even some incurable ones, have been cured by

the awakening of the Kuṇḍalinī. Even the database of the inherited genes may be restructured after Self-realisation through the awakening of the Kuṇḍalinī. As a result, a person who might have inherited genes indicating criminal tendency might become a good man.

Our attention also becomes very pure. In the light of the spirit we can see things much more clearly than when we were blind. For example, a person who goes with his blind eyes and feels an elephant and then another comes in and a third comes in, all of them have different ideas about the elephant, depending on whichever part of the elephant they have touched. But if they open their eyes then they can all see the same thing, the reality and there will be no quarrel and fights.

A Self-realised person can feel the absolute knowledge on the fingertips. Supposing someone doesn't believe in God. A Self-realised person can suggest to the non-believer that he should ask the question: “Is there God?" The questioner will get, you will find, a very nice Cool Breeze coming into his being. He may not believe in God but there is God.

Unfortunately, so many of those who believe in God are also absurd, hypocritical, cruel, weird and so immoral that people have lost faith in God. But while those who represent God may be wrong, God himself exists and his power also exists which we call as the All-pervading Power of Divine Love. This is the power of love and compassion and not of aggression and destruction when it is imbibed in a yogi or in a Self-realised person, it works in a very different way, like an angel. Such people can cure others and cure themselves. Even mental cases

have been cured. Not only that. Even those who have been to wrong Gurus in their search of truth have achieved their spiritual stability, after leaving the false Gurus and coming to the path of Self-realisation.

In the next stage, you become thoughtlessly aware, when your Kuṇḍalinī is stabilized and you know undoubtedly that you have achieved your Self-realisation, that you have attained all the powers that can be utilized. You become very powerful because you can raise the Kuṇḍalinī of others. You become very active and you don't feel tired easily. For example, I am seventy three years of age and I am travelling about every third day, but I am quite all right. This energy flows into you and fills you up with vitality.

You become extremely dynamic and at the same time extremely compassionate, kind and mild. You feel that you are protected and thus you are confident but not egotistical. Your whole personality changes.

This is the kind of global transformation which is taking place with such a speed all over that I, Myself, am surprised at how it is working out so fast.

Actually, this knowledge existed a long time back but My contribution, if there is any, is that we can now achieve en masse realisation. Thousands can achieve mass realisation. It is a gift of this time where it was predicted that such a global transformation will take place. In as many as 65 countries, thousands of people have attained their Self-realisation through Sahaja Yoga.

The power of Kuṇḍalinī is the pure desire of attaining your Selfhood. If someone doesn't want to have it, you cannot force him because the Divine respects the

freedom of that person. If he wants to go to heaven, he can go there, or if he wants to go to hell, he can go to hell. Self-realisation can be attained easily if the people have a sincere and pure desire to get their Self-realisation. But if they stick to some of their ideas, which are fixed, the Kuṇḍalinī won't rise. Also it cannot work for idiots or for immature people.

It works for people who are wise, who are more in the center and it works very fast. I was amazed to see that it has worked even on people who were drug addicts, who were alcoholics and who were very immoral.

But they all had an intense and pure desire to secure self-improvement, Self-realisation.

So many of such people achieved their goal of Self-realisation. Overnight, they gave up their drugs, their alcoholism. Thus you become very powerful and at the same time you understand that you are now glorified and you start behaving in a very dignified and a very sensible manner. This is how a new culture is born and this new culture takes you, in a way, into a new style of life where you become innately, I say innately, righteous.

Nobody has to tell you: “Don't do this" and “Don't do that." It is all achieved through your enlightened attention. This enlightened attention is also full of power. Wherever you put your attention it works, it creates peace, it creates harmony and also it creates a new dimension of collective consciousness.

So to blame your genes for your mistakes is not going to work out anymore because these genes can be changes in their database and can be brought to the level of a very righteous, angelic personality. The ego and the

conditioning of a person gets dissolves by the ascent of the Kuṇḍalinī and he becomes really a free bird. Absolute freedom is achieved in reality and his behaviour changes tremendously with great faith in himself. He becomes a witness of the whole drama of life. When you are in the water you are afraid of getting drowned, but supposing you get into a boat, you can watch the same waters with enjoyment. But if you learn how to jump in the water and save others then it is even a higher situation and so we have a higher awareness which we call as doubtless awareness. Above all, we fall into the ocean of joy. Joy is absolute. It doesn't have duality. It is not like happiness and unhappiness. It is a singular thing and once you jump into it you learn easily how to enjoy everything, whether it is beautiful or ridiculous. In one case you see the beauty; in the other you see the humour as to how people are ridiculous. The remarkable thing is that Sahaja Yogis have become great musicians, great writers, great speakers, great administrators. In every way they have risen very high, specially in their attitude towards others. They respect everyone and they know what is wrong with other people so that this person who has these problems can be easily evolved and become a Self-realised Soul. It is like one candle lighting another candle. This work is going on all over the world and there is great hope that it will also start in China. Before this, somehow, I could not start My work but the Divine coincidence has given a chance to Me by this conference to talk to Chinese people, whom I find very wise and sensitive, about the great treasure of spirituality. This is not a coincidence. It was inevitable and has been brought

about by this All-pervading Power. In your life also you will notice lots of coincidences but you will not know how to connect them to something that is Divine unless and until you get connected to like Divine power.

Confucius has taught the humanity how we can improve our relations with other human beings. But Lao Tze in China has very beautifully described Tao, meaning the Kuṇḍalinī. And I have had a voyage through the Yangtze River through which Lao Tze had gone many times. I know he was trying to show that river, which is the Kuṇḍalinī, is flowing towards the sea and one should not be tempted by the nature that is around. The nature around the Yangtze River is very, very beautiful, no doubt, but one has to go through the river. Also there are lots of currents which flow and can be quite dangerous and we need a good navigator who should take his ship across to the point where it is nearer the sea. At that stage it becomes very silent and extremely simple in its flow.

This country has been endowed with great philosophers, I would say the greatest was Lao Tze, because humanism was for the preparation of human beings for their ascent about which Lao Tze had spoken. But because of the subtle subject it was not described in such a clear-cut manner as I am talking to you. It is such a pleasure for Me to talk to this august gathering here. After travelling all over the world, I realise that China is one of the best countries as far as spirituality is concerned.

May the Divine bless you all.

***Contents: 1995-09-13*, Public Program, Function Room, Jingguang New World Hotel-Manfulou, Beijing, China**

Very much enamoured to know that you all are very much interested in Sahaja Yoga. The first person who is sitting here and who had the honour to meet in Austria and I was surprised how he was know all about Sahaja Yoga.

In your country you had very great philosophers once upon a time. Of course you believe in humanism; but there was another great, great philosopher who was called as Lao Tze, of a very high spirituality like a great incarnation of a Master. What He has written about, described about Yangtze River is very interesting, because I went through the Yangtze River Myself. And He calls it Tao. Tao. Is actually He is talking about Kuṇḍalinī. He was a poet, so whatever He has described is rather subtle. And maybe they must have thought that it's better to understand other people than Tao written by Lao Tze. But all over the world you will find it is Tao which people respect very much and they like to always interpret the meaning of the word `Tao'.

Really symbolically He has described that this river Yangtze is a difficult river to go through. And the surroundings, the banks of this river, are extremely beautiful. You won't believe for twelve hours I was sitting outside watching the beauty of the banks. I've never seen such beautiful mountains, trees and the whole movement of nature is like an artist painting something. And all your paintings, most of them, I think are impressed by that kind of banks that I saw, because I

have studied your art and I felt that the way you have shown in your art that is mostly paintings of Yangtze River. But the symbolic thing is this: that in the beginning it's a very difficult river, there are lots of currents, they form lots of circles, very heavy type and is very difficult to climb. It is for quite some time you have to pass very carefully. Just about few hours when it reaches the sea, it becomes calm, absolutely calm.

In the same way, the Tao that He describes is, in the beginning, according to Him, is rather difficult.

But when it reaches near the sea, it calms down. It is a remarkable thing that how He could see the Kuṇḍalinī so much well defined as this Yangtze River. It is an extremely, very artistic, subtle idea. Shows what a poet He must have been and how highly developed spiritually He was.

Confucius is all right, “But for what we should become good?" is the point people will ask. “Why should we be good people?", people can ask such a question. “What is the need to be good, to be balanced?" We too had many like this who talked that, “We have to be in balance, we have to be moral and we have to be righteous people." But for what is this balance we have to find out. This balance is for the ultimate ascent. And unless and until we achieve that ascent, nothing can satisfy us. The fundamental question that we have all over the world, we should say, “Why are we on this earth?" Is it just to be born, to live and die? All our life to struggle, to worry and also to lead a life which is painful? Then the people think that it would be that if you get lots of money, we'll be happy. But you should know that those people who have

lots of money are not at all happy; on the contrary, much more unhappy than the people who don't have much money. Because they have greed and greed never satisfies them.

Then another type are they think if they have some powers, you see, political or economic powers, they'll be very happy. But they are also not happy.

If a person is sensitive, he doesn't feel satisfied with what he sees around. And then he becomes restless.

All over the world you'll find these days thousands and thousands of people who are restless. But they don't understand why they are restless and they think they have to seek the peace within us so that they become at least joyous.

I think in this whole world these days there are numberless people who are seekers of Truth. Because normally we live in a relative world. We don't live in the absolute world. Because of that, we have problems. For example, one man thinks something is very good, he has a fixed idea. Another man thinks that something else is good and he has another fixed idea. But they are not satisfied because they have to find out the absolute Truth. For that, in our whole creation through the evolutionary process, there's a built-in mechanism within us, which is the Tao. This, I think in those days it must have been hard to say something very openly, so He took this name Tao and described the Yangtze River.

I have to tell you that now the time has come, a special time, I call it a blossom time. It is all repeated in so many scriptures that such a time is going to come. And it is evident, very evident to Me, that there are thousands

and thousands of seekers of Truth. They may not know what they are seeking.

So after a person feels restless, he starts finding there are so many coincidences which he cannot explain. For example, I met your Premier with My husband here, it was not a coincidence, I know. I could feel that he was a very sensitive person. And he asked Me about the spirituality. Though he did not know that I was doing any spiritual work, but somehow he felt and he asked Me. Then I met many Chinese people also and I found them to be extremely wise, very balanced, very humble, very sweet and it was such a pleasure to be with them. I met the Ambassador's wife in London and I was amazed, her ideas about culture were same as we have in India. I have greatest desire to come to China, really. Because I felt Chinese are the fit people to get their Self-realisation. They are very deep, they are very wise and very serene. Their style is very much like Indian style, I should say, the real Indians who are very simple.

And today I feel the coincidence has worked that I met this gentleman in Austria and this whole thing was arranged so well. I was in Hong Kong and the people in Hong Kong who got Realisation, they wanted Me to go to the Main Land. It is something that in some countries I find people are extremely evolved.

I don't want to criticise but compared to you people, Americans are babies, not yet matured. It's very difficult to talk to them. I'll give you one example. It is not such a decent one, but that's how you'll know how stupid they are. Now this gentleman is not there. He was Chairman of the International Jung Society. Jung is the one who

fought his teacher and started talking about the Realisation. That time I was about sixty years of age and this gentleman must have been eighty years.

So, after the program when I told them how Jung has not understood certain things, they were very much impressed.

So he said, “I would like to see You for some private work." And he tried to know My address. He came to My house and I asked him what the problem was. Now such an old man, eighty-year-old person, started telling Me about his own life.

So he said, “I had a keep and I am a Catholic so I could not marry her and I didn't even tell my wife." “Now my wife is dead, so I asked this lady to marry me. And she does not want to marry me. Can You do something with Your spiritual powers to make her agree to marry me." I said, “What is the age of your keep?" So he said, “It's only thirty-five years." I said, “What am I to tell this old man of eighty years shaking and asking such a stupid thing, you know." But in America you'll find many like this. There's no, no surprise now to Me. Also about spirituality they don't have much idea. Like once I was travelling, an American lady tells Me that, “Do You know this gentleman who is a Guru from India?" “So what does he do?", I said. “What is his speciality?" So, “He takes out some watches and things and also diamonds, he gives you diamonds." So I said, “But why do you follow him? Do you want diamonds?" “No, no, this time he is giving us a bargain price.

So why not make use of that?" So to them spirituality is marketing. And there are many like these who are selling

spirituality in America. But they cannot work out in China, I know sure. Another one started a funny sort of thing that you can fly up to three feet. For that people have to pay six thousand pounds. Most of the Americans were there. I don't think any Chinese would have accepted. And not Indians, because they got exported to America because Indians are also very wise.

Now I asked them, because they sold out their houses, took back their children from the schools and they were all bankrupts. I said, “Why do you want to fly at three feet, already we have jams on the way.

Why do you want to fly at three feet?" They said, “It's a very great achievement, you know, that you can fly at that height." And their practices, they broke their bottoms also, so they paid the money and this fellow had to jolly well pay them.

So perhaps Indians are also very clever. They must have realised, “You can cash on these stupid people” so they all went to America.

First time I went to America and I said, “Nothing doing with these stupid people." For nine years I never went and all these Gurus nicely prospered, had lots of money. But one should understand that you cannot pay for your evolution. It is a living process. For that you need wisdom, because if you are so stupid, I mean you just can't explain. Maybe China and India both are very ancient countries, perhaps maybe because of that we've developed that maturity.

Now what I feel that these Americans, or Europeans also, they all are trying to put their culture on us.

And this Women's Conference, you see, these were saying that “We should become very free and we have this right, we have that right." I have been all over the world, as you know Sahaja Yoga is now working in sixty-five countries. And if you see what freedom these women have achieved, it's nonsense. They have just freedom to fight, freedom to wear funny dresses, exposing their body. In no way they are free.

There was one American lady who came to a conference of My husband, very highly placed. And she started boasting that, “We are very free people; we give all the freedom to the children." And she asked Me if I'd seen all the pubs of London. And she had a complete list of all the pubs. She told Me, “That's a very great tourist attraction for London." “But” she said, “the best I liked was called as the Hermit's Pub." I thought, `In England, how could there be a hermit?' So she said that, “One fellow was living in a dingy room. He died there. Nobody knew about it and it was all very smelly and there were lots of cob webs that developed. And that is the best place where you really feel so much beyond this world. And all these tourists are dying to go to that place, you see, because it's such a small, little room, like a den and they cannot enter in." I said, “I'm sorry, I've not seen all these place." But then I heard about her something. Was very shocking. She was actually condemning Indians and boasting that, “See, you give all the freedom to your children, and, you never give any freedom to your children but we give full freedom to our children. We give them everything to drink. Whatever we drink, we give it to our children. We want them to enjoy. One is a

fourteen-year old, another is twelve-year old." The news we got was that the twelve-year old was having his birthday and they drank so much. And the whole house got caught up with a fire with which they were playing and the husband, wife and both the children died.

So their idea of freedom is absolutely complete bondage. Now, freedom is where a person is beyond all the habits, all the destructive cultures.

Now the problem of the West is that they believe that every moment should be enjoyed. And their enjoyments are all very self-destructive. They have this Grand Prix in which a person has to die. They have all kinds of self-destructive enjoyments, every enjoyment is nothing but is to kill yourself. With this stupid ideas about enjoyment, they are losing completely themselves.

Now this Mrs. Clinton, Hillary Clinton, came here and said that, they always interfere with government so they think they are right to say whatever they like. Instead of thanking the Chinese government for arranging such a nice conference, she just tried to show off [Shri Mataji was the only delegate speaker who thanked the Chinese government for organizing the conference]. And what she said that you should not force women to have less children; and they should have right, you see, to have as many children as they like. Because it's all right in America where to these white people, white skinned people, children are not born, they don't want to be born. Because children are wise. Why will they be born in such a stupid country where children are killed by parents, by everybody? They are after the lives of poor children.

So you Chinese and we Indians have to bear the brunt. Because all the children want to be born with us.

So what she talks, you see, she doesn't know the world. But, you see, her remark has been everywhere criticised. And in all the newspapers they said, “All right, let the Chinese produce lots of children and send all of them to America." But I felt, “Why punish the poor children?" Even the little girls are not safe with the father. Can you imagine such a thing? Everyday there is news about these people and they think it is sensational, so, so shameful it is! There are so many things which can be told to you, but you are people who have been endowed with great wisdom. And when I am telling you this, you are all with Me. But if I tell this to Americans, they'll say, “What's wrong? That's our right to do what we like." So, you will realise in Sahaja Yoga, there is nothing to learn from these Americans, or these Western people. Actually, you see, they are so much after perfection and progress that they don't know what to do actually to achieve progress. For example, now if you go to America you find a person with a big pony tail from the back.

So know that is a man; it's not a woman. And if it's a crew cut, it's a woman. And you cannot make out who's a man, who is a woman.

Can you imagine? They are all becoming man or woman, I don't know. One story I'll tell you, interesting, because I'm in a great, very happy mood.

There was at the airport one gentleman was standing and he saw a girl dressed up just like a man.

And he told another gentleman who's standing there, “I don't like the way the girls are dressed like this, like

men." So this gentleman said, “What's wrong? She is my daughter." He said, “I didn't know you were the father." “No, I'm the mother." I mean, what is so great in doing this kind of nonsense? They all find out nonsensical things all the time and say, “What's wrong?" Once upon a time people used to say, “When China will rise, the tiger will start roaring." And that's why you see today. Let them criticise. Let them do what they like. Everybody knows how far they are. Now this Mister Lopain from France, this one, Mister Lopain from France and he is criticising this conference. He says that we should not criticise Mister Chirac for putting the bomb in the Pacific but criticise these Chinese for making this conference and this kind of a artificial thing, according to them.

Because in the conference they are discussing morality. And French don't want to hear about it. Though it is called that the French are, France is the eldest daughter of Catholic Church. But there is an unwritten law that a housewife could be a prostitute. How can they like Chinese, or how can they like Indians whose basis of life is morality? So this is how, you should know how you are placed in a very, very high position as far as morality and spirituality is concerned.

There have been some sort of misunderstanding between India and China. But, it will all pass over because I know basically we are the same. And Indians have great, great love and respect for Chinese.

Our Commander-in-Chief, Mister Joshi, who was a Sahaja Yogi and who talked to Me about the Chinese and I gave him the full idea that we have done lots of mistakes, they have done some mistakes. And he admitted that and

when he came here he said, “They gave me a red carpet treatment." So what we have to understand that already basically we have a very big foundation here of spirituality in this country. It has nothing to do what kind of political... what you can call a political sort of, like this is communism, that is so-called democracy, all that. It's nothing to do with you. It is something outside. What is democracy is all you can call them demono-cracy.

So what is important is: how far you are evolved within, not what you have got outside, so-called. I personally think that this inner evolution has taken place in a very greater way in this great country of China. As long as you don't interfere with the government, you're all right.

So we don't have to be in any way curbed because we are democratics or we are socialists or we are communists, makes no difference to us. Because I told you all these stories to show: those who think they are very free are absolutely absurd people.

Now, My own experience of Chinese has been really very great. I don't know now, but when I came I was surprised how honest they were, absolutely honest. And they were so sensitive about Me, that wherever My husband went, whatever office, they used to invite Me there. I mean, I was just a housewife, but they showed such respect for Me, I was amazed.

We were here in this city and in a hotel, very good hotel and My toe ring, which was silver only, fell down somewhere. Then we went to Tachai, all kinds of places, ultimately we reached Shanghai. And I was amazed that this toe ring was sent to Me, very carefully wrapped, so sweetly. I couldn't understand why they took so much

trouble. And it really touched My heart, shows how much they loved Me. Because nothing was special about Me that time.

So I found that extremely compassionate and loving people. And some sort of a idea of spirituality, of sensitivity to it. Because the way they behaved towards Me, not for a housewife, they would never behave like this for a housewife.

I know once in London there was an exhibition which I could not attend because I was out of station so they extended the exhibition for two days for Me. The whole transition also took place because of wisdom.

But people who are not wise, who are not evolved, cannot understand there has to be transformation. Now I am talking of global transformation, of global transformation. This is the time for global transformation.

When this Kuṇḍalinī rises, She passes through six centers which are for our physical, mental, emotional being. And these subtle centers are very important because they are the foundation of our being. This Kuṇḍalinī, we can call It as a residual energy which is the fifth energy we have got. Now, we have limited energy of our mind, of our mind.

So we have to have more energy, extra energy if it is available.

So far we have seen that the man who starts thinking about the future and the past all the time is in trouble. One thought rises, falls off. Another thought rises, falls off. And we are jumping on the cusp of these thoughts all the time like mad. But when this Kuṇḍalinī, this power rises She elongates those thoughts and then the space in

between. It's a living process; it has to happen; it's spontaneous. And in the center of these thoughts, then there is a space created. This is present. This is where you become thoughtlessly aware. You're thoughtless, but you're aware. There's no thought. This is the seed of our peace. This is what I said today that if you don't have peace within, how can you have peace without? I have met many people who have got peace awards. But they are so hot tempered that if you have to talk to them, have a barge pole in between. I don't know how they give them peace awards, for what? This is what, we talk of “peace, peace, peace." It's just a talk. Unless you have peace within yourself you cannot create peace outside.

I must tell you about Sahaja Yogis from Moscow. You'll be surprised how much they are changed.

When they were having this coup, I was there in Moscow and I asked them, “Aren't you troubled with this that is happening in this country of yours?" They said, “Mother, why should we worry? We are in the kingdom of Divine. Why should we worry about what's happening here?" That was really surprising for Russians to say that. Of course, thirty-five to forty percent people are for Marlboro cigarette, but in China, I'm sure, there is a very big percentage of people who are quite evolved.

In short, I tell you what can happen once you get this global transformation. Firstly, you get cured.

You get all physical problems are solved. Now we have four doctors in Delhi who have achieved M.D. in Sahaja Yoga. It is a meta science I am talking about; it's a meta science. Even if you may not be a doctor, you can cure yourself and you can cure others without paying any

money whatsoever. Because you get the light of the Spirit in your consciousness, in your attention. Because we are not this body, this mind, these emotions, this intelligence, ego or conditioning. We are the pure Spirit.

So unless and until we get our Selfhood, we don't know what we are. Like this instrument, if it is not connected to the mains, it has no meaning, it has no identity. In the same way, we are to be connected to the mains for this All-pervading Power of Spirituality or Divine Power of Love. Once that happens, you start getting that vital energy within you. You become absolutely dynamic. At the same time you become extremely compassionate.

Now, see, I'm seventy-three years of age and I'm travelling every third day. I came from Frankfurt all the way travelling for nine, ten hours and they took Me straight to the hall where I had to speak about peace.

Because you don't worry. You are in the center; you are in the reality; you are in the present. And then this All-pervading Power of Divine Love looks after you. It takes over. Such coincidences will take place that you will feel that you are being looked after by somebody. You are protected; you're helped; you're blessed. Also you drop out all your bad habits. I have seen even Americans giving up their addictions to drugs, overnight. Now also what happens to you that your attention becomes enlightened.

So wherever you pay attention, this attention works and so many miraculous things happen that you can't believe it.

Once you will start growing in Sahaja Yoga, they will tell you about the miracles that can happen. Even you will

write to Me about many miracles. Now we have such a lot of collection of these miracles and we don't know what to do with them.

So life becomes really a blissful, peaceful existence. You also get powers to raise the Kuṇḍalinī of others. You have so many powers, your intellectual powers, your perception, everything becomes really so dynamic, you'll be amazed at it. And you take to righteous ways of life, automatically. Nobody has to tell you, “Don't do this, don't do that” you become that way.

So many qualities develop that in this lecture I cannot tell you all that, but you'll be amazed at yourself. I have seen people solve their problems very well. They lose the sense of greed and lust and they automatically become moral, automatically.

Now the greatest thing about this is that you become a universal being. Like a drop becomes the ocean. Lao Tze has described this. In ways He has described and I'm sure that you all will achieve it and you'll grow into it and you'll enjoy yourself. The best part of it that you jump into the Ocean of Joy. Joy is absolute, it is not a double coin like happiness and unhappiness. Such love, such understanding exists.

Now see here we have people from all the countries. I said, “Now this is the United Nations." This changes your database of your genes.

It is very surprising that we are not aware about our greatness, our growth. But we must respect ourselves because we are human beings at the epitome of evolution. Now the time has come to know yourself and understand how powerful you are.

Thank you very much. I'm so happy, you don't know, that somehow we have entered into China.

Thank you very much. Thank you.

If you have any questions, I don't mind answering them.

[Right after the Program, referring to the autographs Shri Mataji gave to three ladies that were sitting in the front row and came straight to Her:] Look at this [laughing], now I have become a movie star! I have to give autographs.

[Later on to Sahaja Yogis:] They [Chinese people] would take to Sahaja Yoga very rapidly but the initial introduction was very important.

Contents: 1995-09-16 **TV Interview, Central TV Station, Airport, Beijing, China.....**

I have left My heart in China, as Tagore once said.

.....

I have left My heart in China. If the Chinese people invite Me, I will come back.

Variant 2:... as Tagore once said, I have left My Heart in China. If Chinese people invite Me, I will surely come back.

Contents: 1995-09-17 **Śhrī Shakti Devī Pūjā, Love and Joy of Collectivity, Moscow, Russia**

I am sorry, I was little late today, but I am sure you must have enjoyed each other and the *[UNCLEAR* company]. Enjoyment of collectivity is very great.

Once it happened, I was going to some place and the plane was very late and I was little worried that I'll be

reaching late there. But actually the plane was so late that I reached after seven hours more. And all the people were waiting for that time at the airport. That was in Delhi and when I reached there, they looked so fresh and nice, I was surprised. I said, “Did you go home?" “No, no, we were waiting here only for You at the airport." All singing, dancing nicely the whole night. It's something about Sahaja Yoga that every moment we can enjoy. We can enjoy for our benefit.

Modern ideas are, as in the west is, especially in America, that we must enjoy every moment of our life. But actually all these enjoyments that they have are self destructive. The kind of things they do, like drinking or they go to places where they start fighting or else they do all other hopeless things that should not be done. And thus their collectivity becomes very dangerous.

So much so that they are smuggling or they are killing. They all become collective to do something very harmful to themselves or to their nation.

But Sahaja Yogis don't know this kind of enjoyment. Every moment is filled with such joy for them when they are in collective. I could see that yesterday when you had gathered at the airport and were waiting for Me. When I came I saw your faces all shining with joy.

Today we have decided to have a Pūjā of the Devī, of the Goddess, in the form which I am in. Many a times, She has taken birth to protect human beings from the evil forces and to give them sense of security.

But I don't think in any one of Her lives, She did Self-realisation *[UNCLEAR* job]. This is the most interesting, most lovable job. She had to fight all kinds of evil people

and protect the devas [Gods], the people who were good people, also, who were suffering for their innocence and simplicity. All this was long time back. But these are special blossom times where all of you have to become fruits.

So many flowers were there on this earth and you have to now become the fruits. It is very heartening to see that in Russia and Ukraine, people are so spiritually sensitive.

It is very, very blissful for all of you to be realised Souls. All this collective happening is definitely going to bring very great emancipation for the whole world. There are problems in our country, but now I am telling all the Sahaja Yogis that whatever you have got, you must project that power of the Goddess, deliberately. It is very enjoyable to be a Sahaja Yogi. Also, you are spreading Sahaja Yoga very fast, just like fire. Because this land surprisingly, these both the countries, are so much sensitive to spirituality.

But this power of the Goddess that you have got within yourself has now to be deliberately projected.

For example when I, once I came here when you were having a coup, very difficult time and perhaps, I managed it. But now you all can manage, you all can project.

For example, now I find the problem here is more of financial type. Now if you all project your mind to this problem, you will realise what's the cause of it. The devotion you have for Me is very gratifying.

I am your Mother and I am also Mother of the Ukraine people but I am also the Mother of Russia and the whole of Ukraine. I will be only satisfied when all the problems

of this country and of Ukraine will be solved by you. You don't have to depend on your government for that. I have been telling you that I have noticed why this country is going down.

So this power of the Goddess that you have within yourself, will give you so much of understanding through the enlightened intelligence that you can really solve the problem.

Now first thing I've noticed in this country: that people think that the whole Western world is like *[UNCLEAR* paint] with gold. [GAP for few seconds as Mother adjusts the mic.] It is not *[UNCLEAR* paint] with gold. They are not at all full of joy as you are. They don't have the kind of faces you have, full of beauty, full of satisfaction. But if you see it minutely, they are having little problem even with the finances. Now the problem in this country is because all kinds of foreign goods have come from these Western countries. There is a complete recession in those countries, nothing sells. And this is all junk, useless things they are sending to your country, to Ukraine and to all the Eastern Bloc people. Whatever rubles you have, you have spent, you are wasting on these junky things.

When in My country, there was a struggle of independence then Mahatma Gandhi said, “We'll not buy a single thing from abroad." And then he said that, “If we don't buy anything from foreign then our industries, our handicrafts will come up." And he changed the lifestyle of our country. Everybody had to wear hand-woven, hand-spun clothes or which are made only in India. Even today in India, you can not get anything imported in the market. And if anybody *[UNCLEAR* try/tried] to sell

anything, the young volunteers, like students and young people, used to go and stand before the shops and used to say don't buy foreign things. And that time there were Britishers ruling us, so they would arrest, doesn't matter.

So, all the import was stopped. Now even today we can not buy anything imported in the market. Of course, there are some stupid people who smuggle and some stupid people want to take to that kind of a culture. But they are very few and they are all getting exposed due to the power of the Goddess in that country.

So you are duty bound to your own country. This is the Mother Earth which has given you a place, has given you the birth and as such you have to looked after the prestige and the well being of this country.

I am amazed to see so many junky shops brought in here by these Americans and all the people wasting their precious money on this junk. But once you stop completely buying what all these things coming from the foreign countries, then you'll be amazed, what will they do here? They are all against the Divine Power of love because they want to exploit. If you love somebody you can not exploit others. This is not a very nourishing thing for your country.

All their styles, if you want to see what they are doing in the west, you'll be shocked. They have destroyed everything that was beautiful given to them by the Goddess. They have no sense of a pious life. They have no sense of spirituality. They just know money, money, money. They have no sense of morality. Without morality how can you please the Goddess? So you have to understand that if you are Sahaja Yogis, what will please

the Goddess. Unless and until you can please the Goddess, you can never be joyous; you can never be good Sahaja Yogis.

For that, you must have wisdom to understand what will please the Goddess. I don't think Western people have even half of wisdom that you have, except for Sahaja Yogis, of course. Because they think of these temporary pleasures all the time and they get into immoral lifestyle which is against the power of the Goddess. They are suffering from horrible, incurable diseases. They kill their parents. They kill their children. There is no question of love. The power of the Goddess is of love. Whatever She does with the whole world is through Her compassion and love. The whole body, the whole being of the Goddess is made of compassion and love and nothing else. This power gives full understanding of the reality and also this enlightens inside and outside.

For example, if you love somebody, you know everything about that person. It has nothing to do with money. It's the highest, most valuable, very important powers that you have. Even when you think about something noble, something benevolent, this power is filled into that thought and then this thought fills in, into the universe, into your country, into individuals. The aim of this compassion and love is only one, to see everyone joyous, that's all, joyous in the real sense of the word. This power cares for the collective as well as for the individual. It cares for the whole world as well as particular nation. All the time this power works, specially in modern times, to better the lives of people of the whole world. But

unfortunately, not there are many countries like you, who have heart to feel the love of their Mother Goddess.

So it's like an ocean of love and compassion that wants to touch every shore. It wants to touch every heart but some are just like stones.

Russia has a very great heart as well as Ukraine. Also, I find in the Eastern Bloc, I don't know how they have developed, this great noble heart. We are not to think them to be low because they, they are not so rich. What's the use of the riches where you can not even trust your own children and children can not trust their own parents. They kill each other for money. Of course this effect also is there that there are people who want money at any cost.

I promise that all such Mafiās will be finished in no time. [Clapping.] If you all decide that you are not going to be afraid of them and if you all in your meditation ask that they should be finished, it will be done. You should, as yesterday asked for My good health, you ask for the betterment of your country.

These are the deliberations of your thoughts. Your intelligence will sharpen so much, this is I call as a supreme intelligence by which you will see the point and you will be able to solve these problems.

So first you have to be patriotic. I must say, when I went to China, I was amazed, though they are communist, they are very patriotic. They are very moral also. I found that the way they have grown in their finances, it is because all the people who have gone out of China are sending money in China to develop.

For this conference, when I went there, I was amazed how the volunteers, who were just students, offered their services free. [Repeats for the Russian translator:] The students offered their services free.

They were at the airport, they were in the hotels, they were in the markets, everywhere they were standing to see that this conference becomes successful. Otherwise Chinese are very fond of food, but they would not even take their food the whole day, *[UNCLEAR* they would not]. For example, they were very kind to Me and when we went out, the whole day we were out, the driver never complained that he had no, what, food, nothing. They are not realised Souls, but when I came out to go in the car, they all would come and put a hand on the entrance of the car so that I should not hit. And they looked after all the people who were not so healthy, old or those who could not walk, they carried their chair up to the Great Wall of China. I mean, so much so that I saw on the television that people who had come there, even Americans, were crying to go back. And the Americans, such stone hearted people, also were saying that we miss this love in our country. It was so touching and so obvious in these modern times when people are so dry and so money oriented. These people worked without any money, they wouldn't take any tips or anything.

We went for shopping and we gave realisation to so many, there in the shop, went to the bazār, we gave realisation. They were all getting realised very fast. I told them one thing when they asked, I said, “Russians do not like because Chinese go there and marry, you see, Russian women and then they give up and bring their

own wives." So they told Me, the reason is see Russian women are very good for divorce.

They take to divorce very fast and very dominating, not Sahaja Yogis, not Sahaja Yogis. But the Chinese women are not like that, they are very wise. They know their role is very important and that their children are to be created who should be very good Chinese. Normally they don't want to go out of the family and neglect the children, not at all. But if they have a grandmother or somebody then they leave the children with them, who are also very, very affectionate and kind and then they go out to work. But I was amazed, they were doing all kinds of work as Russians do. They may not drive trains, may not be big industries, because you know the Chinese women are so short and so dainty.

While by God's grace, God has given you people a better health and better heights. And they really appreciate saying that see, they are like giants, what are we, we are pygmies. I was surprised because they did not criticise anyone but for everybody they knew what to praise. Very surprising that also for American people who were there, they said, “They are still childish. They have to still grow." Surprising, I thought that these were so insulting there, trying to show off, everything. They said, “They are childish." I don't bother about the kind of government they have or you have but what is most important is what sort of people we are. I was surprised at them, they're very much concerned about their children, how they behave, how they talk, how they are related to others. They teach their children that you must share your things, doesn't belong to you, it belongs to all the

children. It's just like Sahaja that we want all the people to enjoy everything together.

Also, the way they respect the art of their country. I was amazed, they know all about their artist in their country, such a big country. They also know what sort of art is produced in this part or that part or any part, I was really amazed, specially the men! In India, our men are hopeless. They are not bothered about art at all. They don't know anything. They don't know how to even you to clean the house or clean the utensils, nothing. Of course, they don't know even how to cook. They are another children, I must say, they have to learn a lot. I think in this women play a part because women do everything and keep the men absolutely ignorant.

So the man is completely under the hand of the woman. They don't know the roads. They don't know the cities, nothing, the woman knows. Now if you ask them, “What is this carpet, from what country?" They'll say, “We don't know from where it is." It is very important for you to know your country, to love your country. If you don't know your country, how will you love? If you don't know your Mother, how will you love? Is a very great power working there and I am sure one day these Chinese also will join your group completely.

With love comes another thing which is the respect. *[UNCLEAR* As] you people are here of different places, of different qualities and capabilities but you love each other. You don't disrespect anyone because somebody is dark-coloured or a fair-coloured person. Because your love has given those special subtle inner eyes which sees the inner *[UNCLEAR* beauty of everything]. You enjoy each

other because you know the value of love. As I said, love is the most important, the most valuable thing. But this love has to be absolutely pure love without lust and greed. You should not love somebody because you want to take advantage of that person or because that person has money or some sort of a attraction. This love doesn't identify...

... *[UNCLEAR* by computer]. Why should Russia try to become so modern and mechanized, I can't understand.

So one has to know that if you take to this mechanization too much, you loose the power of love. This industrialisation in the west has ruined these people, they have no hearts. *[UNCLEAR* But] power of the Goddess can not work through robots, can it? As far as possible, you don't need any mechanization.

It happened once in Ganapatipule, that mic failed completely and the music, we could not start.

So somebody came from Delhi organization and told Me, “Mother, we have people from Noida who don't require mics." I had never heard about that group. I had never known there is such group. They were never given a chance to sing even because they might be called as rustic people, may be the village.

So immediately I said, “Alright, let them come on the stage." And even today you will know that all of us know about Noida music. They sang with love, with such a big voice, that all over the world now you can hear the music of Noida, the rustic poetry of Noida.

For love you don't require sophistication. If you have real love, you become so gentle, so sweet. It is the greatest

blessings of the Goddess. But love doesn't make you mad.

Some people think that if you are in love with somebody, you can kill anybody you like if you can not get that love. They are doing it everywhere. Love is something so pure that is very powerful and it acts. Just as I was telling yesterday, they were all locked up there and so many of... all of them were worried, you see, trying to tell them that I should be allowed to come out. They were not willing to listen to anyone. [Repeats for the translator:] They were not willing to listen to anyone.

Just I said “you all forget, let Me handle it." I just went and stood before that gentleman, immediately he took My passport and stamped, without argument, without any problem. Because it is silent, but it acts in such a beautiful way. It is also very intelligent. It gives you solutions. It is down to earth because it wants to manifest. It will not harm anyone. It will not trouble anyone.

I always give the example of the intelligent cell which is at the end of a root. This root starts growing and this little cell, very little, it knows how to go in the Mother Earth. Now supposing it meets a stone, alright it goes round the stone, nicely binds it *[UNCLEAR* into a flower]. The manifestation is that when the big tree will come, it will be supported by these stones.

So this simple love that it puts round the stone ultimately manifests.

Thus this love is power of the Goddess, is very subtle, silent, but it manifests. All these manifestations you call them as miracles. You may call them by any name. It is

this Goddess which is ruling this universe, which is in your center Heart, which looks after you and looks after the whole universe, is nothing but pure desire of love. It knows how to express. It knows how to act. You don't have to do anything. It's spontaneous. What goes against is your mental activity because the mental activity will say, “Oh my! How can you love somebody like this? It's no use." It's a mental activity which gives you funny ideas. The mental activity is limited and linear. Everybody has different fixed ideas, that's why they are fighting, that's why they are having wars. But this power that is of love gives you the absolute truth. Then how can you fight? So what we need is this power because our power is very limited. I know you all love Me very much. But you must love each other. You must respect each other. Then only I will feel that there has been manifestation of this love.

We were in one Sahaja Yogi's house and he had called other Sahaja Yogis, also, to meet Me. I had to take dinner in his house, it was decided before. I didn't know that he had cooked for all the people who had come.

So I told them now like, “The session is over. You can go home." because I thought this man can not cook for so many people.

So as they were going down, he came, “Mother! What have you done? I have cooked for all of them." “Really? Now where are they gone? They are on the street." So, I went down the staircase, running up to the stairs. Come back, come back, come back. We have to *[UNCLEAR* have dinner]. And they really laughed and this gentleman who

had cooked for them, Sahaja Yogi, was so overjoyed. And we all enjoyed the food very much that night.

There is a very sweet story in the Rāmāyaṇa, I must tell you about this love. When Śhrī Rāma went to jungle, went into jungle in His exile, that time there was an very old lady, who had few teeth left, who was a great devotee of Śhrī Rāma. Her, see, whole life was dreaming about seeing Śhrī Rāma sometime and when she saw Śhrī Rāma, she absolutely was full of joy. She was rustic, from aboriginal tribe, which in India according to caste system is very low. But she had *[UNCLEAR* gathered/gather] some rustic thing called ber, which is a, what you call is, what you call here I don't know, a little, little berries. And she went and told Śhrī Rāma that, “This, I have seen, because You don't like sour things, I have tested all of them with my teeth and that's how I selected for You." In India, nobody will eat if somebody else touched that with the mouth, nobody eats, you know, it's very unhygienic according to Indian standards of hygiene. Only the Goddess, if She eats some food and if She touches something, food, that's regarded as very holy. This was the other way round. She was offering to an incarnation, something *[UNCLEAR* tasted/tested] by her, spoiled completely.

So Śhrī Rāma, He had the same power of the Goddess, He immediately took those from her, all the fruits, started eating and He said, “I have never seen such fruits, full of ambrosia, Amṛut phal." So His wife said, “Can I have some also?" But the brother was very furious, he said, he thought, this woman is, has not been at all protocolish and he wanted to hit her. But when the wife of Śhrī Rāma

asked for the fruit, he was, he kept quiet. When the wife Sītā, She ate it and She said, “Oh really! What fruits these are? I have never eaten such fruits of ambrosia." Then the brother started thinking that, `These two persons having all the ambrosia, what about me?' So he asked his sister-in-law, “Can I have some of these fruits?" She said, “No, no, because you were angry. Now why do you want to have the fruits?" He said, “Please, please let me have some." So he was given some fruits and when he ate it, he said, “My goodness! It has the essence of the best fruits." That is how, above all, above all sophistication, above all these mechanical things is this dynamic power of love which is given to you as it was given to Śhrī Gaṇeśh. And you should be assuming that, assume.

Once you have the assumption then you can project, individually or collectively. Even if you want to win over somebody, in your heart you should say, “Alright, the Goddess Mother, please act on this fellow. Let my pure love act on him." And you'll be surprised, how you'll win over. 99 percent people will come into the complete control of this pure love. At the same time, this pure love ruins, destroys completely any negative force that is trying to harm you. It is just you have to understand a complete picture of reality, because it is the light *[UNCLEAR* which/it] enlightens all darkness within and without. When you have that love, you are peaceful within and your peace manifests.

May God bless you all.

Dr. Valentina: [cautions that it is very cold in St. Petersburg].

Shri Mataji: You just pay attention, the Sun will be at your service... now you have become one with the Divine Power, all the nature will be at your service.

[Sun beams on arrival in St. Petersburg.]

Contents: 1995-09-19 **International Scientific Conference `Morality, Health and the World', Day 1, St. Petersburg, Russia, Conference, St. Petersburg, Russia**

Metropolitan Loann [on behalf of Petrovskaya Academy of Arts uses a quote from Shri Mataji]: Now human development depends to a great extent on the way Russia will choose to go.

Ayatollah Mehdi Rouhani: [Addresses Shri Mataji as the 12th Imam].

[The Government Department of Spirituality offered collaboration with Sahaja Yoga.] Shri Mataji [responds lovingly]: Actually I don't need anything from you. I am sufficient in Myself.

I also don't need Sahaja Yoga. But why am I running everywhere? Because this love, this compassion within Me makes Me do all this. Because people are blind they can't see. I don't need to have any more churches, mosques or synagogues. But in the heart of the human beings is the spirit. In the heart we have to create peace.

Contents: 1995-09-20 **Talk at the International Scientific Conference `Morality, Health and the World', Day 2, St. Petersburg, Russia**

I bow to all the people who are seeking peace from their heart. If it is superficial, then I can not help.

But when we realise that all these wars have brought such a calamity on your nation and all the nations concerned, we should now really think seriously about peace.

I'm against no religion. All the religions came on this Earth as flowers on the same tree of spirituality.

And then it so happened that people plucked these flowers and now are fighting with the dead flowers, “This is mine, this is mine." After the Second World War a new style of war has started in the name of God. How can you fight if you believe in one God? So it is just a mental idea they have. It's not the real faith in the heart. No religion teaches you to hate, but the situation is just the opposite. I know in the beginning all these religions came in the purest form and tried to bring love, peace and unity in this world, but some people became in charge of the religion. They were also nice, but gradually they started separating from each other. Not only it was among religions, but among every religion there were different, different sects.

Whatever they have done, at least they have created the feeling of righteousness among people. They have talked of morality. They have talked of love and compassion. They have built many organizations to express that feeling, but all that has been very superficial. You see anybody who says he's a Christian or a Muslim or a

Hindu, is he really that? Is he really a Christian? Christ has said, “Thou shall not have adulterous eyes." Have you met any Christians who doesn't have adulterous eyes or who never had? Mohammed Sahib has said that “Unless and until you know yourself, you will not know God." Self means the Spirit. How many have tried that? All these Muslims, are they trying to be spirit-oriented? They are just fighting, fighting, fighting everywhere. I feel so sorry for them because thousands are killed in this and they're made to have wars, they're encouraged to have wars and so many are killed stupidly. They have been completely butchered.

I asked a Russian, “Why do you have this Chechnya war?" He says that “We are a democratic country and in a democratic country how can you have a nation which is based on religion?" which is very reasonable and logical. But do you know in England there's only one religion. That is Church of England. They say that Catholic Church's eldest daughter is France. In Spain they have nothing but Catholic Church. Here you have nothing but Orthodox. Whatever good they have done is neutralised by this because those who don't follow their religion according to them, they are heathens.

If you want to know about the Muslims, go and ask the Jews. If you want to know about the Jews, so go and ask Christians. And if you want to know about Christians, better go to America and see what they are doing. Openly, Christians are extremely immoral people. Today I saw a little glimpse of the Russian film. It was worst than an American film. One girl, who was absolutely quite nude, was there just like an American girl, without any

shame, without any morality. Did Christ preach immorality? Did He talk of prostitution? In the West even the housewives behave like prostitutes because I have seen it. They have no respect of their chastity. And very nicely all the junk from America is coming here because they can not sell it. And you are all buying that junk without thinking. And you are taking to all the immoral ways of the West.

So how are you Christians? Same about the Muslims. They talk of Islam, which was such a great, I should say, a religion which professed morality, which talked of morality. Mohammed Sahib even talked about Christ and His Mother's chastity, but if you see that Muslims, they are sometimes worse than Christians. Once I was travelling from Riyadh to London and I went off to sleep. When I got up all those people, women and men who were wearing all Arabic dresses and bouka went with Me in the plane. When I got up what I find, they were all wearing fashionable, new types of dresses, the women were wearing, absolutely shameful. And the men were wearing also horrible dresses like clowns. They were all drinking, smoking and doing disco dance in the plane.

So I asked the air hostess, who had covered her face because she was an air hostess, I said, “Did we go somewhere else in between in our travel?" She said, “No, no, no, no, nowhere." So I said, “What these people?" “They're the same?" “How are they changed?" They said, “You go and see them in London, you will know." They drink more than Scotsmen. We have been to many parties because of My husband's job and they use to call

My husband Muslim because he did not drink. All the rest used to drink nicely.

Christianity has failed. Islam has failed, no doubt. By forcing, you cannot bring morality. This I could see. I met some Englishman. I said, “Why are you all the time looking at woman like this. Why?" They said, “We enjoy." But I said, “What about Christ?" They said, “We do this even in the church. Should we fix our eyes with something?" I said, “You can. There is a way. You are not Christians. You are not Muslims. You are not Jews. You are all hopelessly bad people." They said, “Then, Mother, what should we do?" “Are you seekers of truth?" I asked him, “Or you want to live with your fixed old ideas and also dwell upon something that `we are Christians, saved, we are Islam, we are saved people, we are Jews, we are saved people.' " Frankly, I will tell you, most of you will go to hell." They said, “Why?" “Because you are hypocrites." Reality is that you don't follow your religion. You just have a label here.

I've seen people fighting in the church, fighting in the mosque and fighting in the synagogues. Just imagine, from Abraham to Moses, Moses then to Christ, then to Mohammed Sahib, it's a regular step by step forward movement. Even the Shariat that Muslims are using doesn't belong to them, was not given by Koran, but it is in the Bible, in the Jeremiah that Moses gave it to Jews. And the Jews said, “No, no. We'll not have this one. It's too much." Then the Christians said, “Oh, we can't have." But the Muslims said, “All right, we'll have it." It's meant for Jews at the time Moses found them to be absolutely decadent. But does it help anyone? Now, if they believe

in the abstract God, in the formless God, specially the Muslims, why should they fight for any country or any land? God is everywhere. It is necessary that in every countries, like Russia, anyone, you have to know you are Russians first. Those who will think they are Muslim first or Christian first, they will fight because they are political minded, they're not spiritual minded people. You have to be spiritual minded, otherwise you should say you don't believe in God. If you believe in God, then you have to be spiritual minded. I've seen much more perhaps anyone of you could have seen.

Now the quarrel is between the Western culture and the culture of fundamentalists. The fundamentalists are saying that you should take to very strict culture. They're forcing it. In Algeria thousands of people were killed because they were dressed up like Westerners. They're throwing bombs in Paris. All kinds of violence they take to, these fundamentalists. Mohammed Sahib has talked about rahim, rehamat, compassion and there is no equality at all among Islamic people. They ill treat their women. One woman goes on producing children, eight to ten children and then they throw her away as t.

alāq. In India we have thousands and thousands of such women and children who are the poorest in our country. He said, that you can marry four women, but women should not become prostitutes. That was the time.

So now, they are mostly prostitutes. How are they to live? They should starve in the name of Islam? And also kill their children? What has Christianity done or Muslims or Jews, what have they done, what good. I know the people in charge of religion are working very hard to do

their level best, but they must face the reality. They have not achieved anything that Christ asked for, Mohammed asked for or Moses asked for. On the contrary, because of their blindness, they have brought such a bad name to all these great founders of these great religions of one tree, spirituality.

As you know, these days Americans are the rulers because money has become the God, so their culture is the God's culture. They're exploiting your country, you people don't know, you don't understand. I saw advertisement of imported goods in your television. Are you mad? All your money you are spending on this junks here which are not sold anywhere in the West or in America. All your learned people are going to America to become dishwashers. There is no sense of patriotism and sacrifice. In My country, I must say very proudly that you can not get even a tie which is imported thanks to Gandhiji. He said, “Don't buy anything from abroad. You can buy hand-woven, hand-spun cloth, which is course, doesn't matter." My parents sacrificed everything for the country because they were patriotic. And I'm also patriotic and I want all of you to be patriotic. It's only possible through Sahaj Yog. Not by saying I'm Islam, I am Christian, no, no, no. You have to first say you are a Russian. You can follow any path you like, but first of all know what you want.

Another thing which is such a sinister, illegal thing which has been accepted, called as Swiss bank.

Nobody says anything about it. They accepted it. Three fourths of our country, My country, is locked up in Swiss bank and I don't know how much Russian Mafiā is there

or any other Mafiā is there. Through your legal forces you must attack because they are illegal. This is the money was to go to the poor, to the sick, to the lepers. They have taken up all that money, these Swiss banks. When I addressed World Conference of Women, I said you all should attack Swiss bank. They have no legal right to exist. For example, I'll tell you in My country what happened. India was a country with great potential, but three hundred years very nicely the British came and stayed in our country without any visa. They looted us and then now the situation is such if one Indian wants to go to England they will thoroughly examine him.

They took away all our gold, our diamonds, our silver, all the precious things we had they took away, just like a highway robbery. And they call themselves Christians, all right. Their label doesn't go out.

Now, before going they created problem between Muslims and Indians, not Hindus, because of Buddhists, Jainists, everybody.

So the Muslims said we'll have our own land, as usual. They're very attached to land. Muslims are very attached. I don't know why.

So they took Pakistan and Bangladesh. Bangladesh is the poorest country in the whole world, much worst than even Ukraine. Now they are smuggling themselves to come back. To India, they are somehow or another managing to come back and Chinese are giving them weapons to fight us. But Pakistan is much worse because the people from India who opted for Pakistan, they thought they'd become very rich and they will have big positions. And what happened to them that they were

treated just like slaves. Indians are very cunning and clever. They found themselves near Karachi, which is the most important port. Now they are saying, “Give us this land to us because here we are the majority." In one interview this gentleman, who is the leader of those people, said that this Prime Minister is like Hitler and she's killing everyday fourteen to sixteen people to reduce the majority.

So now that Muslims are fighting with Muslims. Saddam Hussein is fighting these rich Muslims. Kurds are fighting Turkish. Is this Islam? Is this the way to enshrine Mohammed Sahib? Because they have not found themselves, they don't know about God.

Sahaja Yoga is the only way by which you can get your Self-realisation, Self-knowledge. We have had people from all religions, from all races, from all the false Gurus. And all of them have told us that Sahaja Yoga is the only way by which we got our peace. If you have no peace within, how can you give peace to others. People who have been given awards of peace are horrible, hot-tempered people. They never even smile, as if there is a revolver behind them. They are so tense. How can they give peace to anyone? So the first we must achieve the peace within. This is My work for the last twenty-five years, not only that you get peace, but you get citizenship of the Kingdom of God.

Last time when I came to Russia there was a coup and I saw the Sahaja Yogis absolutely peaceful and I asked one, “Are you not worried about what's happening around?" They said, “Mother, we are in the Kingdom of God. Why should we worry. These governments will come

and go, but we have entered into eternal life." You could see it from their faces. It was no hypocrisy.

Sahaja Yoga is the one that gives you the absolute knowledge, not relative knowledge. Relative knowledge is that “Because I am Christian, I am higher than Muslims." And “I'm Muslin so I'm higher than Christians." Like that you see, competitive. With some fixed idea because you are born a Muslim, you are born a Christian, it's a fixed idea in that. Hitler was the climax of that. He said that he is a superior race. A superior race. They killed children in the gas chamber and they enjoyed. How can they be superior race? Whom do we consider superior are the Saints who have compassion and love.

So we have those ideas stuck into our head and we have no freedom, no courage to get out of those ideas which limit us. Moreover, our human energies are limited. Mental energies are limited. As all of them have said, “If I say there's a power which is all-pervading, why should we not try to get it? Why should we think that we are Christians or Muslims or whatever it is? But why not we get that energy which is described by Mohammed Sahib, by Christ, by Moses?" What is the harm? If you can get something, why not have it. Also it is free. You don't have to pay. Actually, I don't need anything from you. I am sufficient in Myself. I also don't need Sahaja Yog. But why am I running everywhere? Because this love, this compassion within Me makes Me do all this because people are blind, they can't see. I don't need to have anymore churches, anymore mosques, anymore synagogues. No need in these buildings. But in the heart

of the human beings is the Spirit. In the heart we have to create the peace. Now all this God has built...

[Aside.]... built in this whole mechanism of Kuṇḍalinī, God has made, not Me. Why has He made it? For the last breakthrough. It is your own Mother. She is going to do it. It's there. It's your own power. It's your own Mother. You have a right to get this. You have every right to become one with that Divine Power, to tap it. We have this instrument. Supposing God has made us an instrument, but we don't want to connect it to the mains. Then what are you? What is your identity? Why are you born? Why are you born? Now come to science. Science has its own limitations. Whatever they can discover is science. But can they say why human beings have come on this Earth? Can they say why evolution took place? Can they say what is the aim of human beings? They can not answer many, many questions. Say for doctors, you ask them who runs your heart? They'll say autonomous nervous system. Who is this auto? They have no answer. Now, in the body, there are acetylcholine and adrenaline, two chemicals. One augments, one relaxes. But in the body it acts arbitrary. Nobody knows why. The one which has to augment, contract, relaxes. Why? Can they explain? Now anything foreign goes in the body has to be thrown out immediately by the body. All right, but when the foetus is formed, it's not thrown out. It is kept, nourished, developed up to the right timing and then it is thrown away. Who does this discrimination? Can doctors answer this question? They can not say what is the purpose of our life. We can take any of these sciences which are everyday bringing out new hypothesis and new

discoveries. There's a big competition between the scientists. There's a big fight going on and then what have they produced? Atom bomb, hydrogen bomb.

Because science is amoral, there is no morality for scientists. They can become spies. They can become killers. They can be scientists also. They can be drunkards. They can be adulterers. Just like any priest, no difference. What's wrong with them? They are so highly praised. They have so many awards, this, that and here you find they are so low level in morality, because they do not respect themselves. They do not respect themselves because they do not know what they are. They do not know how great they are. That's the trouble with all the human beings. We don't know what we are. We are not this body, this mind. We are not this intelligence and emotions. We are not this ego and conditioning of religions or anything, but we are pure Spirit.

So now, I tell you exactly, become the Spirit, what happens. I don't think anybody should object to that because it is for your benevolence, it is for benevolence of your family, for the benevolence of your nation, for the benevolence of the whole world.

So please listen to Me carefully. We have this power of Kuṇḍalinī within us. It's a very ancient science from India. In the Koran also is written “Asas". In the Bible it is said that “I will appear before you like tongues of flames." Now the reality is that you must experience. You not blindly have faith in Me. We have had enough problems of blind faiths on and off.

But experience, experiencing that this Kuṇḍalinī rises and pierces through your Fontanelle bone area. And the result, you get connected with this All-pervading Power of Divine Love. It is no lecture. It is no sermon. This is the actualisation of your baptism.

If you are wise, you will understand that we are not living in a very peaceful world.

So first thing happens to you is that you become thoughtlessly aware. When we are thinking, we are thinking of the future or the past, but not of the present. Present is the reality. Past is finished. Future doesn't exist.

But we can not be in the present, is a fact.

So now, one thought rises, falls, another thought rises and falls and we are jumping on the cusp of these thoughts of the past and future. But when Kuṇḍalinī rises, she elongates these thoughts and there is a space created in-between. That is the present, when you don't have a reflecting mind, you are absolutely at peace with yourself. You're aware, absolutely aware, but you are thoughtless. Jung has talked about it, Jung, little bit. I don't call him a full edged Sahaja Yogi, but he did oppose this Freud, horrible fellow. All right, so you become absolutely peaceful and when you get connected with this All-pervading Power, which is peace, absolute peace, no conflict. Bliss starts pouring into you and the peace spreads around. You make others peaceful. All ideas which are not truthful drop out.

So you know one thing, that God is the source of peace. That's how you can spread peace. In Sahaja Yoga you'll find this peace among thousands and thousands sitting

here. They may belong to any country, they may belong to any race, but, when they are together, they are like one ocean. It's not imagination because with this you become part and parcel of the whole because the drop becomes the ocean. They enjoy each other. They never fight because they are pure Spirit.

Another good thing happens to you is that your attention becomes enlightened. You might be all of you younger than Me, I don't know. I'm seventy-three now. I'll be seventy-four very soon. And most of the people at this age become senile.

[Aside.]... because attention becomes like this. It's difficult to change them also. But your attention will become enlightened. In that enlightened attention, firstly, you see the totality of the whole. It is enlightened with love and compassion. You see the good points of others and try to help who need your help. I must tell you an experience of Mine that first time I came to Russia, I didn't know any Russian language either and who came to help Me? There were Germans, twenty-five of them. German Sahaja Yogis came here first time to help Me. Tears came into My eyes. I said, “How are you here?" They said, “Mother, Germans have killed these Russians, so many Russians, we are duty bound to come here." See this kind of love, so genuine, is only possible when you become the Spirit. It's not talking, giving sermons and lectures.

Then second thing happens to your attention, that this enlightened attention gives you the right path, righteous path. Overnight, overnight, people have given up drugs, alcohol, all destructive things. In the West, idea is we

must enjoy every moment of our life, but every enjoyment is self-destructive. With Sahaja Yog you enjoy without getting into destruction. You enjoy all the nature. You enjoy all the human beings.

You enjoy all the innate religion, innate, again I say innate, not superficial. All this is available to you, is your own, which you have to have.

Now this attention is also powerful. Yesterday they told Me, “Mother, it will be cold, very cold in Leningrad." I told Sahaja Yogis, “You just pay attention, the sun will be there at your service." It was sunny yesterday.

[Aside.] So you can order it, all the nature to be at your lotus feet because now you have become one with this Divine Power. This Divine Power is the one which creates seasons, which creates everything. It has created you. It has created all of you and you, whatever is good for you, it will do, not something bad.

If you think that somebody should be killed, it won't work out. But after Realisation, after becoming the Spirit, you don't think of bad things.

Then the another very important thing happens to you, that wherever you put your attention, you can even give Realisation to people. Like one candle is enlightened, can enlighten many candles, thousands and thousands. I've not been to Africa and there are so many Sahaja Yogis in South Africa, in Cameroon, so many places. I've not been to Siberia. There have been so many who are in Siberia. It is spreading.

Those who will be against it will be dropped out very soon. People will know that they're hypocrites. We don't

have to worry about it. Automatically they will be found out. We should not think bad of anyone.

We should not curse anybody. They don't kill anybody. Sahaja Yogis can not kill any one. I was told in Brazil that Sahaja Yogis have become extremely honest.

So then, after you start giving Realisations to others, you become another state is doubtless aware, where you have no doubts about Sahaj Yoga, about Me, about the workings of Sahaja Yoga, also doubts about yourself. That level, once you have to achieve. Many have achieved in your country. Among all the Western people or the white skinned people, Russians are the most sensitive to Spirituality. They are not like Americans. Americans, I find them quite stupid. I mean you can't understand them. They're very stupid.

I'll give you an example. There was the president of the Jungian Society. He was at least twenty years older than Me. I was about sixty years.

So he said, “I told them about Jung, what mistake he had committed and they were very impressed." He came to Me, shaking with a stick. And he said, “I have a private problem." I said, “What is your problem?" He said, “I'm a Catholic and I had a keep. I could not marry her because I was a Catholic. I couldn't get a divorce." He said, “Catholics are allowed to have keeps, but they can't divorce." And he never told his wife who died. Now he wants to marry this lady. I said, “What is the age of your keep?" He said, “Only thirty-five." I was shocked. I mean she was the age of his granddaughter. I said, “What do you want Me to do, sir?" He said, “You please put in her heart feeling for me that she should marry me." I said

this eighty year fellow, shaking, asking Me of all the things, such a blessing. I told, “Sir, sorry I can't do this job for you." He was the president of the International Jungian Society. I mean such a stupid thing, you know. Any old man there wants to see Me, I said, “I'm sorry." Younger people are better because these old Johnnies, who still have stupid ideas in their head, want Me to do their stupid things. I tell you, if they had gone to Christ, He would have beaten them with hunters. If they had gone to Mohammed Sahib, He would have slapped them. It's impossible, these stupid people are trying to rule the whole world.

So you Russians are wise people. You have a great tradition. India has never invaded any country so far. Genghis Khan invaded us. Every type of invasion we had, every type of invasion, but in spirituality Indians know a lot. They know about Kuṇḍalinī. They don't want material things. They want their moksha, their Self-realisation. Of course, we also have some culprits, but everybody knows who is who.

But I have great respect for Russians and very great love because they never even had heard the name of Kuṇḍalinī. How did they accept it so fast? What was in them that it was seeking? What love, what understanding of this subtle subject. Very few people in the world are like you.

Now, this is the last judgment and those who miss will miss in any case. Christ has said, “You'll be calling Me, `Christ, Christ,' but I will not recognize you." So understand, you have to become the Spirit.

As Christ has said that “You are to be born again." You may have faith in Me or not, doesn't matter.

You must have faith in yourself to begin with. But, when you will grow spiritually, you will know better.

I'll not tell you what I am. I will never tell you what I am. Christ was the Son of God. You may deny it, but He was. But when He said that they crucified Him, stupid people. I don't want to get crucified, so I will not tell you what I am, but I must be something, no doubt. It makes no difference to Me. Whatever I am, I am. But I'm not going to tell you. You have to rise in your Spirit and realise it and understand it.

Why? Because you have to do good to others. With your ignorance, you will stop the progress of others.

What a responsibility, what a beautiful responsibility you have.

And last of all, you enter into the Kingdom of God and then drown into the Ocean of Joy. Joy has not got a double coil like happiness or unhappiness. It is singular. You lose all your lust and greed and you become detached and see yourself. You don't have to become an ascetic. You don't have to go to Himālayas. You don't have to fast. It is something internal, nothing to change outside. I know there is going to be global transformation in the world. Even the database of your genes change. All kinds of people have come to Sahaja Yoga, have got transformation.

So many people have been cured, have been cured of incurable diseases without paying anything, by their own powers, so easily Sahaj, spontaneous.

Even the animals, if you give them these Divine vibrations, even the crops and things grow ten times better.

So, in this last judgment, a new race of great people is created. It is your own. It is your own power. Only to know how glorious you are, how great you are, absolutely free because you get that superior intelligence.

In the light of Spirit, you know what is constructive for you. You know absolute knowledge.

So many things are in this small lecture, I can't tell you. Only thing I want to request all the people who are suppose to be in charge of religion, now they have brought people up to a point. Like different steps, they have crossed. For what? Why to have the religion? It is to ascend. They must ascend. The balance has to be established through religion. Like we have airplanes fixed in different, different shops, or you can call them, what is it called?, workshops, to get the balance because they have to fly. What's the use of just balancing without any flight.

So you have to fly. All the freedom of the Spirit you don't have to say, “Don't do this, don't do that." Nothing of the kind. You are ready to fly. Now enjoy your full freedom.

In this little lecture, whatever it is, I tried to express My Heart. Everybody thinks it is a miracle the way Sahaja Yoga has worked in this country and how they have solved their problems, even material problems.

So may God bless you all. What about asking the questions? [Aside.] I'm also a communist.

Question: Are you the Holy Spirit?

Shri Mataji: Write it down and give it Me please.

Repeated Question: Are you Holy Spirit...?

Shri Mataji: Now, I've already told you that I'm not going to say anything about it. I've already told. Now, if I say, why should you believe, blind faith? After Realisation you'll know everything. I don't want to get crucified.

[Aside.] You see, let them discover, it's the point. You can not force anything. Only thing you have to be honest people.

[Aside.] Thank you, thank you very much.

[Aside.] There was one question, “What is the purpose of human life?" The purpose of human life is to enter into the Kingdom of God. Is to enjoy the bounties of God Almighty. The purpose is to become the Spirit so that there is complete peace, harmony and pure joy. That is the role of God also. This another question.

Mister Roerich [a famous Russian painter who lived in India] went to, definitely he went to this gentleman to get some kind of a Buddhism. He was, himself, a very good man, but I don't know why he got allurement with this kind of a Buddhism. Is another kind of religion, which has not helped anyone. Buddha has talked about compassion, compassion and compassion. And the Japanese are the greatest Buddhists.

So you can see what sense is it. Compassion, Japanese are only doing their business. Buddhism has not entered into their mind. Like any other religion, only after knowing yourself it will happen. We have horrible cults in Japan under the name of Buddha.

I went to Canada and there was one fellow who came in the orange dress and I asked him, “Why are you wearing this orange dress?" So he said that “This is the only dress left now to me. I was a very rich man. All other money, everything is gone to Mister Dalai Lama." He's a great beggar and I was surprised that in the West people like if you beg money from them. In Boston they asked. “Many, how many Rolls-Royces I had?" I said, “I have none. I only have one car that My husband has." So they said, “You are not in the business?" I said, “No." They said, “We don't care for you. Get out." That's American style.

So this Dalai Lama has accumulated so much money. He has come in our country. No one likes him, but he is sitting on our heads. He's very fond of gold. He tells people, “You take Sannyāsa. You become ascetic. Give all your money to me” like all other false Gurus.

Buddha has failed, Christ has failed, Mohammed Sahib has failed because people never understood them. They were too great for human mind.

So the first thing I did was to study human beings for about forty-seven years of My age and I saw how complicated they were and then I found out this method of en masse Realisation. There were many Sufis who got Realisation. There were many Saints in India who got Realisation, but very, very few. Also, among Christians, there were some who got Realisation, Kahlil Gibran. But they were all tortured.

So we have to say now, to understand them also, you have to have your Self-knowledge. They're all making money in the name of these great founders of religion or they're spreading poison. In Mecca there were thousands

and thousands of Muslims and there was one fellow from Sudan. He was black, absolutely jet black and he was spreading poison in the name of Mohammed Sahib. I had somebody close to Me who knew Arabic and I was shocked. And just after that, there was a stampede and thirty-two people, innocent people who had gone for Haj, died in the stampede. You can't spread a poison in the name of Divine people. It is sinful.

Also this gentleman, this painter and his wife, both suffered a lot from physical health.

Question: How can achieve good attention?

Shri Mataji: You don't have to do anything because whatever you will do, you'll do through your mental activity. Mental activity is linear. There's no truth in it. It goes up to a point, recoils back on it.

But the power of Spirit spreads on all sides.

[Aside.] Now they're asking about attention. It's very simple, when the Kuṇḍalinī rises, the attention which is spread out here goes up like this, up. It is brought in the center. And, at this Sahasrāra, it breaks. When it breaks, you see, this whole attention is filled with enlightenment. You don't have to do anything, but you have to go on raising your Kuṇḍalinī like this yourself. That's all. When you watch something, watch something without thinking. Can you watch Me without thinking? Now you can feel the All-pervading Power in your hands, you'll see that. This is the namaz, but Muslims don't know anything. You will feel the Cool Breeze. This is the All-pervading Power and on your fingertips you will know about your centers and about the centers of others. All those who have felt

Cool Breeze or hot breeze on their hands or out of their Fontanelle bone area raise your hands.

So, all of you have felt it.

So simple because you are ready and because you're Russians. May God bless you.

Now we have centers here and we have doctors and we have people here who know how to cure you.

You can go to these centers [tell them] and get cured and you can also cure others. One thing I've seen, Russians in a huge crowd of sixteen, eighteen thousand people, they told Me they got cured in the program.

Only possible in Russia, not even in India. I respect you very much. I don't know of what metal you are made.

Person: There is a central charity Christian Orthodox fund, Shri Mataji. They want to cooperate with Sahaja Yoga.

Shri Mataji: Oh, I'm very happy. Now Central Charity Christian Orthodox Fund wants to cooperate with Sahaja Yoga. Thank you very much. Thank you. That's what I said they are wise. They are very wise people in this country. They will not stand in the way where they see that people are helped. For no rhyme and reason they will object to Sahaja Yoga. Thank you very much. I would like to thank.

[Aside.] Some Sahaja Yogini has written to Me. I'll go home and read the whole thing and I'll answer them...

answer them in the program, all right. It's a very big question.

Question: Shri Mataji, do you have a good opinion about Mikhail Gorbachev? What do you think about him now?

Shri Mataji: It's all again political business. I don't want to say anything about Gorbachev. I think he fell into the trap of these Americans or something. I don't know what to say. I have all respect for him.

But somehow he never wanted to meet Me. I tried. It's all right.

Question: What is the attitude to the husband?"

Shri Mataji: The question is there about the women, they want to know My attitude towards the husband.

Question: Sorry, Shri Mataji, Moonies *[UNCLEAR]*.

Shri Mataji: What a question. My goodness. You please don't ask Me about devils.

Question: If each and every person could be a Sahaja Yogi?

Shri Mataji: The question is if each and every person could be a Sahaja Yogi. Yes, of course. But say he's an idiot. He's stupid. He has fixed ideas. What else, who's arrogant. You see if your one foot is in the mouth of the crocodile and put one foot in the boat, what should we do? Question: Shri Mataji, please say how to tell about sects, about false Gurus. How we Sahaja Yogis have to talk about sects? Shri Mataji: Sahaja Yogis have to talk about how they should talk about the false Gurus. You see those people who have been to false Gurus are already suffering. They could be even quite mad. For example, I went to Chicago and there was one fellow of the Hare Rāma Hare Kṛiṣhṇa. He was the Chairman of Chicago Hare Rāma Hare Kṛiṣhṇa. It was very cold and he was wearing the dhoti you know this common in India, very thin. And he had shaved his hair and with a pony

tail, a little bit like that coming out. I said, “Sir, I'm a Mother, why are you wearing this dhoti in this cold weather? It's very cold you know, I'm shivering." He said, “My Guru has told me that if you wear a dhoti, you'll get moksha, nirvāṇa." I said, “What? In My country eighty percent wear this thing, so they'd be there already." He had shaved his hair.

I said, “Why did you shave your hair?" He said, “That my Guru has told me that that's the station to get into the heaven." He was American, you see. I said, “There is Kabīr, a great poet in India, said that by shaving your head if you can get your place in heavens, then what about the sheep that is shaved two times every year. Those sheep must be already there. Where will you have the place?" So he got very angry with Me. “You're talking against my Guru." I said, “See, you need not be angry with Me. Do what you like, your Guru has said, but tomorrow if you get sick with this dhoti don't come to Me." This “Hare Rāma Hare Kṛiṣhṇa" we say everyday in India. We don't say good morning like the English. We say, “Hare Rām” just like the Muslims say something, “Allah." So we say the same way. It's just a lip service. How can you go to heaven. He got angry but then he developed varicose veins. Next year he came to Me.

So, to deal with them, you have to be careful. Firstly, they are slaves of their Gurus. They have fixed ideas.

Some of them just start shaking before Me. They fall in the ground. But most of them now are finished.

First thing they mesmerize. We have one in India who used to mesmerize and bring out Swiss watches to give to people. Lastly, there were very great people from India

went to see him. There were four cameras. He could not mesmerize the camera.

So the cameras clearly showed how he brought a necklace and passed it on. And also our rich people in India are so stupid, rich not the poor. They used to go to him to get diamonds, can you imagine. I mean all kinds of tricks he did. But he was exposed by newspapers now. They're all getting exposed by God's grace. All falsehood will get exposed. Firstly if you tell them that you don't have to pay any money to the Guru, all the Gurus will jump in the sea.

Question: Is it possible for people who are not realised to feel the vibrations in your presence?

Shri Mataji: You see those who are not realised can not feel any vibrations, even in My presence.

[Answering a written question:] Then she's saying that how is it that the people do not accept or recognize that it is You and only You who is the Holy Ghost? They are asking Me again and again the same question. But I must tell you about Russians. First time, when I came to Leningrad nobody had heard about Me. Nobody had seen Me. There were only some advertisements in the newspaper with My face. I also look like Russians sometimes and, you know, they saw only My face in the newspaper and when I went for the program the whole place was filled already, two thousand people and two thousand were waiting outside. I was surprised. I went inside and people got their Realisation and when I came out they were still sitting. They said, “Mother, what about us?" I said, “All right, you come tomorrow. We'll sit outside in the open." It was very sunny and there were

two thousand from outside and two thousand from inside and two thousand more, six thousand people. I was amazed. They all got their Realisation. I said, “How did you come to My program?" They were not realised Souls. They said, “Mother, Your face, it's absolutely evident. We know who You are." I was surprised. That's why I praise Russians very much.

They are sensitive to truth. They are sensitive to spirituality. Maybe last lives they must have done lot of good things. I just don't know, but I find Russians extremely sensitive.

Another are Romanians, compared to all other Western countries. I'll tell you a joke. In Togliatti there was a joke that a Togliatti fellow asked an American, “How many Sahaj Yogis you have in America?" So he said, “Fifty-six." He said, “You have Fifty-six thousand. We have only twenty-one thousand in Togliatti." We had to hold the meeting in jungles near Volga River, because there were so many. Very sweet, very sweet, very sweet, I don't know how to express Myself for your love and understanding. Here I talked to scientists. There were two hundred fifty scientists sitting. They said, “Don't tell us about science. Tell us about God's science. We have had enough of science." Just think of it, such beautiful people like the flowers about to become the fruits. No credit for Me. I go to all the countries, sixty-five countries. Among all of them, you are so special. I don't know, when I leave you I feel somebody is wrenching My Heart.

May God bless you.

Question: If there are Chakras above Sahasrāra?

Shri Mataji: There are Chakras above Sahasrāra, but first of all establish yourself. Gradually everything will work out.

Question: What is to be attitude to the members of the family who are not Sahaja Yogis?

Shri Mataji: My family members were not Sahaja Yogis to begin with. My husband used to say, “I know You are a Saint, but You can not transform others. You are moral, but You can't make others moral." Now he's changed. He said, “I've seen all this happening. You've made them into angels. I have to be honest that You have done the job." Even now, My daughters, My grandchildren, everyone in My family, husband's family, My mother's family, they believe in Sahaja Yoga. But I would say that I showed all compassion, love and patience. But I would say they are not great Sahaja Yogis like Russians, but they will be. Also it's better to keep them out because Sahaja Yogis make such a fuss out of them which will spoil their chances. They should come to Sahaja Yoga like ordinary people, otherwise it will be like nepotism I don't want that.

Question: Mother, please tell us how to overcome the daily suffering of how making enough money to pay for the food.

Shri Mataji: Now she's asking how to make sufficient money to have the food. After coming to Sahaja Yoga, many people have solved their financial problems completely. How? First their attention becomes so good, that they can do many things which they could never do before and the blessings of the Divine start pouring on them. You have to have faith in yourself that you are

Sahaja Yogis and you'll be amazed so many things will happen. Such coincidences that you'll be amazed at yourself.

I give you two examples of a miracle. There was a girl, young girl, who got frustrated because she didn't do well or something and she shot herself on the stomach on the left hand side and the bullet came out from here from the right arm. Also there was some blood, but she was quite conscious.

So they took her to the hospital. Doctors were surprised. They x-rayed her, did everything and found that the bullet did not touch any nerve, any muscle, anything. Doctors said as if the bullet had a stroll around. Nobody could explain it. She came out of hospital second day.

Another miracle, recent, I mean recent one, there was a lady who's son was in America and who got into a horrible disease which is in her family at a very young age. Normally, they get it in the old age. She was working in the UN. She wrote to Me three letters praying that, “Mother, please cure my son. He's so young and he'll die within a month's time." And the fourth letter came from her, that he's all right, nothing is wrong with him. I didn't do anything, this All-pervading Power.

Another is another Sahaja Yogini in Turkey was thinking that her husband is not well employed in Turkey as a pilot and just out of the blue he got a job in Germany and now in America, a very big job. I don't do anything. I am the laziest person.

Question: What can save Russia?

Shri Mataji: I've already told you, you have to be patriotic. This is another revolution. You have to sacrifice

and you have to understand not to waste your money on these Western nonsensical things.

And Divine help will come to you.

So many Sahaja Yogis who dare touch you, you're all protected by the Divine. What else? Question: Shri Mataji, one of the symbols with Denmark is the elephant. Will Sahaja Yoga be established in Denmark?

Shri Mataji: If they're asking if Sahaja Yoga will go to Denmark because the symbol is the, what you call, the elephant. Sahaja Yoga in Denmark will move likes elephant only, I think.

Question: Will there be other incarnations on the Earth?

Shri Mataji: They're asking about incarnations, will there be incarnations and all of that. Why do you worry about all these things. I can't tell you.

Question: I want to know about these big problems... China.

Shri Mataji: He wants to know about China? You shouldn't mind if I say that we couldn't start Sahaja Yoga there in that way because still they're communists. But I'm sure the government of China will accept it very soon and then we can start Sahaja Yoga in a big way. Chinese are other very ancient people, very wise. Culturally, they are like Indians. They have morality in them. One thing I noticed, they were extremely hospitable, kind and gentle. You saw people there who were from Germany, from Africa, from America. They looked so gross. But Chinese, you know, they had arranged, through their students, the volunteers, very well trained girls and boys and so gentle. They were paid nothing. They are very patriotic

people one has to learn from them. I wish Indians were like that. They are very dignified, very well mannered. Of course, if you insult them, they don't like. I must admit that Indians did that, insult them. And art, what art they have. Their government doesn't allow much to come inside China.

They also don't care much for the Western culture. They dress up just like Chinese, most of them.

Moreover, they're very learned. They had two great philosophers, but the greatest was Lao Tze, who talked about Kuṇḍalinī, Realisation, everything. Confucius talked about humanity.

So they believe in Confucius because it suits communism. In Hong Kong there are many Chinese and I asked them what will you do when the Hong Kong goes to the China, mainland China? They said, “We are Chinese and we'll be with mainland China. What does it matter? We're not going to run away." And do you know how they became rich? So many Chinese have gone abroad. And after this episode of killing the young students they were angry, but when it was explained that how can you suddenly give freedom to these young boys, students. One can do it gradually.

Otherwise, like Russia, there will be problem of Mafiā. They are very wise.

So the Chinese who are abroad understood and the Chinese abroad send fifty to sixty percent of their income to their government.

They are not attached to money. That's how they have become rich, very dedicated. Thousands and thousands of people are there, but the system that they have built,

so beautiful that nobody will start playing. I was amazed that while working nobody drank anything, even a drop, so very alert. But when we were coming by that plane first class all the ladies and men were drinking vodka, vodka, bottles after bottles. I got a headache. Chinese are ashamed to do such a thing. Also they have told Me that the Chinese men marry Russian women and then give it up and call the Chinese women. I tell you, Chinese women are really very sweet. They don't compete with men. They are very sweet and they win over men with their sweetness. I also know they are very sensitive to spirituality. Even their prime minister asked Me about spirituality when I went with My husband. And I'm sure one day you'll find your brothers and sister very closely in China.

I hope I've been able to answer most of your questions. I thank the organizers of this conference from My Heart.

Question: Many questions about how to give up drinking Shri Mataji?

Shri Mataji: When you get your Self-realisation, in the light of Spirit, you give up everything which is destructive. How? I'll give an example. Supposing I'm very obstinate and I have a snake in my hand and there is darkness and you tell Me there is snake in your hand. I will say, “No, it's a rope." But when the light will come, immediately I will throw it away. In the same way, not only you give up drinking, that's not the only thing you do, but you give up everything that is bad for you. Because you also become very strong and free. Nothing can attack you, no habits. All drop out.

Contents: 1995-09-24 **Talk to Sahaja Yogis, Arrival, Airport, Borispol, Kiev, Ukraine**

I really don't know how to thank you for this surprise. It's very kind, all of My dear children, all of *[UNCLEAR* them/everyone] are here. I have a very great concern for Ukraine.

While coming airplane I was looking at your beautiful land near the river Dnieper. And I felt such a good land you have here and I also know that once upon a time this was a very reach country where the wheat and all this produce were supplied to whole of Europe.

So I was asking about what has happened to this country, it was very reach country just before separation.

So they said that this land is now doesn't belong to anybody and the government does all the *[UNCLEAR]* and *[UNCLEAR]*.

In the, in My country also we had same problem that land produce was very little because people were doing only for themselves. But then they formed cooperatives and gave the land to people, cooperatives and it was called as a green revolution. And thus our problem was solved. Our problem of food and *[UNCLEAR]* was solved.

So if Sahaja Yogis can ask for *[UNCLEAR]* cooperative form they can help their government to solve the problem. Because Ukrainian Sahaja Yogis are very deep and are very good people. We had one problem because of this Chernobyl problem. But it seems you people look very much now all right and healthy [smiles and Sahaja Yogis laugh and applaud].

With Sahaja Yoga all these problems which are minor can be easily solved. But one thing is that you must work in unison as one person, part and parcel of one union. And also try to understand how you can solve your problems. I was told that you don't have oil, doesn't matter. You are such great artists and are producing beautiful things out of your hands. And do you know in the West they don't know now anymore how to work with your hands.

So you can really sell all that out and can really solve your problems.

There are so many things you can think of because you are now realised Souls. Because there is a help of the Divine as well as you yourselves become very alert.

I found in Russia that Americans are taking over. They have brought all their dirty culture to Russia and people are taking to it. If you go to America you will know that they are really living in hell because they believe in a joy at every minute but what they are doing is nothing but self-destruction. Their music, their everything shows that they are extremely frustrated. With all the money they have are committing suicides. The mothers kill their children, the father kills the wife, goes on those killings.

So you should keep your own culture and this horrible culture will not be allowed to come. Most of the women are nothing but they are like prostitutes. All children are drug addicts or alcoholic the men are. They are not at all normal.

So Sahaja Yogi has to produce our Sahaj Culture, which brings peace, which brings joy and is based on innate morality.

I think this awakening is coming now even in Russia. I've been there for a conference and in the conference subject was `Health, Morality and Peace'.

So these are very important points to make a nation solid, not money. That comes automatically.

So I told them that don't buy anything that comes from abroad. Nothing imported you buy. You'll be amazed in India you can't buy even a pin from abroad, there's no shop like that. Mahatma Gandhi told that don't get anything from abroad and so we have come up. Three hundred years these British ruled us. They take away our gold, they take away our all precious stones, everything. But now India has come up by becoming Indians, that means by becoming patriotic, that means really give our children very nice chance.

I wish I could come for more time here *[UNCLEAR]* that I am running from place to place.

May God bless you all.

***Contents: 1995-09-25*, Public Program (1st Day of Navarātri), October Palace (now International Centre for Culture and Arts), Instytuts'ka Street 1 (now Heavenly Hundred Heroes Avenue 1), Kiev, Ukraine**

I bow to all the seekers of Truth.

We have to know at the very outset that Truth is what it is. You can not change it, you can not describe it, you can not transform it. Whatever I'm going to tell you tonight you should not take it for granted. Blind faith has harmed us the most.

So it is important that you should keep your minds open like scientist. And then what I'm telling you should be treated like a hypothesis. If it is proved then as honest people you have to accept it. Because it is for your benevolence, it is for the benevolence of your family, benevolence of your city, your country and for the benevolence of the whole world.

At this juncture when we are facing problems all over the world it is important to understand why do we have problems. The problems are there because we do not know the absolute Truth. You don't know about your physical, emotional, mental being. And it is said that if you don't know yourself, you can not know God or Divinity. We say, “This is my hand, this is my head, my...", but who is this `my'? So what is the truth?, That you are not this body, you are not this mind, you are not this emotions, you are not this intelligence. You are not this ego or your conditionings. But you are the pure Spirit. For example if I am born in a Christian family or a Hindu family or a Muslim family, immediately I accept the conditionings.

Without understanding what good it has done to the world or to yourself. And thus we start living in a hanging condition.

So the second Truth is that there is the All-pervading Power of Divine Love, which does all the living work. You see here such beautiful flowers. It's a miracle. We never know how it comes out of one seed, one bulb of these beautiful flowers. We take all these for granted. If you ask a doctor, “Who runs your heart?", he will say, “It's an autonomous nervous system." But who is this `Auto'?

Who looks after us? This is what one has to understand that there is a superior Power beyond us, which does all these things.

I find the people of Russia and Ukraine too much impressed by the Americans. I just don't understand because compare to you Americans are just stupid people. They have no wisdom. Compare to you they don't understand life. To them every moment must be spent in enjoyment. And every enjoyment they discover is self-destructive. It has destroyed their body with horrible diseases. It has destroyed their mind with perversion and schizophrenia. It has destroyed the whole society, the family, everything by their own idea of this enjoyment. You people living here must be thinking that the whole country is paved with gold. It is such a violent country that every individual is a Mafiā. When I go to America I've to take out all these ornaments, which I supposed to wear from My family. Their music is maddening. There was one fellow who was really mad while singing, mad. That was no music but it was just like a shouting noise.

And then he used to take out the whole of his trot out as if. Itself the singing was horrifying. And he called his group as `Nirvāṇa', meaning the liberation, ultimate spiritual liberation. And ultimately though he used to drink, smoke, take drugs, ultimately committed suicide. I think is important you must see some of them and know about what sort of a country it is.

So God has given you this wisdom. Because you have been ancient people. Do you know about your ancient history? I was so surprised to read about it. You have a great relationship with Indians. They say the Ukraine

name came from a king called Kuru. He was the forefather of Pāṇḍavas and Kauravas in India. Also it was said that Śhrī Rāma came here and built this place, Kyiv [Kiev]. Before the Christian religion came in there were such beautiful faiths in this Kuṇḍalinī.

[Aside:] Is it now Kuṇḍalinī? They have put it there. All right.

All right. In the... I studied the paintings and the museum pieces where it is absolutely shown this Kuṇḍalinī there, see now. They've shown the Primordial Mother and Her Kuṇḍalinī they have shown in the paintings. And the lowest Chakra that is the called Mūlādhāra that has got like a swastika frame. Is all there in the paintings. Everything, all these Chakras, everything there. And you don't know what were your forefathers. They were all very spiritual. This spirituality has given such fertile land to you. I was amazed the way in this country spirituality was thriving at that time. Now I know why you people and Russians are so sensitive to spirituality. Is in your blood. You can't help it. You will be never satisfied with something artificial. For the time maybe impressed by America. But you will realise its stupidity.

And you'll come back to your original culture. I was amazed how these people in those days. They called themselves Aryans and also they came to India and so many from India came here. For a normal Indian the goal of life is to get Self-realisation. As also Christ has said that, “Know thy Self" and also Mohammed Sahib has said, “The one who does not know himself is not a complete person and he can not know about Divinity." With all these sayings and understanding one knows the

goal of his life. And from ancient times, three thousand before Christ in this country people knew their goal. Not drinking, not other dirty things they do in America. Only the false people can impress them. They only understand money. How can a spiritual person be money oriented? Those who are money oriented can not be near God. But as a blessing of God all kind of prosperities come. You don't have to run after prosperity, the prosperity runs after you.

So within you..

[Aside to the interpreter:] Somebody has told them about Kuṇḍalinī? Interpreter: Yes, yes, Shri Mataji.

Shri Mataji: So within you is already placed this great instrument by our Creator. All of you have this within you. This is your own Mother. Everybody has an individual Mother. It's like a tape recorder of your past and your aspirations. She knows everything about you. And She's anxious to give you your second birth. This is all your own. Now we have become humane beings in the evolutionary process, which is the living process. And now there's going to be one more break through by which this Kuṇḍalinī rises like a primula in the seed and passes through you fontanelle bone area, becomes one with the All-pervading Power of Divine Love. Just like this instrument [indicates to the microphone], if it is not connected to the mains, has no meaning, we have no meaning. We have no personality. We go on drifting from here to there. When this happens then you are connected with this All-pervading Power and this Power starts flowing through you on your fingertips.

So you can feel the Absolute Truth on your fingertips because you know what Chakras are in trouble. Also you know about others because you get connected with this All-pervading Power, you develop a new dimension called as `collective consciousness'. With this new awareness you can know the centers of others. All your problems are there because your centers are in jeopardy. Through this awakening of the Kuṇḍalinī there have been thousands and thousands of cures of incurable diseases. If you remember first time when I came here there were so many people sick of Chernobyl this thing. And with the Kuṇḍalinī awakening they got cured. All their problems solved. None of them died. They must be some people sitting here. That's the minimum. There are four doctors in India who have got now M.D. in Sahaja Yoga. In Russia there are about I think two hundred doctors were following Sahaja Yoga and curing people for no money at all.

So money is not so important.

The second thing that happens to you that you become mentally absolutely peaceful. Like our thoughts rise and fall, rise and fall and they come to us from our past and from the future. And our mind is jumping on the cusp of the thoughts. If I say, “Now, come to your present” you can not. But when this Kuṇḍalinī rises she separates the thoughts and elongates them and you become thoughtlessly aware. You are aware but you are thoughtless. That is the present. Thus your memory becomes just photogenic. Now for example this carpet is not Mine, is very beautiful. Normally I would think how much to pay, how much to buy. If it is Mine also I would

think it should not get spoiled. But when I see in thoughtless awareness all the joy that is putting to it to make it starts pouring on Me as soothing current. In the present if you want you can think and if you don't want you don't think. You become absolutely peaceful. And then you start emitting peace to others. Wherever you go you can create peace. Not by giving awards people have peace. On the contrary I've seen this people are very hot tempered. They have Peace Award, but you can't talk to them, they jump on you.

So one has to understand that there is a space within us for peace, which not only makes you peaceful but makes others also peaceful.

The third thing that happens to you that your attention becomes enlightened. Christ has said, “Thou shalt not have adulterous eyes." But your attention becomes moral, becomes. I don't have to say, “Don't do this, don't do that." Only in the light of Spirit you yourself become absolutely moral. We can say, like angels.

So this is within you, which works out. I've seen some criminals becoming angels because the data base of their genes change also. It is so fantastic! But you are fantastic you are glorious. Only thing you have to get connected.

Now one has to know that this All-pervading Power of Divine Love is the Ocean of compassion and love. It is the Ocean of knowledge. All the real knowledge you know, not from the books, not from the words, but the real knowledge about Reality. It is the Ocean of so many miracles and so many blessings.

But above all it is the Ocean of forgiveness. Whatever wrong you might have done, whatever mistakes you might have committed, all are forgiven by this Divine Power of Love. Truth is love, love is peace and all of them are one. You become the master of it. You don't dominate others, don't torture others, but you love. And this love is without any lust or greed. Above all this Ocean of Love is the Ocean of Joy. You become joyous. Joy is not like happiness or unhappiness. It is singular. You enjoy yourself, you enjoy the nature, you enjoy everything. It is such a remarkable thing that is going to happen. We can say now there is a global transformation.

So there will be no wars, no arguments, no discussions. Because everybody will know the same truth. No fixed ideas, it is just Reality.

I was so impressed by your forefathers who have done so much already for spirituality. And I'm sure you all have a special right to become one with this Divine Power. It's like you put a seed in the Mother Earth and it sprouts by itself. And your forefathers believed in the Mother Earth as the Primordial made of the Primordial Mother, She has made it. Imagine they have Kuṇḍalinī depicted. How many people in the world knew about Kuṇḍalinī except for Indians? But surprisingly the Colombians also, the ancient Colombians knew about Kuṇḍalinī. That was their faith. They might have seen it, they might have felt it.

So you have such blessings of your forefathers. It's going to work out, I know all of you are going to get your Self-realisation tonight. Only thing you must have faith in yourself. You should not feel guilty about anything. You don't have to confess anything to Me, you don't have to

change your dress or change your hair style, nothing of the kind. It is not superficial, it is within. But you must have full self-confidence in you. You must know that you are going to get it and that you have to forgive yourself. If you have committed some mistakes, finished. What's the use of feeling guilty? Another thing is, you have to forgive everyone from your heart. Only thing is that as the Mother Earth has the power to germinate, the seed has built-in power to get germinated, you also get your Realisation in the sense the awakening of the Kuṇḍalinī. But you must look after your Self-realisation. We have some very good Sahaja Yogis here who can guide you how to meditate only for ten minutes in the evening. But you should not leave it in the middle [laughs]. It would be like the parable of Christ that some seeds cast to germinated and were thrown in the marsh, you see, that's will be something like that. If you respect yourself then this Self-knowledge should grow. It's for free, you can not pay for Divine Love. Many people don't understand how much do we pay to this Mother Earth for this flowers? Because this is your own, your own right to have your Self-realisation.

So time is there, we have to have our experience of Self-realisation.

And we have to feel this All-pervading Power for the first time.

So I would request you, all of you, first of all to have full self-confidence. Then to forgive yourself and to forgive others. Now you might say...

[To the interpreter:] Tell him afterwards, all right?... you, you might say that is difficult to forgive. But just think

logically whether you forgive or don't forgive what do you do? So you don't do anything. But you torture yourself for nothing at all. All your life you torture yourself like that. But at this moment is very important that there is a center what we call the Optic Chiasma in the brain where is this center. And this center is like this constricted. It won't open unless and until you forgive everyone.

So how will the Kuṇḍalinī come up? Now when you don't forgive and feel guilty this center catches here on the left very badly. Physically also you might develop a disease called as angina for the heart. Also spondylitis and lethargic organs.

So please forgive yourself. At this moment is very important that this center should open and this center should open so the Kuṇḍalinī will rise.

You go beyond the mind into Reality. When we have the power of our mind we just moves in a linear way. And it then recoils because no truth in it and harms you. Can harm the society like Freud. He had some funny ideas, he has harmed Americans completely, like Hitler.

So many of them. But if it is the light of the Spirit it moves in all the sides. It penetrates into all subtle things and never recoils.

So you have to develop your spiritual awareness.

When I come I know there are thousands and thousands, but when I go away that doesn't mean you should not grow.

So when I come there is a kind of a periodic sort of understanding. But it's a living process, you have to look after it and you have to grow into it.

Once you achieved the second state, which we call as doubtless awareness, you will know how great you are, what powers you have. I've seen people becoming great scientist, great artist and great musicians through Sahaja Yoga. Even the children become very-very intelligent, alert and obedient and moral.

Overnight I've seen people giving up drugs, alcoholism, all these destructive things. Now I am seventythree years of age Myself and I'm travelling every third day and I don't feel tired. Because humane energy is limited. But if he gets this Divine energy then what does it matter? So to make it flow into you, you must grow into it. This is My request as a Mother.

So it will take hardly about five-ten minutes for you to feel your Realisation through this All-pervading Power. I would request you not to disturb at that time. If you want you can go away before we start it so that people are not disturbed. One thing, I can not force it on you because I respect your freedom. And in your freedom you have to ask for it. You must have pure desire to have it. Because this Kuṇḍalinī is the power of pure desire.

So I'll wait for one minute, if somebody wants to leave, can leave.

[To the interpreter:] No one. Great people.

All right [laughs]. All right.

[To the interpreter:] Might just get it like that. All right.

First I'll try a very short method [laughs], which has worked in Russia. All right. Now please put your hands like this towards Me. Don't close your eyes. Now please put your left hand towards Me like this and now bend

your head and now see for yourself if there's a cool or a hot breeze coming out of your fontanelle bone area.

[Shri Mataji blows seven times in the microphone.] Now, please now put your right hand towards Me. Now again bend your head and please see with your left hand if you are feeling cool or a hot breeze coming out of your fontanelle bone area. It is hot because you have not forgiven yourself and you have not forgiven others.

Now, take the left hand now. All of you must do, please do. Now bend your head again and put your right hand and see if there's a cool or hot breeze coming out of your own head.

Sometimes it comes nearer the head, sometimes little away. But don't touch your head. Above the head, above. Now, please now put both your hands towards Me like that and watch Me without thinking.

Now, please put both your hands towards the sky like this and ask a question, one of them in your heart. Put up your head and say, `Mother, is this the Cool Breeze of the Holy Ghost?' Ask three times in your heart. Otherwise you can ask, `Mother, is this the All-pervading Power of Divine Love?' Again three times. Or else you can ask, `Mother, is this the Param-Chaitanya?' Again three times in your heart.

Now bring down your hands. All those who have felt Cool Breeze or hot breeze on their fingertips or on their palm or out of their fontanelle bone area, have to raise their hands.

[Laughs.] See? Quite all. May God bless you all. See, this is the first time you are feeling this breeze.

I told you that this is a country of very spiritual people. This is a proof. All of you have felt it. But I again request you that please try to continue to grow till I come next year.

Another simple thing you can see these are Ukrainian people singing so well Hindi songs, Marathi songs, Sanskrit songs. If you don't see them you will think they are Indians singing it. [Laughs.] It's very difficult. But how they have managed that I don't know.

So let them sing one song I would like also to hear. Which one, `Anadi Nirguni'? `Jogawa'? You'll sing `Jogawa'? Ah, this is the song written in the sixteen century by a saint in India in Maharashtra, My state, in a Marathi language. He is saying, “Oh, Mother, give me this Yoga, this union with the Divine." And then he says, “I will give up all that is bad, all that is wrong, I'll do everything but give me this Yoga." And all the people in the villages sing this, they don't know what it is. It is now the other way out. You don't have to give up anything. You don't have to go to Himālayas. Here, sitting here, you can get your Yoga, your union with the Divine.

[Sahaja Yogis are singing the song.] May God bless you all.

Please respect your Self-realisation, respect yourself. All My love. I'll come next year again to meet you all. Ah, if you have any problem you can write to Me through the leaders here.

Thank you.

[Ballet on Devī Māhātmyam performed by a Troupe from Kolkata, India.].....

The wrath sourced from Her compassion to save Her children. For instance, I had to act sometimes that I was angry for something because it was needed.

.....

I have no problem with it [destroying the negativity], but unless you establish your witness state first, you will fall right back.

Contents: 1995-10-01 **Navarātri Pūjā (cusp between 7th Day and 8th Day), You Must Project Your Depth and Not React, Cabella Ligure, Italy**

Yesterday you have seen how Durgā used to protect all the seekers, sādhakas and how she killed the people who have been troubling, torturing, killing the seekers of truth. Her whole advent was to protect them from all these evil forces. In those days that was the most important work.

So that's how the sādhakas came up to these modern times and now they are seekers of truth or they have found the truth.

All these different passages have taught the sādhakas what is the use of their lives. They were frantically first trying to find the truth, frantically and they went into different, difficult places. They thought by going into some lonely places they'll be able to settle their minds in peace and they'll be able to find the truth.

Also they sacrificed many things, their wealth, which was bothering them, their families, they thought were standing in the way of their search. All this went on and there are still some people who believe that by becoming an ascetic one can find the truth. Buddha did the same, Mahāvīra did the same, their life was nothing but a great tapasya. Their tapasyas are helping us today, in such a way that we now have got such a blessing that our personalities, as they are, can receive Self-realisation, for which people struggled and struggled.

In such a way, that if you read that how they were suffering you might be really amazed, how they went through all this suffering and all this tapasya, just with the goal to get their Self-realisation. It is an ordeal, even to read about them and to know about them. And while they were seeking, also there were so many people who tried to trouble them, who tried to torture them, who tried to kill them and the people surrounding them didn't know what they were doing, they used to ridicule them, laugh at them, make fun of them.

With all this, what we learn is that we have got our Self-realisation very easily, without any torture, without any ordeal, without any sufferings, fasting, nothing. That's not true, because you are the same people who have done all this before and that's why you are here, it is your matter of right to have your Self-realisation. It's no way, is to say that, “without anything, we got it." Because, it is life after life you have been seekers. Whatever path you followed, whatever religion you followed, whatever faiths you followed, it was a torture for you and this torture is today now fruitful, that today

you are Self-realised people. But in anyway, we see that human beings, if they get something rather easily, they don't understand the value of how they got it. Now, to get this easily, actually you must know it's not just because you were nothing, you were something great, you were great saints who went to the Himālayas, you did all kinds of ordeals and fasting and so many of you were killed and butchered in the name of God.

So today, whatever you have got, whatever realisation you have got, it's not just something you should think that, “it is only Mother's grace that we have got it", it's your own great personality which has achieved it. Otherwise it would have been impossible for Me to give you realisation. Whatever the work the Deities have done, they have brought you to this level of human existence, protecting you, but now naturally, just this is the last step which you have crossed and you have achieved this Self-realisation and so many of you have achieved great heights. This power within us, the Kuṇḍalinī, which has connected you to this All-pervading Power, has been struggling, has been guiding you, has been all the time looking after you, protecting you, so that you should achieve your goal in this Kali Yuga. It was said that only during Kali Yuga this will happen and those people who are seeking God in the mountains and in the valleys will find it. But they will be normal people, people who will have households and living like normal people in the society. They won't be some sort of Sādhus or saints, but people who are married, who have children, all such people who are leading a very normal life, will receive

their realisation. It is already said, it is already predicted by Brighu muni.

So it's all been already set, I think all been planned. But in this, a credit goes of course to you people, that you have recognized what is the truth. As you know there are so many false people going about, they are doing all kinds of tricks, they are trying all kinds of methods to entice people. Despite that, you have recognized Me. This recognition is something very remarkable and I'm Myself surprised how, like lost children finding their Mother, come back to Her in the same way all of you are here. But in this, we should not think that we have got it easily or we have got it without any difficulties, because this can create a little problem that we will not go further with the same speed, with the same dedication as we have been doing before.

So, whatever you think is easy, was not easy at all, it is Sahaja, it is, what you can say, spontaneous. But now it is for you the time, is really to understand that, this time is so important, we have to save the whole world. That you have to project yourself, as I said last time and to find out ways and methods how you can do these things.

In Russia, I must tell you, I had a very good experience of a very highly developed soul who is a very well known scientist. He is one of the biggest scientists of Russia and he's indulging also into spirituality. He told people that, “I'm indulging into spirituality, I would like to see Mother." I said “alright, I would love to see him." So when he came, he looked at Me and he said “I know Mother, that you are the incarnation of God in these modern times." I was quite surprised for a scientist to say that,

but his eyes were so pure and so full of devotion and humility. Then he says that “I want to do something, if you help me." I said “What do you want to do?" He said “I cannot measure your power, I cannot." He had an instrument by which you could measure your power. I can't also measure the power of your photographs. He said, He told Me a number which I couldn't understand, it was something 700 raised to power, some sort of a billion into a billiard, like that. I said, “Now what's this number is, I don't know?" So, he told Me, that this is what your photograph is.

So, I said “Alright, now what do you want Me to do?" I told him, “You can take this photograph, if you think it is so powerful." So he took the photograph with such respect and this thing, at least four or five times he bowed to Me. I said, “what do you want to do about it?" He said that, “I want to put it on a satellite"; now see the projection part, satellite. “Then what will you do?" “And I'm going to put electromagnetic force behind it, so the power that is in this one will penetrate into things, because electromagnet can penetrate, with that these vibrations will also penetrate.

So, I will go on to the satellite and from there I'll project this and I'll see the global problems. Then wherever I will project this, the problems will be solved. I'll try to first of all, make the land fertile with this." One photograph of Mine, can you imagine?, see his projection. I was amazed, you see, look at this man, what he has been thinking all the time. He said “This is not difficult, it's not difficult." I said “how?" So he showed Me with a spring, you know, something that was like a spring. He put it on

water which I had vibrated and the spring started jumping. And then he showed with his machine that the whole thing was moving so fast, you see Mother, just see the water that you have vibrated, how great it is. I said “This is, I had never heard that you can transform this power into something which will work out on material things." He said, “This power can work out on anything, it is this power which has created everything.

So, it will work out in everything." I was so surprised. And he said “I have been just waiting to meet you and this I'm going to start, I've got a lot of work to be done" and he told his friend “Now, let's go, we have a lot of work to be done." If I want to do all this in the lifetime of Mother, She should see what we have to do.

I was amazed from where this fellow has dropped all these things.

Such an experience of a scientist, in the West no scientist will even look at Me. Nobody will think that they can do something about these vibrations. But you see he has already developed a method by which he can measure the vibrations, you see. I don't know, I didn't ask him any further questions because I thought it's too much in it and let him do what he likes. And you see, I find that in Russia, people are very highly placed and they have very many ideas, but spirituality is the main thing and morality.

There was another gentleman, I would say he was hardly about 32 years of age. Very much sparkling, he came. I asked him “What do you want Me to do?" He said “No, you have done too much for us, now we will do for you." I said “What do you want to do?" He said “I'm in charge

here of spirituality." Can you imagine? We have no such government where there is a subject like spirituality that somebody is in charge of spirituality. This is Russia. I said “You are in charge of spirituality?" “Yes and I have to deal with students from a very young age to the college and can you tell me Mother, at what age the children are more receptive of spirituality?" I said “There is no hard and fast rule about it. But as children they, very small children, because they are so innocent, it works out." So he asked Me, “How do we put spirituality into them?" I said, “You can raise their Kuṇḍalinī, you can tie their Kuṇḍalinī up and they will become really people with such attention that you will be amazed at that." He said, “I am gathering all the people of all the faiths and I am going to tell them that it is only Sahaja Yoga which is the right path." Can you imagine? Such a wonderful person, hardly 32 years of age. I mean one better than the other, I thought.

One really better than the other. Then he asked Me the schemes, “What should we do for patriotism?" What should we do for this? He was so much alert and he said “Through spirituality, how can we improve their lives?, of the students." Now he's in charge of all the students of Russia and he is also a member of the parliament. He said, “There are another eight or nine members who are also in the same committee and they want spirituality too." I was amazed, I mean, what a country is this Russia, how could they have such people? Then the third one came. He was also a member of parliament, very dynamic, at first he was the right hand man of Yeltsin but then he gave him up. He said “He's not moral, I don't

want to have anything to do with a person who is not moral." “So now what are you doing?" He said “Now we are thinking of getting elected by some, another party, it's name is `My Motherland'. It's a very good idea.

So in that we'll not have fixed ideas, like, it is a democracy or a, you can call it communism, or this, but whatever suits my motherland, that will be done, it is very practical. It is a most practical thing, that whatever will be good for my motherland, that will be, nothing else.

I said “really, this is very practical" and he may one day replace this Yeltsin and all that, very dynamic, very nice. Just now he was a little bit, I must say, a bit depressed, because he said they are stupid people over here and this and that. But then he got very hopeful, I said, “We will help you all out and all that." But such a truthful man. And he said, “The basis of human life is morality. If you have no morality then all the rest is nonsense." He studied in England and he said also in America for quite some time and the other fellow also did it. And they said, “In America, he got fed up absolutely and we don't want to go back there." So the wisdom of these people really was very striking to Me. Now, another third thing, which I discovered, is even much more deeper than this. When I went to Ukraine, I saw some very nice paintings done with a very aboriginal sort of colours.

So they said “Mother, this we had before the Christians came here." They showed Me a magazine in which there was a photograph of the Primordial Mother and they called it `Aditi', that's Sanskrit, we too call it `Aditi'. Can you imagine? Then they said, “This culture existed before the Christian aggression came in” and there were

paintings there of Mūlādhāra Chakra in different ways and also of Āgñyā Chakra and the way they were talking about all this, even in the magazine, I was really surprised. They said that “all this was published, we have books on this, but because of the church it was all said it's all nonsense, there's nothing like this." But the best part I saw was, the picture of the `Aditi' and there was a Kuṇḍalinī in her stomach, or stomach *[UNCLEAR* ulopa] and was shown going upward like that. I said “look at this culture these people had." Then they said, “We had relations with India and they were Arians and we were also Arians and we used to meet them." So I thought, Macchindranath and all these people had gone to the north of India, they might have come to this Ukraine. And they said that, I mean the whole thing was traced to, Ukraine name came from `kuru' and all kinds of things were traced in Sanskrit, all this, I was amazed. What a culture they had, in what culture they lived. It's something you know, unbelievable. While in India, there are many people who don't know what is Kuṇḍalinī, if you tell them Kuṇḍalinī, they think Kuṇḍalinī is horoscope, especially in the north, they have no idea of Kuṇḍalinī. But here are the people who have really had lived in a culture for thousands of years and they said this was before Christ, 3,000 years, can you imagine, before Christ 3,000.

So, we too had civilizations in India like, *[UNCLEAR* Harapnan] and all that of that time. But they said that India is the source of spirituality. That magazine, I was amazed at it and the way it was done and the Mūlādhāra and the Āgñyā Chakra and all that, so well. Maybe they

must have seen it, they might not have got realisation but they talked about realisation and also achieving Selfhood, this was so many years back. But then they said the Christian religion came and they told us it's all nonsense, have nothing to do with it. As they told Me also in Greece, that they had Athena and the Primordial Mother and all that, but they said no Mother, nothing, better stop it.

So it was all cancelled and nobody looked at it. But can you imagine, that so many years back it existed in that Ukraine, such a beautiful culture of spirituality.

The first time I went to Ukraine, we had people there, there was the Chernobyl, you know that there was a big explosion and they were all, like somebody had his fingers cut out or they were attached to each other, or somebody had boils all over the body, somebody's nose was turned like that, horrible looking, like lepers they were, all of them, those who came to the program. But then this time, more than this were the people there in Ukraine, I must tell you, much more than here, the whole hall was full, the three tiers were full, the passages were full and still the people outside were standing. They said, we were the ones who suffered from this and now look at us, we are completely cured. You won't believe I never touched anyone, I was there only once, they came to My program and they got cured.

So this sensitivity that they had. I used to wonder why these Russians and Ukrainians are so sensitive to spirituality. Then I realised that these people who have got spirituality is ancient, from ancient times they were practicing this. Now we had Macchindranath, Goraknath,

all these people, but nobody practiced Kuṇḍalinī awakening to this extent that it was in every village they used to make the paintings about Mūlādhāra about this Āgñyā Chakra very clearly. And in the Āgñyā Chakra was Yin and Yang of the Chinese, can you imagine. After discovering that, I really felt that in the world there must be lots of people like that. Now, in Colombia I have seen also they have the same Kuṇḍalinī and the Kumba and everything, I think that's even more than three or four thousand years back before Christ.

So, what we find that we had all this knowledge in all these countries and it's still, that knowledge is still, working in the minds of the people, very very introspective and also they know a lot about the *[UNCLEAR* Sun]. It is this kind of sensitivity comes only when basically in the roots of that country you have exposure to spirituality. It is a kind of a miraculous revelation one could see there, how they knew everything about Kuṇḍalinī, about the Primordial Mother, about this happening, about spirituality and what happens to a person when he becomes a realised Soul. The speciality I saw about them they are extremely humble people. To them, I'm really, I don't know, how they bow to Me, sometimes I just can't imagine how these people have such sense of spirituality and such peace. When they had this coup, I asked them, “aren't you worried?" This coup is here and I don't know what will happen to your country, aren't you worried? He said, “Mother, why should we worry? After all, we are in the Kingdom of God.

We are not living in Russia, we are living in the Kingdom of God, so why should we worry?" I'm meeting such nice

people there, such sensitive people to spirituality. They have thrown away practically all the false Gurus, all the false Gurus. And for Me they showed such a respect and such care. They had this Conference only for Me.

So now, why I am telling you all this, that now you all have got your realisation, you have now felt your spirit and you have entered into the Kingdom of God, no doubt. But now you must understand that this power that you have, what it does to you. What it creates in you. The most important thing is by this power you become thoughtlessly aware, that is you come in the present. To achieve the present is an impossible task.

So, once you are in thoughtless awareness, what happens, that no thoughts bombard your mind, wherever you may be, you may be in America, you may be in any place, you are not bombarded by thoughts.

So, what does that mean? Into very simple language, we can say, it means that you do not reflect. You do not have a reflecting mind. Now this is the basic problem of Sahaja Yogis of today, which one should try to conquer. That you do not reflect, that's the only way you can achieve your *[UNCLEAR* steadiness]. For example, I've seen some people, for nothing at all they'll just start laughing, nothing at all. They see somebody, immediately they will reflect, this was nice but not so good, they start giving their opinions, especially in the west, about everything. Everybody seems to be very knowledgeable and start telling, what is the best, what is not the best, what is not good and once they start saying something like that, the mind becomes reflective. If the mind is not reflective, then you have thoughtless awareness.

Watch anything, just to watch, just to witness, you should not reflect, if you are using your mental power then this power subsides. This is a very common defect with people, because I think you people are more intelligent, they would think maybe, I think you are well educated, might be, I don't know, whatever you think. But this reflecting mind is a very dangerous thing for spirituality, you will never grow and then with a reflecting mind you will have different emotions, with something you reflect on somebody.

Now, if it is your son or daughter or something, you'll get identified with it. Identification with someone is artificial it is not in reality. But because of this mind, reflects, it identiffes. Now, many identifications, you have dropped out, for example, you're bias about religion, about races, about maybe nationalities, you have dropped out. But still I would say, the reflecting mind still acts. And this is the greatest hurdle for the progress of Sahaja Yogis of today. I've been thinking why is it the reflecting mind, is so active in the Sahaja Yogis of today? If you could stop reflecting, immediately you establish yourself in the ocean of peace. You watch something, you just watch, there is no ripple of thought in your mind. Then you become extremely creative, you become extremely dynamic, you become extremely compassionate. You have no fear, some people think, if you are compassionate, you see this man might *[UNCLEAR* letch] with you, you have no fear. All what you have to enjoy, you can only enjoy when you do not reflect. That means that you leave everything to the Divine. You are not in charge. You don't see that you have to be reflecting on

something. This is the greatest power you have got, is not to reflect. Not to look at somebody with that kind of thing. I have seen this is still there, lingering perhaps I never told you about it, maybe one of the reasons, I don't say that it is only your fault, but maybe Mine because I couldn't find what was exactly wrong, that is, that reflection that you have about others. Now I told you, have introspection. For introspection, also it can be reflection. But that at least gives you an idea as to where you are. But with that, psychologically you can become extremely depressed and condemn yourself, then you may not understand yourself as a personality but and you will go on sort of loosing your vibrations, loosing your power, because you are not in control of yourself.

So introspection also, if it brings about depression and demeaning of your personality, best is not to introspect also. Because all these mental activities, I have seen, create problems. But, in a state where you are thoughtlessly aware, introspection comes to you automatically. You see it automatically, you understand it automatically. You do not think about it, it just comes to you. The whole picture comes to you and you are at peace with yourself. You are never in turmoil, never in trouble, then you don't get angry, then you do not argue, then you do not discuss, but you become as if dropped into the ocean of awareness and you don't have to worry as to solve something, when you are reflecting, then you find that this power works. Now it becomes very contradictory to say that you have to project and you don't have to reflect. Now, when we reflect we absorb, when we reflect on something, we absorb that thing. And

mostly our attention goes to the defects of others. This person is no good, that is not good, her hair is not alright, her sarī is not alright, this that and all nonsense.

So what are we doing, we are absorbing all the bad things also. Now when you start admiration of something, then what happens that you may not get the bad things but at least you are on a better line. But still the admiration in thoughtless awareness is really very deep. I saw this in the eyes of this great scientist, absolutely he was just one with Me and his eyes were like an ocean of peace. He was just looking at Me and for quite some time and then he came to his thoughts and he told Me that this is what we can do with your photograph.

So the depth in you will only come when you do not reflect. But it is very common with human beings, especially in the west, this carpet is no good, that is no good, this smell is coming, that is there, always trying to judge others, judge other things. It isn't important, what is so important, if you are sitting in the garden of heavens, what does it matter? Where you are sitting, what you are doing? This sets in, this reflection sets in, waves of thoughts in our mind. I have already once described by drawing. How the energy that falls on the right side goes to the left side and that which falls on the left side goes to the right, crosses over because of the two types of cells we have. Then out of this energy that goes to the right, the energy that goes to the left, it is sucked in partly into the sympathetic. Now, whatever is left out is the one that reflects. That is the way it goes on reflecting. Now, if you can suck in all that energy and put it on our sympathetic then all our energies will be 1,000

fold, much more. You will not be tired, you will not be unhappy, you will be able to stand lots of nonsense, but we'll not call it a nonsense, we'll not think it's a bad thing, so it has no effect on us. This quality we have to develop.

I would say, with this, today's special celebration of Navarātri. Like yesterday you saw Śhrī Durgā's nine forms, also. In that, one is Kushmanda, is one of the forms, that you absorb all the filth in yourself, in your stomach. But the Devī does that, not you. What the Devī can do, you should not do, that's her job, that She is supposed to do this, not you. What you have to do is to only be in silence so that you absorb whatever will increase that silence, will increase your depth. The Devī will look after all the rest of the things, she'll look after all the filth, all the anger, all the temper, all the everything that's going on in this world. She will absorb all that, but what you have to do is to just enjoy everything that is pure. Enjoyment is only possible when you are beyond your mind. With your mind you can never enjoy, it is like a big load. It will not act, it will not help. Enjoyment comes when you are in complete silence, in a rippleless lake, the reflection of all the joy that is created on the shores of that lake are completely reflected, they are not deflected, if they were repulsed it would have been a different image altogether and would have been something nowhere near the image of reality.

So one must have a mind which is kept lower than reality. In the reality actually it is nothing but peace and joy. Now a mother's desire is always that her children should have nothing but peace and joy, no sufferings, no

starvation, no ordeals, nothing, they must just enjoy. Now those days are gone, but even to enjoy this, even to live in that complete peaceful state, you have to be non-reflective. Now you watch yourself, you will be amazed how much reflecting you have. When Devī is doing all the job for you, when Param-Chaitanya, I don't know how many things it is doing, is trying to fill up the whole atmosphere with this activity. What is your activity should be to stop your mental activity. You'll be amazed in that state only you will grow. With that growth only, you will become like this scientist. How the contradiction now is that when you have your depth you can project your depth, not your mind.

Sometimes when I say project, people think it is the projection of the mind, no. You have to project that depth, that reality that is within you for that, you don't have to think, you don't have to plan, it will just work, but you will be the instrument for that projection. It is nothing subtle, it is very simple to understand. Like, when I am talking on this instrument, alright, now if this instrument is absolutely alright, there is no problem in it, it will be peaceful. But if this is full of ideas and thoughts like our brain is, whatever I'm saying will not be the same that will be broadcasted. In the same way, when our mind is full of turmoil and arguments and what you can say, comments or we can also say, the reflection. Then what happens is that this mind gets into like a whirlpool of disturbances and it cannot project itself fully because it is disturbed, it is not a normal thing.

So now you'll understand, there's no contradiction. You can only project yourself, when you are absolutely peaceful and this is what we have to learn.

This is Navarātri's great days are here and that you should know that, it starts actually in the Western world from the 21st, in the equinox, after the equinox in September. There are two Navarātri's we have, you see, one starts now and one starts after the second equinox. Now, in this equinox, Mother Mary's birthday is there and that's why people celebrate her birthday, they don't know why she was born on the equinox, you see, for the balance. Then you see, because nothing was explained, about the lives of these great incarnations people used them the way they like because they have seen miracles with them so they do not try to understand why this equinox is there and why this is celebrated.

Now I was told in Iran, this is the time they have the New Year, that means the Moslems observe this as a New Year, so, when Navarātri starts it's the New Year. That means it's the twelfth month for them and so many things are suggestive of that, that why should it be twelve months, why should the Goddess be born at 12 o'clock, all this has a special meaning and which you can find out, but only possible when you are not reflecting. This is what is the state in which you are really in connection with the All-pervading Power, otherwise you are not there, you are not one with that state, to be one with that state you have to be absolutely silent within yourself. For the Goddess, she is silent, if there's a fight on, she is silent, because she's so confident, she knows about her powers, she know's Mahishasura or any asura

cannot trouble her, cannot touch her, she know's what are their powers are and she knows all her powers.

So she doesn't have to be disturbed by anything, she's not disturbed. Because she's really the personification of this peace state where she is so powerful, she doesn't have to know about her powers, she doesn't have to ask the powers to act, they just work, automatically. This is a state in which you will be amazed so many things happen, unknowingly. Without your doing anything and that is what we call as coincidences, but actually it is not coincidences, it is the state in which we are in thoughtless awareness and then the Param-Chaitanya is related to us, absolutely related, we are there and that works out everything for us.

So, in Sahaja Yoga, this time as you know about the Goddess, what She has done, so much work for years together, now you all have become realised Souls and you must understand that complete confidence in yourself, complete understanding about yourself, never to have any fear, never to have any thoughts which can bombard your mind, at that state you are the most powerful person. I hope for this Navarātri you will realise what work the Goddess has done for you, how much she's worked hard, how much she has fought, she has been fighting with these horrible devils and Rākshasas. And sometimes, I feel now these devils are within us, they are not outside and that comes to us because we reflect too much on things.

If you talk to any one of the Western people, you are amazed as if all the media they have on their heads. They know about each and every person, what they did,

what was this, what was that. But he is not worried, he doesn't think how he can improve it, how you can work it out. At this state of thoughtless awareness you encompass the whole universe and at that state this power works wherever the problem may be.

So we have to understand our value, that we have this power within ourselves and this is to be respected and to give credit to the Goddess because She's done so much work for us that She should not feel that it's now they got realisation just for a song and they are not bothered, they don't know how to develop it. She will not be in anyway hurt but her work, what she has done, we have to see, we have to understand and we have to have a feeling that somehow as we now have got our enlightenment we should try to be people as complete instruments of that power, that's only possible when you don't have your own ideas, your own interferences. A complete instrument, just like as I said, this instrument has to be perfectly alright, otherwise it cannot work. Thank you very much.

May God bless you!

***Contents: 1995-10-06*, Public Program, 2 West 64th Street, Manhattan, New York, USA**

I bow to all the seekers of Truth.

At the very outset we have to know that Truth is what is is. You cannot change it, you cannot transform it, it is to be known through your ascent. Unfortunately, at this human awareness we do not know the Truth, the Absolute Truth. What we know is the relative truth and that's why all the problems there are between human

beings, between countries, in the whole world. It is very important that we have to realise that we really do not know the Absolute Truth.

America is a very fortunate country in a way that it had prosperity. But as a result I found, that many people came to this country.....

Contents: 1995-10-08 **Śhrī Devī Shakti Pūjā, America and Ego, Camp Vacamas, 256 Macopin Road, West Milford, NJ, U.S.A.**

I am so very happy to see so many Sahaja Yogis are here now in America. And the program we have had the other day showed us clearly that Sahaja Yoga is getting very popular and the way people got their realisation in five minutes also showed that now we have touched that area of seekers who are honest and who are of a very high level in spirituality. You are the ones who are the first Sahaja Yogis we should say or the foundation of the Sahaja Yoga in America and thus we have to understand our own responsibility.

As it is Viśhuddhi Chakra is responsible for the whole world. But the people in Viśhuddhi Chakra have to be like Ganas, they have to be very responsible, extremely, much more than any other country in the whole world. And the problem is somehow I found, I don't know about the future, that, that sense of responsibility yet not felt among Sahaja Yogis that they are responsible for the whole world; not only for America or only for New York or only for Yonkers. Sitting down here you are responsible for the whole world. If you understand this that the main quality of Viśhuddhi Chakra is responsibility, I always say,

“It's on My shoulder. I take it on My shoulder” meaning what? That I take the responsibility, but this sense of responsibility has to come to you very clearly.

I felt America is so far away but if they could come and see in Russia how the Russians are behaving towards Sahaja Yoga they'll be amazed. I've been coming to America since so many years. Perhaps we should say this is the first country I visited. But here the sense of responsibility for Sahaja Yoga has not grown. While in a country like Russia and Eastern Blocs I've been only four years there hardly and you should see it how they feel responsible.

Now in Russia, Sahaja Yoga has spread up to Siberia. Now in Siberia they don't live for themselves only or for their Ashram. There they have got a place called Novashivi [Novosibirsk], which is mostly inhabited by scientists because so many scientists were thrown away by Czars and later on by the communists and were exiled into that place. Now these people sitting there tried to find out what is spirituality? How do we get to spirituality? What is the way we can be our spiritual being? No quarrel, no fights, no stupid things that people do, no domination, no ego.

I was there only about a week back I should say, more than a week and last day before going, there came a scientist. His eyes really were just like ocean, were absolutely beautiful and he was supposed to be one of the greatest scientist of Russia having a very big job of his own and he didn't talk about Me much to others. He just wanted to see Me. When he came he just took My hand and kissed it, bowed to Me. I saw in his eyes ocean

of spirituality, ocean. He must've been about thirty-five or forty years of age. Can't say his age because he was so much shining and bright and he told Me, “I know everything about Mother." I said, “What do you know?" “That You are the incarnation of God on this Earth to save us." “How did you find out?" He said, “I have made a machine by which I can measure energy fields, of course I can't measure Your energy field. But I took a small photograph of Your and measured the energy field and I found it was seven hundred raised to power some millions and raised to power some billions." That's why I don't understand this calculation. Just imagine and he created the whole idea of his proposed experiments for which he had come to take permission from Me. He said, “You just touch this glass Mother, just touch it." And he had brought a machine. I touched the glass and machine went on revolving like that. I was Myself surprised. He said, “Just touching the glass it's happening." He had a machine with him, a little machine he said. “This is portable” he said.

So I said, “What is the permission you want?" He said, “I want to use Your photograph on a Satellite and from the Satellite I want to project Your photograph through electromagnetic force and wherever in the Global region it will be put, You will see it will change. It will change people, it will change all ora, fauna and also ecological problems will be solved. Will You give me permission for that." I said, “Of course why not?" The level of scientist in that country is so great, here I don't think we can get hold of any scientist because their ego is keeping them hanging in the air. The another thing, which I was

surprised, that in Novashivi [Novosibirsk], where a Yogi told them that Mother has told us that in our brain there are `Pīṭhas' [seats] of these Chakras. They were so much surprised they said, “We can verify, we have machines to verify." So they called Doctor Khan and when Doctor Khan went there, he was amazed, they had a machine.

So he said, “Now let us put attention to Shri Mataji." The whole brain became reddish. Then “Let us put attention to heart"; here it became a red spot. Then to Mūlādhāra, was here. Then to Nābhī, on both the places; then to Viśhuddhi. It was proved. What I have said they have proved it. And so many Americans are trying to get them to this country. They say, “We don't want to come. We don't want to do any more Science, we want to do metascience, spirituality." There are two hundred and fifty scientists in Novashivi [Novosibirsk] where I could not go because we had a Pūjā.

Now see the difference, here I come there's quarrels between husband-wife; then it's father-mother. All such petty nonsensical things are going on.

So your own brothers and sisters in another country are doing so much of experimentation, spreading of Sahaja Yoga. Imagine how will I go to Siberia, out of question.

But from Siberia I don't know how many thousands came. They are all well educated, very well equipped, extremely well behaved. In their style, in their behaviour you see that there is such a lot of spirituality already built in. When I went to Ukraine; Ukraine is a place where they had this, you know, Chernobyl problem. First time when I had gone there were people, who had come to My program. They had their fingers joint like this, noses

turned like this, all kinds of things. And the legs and feet were in a very funny way. With all that, they came to the program and this time the hall was so full there were at least ten times more people than we are here, maybe more and outside were standing, they couldn't get in, they are sitting in the passages. They were three tier, on the ground and three more. Everything filled to a inch and I was amazed at their spirituality. Everyone got realisation in five minutes. What a level of people, what a level. But then I found out that in Ukraine they already had the knowledge of Kuṇḍalinī and of the Primordial Mother. They call Her `Aditi', in India also we call Her `Aditi' and they used to make paintings of Her. Then they had paintings made of Āgñyā Chakra, of Mūlādhāra, very clear. In those days before Christ, three thousand years before Christ.

So basically in them from where, somewhere, this knowledge had come.

You are very advanced people here, supposed to. You are very well equipped and people think Americans are the top for everything. But look at these people from Ukraine and from Russia. They were worshiping the Primordial Mother three thousand before Christ and when Christianity came, they suppressed it. All clearly written down and when people wrote about it also, these Christians there, they were called as orthodox Christian, they tried to kill them, arrest them. Despite all those problems they stuck on and I was surprised that even today there are books and magazines about it.

So I was thinking somebody like Macchindranath who went all over the world, must've gone with his disciples

Gorakhnath, because they were Nath Panthis, they knew about Kuṇḍalinī and all. But actually they have shown the `Aditi', the Mother with the Kuṇḍalinī in Her stomach. Can you imagine? All these things were done long time back and that's why basically they are very spiritual people. Firstly they are very introspective and very spiritual and all the time they are asking “Mother are we going to be all right? Are we all right? Have we really taken our ascent?" Like that those questions, which were absolutely different from what you see in the West. In whatever field they are; if he is a doctor he'll try to find something. A dentist, they'll try to find something, related to Sahaja Yoga and they say, “There are so many coincidences that you cannot explain. How this has worked out, how?" So I said, “What did you do?" So he said, “We just desire that we should now try to propagate Sahaja Yoga and to analyze it and put down, put it down such a concrete way that nobody can doubt it. No Scientist can doubt it." So we are at that level to see somebody so much higher and then we have also understanding how we can rise up to that point? How we have to work it out? Now the pettiness with which we suffer can come in many categories but is nothing but stupidity. One of them is that, this idea of leadership; which is the greatest stupidity you could ever think of. I am just befooling you by saying “You are a leader. You are a leader." Nothing it's just a myth, you don't believe Me in that. If I call you the leader, you must know that Mother is trying to test me and others also those who are trying this power game of becoming leaders, nothing at the back. There is no one who you can really say is the

leader of Sahaja Yoga except that I had to have some people to communicate so we got them leaders. It doesn't mean that if they become leaders, they go to heaven; they will get a right royal reception, nothing like that. All will be going in the same manner. See this is all created by Māyā. Now people are striving to become leader and I really feel like laughing. Those who will try are climbing a mountain, which doesn't exist. Where are you climbing? Where are you going? It doesn't exist. There's no mountain, it's all straightforward road.

So this is also a sign of complete stupidity. Are we to say that all the stupids are born in this country? Are we to feel that all stupidity has trickled down to this country through Hudson River? Are we to believe that all intelligence has vanished into ego? Once you realise it is stupidity, it's best to stand before the mirror and make fun of yourself. Also I've noticed with all the writers of Russia, they've been very introspective. Even a hero will think ten times “Why I am loving this lady? Why I am doing this?" Even the woman if she's in love she'll think, “Why am I doing that? Should I do it or not? It's proper or not? Is it something in my head that is making me do it?" You see, absolutely clearly they go on introspecting themselves. Even now I find the Russians are like that.

So we have to now start a new tradition. In that tradition, we have to introspect. Introspect yourself. This another way is you shouldn't try to see the defects of others but to see what's wrong with you? Where do you fail? Why do you fail? Why you cannot propagate Sahaja Yoga? What is the reason to it? What has failed you? Because it's only

possible when you think you are responsible, not leader but responsible.

This is the country where we've had greatest fights for leadership and all the leaders have now jumped into river Hudson.

So this kind of stupid ideas should be given up and we should introspect to see how much stupid we are. I had started believing that the special blessing of Māyā is on Americans that they are all stupid. I used to really, I used to think, I must confess, in the beginning. Then I met you all and I realised it's not that bad. Because I met so many important people, Ambassadors and this and that and all that, in England. I used to wonder what's wrong with them? They used to behave like young boys of twenty years or so. In Hindi we call it `gadha pachchsi', means at twenty-five you are a donkey.

And the way they used to pass jokes and I say they have no dignity, nothing; such high positions they are having what do they talk about? And they would stand out by that you know? They said, “Ah we're very smart" you know? They would wink at everyone, they would do all kinds of nonsensical thing which normally a twenty year boy might do anywhere once in a while. But they were all like that. They thought they were very young and they would walk you see with very great smartness you see like young boys. To them it should be very fast and like you see a bowler is about to bowl or some sort of a thing. It was really unbelievable that these people occupy such high position in the government. How could they be so irresponsible? But when I met you all then I really felt that no no there are many good people also. This

comparison you can today also see between you and these people. They'll argue for anything. They'll talk about anything like for Freud they were fighting. Freud's told us something very new.

So I've written in My book, so I said, “All right you have eaten all kinds of food before but you have not eaten the table. What about eating the table?" So everything absurd, everything vulgar, everything low level were justified. I don't blame him. All these stupid people were born here and they wrote books. They were the ones who were Generals. They were incharge. I mean I can't understand. You see this fellow Nought. You can one minute look at him and you will know he's a lunatic and they gave him so much time so much explanation; I mean I can't understand. And the idea about spirituality is like somebody comes and tells you something absurd. It's new, it's new, so do it. Now they say that you shave your head; all right, they shave their head. They'll say no “you grow your hair" and they'll grow. As if they have no personality of their own.

They don't think much about themself. They have no respect of themself. Even in those parties they used to tell Me “Ah have you been to this Guru?" I would say, “No I am sorry, I've not" Nowadays it's bargain better do it. Level of understanding of spirituality was also so low of these people who were so highly placed and I was really I was amazed how could they do such things with such big position.

There was one fellow who was quite highly placed he used to always look out for Me, whenever there was a party.

So C.P. said, “Why does he look out for You?" I said you know he wants to eat a lot and here the food they serve in England is not sufficient for him.

So he sit next to Me so he can share all My food you see. That's why he always". I eat very little.

So, so much interest in food. Then when I was not there he would go and sit with C.P. because He knew the secret He used to pass His food to him.

So much interest in food and himself was in such a big position and what was he boasting about? That I come on a bicycle on a half pant to office.

So I said, “Why do you go on a half pant?" “It's better, for a bicycle." “So why do you come on a bicycle?" “It's better for health." “But after all you are such a big officer. For going to your office you should go on a motorcar. You have such a big car and then this bicycle you can do it in some sports club or something." Out of proportion, where are you going? What work you have to do? Why don't you understand? And he's the one who used to eat like a glutton I tell you. He was thin like this. Absolutely thin like this.

So I concluded must be worms in his stomach or whatever it is. I used have pity for him because always very hungry.

So now, the attention if it is on food, attention if it is on money, attention if it is on so-called power of leadership and all that know that it will make you stupid. Anybody who boasts, “I am the leader of this." All right, all right, very good! You've known one like him you see? That what you have to reflect because if you say that I am the leader of this and this, itself shows that you are a stupid

fool, isn't it? Because if you know it's stupidity, all this Mother is making a fool out of us, why should you say, “I am the greatest fool?" Why should you yourself boast of yourself? Even any boasting is a sign of a stupid fool you know? Or a mad lunatic person.

Once our Prime Minister went to one lunatic asylum and he met one who was sane to talk to.

So he asked him, “Who are you?" He said, “I am Jawaharlal Nehru." He said, “Who is Jawaharlal Nehru?" He said, “I am the one who was the, who is the Prime Minister of India." “Aahh! You'll be all right. I used to say the same. You stay here for five-six months you'll be all right." So all such bombastic talking those people who do, you should just know I am telling you certified lunatics or certified fools. And once this goes, this stupidity into your head you will be no more a Sahaja Yogi, no more. Whole spirituality will come out and you'll be left high and dry. Anyone who boasts like that is worse but even if you think like that is no good, not on the proper lines.

So because of this ego you don't understand your responsibility.

When you argue also I've seen people “But I am the leader of this, I am the leader." I start looking at them how can they live together. How can they be collective, which is the quality of Viśhuddhi Chakra? I just saw these trees, see how many they are? Of different varieties, different qualities, of different nature; absolutely different, how they are living together? They all share the same sunlight, they don't quarrel.

The tree doesn't say, “I must fall onto another one somehow because he thinks." One thing is I cannot tell this trees that you are the leader. Only I can befool human beings. This is the main thing is, please be careful. Don't be befooled by what I tell you. All right as far as, because if I see somebody stupid I do pamper his ego so that it bursts forever and he gets rid of his nonsensical ego. But that's not My job; point is that I want you to be like Russians. They don't have any ego, nothing. They don't have any problem. It's so easy to deal with them because they know what I am and they know what they are. You cannot befool them, no. Anyone, anyone whether he is the biggest scientist or the highest ranking official or the highest personality, in any field, you cannot befool him. They are so humble.

And the Chinese, the same. You have to learn a lot from Chinese also. They are so sensitive to spirituality, so beautiful they are, so humble. You cannot tell them that you've done something good work or anything. They say, “No, so much to be done still. It's all right you are saying it in your goodness but we know our weaknesses." But in America everything is fixed and also your ego is fixed like that or so and a slightest blow you bloat up and become so great. That's not the way we can progress or we can rise and become so much one that no trace of that drop should be there. I am no more an individual, I am the ocean and this collectivity has to grow in this country not in Russia. Everything is growing like a cancer you know. Supposing the nose starts coming out from here and the mouth starts coming out from here what will happen? This country had to have this capacity. This country had

to do this while it's done by Russia. I don't even know their language. What you find here only the false Gurus are accepted and in Sahaja Yoga people do not know how to respect their Self-realisation.

So busy with their ego, so much impressed by themselves. The whole atmosphere is such a competition, perfection. It's a big professional achievement even in Sahaja Yoga.

Sahaja Yoga is not a profession because profession means individuality of a drop. This is a collective work, means what? Sahaja Yoga is a surrender. It's not a profession, it's a surrender. You are very intelligent people but I think, little more than normal.

So all of you start thinking on your own sometimes and bring problem. But the difference of problem of Russia and this place is so much; somebody told Me, “Mother you must come and live here, will be good idea." I will I don't mind but every third step if you meet somebody who is immoral, fifth step who is a stupid fool and the seventh *[UNCLEAR* foot/feet] you find a person who is about to give you a big lecture on spirituality, so what to do? Now you cannot be one of them, I must assure you. You are not one of them; but sometimes the atmosphere is so much full of speed and so mush full of this ego that you do develop this ego business very fast.

So quick you know and whenever I see that I get real fright; what's going to happen to America? It's not your country; it's not the country of your government. It's the country of collectivity, collective personality.

So now the other day we had so many people who got their realisation in five minutes time. That means they

are seekers. They are great seekers, they are frustrated, they got it without any problem. But to make them understand Sahaja Yoga, to make them absolutely, can say, a ocean out of the drops, all that, which is the most important thing you have to do. You have to see that you make Americans understand and realise what is the greatness of their personality? Why are they on this Earth of spirituality and of collectivity? Why? Why you were born here, for what purpose? You must evaluate. It's not so. They'll get attached to, identification is too much, they get attached to their children so much; if not, then they will get attached to so-called their power. Then they get attached to their house, then they get attached to their grounds, then to the stones; I don't know what they get attached to.

You have to be that great, for that complete detachment has to be brought in your life. That is the most important thing. This kind of an identity with this, this, this and this is not going to make you grow and if you don't grow, Sahaja Yoga won't grow. It will keep a very, very low level proffle. To get that high level proffle you have to do one thing is to surrender your ego. The greatest problem of America is `Mister Ego'. This ego must be controlled. I will tell you it's very simple everyday if you use the way we have to clear out our ego, everyday, everyday. You can get rid of it because the whole speed, atmosphere, competition; all is to pamper your ego. I have even seen some advertisement talking about ego you see.

“This cigarette if you smoke your ego will be pampered." Can you imagine? And people buy that kind of a nonsense, because they think it's great to know our ego

will be pampered, as if their ego is not already pampered.

So this ego business comes to people because there's no introspection. When there is no introspection you see one develops this ego. I am something great. Now say sitting down here if you start say, “I am great, I am great, I am great." Do you become great? You cannot.

There's a story about a frog you must have heard who was in a well and he used to think no end of himself. “I am everything, I am this, I am that." Somebody told him that have you seen a cow? He said, “What is cow?" “It's very big animal compared to you." “I can also become big. Why not I will" and starts growing, growing till he burst out.

So this is what it is we have to understand that this ego business is the real, real, real problem of America.

So now you have to surrender. Now surrender to whom? It's like this that if you say you are seekers, I mean you are seekers of everything. You are seekers of money, seekers of power, seekers of this, seekers of that. But if you are seekers of truth then just face yourself and know yourself and know the truth that you cannot be, you cannot be a person of any value if you have this artificial ego on your head like a big balloon, never. This ego has to be brought down absolutely and all of you should try to bring it down by doing some sort of a special method of searching within yourself. You have to, I don't know how to detach yourself and see for yourself is rather a difficult thing because ego is very satisfied. This is the biggest problem. Ego gives great satisfaction and with that ego you see you react and reaction has become like

a sort of a might or a fright. React; “I don't like it, I don't like that, I don't like that." Who are you? If somebody say, “I don't like you", finished. First of all you should say, “I don't like myself." Let's start like that. Why? Because all my life is centered round this, I am doing this, I am doing that stupidity, another stupidity; how can I like myself? I am the Spirit. Then you will start growing because this conditioning keeps you down. But somebody asked Me, “Who is interested in growing Mother?" I said, “Why? They're not?" They are not Sahaja Yogis, finished.

So there's going to be a great ship coming down to take all the Sahaja Yogis to enter into the kingdom of God.

So why, why should we introspect? You have to grow.

Even the stage is not there that is confirmed that you'll enter into the kingdom of God. You have to give up this stupid idea of ego. But what should replace it? What will replace it? Is love and compassion. That two people can use it with the ego like I tell somebody now this fellow is not all right. “But Mother you know he is, I love him." If you love him better correct it. If you really love, have courage to tell him that this is wrong with you. If you are continuing with this love story, then you must correct that person. And all these complicated you know such complicated things there are with this ego that you just don't know how to solve the problem sometimes if somebody comes to you with that ego.

So first is to introspect and find out why am I egoistical? What have I done? You'll be surprised, I don't know what is ego is. I really, I've just seen some things, but to be

very frank I don't know what people are egoistic of. Like sometimes you start saying My `Jay'. I also say `Jay'.

I don't think it's Me you are saying `Jay'. Just say, all right they are saying Jay, like that I say Jay, because I don't know why you say Jay. I don't know why? What have I done? Why are you praising Me I just don't understand? If somebody says “Thank you very much Mother." I don't understand why they are thanking for what? What have I done? See this ego is the one that records everything that this is what it is. I am such and I am such and I am such, all falsehood. But if you don't have such a record in your head you cannot feel ego. If somebody says, “You are very good looking” immediately the balloon starts.

Why is he saying? May be he wants some money, may be he wants to use you for some purpose, may be he's praising because he knows you are a stupid fool.

So why accept such a remark as something great you know. And in this way we loose ourselves completely. Let us have a command of ourselves. Do we know ourselves? I know I am that, I know I am born like that, I know all these things are there, so what? I mean I didn't achieve anything, you at least achieved. I never achieved anything; I was just like that.

So, why to be conscious of it? That I am this, I am; I am nothing. Whatever I am, I am. Now supposing this wood says “Oh I am wood” so what? You are wood after all. As simple as that, as simple as that.

So, see this complications of your mind should be reduced otherwise your attention will never improve and what will happen is that you'll not grow. And the dwarfs, you know? We'll have all the dwarfs here.

I want to show to Russians that you are quite capable of growing and you are quite capable of looking after your country. Your own President, his wife all of them are funny people. Try to talk nonsense sometimes, absolute, can't understand. What business they have got to talk about other countries when their own country is suffering so? There's no introspection, there's no understanding what's wrong with your own country and you start talking about other countries `this is wrong with them, that is wrong with them.' So in this atmosphere where you find a whole lot of people have this problem of ego, you can only supersede them, only shine out, you can only save them by absolutely getting rid of your ego, absolutely, hundred percent; in every way. You'll see you'll feel much lighter. Imagine you are hanging in the air, you do not know where you are going to land? How can you feel secured? As they say `stand on your legs'. It's like that; stand on your leg.

So now Sahaja Yoga is progressing very well, very fast everywhere in the whole world. They gave Me a Doctorate, they did this, they are trying their level best now to give Me a Nobel Prize also. Because only the Nobel Prize can put these egoistical people all right.

So they are working very hard to get Me a Nobel Prize. All that is to show that people will never accept Me unless and until I have some sort of a brand on My head. But is important, in this world one has to have some sort of a brand if he have to survive, everything.

So, for you also it is important that you have to have the brand of Sahaja Yogi. But in Sahaja Yoga if you have the brand doesn't work out. You have to have in reality that

power of Yoga within you. You can do a lot I know because you stand on land of Śhrī Kṛiṣhṇa and His power. Don't need anything else, need; don't need any machinery, nothing. But only realise your responsibility, what we are doing for Sahaja Yoga, for our self? How are we behaving? What is our style? How are we spreading Sahaja Yoga? Please try. If you can really introspect you'll find that you'll feel that we haven't done much for Sahaja Yoga that we could've done.

Busy with yourself, with your own activities. But unless and until you do for Sahaja Yoga something you have no meaning at all, you have no identity. If you can develop this beautiful reflective nature by which you just reflect about yourself and not about others, you'll be amazed, how much will change.

Even a simple meditation people don't do. You get them an Ashram; there they fight. Do what you like ends up into something funny. I didn't want to talk to you about something unpleasant all the time.

It's not a very good idea. But I feel that you should now awaken to the fact what is your responsibility as Americans? Very important, extremely important. And once you realise that you can do so many things because you have got the Power. You have the Divine Power. But you must awaken and shed off this horrible thing called ego, which makes you a monkey.

I've seen this is the only problem you have. There's not much conditioning. But this ego is the only problem. You don't respect anyone, you don't respect this Motherland, you don't respect even your Selfrealisation.

So this point today we have to know that we are, we cannot afford to have this ego anymore on our heads. We just are not going to have it. We are going to humble down and we are going to seek to things through our humility. Once you see these things work out you'll be the most important persons for even the Divine to deliver the goods.

May God bless you.

As it is we have now, I am awaiting lots of Americans will become and what will convince them of you is your humility and your good manners; very important. If these two things they see in you they will change. I am sure they will change. Not to be aggressive with them.

Contents: 1995-10-15 **Answers to Two QuestionsWritten in the Morning, The Westin Bristol Place Hotel, 950 Dixon Rd, Etobicoke (2.5 kms from Pearson International Airport of Toronto), ON, Canada**

[While quietly sitting in Shri Mataji's hotel room, other Sahaja Yogis are told that by one Sahaja Yogi that they can write two questions on a piece of paper for Shri Mataji.] [Later on, after shopping, when Shri Mataji is about to leave the Canadian leader takes out some papers and gives them to Shri Mataji. She pauses, reads them slowly and then moves quite close and looks straight in the eye of James Murdoch.] [To the question “Mother, if Lord Jesus is Your Son, then are we too most highly blessed?" Shri Mataji replies:] Of course you are My son, why do you doubt? [To the question “Mother should I spread Sahaja Yoga in Nova Scotia?", Shri Mataji

inquires:] Where is Nova Scotia? James Murdoch: On the east coast of Canada, Mother.

Shri Mataji: Sahaja Yoga must go everywhere.

[Shortly afterwards Mother leaves to the car and Sahaja Yogis bow down.]

Contents: 1995-10-25 **Nava Varsha Pūjā (Hindi) (Bhaiya Dhuj Day), New Delhi, India**

Every year a new year comes and keeps coming. But people do not understand the feeling of creating a new year. They only understand that on the New year day they will wear new clothes and celebrate. They never think that a new year is coming and what new thing we must think of. Whatever has been going on, it goes on day after day.

In Sahaja Yoga when we are so collective, then we must think what new thing we must have in Sahaja Yoga. You have gone quite deep in meditation. You understand meditation and you have also established a certain state. But in a new year what new aspect you should take, we must put out attention towards this. We must think what are the problems of our country and also the problems of the world and how can we solve them. For this I think wherever a Sahaja Yogi has interest he should put attention on that.

There are many new things that have started in Sahaja Yoga. This time I have thought that we should call the Shia Muslims and make them understand. We are trying for that and we are trying to spread the message of the holy life of Shivaji. Both are good that the Shias may understand what is Dharma and by looking at the life of

Shivaji we must understand what is Dharma and what were his ideas and what all he did for his ideals. In such a short time he did such a great work.

Now collectively we have become much better in Delhi and around Delhi, Sahaja Yoga is spreading.

But along with this we must think that are we getting egoistical? If Sahaja Yoga is spreading it's quantity is spreading so has the quality come or not? You should give attention towards this. You must put your attention on the groups that are there and to increase your members you must go to the nearby villages.

In this way you can grow much more. In this new year you must think that we have taken out many projects with which we got ats, houses, Ashrams. It is good thing. But what are we going to do in that Ashram? What can we print about Sahaja Yoga by which we may know each other. There should be a newspaper of Sahaja Yoga.

You should pay special attention on three things. Firstly is peace. That we have to bring peace within ourselves and we must find out the cause of unrest outside in the world. Why is there unrest and why is there turmoil in the whole country? You must find out the root cause of all this. And we must find out how we can become involved and active in it. Like regarding Chechnya. They told that the problem in Chechnya is that if we are socialistic or if we are a democratic country then there is lot of difference in both. In a democratic country if you are democratic then you cannot rule on any one religion. These three religions are the same Buddhism and Jainism is the same thing. These three religions which came from the five angels, which we say as Jews, Christians and

Muslims. They believe in only one book and believe in only one incarnation and that is why they are exclusive. But in reality they are not exclusive.

They should write down this point. In all these religions say if you write about Moses, then he spoke of Abrahim. Then came Christ. He spoke of Moses and Abraham. When Mohammad Sahib came he spoke of all three and also of Christ's Mother. These exclusive religions have been made by man. That is why there are quarrels over them. If anyone tells them to make a universal religion, they don't like it, because then how will they fight? But it is important for them to come into an universal religion. The moment they come into an universal religion these feelings will go, that we are separate and other religions are separate.

If you see even now a days there are big wars being fought over these religions. It will all finish off once people realise that this religion is not exclusive, so why are you fighting. If a Jew or Christian or Muslim is there all these religions have come from one source. No one religion is exclusive and the fight that is going on over this should be stopped. In Chechnya if they give the government to the Muslims. The Muslims are famous for producing twenty-eight children per family. They say that women from there are a child producing factory. By creating so many children they have made themselves into a majority. Now if you give them the government they will again do the same. Then how can you stop them? In their Dharma whatever power is there is this that we are in great numbers. It is not difficult for them to increase the numbers.

If they increase like this they will eat up the whole of Russia. Why do they talk of Religion? Why don't they become Russian? Regarding Indian Muslims. They are first Muslims and then Indians. It is in all countries. Now in Pakistan daily 18-20 people are being killed. They said in an interview, “Neither we got God or any human also, we roam neither here nor there." It is such a bad situation there. Now this has started penetrating into, the brains of the Indian Muslims, that the people who stayed back in India are flourishing and prosperous. There people are afraid that who will be killed when. Because the Sindhis and Punjabis don't want the Muslims who came from India to live there. Now these people have make Karachi their home and live around there and they are demanding Karachi. But Karachi is their only port.

The greatest thing that has been said in Islam is that “Till you do not know yourself you cannot know God. First know thyself." The second thing is that they have created such problems i.e. they believe in the Nirākār, the formless. They don't believe in God with form. The ones who believe in the formless, why are they fighting over lands. It is a form and a material thing. When you believe in the Nirākār then try to achieve the Nirākār. But how to explain to them for they are so blood thirsty. If we can print articles and point these things then people will start thinking that how much truth or untruth is there in what they are saying. Then they will also see that up till now we kept fighting and killing and what was the use of that. The Muslims are quite difficult. Of course there are Muslims in Sahaja Yoga. This time when I gave a speech

on radio. When I spoke to them clearly no one argued with Me. They were speaking to Me by phone.

Some ladies rang up and said “we are feeling cold after listening to Shri Mataji." And many people get realisation. This is also a way also by which people got realisation. Like Iranians have gone out of their country and they are living in America. We can give them realisation. In this way we can get hold Muslims in various countries. They are very violent and fight a lot. They should be made to understand that if you believe in the Nirākāra why are you fighting over lands. The second stupidity about them is that when you die and will be buried and when the `Kiyama' the `Resurrection time' will come, then your body will come out and you will be resurrected. After 500 years what part of the body can rise? This way many strange things are believed in.

So we should write it in newspapers and tell them that they are doing and thinking stupid things. Mohammad Sahib did not write the Quran. It was written forty years after him. Christ did not write the Bible and neither did Moses write anything. This way then what is the authenticity of these books? If this goes on like this they will go to hell. There seems to be no other solution. There is a limit to stupidity and by this they cannot be benefited. It is very different to find among Muslims, maybe one or two may come out. If they come in Sahaja Yoga then no one can kill anyone. If anyone had so much guts then we can explain to others. The biggest thing is our peace has been destroyed because! of Religion. These irreligion has created agitation and violence. If this

one thing could finish then at least 75% problems of wars will finish off.

Where does agitation `Ashanti' come from? If we see that many big countries are fighting. Like French president Chirac, burst on atom bomb in the South Pacific and because of that there are many protest `bombs' being burst in his country. But if you see individually then where does agitation and violence come into individuals. What makes a person agitated? Now there are many causes. It could be jealousies, ambitions etc. If he is a right-sided person then he will be restless. It could also be left-sided. In the left he will be an unhappy person and the right-sided person thinks of himself as happy. But both are agitated.

So we have to make this agitation alright.

By coming into Sahaja the genes get alright and when the genes become alright then man himself will get alright. His whole nature will change. I have explained in detail in My book about phosphorus that the phosphorus which is in the genes. When a man becomes dry then phosphorus explodes. Dr.

Worlikar said, “Three people have got Noble prize for this research on phosphorus. But what you have said today nobody has said." When a man becomes restless and agitated then groups can form. It is in two ways. One with egoistical people and second with left-sided and possessed people. Africa problem is due to possessed people. The others are due to ego problems. If we can destroy ego and possession then we can become peaceful. With the help of that peace we can ourselves can give peace to others.

We should pay more attention to the villages. Then we must explain the path of peace to them, like in he villages in North India, there is one defect that due to Muslim mentality, women are suppressed a lot. When you suppress women and when they reach and stand up then they are even greater than men.

There should be respect for women. In Sahaja Yoga women are very weak. They do not meditate. They backbite, create fights and are dominating. These things that have crept into women, by that their power gets diminished. Because the power comes from women. They are the potential. And when they behave like this the entire Shakti of society finishes. The greatest thing is that in our women is to establish peace.

For that even the husband should be peaceful. If he is peaceful and respects his wife then the children will become peaceful and the home will become peaceful. Now a kind of aggression that is in the men will never remain in its limit. It will always rebound. The companionship that is there. To talk to each other lovingly. And decently. How to behave properly in front of others we should pay attention to this. Many of the husbands are such who do not care for their wives and keep beating them, even after coming to Sahaja Yoga. I feel extremely unhappy that even after coming to Sahaja Yoga a husband and wife have no companionship then it is something serious. For Me it is a very serious thing that there should be complete companionship. Because you are a Sahaja Yogi and your wife is also a Sahaja Yogi and when both are sitting in the same boat then how can they have quarrels. It should not be, because it is a very

dangerous thing. Now that you have come into Sahaja Yoga fighting with one another then all the deities get angry with you then what problems you might get stuck into one cannot say. You should pay extreme attention to this point. Suppose there is a man who is purposely troubling a woman. Telling her that this is not good, that is not good, then one day will come when the deities within that man will become angry with him. It is a problem of Lakṣhmī. If it is not Lakṣhmī then it is the heart. The biggest problem is when left Nābhī catches then you can I get very different kind of diseases. I have worked a lot on left Nābhī and I see that left Nābhī gets alright with great difficulty, because there is no introspection. They don't think why is my left Nābhī catching. Supposing the wife is a shrew and does not listen and does just do what she wants. She insults the husband. Then sit and talk with her. There should be rapport with each other.

There should be communication. There is never any communication between husband and wife nor with the children You should give time for Sahaja Yoga. But there should be companionship, both together and also the children, the wife should come into Sahaja Yoga. If you feel that you are doing the work of Sahaja Yoga and wife is sitting at home. You should try that there is full companionship. Discuss with the wife, tell her that this is the plan. There should be ascent of her and the children also. Their intellectual level and understanding should grow.

Now everything is going opposite due to Muslim influence. First the women were suppressed and now the

women are dominating the men. This action reaction should be finished off in Sahaja Yoga. The remedy for this is to improve this in your individual married life. When you will become peaceful then your children will also become peaceful. All these illnesses of agitation which you see in big wars, where does it come from? It comes from man. It does not come from the sky or the trees. Man is the root cause of it. If man can become peaceful and he established in it should feel very proud that I am peaceful. At least our society should improve.

Sahaja Yogis have to take on the task of improving the society. But those who are busy fighting among themselves how can they change society? Many times I get complaints that the man is very nice but his wife is a terror, or the wife is nice but the husband is terrible. We Sahaja Yogis have our own decency and our own ways. We are moving out from those norms and doing wrong things. I have explained many times that they are the two wheels of a chariot. If one wheel is smaller than the other then it is not alright.

They are not similar. Their height is the same, their construction is the same but if you try to put right on left and left on it will not work. Both have their own specialities. Like a woman has her own weaknesses, she has her own characteristic. Men have their own characteristics. They always carry a watch. Men are very time bound. Women are slow in getting ready if they have to go anywhere. If they cannot go on time then the man are angry. These are very small things but the quarrels start on these small things.

Some men think they are in charge of everything. That they must reach on time. If one didn't arrive on time then nothing so terrible has happened. Slowly train your mind that you do not react. You should just watch. Slowly you will be surprised that you will get alright and your wife will get alright. Both have to practice this, that both should watch as witness. One should understand that woman is different and man is different. They have their different ways, though the similarity is this that they are both human beings.

You should introspect and find out why do such problems come in Sahaja Yoga. Like a married girl came from Lucknow. She had a thousand problems. Ask her what are her problems? Sahaja Yoga is not to break people but to unite them. If something is breaking then what is behind it what is it, you should see to this and unite it. Now that we talk of uniting then the Delhi people should unite with the Bombay people. But it is not like that. If the Pūjā is in Bombay it is in Delhi too. When you expand your heart then you will see that you are the whole world. Wherever there is a Pūjā it is for you. It is too much, that we should have Pūjā in Delhi and you must come here Mother. Just because of this I am going from here to there.

Someone will say please come to Moradabad or some will say come to this or that place. Now at this age how many places can I go to, I suffer because people should not feel I have favoured someone and not the other.

So I thought I will not go to Europe. But the Europeans come wherever I go. I went to Romania, or Russia they came there. In Sahaja Yoga you all know each other. In

the whole world there is such a great family feeling. Like if I say I will never come to Delhi, I will only come to Nagpur, then all of you will come to Nagpur. There should be a detachment. People keep telling Me to come to their cities.

Nobody thinks that I am doing such hard work even at this age. I have to travel so much. If all the time you keep pulling Me here and there then how can it be possible? You should explain to people on this point, that whatever Mother had to do She has done and now whatever is Her wish we will do that we will not put anything on Her. If She says Herself than we will do Pūjā. If She Herself says then we will accept otherwise not. We will not put any kind of pressure on Her. With this one thing will happen that My health will be saved a bit. If I have to do some more work I don't want that I should be pulled in different directions. Now what you have to project you do that, think about it and don't put this burden on My head. You all come to Me for little little things. If someone is ill you phone Me. But you are Sahaja Yogis.

I have given you so many powers. Why bother Me? You take it on yourself. It is your responsibility now.

I think that My children have grown up and become responsible and understand everything. You should instead give Me the assurance that `Mother we don't want to trouble you.' We will rectify the illnesses and problems. When this will start, then I will be satisfied. Now the situation is such that I get letters upon letters of problems. But you must tell them that send your letters to the centers. Why are you bothering Shri Mataji? We must see that how many Sahaja Yogis have solved the

problem of how many Sahaja Yogis. We have to solve it. But for that you must know Sahaja Yoga properly and do it with pure intention. Both are very important. I have seen many people who will say, “Come I will cure you." Then they will get after him so much that the man runs away from Sahaja Yoga. Make a committee and work out solution through that committee. Like you go somewhere and people present their problems before you. You are now fully acquainted with this state and you know what should be done. If possible I will write a book on how to solve problems of various people.

So what will happen is that the burden that is now on Me will be shared by you and by that you will grow and prosper.

The Dharma which is in you, the advantage you have, the civility that is in you, on the basis of that you can do a lot. Regarding marriage, you are leaders. Please think very carefully before you suggest a person for marriage. It does not help us. You can get so many married there is no financial help in that for you. The only pleasure you get is if they are happily married, then the advantage is to the husband and wife and many great saints can take birth. But they think that by marrying they are obliging us.

What is the advantage to us? When you recommend a marriage tell the couple that there is no advantage to Shri Mataji. There is no advantage to Sahaja Yoga except that your marriage is being performed through Sahaja Yoga which is to your advantage. After a lot of discretion and finding out only should you recommend a marriage. Because suddenly many problems crop up where a

marriage takes place. You see that people are getting better, the marriages are getting alright. I have to put My attention on the children also.

First I thought of peace, the second thing I thought of was the society. Respect for women, looking after them. The foundations of society are the women. Women have to look after society. For that men are not needed so much. The work of men is to do economics or politics. Women should be of a sacrificing nature, should be understanding and wise. Then only will the society remain alright. Many women are not generous. They don't know much about Sahaja Yoga. If they know, they think no end of themselves.

To bring balance in them, to make them understand, it is a very important task. The woman should know what she is. Why she has come on this earth? What is her task? She is the one who makes society a beautiful society. You should put your attention on women.

The third thing is the children. We should understand our ideas about children. You should talk to children, ask them their problems. In England they published a book in which what the children say about everyone is written. All the copies got sold out, as everyone wants to read what the children have to say. Very sweet things they have written. With this two things will happen. In society children will have their own power. What children say and what is the innocence in them the whole society will know. The children see that what we said was obeyed. The elders think that what the children are saying how they should implement them. In this the children should not be rude. Neither should there be any ego in them.

But they should have the ability to state their point of view. Keep attention on them. Children say such sweet things. Their understanding is very deep and full of experience. They see into little little things and relate so sweetly small small things, just like they are completely one with the Divine Knowledge or Divine Activity. Children see everything through vibrations. Then they put the elders right also. Like a gentleman came and sat down with both hands on the ground.

Some children told him not to sit like that because otherwise how will he get vibrations from Shri Mataji. He would only get vibrations from the earth. I enjoy very much the way children say many things and try to make one understand. They look after Me a lot also. Learn from children. Keep rapport with them. Speak to them. When they grow up they become like one of us. But the Saṁskāras is there in childhood.

So sit and talk to them ask, them about anything. It is a very joy-giving thing. And everyone should get this joy.

People who fight in the name of religion, bring peace into them. Talk to them, make them understand.

Secondly, the society. If the society is not alright then that country cannot have peace and prosperity.

It cannot develop. Like the society of Russia and China is very good. Even the Indian society is very good. The reason for this is the women of these countries have controlled the society. America has lot of wealth, etc. but the society is decadent. A very great task of Sahaja Yoga is to make the foundation of the society. One should look into the unlawful aspects of society everywhere. In America a very small girl was beaten up so the Sahaja

Yogis rang up to say we would like to support that girl. I said, “Absolutely do so." It is very important. Keep her with you and look after her.

So a new dimension will come to you that these people care a lot. If someone is upset, someone has no money.

Some one is upset not because of some greed but because of adversities so pay attention to that person so it has become very important the time has now come for that. In a proper manner take out a solution to the problems of society. Like people who have become old and cannot walk, they' should have a place to stay. Then I started a refugee camp, a leper home. I left the place but those homes are still there. Keep attention on the deprived and downtrodden people of society. If you help society this way then every one will love and respect you a lot.

We do for ourselves in any case. We have attained for ourselves but what are we giving to others. Specially with the help of Sahaja Yoga Shakti you cure so many people, remove their diseases, help them, you can do good to them. In a way we have a burden of society on us, that when God has given us this Shakti then in what way we can change society so that the physical, mental and spiritual well being of humanity can take place. This one job Sahaja Yogis should take up. Also help the poor and downtrodden people.

Slowly you will be surprised that your popularity will slowly spread in the whole country. In reality people make forums for such things only to get votes or to earn something, but we don't want all that, just by your powers you can cure people. If those people get alright

then they can prove by their powers that how people improve with Sahaja Yoga. Not only that but they can talk openly about Sahaja Yoga.

In this new year, the shell in which we live, we must come out of a And project outward. In the beginning there will be problems, your own problems. Firstly ego will stand. That will spoil your head.

Then you will get angry, upset. Different kinds of things will come but to gain, control over this also you will have to get out of the shell. When you will come out then you will realise how you should behave with outsiders, because you have to integrate them. When we will learn to deal peacefully with them then we must understand that we will be cleansed within immediately. It is a question of cleansing.

Many people agree with what I say but they themselves feel they cannot be like that. Why not? They reply, “because you are God." I said, “God, doesn't do anything. He remains away." If I am God and I am doing it means that the very high state you have got, make it in such a way that it is benefficial, not that you have uselessly become Sahaja Yogis. There should be a method to use it fully, which you have.

When you will pay attention to yourself then you will say that your home and society and your country everywhere there will be a kind of a new state.

Even now Sahaja Yogis are very nice. Their faces shine their eyes sparkle, vibrations are coming. This can be of any realised Soul but you have more than that. It is the use of it that you can give to others collectively. When your movement will be in collectivity then you wild be

surprised that not only with your powers you can cure others but also give to others. But people are very exclusive regarding this matter.

Sahaja Yoga means only Sahaja Yogis why talk to anyone else. You should pay attention at whatever level of society it is and there is no harm in talking about it. You should pull those people into Sahaja Yoga.

Those who are not in Sahaja Yoga, doesn't matter, but it is important to give them peace and reassurance.

You have to work on these three levels. Like you have collectively put the land alright. It is great. But even greater than that is that you should expand to global state and help the needy. Help women. Help down trodden, the sick people. Not with a missionary zeal but from within. They feel so they do. With this Sahaja Yoga will get a great name. It is not difficult. We have to work for that. In a way we have to increase our introspection. When that increases then you will reach that point where you will be absolutely thoughtless. As soon as thoughtlessness come you should try to increase that. In thoughtless awareness whatever you can do you cannot do otherwise. That is why you should pay attention to yourself and try to go into thoughtless awareness. In meditation try to get thoughtless awareness. In that thoughtlessness you have gone above your mind and all the cosmic powers will help you then whatever you want will happen.

But at the time of doing this, you should be thoughtless. It is very important otherwise it will be half here and half there. Now we all have become collective but it should be benefficial. We have become realised Souls for what? Did

we do it to die like Buddha or Mahāvīra? For what did we use our realisation. I have seen people use their vibrations a lot, but this we do for ourselves, or for Sahaja Yoga. But those who are non Sahaja Yogis we should use it for them also. It is not a very difficult thing. This Shakti is within you, to whomsoever you desire, give it. When the tendency of doing benevolence will awaken in you then no question will remain.

Contents: 1995-10-30 **Diwali Pūjā (Hindi) (6th day after Diwali Day), How Sahaja Started, Nargol, Maharashtra, India**

[SYNOPSIS!] [When I came to Nargol twenty-five years ago, it was not My idea that the Sahasrāra should be opened. I was thinking, let Me wait and see what is the state of human beings. Man has still not reached that state where he could understand what is Self-realisation. Although many saints and sages have talked of realisation and the knowledge of this is a lot in Maharashtra. The reason is that the center path followers who are called as Nath Panthis, these people talked of only one path for the benevolence of the self, that is knowledge of the self. Without knowing yourself you cannot achieve anything. This even I knew but at that time the state in which I saw human beings was very strange. That man would run after such people who had no truth in them. These people had no other aim except to earn money. When the state of man is such that he cannot recognize truth at all, then it is very difficult to talk of truth to him. Why would people listen to Me? I used to feel again and again that man has to grow more.

But then I saw that people are bearing extreme problems of Kali Yuga. There were many people who due to past live Karmas were in great trouble.

Some people because of the past lives came as rākshas in this world and they were busy troubling, creating problems for people. They never felt bad or faltered. I saw two types of people. One who gave trouble to others and the other who are unhappy and troubled. I had to think to whom should I put My attention. The ones who troubled others felt that they were perfect humans. They never ever imagined that they are troubling others. The troubled people were bearing all this perhaps due to their helplessness or they did not know that they should oppose such people who aggress them. At that time I thought when will man think that he has to change. We have to bring forth a change.

Some would trouble more and some less and some would bear more troubles and some less. This was the state of the society.

Maybe it could be in the name of God, or it could be in the name of the country, or it could be government or economical.

Someone was extremely poor and someone extremely rich. This way in this country there was a kind of a deception going on. I used to think that till man does not change, till he does not recognize himself, till he does not attain his greatness and glory till then he will go on behaving in this manner. This was in My mind since childhood and I thought to understand human beings is necessary. First I used to study humans a lot. I used to remain like a witness I tried to understand what is a

human being? What are his problems and faults and why does he think this way. Then I reached a conclusion that man has either too much ego or superego which means conditioning. Because of this he has no balance. Till he does not have balance how will the Kuṇḍalinī rise? This is also a great problem.] [When I came to Nargol, due to some strange going-on where a very wicked rākshas had put up his camp here. He had begged My husband to send Me. I did not like him one bit but I came here due to My husband's request. I stayed in the same bungalow. I was sitting under a tree and watching the spectacle of this rākshas and his camp. I was really surprised that this fellow had called everyone and was mesmerizing them.

Some were screaming, some were barking like dogs, some were roaring like lions. I then realised that he was taking them to the animal womb. He was awakening their subconscious mind. I got very worried.

I had seen many untruthful people before. I went around to see what they do. At least one should know about them.] [I saw that they were extremely frightened people They had the guards and weapons with them. If they were doing the work of God then why did they need all these things? They would spend lot of money.

They robbed people of crores of rupees by telling lies. This is the importance of Kali Yuga that such wicked, evil people are still prospering.

So the answer to all this was that human awareness should be enlightened and awakened. Wisdom should come and in one's awareness he should understand what is wrong. I saw that in the society in which I lived, every minute people would do such things by which they were

destroying themselves like drinking, running after money, etc. When they spoke it was not natural.

It was artificial behaviour like a drama. I used to think what has happened to man? Why is he stuck in such slavery and he is doing such wrong things. But to whom could I say all this? I was completely alone.

At that time when I came here I was in a dilemma as to what should be done. I saw that this rākshas was mesmerizing the people. Then I understood that if I do not open the Sahasrāra then the real seekers who are searching for God may land up God alone knows where.] [The next night I sat at the seashore the whole night. I was alone and I felt very nice. Then I went into meditation and saw within Myself and thought that I should open the Sahasrāra. As soon as I desired that the Brahmarandhra should open, I saw the Kuṇḍalinī within Myself. She rose like a telescope making a `khat' noise through each Chakra. Her colour was like many colours, like when you heat iron and the many colours that flame from it. Then the Kuṇḍalinī arose and pierced through the Brahmarandhra. I understood that now I could begin My work because the problem finished, I became completely free from worries. I thought, what will happen? Perhaps people will oppose, protest or may laugh at Me? If they want to do more they will kill Me.

So there's nothing to worry about. I have to do this because I have come into this world for this job. Because I had to awaken collective consciousness. I thought till people do not get Self-realisation, they do not know themselves till then this work is impossible. You can do all the things in the world but it's no use.] [The person

was a very old lady to whom I gave realisation to. She believed in Me a lot. I thought, thank God at least she got realisation. As it is it's not easy to give realisation in this Kali Yuga to people. When she got her Self-realisation then I realised that it can be that many others may also be given realisation. To give vibrations and realisation to one was very easy. To cure one person was very easy. If a person had a certain problem, ailment or some conditioning, to take it out what should be done? One person has one kind of problem, another has a different problem and a third has a third kind of problem.

If one has to do collective work then only by one session of realisation everyone should benefit.] [The work of collective consciousness and realisation through this method I achieved with a lot of meditation and contemplation. I turned My Kuṇḍalinī in all the directions, I put the grace of My Kuṇḍalinī on others and no one knew anything what I was doing. No one knew what powers I had within Me, who am I, not even in My family. I never told anyone, because it is very difficult for the human brain to absorb. Everyone is sitting in their own egos. Now who could tell them? Like Kabīr has said “How do I tell them, the whole world is blind." The world is not blind but ignorant. Then how could I give such subtle knowledge to them? But when the Kuṇḍalinī awakened in that lady then I saw that a very subtle power came into her and she started understanding Me with that subtle power. After that twelve people got their realisation. After realisation I was surprised that their eyes starting shining and they started observing everything. A strange experience came into them by which they could feel. I

worked on each Chakra of the first twelve people because the foundation should be strong. To make it strong I had to work very hard because though their Kuṇḍalinī had awakened after awakening the Kuṇḍalinī to make it move in the right direction, it is necessary to do meditation and contemplation, one has to make her settle down properly.] [I realised that if these twelve people have twelve different natures and by making them sit together, how to organize the light of the Spirit, like we take a needle and thread and make a garland by putting flowers one by one in it. How to get them collectively together. How to take the different natures of these twelve men and how to tie them in one thread. When they got their realisation then I saw that in all of them a one thread-ness taking place slowly But to tell the common people collectively this was not easy.

Then they organized a program in Cowasji Jehangir Hall. Then I told everyone how many rākshas have come on this earth, what they will do etc. Everyone got frightened. They said “If Shri Mataji talks like this someone will murder Her." Everyone told Me “Please don't say all these things otherwise there will be many problems." I said, “Till now no one has been born who can kill Me.

So do not worry".] [I told them to meditate on My Kuṇḍalinī, so they would become thoughtless immediately. By becoming thoughtless they would feel that there is a great connection with Me. Slowly thoughtless awareness started growing and a new light of collectivity spread. I saw for the first time at Cowasji Jehangir Hall that Indians have been born in India because their past lives must have been very good. I did

not have to work so hard in India, people would get their realisation very quickly. In the beginning it certainly took a while but in the Western countries I would break My hands trying to give them realisation. To raise someone's Kuṇḍalinī was like trying to lift a mountain and then it would fall down again. Then when I started this work in the collective I found it really difficult. They would ask strange and stupid questions. When I would give them the answer they would be amazed that how does she know so much. They would test Me all the time.

Because ego is tremendous there. In London the first time there were seven Sahaja Yogis. All seven were hippies and used to take drugs. Then they became Sahaja Yogis. I became a kind of a support that people left drugs because of Sahaja Yoga. To put drug addicts right was not easy. In a way it was good because the hard work that I did on them gave Me an experience that even the most difficult of human beings, when he really desires that he should get Self-knowledge, then he does get realisation. I would tell them that desire from your heart your Self-realisation that's all. Only by that they would get realisation. I have different experiences of different countries like Russia, Ukraine or Romania. These countries must have definitely got some connection with our country. Nath Panthi saints like Gorakhnath, Macchindranath must have gone to these countries because what I found there, I realised that these people knew about the Kuṇḍalinī hundreds of years before. Then I understood why these people got their realisation so fast.] [Nath Panthis did a lot of work in Maharashtra and I also worked here a lot but the painful

thing is that what I have been able to achieve in north India, I have still not seen that in Maharashtra. I can't understand where the saints have worked so hard and every Maharashtrian knows who were the Naths and what work they did. In this very Maharashtra Sahaja Yoga has not settled down so fast like in the North [India]. What could be the cause for this? I feel that when people know everything before hand then a kind of indifference comes towards it. In Sanskrit there is a saying when you go again and again somewhere or meet someone then disrespect is shown towards you. Then you do not get the same respect.

Because people who live in Prayag instead of bathing in the Triveni, they bathe in their houses. Whereas people from all over the world go there after doing Pūjā to bathe in the rivers. There are many Sahaja Yogis in Maharashtra who are very active, but the surrender to Sahaja Yoga is lacking. Surrender means that the Sahaja Yogi state which we have got, how do we use that state of a Sahaja Yogi. Is it only for our own benevolence solve our own problems, or our own families or is it for the whole world?] [The first thing you have to do is meditation is to go deep. When you go deep then you feel that why should I only enjoy it, why should not others enjoy it. When this desire comes within then Sahaja Yoga grows. After that man thinks that in his life he should give joy and happiness to others there is nothing greater than that. He forgets all other things. When this happens then Sahaja Yoga grows. Day and night he keeps thinking the same thing. He enjoys it.] [Now money has become a big thing in Maharashtra. From morning they get up at 4

a.m., do meditation, etc. But it is a kind of mechanical thing. It should be done from the heart and with devotion. Try to spread that devotion. This is what Maharashtrians should do.] [I had never thought that I will see all this in My lifetime. This is the greatness of the Kuṇḍalinī and the work of Param-Chaitanya. I was Myself surprised by the Param-Chaitanya that what it will do next. Although it is My Power but this Param-Chaitanya is making different kinds of photographs of mine, is showing different kinds of miracles. Like in Mexico a lady who worked in the UNO got her realisation. She wrote to Me that her son got very ill. She had an illness in her family where children grow aged. This child had this disease. She wrote three letters to Me. In the fourth letter she wrote that the boy recovered by himself. This is the work of Param-Chaitanya and there is no doctor greater than the Param-Chaitanya. The way it works it's amazing. Many have had many miraculous experiences, because the. Param-Chaitanya is now filled with blessings. Everywhere you have blessings. It will give you love, peace and will look after you in every way. Everything is there but now a lot of speed has come into its movement. This time there was such a big program in America in a big hall where people had no place to sit and in five minutes everyone got realisation and that also in a place like Los Angeles. Everywhere I went it took five minutes to give realisation. It was really surprising. The actions of Param-Chaitanya have grown so much and of such diverse kinds that one can't understand.

Someone took My photo and desired that what is said of the Devī that in Her feet is the moon and on Her head the

sun, should get such a photo and really such a photo came. Whatever you people desire will happen. What should be said.

This Param-Chaitanya's power works so efficiently and knows so well the problems and ailments of all and cures them with great love and patience. When you have worshipped the Ādi Shakti at that very moment you have also worshipped the Param-Chaitanya or the `Ruh'. This Shakti is now so activated that you people should not delay the global transformation of this world. The ones who will come and will work for it they will gain. The way this Shakti works. And you can get realisation because of it. If you start using it then you can do every kind of work. If someone is troubling you, you can give him bandhan. You can give bandhan to any work you want to do. In bandhan what do you do? The Shakti that is flowing through you, you take that Shakti and tie it and whatever questions or problems you have you give bandhan to that. You have this Shakti and you are so powerful. If you use this, I don't know where you can reach.] [May God bless you.] [To commemorate the historic Pūjā, the French Sahaja Yogis brought silver coins for the collective. No sooner than the distribution of the coins began, the children were lured by the glitter of silver and they jostled and pushed for the silver causing a stampede.]

Shri Mataji: The Pūjā has become just a mechanical ritual.

Even after realisation you have so many temptations. I have worked very hard. I have really worked very hard. This body, this mind, all My health, everything I have done for saving you but yet your surrender is still lacking!

[Sahaja Yogis pul their years.] [Additional Quote from Sahaj New, Issue 307 (***2003-09-09***):] The higher state you have achieved should be so lived that it becomes useful.

***Contents: 1995-12-03*, Public Program (Hindi+English), Satya Ko Parakhiye, Kidwai Nagar, New Delhi, India**

[Shri Mataji talks in Hindi: MISSING] [Shri Mataji talks in English:] I'm sorry to say I have to use this language which is our national language which is... which is very important. To be very frank it is not My mother language. But is very powerful language and to express Sahaj is a very wonderful way you can talk about it. Why, in English I find it sometimes, formerly because certain words, which are very deep and subtle, cannot find them in Western languages. I wish you all could learn our national language so at least one language you can learn, it is not difficult is very easy language Hindi language is.

I hope you are all comfortable here and as you say that you have a comfort of your Spirit, I'm sure with meeting all these people you must be very happy and I hope there are no complaints about your staying or your *[UNCLEAR]* and all that.

I have been just telling them what I have told you before, that love is truth and truth is love, but love should not be attached love should be detached love, where it is detached gradually you start growing into such a huge, big personality that you can solve the problems of the world.

So you have to grow and for that growth you have to get out of your smaller, narrower lives into wider and

[UNCLEAR widener] atmosphere. Once that starts happening you really grow and you grow so beautifully that your power can solve the problems of the world.

I've spoken so many times in English instead of get a chance to speak in Hindi or Marathi I hope My Hindi is not so spoiled that people are being able to understand Me. But the main thing is that our language is of love when there is love you don't need any words to express you can just feel it. And you can assimilate it, you can absorb it and you can enjoy it.

So many of you told Me that, “Mother, better You speak in Hindi because when you speak in English we start thinking, we don't want to think so is nice when you speak in Hindi we enjoy it more” and it is true also sometimes that if too much thinking is done, then you come down to the level of your thinking and you are not beyond thinking where you have to be.

But I must congratulate you all in the presence of all these people that your dictation and your understanding and your depth is also immeasurable. I don't know in My lifetime I never expected that Sahaja Yoga will spread in 65 nations in such a great way where you are representative of all these countries and as I told them that you are responsible for your country where you should develop Sahaja Yoga in such a way that people will follow but I don't know which country will take a lead I wish you all great *[UNCLEAR]*.

May God bless you all! [Hindi.] You know all the conditions, you are all Sahaja Yogis and I don't need explain to you.

So first is, that you must forgive yourself, you have to forgive everyone in general. Very simple conditions this are, very logical, nothing else.

Contents: 1995-12-05 **Śhrī Ādi Shakti Pūjā (Hindi), The Shakti of Satya Yuga, New Delhi, India**

Today we will do the Pūjā of Shakti in Satya Yuga. Because Satya Yuga has started and in this environment, the *[UNCLEAR]* Shakti has become more intense. The first form of Shakti is that She is enlightened (elevated). She is full of light (intense energy).

[SYNOPSIS!] [The first aspect of the Shakti is that she has brilliance, lustre ad full of magnificence when this Shakti will manifest itself in its full form then all the wrong type of people will get exposed. All their misdeeds will get exposed. Their misdeeds which were going on secretly will be exposed. Every kind of defects, deeds whether they are mental, pertaining to one's duty, terrorism, or any kind of thing that is not liked by truth, will not be able to save itself because the light of truth will fall on it. In the light of this truth you will see the special nature and form of this Shakti.] [The Krita Yuga has started and Sat Yuga will come after this. This has also been told that the Sun of the Sat Yuga has risen on the horizon. You will get the proof of it. Whoever will bring untruth in the path of truth, he will be caught. Then it doesn't matter if he is a Sahaja Yogi. He may call himself a Sahaja Yogi and then if he does wring things then he cannot be saved. Till now the truth has saved him, supported him, looked after him and protected him but then after this he does not have the Shakti that in front of truth it can save such

people who go against the truth.] [The greatest power it is Shakti is the power of love. Love means egoless and without expectations, to spread the kingdom of love. The Shakti will do this work. But this Shakti which is the power of Chaitanya [vibrations] will work only there through you. If Chaitanya could do this work by itself then today you people would not have been Sahaja Yogis and the *[UNCLEAR]* would have been no need for Sahaja Yogis. Now you can understand how much one needs the Sahaja Yoga as you see that Sahaja Yogis are getting ready in collectivity. The reason for this is that you are the channels for the Chaitanya. Now these vibrations which spread through these channels you must understand that you should not even raise your eyes towards anything that is wrong, because you are yourselves filled with this Shakti. You have all kinds of powers which are being conveyed through you. Then the same power will make you powerful, complete and healthy. You do not need the support of anything else. Just as soon as you will take the support of anything else you will fall down. Like I have seen big people who call themselves important they send Me messages that we want to meet Shri Mataji. We want to meet her specially. If you say no to them then people say that they will trouble you a lot so you might as well meet them. When they come, they will get realisation and will get alright and after that they will vanish, because they do not understand that the power of truth is so tremendous.] [Once if you come into Sahaja Yoga then it is better that you go deep into Sahaja Yoga, otherwise you cannot be saved. Every time man thinks what's my benefit by

coming to Sahaja Yoga my son is still sick, my money got stolen, I had income tax problem etc etc. But all these problems of yours got solved at once, first of all if satisfaction comes and peace of mind has not come into a person then Sahaja Yoga is useless for him. When satisfaction comes then the thought comes that one needs nothing else, one needs nothing more. There is no need to do anything wrong which is destructive for the society, to others and to yourself, after Sahaja Yoga. If such is the case then you will have to suffer the consequences.] [I saw in the beginning many people came into Sahaja Yoga who made money, fought, created problems and then they finished off. Because the Shakti of Sahaja Yoga is such that it threw away such people.

If they get alright and come back then it's a different thing. Like in the ocean there are two powers by one the high tide comes and by another the low tide comes. In the same way this Shakti has a pulsating action, it means that the beat or pulsation opens out and shrinks once. That is how the heart beats. Ādi Shañkarāchārya has called vibrations as `Spanda' pulsations. Pulsations means that once it will lift you and the next time it can throw you down as well.] [People are coming to Sahaja Yoga because there is a lot of benefit from Sahaja Yoga.

Some get good health, wealth, some get children. All get some benefit or the other. To some it is a lot to some less. But the greatest benefit of Sahaja Yoga is peace of mind and satisfaction (Samadhan), that after this we need nothing else. I need nothing else, I have got everything, When this state of yours will come then know

that you are a Sahaja Yogi. Then without any difficulty, whether you want or not Sahaja Yoga will look after you. It will make you completely satisfied. People will say what has happened to him. How come he has become desireless? Because one is not bothered anymore. Once I went to America and gave realisation to a woman shopkeeper she said “After realisation I just don't remember anything, first I needed to remember everything in my shop and I used to write each thing, but I was always running at a loss. After Sahaja Yoga, I neither count the things in my shop, nor I remember what I have there and the most amazing thing is that now I am making profits. Sahaja Yoga has taken me in her lap and all my problems of weighing, selling etc. are all finished.

Somebody is running my shop. I don't run the shop anymore."] [When things happen like this then man understands that he has reached the seventh plane of Satisfaction.

He does not even need to think about it. It is beyond thoughts. The reason is this that before Sahaja Yoga we live in our thoughts. In Sahaj everything just happens spontaneously. You will get this experience slowly, The day you will become fully dependent on Sahaja Yoga then the whole of your life will become inundated in a very beautiful manner and you will hot need to interfere in any way. Once there was a break in our house and all My sarīs got stolen. One silk sarī was left behind I used to wear that and go to parties My husband also thought that she wears only one sarī to get satisfactions is the greatest thing. Suppose I like something and I am

running for it that I want this or that even if one takes loans for tat. Once you get it then the attention goes to other things. Whatever you have you cannot enjoy it.

If your attention is on the Spirit then it will show you what the spirit sees. Then it will show you what is joy giving and bliss giving. Then when you know the meaning of Swa, self, you see that only `Swarth' when you go on seeking here and there and go crazy then only will you go towards the self.] [When you come to Sahaja Yoga you should know that the one who is looking after you, has crores of hands. If you go under her protection then why would you do wrong things by which you get catches and become uselessly troubled. If you are caught up then it gets cleared just like that.] [We see that people get uselessly worried over trivial things. The reason for this worrying is that there is no innocence. The aspects of the Shakti are firstly light, secondly Truth, thirdly love and fourthly, peace of mind. If a person gets agitated then he is not a Sahaja Yogi. You have heard of Socrates, Hazrat Nizamuddin. Hazrat Nizamuddin they told that if you do not bow your head before the king, then we will cut off your head. But the king who said this, his head got cut off in the night.] [There are two movements in Sahaja Yoga like in the sea. In the same way in Sahaja Yoga you are under the influence of two Shaktis. First power is your upliftment and by the second power you are thrown out of Sahaja Yoga. Once you are out of Sahaja Yoga then there is no connection between you and Me.

You have no right over Me. If you want privileges from Me then you first have to get involved in Sahaja Yoga like Suvarna is heated and becomes kundan then such a

Shakti comes in him that it can catch a diamond. If you put a diamond into kundan then you don't need to stitch it or set it, or needs any thing else to catch it. Kundan is so soft but it catches the diamond. There is nothing harder than the diamond.

In the same way you can also become a Kundan. You will see that you will get the power of satisfaction and peace of mind (Samadhan). It is beyond thought. In Sahaja Yoga you go beyond mind and emotions beyond the Guṇas and you go into such a state where there arise no thoughts. You can look at anybody in a thoughtless state. You just watch. This habit of thoughtlessness is called as anything happened and immediately thoughts arise. Anything you see and immediately thoughts arise. People go crazy just thinking and thinking. One man told Me in Switzerland that even if you cut off my head but please save me from the storm of my thoughts. He was a doctor. These thoughts come into us because of ego or conditionings and also there are many people who feed these into our brain like reading books, going to some Guru, meeting various people, or having big discussions. Rāmadās Swāmī has said “Speak of that by which your arguments and debates will finish off." Even after coming to Sahaja Yoga, we think about everything. But we do not know the miracles of Sahaja Yoga, that when we have fully put ourselves under the protective wings of Sahaja then Sahaja will also do the thinking for you and Sahaja will also solve the problems of the questions which are around us and of what we know nothing.] [Many one man thinks that he has forgotten his way and he remains worried. How to find the way, whom to ask If you have

lost your way then also it is Sahaja. May be you have to meet someone, or you have to pass through something or you have to experience something, that is why you have lost your way.

What is the need to worry about it. You are not going for some war even if Sahaja Yogis go for war they will win the war without fighting.] [In whichever countries people have done lots of thinking like America, then a crazy person like freud has been accepted and worshipped like a God. All the time they are looking for pleasures and every joy has been made in such a way that people get destroyed by it. Everything of theirs has destruction built into it, till they do not destroy themselves they do not think that their is a limit to their enjoyments. See their games, they will go to mountains for skiing and break their legs and bones. Where we lived there was a church and next door to it was a pub. The people from the pub would come toddling and fall on the ground. Whatever man has done through his brains with his ego they have all been wrong. But when you do anything in the light of Spirit, then that work will always be very beautifully, properly and with understanding. But if there is no understanding then this thought does not have that consciousness.] [Now that the time of Truth has come when we walk on the path of truth then we should not look back, because your biggest power is the light and such a light where you will not see your shadow. There is light in front and on all sides and behind. But you have to be fully enlightened by the flame of the light. For this I tell you a small path, that all of you should do meditation. But you cannot even do that, especially for women. All

their attention is on making food, children or here and there. Women should be the first to do meditation because they are the Shaktis of the society. The greatest role of the woman is that she makes the society. Your work is to make the society alright and make it grow and for that there should be balance, understanding and wisdom and with it there should be the humility and modesty of a women. If a woman is not modest and humble then she is a man. If she becomes aggressive and thinks that she must compete with man on every front then it is wrong. In this some thing to compete for? You are yourselves very powerful, why do you need to compete with anyone. I am saying this again and again because in whichever countries women have not taken the weight of the society's problems on their heads, those countries are now sinking and will finish off. A woman should look after her children, it is a very big work. It is necessary for a woman that she should enlighten her powers. The society today in this countries is alright because of the women of this society. Not with forcing, but with love. Also a love without expectations. In this country there have been such women like Panna who put her son to be killed to save the crown prince. Queen Padmini committed Jouhar (Satī) along with three thousand women to save their chastity, our society today is saved because of such women, because the kind of darkness that has spread on this country it would have finished long ago. It is their Puṇyas that has saved us. Their Puṇyas will take on a special form in this Satya Yuga. The miracles of it will be seen. You saw how the young boys of Romania were singing. They have never

even read the notations of Indian music, they have had no formal training. The artists were saying that even after doing tapasya for years together this condition of singing doesn't come but how could they do this? It is a miracle.] [In your life also many miracles will come after coming to Sahaja Yoga. But even then you are still lost on the train of your thoughts. When you drown in Sahaja, it is a great intoxication “when you are intoxicated then what else is there to say?" Come into that intoxication. Then it doesn't mean that you roam around like a mad person. In this intoxication you become intently devoted to your duties and for that you have got the powers. If you want powers then for that firstly you must get settled in Sahaja Yoga fully. Leave all other things of the world. Now someone wants money, someone wants power, this or that.

The one who says “I don't need anything. All my desires are finished." Then Param-Chaitanya thinks that I will fulfil your desires. Then his desire is your desire. Then it will take you to such things that you will be surprised, that we never thought how it happened. All problems and worries of the world will go away. Then you will not need to ask for anything. You become the giver. Just the giver. What is there to ask for? Only those will ask who have some want. But those who have drowned themselves in the ocean of satisfaction, what will they ask for? This does not mean that you become ascetics and live in forests.

Rāja Janak was called Videhi. He was a king. Dance, Drama and Music used to be presented before him.

There used to big processions for him. But people called him Videhi.

So Nachiketa asked his Guru that when Rāja Janak comes why do you stand up. The Guru said “He is a much higher person than me." How? The Guru said “We have left the world and taken Sannyās but he without leaving the world is a Sannyāsī." The question of leaving something arises only when you have caught on to something then you say I left this or that. But when you have caught nothing what will you leave? This catch within us, has come from thoughts. Maybe because of conditionings or ego. If it doesn't go then it means that you have not descended into Sahaja Yoga.] [To be caught on anything is there only when we think that thing to be very important. There is no catch of the Spirit. It is a giver. It is going to spread the light in all four directions. It gives powers and such a power that people become powerful, mighty and great. You get total oneness in it.

So much love that all this aggression and wars finish off. One Muslim from Algeria whose parents said we are going for Haj. The son told them to go to London. They said, “Why London?" He said, “I came to Haj to London because there only I got it." The parents came to London and told Me that their son said that the Haj has come to London.

So we came here. Now this understanding and wisdom came into that one boy and his parents listened to him. I asked his parents, “Why did you listen to him?" They said, “He is a very intelligent boy. He has changed so much that we cannot believe how such a miracle happened to him.

So many people go for Haj and nothing happens to them. They are the same. They drink, beat their wives and whatever they have been doing they continue to do that. But this boy has changed completely. That is why we come to London."] [The second power of Truth is that Truth is so powerful and enlightened and so full of love that its effect come on many people. People can see it and say that how did this happen to this man.] [In Maharashtra one person who came to Sahaja Yoga went to the collector's office. He was sitting peacefully. Everyone was in a hurry and he was in no hurry. In Maharashtra there is a great importance of Guru. They asked him who was his Guru? He said I will not tell. When he went home four people followed him. They asked him who his Guru was. Then he said My name. When I went there I was surprised to see so many people in Sahaja Yoga. All because of the character of one man. It was due to his behaviour he was not good looking but the radiant quality he had.

So to say, “What can we do the country has gone to the dogs, has been destroyed." Even if one good man can come forward, The World will bow, all that is needed is a person to make it bow. If so many of you can become like that then what else is needed. But first you must experience that you are sitting in the Sat Yuga and the Shakti of Truth is moving with you. One needs nothing else. Everything will happen by itself.] [Now just to be amazed what else in left. The way things are happening you are seeing. You must know that you have now come in Sat Yuga. This Shakti will enlighten in a thousand ways. It can give you countless qualities within yourself.

You need only one thing, which Shirdi Sāi Nāth had said, “One needs patience." But this patience is not what comes with thinking. This patience is a state in which everything happens. If you go into that state then no one needs to speak or to tell anyone. It will happen that one cannot even think of it and it will happen. Besides this there is one more thing, every important. That you have been born in India. It is a very great thing. It is due to many Puṇyas of past lives that you have been born in this land of Yoga. The Sat Yuga will first come from this country and the world will see what is the Sat Yuga. The miracle of it will be seen. But you are the torches, you are the lights. You have to give this light. It has to be experienced, should be understood and should make it your own, because there is a very great responsibility on you. Here also Sahaja Yoga is spreading very fast what is the reason that it is spreading so fast. The reason is that you have been born in this land of Yoga. All around there is nothing but Chaitanya. Even from the earth the maximum vibrations flow in this country. But ahead of this you have to see that you are the vehicles of it. You can only carry this forward. But still I see that there is still something lacking even now. Make it alright. Get after it and make it alright. Make it alright somehow or the other. I have to make myself such that I have to completely purify my body, mind, ego, etc. Only then will this country rise. This country has tremendous future. Those who say that this country has really gone bad, but I say that in the most difficult sea only that ship can said which is strong. You have to become even stronger. One side you see there is terrible darkness and the other side

there should be a tremendous enlightened life that people see. To get this greatness with devotion and love you have to meditate. Then in Bhakti you will see that these people from where have they come? From heaven? This is your potential. You must understand that within you is such a glorified life. Awaken that.

Leave all this worldly things. He has a car and I don't have one. What do you want with all this? I know nothing about the colour, make or number of My car. I can't do anything. I am absolutely non engaged in work, but still all the work is getting done.] [If the understanding of this gets awakened in you then you can cleanse yourself within. You can clear your Chakras. From this only the benevolence of the world, will happen. You are the foundations of it.] [Today you stand on the path of Truth. See how many miracles are taking place. If you are not on this path then how will the truth help you? If you are still wandering about in the lanes and by lanes and getting stuck in the traffic then how will truth help you? You must take decision that we will make the future of this country bright By your character and by the power of Sahaja. If you can decide this much within yourself and leave all the wrong things. The whole world is one. But because of the human mind different countries have come up. It is the same with Religion and every thing else with human mind, man has got separated into separateness. Sahaja Yoga is not only the togetherness and union but is the entirety.] [The one who tries the Tattwa of everyone together, this Shakti today is movable and it is up to you because it will appear from within you.] [May God bless you.]

Contents: 1995-12-25 **Christmas Pūjā, Christ, Conditioning and Ego, Ganapatipule, India**

Happy Christmas to all of you.

It is a great day when Christ came on this Earth and you know about how He was specially created to come down as a human being to work out the salvation of the people.

It is said that He came to India, in Kashmir and He met there the King Shālivāhana. It's all in Sanskrit, I read that the conversation took place between Christ and King Shālivāhana. It's all in Sanskrit. I read that the conversation took place between Christ and King Shālivāhana who was a great devotee of the Mother.

And he asked Him, “What is your name?" In Sanskrit it is all written.

So, He said, “I come from a country where people believe in the filth and I think this is my own country." So Shālivāhana said, “You are such a great person who has come on this Earth, so you should go back to those countries to save them and to tell them about the pure principle of life." In Sanskrit it was written “Nirmalā TatTwam" [Pure Principle]. And Christ went back and after three and a half years only, He was crucified. These were special days. I call them the days of tapasya. Same time Buddha and Mahāvīra were born at the same level of the Virāta's forehead.

As you know, that, according to Vedas, there are seven awarenesses we can go through all the subtle qualities we have within ourselves.

The first one was the bhuh. Bhuh is Gaṇeśha was created.

Second in bhurvah meaning `antariksha', means all that is created around us.

The third one is swahah at Nābhī Chakra. Swāhāh is the one where you consume everything. Is in modern times, you see, people go on consuming everything. All kinds of books they will read, they'll go to all kinds of things and if you tell them, “Why do you do it?" [They say] “What's wrong?" “Why do you dress up like this?" “What's wrong?" This just consumption of everything goes on.

But then, at that time, also there is another great thing within us is called as swadah, where we sustain the Dharma within us, swadha. Dharma of everything. See, those people who say there should be no blind faith and this and that. It's not blind, but it's an inner urge. Why we love our parents? Because there's a Dharma within us. Why do we live in our country? Because there's a Dharma within us. All these Dharmas are there. Why a wife loves her husband? Because there is Dharma. Why the husband loves the wife? Because there is Dharma. When this Dharma is within you, you're not call it religion because it can mean something else. This one is sustain, dharaiti. Once it is sustained within ourselves, it becomes swadha. That's our capacity, that's our quality. We can call it an innate understanding.

Some of them are even in the animals, like attachment to parents, attachment to their masters.

Then comes the higher awareness where your manah. Now, it's not mind, there's a very confusion, there's a big confusion, of `mind', you see. English language is really

quite confusing. Manah means “by which we have emotions." Now, recently I read that they are now talking about, not only of IQ, but EQ, means emotional coefficients. That means a person who has only intelligence is not alright. He must also have the balance of emotions. They are coming to it now, but first they only used to only place people who have IQ. That's not the situation.

So now, it is different, perhaps they are realizing that through intelligence how people have created chaos, violence, all kinds of destruction on this Earth.

So now they are talking about a higher capacity within us called as EQ, which capacity is emotional. This emotional capacity comes to you as an inner urge, as an inner capability, which you cannot avoid. A person may be anything in life, but if he has no love, if he hasn't got any emotional feelings, then he is not complete.

Now these emotional things also could be very limited, no doubt. They could be something that get attached to somebody, or something could happen, as also the IQ. Where we get attached to some idea.

Like Hitler had some idea and he believes that it is a truth and he has to do it.

So when you get attached to one idea like that, you can just do things, which are not at all helpful, supportive or nourishing to Reality. All these things have happened: wars, destruction, also, as you see nowadays, the people are trying to secretly destroy others. All these are coming as the anti-feeling, where the manah has developed a domination of the intelligence, where emotions are dominated by intelligence and rationality.

So there is another awareness within us, another capability within us, another urge within us, innately built is the janah. Janah means the people, the communication.

You cannot live alone. You see, a man who goes to jail, he's quite happy, he's quite comfortable, he doesn't have to do any work. Everything is done for him. If he has a good class, he lives very well, much better than he would live outside. But the only thing is he cannot meet other people. He cannot communicate. And when this capacity of communication, which is within us, I mean, which is a part and parcel of human existence, is taken away a person in the jail feels absolutely frustrated and unhappy.

He doesn't mind laboring, doing all kinds of menial work as long as he's not in the jail, cut out of the communications with others.

So this communication is also an inner urge within us. In that also, people sometimes go too far and ignore other Dharmas. They're more bothered about communication than about other Dharmas, which are very important.

So there is no balance in a person.

Then comes the sixth awareness within us, which is a very interesting thing. One was where we take to conditionings. Say, if I am an Indian, then I'm very proud of Indians. I can never see anything wrong with them or I may see everything wrong with them. It can be both ways. How you have been conditioned is the point and this conditioning comes to us through our sixth center of Āgñyā. And the another thing that we develop when somebody tries to condition us or to control us, we try to get out of it or sometimes we try to dominate. This

dominating capacity is also within us, innately built. Both things are innately built within us that we go on getting ourselves conditioned.

For example, I would say that in very stupid, silly manner people get conditioned. Is impossible to get them out of it. It always comes out of self-centeredness that a person has no value for understanding like, now, somebody comes to your house, he's a vegetarian. Alright, now he stays with you.

So, “I'm a vegetarian. You must get new utensils to cook the food because I can't have food in the utensils where the meat is cooked!" Alright. Then “You must get your servant in a proper manner, so send him to some place where you can get the well water. The servant must be absolutely drenched", this is typical Indian old style! and should go and draw the water from the well and bring it for drinking and cooking, while the servant dies of pneumonia doesn't matter. All such stupid conditionings we have.

But it's not only that in the East you find all these conditionings. In the West is even worse. For example, they have clubbing. Now there are clubs where people wear particular type of clothes. It's a club. Now if they wear something else, then everybody will laugh at them. Or how to use the spoon and fork is very important in the West. How they use spoon and fork, specially English have this nonsensical conditioning. If somebody uses the fork and spoon in a wrong way, then finished. He is nowhere. He's not sophisticated! The ideas of sophistication and all that comes through conditioning of ages because maybe they were primitive to begin with.

They had no clothes, proper clothes to wear. Might be they were covering themselves with some leaves or something, I mean, only hundreds of years back.

So now, they have jumped to the other side, very particular about their dress, very particular about fork and spoon and they just can't bear something that is different. “I don't like that" is very common there. “I don't like. I don't like." Now, they came to India, “We don't like!" “What you don't like?" “We don't like the way Indians dress up!" “Alright, you dress up the way you like. Let Indians dress up the way they like. Now why do you think that your dress in England will suit here in India, which is such a hot, hot, hot country?" But “No! This is how we are." It's quite funny the way they have [conditionings]. And this conditioning goes on into such a deep manner that nobody sees the stupidity behind it.

For example, if the queen has invited you, you must wear a tailcoat. And now it's very expensive to have a tailcoat. Now, they have to go to a particular shop to borrow it.

Sometimes they are loose and sometimes they are tight. I have seen people coming to these parties, Queen's parties, I could never recognize them because somebody looked like Charlie Chaplin or somebody looked like Laurel and somebody like Hardy.

[Laughter.] I couldn't make out who are these people. Then I was told he's, that's such-and-such ambassador. “Oh my God, I know him very well. What has happened to him?" They cannot walk straight. Their gait changes because of the clothes, which are tight sometimes and sometimes so loose.

But, “You have to wear!" All these formal ideas come to us as a kind of a part and parcel of you because you accept all these conditionings.

So the other side it goes to that we abandon all this. We don't want all this, the anti-culture.

So I met one gentleman who was wearing a pant, which had lots of holes in it. Imagine in the cold of London to wear a pant like that! So I said, “Why do you want to wear a pant which has holes?" He said, “This is a holy pant." [Laughter.] Holy? “My goodness. It will give you varicose veins. It's horrible!" “What's wrong? We are anti-culture people, so we are taking now to holy pants." I mean such stupid people who are, not only who are uneducated, but very well educated people; highly placed people are so conditioned and this conditioning has caused so much damage to human beings.

For example, to accept Freud had become just a complete religion in the West. Freud became Christ at that level, though he was a Jew and he dominated the Western culture so much that I just couldn't understand impact of this stupid man who would have been thrown in the sea if he had come to India.

But the conditioning part is everything is written is wrong and they accepted this man so much that the culture of the West became absolutely self-destructive throughout. No respect, no morality, nothing was lofty, all value system was shattered because they accepted this kind of nonsense because it was written.

Even today, I hear “in such-and-such book such is written; in that book such-and-such thing is written." This is terrible condition. For example, it's written in the Bible

that Jews crucified Christ. Nonsense! Just use your brains! How can Jews crucify Christ? They were in the multitude. In any country have you heard that a person can be crucified with the general opinion of the people? It's the government, the Roman government did that. But to put the blame on the Jews was a very good idea of a very cunning man called as Mister Paul and people accepted that because it suited them to hate the Jews. Then the Jews started creating people like Freud.

So all such conditionings also have reactions and these conditionings then build up and once they build up their reactions also build up and you have a country full of all kinds of chaos, fear, violence and destruction.

The conditioning is more, also, with the idea of possession. “This is my land. This possession is mine, that is this, that." Like this it goes up to a point where people who believed in the formless God also fight for the land. Why should they? They believe in the formless God, so why should they fight for the land? But they'll go on fighting for the land and this fighting for the land can go to any extent of very cruel things that whole country can work out.

Conditionings are of every kind if you see are blinding your eyes. For example, they believe in Koran.

Simple thing is Koran was never written by Mohammed Sahib. He never knew how to read and write. It's a fact. For forty years it was not written. There was a fellow called Muawiyah, something like that, who killed Hazrat Ali, his sons. He was the second caliph. The first one died very early. Then he killed the third one also. Then he killed the fourth one, just to himself become the caliph.

And the liver of this fourth caliph was eaten by the mother of this horrible fellow, who hated women.

So he puts it down in the Koran, all the things against women and people accept it because it's in the Koran! Somebody has made fun of Koran and written what's wrong and so stupidities and all that.

So I asked him “What is the use of writing this book. What is the use?" He said he never thought of the use. “Then why did you write? It must have some use. It's a useless book." I said, “It's only useful that by reading this all the people who are not Muslims will laugh at Islam and those who are Muslims will say, `Wha! Well, this is our book. Whatever it says, we believe in it. We are conditioned like that.' So, you don't solve the problem." So, he said then, “What should I do?" I said, “You write another book saying it's all stupidity I've written of Koran because I know it was not written by Mohammed Sahib. Don't write anything of Mohammed Sahib, against him. He is the one who is the incarnation of Dattātreya. It's a fact.

So you write that he never wrote it, so all these people have done all these things." This conditioning can be removed if you know what sort of life Christ lead, very important. First of all, He was born in a manger. To be born in a manger means in a poor circumstance. That means He showed there's no need to have money or there's no need to have a huge, big properties or anything to be impressive on people. Those were the days where people respected the tapasvis, the ones who were doing tapasya. That was the time to do tapasya.

So He came on this Earth and lived like a tapasvi.

On the contrary, the Christians are the most self-indulgent people you can think of. You go to any Christian nation you'll be amazed how they are just slaves of money and their watches. How they are living, it's very shocking to see they are `following' Christ. “Yes, we follow Christ." Then follow means what? He's there and you are standing backwards moving. Is that the following? If you see the Catholic Church or even Protestants you'll be shocked. How are they following Christ I can't understand. Until now, I never understood. Because Catholic is nothing but money-oriented. The only thing they have picked up from Christ that He went to a wedding and created wine out of water and distributed. Now this wine is just the juice of the grapes. Is also called wine in the Hebrew language.

Thank God, I've read Bible in Hebrew translated directly.

So it's called draksha ras [grape juice] because instantly you cannot create alcohol. It has to rot, rot, rot and the more it rots the more good it is, they say. They write it down, this is twenty-five years old, so is the price is much more. But if it is three hundred year old, the price is exorbitant.

So it has to rot and smell like hell, then only it's a good alcohol, is a fact. How could Christ create that instant, that moment, alcohol? But now, what I find is this, that if somebody dies, they will take champagne to celebrate what? Good riddance of bad rubbish? Or when somebody's born, they will do it, but on Christmas Day, especially, after coming from church don't go to any Christian's house! Even the Indian Christians have started following the Western people because Indian

Christians believe that Christ was born in England! [Laughter.] All such ideas have come from where? Is because the English and the Portuguese and the French brought Christianity to us. Now, by any chance, are they Christians? What business they had to bring Christianity to this place? They took Christianity to all the places, specially Spanish. Spanish, Portuguese went round the whole world to spread Christianity and today is the mess that you see in those people.

They are nothing but drunkards.

Yesterday I was going back and the sea was full of happiness and joy and the water had reached a very high level. It happens with Me. But what I found, there were four, five Christians coming, singing carols and just completely drunk and I was thinking they'll be drowned in this water very soon! This was the great boon of Christianity on human beings that you can drink as much as you like.

Now, this drinking has come, I should say, from where, God alone knows, but it has come also from the Christians. And the Muslims also drink, no doubt, but they hide and drink, they don't openly drink and don't call it's a religious duty that you should drink. Imagine, in the church when they give you communication, they give you some sort of a dirty smelling wine. After that how can you have communication? Once you are drunk, you are finished! [Laughter.] But all these things happen.

So, today we are talking about Christ. He's sitting in a position of Āgñyā Chakra controlling pineal and pituitary. By that, He controls our conditioning. If we follow Him, then we cannot be conditioned by anything because He

talked of Spirit only. Spirit cannot be conditioned, conditioned by anything.

Whatever is good, that will be accepted, good, congenial to the Spirit.

It's a different attitude of a person who is spiritual. Like we have people here, I know they are not very comfortable.

Some of them are put into these tents here and there, but they're enjoying because they're enjoying the spiritual atmosphere. They don't care where they sleep, where they live, what they have. This is all because you have entered into the kingdom of God. But those who have not, are so much worried [complain], “This is not good. I want this way, that way." All material happiness they seek, trouble everybody, criticise everybody, get angry with everybody. But actually they haven't got spiritual joy. And they can never be, really, in joy unless and until they become fully spiritual.

Christ has openly said that, you have to know yourself. Same in Koran. Mohammed Sahib has said, “Unless and until you know yourself, you will not know God." There are lots of truths in Koran I find left over by this Muawiyah and also in the Bible. Also in the Jews, I find their Torah and all that has lots of Truth, but is covered by all this kind of thinking, rationality and adjustments they have done for their own use.

Actually, we have to understand that Christ never started any exclusive religion. Never! None of them.

Specially Mohammed Sahib has talked about Abraham, He's talked about Moses, He's talked about Christ and His Mother much more than in the Bible. Respected Her! And

he said there has been more than one lakh [100,000] wallis, means realised Souls before.

But still Muslims are some sort of a unique people because they call themselves Muslims. Whether they drink, doesn't matter, whether they womanize doesn't matter, they kill people doesn't matter. They're running after few things, which are forbidden, to them, but still they are Muslims. Same with the Christians.

Dificult to find a man who's a real Christian, who follows Christ, before realisation. After realisation, of course, we are different, but for that you have to cross this Āgñyā.

Āgñyā also is there which has to control your ego. Christ, in His lifetime showed how ego works. His own crucifixion itself shows how Christ, such a great incarnation of purity, was crucified, shows what people are like, what they did to Him, how He was troubled and tortured by these stupid people and then how he was crucified by the government there.

In the beginning there were many Sahaja Yogis, I should say they were called as gnostics, `gn' in Sanskrit means knowledge, who had the knowledge about Self. Christ has said, “Thou shalt", He said that “Know thyself." You have to knock at the door, meaning you must have Shuddha Icchā, otherwise it won't work out. Nobody can force you.

He controls the ego. He's the one who gives you the balance. But, if you go to the West, you know they are nothing but some sort of a stupid, donkey-like ego! The way they talk, the way they behave towards each other, it's a big eye-opener. They are developed. How they are developed? God knows. “Now, they are very advanced,

sophisticated, this, that." With this Āgñyā catching, Christ has said in His Lord's Prayer, “Forgive us our trespasses as we forgive them who trespass against us." What a big thing to say. But one thing I've seen in the West, people don't know how to forgive. They are full of hatred. And they cannot ask forgiveness because they are full or terrible ego. Though they will feel guilty, but they will never ask for forgiveness. They'll never say that, “Oh God, forgive me for what I've done." This is so common now. For example, the Nazis, they killed so many people and still you find this neo-Nazis coming up, even in Italy! They're not ashamed as to what they have done. This happens because there is no, really, connection with Christ. Firstly, if you have connection with Christ, your ego has to be finished. Absolutely.

And this ego, which comes to you from various sources, is a myth. It's a myth. With this ego, people try to befool others and show off. Like there's a story of Shahpesh [`The Punishment of Khilpil' by George Meredith]. I don't know if you have read about him. He [Khilpil] came to a King [Shahpesh] and told him that “I am a great architect and I'll build a big palace for you and this." The way he posed, the king believed him. He said, “Alright. Go ahead. I'll send you so much money." Now, with this whole attitude and the way he was describing himself, all his gestures, full of such ego, that this king also got completely lost. He gave him lots of money and in six months time he came back, he said, “I have built you a palace. Come and have a look." He went there, He saw it was just the same land. There was no palace, nothing.

So king thought something gone wrong with him or what. He was again looking and looking and what does he find? He finds there was no palace, nothing. Immediately he realised that his ego has befooled him.

So, the king was very clever that way. He realised it.

So he started saying, “See, this is the main road by which we'll go and there's the palace. Now the door opens." Nothing there. It's all just a story. “And now here is your throne and please be seated on it." He said, “First you sit." He made this Shahpesh [Khilpil] to sit on a throne which never existed. Now imagine, it was very painful. He said, “You see, I want to see you sitting there. I like it." For one hour he made him sit. For two hours he made him sit.

Ultimately, Shahpesh [Khilpil] fell at his feet and he said, “Sir, I'm sorry. There is no palace. There is no throne. Nothing of the kind." But the king had lost all his money and so imprisoned him. He was beaten up and did all kinds of things.

So this is the end of false ideas about oneself. This ego can take you to such a heights of stupidity and the culture, where it is pampered, is the worst culture. I have seen advertisements where they say “you must smoke this particular cigarette because it expresses your ego." But according to Indian culture to express your ego is absolutely something very stupid, people laugh at such a person, the one who tries to show his ego. In Marathi language if someone is trying to show off, then they say he's climbing on a small little shrub of chana [chick peas].

It's the whole system is such, so nobody can develop any ego. If they develop, then they are corrected.

Specially in Maharashtra, it's very difficult to develop any ego. As soon as you start talking big about yourself, immediately you are punctured. But in the North [India], of course, a little bit allowed, I think and people do talk big. “We are great politicians who talk very big." “I am going to do this. I am going to do that. We're going to have this project, that project, this, that." One thing, Christ never said such a thing. Never He talked [like that].

But if you see His sermons, it's so deep and so enlightened, despite the effort of this gentleman, Mister Paul, you see Christ talking to people, giving them different ways of explanation, what happens after realisation, how a seed is sprouted and how it can get spoiled and very beautifully He explained to people.

But, I think, I didn't have much effect at that time.

His life was so charming and so beautiful. Like a shooting star, He came on this Earth, but He left such a remarkable impression on people. His crucifixion was a part of the game because He had to make the way in the Āgñyā Chakra. To cross the Āgñyā Chakra He was crucified. But His message is not crucifixion. People wear the cross and I feel very hurt about it. He crucified Himself, but that's not the message, that's not [what] you should celebrate, that He crucified. There are people who celebrate it! You have to celebrate His resurrection, the Resurrection because human beings are to be resurrected.

In Sahaja Yoga nobody's crucified and is resurrected because of one crucifixion of Christ. That was enough! That was sufficient. You can't carry the cross on your shoulder, you don't have to. He's carried for you. He's done everything for you. He said also that He died for all the sinners, is a fact. If He had not done that, it would have been difficult to open your Āgñyās because two problems, as I've told you: is conditioning and ego.

His crucifixion has helped the loosening of these two horrible capacities of human beings. His life is to be understood in a very, very deep sense.

But if you are like a journalist, you can say, “Why did He crucify Himself? If He was God, why did He get crucified?" Now the question is `why He got crucified?' is how to tell these journalists who don't know anything about Chakras. Because it was the era or the time of tapasya, of sacrifice and so then all these three persons, Buddha, Mahāvīra and Christ, went into complete renunciation. They lead a life of a great tapasvis. They did it for us, not for themselves. They did not need it. They didn't want it, but they had to do it to cleanse us, to give us a proper Medha [intelligence], as they call it, this Ekādaśha Rudras, you see, to be cleared out.

And they have sacrificed their lives. They have sacrificed all the pleasures of life. For them, it was not a sacrifice. It is just a kind of a life they wanted to have. For such people, there's no question of sacrifice, but is a question of doing something that would help to open the Chakras of the people in the future.

Without them we could not have worked out Sahaja Yoga. It was essential for these people to cleanse for us these three Chakras, part of the one Chakra of Christ.

All this they have worked out and that's why today Sahaja Yoga is so beautifully created, so beautifully spreading, is working out. We have to thank them, very much. Of course, all other incarnations also have helped you can see, Viśhuddhi, then also Heart and all these, right Heart, left Heart. All these angels, as they are called in the Bible, have helped us to cross over. All these incarnations are responsible in our evolutionary process to create these ladders for us to move.

So, ultimately, you reach the state of tapah on the sixth center and then in the state of Truth, Satyam.

Then the Truth comes to you through Sahaja Yoga in the brain, in the limbic area, when the Kuṇḍalinī enters, She puts light there. She creates enlightened personalities and then She joins this All-pervading Power of Divine Love. And with this Divine Love, you are completely changed and transformed.

So their contribution to the ascent of human beings has been great and that of Christ has been the greatest. And when we say we have to follow Christ, we should try to see how much detachment we have.

They say his brothers and sisters, or somebody, came to see Him. They say He had brothers.

So He said, “Who are My brothers? These are My brothers? These are My relations." Gñyāneśhwara has said the same thing, that “They will become your relations” “Te chi soyadikar te": “They will be your relations.

They'll be your brothers and sisters." And not those who are not enlightened. They are not your relations because they don't understand you, they don't have entry into the Kingdom of God, so they are not your relations.

In His lifetime, He lead a life of a person who was very simple, He didn't bother about clothes or anything. All the conditioning of the worldly things were not Him. But He was not shameless type of a person who'd accept any kind of a nudity and this and that.

Even about Mahāvīra there's a big misconcept. He was once praying in a garden where there were lots of bushes, call them kunjas and in the bushes cloth, which was only one cloth He was putting on, was caught up, so He cut half of it and was covering Himself. Śhrī Kṛiṣhṇa went to test him and He said that, “I have nothing. I am just nude.

So why don't you give me your cloth because, after all, you are a king." So He took out His cloth and gave it to Śhrī Kṛiṣhṇa and got some leaves to cover Himself and He was in His own garden, went into His own palace. Now, if you see the Jains they make everything so horrible and insult Him all the time! Most of the people who follow all these great incarnations really all the time insult them! They don't follow, they insult! And, by their behaviour, you see, we form such a bad opinion of all these people.

I met one gentleman in Chicago in very cold, it was very cold. He was the head of the Hare Rāma Hare Kṛiṣhṇa. He was wearing a dhoti, which was so thin and was shaking before Me. I said, “What's the matter?" He said, “I'm feeling very cold." I said, “Why are you wearing this

dhoti?" He said, “My Guru has told me if you wear a dhoti you will go to heaven." I said, “Really? In India 80% people wear nothing but dhotis. Are they all going to go to heaven? and many must have gone already.

So where will you be?" He didn't like it. Then I said, “Why you've shaved your hair and put this", We call it, shendi or in Hindi, godi? I don't know what you call it, pig's tail here, pig's tail?" So he says, “It is because my Guru told me that I must shave my head and have this kind of a thing." So I think perhaps, maybe he will be tied to some rope and pulled in the heaven or something. [Laughter.] I said, “Kabīrdas has said", Kabīra was one of them who has tried to slash out all of your conditioning. He said “by shaving your head, if you are going to go to heaven, so what about the lamb which is shaved twice a year? He'll be there earlier than you." It's a fact, it's so, such stupid things. And there are Jain Sādhus who remain absolutely nude and will pull their hair. No, by law they're allowed to go nude on the street, you know, insulting everyone.

All such stupid things are happening in the name of religion, that, too, of Buddha, Mahāvīra and Christ. They are the ones who are trying to pull us away from rationality because you have to cross this [Āgñyā]. All your limitations are because this thinking, conditioning.

We have to go beyond! Because by thinking what do we do? We move in a linear way and then there's no Truth in it, so the whole thing comes back, boomerangs and you are finished. We have go beyond this mind, must understand [what] this mind is. Christ has done this so that we can go beyond our mind. If you don't know how

to go beyond mind, better sit down for your meditation, work it out.

With this mind, all kinds of things will come; temper will come, intrigue will come, jealousies will come.

All the six enemies that we have will come to us through this mind, means thinking, rationality. Every kind, everything can be rationalised. “Why did you murder your wife?" “Because I hated her. She was this, she was that, she was that." “But you cannot murder her!" “Why did you murder your husband?" “Because of this, because of that." Because of this mind, we start doing things, which are absolutely wrong, which are sinful and then we try to rationalise it. Go against Āgñyā, go against reality and then use your conditioning, use your, we can call, the ego to explain it, why you did it.

All the time when we are doing like that, we can never go beyond mind. We are so self-satisfied about ourselves. We think no end of ourselves. Now, how are we to get out of it? Introspection. But it's very difficult because people [are] afraid of themselves, they don't want to introspect. Because, once they start introspecting, they will know how sinful they have been, how wrong things they have been doing and then they'll hate themselves.

So they don't want to introspect. But is very important that we should introspect.

That introspection is very helpful for you to overcome these two hurdles of your Āgñyā Chakra.

I have told you many a times don't argue with anybody because the other fellow, he's asking for argument, is the one has lots of ego and that ego is acting on you.

So action-reaction starts and we develop a habit of reacting to everything. Specially in the West, I have seen, they react to everything. Everything.

For example now, this thing is spread out here. Now they have nothing to do [with it], “But they could have had better. Why is it so thin?" Oh you pay for it now. You do it! They are walking across. They will say, “Come see this man, what sort of a person he is." If there's a beggar, then they'll start criticising.

They'll criticise the government. They'll criticise everyone. What about yourself? Instead of that, why don't you start doing something about it? If you can't help it, if you are not going to do anything about it, why react? And this is the worst habit we have developed, is to react and we think we have every right to react.

You have, but this right is self-destructive. To react on everything is not proper. You have no authority to react. It is to that extent. You have to just witness, witness the whole thing. Once you start witnessing, you will be amazed that you'll start seeing the play, play of the māyā, as they call it and you will see where you stand within it. Witnessing should be developed all the time. Witness. “Am I witnessing?" Many people say that I have very good memory because I am all the time witnessing. Everything is recorded within Me like a picture and then when I have to say something, I have to correct something, all that I have witnessed comes to help Me.

First of all, we should not react, react to anything.

Some people are attached, say, to money. They'll react; they'll not give any money. They'll keep all the money with themselves. In Sahaja Yoga, also it happens. I've

seen people who are very, very miserly about money. Another ones are who try to please others. Then they'll waste their money on lavish things for nothing at all. There's no need to waste.

Reaction can come through anything. Seeing something, you can react and you become so engrossed with it that you don't realise that you're wasting all your brain energy on [a] nonsensical thing. This reaction comes when you have lost complete sense of judgement. You don't know what you are losing, what you are gaining by this kind of reaction. And this reaction is going to destroy your inner being completely. Because all the time you're here and you're there and you're there and you're there. You're nowhere here.

If you are a very criticising type of a person, try to stop it completely. Criticise yourself. Direct that energy towards yourself. “Who am I to criticise others? Who am I to react to anything?" Put a challenge to yourself and you will see that your ego will subside.

One day somebody came and told Me that, “Mother, I feel so angry. I feel like beating everyone." I said, “Alright. Do one thing. Take a chappal [sandals] and hit on your head. Finished. That's the only way you can get rid of this habit that you want to beat others." He didn't like it much, but I think, by that, I think he's improved.

Now, conditioning also should be seen. “Am I a conditioned person? If my conditioning's there, then is it a good conditioning or a bad condition?" At least, you should have good conditioning. But even that, to an extreme, if you go, you can create a problem for yourself and for others. Most of these rituals and things started as

a good conditioning, then it became like a trap and they could not get out of it. It's a part and parcel of it one has to accept.

Then what should we do? We should not react. Just see the drama and you will be surprised, without paying anything, without going to any theatre, every moment you can see the drama going on before you, which is so enjoyable, whether it is absurd, whether it is ridiculous, whether it is a sort of a, as you see in the films, you see, beating somebody and all that, you just see it and you do not react. Anything that you think is very perverse, ugly, immoral, don't see. Finished. Gone.

So don't tax your mind because in the mind, that we call it, so-called mind, is actually the Āgñyā Chakra in the center of your Optic Chiasma. Just imagine, what a central place it has and any disturbance to your Āgñyā, what it can do to your brain which nothing but a lump of fat.

So, how this Āgñyā can affect you and how it works and creates perverted images: that is to be really seen. Conditionings also you have seen. People are mentally so upset and so degenerated.

But the pure nature of Christ is Innocence, you know that. He's Śhrī Gaṇeśha. Śhrī Gaṇeśha is a eternal child. Christ is also complete innocence because He doesn't react, because He's not conditioned.

Children are not conditioned so much as we are. If you talk to children, if you speak to them, you'll be amazed how innocent they are and how innocently they talk. Once My granddaughter asked Me, “What do you think of the poor children of the Tiger?" I said, “Why?" “You know,

their father tells them that you eat human beings and what can they do? They have to eat human beings, after all." You see, so innocent.

[Laughing.] So I told her that, they are under a complete control of God. Whatever they are doing, they are not going to be held responsible. It's only for human beings that God has given this freedom. It's only human beings who can react in this manner.

So, for animals, it is, they are pashus, means they're completely under the control of the God Almighty.

So they are swabhavas, everything, a serpent will be serpent and a tiger will be tiger and they will say a lion will be a lion. But human being can be a serpent, at the same time could be a scorpion, could be a lion, could be anything. You know, suddenly, you find a small, little, bug-like man coming up like a lion roaring at you and you say, “From where does this come, this cannon?" It is so. You don't know which way they will come and which way the camel will sit. You can't say.

So this reaction of human beings comes because he's not in connection with the Divine. When he is in the connection with the Divine, he sees the drama and he leaves everything to Divine. He can solve all his problem by just one bandhan. He can solve all the problems just by a bandhan. But he should be in full connection with the Divine.

It works. It works. It does work. This is not the time when Christ came on this Earth. This is the time when this Param-Chaitanya has gone into action, activated, is working out everything. Now they asked Me about these Śhrī Gaṇeśha [statues] [Gaṇeśh statues `drank' milk on

21 September 1995 all over India], whether Śhrī Gaṇeśha drank milk or not. I said, “Anything possible." These days this Param-Chaitanya is doing such things, unbelievable things, which we cannot understand. Everything's a chamatkar [miracle], so it's possible.

Gaṇeśhas, I have never heard of Gaṇeśha liking milk so much, but maybe for the little rat He might be drinking. You can't say. “But why did Shiva drink?" I said, “Let it be. That Shiva wants to drink, let Him have milk." Actually, we have too much milk production so they must be wanting to consume some.

But it's just a way [of] looking at things that, you see, when everything is done by this Param-Chaitanya.

They are doing such wonderful things. I mean I never asked them to do anything. But now, for example, in Brisbane when I was there, I was sleeping in the ashram and a rainbow appeared. Of course, I like paintings very much of Raphael specially, because he has drawn the Mother's face and the Child's face so exactly, expressing the feeling of a mother and the child. And imagine that picture appears in the sky and I didn't tell them to show that Raphael. When I was sleeping I was not even going to look at it, but at this time the halo that was on the backside of Mary comes up on the head. Means Raphael, himself, did it, or, I don't know.

How can I explain this? Param-Chaitanya is doing all kinds of things and it does all these just to convince you about Sahaja Yoga. Because even now there are many who are supposed to be very rational, intelligent, educated who don't want to accept. After all, if there is a Divine Power, if there is something like that and is active,

how can you challenge it? How can you say no to it? Because the powers are unlimited, it has gone into every atom and every molecule. It doesn't do tricks like moving this from there to there [like some famous false Gurus], but what it does is to do something, which is absolutely impossible.

It is doing it.

So for us to believe in this activated Param-Chaitanya is the only solution so you leave it in the Ocean of Bliss and let this great power handle all the situations, don't react yourself, which is so efficient, so quick, so fast, moves all over, understands everything and it loves you and respects you because you are Sahaja Yogis.

This is what it is today. We should know, at the time when we are celebrating Christmas, that what we are celebrating is really our own ascent, our own achievements, our own lofty heights which we have achieved and which we have to achieve.

We should have only aspirations as far as our spiritual side is concerned. All aspirations should be left to this Param-Chaitanya, “You look after them." And the more you become, the more you develop this non-reacting attitude through your proper Āgñyā, not anger, not silence, but a very pleasant temperament.

That means that people think that I have told you not to speak. No, no, you must speak. You must talk to people, you must laugh, you must enjoy, but all this should be full of joyous feelings.

That's what they say that Christmas is for, a very joyous atmosphere.

So they can't do that way, so they drink. I mean, after all, you must give them benefit of doubt also, that why do they drink. They think that by drinking they will become joyous.

Now our understanding about ourselves has to become very clear-cut, specially people don't meditate.

They just don't meditate. They just don't want to grow. They're Sahaja Yogis, but they don't meditate.

It's very surprising. I can make out who meditate, who does not. Because there is no depth. They want to have this, they want to have that, is alright, but what about meditation? If you don't meditate your Āgñyā will be completely covered with thoughts and you'll be lost.

So, you have to meditate. If you don't meditate, I also suffer. If you have no aspirations in Sahaja Yoga, it's better to leave, because you are like seeds which are sprouted and which will be wasted.

Some people are here because they want some sort of a platform, some publicity.

Some are here who want money, to make money out of Sahaja Yoga. There are some who want to have a kind of a communication to go around the whole world without paying a single pai. All such people are of no use to themselves.

Now here you have the complete wealth. All that celestial wealth is before you and you are not going to accept it. You're not going to drown into it. What should we say? This is not very sensible to do.

As I said, you don't have to crucify yourself. You don't have to give up anything. You don't have to live like

Christ had to live or be born in the manger. All that's done for you already. Now, come along.

But if you are coming in the darbar [royal court] of the Divine, then be worth it. You should be worth it and you'll be surprised, all your problems will be solved, your self-respect will be maintained.

So many things have happened like that, but if you have no self-respect, you don't respect your realisation, you are not deeply involved as to your own ascent and the help to others, it will not work out.

I am here to tell you all these things which Christ could not tell and to fulfil what He wanted to say. All those things I am saying to you, it has already worked. You have all got realisation. But develop respect for yourself, as Sahaja Yogis. Don't have funny ideas about yourself; just know you're a Sahaja Yogi and a Sahaja Yogini. That's what is needed for a person if he is today celebrating the birth of Christ. He came on this Earth, who was actually Christ full of innocence who was the One who came as the embodiment of Śhrī Gaṇeśha.

I have given the proof of it to you how the carbon atom looks like and by which I have proved that Christ is the Alpha and Omega, while He is made of the Omkāra and Swastika. All this we have experimented.

We have found it. It's there. With all this, what is the greatest achievement is to respect your innocence.

Respect your innocence. This is what is to be asked for today. Be innocent. And God looks after all the innocent people. Don't worry, you don't have to worry. I have seen children falling for seven stories, nothing happens to them. They are perfectly alright. How? Who looks after

them? The angels. You have seen photographs of angels around you.

So try to be simple, innocent, not reacting and keep quiet and peaceful because here we are talking about the global transformation where people will find their peace in their heart and will establish a new world of peace, joy and spirituality.

May God bless you all.

Contents: 1995-12-30 **Quote related to Shivaji Mahārāj, before Departure, Ganapatipule, India**

[Everyone Sahaja Yogi receives from Shri Mataji the gift of an iron cast bust of Shivaji Mahārāj.] By looking at his life, we must understand what is Dharma, what were his ideals and what al he did for his ideals. In such a short time he did such a great work.

Contents: 1996-01-19**, Public Program, Rotary Club, Pune, Maharashtra, India**

Person: *[UNCLEAR]* next Mātājī Nirmalā Devī.

[Applause. Flowers are offered to Shri Mataji.] Person: May I request *[UNCLEAR]* past president *[UNCLEAR]*.

[The past president garlands Shri Mataji.] Person:.....

.....

[Shri Mataji talks:]

I bow to all the seekers of Truth. In this special time that we call as ghore Kali Yuga, the worst time when we have problems of all kinds that *[UNCLEAR* surrounds us]. Of course we have physical problems, we have mental problems, emotional problems and also economic, political and social problems. We are.....

The Rotary President [who had been cured of his heart ailment observes]: She cannot bear the suffering of her children and absorbs their pain. From morning to night, she cures hundreds of patients. We are very worried about the pressure on her health.

Shri Mataji [smiling]: To cure patients is very simple. If a tree is sick and you try to cure the leaves, then it will not work. It is My Bhagya [fate]. I have accepted it. I have taken all the suffering on Myself.

All the incarnations had to accept their bhagya and suffer. But then they gave up. / have not given up.

By purusarth [spiritual effort] one can face it, witness it and not react. The sequences in life do not change but through Sahaja Yoga, the consequence changes. If you cleanse yourself then My body will be free from disorders and troubles. I have taken you in My body, so I have.....

Contents: 1996-02-19 **Medical Talk, Inauguration of International Sahaja Yoga Research and Health Center, Plot No. 1, Sector 8, H.H. Śhrī Nirmalā Devī Marg, CBD-Belapur, Navi Mumbai, India**

[Dr. U.C. Rai speech is MISSING.]

I bow to all the seekers of truth. It's a very different thing today that I have to speak to people who are professionally doctors and are following a kind of a medical practice which is supposed to be absolutely scientific. I'm not here to in any way denounce or put down any one of the theories that are prevalent and are practiced by the doctors all over the world. In no way one has to degrade any knowledge whatever is available. But the problem is when you find any knowledge is not fully

developed or not competent we should open our minds to something that could be something better than what we are following. Because we have studied in a medical science, because we know about medical studies it's not necessary that we should be so conditioned that we can not take to anything that is new, is available. In the ethics of medical science as far as I know, it is for the benevolence of the people that we are working, we are not working for just pocketing money or for propagating a one kind of theory that we know of.

As it is you know, every time in the science theories are changed. Starting from earlier times, you see all becomes hypothesis then becomes laws and then the laws are challenged. Another thing is the science is amoral. It doesn't look at that aspect of human beings where it is important that morality must be imbibed. Thirdly it's a limited thing, it's limited because it is dealing with our efforts through our mind.

With our mind, whatever we try to know need not be absolute truth, that is the reason there is always difference of opinion. If it was absolute truth there would have been no difference of opinion.

So what we have to do is to get to a point where we can know absolute truth, absolute meaning that every doctor should feel the same way, diagnosis should be the same.

From all these points of view we have to a little bit humble down and see for ourselves what knowledge lies before us in this great country of India. We have no idea as to this knowledge of Sahaja Yoga existed thousands and thousands of years back. I was surprised when I went to Kiev in Ukraine people were talking about

Macchindranath and Gorakhnath and they had made pictures of different Chakras and were talking about Aditi is the primordial Mother. I was shocked how so many years back, 3,000 before Christ, these great saints went there and did such miraculous work. We have in this country also a great knowledge of the power of Kuṇḍalinī, but we don't read all that, we don't want to know, but I was happy to know at least in the course of Ayurveda they try to talk about Kuṇḍalinī, they don't know much but they do talk.

Now this power that I am talking about is the Kuṇḍalinī resides in the triangular bone. Now whatever I'm saying you need not accept Me because it's a very different knowledge I'm talking about and this Kuṇḍalinī which is coiled up into three and a half coils is resting nicely till you come to find out the truth.

This knowledge has been there from ages and ages like Mārkandeya was fourteen thousand years has talked about it, Ādi Shañkarāchārya has talked about it. Many saints abroad also I know have talked about Kuṇḍalinī, even in the Bible it is written I'll appear before you like tongues of flames. They have talked about the tree of life, like Kṛiṣhṇa has talked about also the tree of life which is upside down and the roots are in the brains. All these things had no validity, nobody tried to look at it from that point of view but today it can be proved that all human beings have this very unique thing within themselves which we call as Kuṇḍalinī. It is placed in the sacrum bone, I asked some Greek people and they said of course it is sacrum because regarded as a sacred bone and I asked them who told you, they said the Indians

long time back they told us that's a sacred bone Now this Kuṇḍalinī is like a primule of a seed, like a primule what we call Ankur, when you put it in the Mother Earth the seed sprouts by itself, Sahaja, you don't have to do anything. You can't pay anything to the Mother Earth. You can't stand on your head or do any thing of these physical things. It is inside the seed is built in power to sprout and also it is in the Mother Earth the built in power to sprout the seed.

So this primule sprouts, by that you see a living process comes into being.

Through our evolution we have become human beings, we have become human beings and we have all the things within us about which we have no knowledge, we have knowledge whatever we see outside but what is within us we have no knowledge so far because we have not yet studied or have tried to find out what is written in so many ancient books about what we have inside ourselves.

So it's a question of understanding that all these things written since ancient times in our country by many saints, many incarnations must be some reason why they wrote about it. Now this power is nothing mysterious today it's the power that is to sprout for our last break through of our evolution. After the human awareness we have to jump into a new awareness which is a complete understanding of ourselves. This new awareness that has been talked about, told about by Zen system which you know that is followed very well in Japan, then also by Lao Tze in China, by so many people it has been talked about

that one has to become a person who is beyond the mind.

I want to tell you about this mind, mind is a myth, mind is created by our ego and by our conditioning it's a myth it's no reality and this mind creates these two institutions within us and later on those two institutions of ego and conditioning control the mind. It's like we create a computer, after some time the computer starts controlling us. In the same manner this mind does it, it's just like bubbles which are created by the wind of these two institutions that exist within us. Now to get over this mind is not an easy thing, it's written in all Shāstras it's very difficult, that you can't go beyond the mind. Now see the mind as it is. We think of the future and we think of the past, we cannot think of the present just now where we are, we can't put our attention to the present.

So what happens this mind raises lots of bubbles in our head, a thought comes up, another thought comes up, another thought comes up and we are dancing on the cusp of these thoughts. In the present resides the truth, in the present resides the reality of life, but we cannot be in the present. This has to be established and for that, this Kuṇḍalinī is within us. She is your individual Mother as I said. Of course there is no concept of mother-father in the medical science but there are mothers and fathers we know that, we don't hang from the trees whatever it is, but this Kuṇḍalinī rises, she rises through six centers. The seventh center is below the sacrum bone. Six centers, now these centers according to Sahaja Yoga are responsible for our physical, mental, emotional and spiritual being.

When She rises what She does She nourishes those centers, She integrates them and connects you to the All-pervading Power of Divine Love.

So far, people have been talking about it in some sort of a we can say in the church or maybe in some of the religious things that there is a power of God that looks after us. They talk of Param-Chaitanya. It's all there in the Shāstras but no body think there is much sense in it except for medical science. Now this Param-Chaitanya that is surrounding us, does all the living work.

Look at these flowers, how mysterious they are and it's a miracle the way they are produced from this Mother Earth with different colours, fragrance and heights. Who does all that? It's done by this great power which surrounds us, it's called as the Ṛitambhara Pragñyā by Patanjali, the one who makes Rutu, means the one who makes seasons. But this Pragñyā, this one, this enlightened knowledge that exists around us we have never felt before, we do not know if there is such a power or not. People have talked, the saints have talked, we pray to them, we talk to them but we do not know what is the connection with reality or with the mind because mind doesn't allow us to go to that reality. In the Zen system it's very clearly given that you have to cross over, you go beyond the mind where you are Nirvichara, it's call as Nirvichara Samādhi. At that point you become thoughtlessly aware but you are one with that Divine Power. It's your right as Indians to know all about it and to use it for the purpose of emancipation of human beings.

It's not only spiritual emancipation I would say but the goal is that to know your self what you call Ātmā sākṣhātkar, but as a result of that you get your physical well-being, you get your emotional well-being, you get your spiritual well-being and you became absolutely a transformed personality.

Just now our Doctor Rai talked about so many defects we have but the worst that we are suffering today is corruption. Even a corrupt man may became a very honest man, extremely honest and he cannot help to be that because a kind of a saintliness comes into him. It sounds so fantastic and people can't believe it but actually we are fantastic, we are great, we don't know about our wealth that is within us.

This has to be aroused through this Kuṇḍalinī awakening we get all these things as a by-product. Of course cancer can be cured by Sahaja Yoga, no doubt about it. Is not a knowledge of just curing one thing, there is no specialisation in Sahaja Yoga. Like some people say that you have to have one doctor for one eye, another doctor for an other eye, is not like that. It's Ambiak, means it is all integrated, it's totality of a human being is treated through this because this Kuṇḍalinī when She rises, she passes through like a thread into the pearls of these Chakras and makes you one with this Divine Power which later on makes all your Chakras perfectly alright. Now it's coming to the question of cancer in a very simple way because you see I'm not such a great scientist to talk on scientific knowledge. Now the simple thing is cancer, is very simple disease, is not something to be frightened of. What happens that we have sympathetic nervous system

and parasympathetic nervous system. Two systems are there, the sympathetic is for emergencies and parasympathetic is neutralizing it. Now the left side we call as the left sympathetic and the right side the right sympathetic. I don't know if the medical science has reached that point or not but when I was studying medicine I didn't see they knew, they thought that both are just the same. No, they are not, they are complementary but they are opposite each other. Left side is like this and the right side is like that. Left side stands for your emotional being, for your past. Right side stands for your future and for your physical being and also your mental being, so-called mental being. English language you know is like mental can mean also emotions, can mean, anything. But here it means the mind through which you work.

So these two sides form a loop like this within us. Left and right and the sympathetic makes the parasympathetic like this. Now this is the Chakra, this is the center that we have within ourselves. Now what happens in the case of cancer. You start using one side very much, like right side, some people are very right-sided, futuristic, always looking at the watches, planning everything, I mean is the modern man he is.

So he goes on using it too much so this Chakra is used too much and the power that is inside this Chakra becomes less because it's constricted. Suddenly what happens that he might have an emotional problem or maybe some sort of a sudden shock, so this breaks. When it breaks what happens that your connection with your brain is finished with the center is finished and all

the energy starts flowing where you find that the cells become on their own, there is no connection with the whole. Now the left side you would be amazed Doctor Saheb has mentioned to you is I told him long time back is nothing but our past and I also told him the name that they will give it was 53 to this special attack from the left side which causes the cancer. Now this we can say the protein which enters into our body from the left side starts governing all the other cells and they become malignant, they are on their own. It's very simple now just to make these two things again brought together and to nourish this center. If you can do that, you can solve the problem.

There is another simple thing I would like to tell you which is very important for all of you who are working very hard, thinking very hard and who are doing all kinds of futuristic planing, is very important.

For the Minister Sāhab and for all of you what is ahead of us if you go on too much for the futuristic.

This one center I don't know why we have it behind but I wish you could see later on which we call as the Swādhiṣhṭhān. This one center comes out of the another center call as Nābhī. Now this center is very important for all of you because the duty of this center is, which of course in the medical science they don't accept but we can prove it, is to supply energy for our brain when we think too much. Now we never understand, we are thinking, thinking, thinking and who supplies the energy. Now this center supplies this energy for Our grey cells in the brain. This center has other jobs, this job of course maybe doctors don't know. Other jobs are that it looks

after your liver, it looks after your pancreas it looks after your spleen, it looks after your kidneys and also looks after the intestines. Now those who are very futuristic, who think too much, sit on the table, plan, do this, do that are using this energy entirely for this kind of a futuristic work. As a result what happens all the other work it has to do is neglected, the first is liver. I have told, as Doctor Saheb has told you already that liver is never bothered about and doctors know very little about liver, I'm sorry to say. This liver is the one that makes us live. When we neglect this liver what happens it creates a kind of a heat, I'll not give you the medical terminology but it creates a kind of a heat and that heat can be very injurious. The job of the liver is to absorb all the heat of the body and put it in the blood circulation so it goes out of the system, but when it is neglected it doesn't act. When it doesn't act it gets into problem and the problem is that this heat then starts moving upwards and downwards. When it starts moving upwards what happens. It happens that we call another center is right Heart which controls all the lungs and the breathing and everything. When it reaches higher it creates a problem as asthma. Asthma can be easily cured with Sahaja Yoga. Is very simple if you know how to remove the heat of the liver. It's a very common disease in India, asthma, also pollution is responsible, you see there are other problems because we call it this is the center of the father. If there is a problem with the father, between son and the father also this center can get excited. If a child has lost his father earlier also there is a problem on this center. Whatever it is, it is curable through very simple method

of Sahaja Yoga. Then this heat passes on to your pancreas now this is very important.

So what happens that your pancreas goes out of order. When it goes out of order what you get is a special disease is diabetes. Now this diabetics is caused again by the same heat. All those people who are sitting on the table working out things they get diabetes, not the villagers. Villagers specially in Maharashtra see that the spoon must stand at right angles with the sugar otherwise they think it's not tea at all, they drink so much of sugar they never get diabetes. Because they work hard, they are so tired they go off to sleep, they are not bothered about insurance, saving money or anything and they are very happy, they don't get diabetes they have no botheration about the future.

But the people who are sitting at the table eventually have to get it because diabetes is caused as I have told you by over thinking then the results of diabetes are there that one can get blindness also for that we have Sahaja Yoga explanation. The Swādhiṣhṭhāna in the brain how it works, we call the `Peeth' which has been proved now in Russia that what I have told them about the Chakras and the relationship with the Peeth is there, they have proved it. You see in Russia science has grown so much that they are trying to go beyond and they are very helpful to us.

Then, there's another disease that comes in, which is a very dangerous one for all such people who are very busy who have no time you see, the thing is that the life becomes extremely hectic. You get up in the morning and you think it's late, so they get into their cars. In

America people even brush their teeth in the car. They are so much moving with a speed and there is no time for them to have breakfast or anything, while in the car they will take breakfast or may be in the office. My husband used to tell that so many people come in the office and go to bathroom here in the office because they say better here.

So this kind of a hectic life that we have. The worst is to read newspapers in the morning. If you read newspapers in the morning the Sympathetic goes into action and as you know that your spleen has to produce red blood corpuscles for any kind of emergencies then the spleen starts pulsating and acting to help you in your emergencies that you are going through. As a result what happens that this spleen becomes really mad, crazy and she doesn't know to cope with this crazy man who is doing all kinds of things so hectically. In the olden times I remember that people used to eat their food, My father would eat his food, My mother would sit next to him fanning like this and rhythmically he would eat his food with a very quite and a very peaceful manner. This was our style of life but today it's not so. As a result this spleen is all the time very tense and doesn't know how to cope and is extremely vulnerable to a very dangerous disease which we called as Blood Cancer. We have people now who had blood cancer long time back, about nine, ten years back they were cured with Sahaja Yoga. They are still alright, doing well, nothing has gone wrong with them, without the transfusion of blood or anything, it has worked out, no doubt we have people who have done this. It's a very dangerous disease and for that we

should know that this blood cancer is caused also to children when the mothers are very hectic. I know the mothers have become also very planning sort and they are all the time planning they are running about, jumping about, the other day I met a wife of a Vice Chancellor of University from Gujarat and I was surprised that she had this problem. I asked her “what you do all the time?" She said “I don't do anything I sit." “Must be doing some planning." “Yes I do only planning for food, what should we have today, should we make some `Papads', or `Pharsan' and this" I said “for that why do you need a planning you go to the market whatever vegetable is available you cook it why do you need a planning for that supposing you planned today I will make this vegetable." Spoil our health, horrible disease comes up. Then another thing that happens to you is another serious disease is the coagulation of the kidneys. With this heat the Kidneys can also get coagulated and the urine stops.

Then what you do you put on the dialysis, then the person become bankrupt and dies. That's all. Easy way to make a person die, bankrupt Doctor Saheb are brought a friend of his who had kidney trouble he was doing dialysis of others.

So I said if you promise that if I cure you, you will not any more do your dialysis business. He promised Me, he was cured, but still he was doing it.

So I asked him why are you doing it? he said Mother I had spent so much money, I have put so much Capital in to it if I stop it what will happen? So the whole thing is so money oriented that we cannot think of giving up somethings that we have. Then it affects your intestines.

So much so that a person can get a Chronic constipation. You know constipation is such a bad thing. This absolutely makes you feel so upset, all the time angry and also it makes your life really miserable. But people get Chronic constipation and they have lot of trouble getting over it. They will try all kids of medicines, this thing, that thing and also other problems of the piles and all those things come up.

This is in short I have told you what things can happen to us. But there is something more serious is that supposing a boy of twenty-one years plays tennis and drinks, he will definitely get a fatal heart attack, definitely a very massive fatal heart attack. Because the seat which is from the liver reaches to the heart, by working too hard as a tennis player or gymnast or anything plus drinking and all that this heat increases and can attack the heart and one can get a massive heart attack at that time, also later in life one can get a massive heart attack no doubt. Sahaja Yoga has cured I want to give, if you don't mind the name of Rahul Bajaj who had this massive heart attack and who came to Me and he was cured. Completely cured, he is perfectly all right now. Now then what happens that this heart trouble also is, we do not call it a heart trouble of the same type. There are two types of heart troubles is one is a heart where we call it a lethargic heart. Another is a over active heart.

So with the over active heart people die of massive. And with the lethargic heart they die with Angina. Now this Angina thing happens when this center caught up here when your heart cannot push the blood to your brain and that's how you get the Angina. Angina is absolutely

curable, absolutely curable. Now we had a patient called Mr. Bari Malhotra whose Angina was completely cured. He could not believe it I said all right, you don't believe Me you can go and show to some doctors. All the doctors said you are quite *[UNCLEAR* halw] and hearty, you have no angina. He did then Angiography, this thing he was about to go for the bypass where I met him in Delhi and he got alright. This is only one of the examples I am telling you.

So if these centers are put right, if your centers are in perfect condition and you are one with the Divine you will become a transformed personality. You are absolutely transformed, not only health wise but also mind wise and also spiritually you feel absolutely alright. This is just one Chakra I have told you. There are all other centers within us which look after ourselves. On the physical side we can say our plexuses that we have. This is the aortic plexus I have told you about only on the physical side but it has other work to be done and when this plexus work on left and right side it really gives you a great creativity, great creativity. If you are a scientist you get a great idea about what is the deep knowledge hiding behind these superficial things that we are seeing. It works out in every way for example on genes have I worked out and I told them about genes what I know about and they were surprised. They said nobody has worked on phosphorous so far and nobody has worked on phosphorous. I am surprised at it, it is common sense, then also our Doctor Saheb is telling about immune system I said it's also absolutely common sense that if the immunity goes down you will catch diseases what is so great. If I have said it is immune system which is responsible.

Now then, we have to connect it to the deities where the doctors failed. They cannot. They will have a Gaṇapati in the house they will say Namaste to Gaṇapati go for work. But they don't know Gaṇapati is so important for us within ourselves. What it does, where does he exist, how it works. It's not only our Indian deities but we have also Christ, we have also Mohammed, we have also Mahāvīra, we have Buddha all of them. They are within us. But this is too much for doctors to really accept I would say they should not. Later on gradually as they will grow into Sahaja Yoga they will start accepting. It is once you have a real knowledge then you are amazed for diagnosis you need not kill the patient. Only on your finger tips you will know what is the matter. Not only you but anybody else, who is a realised Soul will say what are the centers catching and what is the problem. It is all been decoded now in Sahaja Yoga and you can find out what is it.

Now the research center that we have here is going to assimilate all the information they have about the people who have been cured. We don't want to have any diagnosis things going on because we can feel it on the finger tips, but they can bring their diagnosis from other hospitals, from other places and they can see for themselves if this diagnosis is correct or not. They should treat it according to the diagnosis of Sahaja Yoga and once they are treated they can note it down and write it down and such a research can be held. For Doctors Saheb is very much *[UNCLEAR* deftin] that and he has done so much work and there are already four doctors who have got their M. D. In Delhi University. I must say in the North [India] I was surprised that doctors are very open

minded while in Maharashtra I found it very difficult, not the doctors but the authorities. They do not give us any chance and they think that it's all a hocus-focus.

Now four doctors have got M. D. but here there are some doctors like just M. B. B. S. have no work they are not practicing and they have formed a group against us and they are trying to trouble us. Why not if something is doing so much good it's from your own country why not open your mind and see to it. After all if you are a doctor you are not here only for minting money. In medicine and politics you are not to make money but you have to make a name. That's very important. That anybody takes your name they should say yes that's the doctor you see is the humanity part. It's very important.

So in Sahaja Yoga a person becomes extremely compassionate. All these doctors who follow Christ why don't they find out how did he cure twenty-one people during this short stay, how did he manage. He just raised the Kuṇḍalinī of people. But it was not written in the bible, because the bible was not written by Christ himself. Same with Mohammad Saheb he never wrote the Koran and what he has said is unless and until you know yourself you cannot know God. All of them have said the same thing, but unfortunately they all have not written any book themselves, so there are problems and there are confusions. But let us now face that the time has come for so many people to get completely cured, completely happy, joyous and enter into the Kingdom of God almighty. To talk of God to the scientists is a big headache but there is God and as a Scientist you must first find out if there is God or not. Otherwise if you say

there is no God that means that you are very unscientific. Have you found out whether there is God or not is the point so I would say that all of you should very humbly try to find out if there is God let us scientifically see that there is God or not. I must say Dr. Rai has been really extremely open minded and how he has worked it out all over the world he has travelled, there are so many doctors all over the world who had accepted his view point, gradually I am sure this will work out.

Now we see our country specially is a poor country extremely poor. In Sahaja Yoga you don't have to take any money or anything just works through your own powers. You can help the poor people very well.

Of course if there are very rich people, they are available to you, we don't want to bother about them too much and neither they are bothered about us. They only depend on doctors so you can have them. But for us is more important the middle class and the lower middle class specially the people who can't afford to go to doctors and hospitals. Here we have a wing three halls for them those who can't afford to pay at all. But if they come and stay here they have to pay for the rent of the house we can say of the rent of the whole institution and for that it's not much, has to be worked out, we have to pay to the doctors who will stay here and to the nurses that's all we will be covering up. But it's absolutely going to be no profit here.

That is I am very particular they know very well because you see money is the one thing that's a disease goes on and on and they have money but this greed goes on growing and I have see people want even the walls to be

made with paper notes is something going mad, crazy people.

So the doctors are something idealistic, they are idealistic people as always I had that faith. With that kind of an attitude we have to see how much we can help our poor people also and look after them.

This science is absolutely free to you, you can learn it in one month. For medical science you have to work for seven years. What is the advantage for doctors to know it because they can locate it very well, they can grasp this much better. They can understand that it's so scientific. It is so beautifully working out. They are amazed at it. I would say that, this is so great a science, we can call it a meta science as Doctor Saheb [Dr. U.C. Rai] has said, but this science can explain it logically but science cannot encompass the whole. Science is still a little cup can't get all the ocean in to it.

So for that all the scientific people who think science is great should try to understand what is such a wealth of our country.

May God bless you all.

Contents: 1996-02-27 **Address to International Forum of Businessmen at Y. P. O. Conference, Oberoi Hotel, Mumbai, India**

One has to know truth is what it is, you can not change it, you cannot transform it. Mind is a myth, brain is not. Human being has a special kind of brain, which is a bit modern like a Prism. Animals do not have this. In human the Divine Power enters through the brain, it goes into different directions. First one goes directly inside. And

the another one which falls into the left goes to the right and which falls into the right goes to the left. Now these two pass out of the brain as resultants but some of these are sucked out by our sympathetic nervous system. And the part which goes out creates our attention. When our attention is reacting with anything else as human beings. For example if a child is nursed by a mother, the child is very happy and peaceful, but when she moves the child from one side to another, then the child is challenged and the ego develops, gradually. When the child is moved it starts struggling with the mother, then the mother says don't, so the conditioning start.

So there are two types of balloons, which develops in the brain, the ego and the other is conditioning.

One comes from the past and other from the future. These two balloons are the reactions we have naturally.

These two balloons create our mind through thoughts.

So our mind is nothing, but the out come of the bubbles of thoughts. When we live in the realm of mind, we may feel very confident, but these thoughts are nothing but our reactions of our attention outside which is not reality.

For the business what you need is a pure awareness. Supposing you put your money in something, tomorrow you find it is all lost. That is one part. Secondly suppose we want to save money for some purpose, you may want to buy a car. When you buy that there is no satisfaction. Then you want to buy another car, you go on jumping from one to another, you cannot enjoy for which you have worked so hard.

The law of economics says that in general wants are not satiable, so we are doing all this for satisfying ourselves,

but we are not satisfied and that is why all the time the mind is very upset.

Today I am very happy that I am talking to Western minds because I have had lot of dealings with Western mind and I was amazed that they are seeking something beyond mind. What is reality and I was mazed they want to find out how to be satisfied and be peaceful. All kinds of problems arise from our thinking. The first and foremost is stress. People are suffering from terrible stress all over the Western world and the solution is that we have to go beyond the mind. This solution has been existing in this country for thousands of years. I was surprised when I went to Kiev to find out that 3,000 years before Christ they had been talking about this power in our triangular bone. I asked how you know about it so they gave Me names of great saints from India who had gone there. I was amazed that they still remember all these things even after such a long time. And they have so many paintings, so many illustrations that they know so much. Now this country has been blessed by such great seers and really guided by great saints. But we were invaded by so many invaders and for 300 years of British rule, we lost most of treasures, one of them the knowledge of self. Even in China they know that there is a treasure of knowledge in India, that is the knowledge of Self. When we say this my hand, this is my nose, this is my body, we go on saying my, but who is the owner of this my, should be found. Even Christ has talked about it and has said you have to know your self. In Quran it is written unless and until you know your self, you cannot know God. How clearly it has been written been down. Of

course the Christ never wrote the Bible. Muhammad Saheb never wrote the Quran, Moses never wrote the part of Old Testament, so there are certain things which can be challenged. But whatever we have to know this that so far we do not know our selves. Once we humbly accept this part that we do not know our selves then things work out much better and our seeking has that humble attitude.

There are seven centers, out of which six are on our central nervous system. In the base of the spine there is the triangular bone called as Sacrum. It is a Greek word. When I asked a curator in Greece, why do you call it Sacrum, he said don't you know it is a sacred bone? How do you know it is a sacred bone.

He said Indians told us. This knowledge went there from India. Now this is the bone which has got a power we call as Kuṇḍalinī, Kundal means coil and it is feminine power, which gives us our second birth.

She is actually your mother, your own individual mother and She knows each and everything about you, She knows your past, She knows your aspirations, but She is your mother. And as She is your mother, She gives you your birth without any pain.

Lot of things have been written that on Kuṇḍalinī awakening this happens, that happens.

So far I have not seen anything happening wrong on Kuṇḍalinī awakening. But if a person tries to force it, it can.

Because it is living process of our evolution. Unless and until we achieve it we cannot be peaceful and satisfied.

We have to achieve that evolutionary process which is just a little breakthrough in our awareness.

Now how is it connected with our business. When our awareness is limited to our brain, which is just a reaction to the things and we started thinking and planning, what happens. It has effects on all sides but especially on our business. For example I see people coming to India trying to import things from us. Now they do not know anything about India. They have no idea where what happens in India, what will be appreciated and what will sell, what they should create.

They wanted to start a company. He is a gentleman, say form Gujarat. He said I am going to make a big company with a very huge factory where I will produce this. I said all right, but what about the labour. Have you got the labour. It so happened that he started the factory and there was a big strike. For one year that strike continued. He said now how to ask them to come for work, because they have taken to drinking, they have become bankrupt. It's a big mess and nothing can happen. I said in Maharashtra you should find out, it's very simple, they are worshippers of Śhrī Gaṇeśha.

So you start a temple of Śhrī Gaṇeśha. He built this temple. After building the temple of Śhrī Gaṇeśha, people thought he is one of us.

They all came for the inauguration and the factory started. Then I said it is a custom that on the day of Diwali, that the owners go to the house of the people and give them something for the happy married life.

And he did it. Didn't cost him much and he is one of the most successful person in his business. Now this is just My own advice.

Your own awareness has to expand, your own awareness has to become Divine. For that you do not have to give up anything, you do not have to think that it is blind faith. It actualises within you, you become that. Once you become that, so many things happen to your awareness. Because your awareness is not so clear-cut, might be through your experiences you may be knowing some things, but I have known people who are great experts in business, suddenly they grow old, suddenly they suffer, if not financially, something else happens, they are worried all the time, they look so haggard, tired and finished. The reason is that they are all the time worried about money. Now with this happening, first of all when this power rises through the six centers and pierces through your Fontanelle bone area, it is the actualisation of the baptism it is not some priest putting his hand on your head and saying you are baptized. You become baptist. When it touches the All-pervading Power, you can feel it on your finger tips, the Cool Breeze of the Holy Ghost. You can feel Param-Chaitanya, you may call it anything but it is All-pervading Power of Divine Love, which is there and doing all kinds of beautiful things.

When you see these beautiful flowers, you take these for granted. It is a miracle. If you ask the doctor who runs your heart, he will say it is autonomous nervous system, but who is this auto. We never try to ask because these are so miraculous. We never try to find out how a seed sprouts out of the Mother Earth. Because the seed has

the capacity to sprout and the Mother Earth has the capacity to help sprout.

In the same way, you have this subtle wealth of knowledge within you, which you do not know. When this Kuṇḍalinī rises, She enlightens all the six centers which are responsible for your physical, mental, emotional and spiritual health. In the evolutionary process we are standing just at a point, where we can take a flight towards this higher awareness.

Whatever I am telling you, you should not take it for granted. Because blind faith has given us lot of problems. There should be no blind faith about it. There should be actualisation. Unless and until you experience it you should not believe it. It is a happening, which has to happen in these modern times, which I call blossom time, last judgement, in Quran it is called Qiyamah, the resurrection time. It is said when the time of resurrection will come your hands will speak. This is what happens, that you start feeling these centers on your central nervous system. On your finger tips you can feel all these centers, you can feel your self, these centers denotes what is your position, when you use them, what are your Chakras, how are you? If there is any problem in these Chakras, you will either suffer physically, mentally or emotionally.

Now working too hard as you are, the energy that you have is absolutely limited and you have to have the energy which is unlimited. Then if it is the Divine Power, then Divine Power is of love, is the power of knowledge and the power of joy. If you become one with the Divine Power then you become tremendously powerful, full of

compassion and energy and you do not feel tired. For example I am 73 years of age and look at My energy. I travel all over the world and people say mother you are not tired. Because I never think I am travelling. I think I am sitting on My sofa set. To go beyond mind is the only way you can achieve that peace and also the connection with this All-pervading Divine Power. This Divine Love first of all gives you very good health. The problem you would be facing by using too much of your energy on thinking of futuristic things. How many diseases one can have only through one center. This center is called Swādhiṣhṭhāna center, which is the second one. The medical science on the physical side it is aortic plexus, but on other levels also it works. I do not know whether in medical science they accept it or not, but this center has to do the great work of supplying energy to the grey cells in your brain when you think. This poor center also has to look after your liver, pancreas, spleen, kidney and intestines. Now if you are all the time thinking, planning the future so this poor center cannot look after your important organs.

So what is neglected? First is your liver. The function of the liver is to emit heat that is collected in the whole body that is the poison into the circulation. But it fails, because it is not looked after by the center so your liver goes out in a way and the heat is collected. When this heat rises upward it travels up to a center, which we call right Heart, which looks after your lungs and you can have asthma. Then this heat goes to the left side towards the pancreas, that also goes out of order and you may develop a very common disease called diabetes. The

diabetes is not caused to people in India who are working in villages, because they do not have insurance, they are not worried about their future. Whatever they earn, they spend and sleep. They are always very much satisfied. They take so much sugar that the spoon has to stand at ninety degree to make a good tea for them. Only people sitting on the table get diabetes, because all their energy is going to their brain, not to their pancreas.

Modern life is very much hectic. Early in the morning you get up. Even in America I was amazed to see that people brush their teeth in the car. You see the newspaper in the morning, which you should not, because you get such a fright, every day there is so much horrible deaths and if you are a sensitive person the emergency sets in.

So that in this emergency the spleen has to produce red blood corpuscles all the time. The spleen does not understand this kind of crazy behaviour, why is he so hectic. First you read newspaper early in the morning and then rush to the office, eat your breakfast in the car. In office the boss is shouting at you or you find there is a loss in the company. All this is showing on you and there is terrible emergency. Your spleen which is to work in emergency goes out of order. Then the horrible disease called blood cancer sets in. Now the intestines. The intestines are really coagulated and by that you get a terrible type of constipation. I was surprised to see in Switzerland that they eat something which we give to our buffalos for constipation that is called the seed of cork that they eat in bread. When I asked them they said it is very good for constipation. It is because of too much

futuristic thinking, that they get this horrible constipation.

Now suppose there is a boy of twenty-five years of age and he is playing tennis and he drinks a lot, then the liver goes out of order very soon and the heat rises so much that such a person get a massive heart attack, which is fatal. This heart attack can come later also and the man can die of fatal heart attack. There are two types of heart attack. One is by overactive person and other is by lethargic which is called angina.

But the heart attack people get from business is mostly of massive type.

People who work too hard have to understand that they do not have supply of extra energy which they need to have if they have to be alright. This is possible only if you get connected to your mains. Now this instrument [microphone] if it is not connected to the mains, it has no meaning. In the same way in the West people are lost. In the beginning I came across lot of hippies. I asked them why do have this kind of hair. They said we want to go back in time. I said you cannot do that, inside you is this modern brain.

This outward understanding of your problem is not the solution.

The last problem you could have is paralysis on the right side. It is the nature which gives you the respite. Now the worst I have seen is that your conscious mind goes in completely jeopardy they call it the yuppies disease. The people become reptiles. The brain is OK but they cannot move their legs consciously, they cannot move their hands consciously. As you people are young I have to

warn you that if you have to enjoy your life you should get connected to the mains, to this All-pervading Power, which exists and which you can experience. This All-pervading Power loves you. You get so much blessings all your life, you will be amazed how things work out. First of all you must have full confidence in yourself and know that you are born a human being for a purpose. You are not made into human beings without any destinations for just putting money here and there. To get the complete enjoyment you have to get connected to this All-pervading Power. Unless and until your awareness is expanded you cannot have a happy life.

In our evolutionary process we have reached the state of human awareness and now we have to jump into this new awareness, by which we get the idea of the totality and not of part, you get the idea of the future, that is your attention is directed to it.

You are not just a human being tossing on the waves, but you are a person who knows him self and who is full of love. Once you open up this Divine Power, the people who could not speak have become great orators. There are so many artists in India who have become great in their fields after getting their Self-realisation. Your creativity in business also increases, you understand totality and you help yourself, your family. You can know the reality on your finger tips.

In the light of your spirit you will know what is wrong and what is right. Your awareness gets enlightened and all the nonsensical things are dropped by you. We have to open our eyes to our own weaknesses, our own achievements, own potential, then only you will enjoy

and be satisfied. I hope you will try it. Even though I am told you are very rich people and Christ has said that they cannot enter into the kingdom of God. I do not agree because some very rich people have come to Sahaja Yoga and have become richer and richer, not only from outside but from inside. You enjoy your own virtues, your own generosity.

So last of all you jump into the ocean of joy.

May God bless you.

Contents: 1996-03-02 **Radio Interview, morning the day before Shivaratri Pūjā, Sydney, New South Wales, Australia**

Journalist: As Sahaja Yogis what should we desire?

Shri Mataji: Moksha and liberation.

Contents: 1996-03-03 **Shivaratri Pūjā, Bundilla Scout Camp, 6 Baden Powell Pl, Winston Hills (35 kms E of Sydney), New South Wales, Australia**

Today we are going to do Pūjā to Shiva, Śhrī Shiva. As you know, Śhrī Shiva is the reflection of Sadāśhiva within us.

I've already told about the reflection. Sadāśhiva is the God Almighty, the one who sees the play of Ādi Shakti. But He is the Father who is watching each one of His Creation or Her Creation.

His support to Ādi Shakti is entirely, fully strengthening. There's no doubt in His mind about the capability of the Ādi Shakti. But when He finds that in the play of Ādi Shakti, the people or the world as such, try to disturb Her, or to spoil Her work, then He gets into His wrathful

mood and He destroys all such people and maybe, He destroys the whole world.

On one side He's wrathful, no doubt, on the other side, He is the ocean of compassion and joy. That's why, when He is reflected within us, we get our Self-realisation, we get the light of our Spirit and we get into the ocean of joy.

Also He is the ocean of knowledge, so those who get Self-realised get the knowledge of the Divine, which is very subtle, permeating into every atom and molecule, the power of this knowledge is there.

His style is such that, in his compassion, He forgives even very cruel Rākshasas, if they dedicate themselves to Him. Because His compassion has no limits and sometimes the same people who are blessed by Him try to trouble the devotees of Ādi Shakti, but it is just to create a drama, an event. Unless and until there is some drama, people won't understand. We had to have Rāmāyaṇa, we had to have Mahābharāta, we had to have Christ being crucified, we had to have Mohammed being tortured. All that drama was there because without events, people don't remember.

So in the spiritual life of human beings, they have seen lots of dramas between the blessings of Shiva and the powers of the Ādi Shakti. As the time has moved, today in the history of spirituality a great discovery has been made, that people can get their realisation in the collective, en masse. Thousands can get their realisation.

Now, we should know what is that realisation we have got, what does that mean and what is the culminating point.

First of all, I have to tell you, the mind about which we speak and depend upon is a myth. There's nothing like mind. Brain is reality, not the mind. Mind is created by us reacting to outside, either we react to conditionings or ego. Thus this mind is created like bubbles in the ocean of reality, but that's not reality.

This mind, whatever we decide, we know, is very limited, illusive and sometimes shocking. The mind always move in a linear direction and because there's no reality in it, it recoils and boomerangs. Thus all the enterprises, all the projections so far we have done, it seems, come back to us. Whatever they discover, comes back to us as a big destructive power or a very big shock.

So one has to decide what to do, how to be out of this track of our mind. Kuṇḍalinī is the solution.

When She's awakened, She takes you, with that awakening, She takes you beyond your mind. The first thing is to go beyond your mind.

With mind, you'll do many things, but it will not be satisfying, it will be not a solution, it will not help you. And when we start depending too much on our mind we develop all kinds of physical, mental, emotional problem. Now the latest is the stress and this stress has no solution they say, but in Sahaja Yoga, we find the solution, by crossing over this mind. It's like a barrier for our advancement.

So when you get your realisation, you must understand that your Kuṇḍalinī has taken your attention beyond the mind. Now, this reaction to outside has come because we human beings have a prism-like brain, or we can say a prism-like skull and when the energy passes into it, I've

explained it in My books, it goes into bifurcations, or you can say refractions, by which our attention goes out and we react.

If we react too much, then these bubbles create a very horrible mind which can lead to any kind of thing. It justifies itself, it pampers your ego. The ego and the conditioning that creates this mind start using this mind for the purpose of their fulfilment, of their, all the accumulation of ideas and thoughts which has no backing, which has no reality with it.

It's like we make the computer. Ultimately we become slaves of the computer, we make the watches ourselves and then we become slaves of the watches. That's how it dominates human beings. And when a person who has a very strong mind decides to destroy, like Hitler did, with some idea, he can go on destroying which has a very far fetched effect on our culture, on our spirituality.

Now the first step is to become thoughtlessly aware, where you cross your mind, you go above your mind. Mind cannot affect you, this is the first stage as we call, is thoughtless awareness.

Second one is where you start seeing the working of this Param-Chaitanya, of this All-pervading Power and you start becoming aware that there is lot of truth in what Mātājī says. That there is this Power that works out many things. It works miraculously so many things for you. It gives you blessings, It guides you, It helps you in so many ways It helps you. It gives you good health, good wealth and also a very good society of very beautiful people in the collective. All that you can see clearly is happening here.

Now this happening of achieving thoughtless awareness is very simple and easy, but to maintain at that point is difficult, we still react and we think. Anything you see, you react. To get to that point in thoughtless awareness is first to change your attention.

Now, for example, once we were climbing a very high mountain to see one temple called Palitana, Myself, My son-in-law and My daughter. And we were really tired because we had to climb, I don't know how many steps and when we went up we were tired and there was a little canopy made of beautiful marble carving, so we just lay down there ourselves. They were very tired and they said: “What is this kind of a temple?" They were grudging. While I looked up and I saw lots of beautiful elephants were carved.

So I told My son-in-law, “Look at these elephants, they all have tails of different types." He said “Mummy, we are all dying, how can you see the tails of elephants?" But is just to divert their attention from that tiredness [that] I told them that, why not see the tails of the elephant, which is very different.

So what happens [is] that, when you are putting your attention so much to outside all the time, then you must first of all also divert your attention. For example, you see these beautifully made things here.

Your attention is something else, just try to enjoy the beauty of that. [You] see, there are beautiful carpets here, just look at them without thinking, because they don't belong to you, so no headache, they belong to somebody else, is very good! Otherwise, if it belongs to you you start thinking; “Oh, My God, I have spread them

here, what will happen, they have to be insured!" Or some sort of a thing like that.

That's common human reaction. But if it doesn't belong to you, you can watch it nicely. Now you watch it and don't think. You'll be amazed, when you see the beauty that is put inside this, you'll see the artist who has put his joy, his exuberance into it and you'll be amazed, after realisation, that, this exuberance will fill into you and a cool kind of a relaxation will come into you and this Kuṇḍalinī will rise and you'll become steady in your thoughtless awareness.

So whenever you look at anything, look at any beautiful thing, even say, today's election, just watch the man who is elected. Watching him, itself, gives him blessings, gives him better ideas. You get also ideas, which are coming from reality, which are there: how to make this man a successful person, or this country a successful democracy.

All these things happen when your attention is diverted from criticising, from reacting. Just you watch, become the witness, try to witness everything. It's not so very yet practiced.

So far, I've seen, that whenever even we get our, achieve our realisation, we don't realise that we have to witness everything.

When you start witnessing through your Spirit, then you don't see the bad points of another, but you see the good points. You just pick up the person with very good points.

So once you see that the witness state enlarges and you start enjoying another person, you start enjoying every

thing that is there, even a small blade of grass you can enjoy, if you have that capacity.

In Japan, Zen system started on these lines. And he made, Viditama was the person who started it, he made a garden out of moss, different moss, in very small, small. Then there were little, little flowers also.

And hardly about five feet of the garden, which looks like a shape of a question mark you can say. You have to go on a lift and you reach that platform on top of a hill, or a mountain where you see this. All little, little mosses are there and you see, differently arranged a beautiful garden. When you start seeing it, your thought stops, because such a marvelous thing, when you put attention to it, to its creation, your thoughts stop.

So you must practice as to find out what stops your thoughts, what makes you the witness.

Once you develop this habit, you will station yourself nicely in the thoughtless awareness. Then you start watching how Sahaja Yoga has helped you, how it has been blissful, what you have achieved through Sahaja Yoga. You will be amazed, if you just start watching it, everywhere you'll be amazed how this Param-Chaitanya acts.

Nowadays, this Param-Chaitanya has become active because of Kruta yuga. You can see from the way it is playing around, with vibrations around Me. You've seen so many photographs of Mine where these vibrations are there. Also you've seen the photographs of many Sahaja Yogis seating before Me, on their heads My name is written down in Arabic language. You've seen so many

ways by which you can find out that there is the play of the Divine.

Now the mind will still try to say some things: don't listen, just watch. The effect of Sahaja Yoga you should watch on yourself, on your own body. Don't think about it but watch it and you'll be amazed how you have changed.

To be very frank, when I come to Australia every year, sometimes I can't even recognize you. You look much younger, much better, much happier, [laughing] and I don't recognize who are these people.

It is this witness state which takes you to another realm which we call as doubtless awareness. At that state, you can become so empowered that you can give realisation to others. [Hindi.] You can give Realisation to others, you can give complete knowledge about Sahaja Yoga, you can talk to them. Also you emit.

[Aside:] [Hindi.] I'm, you see, when I'm watching, I'm absorbing the heat, that's My trouble [smiles].

So your whole state, spiritual state, becomes so much blissful, you become so powerful, you become so compassionate and so loving, so balanced, completely cleansed with all the destructive ideas you have, all the depressive ideas you have and then you really stand up as a great Sahaji who can do tremendous work.

Like recently I heard that Germans and Austrians are now going to Israel, because they think Jews were killed by their forefathers and there's a big center now started in Israel. Just imagine! How these people, once [they] reach that state, go to countries single-handed. They have done so much. Same in Turkey, same in places which are

very tremendously remote in South Africa. Because, from inside they become completely confident, in thoughtless awareness, as well as doubtlessly aware.

But now, once you start growing by meditative attention, what happens [is] that your attention becomes enlightened. Now the job is to motivate your attention. It's not just to enjoy, but to motivate it, to put it to problems. Now supposing you have some problem on a national basis, you all can put your attention to that and things will work out. Because you are the channel of this All-pervading Power which is trying to create a new world for you, new human beings. And this evolution can take place very fast if you all decide that whatever we have now within ourselves, we should motivate it, we should direct it and put this attention to some use. It should not be wasted. Whatever wealth we have, it should not be wasted.

Now the main question today, which I'm going to tell you about, that, what is God's realisation? First is the Self-realisation and there are many ambitious people who want to become God's realised.

First and foremost thing, we should know that human beings cannot become God! It's not the becoming of it. You have not become, also, in a way, Spirit, because the Spirit is emitting through you, using you, giving you, looking after you. If you become the Spirit, there won't be any body left, nothing will be left.

So with this body intact, your Spirit is acting through this body, is giving you all the light.

But one cannot become God Almighty, this one has to understand very clearly. But what is God's realisation is

to know about God. You see, to know about God means to know how His powers are working, how He controls, by becoming part and parcel of God Almighty. Like My finger doesn't know about My brain, but it acts according to My brain. The finger cannot become the brain, but it has to act absolutely according to My brain, because it is so connected, it is so one.

Here, when you have the God's realisation, then you know about the brain, you know about God, you know about His powers, you know everything about Him. As far as I am concerned it's a difficult task for you, because I'm a Mahāmāyā. It's very difficult for you to know each and every thing about Me. I am quite a illusive person, as you know that well. And whatever I do or whatever I achieve, it is just for you to see and understand that, after all this is Ādi Shakti and She can do all these things. You can also do all the things, but you cannot become Me.

But you have to know, to know, through love, through devotion through prayers. To know the God's powers is the way you are God realised. Then you can control the nature, you can control everything, if you have that knowledge within you about God. For that a complete humility is needed, that you cannot become God, cannot become God Almighty, you cannot become the Deities. But definitely, you can become God realised, Means God acts through you, uses you as his power, as His channel and that you know, that you know, what He's doing to you, what He's telling, what His vision is and what is the information. The connection is like that.

Many people in Sahaja Yoga have been benefited, I know. But they don't know how they have been benefited, what

has worked it out, how it has worked it out, what connection of theirs has helped them.

Once you do that, you know that clearly, how things are working out, with what power you have achieved it, then it's a God's realisation.

Such people become extremely powerful, in the sense that they can control so many things. There have been many saints of that kind, but sometimes they fell from even that and they developed their ego. They didn't have their own humility that they should have, that devotion, that dedication, that surrendering. They fell down you see them, I have seen some of them, that they become quite proud of their achievements, they don't want to leave it to anyone. They think they have achieved it with great difficulties and why should they give it to others. Such people are not going to rise very higher. But you people who have got your realisation and who are humble, who know that out of humility only you are going to achieve your surrendering.

Islam means surrender. Mohammed Sahib has talked about `Islam', meaning `You surrender'.

If you cannot surrender, you can never know God. He's clearly said that unless and until you know yourself, you will not know about God.

So as Sahajis, you have to know all the little, little things, all the big things and all the great visions, that you can do it because of the grace of God, because [of] His blessings, because of His love for you, that you have entered into the Kingdom of God.

I may say you have entered, I may say you have achieved that state, I may say that, but, still you are not

there. It's like if I tell somebody, “Now you are in Australia." He's not in Australia, but I can say: “You are in Australia." So he believes “I'm in Australia." That's not the way. You have to be in Australia, then you have to know about Australia. You have to know what sort of a climate it is, what sort of things it is.

I find also the parents here have to talk to their children. There's not much rapport of the parents with the children. They are being properly looked after in the school and they want to do a lot, but the parents also must get involved, when the children come here, to see that they develop proper discipline, proper sense. Not to get attached to them to ruin them. If you get attached, then you'll ruin them.

One of the qualities of Shiva is complete detachment and that is what you have to develop, is to become completely detached.

Detachment doesn't mean that you neglect anything.

I've explained to you many a time that like the sap in the tree rises, goes to different, various places and then evaporates or it goes back to Mother Earth, in the same way your detachment should be. If you get attached because it's your son, or if you get attached because he's Australian, or maybe he belongs to certain family or certain class, then you are still limited.

All these limitations have to be dropped if you have to cross over and these limitations create such a big load that whatever I may try, whatever you may try, you cannot stay in thoughtless awareness. That's a very beautiful state in which all of you should be there. In that you are not dominating nor you are compromising you

stand on your own legs and you know for definite that you are not swayed away by any idea or any domination or any subjection of yours by anyone.

So you become completely a free bird, absolutely free bird and then it becomes your job to achieve your flight.

One flight is up to the thoughtless awareness, the second one is up to the doubtless awareness and the third one is to God's realisation.

I have seen people who are very close to Me also don't understand. They behave in such a manner as if now they have become Gods.

So egoistical they are that I'm amazed at them, then they have to leave Sahaja Yoga.

So, you see, even if I praise you too much, if I say anything to you, you shouldn't get pampered. It's a testing ground. Or otherwise, also, if I tell you that, `This is not good, you should improve on this,' you shouldn't mind, because I have to do it, it's My job and your job is to listen to Me, because I've nothing to gain from you, I do not ask for anything.

What I want is you should all get My powers. You may not become what I am, I agree, but please try to get all the powers that I have, which is not a difficult thing.

This is what is God's realisation, that's what is to know Shiva and Sadāśhiva. Through the Shiva, you know Sadāśhiva. You see the reflection and from the reflection, you know who is the Original, from the reflection you learn.

Thus you reach that state where you think you are now definitely settled in the Kingdom of God and that you can

see God, you can feel God, you can understand God and you can love God.

May God bless you.

***Contents: 1996-03-04*, Public Program, Convention Center, Darling Harbor, Sydney, New South Wales, Australia**

I bow to all the seekers of truth. At the very outset I have to tell you that truth is what it is. You cannot change it, you cannot describe it, you have to experience it and you cannot pay for it. You can only discover it through the last breakthrough off your evolutionary process, which is living process into a new awareness, into a new dimension. Now whatever I'm telling you please don't accept blindfolded, we have had enough problems with the blind faiths. If you do experience, if you do get the results of whatever I'm saying, you have to accept it as honest people, because it is for your good, for the good of your family, for the good of your country, for the good of the whole world.

We talk of peace, from where does this war comes in? From where the ideas of fighting and quarreling comes in? It comes from your mind and look at this mind. What it is? I say it is a myth. Mind is a myth created by the reaction of your ego and your conditioning. Is like the fort or you can say it like a bubbles on the shore of the ocean which are brought forth by your thoughts and your reactions. But you can't stop it. When this mind is created it again substantialises and supports your ego and your conditioning.

Is like this. As we create a computer and then the computer itself starts controlling us. In the same way this mind starts creating us or we can say we create the watch and then this watch starts controlling us.

Now all these thoughts are born through this mind of ours, which is nothing but the garbage we have gathered around by reacting to things. When we see very grotesque type of creation of films and things and some also many so called art. We are surprised, “from what brain it comes?" There must be some rotten brains that are bringing it. But brain is a reality, not the mind they come out of the mind.

So one has to understand that to get peace we have to go beyond this mind. This mind is the one, which reacts and creates problem for us. Makes us believe into things and we are conditioned, we are not free people, free people to understand what is reality.

The reality is beyond the mind. Now, how to cross the limit of mind? Like once a doctor in Switzerland said, “Mother you do what You like, You can cut my throat, but stop these thoughts, there are bombarding Me." You cannot stop. Because the thought rises and falls of another thought rises and falls of. These thoughts come to us from the past or from the future. You are not in the present; you cannot be in the present. But when this power that is described to you already known as the Kuṇḍalinī, rises then She takes your attention beyond the thought, beyond the mind and that is the place where resides the present, the reality. Now this special thing as called as Kuṇḍalinī is not to be discarded because coming from India. It has been described in every scripture, even

in the bible is described that, “I'll appear before you like tongues of flames." These are the tongues of flames you see, along the path of the Kuṇḍalinī. Also Mohammed Sahib has said very clearly in his Koran that, “If you want to know God, you must know yourself." Christ has said, “Know thyself." All of them has said the same thing. If you see Zen system or Lao Tse, Confucius, any one of them. They all said that unless and until you know yourself, you are not there, you have no identity. But knowing yourself is very important, because you are the treasure of knowledge. You are the treasure of wisdom and Divine discretion is all within you, which you should know without any efforts, effortless, Sahaja. `Saha' means with, `ja' means born. Born with you is the right to get yourself realisation, is your birthright to have it and in these modern times it has been made very very easy somehow, to get this realisation.

In our country also all the saints have described about achievement of yourself. Sahaja word is used by so many saints specially by Guru Nanaka who says, “Sahaja Samadhi lago." Whatever you have to get in your awareness, Samadhi is awareness has to be in the Sahaj means the spontaneous manner.

So for this you don't have to stand on your head, you don't have to run away from your families, you don't have to starve or fast, you've done it, you've done it in your last lives. In this life you should have the fruits of your hard work that you have put in to express your desire to be one with the Divine.

The first truth is that you are not at this body, this mind, these conditionings, this ego, these emotions, but you

are the pure spirit. The second truth is very much evident but we are not bothered to know it.

For example, you see these beautiful flowers, beautiful trees all around it's a miracle. See every tree is different, every seed is different and all flowers are different their fragrance is different it's a miracle that is created but we take it for granted. If you ask a doctor, “who runs your heart?" he say[s], “Is autonomous nervous system." But who is this auto? Who is the one who does it? They don't know. At the most they can say, “it is autonomous nervous system." Beyond this systems we have the system here of these three channels and these three channels left and right channel look after your right and left sympathetic nervous system which are responsible on the right side for your physical and mental activity. On the left hand side for your emotional activity. In center there are these two sympathetics, they form a loop like this and the Chakras, the centers are created. These centers are responsible for our physical, mental, emotional and spiritual being. But when we start exhausting what the limited energy it has then we start developing, either physical, mental, emotional or spiritual problems. If somehow we can save these centers from the state of jeopardy we can solve the problem of physical problem of say, mental problems and also emotional, spiritual problem.

Now I must tell you, that we have cured through Sahaja Yoga I should say we have because it is your own Kuṇḍalinī, which has done the job. People, who suffered from blood cancer, people who have suffered from lots of incurable diseases. We don't have to go, through

rigmarole of horrible diagnosis you can diagnose a person on your fingertips because these fingertips five, six and seven are denoting your centers within yourself, they get enlightened.

So with the light of the spirit when you are enlightened you really become an enlightened person, it is not just a certificate on this I'm that. It is something that happens to your awareness.

The first thing that happens as I told you, You go beyond the mind that you become thoughtlessly aware. In Sanskrit we call it Nirvichār Samādhi. It is an instant happening. Maybe the modern times are such that the Kuṇḍalinī rises like a jet and in thousands of people it has worked out. But to establish that situation of thoughtless awareness you have to meditate at the most for ten minutes in the evening but immediately you will feel absolutely peaceful, you'll feel like a witness of the whole drama that is going on and with that drama you will be able to see that there is nothing to be afraid of, nothing to be worried because you are out of that problem you can solve it. Like if you are standing in the water and the sea and it's turbulent you see the waves rising higher and higher, you are frightened. But supposing you can get into a boat then you can watch the same scene with such attention and with the enjoyment, because you know it cannot hurt you. But supposing you can jump into the sea because you are a great swimmer you can save many others.

So in the second state where you become doubtlessly aware, you become all powerful because you can give realisations to others. It's like one enlightened light or a

candle can enlighten many candles. You can give realisations to many people. They say that Sahaja Yoga is working in a hundred and eight countries where I've not been. I have been to many but not so many. Only the people who got their realisation went down to all these places and have *[UNCLEAR]* awakenings to so many people.

It's something that is within you. This Kuṇḍalinī is your own mother, She is your individual mother, She knows everything about you. She is very anxious to give you yourself realisation. As your mother took all the pains where you were born She takes all the pain. She is so anxious that if She knows that there is an atmosphere where She can awaken your inner being, She spontaneously rises and doesn't give you any trouble whatsoever.

It's a living process of evolution as I told you. We cannot explain any living process in a very scientific method, because supposing you have a seed and you plant it into the Mother Earth it sprouts. Because the Mother Earth has got power to sprout it and the seed has got power to be sprouted. It is no effort, the seed *[UNCLEAR]* treated with respect and just to be planted inside the Mother Earth. It's a very simple thing. Now, people think that, “How can it be so simple?" For them it should be a very difficult thing. But everything vital in this world is simple. For example our breathing supposing for our breathing we had to go to some Guru or take some lessons or consults some books. What would have happened to us? It is a very vital thing which has to happen to you and that's why is very simple. I think these are the times I call them as blossom time, where suddenly so many seekers have

come and the Kuṇḍalinī is taking this form. Of course it is predicted also by Bhrigu Muni long time back that such and such thing will happen. But still it will happen in such a big proportion I could never witnessed it.

What happens to you when the Kuṇḍalinī rises? First of all you feel the Cool Breeze of the Holy Ghost. Now, what is this Cool Breeze of the Holy Ghost is? It is all pervading power of Divine love. This Divine love is the one, which gives you these flowers is called also as Rutambara Pragñyā by Patanjali. It is also called as Param-Chaitanya. It is also called as Ruh, also it is called as Nirākāra. You can call it by any name, in the bible is called as a all pervading power of Divine love. Whatever you may call it. It is something which is an energy around us which is a very subtle energy, which works into every atom and molecule into everything penetrates into anything. This special energy we have never felt it before. For the first time tonight you are going to feel it. Also this is called us the last judgment because there are people who like to go to people who can be bought whom they can pay money for self realisation, people who can deceive them, people who can tell them stories something artificial and they get bound by those permissive marketing, marketing ideas. If they are permissive people like them because it's supports their weakness if it is ego oriented they like it because it supports their ego.

So the judgment is now, it is for you to judge whether you want the absolute truth or not. The difference between truth and absolute truth it this that absolute truth is felt by everyone on the central nervous system which we call us *[UNCLEAR]* from where the lord Buddha

has come, another one is *[UNCLEAR]* is to know it on your central nervous system not mentally, not on mental level, on your fingertips and on your fingertips you can find out what is the absolute truth and what is the relative truth. Supposing you have ten children who are realised Souls. And you tied up their eyes and ask them to say: “What is wrong with the person who is standing before you?" They will all raise the same finger or fingers which *[UNCLEAR]* that he has a bad heart or he has got mental problems. It can be easily found out what's wrong with that person. Now if you know how to correct your centers you can also correct the centers of others and thus you can have the whole world to get emancipated. It's a thing by which you are resurrected. Again I would say Mohammed Sahib has said though he didn't write the Koran but lots of truths left behind somehow. That, “your hands will speak at the time of resurrection at the time of Kyama." This is exactly what happens that you can feel on your fingertips your centers and centers of others because you get into a new dimension of your awareness which we call as collective consciousness.

Become collectively conscious. Sitting down here you can know the vibrations of another person; you can know what's wrong with that person. Even if he is dead you can know about it. Is very interesting how you become so knowledgeable and after some time you will be amazed that you can even tell the future of a person. Is very simple, because if you become a saint of that level, what is future and what is past? It's all absolutely in your brain already built in. Only thing you are not open to that so far but with the light of the spirit everything opens up in

your brain. I have seen children who are *[UNCLEAR]* class who have brought to Me because there were hopelessly bad *[UNCLEAR]* all the time *[UNCLEAR]* scholarships and most of the students from Sahaja Yoga I have seen are always breaking the reports everywhere. If this is the advantage only, I would have said, “all right, is all right is nothing great." But the greatest advantage I think is that your personality knows the totality. You get your identification. See people have no identity. Why these people take their heads and wear funny dresses because they want to express their identity. Your identity is within yourself is your spirit and once you know your spirit you will be amazed how dynamic you are. I have known many artists who were very ordinary artists. In India specially you know Hamzadali was a ordinary artist. After coming to Sahaja Yoga he become such a great artist.

[UNCLEAR] so many of them. Because I'm telling you, you don't have to believe Me, you can ask them. There are so many people like this who have achieved a lot there are many who could never speak a word on the stage they had the stage fear. They have become great orators and speakers; they have become free to express themselves. Then we have people who are *[UNCLEAR]* accountants who have never known what is language is what is the beauty of poetry is. They have become great poets. Like this so many things have happened to people but we don't want to publicize and we don't want to give it in the newspapers and we don't allow people to talk about it, because that is not the main thing that you have to achieve.

Firstly you are collectively conscious but when you become collectively conscious you don't react because you know. If a person is trying to be harsh with you, you know why he is harsh, if person is trying to be nice with you, you know why he is. Because you know, you do not react, you just watch. And this watching is something like their attention being directed towards the problem. This attention when directed towards that problem, acts, it acts. Is not just an attention that goes out, but it acts and works out things. There is so many miracles have taken place in Sahaja Yoga that is impossible to understand this all pervading power, how it's working and I say is Kruta Yuga now. Kali Yuga is about to finish, the Kruta Yuga has started, Kruta Yuga means the one in which this Param-Chaitanya, this all pervading power is acting. It is active it acts in so many ways that you are surprised and the miracles it has created. This is not a time I could tell you about this. But those who are here who have got their realisation have been blessed by Sahaja Yoga can tell each one of them lots of things that they have seen, that has happened to them and how their lives where transformed.

This transformation is very important today. With this transformation people loose the sense of greed.

You know, nowadays this greed has brought all the politicians to such *[UNCLEAR]* Is so stupid to have this greed. The satisfaction part comes in trough Sahaja Yoga. As you know there is a law of economics that in general wants are not sociable. Today I want to buy a car then I don't enjoy it, I want to have a house, I don't enjoy it, then I want to have an aero plane, I don't enjoy it.

Because we don't know what we want. We run after this thing, run after another like mad and the greed starts working I mean it's such a stupid limit that people want to put all these money into the walls they want to have walls of money. Stupidity goes to that limit not only greed then also the jealousies we have because we think that the people who are with us are not the people who should be there or we should supersede them or we should have their position. Actually there is no love, there is no compassion, there is no understanding of another person but when Sahaja Yoga takes place I have seen thousands of people whether they that are from Russia, from England, from America, Australia anywhere. I've seen them thousands together they live together, they feel each other, they understand each other and the love they have for each other is tremendous. If something happens to someone anywhere in the world, the whole society you can call it, you can call the nations where Sahaja yogis are there they are so concern as they would not normally been even about their brothers. All kinds of help, all kinds of suggestions come in Doctors will *[UNCLEAR]*.

It is such a big society we can say, such a moral relationship that starts, everybody helps everyone but that doesn't mean that *[UNCLEAR]* becomes. Only possible in Australia I tell you.

If you are interested in you well being, in your transformation, you must have some patience. Otherwise, how is going to work out? On the contrary I have seen in Russia there never then less from 16,000 to 18,000 people and not one person *[UNCLEAR]* after all what

is so great about that I can't understand we are in the democratic country and we have got freedom to do whatever we like, all right, but what about the freedom to wisdom to understanding it? Russians I think are people, of course communism or anything, I'm not very much for favour for it but one thing they haven't developed that possessiveness in them, they are not possessive, they are so sweet, that the *[UNCLEAR]* their houses and they said, “you can have these houses this at you can have, your own, we don't want we don't want to have any, you can have it." Apart from that, you see once I was there and there was a *[UNCLEAR]* and I asked them aren't you are worried, there is *[UNCLEAR]* all these things happening, they said, “mother who are we, why should we? We are in the Kingdom of God." I was surprised at their positive understanding of themselves. That's what you are. You are so powerful within; you are so dynamic within it's such a treasure within you. You have not known your glory, which you have to know. Once you know that, you become satisfied with yourself to begin with. But that doesn't mean that you become poor or financially disturbed, not at all. On the contrary, I've seen now, an Australia itself, people who have come to Sahaja Yoga are all very well employed, very happy people.

It all works out because your attention becomes enlightened, attention becomes concentrated, it doesn't fritter away. It doesn't take your mind here and there and you see the right thing at the right time you become a personality of great penetration. You don't do anything as such in the sense you don't react but this attention itself act and works for you. You must know that we are

not only ordinary human beings and as great saints *[UNCLEAR]* some of them educated people but what was so great about them, that there were one with the Divine power. They had this power flowing trough out and they were so dynamic and you could see the dynamism within them.

This is, with your attention it happens. You know the absolute truth. If you know the absolute truth then how can there be any quarrel? Supposing you know that I am seeking down here, now you won't fight on this issue whether I'm here or not, because everybody sees the same thing.

So if you know all the absolute truth, you see, then there is no question of argument, no question of discussion, but everybody will know the same thing that's how there cannot be any wars either if all the people believe in the same thing. Of course in every country we have lots of Sahaja yogis I must say and there are also some politicians in Sahaja Yoga, some. If reaches the helm of affairs I'm sure the day will come, that people will give up the idea of war completely, no question having, any war, any struggle, any fight, or anybody putting up atomic bombs around. It all comes from the ignorance and the blindness of people who do not see that we are part and parcel of the whole but when it happens to you, that you become one the Divine then you are like a little drop dissolve into the ocean, ocean of joy.

Now joy is not like happiness and unhappiness it is singular. Once you jump into the ocean of joy, everything gives you joy. If it is ridiculous, you laugh at it, if it is sublime, you enjoy it. And the whole personality becomes

so beautiful and vibrant that it absorbs everything that is constructive all that is destructive is dropped out. You will be amazed that in Sahaja Yoga 50% people in the West who've had taken to drugs have dropped out who have taken to destructive methods have finished with it.

So many destructive habits *[UNCLEAR]* not give up have been completely given up by them. This is not because of any compulsion without any discipline or force but your own power of spirit makes you your own master, your own Guru and you see in the light of the spirit what is good for you what is bad for your. Nobody has to tell you about it, it just happens.

Now you saw this people *[UNCLEAR]* Western people singing it's a Marathi song written by *[UNCLEAR]* written by Namadeva in the 16th century all our villagers also sing. The way they were pronouncing you will be amazed, I mean, nobody can do it. It is very difficult for Western people to pronounce our difficult *[UNCLEAR]* languages, but they are the ones who are picked up not only the language but also the music. We were surprised from Romania three boys came, in two months time they started singing qawwali just like Nusrad Jaham. We were surprised how could they take to it so easily, I mean, you just become like a genius. In every walk of life it become so different, your stress and strain all these things drop out because now you are connected with all pervading power of Divine love, which guides you, which works for you, which helps you. All the time it's a blissful existence, which is your birthright, which you should have. In one lecture of course you cannot tell all you about it new because it is very, very deep down within you all these

things are sprouting and existing. But once you get your realisation you have to know that now you've become a collective being, for which I must say that you can't just do it that we are doing meditation at home, you have to come to the collective. Today it's a collective happening I'm talking of global transformation, for that this collective happening has to take place. Thus we can avoid all the struggles all the strives and all the horrible wars completely. There is no compulsion for anything, you, yourself know what is good for you and what it bad for you. I hope today you all get your realisation, you will if you desire definitely you all get your realisation no doubt but then you should not allow yourself to be just blown off for a while and then again you don't develop yourself. Is like a seed that grows slowly into a tree and you all have to grow into a tree which is not difficult specially Australians have specialty I've seen, they can grow very fast into their ascent in a very simple way and luckily we have very good centers here, very, very good Sahaja yogis it's working very well and I'm sure you all are going to enjoy your realisation and then your growth. For that you have to come to collective. Of course we don't have *[UNCLEAR]* greater *[UNCLEAR]* and things like that because, you see, we don't believe in publicity or marketing, it's your desire that you have to come humbly and get to know all about it. Is not mental knowledge but is knowledge on your central nervous system.

So many things are happening here I was told also that *[UNCLEAR]* has been given in some hospital in Australia maybe in Sydney where people could be treated with Sahaja Yoga. For which you don't have to take medicines,

you don't have pay to the doctors, nothing. That's one thing one should know that you can't pay for God, you can't, God doesn't understand money, He doesn't understand banking, it's your headache. He has no idea about all these things we have done to ourselves.

So best thing is to remember that only you have to give some respect to yourself realisation, respect yourself, love and compassion for yourself and forgive yourself. That's one of the ways we can really understand that we are human beings at the epitome of evolution and we have to achieve this in our lifetime. It is such a tremendous luck that at this time at this juncture you are here.

You should get your realisation and grown into it.

May God bless you.

It's very simple as I told you, it has to work fast. It has worked very fast these days. I was amazed that *[UNCLEAR]* there was 76,000 people and it worked out in five minutes, I was amazed how things work out these days, it's getting faster and faster. First it used to takes hours together, but not now.

There are conditions, which are very simple. First as I told you please forgive yourself. People must have told you that you are a sinner or this is wrong, that wrong and we develop guilt. Also it's a fashion I think to develop a guilt for everything. Now supposing we do not follow any norms of this modern life.

There are also some stupid norms you see and if you do not follow any one of them then you start feeling guilty, “I should have done this, I should have done that." But we don't know how we harm ourselves by feeling guilty.

This center on the left hand side gets into problem. When this center gets into problem, minimum off minimum we might develop *[UNCLEAR]* on the physical side. Then we might develop a disease called harsh disease angina, then also we might get all our organs *[UNCLEAR]* all the organs can become very lethargic.

So to feel guilty is also a nonsense if you see because whatever mistake you have committed is passed and at that time you should have corrected it, but what is use now feeling guilty about it and torturing your self? Whatever you have done is finished and gone! At least for mother, her son is never guilty. In the same way *[UNCLEAR]* in the eyes of God you are not guilty.

So you have to say in your heart, you can call Me Mother, or Shri Mataji, Mother I am not guilty at all. The another simple thing to do is as you have forgiven yourself you forgive everyone. Even without thinking about it. Because logically whether you have forgiven or not forgiven you have done nothing.

What are you doing? “I don't forgive” means what? Means that I am torturing myself all the time, all my life for somebody who is enjoying himself. We play to wrong hands if we don't forgive. But by that, what happens to our Chakras? That this center *[UNCLEAR]* in the crossing of the Optic Chiasma like this, absolutely constricted. Absolutely constricted and unless and until you forget it won't open and all and the Kuṇḍalinī cannot cross over. This is the last barrier we have.

So just forget and forgive all the people in general if you want. Don't think about them because that's also a

headache to remember whom you have to forgive. They don't deserve that attention.

So just forgive all together, you will lighter even now immediately just forgive everyone. These are the two conditions I think are not so difficult.

Third one is you have to take out your shoes. But I hope you don't mind because in England first time then I said, “You have to take out your shoes" half of them walked out. All shoes because this Mother Earth helps us a lot. She sucks in our problems. *[UNCLEAR]* doesn't matter. These hands towards Me like this. Just like this. Now please put your right hand towards Me like this and the left hand on top of the fontanelle bone area, Tālu, which was the soft bone, on top of your head and put down your head as far as possible. Now please don't put it on top, but away from it. Now see for yourself, please put down your head. If you want, you can take out your spectacles. Now, see for yourself if there is a cool or hot breeze like vibrations are coming out of your fontanelle bone area.

Some people get it little far away some get it quite close. Now, don't feel guilty I can feel your centers, out of which this guilty business is quite a lot. If it is hot, then you should know, you are not forgiven yourself and, or you are not forgiven others, so please forgive now. You can move your hand it may be close to the head maybe away from it, depends on and move your hand and see for yourself. Now, please put left hand towards Me and please put down your head and see for yourself on top of your head on fontanelle bone are which was a soft bone in your childhood. See for yourself is that a cool or a hot

breeze coming out of your brain, out of your head. Here again, I would request you to forgive yourself and forgive others, please that will definitely help.

Now please take your right hand towards Me and now see for yourself with the left hand on top of your head if there is a cool or a hot breeze like vibrations are coming. Actually you have to desire it, is not meant for arrogant people but meant for humble who want to have their self realisation you have to humble down. Hmm. Now please put both your hands towards the sky like this and put back your head, push back. Here you have to ask a question in your heart, three times anyone of these questions you can ask three times, `Mother is this the Cool Breeze of the Holy Ghost?' or `Mother is this the all pervading power of Divine love?' or `Mother is this the Param-Chaitanya?', ask anyone of these questions three times in your heart, push back your head and push your hands. Now please take down your hands. Now, if you can put both of your hands towards Me like this. And watch Me without thinking, just watch Me without thinking. All those who have felt Cool Breeze on the fingertips or in the center of the palm, or out of the fontanelle bone area, whether hot or cool, please raise both your hands. My goodness.

I bow to you, all of you have felt it. Which is very great experience for Me.

So may God bless you all. Now your saintly life has started, so be careful, you don't have to give up anything outside, you don't have to renounce anything, it's everything there and you have become a saint.

So please respect your self realisation and develop it, so that you can help your self and help everyone around. I must tell you I was surprised that there was a good center started in Israel and the people who started where Germans and Austrians. It was such a feeling of joy for Me that look at these Germans they feel responsible for the Jews there want Israel to give them realisation, such love and such compassion, such transformation that you enjoy your virtues, you enjoy your self.

May God bless you. May good bless you. May God bless you all.

Contents: 1996-03-05 **Talk to Sahaja Yogis, before Departure to Taiwan, Airport, Sydney, New South Wales, Australia**

[It is always a pleasure to meet you all, “But this time I felt you are very much in the Ocean of joy, enjoying your selves. That is the greatest satisfaction for Me. The best way to feel your joy is to give realisation to others. That is the real echo you get of your voice of truth." As in other countries, you are also going to different places, to villages, to different neighbourhoods and talking with full conviction about Sahaja Yoga, how it has changed your life and how you have been benefited, with genuineness, you can do a lot for your country by transforming people.] [Sahaja Yoga has grown up in Australia.

Sometimes there have been individuals who have tried to harm us, but no one has tried to harm Sahaj Yoga. Those who have tried to cause trouble have quietly left Sahaj Yoga and disappeared. This time someone did try to cause trouble, but the Yogis should not be disturbed by

such occurrences, or by such horrible people.] [Burwood Ashram has become too small. Shri Mataji is willing to donate to Sahaja Yoga in Australia because people want to buy a plot of land for an ashram. However, thee are so many Yogis and they are all earning, so it is important that they should donate as well.] Everybody must cooperate..... Nobody is going to force you, nobody is going to be compelled..... but it's for your own satisfaction..... Everybody should feel responsible for Sahaja Yoga..... if you don't feel responsible individually you cannot enjoy. Individually there's no joy for Sahaja Yogis; only in collective feeling you can have it.

[When the Ajanta caves were built, it took eleven centuries to make them. One generation after another enthusiastically kept building it despite the fact that they had never even seen Buddha, or talked or written to Him, but they were very dedicated. They stayed in that remote place, generation after generation, creating what is now one of the wonders of the world.] [So you have to understand, as realised Souls, you can do a lot through your desire and dedication.

You have to always ask yourselves what you are doing for Sahaja Yoga and realise how much Sahaja Yoga has done for you.

So the way you will enjoy is by knowing that you are working something out for Sahaja Yoga.] [The leader has been very careful, sensible and kind, but now there should be very dynamic leader because many will be coming to Sahaja Yoga. “You'll have to deal with them and when you are dealing with them remember that you are Sahaja Yogis, not to lose temper not to get angry

with them. Be kind to them and also try to talk less and do more, raising their Kuṇḍalinī. Don't touch them. That's not necessary."] [Shri Mataji then spoke in Hindi to the Indian ladies.] I was just correcting them and telling them that they should keep to their own culture.

[Some have started talking like American women, very rude. In India women are especially humble and the language is very compassionate and docile which makes others feel comfortable, but the American culture drives people mad and those who adopt it will also become mad. We don't want that culture. “We want a very compassionate, good, kind and beautiful culture" through which others can learn and our children can grow properly.] In every way it's much helpful you are humble.

[It is a joy to see how very humble the Australians have become. Australians used to be horrible, drinking so much and speaking in a way no one could understand. Now you are beautiful like lotus flowers which have “come out of this mixed, up confused culture and you should be the ones who should represent this, our Sahaja culture".] [There are still many funny things going on in the society at large. Meta Modern Era describes how we have gone wrong in Western life. This will help us to understand the problems.] I wish all of you a very good, prosperous, healthy Sahaja life and to your children... Sahaj Yoga has taken very good roots in Australia because it is Śhrī Gaṇeśha's country. His blessings are working.

[You should help those who are sick or need help.] Try to understand how to cure them..... Don't touch them. You

can take bandhans before doing anything any you'll be protected.

So may God bless you all.

Contents: **1996-03-0x Observations by Shri Mataji during Her Visit, Taipei, Taiwan**

[Shri Mataji now is short listed for the Nobel Peace prize.] [The new Australian president is a good person.] [Li Peng is a good man. He sent his cultural attache in Austria to meet Shri Mataji, who advised Her to approach the Chinese officials through the great medical benefits of Sahaja Yoga.] [Shri Mataji is not very happy with the American public because they are not seeking spirituality as other countries are. In the U.S., only the college education is still a very dynamic program; otherwise everything else is coming down.] [In Beijing at the women's conference last September, She received a red carpet treatment. The driver always protected Her head when She entered the car and he even came to attend to Her on his wedding day.] [Shri Mataji was asked about Deepak Chopra from TM who copies Sahaja material and sells it. She said that this should be made public.] [People who are catching both on the right and left sides should use a candle in front of the Photograph, keep their eyes open and foot-soak intensively. They should also say the Nirvichara mantra. In general, Sahaja Yogis should use the Śhrī Nirvichara mantra to get into thoughtless awareness quickly.] [When asked what to do about tensions, Shri Mataji responded, “You must meditate. In the morning, night. Give bandhan".] [Calcium can be used as a right side treatment to cool the body. However,

this should be done discreetly as the sodium-calcium balance in the body is very delicate.] [During dinner one evening, Shri Mataji noted that beef creates swelling of the gums because of the antibiotics and hormones that are put into the animals.]

Contents: 1996-03-08 **Talk to Sahaja Yogis, on Arrival, Furama Hotel, Hong Kong Island, China**

[Shri Mataji first requested photographs of all the Yogis with date of realisation, birth and names. She said that there will be many more yogis after this year's, Public Program, as there were also nice articles in the press. She then gave advice on how to handle new people.] Now the way You handle them is very important. We have to be extremely kind and patient with them, not to say you have these Chakras and bhoots... That will frighten them. But You should know yourself what Chakras are catching among yourselves. We should talk in Sahaja language, so that they don't feel embarrassed or hurt, because you know so much about Sahaja Yoga.

The whole situation is very simple, that we are talking about love, the Divine Love. The Divine Love does not get attached to something. Love works for everyone and it is not attached, like the sap in the tree. It goes into the tree and supplies to every part of the tree and then evaporates. But suppose this sap gets attached to one flower or fruit, the whole tree will die.

So one has to understand that this is the birth of Divine Love, the power of love.

So we have to appear very lovable and we should not react. Just keep peaceful. Supposing they say something

bad, just keep peaceful. That way in Taiwan it will now grow faster. You have to have a very balanced way and a balanced life. There is nothing compulsory in Sahaja, but it happens automatically.

So one should not try to be harsh to anyone. Try to be kind and sweet and things will work out. And also you can write to Me whenever you have problems." [On mainland China and Taiwan:] Taiwan people have to understand that with a giant like China sitting there, you cannot live separate. They could always eat you off in no time. But the best way is to understand that they are Chinese and you are Chinese. To become one motherland is a good idea. Of course, mainland China should like to keep Taiwan as it is democratic and keep you the way you are.

But these [local] politicians, they are the ones who are ambitious. That is why they want to retain power for themselves. That is why they want to separate, so they can go abroad, you see, they can enjoy the power. It is dangerous, very dangerous.

Our country [India] was divided into so many parts. First was Burma and the people who asked that they should get Burma became the dictators, horrible dictators and there is a big problem for the people there. I do not know how they are surviving. Now if they would be with India, nothing we could have taken away from them, but they could have been protected and guided better. Then there is Bangladesh where they are the poorest now. Then we have, say Pakistan, no growth, no industrial growth. They are just fighting all the time. Thin we have Tibet, also now gone to China.

So division does not help in any country. It can never help.

The people of Taiwan should say that we will accede to China, but they should keep our democracy intact. The I growth of this country gave Me tremendous joy, but it is very Westernized, while China still has the Chinese culture. You will prosper better with that culture than with this Western culture. You do not need to form any political party. You do not have to form anything. But you should desire that people have more wisdom. All the children, all the people can be killed in a war. War we do not want. I like the Chinese, even from the Mainland, they are very nice people. As long as you respect them, they are very nice..... We must understand in ourselves what we want is nothing but somehow to become one with the Mainland.

Sahaja Yogis should take to wisdom and not to extreme sort of ideas. Don't worry, no war will come.

Nothing can happen to you.

So now be happy, nothing will happen to you here. Thank you very much.

Next time I come I know I will see many more.

[Shri Mataji vibrates sugar with Her hands and water with Her feet.]

Contents: 1996-03-10 **Talk to Sahaja Yogis, at Breakfast, Furama Hotel, Hong Kong Island, China**

[The next day over breakfast Shri Mataji spoke about predictions and said that She had predicted many things which have now been proven. The protein cells which trigger cancer were predicted by Shri Mataji more than

twenty years ago. Diseases like AIDS and other diseases She had also spoken of twenty years ago. She said that all of Her predictions would be proven within twenty-five years and had to be within the lifetime of the yogis so they would have more meaning. She said that She was very practical.] [She went on to describe the predictions of people like' Nostradamus, saying that they were very vague and not very accurate. She said that he was only concerned with wars, calamities and political predictions, a very limited perspective. The accuracy of such predictions is questionable because they were very general and open to interpretation. There was a great sage called Brighu Muni who had prophesied Shri Mataji's advent, describing how the Ādi Shakti would incarnate and give moksha to Her devotees. The activation of this power would be in 1970 which is when Shri Mataji opened the Sahasrāra. The great sage worshipped Lord Shiva and when both Shiva and Pārvatī appeared before him he only wanted to do bandhan around Lord Shiva. Śhrī Shiva said that He is one with His Shakti and the Goddess is absorbed in His body, with one side of His face female and the other male. The great sage was very obstinate and still refused. Finally, using his powers he turned himself into a beetle, entered Shiva's navel and circled only half of Lord Shiva's body.] [Shri Mataji also spoke of Śhrī William Blake and how his predictions about Sahaja Yoga in England were very detailed and have all come true. One described a house above a brook and a bridge shaped like a boat. In one of Shri Mataji's houses, when the foundations were excavated, a brook and an ancient bridge shaped like a ship were discovered hidden

under the house.] [She explained the past and future and described it in a sketch. She drew a circle and said that we were at the top of the circle. The future was coming in a clockwise direction and the past was moving away. After realisation we moved above the top of the circle so that our perspective was wider. She said that it was much easier to know the past than to predict the future. Shri Mataji said She is far above the circle and can see everything.] ***1996-03-10*** Talk to Sahaja Yogis, at Breakfast, Furama Hotel, Hong Kong Island**, China**

Contents: 1996-03-10 **Talk to Sahaja Yogis, before Evening Program, Furama Hotel, Hong Kong, China**

So many questions, you see... Now, most of the questions are coming from people who doubt. Can you translate it? In Sahaja Yoga best thing is to practice what is said and then see for yourself, but if they're coming I would like to tell them about it.

Now the first one is about vegetarianism, somebody's asked. Who has asked about vegetarianism? Raise your hand. Ah, you, all right. Now, I said that there should be, there is no question of vegetarianism; whether you are a vegetarian or not makes no difference to your meditation. But for people, you see, the food is only important because supposing you're Chinese, you eat too much of fish and all that.

So to give it a balance, if you become a vegetarian more you'd be better.

It's a question of balancing, but those people who eat too much of, say, vegetarians, like in India, they should take

more to non-veg, or to proteins; it's a question of carbohydrates and proteins, it's not question of vegetarianism. Now to say that Buddha was vegetarian is not true; it's false. Because how Buddha died, you know? Buddha died when he went to a disciple who had killed a wild boar and the wild boar is allowed to leave for some time and then you should eat the meat. But he was in a hurry, so they didn't do that and he ate it and he died.

Now the problem with all of you is one, always, like whether you're Christians or Buddhists or anything, you're all conditioned background. To you Buddha is everything. What did Buddha do for you? Where is he? What is he doing? What did he do for the Buddhists? Did he give you Realisation? But you all are like that, even the Christians are like that. They're so much conditioned by Christ. You see, they are either Christ or Mohammad Sahib or someone like that, but I'm sitting before you. They're not here.

Who has given you Realisation? Try to understand.

So why be so much conditioned by Buddha? Buddha was never, never was a vegetarian; he died because of that. He ate that meat and he died; so it's a wrong idea that Buddha was a vegetarian. It's all myths they're going about and there is no need to be vegetarian; if you are suffering from too much of protein intake you should take to vegetarianism. It's good for you if you have that problem and in China eat so much of, say, fish.

So they should take more vegetables with it, not only the fish because with fish you have phosphorous.

Now do you know about your genes, we have a database of the genes. There are three things, carbohydrates,

there is phosphorous and there is nitrogen. Nitrogen is good for your health, for your ascent, for everything. But what happens? People eat too much of proteins and fish and all that; then they create more phosphorous, they become very right-sided, their eyes are spoilt and the whole balance is lost. Do you follow the point? The balance is lost; so what you have to do...

So the people who are eating too much of phosphorous must take to carbohydrates.

So it will suit some people who are eating too much of proteins or too much of phosphorous should take to more vegetarian food, will help; but it's not the way we should judge it we start by taking vegetarianism will become a realised Soul, you cannot.

Some people it will improve the meditation, with some people it will not. For example Me, I can't take vegetarian food for more than two days, I get diarrhea, sympathetic. I just get diarrhea, I cannot eat. I cannot also eat all the time fish, I have to eat a very much of protein food. You see for the Goddess they offered a lamb or sometimes a goat, this is the reason She has to take proteins. This is what it is that She has to take proteins and somebody has to take, say, more of carbohydrates, they should take. But it doesn't suit everyone.

“We learn that several Gurus in Hong Kong..." Who is this Sarah Lee? All right. “We learn that several Gurus in Hong Kong promote their exegeses free of charge and promise the followers that they can get rid of their Karma once they give their faiths to their Guru as they are also promoting internal peace and transcendence and they do not charge for anything. What are they aiming at?"

They're just aiming at controlling you. Just they want to control some people, that's all; it's a power game and that's what they want to do, it's a power game. And I'm sure at certain point they must be taking money also. Now the thing is if they were giving peace and they're talking about Karma.

I'm not talking of Karma. I'm saying you've to go beyond your mind and it has to be connected with scientific ideas, that you have to go beyond your mind. They never say like this, “We'll get rid of your Karmas." How can you? Who does the Karma? Ask them. Ask them five questions, they'll be all right.

They don't know about ego, they don't know about conditioning, they don't know about Chakras, nothing they know. They might be cheating you just, I mean it's just anybody can start something like that but what is the validity. Validity is that do they talk relevantly, do they talk about the inner side, do they talk about the Chakras, do they talk about the Kuṇḍalinī Now you have got your Kuṇḍalinī awakened; that should give you faith not in Me but in yourself. You have no faith in yourself, that's why you start thinking like this. If you have faith in your achievements, what you have achieved through Sahaja Yoga, you won't ask such questions. All right, so this is over...

There's somebody, a new yogini, she said she cannot believe in her own feelings. Who's this one, from Japan? Now see, there's nothing to believe in your own feelings, no question. You have to believe in your vibrations. You should see what sort of vibrations you get. Supposing you are very much inclined for something.

So try to find out of someone, try to find out on your vibrations, you can find out whether it is true or not. Because now you have jumped into an awareness where you know the absolute but it's not necessary that you have reached that state. But I'll tell you how to reach that state, it's different but just now as it is, you have to go beyond your mind. And that is what one has to achieve, all right? So how to go beyond your mind, that I'll tell you.

Now who's Pamela Ng? All right, well, she says that when she came first to meditation she was sleeping very well, it was effective after and all that and then later on she started... Now see, look, if you are just thinking about yourself, vibrations will go away. It's not given only for your benefit, it's given for the benefit of everyone. If you're just worried about yourself the vibrations will disappear. Because vibrations are there to give it to others, to work for others. If you're not collective enough, you cannot grow. If you do not dissolve into Sahaja Yoga you cannot grow. And then when you don't grow you go on falling down; you go on falling down, then you'll lose all these things.

So how many people have you given Realisation? That's it. First you start giving Realisations to others then you will understand that how joyous it is to give Realisation. It's not meant for you alone, it's meant for everyone, all right? “I believe that there are real Gurus and false Gurus in this world. If someone follows a real Guru but not Sahaja Yoga does this still do any good for him?" Who's this Christine? Now see, I haven't met anybody who's a

real Guru and who is giving Realisation to others, who may be real but he cannot give Realisation.

That's the point.

So what will they do? You see, they're very hot-tempered people mostly and they take you to task; they make you work very hard. I haven't seen anybody giving Realisation so far; if you meet anyone, let Me know. I'll be very happy, pass on.

Mister Ling, who's he? Now, this is interesting, the way you're seeing visions. Have you been to some other master before? No one? No? Now, you see, for this, best thing is to know about Tao which is your speciality, it's Chinese in which he describes, you see, Tao; Lao Tze describes the journey through the river Yangtze. I've been Myself to see that.

So he says on the side or the banks there are beautiful, very beautiful mountains and beautiful trees and it's so beautiful that you feel like jumping out of the boat and going to the, these gardens and these mountains. But what your aim is to go through this, Tao, means the Yangtze river, towards the river. In the beginning, maybe there are some currents flowing, maybe you might lose faith in yourself. But by the time you reach near the sea, it becomes very silent and you have to go to the sea, that's the point is.

So, you see, all these are there; these are just enticing... It's all right you see but it's nothing important because all these will keep you on a mental level. You'll be always thinking, “What is this vision? What is that?" There's nothing to be on the mental level, you have to beyond,

all right? If you don't see, you don't bother about it, they'll disappear.

These questions are nice. The first one is about confidence, you see and I'm going to tell you about meditation. If you do that kind of meditation you'll get back your confidence, all right? That's one point.

And then he says if there's anything like destiny. In Sahaja Yoga you decide your destiny, you don't have to depend on any destiny. Then it's true that in Hong Kong is highly polluted and lot of people get allergies and things like that. But Sahaja Yogis should take bandhans so they won't suffer with any allergies or anything. And also you can use something to cover your nose or something. I know people are smoking so much I Myself, I absorb so much of this within Myself, but this will all go away as far as you are concerned because you're protected, all right? But the first one I'll tell you later.

Werner, where's Werner? Now your eyes are suffering.

So very simple is that... All right now what you have to do... What is your digestion problem? You get diarrhea? Constipation. What is your digestion problem? Digestion, what is it? He's already right-sided. You're very right-sided person, you see and your eye trouble also come from the same. For the eye trouble that you are doing you have to put ice here, on the left hand side from here to here and also on your liver, all right? And your right-sidedness has to go, that I'll tell you how to do it, all right? This is a nice idea, that they come to your program and then they come to Pūjā and then they disappear. It's all right, now what can you do about it? There's no choice, if they want to disappear let them go away. We

cannot force them, but maybe, maybe some of the people do not have proper behaviour towards them, maybe.

So you have to be careful how you talk to them and how you approach them. You should not be aggressive with them and all that. Maybe some of the reasons could be that.

So that's very common, you see, they come and they go away. Because this is the time of Last Judgment. If they want to go to false Guru let them go because this is their choice. You don't have to worry on that point. But I think sometimes, sometimes they leave because they do not do meditation properly and I'll tell you what is to be done properly.

All right, now we have to go beyond the mind, as I said it that mind is a myth and we live on a mental level all the time. And that's why so many questions and so many things they come from your mind. If you reach a state where you are beyond the mind you won't have any questions because you will be there.

Because you're not there you're asking these questions. You are there for a short time and then you come down.

So how to be more on that level, I'll tell you. I don't have that problem. I can be all the time beyond the mind but for you people I've tried to find out why, how to make it, to keep you beyond the mind.

Now the best way I told people and it has worked wonders that when you are, wherever you are free, whether you are meditating or not, wherever you are freely standing or doing, try to see what is your mind is thinking. You separate, now because you're realised

Souls, you have to be, first of all, connected; if you're not connected you can't do this practice. But if you're connected to the mains then what you should do is to see that your mind is thinking. Now watch your mind. Ask the mind, “Now what are you thinking? Let's see, what are we to think?" And you will be surprised you'll go on watching and suddenly you'll reach a point that you have become thoughtless.

So always watch the mind. What is it doing? What is it thinking? What is it working out? And the mind will just not think because it cannot answer. It cannot answer a realised Soul, you see. But for that, you have to be beyond the mind; to begin with you should separate yourself from your mind. You ask questions to your mind. “Now let's see what are you thinking, sir. Where are you?" In the mirror also you can see, you shouldn't suffer from narcissism, of course not, but what you have to do is to ask.

You see, if you try to understand how to become thoughtless, the best way is to look at something, now you look at something, say, look at the flowers. Now immediately it will react, your mind will react.

Now you try to see what is your mind is saying. “I don't want to hear, no, I don't want to hear." Just say, “I don't want to hear anything. I don't want to know anything." You just want to watch, that's all.

Gradually you'll grow. You see, this is the system Zen. Try to do it, but it was such a thing, you know, that time, they were no such nice people like you, perhaps.

So he had to use other methods to make people go beyond the thought.

For example, I was telling just now about the tea ceremony. For tea ceremony, he would take a bowl of, say, freak, like a freak. Freak, you understand the freak? Freak is a thing which comes out by nature naturally in the cooking. When it is fried it becomes very funny type; that is the freak. It's not regular.

It's only one piece or something.

Somebody who's Japanese here, who's come from Japan? You? You people, they like, that's why freak very much, you see.

So, what he said that it is..., you take the bowl in your hand for tea ceremony, that's the best.

So first of all, you sit in a garden, with natural trees and natural fibres of the wood and all that, sitting down. Now you start watching that thing, three times sitting like this and three times like that. And don't think, that's the point, don't think. And then you take that tea; the tea is so sour, so bitter, take quinine raised to the power of hundred and eight. Once you take that, you become absolutely thoughtless; that's one.

Then they give you a sweet; this sweet is also sweetness, sugar raised to the power of hundred and eight. You just can't eat it, so you went from one extreme to another extreme; again you become like that, you see, it's like standing. They put this side and that side and suddenly it works out. But it's meant for people who already have got Realisation, not for people who have not got. That's why still they're studying Zen, you know, this tea ceremony. When we went to Japan, you see, in one hotel, they had arranged this tea ceremony and some Americans, they said one couple has to come, they were

fighting, “I'll go, I'll go." We have had the experience, so we were keeping quiet, to see what's going to happen.

And one couple came forward and knew they were very jealous of them. They sat on the stage and then they brought the tea; they make it with a very care and all that and gave it to the wife. She drank it and she was stunned and then they gave it to the husband. Her husband, you know, American after all, he got so angry he threw the bowl. He said, “Damn it! You took so much money from us and what are you giving us?" He gave all kinds of American abuses to them and they came away and everybody started beating the people who had put up the show.

So this is meant for people who really want to go very deep. In Zen we also made a big courtyard filled with sand, with some sort of designs in the sand and they put some stones in it. You are supposed to sit on the edge of that and to look at it without thinking. But normally people start comparing, “It looks like ships, it looks like this, it looks like..." No, you have to just look at it without thinking. There're many such things he did but nothing worked out with them. There were only twenty-six people who got Realisation in the Zen system in the Sixth Century. From the Sixth Century to the Twelfth Century and after that nobody got Realisation. But there were very few and that's why they don't understand Zen at all. You see, people write Zen because it's very deep and they don't understand; so that's what it is. Now Sahaja Yoga is understood, can be understood by normally educated person, by even uneducated people.

And this happens because actualisation takes place. Your Kuṇḍalinī takes an actual ascent.

Now in Sahaja Yoga when people come in, there're different categories of people also.

Some of them come because they think they can get good health; once they get good health they disappear. Then they again get some trouble, they come back, just for good health.

So you can't help, they have very limited desires. Then some people come in Sahaja Yoga for throwing their weight around, you see, showing off their ego, that, “I'm this” you see, trying to make another group, another this thing. You see, like that also some people come, it's very common, like a politics, you see. And they try to do it against the leader, against this, “This is wrong with him, that is wrong with him” and all kinds of things. Thirdly people come but they don't come regularly to Sahaja Yoga, they do not come regularly to the center. They just keep aloof and after some time they're lost. They again get some diseases or trouble, then they come back.

So it's a religious duty of all of you to come to the collective, one thing. The second one is to meditate everyday in the night before sleeping on your mind. Everywhere you go you should be in a meditative condition, in the sense, you should ask your mind what is it thinking. All should come to collective every time they have a program wherever it is. In Delhi you have seen people are really wonderful. There are so many people, at least about, I think two hundred people, of course we have a good center there; two hundred people, every

morning they come for meditation, every morning, look at these people.

So the quality, we call the Piṇḍah, so the quality of a person depends on how much you want Sahaja Yoga. You just want to have all the advantages, you want to do everything.

Like this lady, Sushmita Sen, she got the first prize, she's a Sahaja Yogini. She's a Sahaja Yogini and she meditates everyday, everyday she meditates and everyday she used to come in the morning to our ashram in Delhi. She's a great Sahaja Yogini, I must say, but now she's in Calcutta and there also she does the same.

So the children also, some who are...; this girl child is very highly developed child, this one is. I saw her yesterday, she's a born realised and she is the one, she must be meditating, I'm sure.

She is a very highly developed person; she's got it from her last life so she... This kind of children, there are many who are meditating or when they go to school also they become like that.

So you have to first of all worry about correcting yourself.

Now, you see, also another kind of people come in Sahaja Yoga they came, they made lots of money, this thing, that thing, see, the greed is on.

So if you still suffer from too much greed or hatred or you can call it pride and aloofness and all that, then you must know that still you have to work out. Or if you are very angry type or attached, some people are very attached to their children.

So in Sahaja Yoga they learn a lesson also from their children.

So one has to be introspective to see, “Are you just, are you satisfied?" Then you can certify yourself that you're all right.

There're so many types of people you'll meet but what you have to see about your own ascent.

So I've talked about God Realisation in My last speech in this thing, so you better listen to that lecture of Mine, for this Pūjā, for the Shiv Pūjā.

So one should not even have ambitions, when you have become a part and parcel of the whole, when you have become the ocean, what is there to be ambitious? It's all individuality.

You have to be a satisfied soul and I would say about Myself that I have to buy for My children, for My husband, this thing, that thing, but I never buy anything for Myself, very difficult, very difficult to buy something for Myself. And somebody says that, “Mother please what will you have?" I don't know what to say, what should I have. I asked My daughter, “You make all kinds of things for your father, what about Me?" So she said, “You don't like something in particular, what to make for you, you tell us." All these attachments some people have, got attachments to clothes, you see, “What I'll wear tomorrow, I'll wear day after tomorrow” like that. But so spontaneously whatever is available you can wear. And some worried about their past, you see, “I'd a bad childhood” this, that and they write about their parents; it's all nonsense, forget it, you be in the present. Now you are no more a seed, you have to grow.

That is something one has to understand in life; that if you have to grow ourselves then what we have to see within ourself what lies, whether that is doing wrong. That is something missing.

Best is to see the good points of others, not the bad points. By that you will gradually develop more good points within yourself. Competition should be in good points.

So on one side you have to achieve your Self-realisation in a way that you put yourself beyond the mind, one way, through meditation. And the second way is to give Realisations to others. And must attend collective meditation, very important.

You have to be active in it. If you are not active in Sahaja Yoga then you lose your vibrations gradually because Divine thinks, “What's the use of giving to this hopeless case any vibrations." So you have to work it out, understanding that now you are chosen as the instrument of the Divine. It is not only for your health or for the health of your family or for anything like that. But it is for the good of the others.

That's how you'll all go very well.

Now diffidence comes through your mind only; mind only gives you diffidence.

So to overpower this mind, you must watch and tell him to shut up. Must tell him to shut up. Then you will rise. The proof is that you feel the vibrations. Now, if you ask Me I find the people in Hong Kong are rather right-sided, most of them.

So you have to do right-sided treatment for yourself. Every night, about ten minutes, at the most, you have to sit with your right hand towards the photograph and right foot in the water, with a little salt. Normally use cold water, ice also is good but cold water normally but if it is very cold outside, you can use warm water. In this hand [left hand] you must take ice and put it on your liver, right hand towards the photograph. Now, then after that you can put the ice over here, put your hand there. If you do it everyday your stress will go down, everything will be perfect, just sit like this, just now. Heat is going down; no, no, no, put right hand towards Me and the left hand there. You're left-sided, you're not right-sided; you have to use the candle treatment, all right? Now some people have both problems. Then you have to put a candle in front of the photograph, put both the feet in the water and sit like this and in both the cases don't close your eyes. You should put your attention on My Āgñyā, it'll be very good for you, for your ascent into the realm of thoughtless awareness.

As I love you try to love Me, that's the best thing.

Lastly, you see, in Sahaja Yoga people come in, they think it's a sort of a contract with us that we should look after them, their health, their jobs, their everything. This is absurd. The contract is between yourself, with yourself. You have to work it out, all right? This is what it is.

So if the mind is asking questions ask it to shut up now. Mind is the worst thing, it is standing between you and reality. [Hindi.] Now whatever it is, like yours, you see, you give a bandhan to your husband; ask everybody to give a bandhan to him just now, you can give bandhan to

him, her husband, Atul is his name. Just give him a bandhan. See, it will work out, you can help, all of you can help. You can help the whole world but you have to be strong, you have to have the energy within yourself. Ha! Good, very good. This is Sahaja Yog, it's cool.

So try to remember what is your real problem; you're right-sided, all right so just try to cut it off.

I'll be happy if you could learn some English because I can't learn so many languages. Deities only understood so far only Sanskrit but now they understand English, thank God! It's a great credit for the English people. But still English language very limited, very limited. For example “spirit" word they will use for the Ātmā, they will use it for alcohol, also they will use it for the dead spirits. Such a language, what can you say, what can you explain. And the French is the worst, French is the worst because first of all if you speak French you catch on Viśhuddhi. And also in French there are many words missing, of course “spirit" is missing though, no doubt, but also the word “awareness" is not there.

So now I think everybody is happy. Let's have some music.

[The program continued with bhajans.] [First Sahaja Yoga Chinese song (a bhajan) is sang:] In my life, the most beautiful moment; The lotus is in blossom, Your gentle steps are there in the flower, Awakening our compassion.

My heart is filled with joy, don't ask me what sorrow is, The happiness in my heart is forever our own.

[SYNOPSIS!] [Some advices might be from prior visits.] [Pregnant women should not look at lunar or solar eclipses. Their babies born might not be normal.] [If there are many Sahaj Yogis in Malaysia it will come a cooler place.] [If the Indians in Malaysia take up Sahaja Yoga, it will help work out Sahaja Yoga in Southern India.

[Most of Malaysian Indians' forefathers came from there.] [This year, Shri Mataji said that Malaysia's greatest problem will come from pollution. Our Divine Mother advised us to put our attention on this problem and also to carpool.] [Problems can be solved with faith. Write it down and put the letter in front of the Ādi Shakti's photograph. The problem will be taken care of by Param-Chaitanya.] [Our Divine Mother also suggested we start a school for our Sahaj children.] [When asked which part of the Virāta we are, She explained that Malaysia is a very small country and is not any particular Chakra, but we are on the left side, like India and China.]

Contents: **1996-03-1x Advices, Informal Gatherings, Kuala Lumpur, Malaysia**

[The death sentence: in 1996, there was an article in the papers about someone who was found guilty of drug trafficking in Malaysia and was given the death sentence. Our Divine Mother said it was very harsh. I said maybe because of the death sentence, the drug problem is not so bad among our youth both in Malaysia and Singapore, as in other countries. Shri Mataji said that even though what they [drug traffickers] had done was wrong, a life is very precious and should not be taken away just like that. Instead we should show them that they were wrong,

rehabilitate them, teach them and give them a chance to correct themselves.] [Division of countries: in 1996 there was some tension between two Far Eastern countries and it was reported in the news. Shri Mataji looks at a Sahaja Yogini and asks whether they should stay divided or be reunited. Sahaja Yogini is at a loss for words. Shri Mataji then explain that it is not good for countries to be divided and gave the example of India after independence. She said that they would be much better off united.] [Princess Diana: one morning in 1996, the news carried an article about the late Princess Diana's confession that she was involved with someone. Shri Mataji explains that Diana should have known who she was and her position in life. She should not have reacted to her husband's ways but kept her dignity and chastity. Women must not take the attitude that what the men can do we can do too. Shri Mataji says the women should be able to absorb everything. Women are the ones who hold everything together.]

***Contents: 1996-03-12*, Public Program, Kolej Damanasara Utama Hall, Kuala Lumpur, Malaysia**

I bow to all the seekers of Truth. At the very outset we have to know that truth is what it is. It has been, it is, it will be. You cannot change it; you cannot transform it. Whatever I'm going to tell you today, you also should not take it for granted, because we've had lots of problems with blind faith. If it proves, then this is like a hypothesis before you, then as scientists keep your mind open and if it works then you have to accept it as honest people. Because it is for your benevolence, for the benevolence

of your family and for the benevolence of the whole world.

I'm talking here about the global transformation which is very much needed today because this is a special time, they call it as the Last Judgment or in Koran is described as Qiyamah. In the Resurrection time, I call it as the blossom time when many people have come on this earth to seek the truth.

The first thing you have to know that you are not this body, this mind, these conditionings, this ego, your emotions but you are the pure spirit. In the evolutionary process you have become a human being; you have the human awareness but you don't have the knowledge about the absolute truth. Everybody has a different idea and everybody propagates that idea. While doing that you can argue, discuss, find, quarrel and also we have wars but if all of us see the same thing as truth, we will never be able to argue, as you see Me sitting here, you know I'm sitting here. In the same way if you know absolute truth there cannot be any difference of opinion.

Now there is already an arrangement already made within us by the Divine power which is the second truth about which we are not aware. See how many flowers there are and so very beautiful they are. All over Kuala Lumpur you find such beautiful trees; it's a miracle. You don't think about it; you take it for granted. Who does this miracle? If you ask a doctor, “Who runs your heart?" He'll say, “It's autonomous nervous system." But who is this `auto'? Who runs the heart? So there is no answer for him.

Thus we have to understand there is some power who does this thing; and this is the power I call as the All-pervading Power of Divine Love. This power has been called by different names. In the Bible it is described as the Cool Breeze of the Holy Ghost, also as the All-pervading Power of Divine Love. In the Indian scriptures it is described as Param-Chaitanya. Also in Koran it is described as Rūh. This power is all-pervading and permeates into everything but we have never felt it before, this power and that is why we do not know anything about ourselves. See this instrument that is here; if it is not connected to the mains, it has no identity. In the same way, if we are not connected to the mains, we have no identity. We may find as something, we might say we're Indians, we're Taiwanese, we're Chinese, we're Christians, we're Muslims, we're Hindus. But we are not yet connected to the mains; unless and until you are connected to the mains, you do not know the absolute truth about yourself.

It is said in all the scriptures that you have to find yourself; even in Koran it's said if you don't know yourself you will not know God Almighty.

So talking about God, all these lectures are of no use. First of all you all should be connected to this All-pervading Power of Divine Love. You've already heard about the subtle system that is built-in within us. Now this power of Kuṇḍalinī is in the sacrum bone; that means the Greeks knew that this was the sacred bone, that's why they called it sacrum. Now this power is the one who is your own individual mother. She loves you. She is the store of all the knowledge about you and she's just

waiting to give you your second birth. Every human being has got this Kuṇḍalinī. It's called as Kuṇḍalinī; Kundala means a coil. It has got three and a half coils within itself of energy which has to rise to be awakened and has to go through, go through the six centers to pierce through the last one here which we call as the Fontanelle bone area or the Brahmarandhra. Then it gets connected with this All-pervading Power. This power is the one that is the ocean of love and compassion.

Now this Divine Love is not the one as we understand love which is limited. It's like the sap in the tree that rises, goes to the various parts of the tree and supplies the sap to the flower, to the fruit, to the branches, to the leaves. But it does not stick to any one flower or any one fruit; doesn't get attached to, because if it does that then that flower will ultimately die because the tree will die.

So this kind of attachment is actually the death of love. This Divine Love is all-pervading and is looking after us in every way; it protects us, it creates miracles for us.

So many scientists have described that they get suddenly a kind of a suggestion from somewhere so that they can find out or research something about which they have no idea. Even Einstein has said that he was tired of finding this theory of relativity; he could not do it.

So he was so tired and sitting in a garden, he was playing like a little boy with soap bubbles and suddenly the theory of this relativity dawned upon him from somewhere, he doesn't know from where.

So this All-pervading Power has done all the miracles. Lord Buddha got his realisation through this power only.

And Jesus was using this power to cure people and healed people.

So those who are connected with these powers are the ones who are realised Souls, enlightened people.

Now when it happens that you become one with this All-pervading Power, so many things happen to you. First of all these centers that we have within us, different centers, they are all responsible for our physical, mental, emotional and spiritual being. They look after these.

So when this Kuṇḍalinī rises she nourishes them, she integrates them, she brings them together. And that is how first thing that happens to you then, you get cured of diseases which can be also incurable. In Delhi university, we have four doctors who have got M. D. They have got their M. D. in Sahaja Yoga for curing some incurable diseases; but it happens through your own power, you don't have to take anything for that, no expensive medicines and all that. It has cured patients of cancer, all kinds, hypertension, diabetes; all kinds of diseases have been cured by this power that is within you. This is the power we have never used so far.

So when it happens to you that you become connected with this All-pervading Power, you can feel on your finger tips these cool vibrations, we can call the Cool Breeze-like sensation on your finger tips. Now these are responsible for different centers, so you don't have to go through the whole rigmarole of diagnosis, even a child can tell you what's wrong with you. It's so simple.

Another thing that happens to you that apart from curing you of your ailments, that a person who has many qualities in him, many potential qualities. For an artist he

becomes a great artist. If he's a musician, he becomes a very big musician. Those who could not speak, had stage fear become great orators. They become writers and we have so many people who achieved great heights by Sahaja Yoga. Even the children who could not do well in their classes have become extremely brilliant, they stand first class first. I'm not telling you just the story, it's a miracle, but it happens, no doubt, it happened. Now if you see that the part of the brain that we use is very limited; but suddenly the light of the spirit enlightens the brain and you start understanding many things and doing many things without much difficulty. Actually you become extremely dynamic, very dynamic, at the same time, extremely compassionate.

Now our problem starts from our mind. Those people who think of wars and fighting, violence and crimes, it all comes from the mind. Now this mind is a myth. If I tell you you should not be shocked, though Lao Tze has said that it's a myth, it is. The mind is something that we are creating by reacting to outside. It's like the bubbles of our thoughts that we get out of our reaction outside through our conditioning and through our ego, this mind is created. We depend on this mind as we create, say, the watch and we become slaves of watch; we create the computer, we become slaves of computers. In the same way we depend on this mind so much. But mind is keeping you out of the reality. All the horrible things people think about or create comes out of the same mind.

So one has to transcend, one has to go beyond this mind; that is the reality, that's where the reality is. Now

normally what do we do? We're thinking, thinking, thinking; worrying, worrying, worrying. We're thinking, the thoughts rise and fall off, another thought rises and falls off and we're jumping on the cusp of the thought, all the time, on the cusp of the thought. We are either in the future or in the past; we cannot be in the present. The past is finished, the future doesn't exist.

So you have to be in the present where there is reality, but we cannot stop our mind in the present.

So the only way is to go beyond the mind.

Now this Kuṇḍalinī does wonders that when she rises, she elongates those thoughts and between these two thoughts or many thoughts the space is there which is the present.

So you become thoughtlessly aware; you're absolutely aware but you're thoughtless. You're absolutely peaceful. Many people talk of peace, I have heard of so many are awarded for peace but they are extremely hot-tempered people, I've seen them.

I met so many of them, they're very hot-tempered; if you've to meet them better take a barge pole in the hand. It's horrible they are, you can't talk to them; but they get awards for peace, I don't know from what angle they get it. If you don't have peace within how can you emit peace to others? So the only solution is that human beings should reach that stage where they're absolutely peaceful within. It's like this, if you're standing in the waves of a turbulent sea then you are frightened. But supposing you get into a boat then you can watch all that great fun for you; but if you know how to swim you can jump and get the people out of their problems. This is

exactly what happens; first you become thoughtlessly aware and then you become doubtlessly aware where you become yourself equipped with all the powers of a Divine personality. First of all when you become peaceful, you become the witness; witness of the whole drama going on. Just witness, when you become the witness all the powers that are there of the Divine which are miraculous powers start flowing through you and you are amazed how things are solved; how you can solve the problems, not only your own, of your society, of your country but of the whole world.

Human beings don't know how great they are; they don't know how glorious they are, what are their powers, they have no idea about which, so what happens to them is that they are all the time trying and to run after something without having any evaluation of them. Like in America, when I was in Washington some people came to Me, said, “Mother, we have lost our house, we lost our children from the school, we don't know what to do." I said, “What happened? What did you do?" They said, “There was one gentleman who came as a master and he said that `I can teach you how to control the minds of others.' " I don't know what is the need to do that but he'd said so.

So what he did is to ask somebody from the audience and called him and said that, “Now this is a pendulum and this man will take this and I will make him move the pendulum." And after some time he started moving the pendulum. He was so much impressed by that, that he really fell at his feet and he gave him all the money, everything, whatever he needed. I said, “Is that the value

of your being a human being? Have you come on this earth to move pendulums? Ask yourself, why are you on this earth? What is the purpose of your life? Just to move pendulums you gave all so much money?" Then they realised but it was too late; they're already lynched and many people are lynched like that.

So one has to understand that to get your Self-realisation you cannot pay. You can pay for the hall, that's different but you cannot pay for your Self-realisation; for your Self-knowledge, you cannot pay because the Divine or God Almighty doesn't understand money. This is our headache, banking, money, insurance. It's not His headache.

So we are sadly mistaken when we think we can purchase the Divine knowledge or we can purchase Self-realisation, you cannot. If you put only one criteria, I tell you, most of your conditionings will drop out. The conditioning of human being have led them to all kinds of nonsensical things. If we could be free of these conditionings we'd realise that we have been drifted into something nonsensical, we're doing something nonsensical. This is very important that we have to go beyond this mind which is created by our ego or by our conditioning.

So to go beyond it is only possible if there is the awakening of the Kuṇḍalinī.

Like a seed you put it in the Mother Earth, it sprouts by itself; what do you do, you don't stand on your head, you don't pray to Mother Earth, she doesn't understand money. It sprouts by itself. How? It sprouts because it has the built-in capacity to sprout. And the Mother Earth has

the built-in capacity to sprout it. It just happens spontaneously, Sahaj. Sahaja, Saha means with, Ja means born. Born with you is the right to get this Yoga, is the union with the Divine, is born with you. But you're conditioned, you don't want to give up whatever is mythical; so you continue with it and you land into difficulties.

Now, luckily these are days, special days when people are searching; it's already predicted that they will be searching like this. Thousands of them are searching and they will get answer to what they're searching; now what are you searching, we should know. What we are searching is nothing, to become the spirit; because in the light of the spirit only your attention becomes enlightened. With this enlightened attention you can find out everything about truth. Supposing there is somebody who has come out of the jail and put on an orange dress and comes to Kuala Lumpur; many have come like that, I know and says that, “I will save you and I will give you this” and you start just falling at his feet. How will you judge whether he is truthful or not? For that you have to have the light of the spirit; in the light of the spirit you can see that he is a very bad man because on your finger tips you can feel the heat from him, you can even get a blister if he's a very very cruel man or a very bad person.

So the Self-knowledge not only comes but also you get the knowledge about others because a new dimension of collective consciousness comes into you. Because you become part and parcel of the whole, you become part and parcel of the whole. Who is the other? Like a drop falls into the ocean becomes the ocean, you too become

like an ocean and you can feel it, another person, the centers of another person whether he's dead or not. Sitting down here you can feel it. If you grow into your own being then you'll be amazed how much you are capable of.

Now in the light of this, enlightenment, I would call, spirit, you also see what is destructive for you.

Also you get power to give it up. I know so many people who are drunkards, who take to drugs, all kinds of things, they find it impossible to. But once you have this light you just give up, just like this, for example, I'm holding a snake in my hand and there's darkness and I'm very obstinate and you tell me that “There's a snake in your hand” I would say “No, it's a rope” I'll fight. Till it bites me I would. But if there is little light I'll just throw it away by myself. In the same way you throw away, in the sense you give up all that is destructive to you.

So many people in Sahaja Yoga who were taking very serious type of drugs, specially in the West, at least thirty percent of them were taking it, they all have given up, now they don't take drugs. I don't say, `Don't do this,' and `Don't do that.' As soon as you say that half of them will walk off. But in your only light, in your only guidance, you become your own master, your own guide and you see for yourself what is wrong and what is not wrong and you take to it; I don't have to tell you. These modern times you cannot tell anybody `Don't do this.' Best is that you yourself see for yourself and solve your problems; because you become a master.

This attention is so peaceful and so kind, so generous and so compassionate; wherever it puts its projection, it

helps, wherever. But you have to grow into it, the thing is people come for Sahaja Yoga, they get their realisation and they feel nothing great, you see, on top of the world and they forget about it. You have to grow. Now the seed has sprouted, it has to grow into a tree; if it doesn't grow then it's like a waste I think, as Christ has said that like a primule or the seed which are just sprouted, are thrown in the marsh. In the same way we should have value for our life, we should understand that we have come on this earth at this special time to have our Self-realisation and we must respect our Self-realisation by which we should grow.

All the saints have said about it; it's not that I'm saying it. You see, the great saint in India like Guru Nanaka has said very clearly that “You have to know yourself, where are you running about? Why are you going to jungles? It's within yourself." Every person who has had experience of the Divine has said it. Buddha has said it, everybody has said it. But the problem is nobody understand that you have to be spirit-oriented. All the religions now have become money-oriented, power-oriented, that-oriented, not spirit-oriented. If you become spirit-oriented you will see to it that you get your Self-realisation and that is very important if you want to know what you are. You have to have Self-knowledge and you have to have full capacity to cure yourself, to enjoy yourself and to be able to project yourself to whatever good you want to do. You need not be a degree holder, you need not be a rich man, nothing of the kind.

Every human being can get this Self-realisation and, as I said, it is your birthright, to get Self-realisation.

It is there, free for you and you have to have it. It is the greatest blessings of modern times; I envy the modern times are one of the worst, called as Ghor Kali Yuga but in this Ghor Kali Yuga only this great thing had to happen that you get the awakening of the Kuṇḍalinī and the blessings of the Divine. First this has to happen to you, will happen, I'm known to today, it will happen to you. You're going to get your Self-realisation, all of you. But then you must grow; there where you all fail sometimes that you don't grow.

It is a collective happening because now you have become the ocean. In the ocean you must know that you have to be one with the ocean; and that's why I think some people fail and they cannot grow.

So you get all the peace, all the health, of all the things you get all the blessings of the Divine. Divine is extremely blissful. It has helped people in so many ways; how it has guided people, how it has taken to the right path and how it has blessed. I get letters practically everyday in hundreds and one day, you see, I said, “Better write them down in a book or something." So I gave it to somebody, “You better do the job." In one month, he said, “It has come up to my head on both the sides, now what am I to do? Mother will you make a choice for me?" I said, “See, I'm sorry I have no time to do all this, I'm travelling all the time." So we gave it up, because there's no end to it, because if you enter into the kingdom of God, it's very different; that's so peaceful you're not bothered and your problems get automatically solved. You don't have to worry about it.

The latest miracle, I must tell you, it was very great; there was a lady from Mexico. She was working in the U. N. and she became a great Sahaja Yogini but her son who was young, studying in Harvard, got a horrible disease that in the family everybody got, but he got it at a very young age, they got it at a very old age and she was worried and she wrote to Me. She wrote to Me three letters and she was just praying and I just told her, “Ask your son to do Sahaja Yoga." And the fourth letter came within one month's time and she said, “Mother, he's completely cured, the disease has disappeared." I was in India and she was in Mexico because she had taken the son there, he was studying in Harvard University, taken there and now he's completely cured. It's very surprising, she came to Italy in a big seminar and told everybody what has happened.

So so many miracles take place; people who meet with accidents, how they're saved and all, all kinds of miracles take place because the Divine wants you to live, live well and enjoy life.

So the highest thing that happens to you is this that you become the instrument of this Divine Love. It acts through you and you enjoy it. You have the power to give realisation to others, one person can give realisation to thousands.

Now I have been to some countries but they first told Me it's in sixty-five nations it's working, now they told Me it's in hundred and ten nations it is working. Imagine I didn't visit these countries but it has worked out. It has worked out because somebody, one person gets realisation and goes and does the job.

Like one fellow got realisation in Germany and he went to Greece and he got so many people there.

So you also get power to raise the Kuṇḍalinī and cure people and help them. Like one enlightened light or one enlightened candle can enlighten many candles, you can do that, it doesn't matter if you're a woman, man or a child, anybody can do it. You'll be amazed to know that how compassion comes in. In Israel we had no one, so some Germans went to Israel to work there. I was amazed how Germans of all the thing could go to Israel; so they said, “Mother, our forefathers have killed so many of these Jews, so we must make amends and that's how we are there." And they took leave, went there and gave realisation to so many Israelis.

So this is what you have to understand that you have immense powers within. I mean you are glorious, you're very good, you don't have to think that, “I shouldn't do this, I should starve myself, I should fast, I should stand on my head, go to Himālayas or give up my family” nothing of the kind; it happens within yourself because it's the very evolutionary process through which it last breaks through *[UNCLEAR]*, you don't have to do all these useless things which so far you have been doing, it just works out because it is within you. Only thing, you must have full confidence, confidence in yourself that it will work out. Once you have this confidence it will definitely work out because this is the power, what we call, the Kuṇḍalinī, is the power of pure desire, pure desire, all other desires are not pure. Because whatever desire we have, we're never satisfied with it. Today I want to buy a carpet, I'll buy a carpet. Then I want to buy a house, I'll

buy a house. This carpet will have no value, when I buy the house, the house will have no value. Then I want to buy a car, the car will have no value. Like it will go on and on. You know the economic law that in general wants are not satiable, but there's one want within us which is the Kuṇḍalinī which is the pure desire that we become one with the Divine power. Whether you are aware of it or not that's what is the desire within you which you have. Once you have it you become a very satisfied soul. Greed drops out, jealousies drop out, your false pride drops out and you become a beautiful, saintly personality. It's all within your reach and as I said, it will not take much time; hardly it will take ten minutes.

In this short lecture I cannot tell you everything about it, but there are many lectures of Mine which are already recorded and you have here. Luckily we have very good people, Sahaja Yogis who are very capable and know a lot, who are very kind and affectionate and I'm sure they'll guide you to your higher growth and they'll help you without paying any money. You have to come to the collective, that is very important. We don't have, we don't take too much money, so we don't have palaces for you to meditate, but whatever is there please do come and know how to meditate and how to get rid of this horrible mind which is always bombarding you with thoughts. I've told them the best way is to watch your mind and ask, `Now', after realisation, not before, after realisation, `now, what are you thinking, let's see,' and then tell him to shut up. It will work out, that's how it works out, the meditation part and it's very, very simple.

It will help you in so many ways and it's question of love. I have to make one appeal to you that as I love you, you love yourself. You should not feel guilty at all at this moment. Many people have been told, “You're sinners, this, that” forget it. Actually, I think those people who talk like this, that you're sinners, must be sinners themselves. At this moment, you are absolutely not guilty, not guilty at all, also it's a fashion these days to feel guilty for nothing at all. There's no need to feel guilty, you've done nothing wrong.

So please, first of all, forgive yourself. This is the first condition. The second condition is, you've to forgive everyone, everyone, not even thinking about them, whether you forgive or you don't forgive, what do you do, nothing. Actually if you forgive then it's better because if you don't forgive then you play into wrong hands, you play into very wrong hands and what happens to you is that you torture yourself, while the person who has troubled you is very happy and you're torturing yourself.

So just tell in your heart, “Mother we forgive ourselves and we forgive the others” that's all. If you have to say that you'll feel much lighter, much better, very important because if you feel guilty, the center here catches. There's a very important center on the left hand side and this center when it catches you get troubles, what we call as the, maybe spondylitis of a serious nature, angina and the lethargic organs. Now supposing you catch this center on the Optic Chiasma then what happens, it's like this, like a cross, absolutely very constricted.

When you forgive others then it opens out.

At this moment when you have come for your Self-realisation it's important that you should make these Chakras open, these centers open, so that the Kuṇḍalinī can rise and you get your Self-realisation.

So please forgive yourself and forgive others. You have to be pleasantly placed towards yourself, in no way hating yourself or condemning yourself. That will work out very well and don't condemn anybody else, forgive everyone. These are the two conditions and the third is not a condition, but a request that you'll have to take out your shoes and I hope you don't mind. Though, I must say it cannot be forced on anyone, you cannot force, it's something you cannot force. It has, it can only work if you want it. If you don't want you cannot force it on anybody, so please those who don't want to have the Self-realisation can leave the hall. It's much better so that they don't disturb anyone. But for those who want it, please be seated and it will hardly take any time, I know, because this Mother Earth of Malaysia is specially vibrated, it's very good Mother Earth you have, it works wonders here. Moreover such a cosmopolitan place where we have people from all cultures, from all kinds of countries which is very, very encouraging and joy-giving.

So first thing that will happen to you, you'll feel extremely joyous, as if jumped into the ocean of joy.

I know some of you have questions, maybe in your mind, but that is also coming out of this mind, so just now you need not ask Me any questions. If you have some some problems, you can always write to Me through your leaders here. But just now forget it, just now tell your mind to shut up for a while so that you get your Self-

realisation alright. Also you can take out your spectacles later on, not now when I'll tell you.

What you have to do is to put both the hands towards Me like this in a very simple..., sit comfortably before the..., those who are sitting on the chair can put their feet apart from each other. Now please bend your head and put your left hand towards Me and right hand on top of the Fontanelle bone area which was a soft bone in your childhood. Not touching the head, away from it and see for yourself if there's a cool or a hot breeze like vibrations coming out of your head, out of your Fontanelle bone area which was a soft bone in your childhood, we call it, it's also as Tālu. Now don't doubt because there's a conditioning, you might start doubting; I have to tell you one thing, it's coming out of your head. Put right hand towards Me and again bend your head and see for yourself if there's a cool or hot breeze-like vibrations coming out of your own head. They're hot because you might not have forgiven yourself or others, so please forgive yourself and others now so that it becomes a Cool Breeze coming out.

Now, please put now the left hand towards Me and see with the right hand, once again if there's a cool or a hot breeze coming out of your Fontanelle bone area. Now please forgive yourself and forgive others, without thinking about them, it's a headache even to think about them.

So please see for yourself. Now please both the hands towards Me like this and watch Me without thinking. Let's see if you can do it.

Some of you might get a Cool Breeze from the lower part of the palm like this, you'll take it up like that, if it is so; if it is not just keep your hands and watch Me without thinking.

Now you have to raise both your hands towards the sky and push back your head and ask a question, anyone of these questions, three times. One question you have to ask only three times, ask a question, `Mother, is this the Cool Breeze of the Holy Ghost?' or ask a question, `Mother, is this the All-pervading Power of Divine Love that is Rūh?' or, `Mother, is this the Param-Chaitanya?' Ask anyone of these questions three times. Push back your head. Now take down your hands please. Push your hands like this and see if you are getting Cool Breeze on your finger tips or on the palm or out of the Fontanelle bone area, just see for yourself.

Don't doubt, don't doubt, one thing you should not doubt; tell your mind not to doubt but see for yourself. Now, all those who have felt cool or hot breeze on their finger tips or on the palm or out of the Fontanelle bone area, please raise both your hands.

This Kuala Lumpur, everyone of you! May God bless you! Everyone! Now this is the first time you have felt this Divine power, first time. May God bless you! I'm feeling from you this. It's wonderful. May God bless you. God is so fast, I told you this is a special country where it works so fast. May God bless you all. Please put down your hands, please.

May God bless you all.

But one thing you must become collective, you must come to the collective, otherwise you will be lost.

So please come to the collective, they'll give you all the help, all the Divine knowledge, everything and which you can work it out and you can really master it. I request you, don't waste it. I'll come again next year, I'm sure I'll come here to see you all.

May God bless you.

Also you are requested to come to India for a seminar we have in Ganapatipule, let us know beforehand and we'll make all the arrangements.

Thank you very much, thank you.

.....

Human life is very precious and its full meaning should be achieved. The gift of Self-realisation should not be wasted.

Contents: 1996-03-13 **Lunch Offered to Shri Mataji and all Sahaja Yogis, Cafeteria of a Store, Kuala Lumpur, Malaysia**

[Shri Mataji wanted to do a little shopping this morning so we soon found ourselves in the centre of a shopping area. In one shop, some senior supervisors came and showered us with attention. One was particularly chatty and talked constantly, asking us about Shri Mataji and Sahaja Yoga. This supervisor was persistently asking us to have a drink or something to eat in the cafeteria upstairs. We declined as graciously as we could several times, but then she finally asked Shri Mataji. Shri Mataji said:] You are asking with such love, so how can we say no? [Not long after that, we were escorted up to the cafeteria in a reserved lift and Cecilia left us to another senior supervisor who took very good care of our food.

Some of us did not know what to do, for we certainly did not expect to sit and eat at the same table as the Ādi Shakti. Shri Mataji sensed this and put us at ease, inviting us to sit and eat. It felt quite strange sitting next to the Creator of the Universe and having lunch, reminding ourselves not to vibrate the food because everything was prasad in Shri Mataji's presence.] [Before we could finish our lunch, Cecilia made another appearance, with other people in tow. She asked for her realisation, then introduced other supervisors to Shri Mataji. They all got their realisation and none had a clue as to how fortunate they were. Shri Mataji worked on them individually and said that all the supervisors had Āgñyā catches. She put Her hand on their Āgñyās and Sahasrāras, massaging them until the catches cleared.]

Contents: 1996-03-13 **Meeting with Two Reporters from the Sun and Star Newspapers, Kuala Lumpur, Malaysia**

[SYNOPSIS!] [That evening, Shri Mataji met with reporters from the Sun and the Star newspapers, both of which had carried articles on Shri Mataji's visit. This was the first time in Malaysia that the media got the opportunity to meet and speak to Her. The egos of the reporters were quickly, melted by Shri Mataji's warmth and compassion. They later commented that they had met their fair share of Gurus, but had never met and spoken to anyone like Shri Mataji who was so graceful, compassionate, kind and motherly. They were like children listening to what She had to say and after a while, Shri Mataji also said that they could not ask any more questions because they

were in thoughtlessness and couldn't think of any more questions.

They were very respectful and Shri Mataji spoke to them for an hour and a half.] [The questions asked ranged from the mundane to the very deep. One that was truly notable was, “Shri Mataji, how do you feel when your followers treat you like God?" Shri Mataji replied that whatever Her followers call Her, they have found out of their own accord and thus cannot be challenged. She said that the powers of the Goddess have been described in many ancient writings and when they found that She had these powers, they started to call Her Goddess, so what can she do? She did not ask anyone to address Her in that way.] [Nobody challenged Her or said anything. They all seemed to accept what She said without any doubt.

Shri Mataji later went on to criticise and expose all the false Gurus, including Mahishasura, the Catholic Church, TM, Rajneesh, B.K. Rāja Yoga, the Dalai Lama and even Mother Teresa. It was a very powerful talk and we were left floating after that. Shri Mataji later commented that the reporters were now like Sahaja Yogis also, just listening to Her talk. She told them how powerful they were as members of the Press and asked them to use these powers well, so that the message could be spread in the best way. They were also asked not to publish everything She had said. She told them that much of what She had said was for their own benefit. They acknowledged that and said they would do their best.]

Contents: 1996-03-14 **Talk to Sahaja Yogis, Collective Meetings Hall, Kuala Lumpur, Malaysia**

I'm so full of love and joy to see you all here again, to see it, the number of people came and you all have to look after them with care and concern. I never expected that such a lot of people will come and in one year they've grown such a lot.

So we have to get them very much rooted in Sahaja Yoga; it will depend on your own handling or managing the whole thing. Like when I was in Hong Kong I was surprised we've very beautiful Chinese, mostly Chinese. The Yogis liked them very much and they informed Me two hundred people came for the follow-up very seriously, two hundred people, it's something very gratifying. If they're coming and if they settle down, we'll have so many of them there in Hong Kong which is being managed by one boy from, Alex from Australia. He's done very well, I must say and he might have to go back but he's done his job very well and now there're so many people there in that place which I never expected.

Now what I find that just like something making noise little less, I find that just like Hong Kong also here the people are very active, overactive. The streets are filled with cars and so much more coming out and there's so much pollution. This is not a good thing to have too much pollution so Sahaja Yogis have to be careful about it themselves, be alert that we should not have cars like that which are emitting all kinds of pollution. Also they can manage to be in one car, that is three, four people. Here I find in every car there's one person sitting; that's

not a very good idea because then you'll have so many cars on the street.

So you have to yourself concern about the problems of this city here, also of this country.

Whatever you believe in should not be blind faith, that is very important in Sahaja Yoga; you have to experience it. But after experiencing when you have a faith which is being verified by *[UNCLEAR]*. Now the faith should be very deep, with that most of your problems will be solved but the faith has to be very deep and understanding. But if you waver and still you think is not all right then it doesn't work out.

So what works with this All-pervading Power is your faith in yourself and in this power that all the things will work out. But meditation is the only way that you can grow deep within yourself. Every evening and morning you must meditate but you must know what sort of a personality you are. Now supposing you are a, we can say, a very right-sided person, then what you have to do is to work out on the right side. If you are a left-sided person then work out on the left side but in case if you're right-sided and you're trying the left side treatment then it won't work out.

So first you should find out what is your style, what is your category in Sahaja Yoga. It's very important and then you'll be amazed so many of your problems will be solved through meditation.

Now I have here some letters from most, they're all from Indians, I must say, not from Chinese and they're regarding different, different problems. Now it is the faith that you have to grow, as I said. With the faith your

problems will be solved. For example there's a very nice letter from a doctor who is faced with the problem of the owner asking him to quit.

So best thing is to quit such a place and get something else and shift there because we should not get into controversies and fights, that is a waste of energy. We can easily get some other places, smaller place and a better locality, that's an old house, according to him.

So firstly try to avoid controversies, fights, arguments. Even you will be surprised new Sahaja Yogis will be coming, they'll be arguing, if they're arguing too much just put your hands to your ears, “We don't want to argue." Then that person will understand; they'll be very argumentative, all the time trying to provoke you also.

So try to be very patient with them and tell, “We don't want to argue, we don't want to fight." We should not get into these mental feats, you see, I told you we have to go beyond the mind.

So when these people provoke you, you will start arguing with them and you would be lost in that which we call the mental barrier.

This mental barrier has to be crossed, so one should not get involved in any way, in any argument because it is not going to solve the problem. It's no question of argument, it's question of experience. Those who can experience can only understand Sahaja Yoga; those who cannot experience cannot understand Sahaja Yoga and no use fighting about it, quarreling about it, discussing about it. It's not going to help you at all; it's just that they have to have the experience and they have to go deep into it. By the experience of course they will know there

is something higher. Also by meditation you'll go deep, means you can now get the blessings, blessings of the Divine. In every way you get those blessings. In that you should know you have to be very collective, when you are collective the blessings are much better, much higher, I should say, much deeper.

Our whole system has to receive this energy, whole system within ourselves, the subtle system. Once it starts receiving the energy freely every different Chakras they will open out and your problems of different Chakras will be solved. The problem is that if you write to Me, supposing I answer, it has no meaning.

Only thing is that your meditation has to be deeper. If your meditation is deeper I don't have to do anything, you don't have to do anything; all will be done by this All-pervading Power which is there.

So first of all to have faith in the All-pervading Power, leave it, if you have any problem you can use My photograph, put the letter in front of My photograph, “This is the problem I want to solve." Actually if our faith has not grown we'll have every sort of a problem but if it is grown then it's all taken over by this Param-Chaitanya which looks after it.

So, you see, it is very important for us first of all that we should take to, what you can say, an inner development project, it's an inner development project. These days there are so many projects.

So first of all, inner development; for inner development you have to meditate. Then also very good idea is to introspect. Introspect, you can ask your mind, “What am I thinking?" or you can ask, “What are you thinking?" Now

you'll be amazed in the beginning there're too many thoughts there, gradually it will..., then you should say now, “You shut up, I've had enough." So this inner mental barrier will be finished.

But introspection has to be done very sincerely and carefully. For some time, it's about five minutes, ten minutes, if you can introspect yourself, you'll cleanse yourself. I don't have to do anything, you yourself will be cleansed, in the sense the Kuṇḍalinī will go and do the job. Wherever you project your attention and this attention itself manipulates, attention itself works, attention itself purifies.

So the problem is where is your attention. Now so many people have their attention on their themselves like, “My mother is not all right, my father is not all right, my house is not all right, my clothes are not all right” all these things. All those who have such attention towards themselves only cannot improve. They shouldn't have all this attention on themselves and on others. It is very common that we just all the time worry about ourselves, “My health is not all right, something is going wrong with me, this has happened, that has happened” just give it up. Because there's no need for you to pay attention to yourself; there's no need.

We have had so many miracles, we must have heard about them. I told you the other day about a lady from the U.N. and how her son got all right. There's another one in Delhi. There's one customs officer who's a Sahaja Yogi and I think his daughter who was sixteen or seventeen got frustrated in something and she took his revolver and hit her on the sides. Now they got a fright,

they didn't know what to do and the bullet came out from here, just imagine and fell on the ground and there was all kinds of..., flow of blood, first there was little, then more and then more. Then the blood stopped but this girl was quite conscious about it, she didn't do anything. Now these people telephoned to Me, “What should we do about this lady because she's hurt herself?" But I was not available, so they said, “All right Mother we leave to you to look after her." So they took her to the hospital and in the hospital they said that, “We can't understand, she's quite conscious” and when they examined her they saw no bone, no muscle has been hurt by this bullet, as if the bullet was taking a nice stroll and came out from her. And this girl was all right after, I mean, they had to discharge her, she was all right throughout.

It's the faith of her father which has saved this girl. In the same way your faith can solve all your these frivolous problems that you have but the faith has to be deep, has to be not blind but really from a very very open heart and open understanding. This will help you a lot if you follow Sahaja Yoga in this way.

Actually, you see, I don't need Sahaja Yoga as you people need it. I don't have to do anything about it as you have to do it. But the problem is I'm not over-doing it, I'm not sort of, working it out or something.

People see, “Wah, Mother doesn't do anything, why should we?" Because I don't have to achieve anything, I'm there while you have to achieve and that's the only reason why you have to do your meditation and you have to develop within yourself the capacity to be absolutely drowned into the ocean of joy.

There are so many things one can start doing after getting this kind of a devotion. I've seen people doing so many wonderful things and unexpected, nobody expected it that these things can be done by such and such person. It has happened and they're quite surprised *[UNCLEAR]* and people see they're amazed how these people have done such a thing. Even your faces look so charmed that people are surprised, “What has happened, how are they changed so much, how did they have such a nice expression and just like flowers." All this has to be done in a proper shape, in a proper way.

Now our culture is of decency and decorum. We don't believe in indecent behaviour and we don't believe in doing things which are not proper. For example you're building your houses now, you might build your house, you might build anything.

So you must learn how to build it which is also very welcoming house, also has to be made available spaces for nice things that you want to put in. And so if you are going in for a house also what I would say, first meditate. Meditate and see that you get the best plot, best everything and then when you push your ideas as far as the decorations are concerned and you'll be amazed even the architect who's building your house will be surprised how you know all these things.

So the interest in everything you have to take.

The other day these newspaper people came, they asked Me, “How do you take interest in all things, worldly things and in your household, your family, your husband." I said, “It's all right because I'm so dynamic that I don't feel I've to put a special energy for this or that." So every walk of

life, every aspect of life, facet of life has to be nourished by Sahaja Yoga. You can nourish it, you can change families, you can change the world, it's not difficult because you have now a capacity to project it, to manifest it. Your attention can be manifested very beautifully and this is what one has to know is to grow within yourself.

As soon as you start growing all your greed, all your jealousies and false pride, everything will drop out.

It *[UNCLEAR]*, when you do introspection everything you'll be surprised how you're so much changed, you're not like this. But you find yourself to be absolutely changed person, personality from where he has come.

As it is your country's so beautiful, so very beautiful, lush and green and nice to see all this green things around. The children, I feel they're very sweet children and what we have to do is to start a school for them, will be a good idea, for the little children that you have. I don't know how far you live from each other but if you could start a school, day school for children, you can look after them very well and the children will also have a full chance of knowing about Sahaja Yoga. You see it is very important that we have to pay attention to our progeny, to our children; they're going to be tomorrow's Sahaja Yogis, they're going to look after this world, so it's important that you give them all the knowledge about Sahaja Yoga, tell them about Sahaja Yoga. You can also make them meditate.

Now you'll be amazed that some children I've seen at a very young age of seven years can stand up and give a big lecture on Sahaja Yoga. They're quite capable, quite

capable, they can do it. In the same way they can also recite poems. I've seen the children from Dharamshala, they don't use any, without using any book they *[UNCLEAR]* and listen.

So this is also quite possible.

Moreover now I was thinking of sending some people here, maybe, some doctors to talk to you about health, how we have improved on that, how we've got a regular hospital, regular hospital we have.

So all these people can come and tell you about it, how to correct people, how to give them Realisation. Apart from Realisation what after the health they will suggest to you, what you have to do. It would be very interesting if they could come sometime whenever you say for at least three, four months and have some lectures.

So many developments in Sahaja Yoga. For example now I'm going to Bangkok and the president of the parliament wants to meet Me, this I cannot believe. Such a big man and he wants to see Me, very anxious. He's waiting there for Me to go and talk to him. It's a very big step. If that happens and if he's convinced about Sahaja Yoga, this all problems of their country will be solved. I will talk to him, I don't know what are his problems but he says this is the way his country has been ruined by the Americans, “Americans have ruined our country and they've spoiled our women, they've done all kinds of things which have really ruined us." The cultural problem is very important. Sahaj Culture itself is so good that it absorbs all the best, all the good from every culture and then it tries to fit in. And that is how Sahaj Culture has started.

So he was saying that, “The gentleman will meet you and he wants how will you spread this Sahaj Culture also there." Let us see if I can really explain to him because the politicians are off their heads sometimes, they don't understand whatever you may tell them or explain to them.

So there are problems and problems, *[UNCLEAR]* problems are physical, then we have problems, can say, problems of particular type of life you're leading, or problems of the country where you're living, all kinds of problems are there. Now all these problems also can be solved collectively. Now supposing you think there's a problem here, some people told Me that there's no proper democracy. All right, you all sit down and give bandhan, all of you, give bandhan together for this problem and it will be solved. Any kind of a basic problem which is corroding the life of people in any country can be solved very simply. For example, I was in Italy and they told Me that, “Mother, there's so much of corruption in Italy, what do we do about it?" They're Sahaja Yogis. I said, “All right, you give a bandhan." They gave a bandhan, you know half of the people are now in jail, it has worked.

Same in India; in India there's too much corruption. They told Me, “Mother now what to do about this India where the people are so corrupt." I said again, “You give a bandhan." They gave a bandhan for three days and half of the ministers are out of ministries.

So this bandhan works very well and you have to use this bandhan for all kinds of big problems in the collective, any national problems or international problems, you can work it out on your bandhans and really you can solve

the problems. It's not so difficult, I must say it's not so difficult. Giving bandhan is a very good thing, works out in such a tremendous way and so efficiently, very efficiently it works out. It is doing it's very different because they will say, “All right, I want to do it, then on the normal post you must pay so much money to the God or do this penance and penance." For you it is very simple, you just give a bandhan. But for problems which are collective problems you must give a collective bandhan, whichever are personal you can give personal bandhan.

I've already told that those who are going out of their houses must take a bandhan before leaving because you're going out, God knows what sort of people there are, to begin with. After some time there's no need, after some time you'll be amazed that those who are bad people will suffer, will be controlled by your vibrations, absolutely, can be done. But some of the bad people are very bad people, like Namadeva has said that the fly is wilderness and her mind is not clear, her heart is not clear and a fly can ruin your life if you by mistake you eat the food which is contaminated by a fly, you might get a disease. But the worst is even when you by mistake eat the fly, by mistake if you eat the fly then also she makes you vomit, though she's dead, but she makes you vomit, vomit, vomit.

So it's best that some bad people who cannot be cured, who cannot be *[UNCLEAR]*, they're very vicious in their heart, they are spoilt, maybe some Guru also might have spoilt them. And so don't try your hands on such people.

Now only thing is there are some very nice people who came to My program, so see to it that you look after those people in such a manner that they see in you a true Sahaja Yogi. You are quite a lot of number I think so and you are capable of creating such good vibrations. Not only that but you should travel; go to other places, go to other cities and give Realisation. Find out the places where you can work it out; keep your attention open and you'll receive messages, within yourself you will know that, “All right, let's go to this place and we can have a little program” and then you can give Realisation. It's important, very important that you should give your vibrations for these vibrations go on up to anything and they might trouble you.

So the best thing is you start giving vibrations even to the trees, to the flowers, to everyone; but the best is to know the problems and give vibrations through bandhans.

This is for your protection but for your growth you have to have meditation, there's no other way out.

You have to have meditation in such a way that you remain in *[UNCLEAR]* atmosphere, absolutely. You shouldn't take to, suddenly to some discussions, arguments, everything. Also better not to have company of such people because they'll spoil your vibrations, what's the use, what is the need? So now your relations are these, these are your relations. Other relations who try to spoil your vibrations, better to keep out; they're not your relations. These are your relations.

From Malaysia last time there were very few people for marriages and the Sahaja Yogis have asked Me specially

to tell you that we can perform so many marriages there. If you have not yet decided about your life partner, you can decide later on.

So that's what is the report I have that you have to be on the lookout and see for yourself what you have to do and how far you can go because the marriages are also very important. With these marriages we have got so many people and Sahaja Yoga and beautiful children are there.

So also for this, those who want to get married, so really try to apply and write everything about yourself. Marriages are going on very well, last time we'd hundred and twenty-one marriages and perhaps till today there's no report of any marriage being failed.

So if we get more applications from Malaysia it would be a nice affair to have the marriages just like...

Now it's a thing I was thinking I asked them how much they pay for going to Ganapatipule and amount seems to be little more and if some people can't raise such amount can pay less, doesn't matter. But if you can pay, it's better to pay. I must tell you at least fifty percent people they pay nothing and I have to pay for them, fifty percent. They come from all the Eastern Bloc while you can say it's not only they *[UNCLEAR]* but we have to look after them and do so much for them. They all come from this, you can say, Russia and the Eastern Bloc, there's such a lot of people. Then some people also come from South America, they've no money, so I've to even pay for their tickets, but doesn't matter. Because they're very, very good, very intelligent, very well-known scientists also. And the way they are now handling Sahaja Yoga, it's also very good. Because, you see, we have to know that

it's not Sahaja Yoga, it's for you, it's not, you have to spread it, you have to give to others. Otherwise you'll never be happy; even if you have got glimpse of happiness or joy, you have to give realisations to others, *[UNCLEAR]* Sahaja Yoga at home.

So many things I can tell you but after all everything has limit because of time, so I would say that if you have problems again write to Me but these problems I'm not going to solve them the way you want. I just give it a bandhan, finished. And so you also should write your problems, put the letter in front of the photograph and give it a bandhan and you'll be amazed things will be solved. It's very, very difficult for Me to really say that don't use too much of computerization, machinery and all that. Do it more through your reading and understanding because this is also computers are also felt by human mind and there could be *[UNCLEAR]*, but whatever it is whenever you want to find out about yourself, find out through vibrations, about anything, not through all these artificial things but through vibrations. “What's the matter with the person?" All right put the hands to him. You'll immediately know what's the matter with that person. “What's the matter with him?" Put your hand and you can check. It's not difficult once you train yourself, it is a question of developing the system and telling yourself. If you train yourself you'll be amazed that you can do wonders and this is what you can really achieve.

Now we have had some questions and letters, I've given bandhans to them and this will solve the problem I'm sure. If there are any more problems or questions you should again send it to Me.

Some people are coming for My birthday? But also they have organized, I think for Gaṇeśha Pūjā they have organized for all of you to come from Australia, from Hong Kong, from your country and also from other countries which are on this side.

So it'll be a good idea that if you want to come let us know when you are coming. I will have to organize it for your stay. As it is, Cabella is not a very comfortable place, just we're trying to build this, build that, it's very difficult. And still people don't mind because they enjoy the collectivity, they enjoy the living there and they have told Me all the time, “Mother, we don't care for our body comfort but for our spiritual comfort." So they're very happy people. In this case I would say that you shouldn't expect too much. Whatever is possible we have spent money and tried to..., but whatever is not possible as yet you can't help it, you see this is the big problem.

I bless you all from My heart and remember that I love you very much. I'm happy I had a chance to meet you because I was thinking I'm going tomorrow but then they suddenly told Me, “No Mother, you're not going tomorrow." My goodness, I said, “How will I meet all these people?" They said, “We have arranged for you to meet them in the morning time." It's very nice to meet you all here.

May God bless you.

Contents: 1996-03-14 **Meeting with the President of the Parliament, Parliament, Bangkok, Thailand**

[It had been prearranged by Dr. Satin that Shri Mataji would go to the Parliament to meet with and to talk to

the President of the Parliament and some of his Deputies. She went straight from the airport to the Parliament.] The President, when he first saw Shri Mataji, had no idea why he was to see Shri Mataji and formally he started the conversation by asking Shri Mataji if She had come to visit Thai temples.] Shri Mataji [replied]: I am not here to visit temples, but to build temples in the heart off human beings.

[This immediately ended the formality and everyone in the room could feel that the conversation came to another level of attention. For the next tent minutes (which the President said was the only time he could spare) the brilliant presentation from Shri Mataji about Sahaja Yoga kept the audience captivated.

At the end of the ten minutes, Shri Mataji asked the President to put his hands towards Her: his whole face changed as, he felt the Cool Breeze. The interpreter, who had been, since the beginning, very interested and enthusiastic, also showed tremendous joy to have tried and felt this special experience.] [Instead of the ten minutes the President could spare, he went on to spend an hour and a half with Shri Mataji At one point, Shri Mataji asked if She could work on his Āgñyā and She stood up to touch his Āgñyā and Sahasrāra. He then said that he could feel extremely peaceful and relaxed, as he had been so worried and stressed about deadlines, etc., but now he felt above it all.] President: I understand now that You have come for me, to give Self-realisation. [He even said that if he had known the importance of Shri Mataji's visit, he would have arranged for Her to speak to the whole Parliament.]

Contents: 1996-03-15 **Private Audience with Dr. Satin, Rembrandt Hotel, Bangkok, Thailand**

[Shri Mataji was concerned that the Americans would get involved in the situation and that it would escalate into World War III. The Thai Prime Minister had to talk to the Chinese premier, Li-Peng. Shri Mataji dictated the words the Chinese premier had to use in speaking to the Taiwanese:] China has no wish to see Taiwan separate from the mainland, as the people of Taiwan are very close to the people of the mainland. China has no desire to get involved in Taiwan's bid for democracy, as China would like to see Taiwan as a democratic state, but not separate from the Chinese mainland. China does not wish to see American involvement escalate in the region.

[As a follow-up to this discussion, the Sahaja Yogis of Thailand were delighted to read in the Bangkok Post a full story from the Chinese premier saying exactly what Shri Mataji had been requesting him to say.]

Contents: 1996-03-16 **Talk to Sahaja Yogis, after the Press Conference with Journalists taking Notes and Photographs, Bangkok, Thailand**

I am very happy to see that there are already so many Sahaja Yogis. Yesterday you saw how many came.

It's very heartening so see that. They have to settle down now and not come and go. But we really need people of depth, otherwise it doesn't work out. At the beginning, of course, you will find people coming who are not so deep, just superficial, going to many Gurus, like that. And some of them think that if they can purchase the Guru, it's a

good idea. But still I must say that Sahaja Yoga grows very fast and as it starts growing you get people who are better and better.

So you must have patience to begin with. You know that our work is from Divine Love, it is love and compassion. You cannot argue, you cannot fight. If somebody starts arguing, just give up, don't argue because you have to go beyond your mental level. Be very kind, very gentle with all others, not to say immediately what's wrong with them, like “You have a bhoot in you" or something like this. Even the Chakras you need not say what's wrong with the Chakras. You can only show your fingers. And when you are working on somebody, don't touch anyone. Before working on them at least give a big bandhan to yourself seven times. Also for whom you are working you can give bandhan. Supposing somebody is talking to someone, somebody else should go to the back and work on them from the back. Because in the begin they don't want anyone to raise their Kuṇḍalinī or do something.

So the best is to do it from the back.

You see, it will depend on you, how you behave if they take to Sahaja Yoga. It is your responsibility now. I am sure I will come next year again, but before that I have to tell you that you have to show tremendous patience. Because you all have got it, they have not got it. You have nothing to lose but they will be lost.

So you have to be careful with them, very important to save people. You see around how the world is going into a very bad situation and you cannot tell them, “Don't do this, don't do that." Only with the light of the spirit they can be alright.

So the main thing is that you give them realisation and let them feel confident so that they will know that they can also become like you. See, for example, if somebody says, “I cannot do it, this and that..." you should say, “I was like you also." You should not hurt them. They are already suffering and we should use now all our compassion for them. I know that it like we are very few but even one person can give to thousands.

Contents: **1996-03-xx Meeting with Hamid Mylany and other Sahaja Yogis for the `Vibrated Seeds for Bosnia' Project, Part 1, New Delhi, India**

[During Birthday Celebrations, Hamid Mylany and other Sahaja Yogis asks Shri Mataji about a possible donation of vibrated seeds to Bosnia to help clear the vibrations and sow into this devastated land some peace and some Divine love. Shri Mataji replied:] Buy mainly wheat. This will be a very good present for them. May God bless you.

[For Part 2 see 1996-04-xx.]

Contents: 1996-03-21 **Birthday Pūjā (Hindi+English), Mind is a Myth, Scouts Camp, New Delhi, India**

[Shri Mataji talks in Hindi: MISSING.].....

This institute named `mann' [mind] within ourselves is an `untrue' fact. It is untrue, as when we are born, we have nothing like `mann' inside. But gradually, when reactions of both types occur in your surroundings, then some develop `culture' and some insert sense of ego in us. Then, due to these reactions, such things are developed and result into collection of bubbles and these bubbles of thoughts establish this `mann' inside us. All these things

happen to us in such a way that we create them and then become their slave.

The existence of `wisdom' in your brain is true, but this `mann' thing is self-made institution. Our own reactions are made up of ego and superstitions, that is nothing but an artificial and cursed thing.

Then we all are flooded by this `mann', specially those people who think of themselves as wise, intelligent, highly educated, they have filled their brain fully with `mann'. This `mann' is all over them and wherever it wants, it misleads us and we continue to flow with this `mann'. This artificial thing has been established in your mind and we call it `mann'. In reality, There was no such thing called `mann' and there is not such thing at present. That's why going away from `mann' is work of Sahaj Yoga. When you go away from Mann, then you can achieve that `peace', because This `mann' always keep on stirring the thoughts that come from ego and Superstitions and that's why you cannot feel `peace'. if you want to get `peace', you should go away from this artificial thing called `mann'. That's why what we believe as the first condition of Sahaj, the `thoughtless awareness', should be achieved. As soon as you achieve this state, you'll realise that you are in peace. Unless you don't achieve thoughtless awareness, you cannot get connected to the power of God, that is all around you. This establishment of `mann' is destroyed when you come and achieve thoughtless awareness in Sahaja Yoga.

.....

[Shri Mataji talks in English:] Today, I'm going to talk about the mind. People don't know what is this mind is. It

is very easy to understand for Sahaja Yogis that we are the ones who react, react to everything that is outside. The reason is we have two horrible tendencies, one which is an ego and another tendency is that we are being trained that way, or we can call it the superego or the conditionings.

So, both the things, our ego and conditionings, are all the time acting outside. This reaction, which is built-in within us, is just like bubbles in the ocean. And these bubbles keep us away from reality. These bubbles are of thoughts and they just blast you all the time in your head and you don't know why they are coming. When you depend on this artificial mind of yours then you have no discretion as to understand what is good and what is bad. This mind is the one where all kinds of evil things start, all kinds of quarrels, fights and, possessiveness, lastly the war also comes there.

It is in this mind only, which is nothing but a myth, all these concrete, destructive ideas, somehow or other come up and then they start growing and growing. Then you find people whom you can impress also, put ideas into their heads, by reading, they learn, or by their lectures, or by mesmerism, whatever kinds of things they can do. They put your mind into such a frame that you accept these destructive ideas, for yourself individually, or maybe for the collective.

So this mind is just a myth and we are working through this mind. We are all the time satisfying ourselves by saying, “Oh, that's my mind, my mind wants it." You see, like one Indian Sahaja Yogi went to America and he told Me that, “Americans are manoeuvreer." Manoeuvreer

means they are mad after their mind. I said, “What do you mean?" He said, “I gave money to my wife to buy one bush shirt for me. She went and bought some skirts. And she has many skirts, but she bought some skirts.

So I asked her, `Why did you buy the skirts?' [Laughs.] So she said, `My mind said that, `you should buy the skirts,' so I bought skirts.' " So, this is what it is, that the mind can take you to all kinds of wrong things because it has no connection with reality, firstly and secondly it is a mythical thing, absolutely mythical.

You see, people think that whatever they have created, it is out of their mind. Is a wrong idea, absolutely wrong idea. All great scientists, say, Einstein has said that, “I was tired trying to find out the Theory of Relativity, very tired." He had some concept, like all scientists take up some sort of a concept and they tried to build up their research on that, “And then I thought, it's a wrong concept that I have taken up. Suddenly” he said, “I went into the garden, I said let's try and play with the soap bubbles." He was playing with the soap bubbles like a small child, “and suddenly, from somewhere unknown” he says, the Theory of Relativity dawned upon him. Many scientists have said that, that they don't know from where they get this idea. From where did they get it? It has a special, study now people are doing to find out how these scientists got these things.

And in a very Sahaj manner, even the way penicillin was discovered, or anything was discovered by these people, was not through the probing or manipulation of the mind, but through some unknown force it came into their mind and that's what they thought, that this was from their

mind, some, some. But most of them realised, even Newton realised that, “It is coming from something, some source which I am not aware of." As Sahaja Yogis you know it is the Source of the Divine Power, which is all-pervading, the Param-Chaitanya.

You know, because you can feel it, you know it is there. But, even when you know, you must know you have to go beyond your mind into thoughtless awareness, minimum. Always I tell you, “Meditate, meditate” because you should be in thoughtless awareness, where you do not react.

So, what happens, you become a witness, you become the witness of the whole drama, of the whole scene and you are absolutely at ease with yourself, no problem. And what you are doing that you become an instrument of this Param-Chaitanya, of this All-pervading Power. You are just watching, you are a witness and as watching everything, you realise that whatever you watch cannot react on you. But you know what it is and this is what is the state in which you understand the reality of the whole situation.

I've told you many a times that, if you are standing in the water you are afraid that the waves will...

might kill you. But supposing you get into a boat, then you can watch those waves as something beautiful, maybe. If you learn how to swim, you can jump and bring back people who are getting drowned. This is exactly what happens when you are in that state that you can give Realisations to others. You can put them in connection with the Divine Power. But first of all you must know how to become thoughtlessly aware.

Some people say, “Mother, for a second only we become, for two seconds we become” because, you see, in our mind, even if you come to Sahaja Yog, you have so many conditionings to begin with. First of all, if you are born an Indian then you are identified with India. If you are born in England, you are identified with England. One thing I've noticed about Sahaja Yogis, once they get out of this nonsense of this mind, first thing they start criticising the way they have been living in atmosphere, for example they'll say, “Ah, this is Indian, now, this is what the Indians are." Then you'll say, “This is” if they are British, they'll say, “These are the British, you see." They will be the best to criticise. Even others cannot criticise as they criticise, for example, Europeans will criticise Europeans, saying that, “Ah, Europeans, all right, I know Europeans very well", like that.

The mind itself, you see, starts seeing then, what you can say, that mind itself sees that it's a myth.

And then the cheating that takes place all the time, that the intelligence that cheats itself, stops. You start seeing the thing in a proper, full manner, because you don't react. To react is a sign of a person who is very conditioned. You can be conditioned by many other things, like, you are born in a particular religion, now. As you know, what has religion to do nowadays with human beings? There's no real religion anywhere, it has become like a money-orientation, or you can say, power orientation. That's why they are all fighting among themselves and you know for definite that no religion is exclusive. But they fight. The reason is, the mind is conditioned that, `you must fight for your religion.' Now,

they have no religion within; there's no religion that is working out in their lives. They might be the most corrupt, most immoral people, but they belong to a particular religion, like a club. And then they start, you see, identifying themselves as something and they have a right to do these things, because they belong to a particular religion or to cult and this and that.

Now, there are people who can really use this mind, though it is artificial. In modern times, we are using so many artificial things and this artificiality can creep into everything, like plastic.

So, this mind can penetrate into anything and it penetrates into the minds of people. That's how Hitler managed all the young people of Germany. All these people who have been able to destroy the reasoning which is logical, not through the mind. If it is through the mind it's no logic. It is just a reasoning that we can see clearly stupidity.

Because this mind, which is just a bubble, as I told you and is so limited, that it cannot comprehend the beauty, the glory, the expanse of reality. This mind is just a collection of all the garbage, we should say, which we have to, somehow or other, deny and tell ourselves that, `I have to go beyond my mind.

So-called mind of mine has done no good for me. And this mind of mine, which has been all the time controlling me, is just like the watch we have made and it is controlling us, or like the computer that controls us.' So we have to be careful that we are the ones who have created this mind and this mind has no business to control us.

Many people try to control the mind. There's a way of doing it that, `I'll control my mind now.' Now, try to understand, how will you control the mind? Only through mind. Either by ego or by your conditioning. You have no means of controlling your mind, because it is the mind which you have created and that is just existing there, which you cannot control, though you might think, `I can control.' You have to go beyond this mind. And to go beyond this mind the most helpful thing is Kuṇḍalinī awakening. Because She passes through your limbic area, pierces through your, fontanelle bone area and just takes you away, out into the realm of reality and the Yoga takes place between your brain, I should say, your heart, with this All-pervading Power. She's the one which connects, She's the one who does it.

Many people are doing Sahaja Yog, I know that, but it's difficult for them, sometimes to get to meditation, to establish this thoughtless awareness, which is an extremely important state which you all should achieve.

So many Sahaja Yogis are there and I'm happy to know that they are getting deeper and deeper, but as long as they are in the turmoil of their mind they cannot progress. Whatever is created out of their mind has no reality in it, is very limited and is also, sometimes very repulsive, because with this mind people start thinking, “I am such and such” you know. Now you become, supposing, I don't know what, position, but supposing you become, the Governor, then you think you can do what you like, because you have become the Governor. This mind doesn't know that you have become the Governor, you are not the Governor. This governorship is

ruling you, not that you are ruling the governorship. Once these ideas come into your head, you start behaving in a manner in which you should not behave.

Even among Sahaja Yogis there are leaders. Leaders also start sometimes thinking, `Ah, I'm a leader.' It's a myth, absolute myth, leadership in Sahaja Yoga is an absolute myth, which you should know.

But once they know they are leaders, see, they become, sort of, absolutely mindful and full of thoughts.

Thoughts how to dominate, how to control. When they start controlling others, then you must know that it is the mind which is telling them to control. Why to control anyone? If you are a real Sahaja Yogi, there is no need to control. There is no need to manoeuvre, to manipulate. Now, once your attention goes beyond the mind, only the Sahaj Yogis will understand this point very clearly, when this mind goes beyond the thoughts then the manipulation of the attention is very important. Then whatever you manipulate, means you take this attention to this or to that or to that, you'll be surprised how dynamic you become, how effective you become and how knowledgeable you become.

Because, once you can take this attention to anything you want, immediately there is light on that issue, on that person, on that problem and you see how it works out, how it helps. In Sahaja Yoga you have said, “Mother, there have been lots of miracles with Your Attention” or something like that. I agree, but your attention also is quite capable of doing things which normal people can't do, because now your attention is purified, firstly and

secondly it is manipulated with the Divine Power and is manifesting its powers.

But, before that I have seen people who come to Sahaja Yog, they send Me letters of crying, `Mother, this is happening, that is happening, my father is sick and my leg is paining, my hands are paining,' all kinds of things, not only at the physical level, but also on mental level and all sorts of things, they go on.

They sometimes write to Me such long letters, I don't know how to read them. There's nothing to write so much. But they do, because at that stage they are still reacting and they don't know what to do. They go to such a limit, that they think that Sahaja Yoga is like a contract. `Now I've come to Sahaja Yog, I must get this. This must happen.' Only they come to Sahaja Yog, then they think it's a contract and they must get this and they must get that help.

All this kind of behaviour is not that of a Sahaja Yogi. Sahaj Yogi, in Sanskrit, is a very good word `Tatastha'. Is a very good word, which I'll try to explain, but cannot be really translated. `Tatastha' means the one who is standing on the shore, on the shore and watching. That is the state in which you have to be. But, as a result, you do not become a person who is not effective. You become extremely effective. If such people are there, you won't believe so many things can happen. Wars can stop, peace can spread, people who are evil will be exposed.

Now, because it's such an en masse working out of Sahaja Yog, Sahaja Yogis should not, in any way, find themselves in conflict with each other. Still, I find sometimes. And I'm amazed, how people criticise other

Sahaja Yogis, or other leaders, while they themselves have problems.

The reason is that once you start going beyond the mind, you automatically become introspective and you start seeing, `What's wrong with me, this mind of mine, now?' So, better stand before the mirror, or can even close your eyes and say, `Now, Mister Mind, what are you doing? What are you up to?' You face yourself, you stand out from yourself and see for yourself and ask the mind, `What are you up to?' That's the way, once you are out of it you can control it. I'm happy you are celebrating My Birthday. Now I'm supposed to be quite old, though I don't think like that, because I don't think. One has to be beyond, beyond the mind. To think about yourself all the time or to think about things which do not concern you sometimes, you know. And just try to put your mind into a turmoil, which is very dangerous these days.

To stop your thought, first of all, I think in Sahaja Yoga you should stop reading anything. Because if you start reading, then what happens again, you start collecting thoughts from that book. I've seen many people whose mind is nothing but the books from others, or the words of others, or quotation of others.

They are nowhere. You cannot find them. They are all lost people, `He says so and that one says so.' When I was writing this book, which you know that I have written down, they were saying, “Mother, but Plato said like this and Rousseau said like that." I said, “Let them say whatever they wanted to, I'll say what I know. Why should I refer to them? I don't have to go to the libraries and read what Rousseau said, what Plato said, what,

nothing." What I know, whatever I have witnessed in My life, I should write it. Clearly, without thinking about what others have to say, what others have described.

And also another, this mind has another big, big problem, that whatever is written down in black and white becomes Bible. Then, whatever is done before is something great. Like, now there is no Christ, there is no Mohammed Sahib and there is no Abraham. There's no Kṛiṣhṇa, there's no Rām today. But they will think of what Rāma said, what Kṛiṣhṇa said, then in Gītā, this He said, in Gītā He has not said a word about Kuṇḍalinī, so why Mother is talking about Kuṇḍalinī? He might have said, can't say, who wrote Gītā? Never Śhrī Kṛiṣhṇa. Christ never wrote Bible. Koran was not written by Mohammed Sahib.

So, what they have said, why should you worry about that? Instead of that, you take the experience that everybody has said. That, “You are to be born again” everybody has said. That, “You have to go beyond the mind” also everyone has said. Why not do that and then see for yourself? But people like and they're identified. Now, if they are Christians, who are coming to Sahaja Yoga, still they are happy if it is Christ, very identified, if they are Hindus should be Kṛiṣhṇa, or Rāma maybe. If they are Muslims, it should be Mohammed Sahib, Fātima or someone. Otherwise, they can't get out of it, this is very difficult. Their mind is such that is so much made from childhood you are told, “You are a Muslim, you are a Muslim, you are a Christian, you are a Christian” so they believe it.

Supposing you are born in some other religion then what would have happened? You would have believed something different, but this mind has been injected with the ideas which has gone into your head and that's how you are so much without any freedom. You are tied down with these conditionings. And that's what I find among Sahaja Yogis also, a very big conditioning that such and such thing is, good or bad, they decide. You see for yourself.

For example, if I talk on Guru Nanak, then the Sikhs will be very happy, but I talk on Christ, they won't be happy. I talked on Christ in Poona, so they said, “She's trying to convert everybody to Christianity” and when I was talking about Śhrī Kṛiṣhṇa in London they said, “She's making everybody a Hindu." [Laughs.] So this identification that we have is coming to us when so intensely, from, we should say, it's like from the birth. All these ideas still are there and we are not free. That doesn't mean that you should not have faith in all of these people. They were all great, we have great respect for them and understanding. But first you be free, you be free, to know them. Your mind should be free. It should not be the injections that are put into your heads, that you cannot see the point. That's why they don't enjoy also, I've seen, partly they enjoy, partly they don't.

So, to become a free person, because Sahaj Yoga is to give you complete freedom and also complete sense of freedom, so you respect the freedom of others, on the whole you understand what freedom is. If that doesn't work out, then I would say that Sahaja Yoga is of no use,

because it should work out in such a manner that you should get rid of all these conditionings you have had.

Now, take the second enemy of ours, is Mister Ego, which is another headache and which works very fast in many countries where already ego has been bloated. See these balloons. If they were bloated, all right, it's very easy to again make them big, but if they were never done that, then it's difficult, you have to pull it out, you have to put it to the pumps, otherwise it won't be bloated.

Now, this ego comes to us from different, different angles and it [laughing], actually, you'll be surprised, from the deformity of our Chakras.

For some people, money is very important. We must get money, somehow or other. If I don't get money, what's the use of being in Sahaja Yoga? Money is very important. We are living in a money-oriented world, no doubt. But I have told you that what's the use of having money that makes you a fool, which takes you, now, see the countries which are very much money, oriented, who are supposed to be very rich, all the Scandinavian countries and Switzerland, whatever may they have, they might have done to get that money, doesn't matter, but they are people with money. People are committing suicide, young people are committing suicide, there's a competition going on, they're very unhappy. Why? That means money cannot bring happiness. Money, money, money, money, if that goes into your head also, then you cannot be a Sahaja Yogi. But the money is there just for you to use it to express your love. Now, you go to the shop. Then you see something, “Aāah! This is very nice to be given to such and such person." You think like that.

It's a very sweet feeling you get there. Ah, you can give this to this one, eh? He needs it very much.

When your mind becomes the other way round, I mean, when it is thoughtlessly aware, then you will buy something that is joy giving, something artistic, something beautiful, something useful to that person.

It will be a kind of a mind that will be extremely full of generosity, enjoying its generosity. And all the time it will guide you to the projection of your attention to things by which you can give happiness to others. Small, small things, not necessarily expensive things. If you have money better spend money in buying things that you can give to others, that you can, express your love, your gratitude, your Śhraddhā.

It is very remarkable how people give money to these Sādhus and Babas in thousands and thousands and crores of it. Because, I think in them it has come that to satisfy their Śhraddhā they must give it and so they give. And they have amassed and amassed so much money, they have no sense of it. They don't understand the value of that. To them it is nothing but money.

So, in the modern times I think the worst thing of ego is money. I have seen people who are very rich, supposed to be great business `wallahs' and something like that, they must meet Me separately, “We must come, Mother and see You." But they're useless people, absolutely useless.

So they'll come and tell Me, “You know, I'm having a loss in this, I'm having a loss in that, can you help us in this way or that way?" I just don't say anything to them, but they have said, “Mother we have recovered because of

Your blessings." Maybe. But it's stupid. Like Lao Tze described that you are going through the Yangtze river, it's beautiful. On the sides you see beautiful scenes, but you better be on the boat and reach the ocean.

In the same way, supposing we have to catch a plane and we see something very nice on the road and get down there, how can we catch the plane? So these side effects of this mind are these, that we divert our attention to wrong things and waste our energy into it. Ultimately we are not happy, as you know that the, in general, wants are not satiable. It's the love that you give and the love that you receive, which is not a love which is entangled into anything with any purpose, with any idea, but just to feel that love, pure love within yourself and within others. Is the greatest gift of the Divine.

All other things are useless, you'll find it. You find it every day. Today you want to have a car, all right, have it. Then you want to have a house, have it, but you are not bothered about the car now you want to have a house. Now you get the house, then you are not satisfied. Then you want to have something else and something else.

So then, which is that `want' which is satisfying? It's this pure love, genuine love that you feel for the others and others feel for you.

We have others, lots of conditionings of ego. In our country specially, this Indian country, India, so-called. You see, to dominate the wife is one of the greatest ego. I have seen people, how they tortured women, their wives and the children of others, just because they think, `I am a man.' What do you get? You don't get any joy, you can never be joyous. If you try to dominate another

person you can never be joyous. Never be joyous. It's only through loving and affection and care that you can feel the joy, because joy has these symptoms, joy is not domination, or demanding, or asking. These are not the signs of a person who is joyous. The joyous person is that who just enjoys the caring, the loving, the gentle relationship. And this is another point where I've seen Indian men specially, especially in the North [India], because of, they say Muslim influence, whatever it is, in the North [India] the men are extremely dominating to their wives. And they insult the wife also very much.

So now the women here have become extremely dominating also, naturally action has a reaction. This reaction itself is a wrong idea and this reaction should be just dissolved into the feeling of pure love, the Ocean of Compassion. For example, I see on the streets of Delhi, so many people begging, small children are there and all that. And now the feeling that I get is not of scolding them or getting angry with them.

Maybe they are cheating, maybe anything they're after. Everybody's cheating you and those who have lots of money are cheating you, so what is there if these poor people are cheating, doesn't matter.

But the compassion is built-in within Me like this that, “Let Me somehow get a plot of land somewhere, let Me organize some sort of a place where all these people who are orphans can be put there and given all” [applause] “all the help." And maybe from this pond of misery and poverty you might get lots of lotuses coming out. But the feeling has to be collective. I feel that way, that we'll solve the problem of Delhi, but that doesn't mean that,

like other social workers, like I have been connected with some social workers and I was amazed that it was nothing but a ego-pampering business. It has nothing to do with social workers. Haphazard and nothing deep in their attention to look after these people.

So with the great feeling of love and compassion we can do it, we all can do it and can work it out.

One of My desires is this. If it is a desire of you all, it will work out. It's very important that they are also human beings and we have to look after them. But for that, one should not think that, `I will be the treasurer, I'll be the president and I'll be this.' All this clergy-ship should go away, from the mind itself, otherwise you are not free. You are not free, you know, like there's a nice joke about it, that, one, somebody went to see the minister and the private secretary was there, attending to the people. And he was getting very angry with them and all that, so some villagers said to him, “Who are you?" He said, “Don't you know, I'm P.A.?" “Ah, pa ho!" That means you are drunk, all right, we have nothing to say.

So, a person with ego behaves like a person who has ego, is a person like a, you can say, a drunkard, or sometimes like a lunatic also, really like a lunatic.

Sometimes you have to meet them with a bargepole, I told you.

Some of these people who have got awards for peace, we have to talk to them with a bargepole, because they might just jump on you, just like a cat, or could be like a leopard, you don't know how they are built up. I don't know how they got these awards for peace, but they have.

So, the peace is within ourselves and this peace has to be retained and introspected and seen. Are we peaceful or we are reacting? If we are reacting, then we are not peaceful. But people will say, `Yes, yes, I am very peaceful, but I have to react.' Then you are not peaceful. Just face yourself, straightforward and see for yourself that if you are peaceful then this peace will spread all over, it will help others. It give them physical, mental, emotional and spiritual peace.

So, you people have a great responsibility of coming to Sahaja Yoga. It is not just a certificate, or My badge, that you are a Sahaja Yogi. I would like also women to see to this point, because what I have seen about women is that they are mostly worried about their children, about their husbands, jobs and things like that. But they are not worried about others, about people who are around them, so they have to also take to Sahaja style of life, in which they expand their love, expand their attention to other people and see how they can please others. This situation is, used to be non-existent in the Western countries. I think they never knew that you should please somebody for no reward, or for no purpose. If you give any present to somebody, they'll say, `Oh. What do you want?' `Do you want coffee, or...?', immediately. To them they cannot understand that somebody wants to express one's love, no, they can't.

So, this, now mind has changed, because Sahaja Yogis are there and they are different people, but what I have seen before was so remarkable, that they thought it was a weakness that they are giving those presents because they feel they're weak.

All these ideas have changing in the West and also we should not adopt their stupid ideas that we can control people by giving them things or by, giving them some sort of promises.

We have, actually, to control ourselves and that control can come if you do not allow your mind to control you. That control is a complete freedom. For example now, take an aeroplane which is perfectly built, which is absolutely all right. Then only it can fly. In the same way, if you are a perfect Sahaja Yogi then you will have no problems in dealing with any problem, with any circumstances, with any person whatsoever.

There are many Sahaja Yogis in the West I've seen, they've said, “Mother, we don't want to take any active work because we'll develop our ego." They think their balloon is already bloated out and if they do some work their ego will go up, so they say, “We don't want to do." It's not so. It's the Love. You're working for Love. Such an Ocean of Love is within you. How can you do without that? And this has to work out at every level, whether it is your family, whether it is your city, whether it is your country or the whole world. This is the new generation we have to create of people who believe in Love which is Truth. Which is Truth. Without Love you cannot have Truth, because when you love somebody you know everything about that person. In the same way when you love your country you know everything about that country. But first you must love.

Why people are now having problems because they don't love their country. If you love your country you will know what is the essence of your country, what is the

problems of your country, what it is going through. And that intense feeling of oneness itself will work out, because after all you are connected to the Divine. But with intensity you should feel for all these things that are really so destructive and troublesome in these modern times.

I again want to thank you for celebrating this birthday and for all the sweetness you have showered upon Me. You are just like these beautiful flowers for Me, which are anxious all the time to make you happy, to please you. Just like that I find you before Me, beautiful flowers, fragrant with divinity. I hope you all will understand your own value and work it out.

May God bless you!

Contents: **1996-04-xx Quote, Sitting Room, Sahaja Yoga Temple, Qutab Institutional Area, New Delhi, India**

[To Sir C.P. while entering the sitting room:] See, the Sahaja Yogis don't recognize Me as Ādi Shakti, but this *[UNCLEAR* false Guru from Pune] lay on the ground before Me and said “Śhrī Ādi Shakti Jai Ho!"

Contents: 1996-04-05 **Address to Businessmen, Swādhiṣhṭhān Chakra, New Delhi, India**

[SYNOPSIS!] [Until we find out the truth we keep thinking of this and that, what we call our mind is actually not our brain. We keep thinking about what our mind is saying but, you will be surprised to learn where this mind comes from and what it actually is, it is very important to know this. This mind that is in us is really a situation made by

us. The reason for this is that when we look at something, maybe not true of animals, we tend to react upon it. For example this beautiful carpet laid here we see it is very beautiful, now, if it is ours, we are worried that it might get spoilt, so we should get it insured and if it is not ours, then we are worried about where it came from, for how much, all such things keep coming to our mind.] [When a child is small and its mother is with it, it is enjoying itself. Then its mother wants to take it some other way and the child does not like it. It feels why is my mother bothering me. Then that reaction which develops within the child gradually develops as what is called his ego. When the mother tells it not to do something, it does not like it, but listens to her because she is its mother, that forms the child's conditioning. In this way, there are only two things within us, either we go according to our ego or our conditioning. There is no third thing in us that can guide us about what we are doing, whether it is right or wrong, whether we will benefit from it or not, whether it is driving us towards our destruction or our fame. Which ever way, we are our conditioned, we keep moving in that direction and then our ego can also develop. Depending on the kind of ego, we function. Both these things are present within us, are made by us. Take, for example this watch which we have made. Now we have become slaves of this watch. As soon as these people said, “Mother you have to leave at seven o'clock” I thought to Myself, now there goes, we won't reach on time because, we are away from time. If someone tries to tie Me down by time, that job is gone. Then this was a great worry, why are they saying this. In this manner we

get tied down by time and become a slave to it.] [But for the computer, we cannot add two plus two. This also, we must try to rectify. Then this give and take is not in us, then this brain, which is the reality, has very little work to do and just like a cartridge of a watch, we are moving and just like a robot, we are living. Then what the reality is, we are away from it.] [We can get into the realm of reality. When we get into this realm, we can not only find out about ourselves, but about others too. That does not mean about what clothes or jewelry they are wearing, but about their Chakras in what condition they are. You will be surprised to know that these Seven Chakras within us are our energy centers. Now, this energy center has a little power what we use. When we use it too much, then people have stress, or heart ailments or some other illnesses. These are the centers, from where all our physical, mental, emotional and spiritual problems get solved. These are the seven centers within us, maybe you are not aware of their existence. Not only do these seven centers exist, but a lot of people have found the key to them. However, we take these centers too much to one side that we do not have satisfaction.] [You yourself can think that on a physical level what problems businessmen can have. There is a Chakra which we call the Swādhiṣhṭhān Chakra. Now this Chakra is very important because its main job is to nourish our grey cells in our brain. The doctors are not aware of this, but it is a fact. If all the time we are using our mind then where is it going to get the energy from. For all our thoughts, desires, plans, to complete them, it requires energy and this energy comes from the Swādhiṣhṭhān Chakra. Now

this Swādhiṣhṭhān Chakra has a lot more to do. It is from this that our liver, spleen and kidneys function.

When this works on one side its energy goes towards one direction, then all sorts of illnesses manifest themselves. First of all, the liver gets hot, then to top it, a lot of thinking, planning, gets it more hot.

The liver, whose job is really to release this heat into the blood stream, is not able to do so. Then this heat either passes up or down or sideways. When it goes up, then you will be surprised to learn, you get asthma. A lot of people complain, Mother, I have got asthma, it is incurable, no it can definitely be cured.

In fact one doctor who is now in America has received his M. D. in this. The second illness that sets in is very common, diabetes. This Chakra also looks after the pancreas. If it gets spoilt, diabetes sets in. Those people who think a lot, plan a lot, their spleen gets affected because the job of the spleen is to release red blood corpuscles in our body in an emergency. Now a days the era is such that we are time-bound people.

We sleep late, get up early, somehow run to our car and office. Our spleen which is so sensitive feels let me give red blood corpuscles, it also gets worried with the worries of the person and then the illness that sets in is a very horrible one, blood cancer. The second illness is kidney failure, all of a sudden. First you are put on dialysis. Then you get bankrupt. Because you cannot be cured by dialysis. That is a fact, in spite of what the doctors say.] [Apart from this, there are many illnesses like constipation, terrible constipation and this also causes diseases. However, the heart cannot be saved. Because,

if the heat goes towards the heart, it is a young person, he is drinking, playing tennis, thinking also, then it catches such a person. Why? This rush of heat that will go towards the heart, will be fatal if a person gets a heart attack between the age of twenty-one and 25, he cannot survive. Now let's see how this heart is controlled. When it keeps getting this heart, the heat gets weak. Then suddenly one finds out, at the age of 55, one starts getting heart attacks.] [Then, people get worse, paralysis takes place and such horrible paralysis that the entire right side stops functioning. One Chakra can cause so many illnesses, especially those in people who plan a lot, who are very futuristic. Such people will always have a cold and sometimes they will get the u. Now imagine if one Chakra can cause so many diseases, what will happen if somebody's second Chakra gets spoilt. All these diseases that are psychosomatic, like cancer, Parkinson's they originate from the Swādhiṣhṭhāna and then in their combination other Chakras get spoilt and there is no other way to treat them. If you think doctors can treat them with medicine etc. they cannot. You have to put energy in them and for this the almighty has in the Mūlādhār bone put this energy called the Kuṇḍalinī. The name has been suggested by human beings because it is in three and a half coil and one coil in Sanskrit is called a Kundal and because it is Mother's power, it is called Kuṇḍalinī. When this energy is awakened and it passes through these Chakras and pierces through out fontanelle bone then it meets with the All-pervading Power of the Divine.] [What is the truth? The truth is that all these beautiful things you see, the trees, the

greenery, the world, we do not even think how these were made, isn't it surprising. For example these beautiful flowers, how their fragrance is who does this? If you ask a doctor, who makes my heart beat, he will say the autonomous nervous system. Now, who is this auto? If it is an auto then there is a driver inside, who is he? They have no answer to this. It is your spirit and we are alive because our spirit is alive. This does not mean that you go away to the jungles, or the Himālayas, or stand on one leg. There is no need for that.

It all happened in your previous life itself, that's why you are here. There is no need for such dramas or to spend money. You cannot buy this. Like you are a human being, you can become a great person, this is a living process, it can happen very easily and this energy is within everyone and you have to receive it.

You do not have to do anything for it, it is Sahaja, spontaneous. For example you have a seed which you have to plant in the ground. What do you have to do? Nothing, just plant it because that seed also has power and the Mother Earth also has power, it is fertile. In the same way, it is not difficult to awaken the Kuṇḍalinī within you. There is no obligation. Now, when we have this power within us and we can get it, why shouldn't we?] [Now, what are the difficulties we can face, we should understand. Like if we are trying to make a discovery. The world today is such we must get some peace. Now, until we go beyond this mind of ours, we cannot get peace. It is the Kuṇḍalinī which takes us where we are absolutely at peace within. We see everything like a witness, we do not react to anything, as

a consequence our memory improves. Whatever we want to see, a problem, as long as we are within the problem, we are unable to solve it but as soon as we come out of the problem it solves because we are connected to the Divine. We are one with the Divine, it should not be difficult but first you should have the faith. Why so many people lose faith? Maybe you have committed some mistakes, forget them. That was your past, you are not concerned with it. You are in the present, I call it the Blossom time because so many people have come, been born, Yogis flower have blossomed and with the awakening of the Kuṇḍalinī they have borne fruit. It has happened with thousands and lakhs of people and it is not difficult for it to happen to you. There is no obligation on anyone's part in this, mine or yours. It is Your own individual thing. The only thing is that after receiving it, you have to meditate for a while, there is no restriction that you do not eat this, or do this, nothing of this sort that you leave you house or children. This everyone has said, Christ said “Know thyself” Prophet Mohammed said clearly, you will be surprised, that until you know yourself, you cannot know God. Now, if others say something else, we are not concerned. If everyone has said that know yourself and it is not difficult, then why not.

Some people think that after that they will lose their business, they are very afraid. It will flourish ten fold, it does because your outlook is honest and you are satisfied. Not that like mad people you are at it, sometime this happens, then that happens, nothing like that. The madness goes away and you are absolutely

satisfied. You know that the Economic law is that wants are not satiable in general.

Like today you desire a car, then a house. Now you have a car then on one side, you want a house now.

You have a house, now you want an aeroplane. One after another, never satisfied. The reason is that these things can never satisfy you. Satisfaction is only a state of mind. If he has it, well and good, if he doesn't, it doesn't matter. He doesn't get upset and worry too much about his bodily comforts. Now an whether you make him sit on velvet, or on the floor, he is happy. He is on `bādshah,' nothing can tie him down.

He is in `Bād shahat.' You can receive all this and you have a right to do so. If you receive it, it is very good. The biggest achievement will be you will realise that over you there is a great power, a power of love. Till now none has used this power of love.] [Everyone is using might. You use this power of love and see. You are seeing that in our country there is so much turmoil. This greed has increased to such an extent, there is no need for it. These people do not have any place to keep their money, they are putting it in their walls. Now will they take their walls up with them? There is no sense left, there is a limit to one's greed. I can understand that something you do not have you enjoy. They cannot enjoy anything, they just go on and on. This is madness and there should be escape from this madness. Whatever you have, you should enjoy it. Now you will definitely feel that Mother has taken us to an ocean of joy. We have a disciple, Mr. Zafar a Muslim doctor. He came to Me and everyone was singing at that time. I don't know what happened to him.

Out of sheer joy he kept singing. I asked him, “Dr. Zafar, what happened to you?" he said, “I was in the complete bliss that's all I can say” and for hours, he was in bliss, I said “eat something” he said “I was in thoughtless awareness." Just think that you people attend so many parties, host so many parties, but you cannot get joy. Then talk about this one, that one, somebody's thing came from there, this one was saying that, all this will stop. Such friendship and such love, till now you have not seen such love in collectivity. It is such an enjoyable thing, that thousands of people are sitting together in the ocean of love. Whoever sees us is surprised. In a country like Russia there is communism in Russia. I have nothing to do with communism and nor do I approve of it. But one good thing came out of it, that there was no desire left in them. Like the government told them that we give you ats, take them in your name, they said no, don't give them in our name you keep them. Everybody is scared of having things in their name. There, God knows how many people became Sahaja Yogis. There are so many scientists, so many people with no desire. Yes, there are some 35% people who want things like Marlborough cigarettes, some 35%, not the rest, they are so well educated, intelligent people. I asked them you are not bothered, you are going to have a coup here, they said we have no problem, Mother why should we worry, we are all in the Kingdom of God we are not in this Kingdom!] [Which Chakra causes what, there is no need to bother about it. You get Self-realisation. Nowadays in the market there are lots of Gurus. Their business is such to take so much money how can you take money for

something that is invaluable? You can purchase a Guru, then that Guru is your servant, how can he be your Guru? If you can understand this, then it is good, there are many such false Gurus in our country and outside also. This also can sometimes cause harm. This Self-realisation is all your wealth. You have to receive it. For this you just have to have faith in yourself. That I have to receive it. May God bless you.] Businessman: I experienced thoughtless awareness in Your presence. It seems vey clear that Sahaja Yoga is more than just meditation.

Shri Mataji: When you come to the collectivity, your experience will deepen further.

***Contents: 1996-04-09*, Public Program, Metascience and Medicine, Medical Conference, Lady Harding Medical College, New Delhi, India**

We are all seekers of the truth. But we don't know what to seek. The truth is eternal. We cannot change it. We cannot transform it. We have to know it. Knowing the truth is not through your mind. Actually mind is a myth. You can only know it beyond your mind. This is the truth which is absolute. No one can challenge it. Everybody knows that same truth.

This is the knowledge that was called Bodh, from where the word Buddha has come, this is the knowledge that's called as Vidd from where Vedh has come. Thus, this knowledge we have to know on our central nervous system, but not knowing it mentally. This is something very important we have to learn that we have come to a state of human awareness. But it is not yet complete, if it was, there would have been no problem. Why do we

quarrel, why do we argue? So, there must be truth which is absolute and to find this truth is the aim of our evolution. That is how we have to evolve in a higher state of Self-realisation by which you get your Self-knowledge.

You have to see it as a metascience because you have to open your minds like scientists. You don't have to believe Me like blind faith. We have had lots of problems with blind faith but you have to see for yourself, judge for yourself, experiment with it and if you find that what I am telling you is the truth, then you must believe in it like honest people. As people who are to be benevolent to their family, to the country and to the whole world. Without evolution we cannot reach that state. All the arrangement for evolution is made within ourself. The power that resides in your triangular bone is called the Kuṇḍalinī.

It is the knowledge in this country we have known for thousands and thousands of years. It is our heritage.

As Indians, we have inherited all this knowledge that somehow it was all closed down by the Western influence. Of course, the Western influence is not harmful as far as the medicine is concerned. But, we have to go beyond it to see that whatever knowledge we have is not only for one eye, something for another eye, something specializing, going into such minute details, ultimately reaching bifurcations. Sahaja Yoga is the synthesis of the whole thing. We go to the basics within ourself. How do we get sick? The basics are, what I am going to tell you, what you will not believe as I have told you. But, please try to understand it as scientists. We have within ourself seven centers which are energy centers which give us

subtle energy for everything, for our mental, physical, emotional and spiritual growth. When this energy from any one of these centers gets exhausted, then we get ill.

Now, the question of cancer. Any one of our centers can be affected. The center part is Parasympathetic and the left and the right are the sympathetic. Now what happens? We start using, say the energy of a particular center or of three centers, we start using that energy say, by thinking too much, working too much, whichever way. It becomes a small space for the energy. Ultimately something can happen on the left side that's more emotional. Then it breaks. When it breaks, the connection with the main is lost.

This right-sided energy becomes on its own. When it becomes on its own, it starts growing. When this power Kuṇḍalinī passes through that center, it not only brings them together but also nourishes them, also it integrates with other centers.

It's a fact, it has cured many blood cancer patients and other cancer patients it is a fact. But understand it first of all we should know we are not in the basics. What we are doing, that if the tree is sick we are treating the leaves or the flowers but we have to go to the root if we have to treat the whole tree. This is the knowledge of the roots which we have in our country for thousands of years. When the centers are nourished, they create balance.

There are many things still in the medical science that we don't know because I was a medical student and I was quite worried as to how to talk to medical science people about it, which is not mentioned in any of the books. For example we don't know that the sympathetic systems

are opposite to each other. In a way they are complementary but they are not in the same function. The pituitary is the right sympathetic through a Nāḍī called Piñgalā Nāḍī and the pineal is the left side, another Nāḍī called Iḍā. These two are complementary in a way and that's why they are opposite in action. The one which is on the left side is for emotional side. The right side is the one for action. What is the root cause of getting asthma, diabetes? The root cause is our liver. We don't know much about it in medical science I assure you. Within the center which is called the Swādhiṣhṭhān Chakra, the second center which starts from the Nābhī, the navel.

This center goes round and round and supplies the aortic plexus. This plexus is looking after many things.

It is looking after the liver, pancreas, spleen, kidneys. When we start thinking we don't know from where this energy comes. This energy comes from the same Swādhiṣhṭhān Chakra. Same Swādhiṣhṭhān Chakra gives this energy futuristic movement.

So the energy that is to be used is forced upon.

Liver, in very general terminology, collects all the poison of the body and passes heat into the circulation.

This liver gets affected because it is neglected. When this center doesn't look after it, it is neglected. Then the heat starts going all over. It cannot get into the blood so it starts going upward, downward, sideways.

First it goes to the right side of heart we call it the right Heart. According to Sahaja Yoga there are three hearts not only one. On the right side if the heart center which looks after your lungs gets hot so it affects the lungs in a

way because it affects that center. That's how you get asthma. When you put ice on your liver, the ice is cooling down your liver. It's a simple thing.

The heat can move to your pancreas. When it goes to your pancreas, you get diabetes. This diabetes is a common disease not only in doctors but lawyers and bureaucrats especially because they plan too much.

If you go to a village people take three to four spoons of sugar and the spoon must stand at right angles otherwise they won't think it's tea. They never get any diabetes. What is the reason? Whatever they earn, they spend and sleep off. They are not bothered about insurance or anything.

The third thing that gets affected that is even much worse, is your spleen. Nowadays in the morning when you get up, read the newspaper anybody who is sensitive can get a shock.

So your sympathetic goes into activity and your spleen starts jumping. Poor spleen doesn't know how to deal with such a hectic person. In America people even brush their teeth in the car. They are so much in a hurry, so time bound.

We have become so speedy that our body cannot follow that speed. This poor spleen cannot understand how to cope with this hectic person, it goes mad and disease sets in called blood cancer. Definitely blood cancer has been cured, that's fact. They were told, doctors were being very fair and honest that the patient will not live more than one month. Nine years have passed but he is fine. This thing is such big example for us to see that you don't have to take out the blood or anything. You just get

cured How? Because when the Kuṇḍalinī goes to this Swādhiṣhṭhān Chakra she finds that poor thing has no energy, so it supplies all the energy. By that energy, they get alright.

Then it comes to another which is our kidneys. When kidney fails they can't pass urine so put them on dialysis. I haven't met one person who has been cured out of dialysis. Then comes your intestine.

Intestines also gets constricted. Then your digestion goes out. You get belching, the worst that you get is constipation. This is the greatest curse of modern times that people suffer from this horrible thing called constipation. It's very unnatural, but it happens. This happens when heat starts moving up. If a boy is about 21-25 years of age he drinks too much and plays tennis and works very hard, he will get a heart attack. That's a fatal heart attack. At that age you cannot be saved, later on also this kind of heat fermentation on the heart goes on and people get massive heart attack.

Another thing which is also very dangerous is that this heat reaches the brain. On the right side then brain also fails and you get paralysis on the right side. This is only with one center. When you put also ice here you will be surprised that paralysis can be cured.

Glasses can got rid of if you put ice on the back Āgñyā. Because Swādhiṣhṭhān Chakra is here. Sahaja Yoga discipline and ice can work it out. You can imagine with one center how many diseases you can cure especially you people who are working as doctors are quite open to it.

Basically if you do not understand that we just start treating somebody for the eyes, for diabetes, nothing will work. They become really like psychosomatics which cannot be cured, which has no solution.

But the solution lies in the metascience of medicine where you have to just accept it. Just accept as a hypothesis and then try, if it works, why not. Of course there is one thing, you cannot take money for it because you are not using anything but the power of a person who is Divine power That does not mean that doctors will starve because they have no money. Because you see very few people actually come to Sahaja Yoga. Most of them just believe in doctors only. For the smallest thing they will run to doctors.

Also the rich people will never come to Sahaja Yoga. What we have found that there is nothing to worry about your profession. But once you become enlightened with this Divine power you yourself you become the power. I have known of a surgeon, he said Mother without doing much I am performing surgery and it works out wonders because from My hand this power is flowing. This power is there to cure, it heals.

If they believe in Christ that He only healed twenty-one people. But how He did, how He did that nobody knows.

Even people who are artists, musicians, they are so much endowed with energy that they start playing something miraculously better. Actually it cannot be forced on anyone. You have to ask for it.

Actually if you know of a person who is very adamant, arrogant, also who is an idiot, it won't work.

We have to put them in proper shape. Once they are in proper shape it works. But all of you have this power and it is your birthright to have this Self-realisation.

They say this is my head, this is my body, this is my mind. Who is the owner of this mind? You ask the doctor who runs your heart? He will say autonomous nervous system. Alright who is this auto? That is what we have to know. We have to be the spirit. Because we are not this body, this mind, we are not these emotions and ego or our conditionings but we are the pure spirit.

The second one is that there is All-pervading Power of the Divine which we have never felt before.

Everybody has described. Ādi Shañkara has said, described it as, “Saleelām, Saleelām" cool and cool. In the bible it is said Cool Breeze of the holy ghost. In the Quran it is described as `Ruh'. Mohammed Sahib had said very clearly, you cannot know God until you know yourself. The whole of our Indian culture is for knowing ourself, we call it Moksha, we call it Self-realisation, Ātmā sākṣhātkar, call it by any name whatsoever. But all these efforts were to get to yourself.

In these modern times one thing good has happened. There are so many seekers of truth all over.

Second thing is that is Sahaja it is spontaneous. You don't have to go to the Himālayas, don't have to stand on your heads you didn't have to give up this, give up your wife, nothing. You can maintain yourself, it works automatically, you don't have to do reading or any kind of chanting. It is so simple. If the doctors become that they will become the greatest scientists of India as far as the medical science is concerned. I was surprised in

Russia when they had about 250 doctors and about 200 scientists sitting of a very high calibre. I started talking on science and using scientific terminology.

So they said Mother, we don't want, we want to know the science of Divine. You talk to us about the science of Divine and whatever I said they just tried to find out. I told them that all these seven centers are represented in the brain. Now they have such equipment to do it. There is one place called Novosibirsk. Where they have got all the scientists.

They have a beautiful campus of all the scientists and all kinds of laboratories. When I told them that you can find out if these centers are represented in the brain they found out. They worked it out. Also there was an American scientist who found out what I told you that the first Chakra is made of carbon. Carbon has four valencies. I said now you do one thing, take a photograph of a carbon atom and make a model of it.

If you see the model from the right to the left, you will see a Swastika. When you see from left to right what you see will be Omkāra. And if you see from down to up you will see alpha and omega. You will see omega first and then alpha. Now Christ has said I am the Alpha and I am the Omega. Gaṇeśha also is Omkāra.

So, Gaṇeśha incarnated as Christ. We don't know that this Gaṇeśha is acting within us. These things are not so much hanging in the air, deities and all but they are within us. They stay within us and for which at least as Indians we must open out minds. As Western people I have tried to open their minds, doctors in Russia, Bulgaria, also in Romania, I have seen these doctors

were amazed when I told them about this and that I could explain so many things, then and they are at it now. They have started working at it. They are not so money-oriented. Actually Russians are not so money-oriented.

So they are working at it and they are trying to prove whatever I have said. Instead of doubting Me and saying how can it happen, who were the deity. In the same way you cannot say, certain medicines, how they work.

Now take aspirin. You cannot say what aspirin does. But it does help. In the same way we will see how this vibrations of the Divine help you, you will be amazed. You can feel them on your finger tips, on the palm and even a child can say what centers they are catching. You will know about yourself and about others because you become collectively conscious. You become a very intense personality. Sitting down here you can feel everyone and you can know, you don't have to go to the rigmarole of this diagnosis, what is the diagnosis. But then also you cannot find out but here you can know on the finger tips, you can know and find it. All those powers are within you. You don't know how you are you don't know about it.

What wealth, what spirituality lies within Indians. They are tremendous, I must tell you when your spirit stands in your attention you become a very powerful person, a very valued person. At the same time you become extremely compassionate and all, You can, you see, give up anything you want because you start seeing what is destructive.

You have to exercise your realisation otherwise it cannot work. You cannot pay for it. It is Divine Love for which you cannot pay, which people do not understand it. If the Guru is paid by you, he cannot be your Guru, he is your servant, you cannot pay for it, it's an evolutionary process, it's a living process of evolution. For example if you have a seed in your hand and you put it in the Mother Earth, it will sprout by itself, spontaneously. You don't have to stand on your head. Because the Mother Earth has the power to sprout it and the built in seed has the powers. In the same way you are all capable of getting your Selfrealisation.

I say you should really open your mind, this knowledge which was not available to us, before. I know, that 300 years ago when Britishers were here you had to have English and their medicine. But even I was happy to know that about Kuṇḍalinī. At least they talk about Kuṇḍalinī and say there is a power acting.

Something, somewhere we find. But unless and until you get your Self-realisation, you cannot do anything about yourself or about others. Then you can cure people. You can give them realisation and you enjoy the real peace. You enjoy the real peace of your being when you become thoughtlessly aware.

Then you enjoy yourself fully and that enjoyment is so Divine that cannot be described and this enjoyment you all can have if you stay in that state of Self-realisation.

Some people grow so fast. But some people require to meditate and then it works out. Especially people who are supposed to be intellectuals, who have conditionings

of medical science or any science. There is a great cloud here which has to be crossed.

But once you understand how it works, how it acts you are amazed. It's no miracle as such but one has to see for yourself and understand. Because if you do not open your mind, nobody can force you. I am very happy today that I could speak to the medical professionals and medical students and such august company here. I could never imagine that any day I will be able to address you, because, you see, I was selected for Balakram Medical college, only six girls were selected in merit, but they rejected Me because I was not from north.

So I went to, I travelled up to Lahore and went and saw the principal and I told him that this is sheer injustice because you say that this is for the whole of India. Then how can you say that I am not a Punjabi. I can speak Punjabi very well. You will have to select Me.

So, he said from where do you come? I said from Nagpur. He said, “Oh, my god, you are the daughter of such and such person." “Yes I am because My mother was a serving in the Mental Hospital, both of them were there." He said if there is one girl who does not come, then I will admit you and that's how I was there. A wonderful college it was, we had very nice lecturers and all but, you see then this problem started and I came to Delhi and then My parents married Me off. My husband said you want to study more, I said I do, he said there is no need for it and that's that. I just wanted to know what you call what, just wanted to know the names then I did psychology some I should say some dictionaries. That's how I came to know what's called what because there is

no name, in the Divine. It is only name given by doctors, Psychologists.

So, to talk to them, I wanted to have that.

It's a fact that if you are scientists and doctors you can change such a lot of these ideas and dogmas that are sitting on your head. For example, now genes is very important nowadays, people are talking about genes is a myth, they are carrying, also that genes are inherited and cannot be cured. In Sahaja Yoga it can be cured. The complete data changes with Sahaja Yoga and that's how a very nasty person can be changed. That's the point of changing the data base and it works out. We have worked it and it has been proved.

But to prove it you see, the scientific method is that at least a hundred doctors must approve and there should be 2,000 disciples and all. But at least for yourself you first of all achieve it and then see for yourself how many powers you have in every walk of life because it is the totality I am talking about it's not one person here, one person there, it's totality.

May God bless you.

Contents: 1996-04-14 **Easter Pūjā (Hindi), Kolkata, India**

Today we are doing Easter Pūjā. Today is a very important day for Sahaja Yogis because Isa Messiah [Jesus] has shown us that redemption of human beings is possible and for that redemption we should always put in an effort. There is also a meaning why He was crucified. He was crucified on the cross and this cross is a symbol of the Swastika on the Āgñyā Chakra. He was crucified

and He left His body there only. He told some important things at that time and one most important thing out of this was “Wait for the Mother", “Think of the Mother" [“Behold the Mother"]. Everybody can interpret it in a different way, but it seems He said that He will send for us such a Shakti [power] who has three channels, Trigunātmika and that is described very beautifully. One of these Shaktis [powers] will give us comfort. This comfortgiving power in us is Mahākālī's power which gives us comfort, which cures our diseases, which solves [corrects] many questions of our past. The second power, which He gave us, which He sent to us, was Mahāsaraswatī and to this Mahāsaraswatī Power, He called Counsellor, the one who will counsel you, that means, who helps us for Yognirūpan [to see the form of Yoga]. With the help of this second power, we will get Gñyān [Knowledge], we will know the subtle knowledge. And the third power, [Mahālakṣhmī] with the help of which we will get our redemption.

Thus, He had talked about these three powers. Buddha also said that I will send you Maitreya, that means three types of mothers, Matain-Ekritya-Maitreya.

People did not understand what this Maitreya is and they made it Maitreya. This Maitreya can be only in Ādi Shakti, simultaneously, Ādi Shakti, He must have told as Primordial Mother. But the one who corrected Bible, he made it as Holy Ghost and made a dove instead of it. Because the one who corrected the Bible hated women and he did not believe that a woman could also do such a great work.

Because of this hatred, he made a strange form of it [the Holy Ghost] and the second thing is that it is a dove and a dove means that she will be the messenger of peace. But He did not talk of a woman or that she will be a woman. But in our Shāstras it is written “Sahasrāre Mahāmāyā” that means She will be in the form of Mahāmāyā. People will not recognize Her and you have to get your Self-realisation to recognize Her. If you don't get your realisation, you cannot recognize Her.

In His lifetime He [Jesus] explained everything in a very open manner, He could do. Many things He told and many things He didn't, but still some truth came out which they could not change. It was very necessary for Sahaja Yoga that Isa Messiah [Jesus] came. He was a Chir Balak [boy from olden times] and now it is proved that He was an incarnation of Śhrī Gaṇeśha. Śhrī Gaṇeśha incarnated only once in the world and that is in the form of Śhrī Jesus [Isa] Messiah.

The work of these three [Buddha, Mahāvīra, Jesus (Isa)] was done at the level of Tapasya and therefore they worked in the Murdha of Virāta [Brain] and there is a place of Tapasya in the work of all the three, that means human beings should do the Tapasya and they can cross through Āgñyā only with Tapasya.

It was very necessary to pierce through Āgñyā Chakra, without that, Kuṇḍalinī cannot rise. Resurrection of Jesus facilitated the piercing of the Āgñyā Chakra. First He died and then His resurrection took place.

Therefore there is a great message from Easter that because of Resurrection of Isa Messiah [Jesus], we could get our resurrection. The most difficult Chakra in a

human being is the Āgñyā Chakra because a human being is always thinking. This continuous thinking results in a condition of vaporization of mind in the head and he cannot go beyond these thoughts. He cannot go beyond these thoughts. You can go beyond thinking only when the Āgñyā Chakra is opened. Therefore it can be said that Sahaja Yoga would have been very difficult if Isa [Jesus] would not have resurrected after leaving his body. However the work was done by all the Incarnations at their respective places and at respective times. But the work which was done by the resurrection of Isa [Jesus] was marvelous. That is the reason why it is not difficult to open Āgñyā. It is not difficult to go beyond Āgñyā. There have been many Gurus, many great Gurus. They did a great work. They did so many things so that people could get their Jāgruti [awareness] to God and they could attract their attention to Self-realisation.

He [Jesus] came to our country because the people of His country where He lived had no subtleness in their way of thinking. They had no spirituality. That is why He [Jesus] came to India and met King Shālivāhan in Kashmir. Shālivāhan asked Him “What is your name?" He replied “My name is Isa Messiah" [Isa Messiah means the one who brings some message] and I am coming from that country where Malekh lives". Malekh means those people who desire something dirty. Now you see, all foreign programs, they are all dirty. These people like only dirty things, crazy things. If you see their movies you don't understand whether they are mad people or something else.

So in our country, these people were called Malekh [means people who desire only dirty things]. How can I go to these people [Malekh]. India is My country because I am a spiritual person. Shālivāhan said that “you are such a saintly person. You go back to your country and teach those people Nirmal TatTwam [principle of purity]. If you make Nirmal Tattwa there, people will get rid of desiring these dirty things." He went back, somehow. He lived three and a half years and then He was crucified. This He knew was necessary. But the way (in a dignified manner) He left his body shows what a unique personality He had. And in this short period of three and a half years of His life, what He did was great. It is true that He could not give realisation to anyone because there were no seekers of truth like you at that time. I have a good fortune, therefore this work before Self-realisation helped the people to know that there is another life beyond that human life. He said “You have to take a new birth." His own resurrection resulted also by taking a new birth.

It is also said in our country that this second birth is like a bird who comes out of the egg and is called Dvija [who is born twice] and when he is transformed and he gets the full power, he can fly anywhere in the world. He gets all the communication powers. You know how the birds fly from Siberia to India. They come here in the winter and go back in summer. They have neither Radar nor Aeroplane. They have nothing. How do they come exactly to the same place, to the same pond where they used to come. Their children come also to the same place. Once

they did an experiment where they hid some of their children, but they could find them.

Some of them they could not find and they themselves flew to India alone.

They had no Guide. But they reached perfectly alright.

So we can say that God has made everything so systematic and beautiful that we can get our resurrection.

I call it as Blossom time. It is amazing to see thousands of you people sitting here and there are thousands of such people in some other places. All these people were not here at the time of Isa Messiah and nobody knew at that time about Self-realisation and why it is necessary to get Self-realisation. Today, also there are some blind people who don't understand these things. But thanks to the Great Gurus in our country, a big problem is solved that people know about it. Everybody knows that we should get second birth. We should know ourselves. Sufis say also the same thing. Even in all the Shāstras and religions the same thing is said.

Today is the new year day in Bengal, congratulations for that and therefore we can talk about its resurrection also. Bengal will be benefitted with this resurrection which we celebrated here. The culture, art of Bengal and the great patriots and sacrificers of Bengal who brought the country to a higher level, they are now lost somewhere else. Foreign rule is finished and the English people went back but we have accepted this foreign culture even more now and we don't know where these people have landed. We don't know what their condition is. Where will these people land? What have these people got? Many

Christians think that Isa [Jesus] was born in England and to become Hindu for them is to wear a Dhoti.

Such type of imaginations we have in our head. We think that we can see Isa from very close by becoming English. He [Jesus] named these people Malekh and we are giving so much respect to them. These people have now understood that our culture, our philosophy, opinion about Dharma [Religion] is very subtle and pure and people of our country take to Sahaja Yoga very fast. But it is the duty of Sahaja Yogis that they share this mutual brotherhood and bring this message of resurrection everywhere because the condition of your country cannot be improved without this change, without this spiritualism. We cannot improve it by looking at the sky.

Therefore everybody should try and think over it that to how many people we talk about Sahaja Yoga.

Isa was completely alone. There was nobody with Him. He had only twelve disciples and some of them half baked. In spite of that He worked very hard. He gave us a great message by his resurrection. This message, which seems to be quite of extrovert nature is, in reality, a subtle work on our Āgñyā. Only by working on Āgñyā we reach that state where we can pierce through Brahmarandhra [Sahasrāra]. He [Jesus] always talked about forgiveness, that you should forgive everybody. When He was on the cross He said “Oh God! Please forgive them. They know not what they do." Therefore please forgive them. These people are blind.

He said with so much love, even at that time, when the people were hammering nails on his body and crowning him with thorns that “Oh God! Please forgive them. They

know not what they do." This is a wonder of Āgñyā Chakra.

Therefore for the opening of Āgñyā Chakra, I always say “Please forgive everybody. Please forgive everybody fully." Half of the thoughts in us are like that. For example, he misbehaved towards Me or made problems for Me, how can I correct him? When we surrender everything to Param-Chaitanya, He will correct it. I tell you, I fear if some people do wrong things in Sahaja Yoga. I really start worrying that these people will get problems now because on the one side is sitting Jesus, on the other side is sitting Śhrī Gaṇeśha and the third and fourth side, Śhrī Hanumāna and Śhrī Bhairava. They will not be able to set them free from the net of these four.

Somebody is doing a little bit wrong in the matter of money or in the matter of work, I always try to solve it so that no problem comes to him because when you enter a pure atmosphere, for example, this is a white bed sheet and if a black spot comes on it, it is immediately visible.

Therefore you have been made pure (Nirmal) and if a black spot comes thereon, these people will catch you immediately and I don't know what punishment you'll get. This is very difficult. Jesus let himself be crucified at that time but He said, about Me, that “if you do anything against the Ādi Shakti, I will not allow." I see when these people do wrong, He doesn't bear. If you call Me Mother, I have respect for that.

Sometimes they misbehave with Me, then I say, that “it doesn't matter, they have called Me once `Mother' ", but these people don't understand it. Therefore we should

remember that it is our previous birth's hard work [tapasya] and devotion which facilitated our resurrection.

So then you have the special blessing, in this birth, to get what people think is very difficult or impossible.

So you have to be careful that you don't do anything wrong, because if you do anything wrong, your purity is caught immediately. I am not making you fearful, I am telling you the truth.

So whatever you do, do it full of love and full of joy. It can happen that somebody troubles you, it doesn't matter. How long he troubles you will be taken into account. Therefore you should not forget at any stage, at any state, in any field, that you are a Sahaja Yogi. How many yogis were there in olden times? A very few Sufis. Nizamuddin was there and Shah came to cut his throat. He told him that, “if you don't bow down to me, I will cut your throat." Next day his own throat was cut.

So, if there is such a type of person, there is no need to fear. If you have to fear at all then only for that which will happen to them. Oh God! Please save them. You are in the Kingdom of God. You are not like other people. You have to remember that you are not alone. You are fully protected. Why do you worry if you have such a protection? Isa Messiah was never upset, even when He was crucified and what worse can happen than that to you.

Many people come to Me and say that “Mother, I have this problem, I have that problem." This means that you are not a Sahaja Yogi. The right thing comes out that you are not a Sahaja Yogi. If somebody is a Sahaja Yogi, he can't have a problem. Problems are playing somewhere

down, only to be witnessed and you are sitting at a very high place. But if we are always talking about problems, we should realise that something is not OK. We should meditate, introspect and assume that we are Sahaja Yogis, which awakens a feeling of inner peace and self-confidence and the people can see it. You don't have to say anything. There is no need to quarrel with anybody. Just keep quiet and Param-Chaitanya will do the rest, even if they are so-called very clever people. But if you yourself have done something wrong, then Param-Chaitanya will take account of you first. Therefore we should *[UNCLEAR]*.

Jesus had a very short life of 33 years, what a short life. And He was wandering all the time. While wandering, He went to India and how much He worked in His life.

So many things were founded after His name, so many Institutions, this and that. Everything is deceptive. But how much he worked and in the end wrong things were given in His mouth and false institutions were grounded. But there is nothing in this outer religion. You can see it now. The diamond which was covered by them is shining inside you now and is operative in your Āgñyā Chakra. The more your forgiving power increases, the higher you will go in Sahasrāra. Now the difficult thing for the Christians is that, as they are born Christians, they think of only Jesus or Jesus's Mother. They don't go beyond that. There may be other incarnations, it is of no interest to them. The same is with the Hindus. Hindus know only Śhrī Kṛiṣhṇa or Śhrī Shiva, they are lost in that.

But you have reached much higher now. You have got your realisation now. You have become Sufis.

Therefore you have to take the essence of all these things and to search the truth in everything. There are many false things in these religions. For example, in Christianity, I don't know whether you know, the same is with Jews and Muslims, that when you die, you bury your body and don't burn it and when you get your resurrection, this body will come out. You get your resurrection only if you die in the name of God and you sacrifice your life for Him. Now you think, what will come out after 500 years? If you are buried, what bones etc. will come out after 500 years? How will resurrection take place? Many people believe in it and this belief is so deep that some people came to Me from Bosnia. I asked them why are you dying? Leave this nonsense, you are Muslims, you believe in Nirākāra. For what are you fighting? For land, what does it mean? They told Me that “it is written in our Shāstras, that if you die in the name of God, then such and such will happen." I asked them “Where is God's name in this type of dying?", please tell Me.

The second thing is, that if you die and get your resurrection after 500 years, what will come out of this. On the other hand, you take so much land for these graves and live as bhoots in these graves. I must say that our Shāstras are correct in this regard, that Ātmā leaves the body after death and Jīvātmā takes the new birth. This is true, that Jīvātmā does not die. But to believe that the resurrection of body will take place after 500 years is complete foolishness.

Sometimes I don't understand why these people are fighting because of this foolishness.

Today there is fighting going on in Israel and tomorrow somewhere else. Everywhere there is some problem because of religion. Wherever you go there is fighting because of religion. I said yesterday also that there is no separate religion. They are all connected. This is clear, that all of them have described about the people who came before them. Why this fighting then? Because some people say that they are mediators. They call them Dharma-martand [those who have command on Dharma] and do just the opposite of that which was told by these saints.

Now you see, Isa [Jesus] had said a very important thing, that your eyes should be without adultery.

But Western people do just the opposite of this. “Thou shall not have adulterous eyes." How subtle is this? “Thou shall not have adulterous eyes." Not to think of adultery, even eyes should not be adulterous.

There should not be adultery in the mind, very subtle thing. He said, “and when I went to a foreign country what did I see, everybody's eyes moving here and there [irting]." I didn't see anybody whose eyes were steady except Sahaja Yogis. Before coming to Sahaja Yoga, the eyes are moving here and there.

Women are looking at men and vice-versa and this is going on.

Some are looking at the things.

So who followed this important message of Him [Christ]. Who is following Him? Nobody. The only reason is that they have not got their realisation. I have seen the people in the West when they get their realisation, their eyes also get very steady. Love, peace and joy (ānand)

flows from this steadiness. How this happens is because the impurity in the eyes vanish and the eyes become pure [Nirmal]. The eyes become like that which Isa said. But this cannot happen only with words. In the west, this disease is too much.

So what we understand is that we can't do what He [Christ] said.

Every religion is the same. There is no religion where the people do the same as what is told to them.

The reason is, that they are not Samarth [capable]. Samarth means the same thing. In this case they can't do what they are supposed to do.

Somebody says that he is a sikh, but he drinks wine.

Somebody says, I am Christian and his eyes are full of lust.

Somebody says he is a Jain and he does the cloth business and so on. They do what they should not do. The reason is that Dharma [Religion] is not yet fully awakened in us and it can be awakened only by Sahaja Yoga. If you don't respect your Self-realisation and don't ascend in that, you can get different problems. These problems which you don't feel much before realisation, feel more now because you have become sensitive now. Therefore we should know what a great thing we have got. We are equipped with that. We should assume our dignity and glory now.

In the same way when Isa got up from his grave, He and His mind were more pure and beautiful. His talks were more beautiful and open. Therefore He [Jesus] is a great Sahaja Yogi for us. He had already achieved everything

before. He came after having everything and He died for you so that your Āgñyā Chakra could be opened. Therefore we should keep away from Ego and similar things. If you have this Ego, then you can become anything, you can become Hitler. If you put attention on yourself and try to understand why you assume yourself a big shot in the whole world. We should see the pure character of Isa who opened the Āgñyā and helped us to rise above that. Our life should also be pure [Nirmal] like that. There is a complete arrangement of married life and other things in Sahaja Yoga.

Isa had not married because He didn't need it, but for you there is such a complete arrangement and you can live fully like normal people. From inside you are abnormal. We should understand our special role as Isa and Sufis did. They fought alone against this world and did such a great work. You people have so many brothers and sisters in the world. You should have so much self-confidence in you because you are not alone. They all say the same thing like you say. All of you have the same thing as they have.

If you get this thing, You should realise its importance. There is nothing more valuable than that. I am very happy that such a big work is done in Calcutta [Kolkata]. We have so many new Sahaja Yogis. There is so much mutual love and no fighting. This is a big thing. I think there must be Devī's compassion here that people have gone so deep after getting to Sahaj. Women should also work like the men and when Sahaja Yoga spreads all over, you will see that Bengal will become a beautiful form.

Anant Ashirwad to all of you.

Contents: **1996-04-xx Meeting with Hamid Mylany and other Sahaja Yogis for the `Vibrated Seeds for Bosnia' Project, Part 2, Palazzo Doria, Cabella Ligure, Italy** [For Part 1 see 1996-03-xx.]

[Back in Austria after the Birthday Celebrations, Hamid Milany and other Sahaja Yogis initiate a collection so we could go ahead with our project. They collect altogether AS 107,500 (including donations from Germany and France) and buy about 7-8 tons of various seeds, mainly wheat. But they are not sure how are they going to get the seeds vibrated as Shri Mataji was still in the Indian Subcontinent. They find out just the week before they were to travel down to Bosnia that Shri Mataji was returning to Cabella.

Only one week later and the whole project would have had to be postponed until autumn as it would have been then too late to sow the seeds.] [They travel down to Cabella with a small portion of each of the types of seeds which we were donating.

Shri Mataji spends at least two hours talking about Muslims and in general how they are the cause of most of the wars that are going on in the world at the moment.] Hamid Mylany: Shri Mataji, I know that our country is a horrible country and that Muslims are terribly fanatical and aggressive, but there are some nice ones in Sahaja Yoga who would really like to help prepare a Pūjā. It would help our country tremendously.

[With that, She laughed and blessed Iran, along with Australia and the Far East to prepare Śhrī Gaṇeśha Pūjā:]

They should help to prepare the first Chakra, the Mūlādhāra, Śhrī Gaṇeśha Pūjā.

[Then Shri Mataji proceeds to vibrate the seeds and works on them intensively. Shri Mataji asks Hamid to identify each type of seed in detail. At the end:] Alright, it is alright. You have My full attention and full blessings. You can go.

Contents: 1996-05-02 **International Award `La Plejade' received by (Guido on behalf of) Shri Mataji, Rome, Italy**

The following motivations were provided as the basis for selecting Shri Mataji to receive this award by the judges: In a world where one can feel the urgent need to find new solutions to the problems of individuals and of humanity at large, searching for something that can allow one to go deep into the awareness of existence itself, Shri Mataji (who is presently a candidate for the next Nobel Prize for Peace), founder of Sahaja Yoga, is proposing new directions on the path of human evolution through meetings and initiatives, guiding us to meditate on the deepest dimensions of ourselves and helping the foundation of a balanced and serene society where peace can be actualised, starting in the deep self of each individual.

[The award was received by Guido on behalf of Shri Mataji. He briefly thanks them while making the point in a very respectful and gentle way that it is an honour for them to give the award to Shri Mataji.]

Contents: 1996-05-05 **Sahasrāra Pūjā, You Must Feel Responsible but be Humble, Cabella Ligure, Italy**

Today we are celebrating the opening of the Sahasrāra, on this day. I must say it was a great happening that took place for all the humanity. It was such an achievement, which I never realised before, now I can see, that without Self-realisation it would have been impossible to talk to people. When this happened I thought that, how will I talk to people about it, because no-one would understand and it would be a big mistake, on My part, to say something about Sahasrāra. Because even about Sahasrāra, nowhere in the scriptures something was described, it was absolutely an ambiguous description, I would say, where people could not have even thought that there is a realm beyond Sahasrāra. And one has to enter into that realm where is the reality. That time, what I saw around Me I felt was all darkness and unless and until there are many lights, people will never realise that how important it is to have lights.

It is a human error, also, all the time, that if somebody achieves something, then they put that person on to a shelf. For example, Christ, alright, he was Christ, we are not Christ. Mohammed Sahib, he was Mohammed Sahib, we are not Mohammed Sahib. Rāma was Rāma, Kṛiṣhṇa was Kṛiṣhṇa, we are not that. How can you expect human beings to behave like them? So, absolutely they are separated. The Divine personalities are away, very much away from human personalities. It was just an adoration, I can say, faith, but when they said we tried to follow them, they could not. They could not follow them, because I think human movement is on parallel lines with

the Divine and these lines do not meet, unless and until you give them Self-realisation. Human level is moving on another plane and it has to come up to a higher plane to understand that, what they know is not reality. I wouldn't say what is the debt for that, because in My own experience, all kinds of people came to Sahaja Yoga. There are people described to be very bad, cruel and other ones who were very licentious, this, that, then other ones who were cheats, they said, “Mother they are horrible." But I've seen that, every human being is as if made of the same character, as far as the spirit is concerned. Outside they may be different to look at, their way of talking may be different, their styles may be different, their fondness for things may be different, but inside they are all very beautiful. And this I found out, one after another, you don't know how much it was giving Me joy, not only joy, but also encouragement, support and patience. And then now, you see, how Sahaja Yoga has grown.

The greatest thing has now happened is, which I realise, I'm very happy about it, that Sahaja Yogis feel very responsible about Sahaja Yoga. And they feel that they have to spread this enlightenment everywhere.

It is their innate desire now to spread Sahaja Yoga. Firstly it was that, they should become spirits. Before that also, there were some people who didn't actually seek the spirit, but they also became Sahaja Yogis.

And I'm surprised, with some of you, that I never expected that they would go so far and suddenly you hear that such and such a person has gone there, has done this, has done this.

So, when you came into the realm of reality, I don't know which principle you accepted first, that's your understanding. But one thing you realised that you are definitely connected with the Divine.

Some people had tremendous experiences, some had mild experiences, but most of them, I saw, started believing in themselves, understanding themselves and having confidence about themselves. Because there are so many myths about God, religion, Gurus, that, when they saw the light of the spirit, which gave them a sense of reality, it was as if they steadied their minds, they steadied themselves. All this happened, I must say, in a very short time. I didn't say that it took Me long, or I had to go through lots of various experiences. Because to Me, all these experiences are nothing. If a ship is seaworthy, it can face all kinds of high tides and all kinds of sharks and everything, without any difficulty, because it is seaworthy.

So I didn't feel that way, but only I felt that from human level to this spiritual level, to this Divine level, when you are coming, then some of that still lingers on, some of that is still there. It has to be cleansed, it has to be brightened, or we should say, or absolutely enlightened. But what was the great thing about Sahaja Yoga, that you yourself did all that. It is nice to say “Mother, you did this, you did that", maybe the enlightenment part of it. Say now there are lights here and these lights, unless and until they are attended to, looked after and given oil of love, how can they go on burning? This is something, what I must say that, you people somehow or another realised how important it was to become good Sahaja

Yogis. Maybe introspection, I don't say, maybe somebody else talked about it, maybe it's your own understanding, whatever it was, all of you tried to be good Sahaja Yogis.

Of course, there are people who are sometimes very angry with Me, like “Why don't you cure my sister, or why don't you cure my father", if you are God. This, that is there. But it makes no difference to Me, because they are so frustrated, so upset, so they are talking like that. If you see one or two persons here and there, you see here thousands, such beautiful people. Complete emancipation of this earth, of this globe, I'm sure will take place, if you people all take up the responsibility.

The responsibility has certain problems, which we should know. When you feel responsible, you must know that you are not in charge, one thing. Secondly, you also must know, that there are so many other forces, so many angels and ganas are with you, you are not alone.

So to think that you are doing anything will make you, maybe egoistical. At that time, what you have to do, is best is to say “alright, I'm not doing anything, it is the Divine that is working it out." Not that the Divine wants any credit for it, but by saying that, this balloon of ego will not come up. And you will become humble and this humility will definitely improve this great tree of spirituality within you. Definitely it will make you a very evolved personality, no doubt about it. But first of all, we have to say “I'm not doing anything” it's very important to understand, when you have spiritual authority to do things. It is not a testing ground, I can tell you this much. Many people think that Mother is testing us. I'm not testing you, you are testing yourself. I'm not saying don't

do this or don't do that, you are testing yourself and now you must know that, you are in the beautiful garden of reality, where very few have entered. And there in that garden, when you enter, what do you see is, everything is full of beauty. Every person has something sweet about himself, because all other Sahaja Yogis are also having the same kind of experiences of this reality, which cannot be described in words, but you start feeling it, that oneness, that nearness, that friendship, without any expectation, you start feeling, oh, it's a Sahaja Yogi. A kind of a complete integrated organism as you become, you become an organization I should say, which is a living organization. In that you do not feel you are something separate, any Sahaja Yogi, whether he is highly placed or he's not doing much in life.

This integration, this oneness, this feeling of identification with others makes you so large, so big, so great, so powerful. You are not alone and you say, I'm not doing anything.

So you become so humble, that you forget all these false ideas about class consciousness or religion consciousness or I don't know, all sorts of consciousness people have. I don't know much about these consciousness's that human beings suffer from, but, I've seen how it happens. And when that humility becomes your character, not that you are humble because there is something to be done, you are humble. When people are doing some sort of say, business, they will be extremely humble and nice, but they will be very unkind otherwise. Here then, you become absolutely humble and there's no duality in your personality left, but that doesn't mean you

become weak. Humility is only possible for people who are strong, because they don't need any reactions, they don't need any protection. Their humility keeps them protected also very much.

So, you just start thinking or feeling, thinking is a funny word, feeling, that you are a small dust particle, at the same time you feel, you are the whole sky. It depends on where you are, what you are doing, what you are seeing, what you are witnessing.

Sometimes you feel that all these big big Johnnies are useless. You feel nothing to worry about them, very small and with some people you feel you are very small. Such a flexible temperament you develop and that makes you subtler and subtler, because you can penetrate into any thing, any subject, any personality, any understanding, any book, anything, any enterprise, in a very subtle manner and you immediately see what is to be done, because you become so subtle. And then when you become very great, then you start thinking, or I should say feeling, what you can do to help so many people, to do this great job, to do that. This, when it happens to you, then don't think that you are egoistical, nor you should think that you are very small. Only thing is now, you are the spirit and spirit is very subtle, it's a very subtle light but it can penetrate into anything, it can expand into anything, it can remain anywhere but it can disappear anywhere. This subtle personality that you are, which is your spirit, you even don't use it, but it uses you, all the time. Without your knowledge it uses you.

So the second thing should be that you should not determine what you are going to do. What I have to do, if

I have decided, I must do that. Whatever you have decided is alright, but if it does not materialise, there's nothing to worry, there's nothing to be upset, there's nothing to be overly nervous about.

I'll give you an example. One day I was going to America and of course, you know as it is, as all the Sahaja Yogis are, they get quite worried, now, Mother has to go to America, I mean, you see, everybody's upset, they are looking at the time, now time is this, time is that. Smiling, I said, “I have to go to America, why are you worried?" Suddenly one of the Sahaja Yogi's child fell down and broke her hand and she couldn't move her fingers. I was just coming out and as soon as he brought the child, I said “Alright, I'm not going just now to the airport. They were very upset “How's She's not going to the airport” as if all the heavens are going to fall down or what? But I said “Now, let Me see the child” I treated the child, the child was alright. “Alright I said, let's now go to the airport." They were saying “Mother, the plane must have left” I said “It's alright it doesn't matter, let's go to the airport." We went to the airport and this plane that was going to take Me was just there because there was something wrong with the plane and there was another plane going to Washington and I wanted actually to go to Washington, instead of New York, so, I was in the plane nicely going to Washington. But, one must know that you are not doing it, everything is arranged and planned and beautifully kept for you. You decide something, alright, if your decision is alright, if you have to do that, it will work out. If it doesn't work out, it should not have been worked out.

Now this is the difference between a person who is a realised Soul and who is not a realised Soul. A realised Soul person is not bothered what he wants, what he likes, what he's fond of, he's not. Whatever he gets is alright.

Now I can see, you are living under this roof, which is so horrible, I mean, there's no proper arrangements here, nothing, I don't know how you are living here, I mean, I just don't know what to do. We are trying to get a land and this landowner is such a greedy fellow, but I don't mind the greed part, but still he's not yet giving us the land, it's alright, now what to do? But you all enjoy it, you don't mind, otherwise normally people would say, you know I want this kind of a room and I want this kind of a house and this and that. That you can live under any circumstances because you don't worry about your physical comfort any more. What you think of is your own spiritual comfort.

I have seen people, Sahaja Yogis, so beautiful, even children, if there is a film going on and something funny comes in, immediately they all close their eyes, we don't want to see this. Nobody has to tell them because you see they are sort of, inside, they have built in that subtle personality which cannot stand nonsense. They may not say something, they may not be harsh but just they shun and go away from such places, automatically.

So, to describe the new personality, is this way, that in the nature we see, very clearly. In the nature what we see is, a tree grows, now it has to expand, but it cannot, so it does not. If it can, it will and also it tries to bring all the leaves exposed to the sunlight, somehow. I don't think the trees have that much intelligence to organize it,

but there is something that organizes them so beautifully. Now, it's not only one tree, 1,000's and 1,000's and 1,000's and 1,000's. The one who does all that, is the one with whom you are in contact. The trees are not, they are just playing into the hands of nature, but they cannot manipulate, manoeuvre, understand this Divine power, they cannot. Animals cannot, even human beings cannot, but you can, because you have crossed the limit of this human bondage and now you are just like great citizens of the great realm of Divinity.

So, this Divine force helps you, works out everything and also it takes you, it guides you, it manages you.

So, what you have to do is to keep yourself open for the guidance, at the same time you must act, because the guidance will also come from within, by which you will know this is what I have to do. Now supposing even then you feel that, this was not achieved by you and you feel that, still I don't know why I couldn't get what I wanted. Try to understand that is what is the best for us. It never means that you should give up, you should not desire. I have seen Sahaja Yogis desires are much more powerful than Mine.

The reason is I am desireless, I have no desires as such, try to see, fathom it out if I have any desires, I see I have no desires of any kind or I do not earnestly want anything. That, you can say it's a very frivolous temperament. But it all, you see, is very different with you people. You people are very differently made.

Because you have achieved something. I have not achieved anything, I am what I am. Because you have achieved something you know how you were and what

you are now. Because of your achievement I think it is a boon that whatever you desire works out. Because you have worked so hard, it's a boon, it's a special blessing for you whatever you desire.

So many times I have told you, “now don't desire anything” which is not proper, because whatever you will desire, that works out and that will be effective.

Now try to realise that you are no more ordinary human beings. You have crossed the bondage and now you are not even in the Sahasrāra, you are beyond it. Sahasrāra is the limbic area and this limbic area is closed like a lotus and when you get your Kuṇḍalinī entering into it, then this lotus opens like this. And that's what is written in the Bible, that “I'll appear before you like tongues of flames", it's the Divine saying.

So these petals are nothing but nerves which are enlightened, just like these and they look like flames, but these flames are not with any heat, they call it in Sanskrit “Tapohina", no heat. Extremely cooling, soothing, beautifully burning.

So when this Sahasrāra lotus opens, then the Kuṇḍalinī pierces through your fontanelle and you get your realisation. This is what has happened to you. Now only thing is to keep this lotus open and there where we fail, sometimes, because still there are some lingering human feelings within us. Firstly, as it is covered with the ego and the conditioning, or we call the superego, the two balloons. These two balloons, again and again, try to close the Sahasrāra.

So you have to be, you have to be on the guard that, “what is closing my Sahasrāra?" The first is ego, which,

how to attack, because if you want to attack your ego, you'll have to attack through ego only, that's the only vehicle.

So, we have this state of Nirvichara, of thoughtless awareness, where we have to go. But the simple thing to do is very practical. Try to understand why you are being egoistical, with whom you are angry? why are you angry? what makes you think to dominate someone or to control someone or to check someone, why?, the mind will not answer. The simple thing, if you can do, that whatever things that upsets you or makes you feel very great, try to understand that compared to you, nothing is greater, compared to your love, nothing is greater, compared to your compassion, nothing is greater, because in this there is the light of the Divine flowing. You hate someone, you get angry with someone, just know that you have to love that person. Now, how will you love that person? There is no way to have any measurement of that but love itself will suggest how satisfied you are feeling, how happy you are feeling.

I'll give you an example. The other day I received a letter from someone challenging Me very much, from Poland, that her mother is sick with something, cancer or something and challenging Me all the time “if you are God, you must cure my mother, if you are God, do this do that for me." Very amusing.

I said “alright", I put My attention to this lady, perhaps the mother is better. But, instead of getting angry, I said “she's so frustrated, she's so upset, she's so worried, even if she says, if you are God, she's challenging Me, it's alright, it makes no difference. Whether she calls Me God

or not God, makes no difference, whatever I am, I am." So, instead of getting angry, I felt tremendous compassion for her. She's a human being and her mother is so sick and that's the only source of her life, then I can understand why she is so upset.

So, if you just try, which you can do very easily, very easily, it's not difficult, because you are realised Souls, I'm talking to saints. If you just put your attention on a person with love, then what happens, you get understanding. Understanding of that person, you realise, as if identified with that person. Then you realise, if I was in her place, as a human being, what I would have felt, this desperation, this anger. If I was that, if I was the same type of person, with the same kind of problems, then what would I do? That solves the problem.

So the identification part, you have such powers, I told, you can penetrate, the identification with another is very important. And you can do it, because you are realised Souls, you can do it. Just place yourself in the same position, like the other person is and then you will realise that you have powers of love and identification is the only way I think one can understand love. This ego will immediately be sucked in as soon as you put your loving attention on that person.

In your lifetime you will get so many experiences like that, that you will be amazed at yourself, how can I do all these things, because you are a realised Soul. Also, as I said, when you are identified with another person, you put that person in charge of Divinity, just a feeling of oneness.

Sometimes, also we have very wrong ideas, about ourselves and about others. In small, small things also, we have our own ideas about something. Say, some sort of a living standard some people have, we like it, I don't like it, I like it and I don't like it, not a saint, a saint never says that. That time, when you say that, you are falsely identifying yourself with the bhada of that person. For example, if one now's upset with you.

Somebody has done such a beautiful flower arrangement. Instead of appreciating and enjoying it, if you come and say, “I don't like this, this could have been better than this." Just to, I don't know why people say like that, but if you identify yourself with the man who has done it, or the gentleman who has done it, you will enjoy it the way that person enjoyed doing it. Because you are just thinking about yourself, self opinionatedness with which you think that this is not done so good, that could have been better, this could have been better. Who are you to judge anyone? This criticising nature comes from a terrible misunderstanding about oneself. What are we, why should we judge anybody else, are we paid for it? So why waste your energy on judging others? We should see what is good in others, because in the realm of reality it is all good, everything fine, everything is first class. But if you are trying to see what's wrong with others, then you are not in reality. You can watch, you can witness, but you do not get upset with it or you do not even say something that would upset others. You're watching it, it's all beautiful, I mean, just the joy of the person who put it, all these beautiful things, of all the persons, is just bubbling through that but unless and until you are

identified with those who have done this, you might say this should have been better, that should have been better. You can be in the same position, supposing you do something, another one will come and say you should have done it this way, that way. Wasting our energy for nothing at all, our energy is spiritual energy. Then again you will become like the sky, I have told you, the greatest, you are too great to bother about these things. Wasting our energy on very very trivial things and useless things and just making yourselves small. But if this spiritual energy is used, because you can use it, you are the ones only who can manipulate it, not the trees, not the flowers. Then what you will do is to create oceans of joys.

So then we come to Sahaja Yoga, what has Sahaj given you is alright. But what have you given to Sahaja Yoga? What have I given to Sahaja Yoga? Have I created oceans of joys for others? What kindness I have shown, what compassion I have shown, what love I have expressed. Alright, whatever Sahaja Yoga has given, you have taken it for granted. Once they come to Sahaja Yoga they think it is a contract, already signed and if this thing doesn't work out, then what is it, they say, we had a contract with God and they said, we have not been awarded fully for whatever we have paid, whatever we have done. But what have you done in this realm of reality? Have you enjoyed the reality? Have you felt the joy of this real love of Divine? Are you dissolved into that or you are still standing on the shores watching? You can create, you are quite capable of creating tremendous joy, tremendous happiness and peace.

See the world today, in what condition it is, it's complete turmoil, confusion, all kinds of corrupt and destructive things going on.

So ugly this world has become. Can you beautify it?, you can, because you can transform people. But if you are not yourself a beautiful Sahaja Yogi, how can you do it? So, it is our attention on ourselves when we work out. That we have to bring others into this realm of reality.

This is one side of ourselves, where we have to understand our subtleties. Another side is that, we are still identified with things which we should not have been identified. We can just find out. Identified with ideas, identified with some sort of a consciousness. All these things make you really, to be very frank, they befool you. All the fools, you see, who are conditioned are really, I don't know what to say about them, because they are like a train which has no driver, God knows when it is going to collide. Because such people who are identified, I know, now you must have seen also, those who go to church, get ready nicely, go to church, sit down there, sing hymns, come home and again quarrel and fight. But if they see a church, they'll bow, but nothing goes inside, out of that church. Or they're are, who are like, you see you must have seen, the Jews, you see, wailing wall they have got, before that they go and do all kinds of things and what happens to them, nothing. Same with the Moslems, they are so conditioned, I mean, you cannot describe their conditionings, so stupid they are. And these conditionings go on making a fool out of us.

I've known so many people like that. Once in My own life, I was with some relation of Mine. This gentleman used to

get up at 4 o'clock and would start singing some sort of a “Rām Raksha", the whole house is sleeping, children are sleeping, he's shouting at the top of his voice, I said, “What is the matter?" Even Rāma might be sleeping at this time. But he would shout and his bathing was another thing, everybody knew when he was having a bath, because he used to sing another Shloka or something. But it happened that, I was in the next room and I heard something like, banging, banging, banging, I said “What's the matter?" I thought he's suffering from epilepsy, or what, so I rushed to the other people and told them, “This gentleman is suffering from epilepsy." He says, “No, he doesn't suffer." I said, “Then why is this sound coming?", “No, no, he is rubbing that chandan, you know, sandalwood” and with such a big thud every time, he was putting that stone on the ground. But I thought he had epilepsy, he said “whatever you may tell him, he will never listen, he does that every day." What is this?, this we understand as stupidity. When we see others, when we see human beings but even realised Souls, you are in the realm of reality, you do accept sometimes unreal things. Because of age old conditionings, your forefather's like this, his father was like this and your forefather's forefathers were like this, so that's still coming, they call it genes. But in Sahaja Yoga these genes also change.

So, this kind of a conditioning, which is lingering on still to your bodies, to your minds, to your emotions, has to be seen and cleaned out, because that kills the joy. That kills the full experience of reality. If you want to have the full experience of the beauty of reality, then you should

shed out all these things which are really befooling you morning till evening. People take advantage of such people, very much. As I have told you, entrepreneurs, you see, they'll start with one fashion, everybody will follow suit, but we are not brainless people. Not that we have brains, but also enlightened brains. We do not take to things which are just in the fashion or which are something, we don't. What we do, we are of our own fashion. This is not ego, this is identification with your own spirit. You won't take to anything stupid and nonsensical, if you have the wisdom of your spirit in you.

So, in the realm of reality, we have all the seven Chakras, absolutely enlightened, integrated and nourished.

At that position, what we see is ourselves, as I said, as nothing limited, absolutely unlimited. Even if when we say, we penetrate, we do, when we say we expand, we do, when we contract, we do. It is absolutely a flexible personality and a personality that creates peace, joy, harmony.

With the Sahasrāra opening, I'm sure the whole world will be integrated. One day I will understand these problems that are facing us, because of stupidity. This integration, I'm sure will take place and when that takes place, you will see the life of the Divine will be absolutely outshining all these darknesses or destructive forces. It is going to happen if so many Sahasrāra's could be opened out, then why not the Sahasrāra of this world also could be opened out to truth and reality. It will, so today, on such an important day for us, in the history of spirituality, I think this is a very important day. For us, is to realise that we are enlightened, we are the light of joy, light of

compassion, light of love, like the silent flames of the Sahasrāra, in different colours, beautifully dancing. Then we'll know, what is the enjoyment of reality is.

May God bless you.

Contents: 1996-05-12 **Talk to the Italian Sahaja Yogis (Mother's Day), Palazzo Doria, Cabella Ligure, Italy**

[Late afternoon during the sunset, Shri Mataji was sitting facing the window while two Sahaja Yogis were arranging Her luggage. She suddenly started saying:] I have already done My job. Now the vibrations of the Sahaja Yogis have increased a lot, but it is only through all of you people that Sahaja Yoga should spread. I do not have any desires but you should have. I do not have any desire, but if I had any it is this, that Sahaj a Yoga should spread to everyone... Feel the vibrations.

[So the Sahaja Yogis who were there with Her put out their hands and although they were right next to the two gas heaters, they could feel tremendously cool vibrations.] [While this was happening in the Castle, three Swiss Sahaja Yogis were shoe-beating in the garden of the Castle. At the end of the shoe-beating session, one of them felt his Sahasrāra completely open. He said he had never felt it like that before. At that same time, Shri Mataji asked one of the two Sahaja Yogis in the room with Her who these people were and what they were doing. One answered that they were Sahaja Yogis and that they were shoe-beating. She continued looking at them and said that it was a very good idea, that they feel very responsible.]

Contents: 1996-06-08 **Quote on Drugs, after Dinner, the day before Śhrī Ādi Shakti Pūjā, Palazzo Doria, Cabella Ligure, Italy**

You don't ned money for de-addiction, you just give them realisation. Overnight they will give up drugs.

Such a power your Spirit has, only it has to be brought into your attention.

Contents: 1996-06-09 **Śhrī Ādi Shakti Pūjā, Kuṇḍalinī, the Binding Principle or You Dissolve into the Divine Power, Cabella Ligure, Italy**

Today, we are going to worship the Ādi Shakti and the reflection of Ādi Shakti within you, is the Kuṇḍalinī.

We can say this is the worship of the Ādi Shakti and Ādi Kuṇḍalinī. If you understand that all this, whatever is created on this Universe and in many Universes, is the work of the Ādi Shakti. Now many people believe that there is one God, it's true, there's one God, God Almighty. But He has His own powers which he can embody into someone and can get His own manifestation expressed.

So first of all He did, was to create the power of Ādi Shakti. When it was created, then there was a sound, the sound that we call as Om, logos or anything you call it, by the primordial sound and these three powers came out of that sound, is A, U and M, Om. The Ādi Shakti is the one who embodies the desire of God Almighty. The desire of God Almighty comes out of His compassion and for His own expression, for His own manifestation, for His own reflection. I would say that He must be tired of loneliness so He must have thought of creating a partner

who will manifest His desires. Thus, the power of God Almighty separated from Him and formed an embodiment of His compassion, His desire to create. They say in Sanskrit, they use a word Chitvilas, is the enjoyment of the Ādi Shakti. Chit is, as you know, is Chitta, is attention. The attention has its own joy and to manifest that joy of our attention, She created all the universes, She created this Mother Earth, She created all this nature, She created all the animals, She created all the human beings and She created all the Sahaja Yogis. This is how the whole creation has worked out.

At this juncture, one may ask that “Why did She not straight forward create human beings?" That was the idea of God Almighty, just to create human beings without telling them anything, something, better animals than the rest of the animals. But Ādi Shakti, being the Mother, She had Her own way of expression that She thought, She must create the mirrors for God Almighty to see His face, to see His image, to see His character and that's how this long range of evolution took place. This evolution had to work out this way because they had to know from where they come. We must know that we come from nature. Even nature should know it comes from the Mother Earth and Mother Earth herself has her own Kuṇḍalinī and she too is not just a dead earth, but she knows, she thinks, she understands and she regulates. You can see in the nature how every tree has got its own limitations, how every fruit is produced in a particular tree, how it happens? what works out this kind of regulation? If this Mother Earth was moving with a higher speed than what it is today, we would not have

been born even. If it would have been less speed, it would not have worked out. See the whole plan that was made, it is a beautiful plan that the Mother Earth has to move around the sun in such a manner that different seasons are created, that's why the power, the Param-Chaitanya, which is the power of the Ādi Shakti is also called as Ṛitambhara Pragñyā. This is the power that does all the living work, all the organization, all the creation.

In our human ego we start thinking that we do something, we can create. We cannot, we cannot even create a dust of particle, leave alone anything else, whatever is created out of that we may combine, we can put together and create something. But if you see that this whole thing is nothing but beyond any power, we cannot create anything. But what do we create is our myths, I should say. For example, something is made of gold, still it is gold. Now, something is made of wood, whatever it is made, is wood, the principle is the same into everything.

So whatever may be your birth, whatever may be the country you are born, whatever may be your culture, you are human beings, basically you all are the same, you laugh the same, you smile the same, also you cry the same way. I haven't seen anybody crying with his hands and tears falling out of his fingers, do they? And, that is how one has to realise that we are all bound by some common principle of life and the common principle of life, that has bound us by the Ādi Shakti, is that we all have Kuṇḍalinī within us, all the human beings have Kuṇḍalinī within us. It is not, it is in the animals also but it's not so

developed, it's not yet, what you call, is a full form of Kuṇḍalinī that can be awakened. But in the human form only, it has evolved as a connection, as the one that is the Divine Force within us, which is the reflection of the Ādi Kuṇḍalinī, which is so easily awakened in this Kali Yuga. This is the common principle we all have, so we have to respect all the people, all the human beings, whatever nation they come from, whatever country they belong, whatever colour they have, because they all have their Kuṇḍalinī.

Then there are people, as you people are, who are awakened people, who are enlightened people, who have got your realisation.

So, when you understand that this is the enjoyment of the attention of the Ādi Ma, of the Primordial Mother, it's just the play and an enjoyment. Then, when you have achieved your full growth in spirituality, What should happen to you? What should we feel? How do we then exist? This is the question many a times you have asked. Now, when you ask questions itself it shows that you are not there, because once you are there you don't ask questions. Secondly, what happens to you is that you become just the existence, just the existence and that existence that you become, then you start reflecting the character of Divinity.

This Divine character is expressed not only nowadays, also much before, in every religion we have had people who had this Divine character very well developed. For example, even we can say, the people who lived 3,000-4,000 years back. In Colombia, I found that in their statues they had Kuṇḍalinī and a Kumba also. Commonly,

whatever we have found out they had a Kuṇḍalinī being expressed, three and a half coils. This Kuṇḍalinī we have within ourselves is now proved to you, you know that there is this power within us. Also you have come to know what happens when we deviate from the middle path of our ascent. Here also, the same Kuṇḍalinī, which is the expression of the Primordial Mother, tells you on your fingertips what's going wrong with you, where are you lacking, what is your problem.

So now, when we are enlightened people, we have become saints and we are above all others, what should we do is to understand fully well, not only mentally, but from your heart, that now you have got these Divine vibrations. And these Divine vibrations can tell you where are you, what are you, where is the problem. Also, it will tell you, wherever, like I talked to some people who went to Jerusalem and they said “Mother, the whole place was just vibrating with spiritual vibrations." They went to Chhindwara, somebody and he said “I will find out Mother's place, what is there, after all it is not difficult, through vibrations I will find out." So he said “as soon as I touched the platform I started jumping, I said, `now what to do, from here only there are vibrations, how will I reach Mother's place?' " So then he sat down and started wondering, “Now how will I find out where did Mother take Her birth?" He was sitting down and then he saw the star, which is the Venus, he followed the Venus star and then he went and asked and that's how he found the place.

So the whole plan, the whole thing is not done haphazard in any way. If you see a tree, every tree has leaves and

every leaf is given chance to have the sun's rays. In the nature if you see, it's so harmonious, so beautiful. We are the ones which spoil the nature, because we don't understand that we have come from nature and we have to respect it. I've already told you many times about how human beings were formed by different chemicals, who came also, carbon came from the Mother Earth. All this leads us to understand that we have a very big responsibility. The whole work has taken thousands and thousands and thousands of years and now you all have reached a state where you have become yourself, you know yourself. This is a very big, I think you should say, a very big jump in the evolutionary process.

The evolutionary process started a long long time back.

So I think it is very important for you to worship the Ādi Shakti and the Ādi Kuṇḍalinī. It's absolutely without understanding, absolutely you cannot understand how you have become a saint. When you will know within yourself, you have got all these centers and these centers have to be awakened through the awakening of the Kuṇḍalinī and that the Kuṇḍalinī expresses herself through your fingertips, unless and until you fully identify with this knowledge, there's always a possibility that you will deviate from the path of your perfection. Many people who come to Sahaja Yoga, I have seen, they meet some Sahaja Yogis who are half way and because they are mental, they start arguing “How is it this is this way? How is it that this is this way? How is it he's a Sahaja Yogi and he behaves like that?" There are so many ways of people relating to the power of the Divine.

I have told you in the beginning that God felt lonely and that's why he created this Ādi Shakti and through Her the whole universe was created. But also true, that as you are seeking also the Divine is seeking you. Also that your seeking is absolutely awarded if you understand the simple thing about Divine. That it is the one that has given you intelligence. It is the one that has given you wisdom, it is the one which has given you whatever you have, as you were singing, that, whatever we have is given by You. If that is the case, that all that you have is given by your Kuṇḍalinī, by this Mother power of your Kuṇḍalinī, then it's very important to understand what is the need of keeping Her happy and Her satisfaction. You must try to see what makes Her happy. As I said, there's a relationship between the realised Souls and the Divine. The Divine is happy when you are happy. Or we can say, when the Divine makes you happy and you are happy, then the Divine is happy. It's such a relationship and it's so close, it's so close, we can say as the sun has sun's rays, or the moon has it's own moonlight. It is so close, it's so ingrained, so much built-in and that should give you full control over yourself and over your development. They describe it in various ways, that you must surrender.

Now, one surrenders, of course with fear, if somebody comes with a sword and says alright, “you surrender” you may. But, as soon as that person will disappear, he will take out another sword and cut his throat. That surrender has no meaning. That surrender is a surrender which is just forced onto you. All such surrenders have been creating problems because it has a reaction. But

your surrender to Divine is extremely joy giving. Like a, salt, which dissolves into the sea, automatically, into the water, automatically. That soluble nature is really joy giving. If you can just feel that, within yourself, that, you are one with the Divine, you are dissolved with the ocean of the Divine. And then, what takes your form is nothing but extreme love, compassion and as a result, extreme joy.

Many people tell Me that “Mother it is very difficult to forgive someone” but I think it's very horrible not to forgive someone. There's a great joy in forgiving. A very great joy in forgiving. And as soon as you forgive, the Divine takes over and Divine will look after you. Nobody can disturb you, but first you must surrender to the Divine, that is what is forgiveness. Just don't bother yourself as to punish somebody or to do something against somebody, the Divine takes over from you and does whatever is needed. And in such a beautiful manner, that it is worth seeing how it works. Ādi Shakti's power, this Divine, is described in every religion. In Islam, called Rhu, in the bible it's called as, All-pervading Power, it is called as Allak, that which cannot be seen, Niranjana, the one which is beyond any attachments, sort of thing.

All these words are used for this Divine power.

People have heard about it, people have sung about it, but unfortunately very few people felt it. And when they felt it they didn't know how to give it to others, how to make others feel it.

So whatever they talked became sort of a story, or something nonsensical. Nobody could believe that they have felt anything like that, or could imagine that there is

such a power really existing. Now, luckily it has become quite a universal fact for all of you that you know there is this power. You are sure about this power, because you can feel it, within yourself and when you feel it, you feel very joyous. You can make out whether somebody is telling you the truth or not because you can see on the vibrations, on this, I should say, the power of Ādi Shakti, she tells you the truth.

If somebody has done some harm to you, for example, now you may say, that “Mother, if you forgive that person, then it's not the truth, because he has definitely harmed and if I forgive that means that I accept that he has not harmed." This kind of argument is possible. Now you will see, you will be surprised, that you forgive that person because the truth is, whether you forgive or you don't forgive, you don't do anything, that's the truth.

So, out of compassion, if you forgive someone, compassion becomes the truth. It's the compassion that tells you the truth.

So, all the absolute truth that you know is through the compassion of the Divine Power. Maybe, sometimes people say “we saw the vibrations Mother and we felt this way and still it happened” it makes no difference, whatever has happened, has happened, doesn't matter. You have felt the vibrations and you asked the vibrations and you acted upon the vibrations, that's all. Whether it turned out to be that way or not, is different. Because, it had to be the other way round.

Some drama is going on, it's the Chitvilas, is the enjoyment of the Chitta of the Divine.

So, it's a play going on, if you can see that play, then you don't get disturbed, it's a play. How it works, how it is organized, is not your headache, you just have to see the play of the Divine, how it works out. We have seen now, all of you, which you call as miracles have happened. “Mother this miracle has happened, that miracle has happened and I know it's all the miracle of the Divine." Despite that, our faith in the Divine is not so much enlightened faith. When you have the enlightened faith you don't worry about things which are very important in life. If it works out, well and good, if it doesn't work out, well and good. It should not be assumed, that once you are a realised Soul that the whole world can fall at your feet, not necessarily. It's a play, it's a beautiful enjoyment of the attention of the Ādi Shakti.

So, if you can become the witness, if you can really become the witness of the whole thing, then what happens, you grow spiritually much closer, I should say, you get dissolved into the Divine Power. That resolution has to take place, that's why today's Pūjā is very important for you, because if it was not Ādi Shakti, who had taken an incarnation, this work could not have been done, this could not have been done. Because it had to be something that would encompass all the angularities of this human life, all the aspects of this human life. It had to be such an incarnation that could absolutely see human beings as a whole, not only his physical self, mental self, emotional self or his particular ideologies or his particular domination, no. As a whole, as a human being and a human being, as I told you, is, all inside, all of them are just the same.

Some are more sensitive and seeking, genuinely, some are not seeking, genuinely and some are not seeking at all. But the seeking also is given to you by Ādi Shakti.

Now it happens, that in the evolutionary process, one fish came out of the Mother. Out of that sea which was like a Mother to the sea, it [fish] came out. And then, about ten or twelve fishes came out. Then after some time, shoals of fishes came out. In the same manner your evolution has worked out. As it is, we think we have quite a big number. I mean I have crossed the number, what we call, James or what Saint John has said, we already crossed it, it doesn't matter. It doesn't matter. You see, it seems that it is a very fertile area, a very fertile time, this Kali Yuga, where there are so many people who are taking to Divinity. I mean it's the right time to do this.

Yesterday, when I saw your play, I have seen all that Myself and I used to wonder what is going to happen to these people. How are they going to take to Sahaja Yoga. They have, they have taken, they have taken to spirituality. See all these diverse things that you see in modern times, should not disturb you much, because that has to be that way. It's a drama, it's a play and in that drama you should know that it will work out in such a beautiful manner, that after some time you will find nothing but the Divine dissolving all the useless things that we have, like our conditioning and our ego. We will have so many people in Sahaja Yoga, by the time 2,000 years, we will have many many Sahaja Yogis all over the world.

Once we have lots of people, many would jump into it. That's human nature also. You see, they won't take to it

until we have lots of people and once we have a multitude, they'll jump into it.

So, some people are always worried, “Mother, what about others, we are now in the heavens, we are enjoying life, what about others? It will all work out, it will all work out, but your attention should be “How I can dissolve others into this ocean of joy, of this compassion?" Now, you will be surprised that it is your own compassion only, which is going to give you strength. This compassion within you, when you will see people are getting completely drowned, completely destroyed, your compassion itself will make you powerful. And you will do everything that is needed, you will give up all nonsensical activities and you will really dedicate yourself to emancipate other people. And amazingly as you will do this, your own level of spirituality will rise. As you see, I would say that when you dissolve, say some salt in the water, the water rises. In the same way, the more people, when they will come to Sahaja Yoga, the Divine Power will manifest much more, it is manifesting already. But the more people there will be, there will be much more manifestation, because it will be like so many channels that will be working it out.

So, at this juncture when we all know that there is Divine Power, you all have got your realisation and that you are all now saintly people, then we should see to people who were like you. Like we had Sufis, then we had Nath panthis, we had Gnostics, all kinds of people in every religion, What did they do? They went all out to awaken other people to the fact that there is Divine Power. They

could not give realisation, as such, they couldn't give proof of that, but they worked it out, they talked about it, they sang about it, that's what we have to understand, that nothing should deter your compassion to be expressed. When you know the people are getting drowned, they are in a terrible mess, this is a kind of a huge, I should say, onslaught of the evil on human beings. And if you have that compassion within you, you will go all out to save them. That is what is the work of this Chitvilas, of this enjoyment of your attention.

Your attention itself will enjoy when you will start bringing more people into the Power of Divinity.

Without Divinity there's no saving for human beings. That, everybody admits, everybody says so. But they have no idea, as to what is Divinity, what is the way to achieve it. While you all have this, you have power to awaken Kuṇḍalinī. You know all about Chakras, you know all the defects of the Chakras, you can find out from the vibrations the truth about everything. The more you use this power, the better it will be.

So, you have to go to areas where so far you have not gone. For we haven't got many people from the black race, I think from Africa.

So, I think I'm going next year to Africa to work it out. Also, we have so many other areas where I find we have to work it out. That if this compassion is within you, then it will compel you also to do work that will bring solace to people who are not even seeking.

I'm already busy with forming some NGOs you see, which will really create very beautiful institutions for people who have nothing, they are starving, they are under

trouble, they are under great ordeals. Only you can do it because, coming to Sahaja Yoga, you have dropped out your greed, you have dropped out your lust, it is finished, now you are so free and so independent. With this, the compassion, cannot take any other form because many people have seen that they start this kind of work and then they start becoming leaders or they start becoming rich people or plundering others. This you will not do. You are, really as Christ has said, salt, salt which is completely dissolved in the Divinity and this salt is going to dissolve many others. Once we start spreading out like that, I'm not saying we should be like missionaries or something, converting people into Sahaja Yoga by force, no. We have to look after what they are lacking first of all. Actually, there are very few people in this world who are honest, who don't have greed. I've known people who never had any greed but as soon as they got some powers they started showing such tremendous greed that surprisingly, when you know that person, who has never done such a thing and suddenly you find he has become so greedy, you can't believe it. But not Sahaja Yogis. Sahaja Yogis won't do that. They'll enjoy their compassion, not anything else, not their lust, not their greed and also the so-called deviations like taking to drugs and drinking and other nonsensical things. Because they know what do they enjoy, where lies the enjoyment. Once you know where lies the enjoyment, you will try to have more of it and more of it, it's so easy now for you do it.

I would say as the men are working it out, women should work it out. Because women have more sense of

compassion. More sense of compassion and forgiveness, normal women, I'm not saying about abnormal, you know, I'm saying about normal women. It should be, because they are mothers, they have children, they have known what is love for the children is. A mother doesn't expect anything, she just wants her child to be alright and happy and she enjoys her child, that's all. If you are a woman, inbuilt within you is this compassion. See, I've seen young girls, they too, if they find a little baby they'll all run after that, they would like to take the little baby, they have dolls and they look after the dolls, just like their own children.

So, for women it should be much easier to show compassion and to express and to manifest, it should be. And as you are all married also, your husbands will feel so much strengthened by your own nature of Divinity.

What do you sacrifice? Some say I sacrifice this for God, I sacrifice that for God, what is there to sacrifice for God? What does God need? He doesn't need anything, what is there to sacrifice? Only you have sacrificed your brains, that's all I can say, no wisdom is there, nothing to sacrifice. And if something has to be done, it has to be done. I've seen also some ladies coming to Me, “Mother, we have to cook, then we have to look after the children, the household and this and that." What is then, otherwise what will you do? The whole day what will you do? Like the bats which hang themselves the whole day, are you going to hang yourself, you have to do something. While doing it, it is just nothing great you know.

And then to sacrifice, I don't know what are you going to sacrifice? Actually what you are sacrificing is your joy, is

your happiness. If you achieve that state of enjoying your own self, then you will be never tired, you will never grudge, you will always say “Mother we are enjoying everything." This is a very important point that we should realise, that if somebody is a woman or a man, they have the same thing which we call as Kuṇḍalinī. But a woman, as it is as you know, is mostly left-sided. She has more power of compassion. In the same way the man has more power of action.

So the compassion has to become active. In this combination, everything will work out in a very beautiful manner, but if that balance is not there, it is going to be difficult. I've seen most of the marriages we have had, have been successful.

But some of them have not been, because I think that some of the women have been men and some of the men have been women. And I'm really sometimes very unhappy, I get pain to see that unnecessarily they are creating problems. They are both Sahaja Yogis, ah, if they were not Sahaja Yogis I can understand, if a Sahaja Yogi is married to a non-Sahaja Yogi, I can understand, but both are Sahaja Yogis. Now here you should understand the relationship of the God Almighty and Ādi Shakti. It's complete unison, complete understanding. God Almighty is the spectator, he's watching the work of the Ādi Shakti. She is compassion, of course, she doesn't say that something should be destroyed or something should be killed, alright, she's compassion. But he's the one who takes charge if somebody tries to do something against the Ādi Shakti, it is he who takes charge and changes the whole scene, in such a manner that you

don't understand how it has happened, how it has worked out.

What you have to do is to enjoy the play. In the same manner the Sahaja Yogis should have a unison, should have understanding, enjoyment among yourselves. If a Sahaja Yogi cannot enjoy, who is going to enjoy life? I can't understand, the one who has his Kuṇḍalinī awakened only, who has felt the All-pervading Power of love, who knows what is the truth, who is standing on the complete oneness with the Divine.

How can such a person, anyway, have any kind of problem? It is to realise that you are sitting in the realm of God Almighty. You have entered into His Kingdom and you are under the attention, compassion of Ādi Shakti. But it is like this, if you make a beggar, who has been begging all his life, sit on a throne, he still begs sitting on this throne.

So that is sometimes is the situation with Sahaja Yogis.

I have received some funny letters sometimes, when I start wondering if this fellow is still in the limbo state, is not yet a Sahaja Yogi nor a human being, he's in between somewhere, I think.

So at least that state should be overcome, by all of you, because it has a very bad impression, also for other people and for your own life. For your own life, it is very important that you should grow fully into the understanding of the powers that you have got and the love that your Mother has. When you say you must surrender yourself to Mother, means what, what do you have to surrender? Just think of it, what you are surrendering is what is perverting you, whatever is

distracting you, whatever that misleads you, whatever is your ego and your conditioning. That's all you are surrendering, just to purify yourself, to enjoy yourself and to know God Almighty. If you don't know yourself, how will you know God also? It's impossible.

So to know yourself, you have to evolve. I know there are some very great Sahaja Yogis, some Sahaja Yoginis also, many are there, but still I would say that there are so many other areas where all these very greatly evolved Sahaja Yogis have to enter into and work out. You can do it, you see I was surprised that in this place, when I came first in Rome, we had advertised and there was not even a single person in the hall.

So I said “Baba, what is going to happen in this country?" Now we have so many Sahaja Yogis, unbelievable. But, as it is growing sideways it should also grow upwards, as it is growing in quantity it should also grow in quality. And as you grow in quality, more and more people will come. Because I know, all the time, you are so collective that you, all the time you, see “Mother, my uncle is still not a Sahaja Yogi, see Mother, my brother is not yet a Sahaja Yogi." I know that feeling you have, that my father still is not a Sahaja Yogi.

So forget about them, but those who are seeking, approach them. They are your real relations. Then afterwards, when all these people will join, your father, mother, brothers, sisters, children, all of them will jump in. They are that type, they will wait and wait and wait, they are not seekers. But those who are seekers, you should seek them, you should find out where are they. My attention is of course is with you and every time you

think of Me, I'll be at your service fully. Whatever you want, I will be there, to help you whichever way is possible.

Anything you find very difficult, is not, because you take it upon yourself, but if you leave it to this All-pervading Power of Divine Love, to this power of Ādi Shakti, Param-Chaitanya, nothing is difficult, nothing is so bad that you cannot manage it.

I don't know, if I have to talk about this Ādi Shakti, it will take at least ten hours minimum.

So I think I better stop now and we should keep something for the next Ādi Shakti Pūjā.

Somebody asked Me “Is it necessary to have this Pūjā." I think if there is any Pūjā you should do, it is this one, is Ādi Shakti. It is very important that this Pūjā must be performed, because that is how you grow, this reaction improves and you grow more and more within yourself, through the power of Ādi Shakti or through the power of Kuṇḍalinī. As you know that Ādi Shakti has her own Kuṇḍalinī, which is the Ādi Kuṇḍalinī and the reflection of that within you, is the Kuṇḍalinī.

So you have to worship and it's the best way to please your own Kuṇḍalinī, your own Mother, who has given you this birth.

May God bless you.

***Contents: 1996-06-18*, Public Program, Theatre, Genoa, Italy**

[Video and then an Interview of Guido Lanza. Bhajans.] [Shri Mataji is greeted by an authority from Genoa and

receives books about Christopher Columbus as a present.]

I bow to all the seekers of Truth and Peace. When we talk of peace, we must know by talking we cannot create peace. At a human level, with this human awareness, we have so many complications. We have to evolve little more to achieve our Selfhood. Every religion has talked about Self-knowledge. If we do not know ourselves, how can we know anything else? For this, as you have been already told, there is a Power in the triangular bone, which is known as Sacrum. That means that Greeks knew that it was a sacred bone. In India we knew about it thousands of years back, no doubt. But it was kept a secret and was given by one person to one person. Till the 12th century, nobody even talked about it to general public. Then in the 16th century there were many saints who talked about it. Even Mohammed Sahib has said that you have to know yourself if you want to know God.

But Self-knowledge is something which is not imaginary, it is not mental. We live in a mental world and I must tell you very humbly that this so-called mind is a myth. It has been created by us through our conditionings and our ego. But beyond this mind is the realm of reality. Unless and until you reach that state of reality, we cannot find peace within ourselves. If there is no peace within, what's the use of talking about peace? But it's a very simple thing to understand, that human awareness is not the perfect, absolute truth. Because somebody says: “This is the truth” another says: “This is the truth” another says: “That is the truth." Is not absolute! And so all the quarrels and fights start on this point. But when you

know the absolute truth, then all of you will feel, will know the same.

Now as you see I'm sitting before you, there is no difference of opinion. In the same way, if you see the truth, then there will be no difference of opinion. You have been already told about the power which resides in the triangular bone, which is your individual Mother. She knows everything about you, she knows what have you been doing, what wrong things you have done. She also knows what are your aspirations for [the] future. Is like a tape recorder of your being. When it rises, pierces through these centers, ultimately from the last center, it becomes one with the All-pervading Power of Divine Love.

So there's... the truth about yourself is this, that you are not this body, this mind, these emotions, this ego, but you are the pure Spirit. And the another truth is, that there is a All-pervading Power of Divine Love which does all the living work. Now this Divine Power has been described in most of the scriptures. It can be called by many names, but we see all these flowers, we take them for granted, it's a miracle. We never even think, what a miracle it is.

So many living things are going on in this world, we never even think about them, we take it for granted. Who does this? That is done by this All-pervading Power.

So now, after this human state, one has to evolve to a higher state of spirituality, of becoming the Spirit. This has to be, otherwise this world will collapse. Human life will collapse.

These centers that are within you, when they go into jeopardy, then get you get diseases. All physical, mental and emotional, even spiritual problems are coming from these centers within us.

So when this Kuṇḍalinī rises, she nourishes all these centers, she integrates them, not only that, but she enlightens them.

Then she becomes one with this, connected with this All-pervading Power and you become a powerful person of Divine Love. Now how the peace is established, is like this that we are all the time thinking about future or about the past. We cannot be in the present.

So one thought rises and falls, another thought rises and falls and we are jumping on the cusp of these thoughts all the time. But when this Kuṇḍalinī rises, what she does is first of all she sucks in those thoughts and also makes them elongated so a space is created. And you reach a state which we call as thoughtless awareness. You are aware, you're absolutely aware but there's no thought. If you want to think you can, but you become master of your thoughts. Thus, peace is established within you. For example, if you are standing in the ocean and there are waves, you are afraid of them. But supposing you get into a boat then you can watch these waves and enjoy them. But in case you learn how to swim, you can jump and bring out many people from the ocean of fear. Same thing happens when you evolve, you become first thoughtlessly aware and then you become doubtlessly aware. As a result of this awakening, your Spirit comes into your attention. That means it enlightens your attention. You develop tremendous compassion, but this

compassion can act. You may feel very sorry for a person who's sick, but if you have got your Self-realisation, you can cure that person.

As I told you, this is the last breakthrough of your evolution.

Of course you can't pay for it, because it's a living process. When you put a seed in the Mother Earth, it sprouts. How much do we pay to the Mother Earth? Is your right to have this realisation, is your birthright. All arrangements are made within you. You must actually forgive yourself, completely, also not to think: “I've done this wrong, that wrong." Also you have to forgive everyone else. Because whether you forgive or don't forgive, logically you don't do anything. You become like a saint, I should say. But you don't give up your family, you don't give up your house or anything! The transformation comes within. It is the actualisation of baptism, when you say you are born again. It's not giving *[UNCLEAR]* certificate that you are born again, but it's actual happening to you. It is the actualisation of becoming. Is not just talk. And which is so simple.

I have been to Genoa before twice, but couldn't do much. I don't know why but today, after I think two, three years, you people have become so aware! I'm so much enamoured to see all of you here, to receive your Self-realisation. As I told you, it's just like a seed planted in the Mother Earth: grows by itself, spontaneously, Sahaj. It will take hardly ten minutes for you to get your Self-realisation. Those who do not want, of course I cannot force on you. But be confident that all of you are going to get it. Don't in any way feel guilty. By feeling guilty you

spoil the center on the left hand side here [touches Her left shoulder] and as a result you might get spondylitis, you might get angina, or you may get very lethargic or else *[UNCLEAR]*.

So whatever you have done wrong, is done, finished! This idea is very self-destructive to say that: “I'm guilty, I've done this wrong, I've done that wrong." You have to have respect for yourself, because you are a human being on the threshold of your last breakthrough.

So may God bless you all and let us see how you are going to get your realisation.

Of course I'll wait for about fifteen seconds, if somebody wants to leave can leave the hall, but everybody has to get it.

So first we, you have to forgive everyone. Is not difficult, you just have to say: “I forgive everyone” that's all. The second thing is that you have to forgive yourself. I would request you to take out your shoes if possible, will be very helpful, it's this Mother Earth is the one, she sucks in all the problems we have within us of a gross nature. Need not take out your socks. I would request you *[UNCLEAR]* to be seated, is better to be seated, that's all. Now you have to put both your hands like this towards Me.

As you know these five, six and seven [indicates the five fingers and the other two points on the hand corresponding to the Chakras] are seven centers represented. On the left side, means the left sympathetic nervous system centers and right side with the right sympathetic.

So what will happen to you, is that you will feel the Cool Breeze on your fingertips first and then it will start moving upward. Also you'll feel the Cool Breeze coming out your of fontanelle bone area which was soft bone in your childhood. You'll feel thoughtless and peaceful. Then only you have to learn how to use them [your hands]. In the Bible it is called as the Cool Breeze of the Holy Ghost. When this happens, you'll feel very much better, peaceful, happier, you might even get cured. But this is a collective happening.

So, you must know that after getting this, you should try to know all about it by coming to our centers.

Of course you don't have to pay anything for this subtle knowledge. Only thing you have to give little time for the cleansing process sometimes. This will ensure your peace, it will ensure your physical fitness, it will ensure your happiness in the family, but it will ensure you joy. Joy is singular, is not like happiness and unhappiness, is an experience.

[Aside:] They already got it [Self-realisation]? Now, you have to close your eyes for a while, you can take out your spectacles if you like. Now please don't doubt yourself, please don't doubt. And don't think about what wrong you have done in the past.

You have to be in the present.

Now. Close your eyes please and now, please put your right hand on top of the fontanelle bone area. You can bend your head, it will help you more. Now just see if there's a cool or a hot breeze like *[UNCLEAR]* vibrations coming out of our fontanelle bone area.

Some of you can get it very close to your head and some of you little further, but don't put your hand on top of your head.

Now. Put your right hand towards Me, bend your head and see with the left hand, if there is a cool or a hot breeze coming out of your fontanelle bone area. Please, bend your heads. Please, bend your heads.

Now, if it is hot, that means you have not forgiven yourself or forgiven others, so please do that now.

Now. Please have the left hand towards Me again once for all and again see, bend your heads and see if there's a cool or hot breeze coming out of your fontanelle bone area. Please don't doubt, please don't doubt. Put your both the hands towards Me and don't think. Just don't think. Now raise both your hands towards the sky like this and push back your head and ask a simple question three times. The question is, you can call Me Mother or Shri Mataji, Mother, is this the Cool Breeze of the Holy Ghost? The another question you can ask: Mother, is this the All-pervading Power of Divine Love? Three times.

Now please take down your hands. All those who are feeling cool or hot breeze on their fingertips, or on their palm, or out of the fontanelle bone area, please raise both your hands. The whole of Genoa! May God bless you all.

I live very close to Genoa, you are all welcome to come and see Me. If you have any problems, you can write to Me. Now just enjoy, that's all I have to say.

Guido: [explains that Shri Mataji has said that She feels a lot of vibrations arriving on the stage and that everybody has their mind in silence.]

Shri Mataji: Is a great discovery that so many real seekers are living in Genoa. Now you have grown, you have become a Self-realised personality, but the seed has to grow into a tree. For which you have to give very little time to yourself.

[UNCLEAR]. This is from a village in India they have picked up a song. You can clap, will help you, clap songs *[UNCLEAR]*.

[The bhajan group start singing `Mahāmāyā Mahākālī'.]

***Contents: 1996-06-28*, Public Program, Myths are Unreal, Royal Albert Hall, Kensington Gore, London SW7, UK**

I bow to all the seekers of Truth. It has to be understood that truth what we know through our mental capacity is not the truth, because mind itself is a myth. We have created it. As we have created computers, we have created our myth also through our conditioning and through our ego. Beyond it is the reality.

So if you have to know the absolute truth something has to happen. We have to evolve into a higher realm of existence of consciousness. You have been already told about the subtle system that you have. You all have it. You are the owner of it and you have every right to achieve that state of consciousness which in the Zen system call it `Satori'. In every system they have something they call it some name, like the Islam calls it `Wali', some called it `Sufi'.

In the realm of reality, when we are not, we have problems, because we fight for unreal things, you think of unreal thing as real and accept. For example, when they

English lost the match. I mean one party has to win, either this or that. But they were so much identified with it, which was falsehood. They were not playing, there were not players that they were English, alright. But there was no war going on.

See the myth about it is this, that we get identified with things which are themselves not real. And all these problems that we see of anger, which is violence after all, or the attachments we have, identifications we have, then the lust and greed and all kinds of problems that we see in every country is due to our imperfection. It is due to our ignorance about reality while reality is beautiful. And we have to enter into that realm that is what is seeking for.

The other day I was reading a book of a boy, who was an athlete and who went through the Zen system of training and it was so hard and hazardous that I thought very few would accept such a situation, very few. Might have been in those days, there were seekers of that quality that they worked it out. But now there is system available for you. The knowledge that they gave you about the subtle system we have is a fact, but if it is a fact or not you should first verify don't just believe Me or believe what he has said. You should verify if it there within us this subtle system of our ascent. I knew about this since My childhood, but I did not know how to explain to people because I found people have no idea about it even in India.

Traditionally, in India we had three types of seekers. One was through Vedas. Even the first stanza of Veda says that, “If you do not know yourself by reading or by

chanting these mantras it is useless." Then the second seeking, second style of seeking was that of Bhakti , is you to sing the name of God, or you can pray to God. Even great people like Gñyānadeva did not know want to do.

So they also said it is better to do Bhakti , Bhakti of God because the time had not come perhaps to give Self-realisation or may be the people were not prepared to get it.

But in the center we had another great movement which is called as Nath, Nath Panthis. They say it came from Shiva, but whatever it is; it came from Ādi Nāth and these people and got diverted into many types. But those who remained in the middle, one of them was we should say was called Gahininath and his disciple was Nivrittinath the elder brother of Gñyānadeva. It is amazing if you read anything about them they know all about Chakras, they know all about these all three channels. Everything they new thousands of years back. Then somehow or other they didn't tell people. They kept the knowledge to themselves. I can't say why they did it but they did. Ultimately, Gñyānadeva took permission of his Guru Nivrittinath and said that “let Me tell you, at least let Me tell others, you allow Me because people should know what works it out." So he wrote about Kuṇḍalinī. But if you read these ancient books, you will be amazed that the whole thing was described in those books how you get your realisation and how then you have those centers which are to be enlightened, what problems come in. But the method they employed for achieving it was really hazardous. I don't know why they

had to do it but they did it. They were all unmarried people and very strict with themselves and they had to lead a life very secluded from the society. This was really a very difficult time of ascent they had.

When I read about them I really feel very extremely sad that all these great people who were seeking had to go through such horrible strenuous turmoil for days together and then some of them got realisation.

But you are lucky people I should say to be born at this time. This is a special time, very special time, which is described in all the books, all the scriptures as the last judgment. Now, if you start deciding about it through your mental capacity you cannot achieve anything, because you have only two agencies: one is your conditioning, another is your ego.

So one has to rely on the natural gifts that we have, is that of this Kuṇḍalinī and she is your individual mother; she does not want to torture you, she does not want in any way to give you any pains, whatsoever.

Also, there are some books written that Kuṇḍalinī means it is a something horrible and it can kill you, it will do all these things. All these years, now I have been working on it, I have never seen anybody getting into trouble. But if you are in trouble you get out of it.

So, all these myths were created for Kuṇḍalinī also later on so that people should not take to reality. But all this knowledge was somehow lost, though Gñyānadeva had mentioned in his book that in the sixth chapter he said that one should seek through the awakening of Kuṇḍalinī.

But people said no, this is no good, we are not going to have it; because when those people who organized the

religion, become in charge of the religion, actually you cannot organize, you cannot organize religion and once they start organizing it you see they put there own norms on people who are seeking.

So they said no this is something is not allowed because they could not raise the Kuṇḍalinī may be.

But in the sixteenth century in India, suddenly so many realised Souls were born, saints were born.

Perhaps they might have been Nath Panthis who had died before may be, they have taken the birth, so many of them and they started understanding each other because they were one with reality. Everybody was feeling the same thing about each other. There are many examples of that. First of all I would say, Namadeva in Maharashtra. He was a tailor and he went to see one pitcher, who make pitchers you see, potter you can call it, and, when he went and saw this fellow standing and trampling over the clay, he just stood up and the sentence he said is so remarkable. He said, “I came here to see the formless", that is the vibrations or Chaitanya they call it, “but I see it in you in person. It is in person I see it." This kind of appreciation is only possible between people who are realised Souls because they understand each other. Those who don't understand you see have different, different ideas, different, different things.

Now they say that we must have peace. How can you have peace? One is going to the right direction, another is going to the left direction, another is going in middle some where hanging.

Everybody think they are right. Whatever they are doing is right. But what is the outcome of it.

Nobody is peaceful within. They are fighting for things which has no meaning at all in life. They are many people who are fighting in the name of God, I mean this is the worse someone can do stupid thing. How can you kill each other in the name of God, how can you? But this happening is accepted and not only but it is regarded as religion.

Like this whole world is full of violent people. You should say minimum disturbed people: families are disturbed, children are disturbed, the whole Mother Earth is shaking and everybody is disturbed.

By saying that you should have peace you cannot have. By talking about you cannot have. Because I have seen some people who got peace awards, there is no peace within. Only by transformation of human beings, by evolving them, taking them into this realm of peaceful existence of reality you can bring peace.

Everybody wants peace but even if you want you should genuinely ask for it. If you are going to decide it mentally you cannot. Mentally everybody differs, everybody has opinion for everything.

Like they will say, now they have come here. I mean the modern mind is like this. It always tries to runaway from the truth, always. If you, I will give simple example, if I tell somebody to please telephone to such and such gentlemen, immediately the other person will say, “He may not be there. He might have gone to his office." Today is Sunday how can he go to his office. “Alright, then he might be..." I said, “Why don't you telephone first, why do you react? First telephone, finds if the person is there or not." But that is not possible because

the mind is all the time wobbling, giving answers and reacting.

Whatever you do, there is reaction. It can also say now why so many flowers, I never asked them but they did put it also. I don't know whom to be blamed, who is the victim. But they might say so. They can have objection to everything.

But one thing is that why don't you understand that you are not at peace, at peace with your self.

Unless and until you yourself at piece, you cannot find faults with others. You cannot judge others.

Why are you not at peace with your self? [This is the thing one should understand.] Because you are not integrated. Your mind, which is I have told you what it is, says something then your heart says something and then your liver says something. There is no integration in your understanding of any problem.

Once you are completely integrated then you feel the peace. But the best thing that happens I have seen with Kuṇḍalinī awakening is this. We are all the time thinking, thinking, thinking and thinking so much.

Some people really have told Me that to cut our throat but stop this thinking. Specially in modem time we think so much more for everything. I think without thinking we will be lost and in this ocean of thinking, we are so frightened with the waves, as if you are in the ocean and there are waves around you and you are very much frightened of them.

But supposing by any chance you get in to a boat then you can watch these waves which were frightening you

and enjoy them; but supposing you become an expert swimmer you can jump down and save many.

In the same way it happens. When Kuṇḍalinī rises these waves that we have of our thoughts which rises and falls, rises and falls and we are all the time jumping on the cusp of the thoughts, either in the past or in the future. We cannot be in the present.

So when she rises, she elongates those thoughts. There is a space in between that in the present and in the present we don't think but we are aware, much more aware then we were ever. We are in the center, we are in the center and there it is our peace.

So we have to rise up to that point.

Now, as he has told you about all these centers, when the Kuṇḍalinī passes through them she nourishes all of them. These centers are responsible for our physical mental, emotional, also our spiritual being.

So she nourishes them, integrates them and ultimately pierces through our fontanelle bone area and connects us to this All-pervading Power of Divine Love.

All the scriptures have described about this thing. They call it by different names, as I have told you that they call it `Ruh', they call it `Cool Breeze of the Holy Ghost', they call it as the `All-pervading power of Divine Love', all kinds of names like `Param-Chaitanya' as `Nirakar' they call it `Alakh niranjan'. All kinds of names they have given to this All-pervading Power because you can see it, you can see it and you can feel it after realisation. You can feel it, it exist.

For the first time you feel it. You see these flowers you take them for granted how beautiful they are.

But it is a miracle, just think it, how beautifully this Mother Earth has created for you all these. That means she is living organism. She understands what to produce out of what to do? Who does all this? What is this energy? This is the energy of Divine Love. When I say `love', I mean compassion, it is the compassion. It is a thing we don't understand that how can compassion be the truth. But on a little lower level we can understand it. If you love somebody then you know everything about that person. Take it that way. Compassion is real intelligence. Which gives you the, I mean, enlightened compassion, the complete idea of the totality, it does not talk of one here and one there but of the totality it has. Through its intelligence it understands what is benevolent for the global peace, what is benevolent for an individual problem. It understands everything, because it hasn't got any angularities. It is so pure. And this purity, which is compassion, which is pure intelligence.

And once you enter into that realm you don't have to read anything. You become just very knowledgeable, yourself very knowledgeable.

So many powers you have within yourself, of which you are not at all aware they all start manifesting. I have known people, ordinary artist coming to Sahaja Yoga become now world famous artist. Ordinary people who could not even come up on the stage have become great orators. All these qualities which make you so special just start prospering and also manifesting itself.

But that's not, that's like you see mother giving chocolate for children, that is not the main thing. The main thing is that you reach a point that you feel you don't have to achieve any thing. You have achieved everything. All that hankering after achievement and all that is finished. Then you enjoy everything. Your existence you enjoy. You enjoy each and everything that you see. This enjoyment cannot be described.

But it is to be experienced and to be felt.

I must say In England I worked the most because somehow My husband is posted here and lot of time and the country which I had worked very hard is England, no doubt. And I had an advantage of this English language which I could speak also.

But I have seen that, once English take to something, they will take it seriously. But to take them to something is difficult, because too much of mental activity. We have to go humbly beyond this. Because they will say, I don't like this, I did not like this I don't want this. That is not the thing. Who are you? Do you know who you are? I want this, I believe, our politicians will always say I believe, now who are you? Do you know who you are? Mohammad Sahib has said, “Unless and until you know yourself you can not know God Almighty." So why talk of God? First know yourself. That's why Buddha never talked of God. He said better not talk of God First know yourself, because, you haven't got yet, the capacity to understand God.

First of all you must know yourself. And to know yourself is quite easy now days. I am amazed the way it worked in so many nations, the way people have taken to Sahaja

Yoga and the way it is spreading, I am amazed; this is the special time and a special blessing where you are born when it was to happen.

But, still it's a judgment; again I will say it's a judgment. Nobody can force you. You have to judge yourself whether you want it or not.

There cannot be any forcing. But you see, this countries also, European countries I have some ideas, they think it is a cult. I mean I can not understand how can there be a cult when where there are no weapons used, there is no money taken, there is nothing as such peace such joy, such friendship among so many nations it's established. If it is cult alright, does not matter. I wish there were some more like that! This mind all the time criticising, finding fault, this and that. But what have you got so far. As a Mother, I will say you have to be selfish. Just know that you have to know yourself and that is what will give you everything that you want.

Actually the wants also change. It is very surprising how after Sahaja Yoga people change. Of course there are one or two here and there who are not so good. But they will be, they will be, they have certain hankering, something hanging in there minds I think. But most of them come up so fast. I am really amazed, how these things are happening in the Western countries.

India, of course, no problem, because they have the heritage, they have the knowledge they know everything, they know what they have to get.

But here in England, I was really amazed, how it has worked out.

So seekers are born every where, I see now this seeking is so deep and so much maddening for people.

Of course many people have made money out of it. That's where I can't understand. They have made marketing thing, you cannot market, you see, this is your evolutionary process. How much money do we go give to Mother Earth for giving us these flowers? It is natural process of evolution, which has to take place in simple words it is `Sahaja'. Sahaja means spontaneous. It's born with you. It is a great chance of becoming Sahaja Yogis. `Yoga' means the union with the Divine. You get powers, it is not just to say I am twice born have some sort of signboard; but you become. Is the becoming is the point. You really become and in that becoming you get powers, you can raise the Kuṇḍalinī of others you can cure people. I mean so many things happen.

The greatest thing happens is that such a person become extremely peaceful, wise and enjoyable. As Namadeva enjoyed, Gora Kumbhar they enjoyed each other.

Then Namadeva went to Punjab where Guru Nanaka: he saw another realised Soul, immediately he recognized and he said “It is so nice you come to Punjab, now you better learn Punjabi language and write beautiful poetry as you done it in Marathi language." So there is such a big book written in Punjabi language by this great poet.

You too had great poets here, there is Lewis, then we have William Blake. William Blake was unknown to us in India. They never, they thought he'd be a mad man or what I don't know. After coming to London only I could discuss something about him such a great man, such a great poet.

But they had to write it in this poetry, because if they were saying something, they would have been murdered or killed, I don't know what would have happened.

So they wrote it in poetry when people couldn't understand much. They have *[UNCLEAR]* way for us. They have created this path. For them the greatest thing is that it is working out because they are all together.

First so many came, trying this and else you see build the path. Now, it is complete, not only that, but also the temple is ready for you to enter in. The whole work of this great people has helped us. They were never against each other, Never. When they talk different religions I can't understand specially, when Moses, Abraham, were described by Christ. How come the Jews fighting Christians, I can't understand? Not only but also Mohammed Sahib described about Christ, his mother, much more with greater respect than in the Bible.

So how can this people fight among themselves? It is to be seen clearly in their books only, they find the books so authentic it is in the book written down that they followed all these great people.

So there cannot be any devising thing that is a religion. Religion cannot divide. Actually religion is within ourselves. And when you get your realisation you suddenly become very righteous, suddenly. I have see in this England only, people taking drugs and all that overnight gave up, overnight. It is remarkable how in the light of the spirit they saw what is wrong with them, what is destructive and they just gave it up. Such beautiful people have come up. You won't believe that these were the people who lost all hopes about themselves and how

now they have become such beautiful beings, I am very proud of them.

This lecture of Mine should not upset you in any way. If I have said something that makes you feel little nervous or any thing, you should not worry. Because your Kuṇḍalinī is all the time there and innocence cannot be destroyed. Of course some clouds come over it but there is the deity of innocence sitting within you and it holds everything works out without any problem.

Only thing you have to desire for it and asked for it. As I said it can not be forced. I respect your freedom and in your freedom you need to receive your Self-realisation. It cannot be forced, it cannot be argued, nothing of the kind; because it is natural process as I said, is a natural process and for the natural process how can you argue it.

So, I would request you, first of all, that those who do not want to have Self-realisation should leave the hall. Because it will take hardly ten minutes, hardly ten minutes. But those who don't want should leave the hall, would be nice, very amicably, I will be thankful.

[Pause for few minutes.] One thing I have to tell you that there are mainly two problems with human beings where Kuṇḍalinī stops: one of them when you feel guilty. When somebody tells you, you are sinner or something like that, such an idea crops into your head and you think you are sinner and they are afraid.

Many people have told Me, “We are afraid of you." I said “Why"? Because you have sinned... that's why I am here, why you should be afraid.

So first thing is that I love you all and you all should love yourself. Because you all are human beings and at the epitome of the evolution.

So please give up the idea of feeling guilty. Alright, you have done something wrong, accept it. That is finished now that is past and I am talking about present. That is finished. As far as this moment is concerned, it is doesn't exist.

So, don't think of what you have done wrong or what you have been worried about and all the time thinking.

Also our modern life is so much, full of norms that even a little thing you do like, even if you put the spoon on this side to that side, you feel guilty. Oh I did like that. If you were really guilty, you would have been in jail not here. You should have very pleasant attitude towards yourself and not to feel guilty.

That is what I am requesting you again and again don't feel guilty.

Then the second thing is why I say so. Because this center [left Viśhuddhi] here left side catches. It goes into very big jeopardy, into very big problem and this center can give you spondylitis to minimum, or angina or all your organs become very lethargic.

So why carry this guilt with you? So give up the guilt.

The second simple thing is that please forgive everyone, in general. Don't think about them. If you don't forgive then you go on thinking, “Oh my goodness he troubled me" like this and the person who has troubled you is quite happy while you are just troubling yourself. By that you catch on the Āgñyā which is in the center of this

optic chiasm like this. And it is so close and so constricted, that if you want forgive it want open and how will the Kuṇḍalinī pass through? So just forgive all of them and don't think about to whom you have to forgive. Just say in general, I forgive everyone. Many people say it is difficult, it's a myth. You forgive or you don't forgive what do you do, do nothing. But when you don't forgive then the all problems start.

So better forgive everyone. Without even thinking that you have to forgive this person or that person. It is headache even to think about them so better not.

This center is very important, specially for Christians. You know that how forgiveness was *[UNCLEAR]* that Christ has manifested and requested all of you to forgive.

The third thing I have to request is that have full faith in yourself that you are all going to get your Self-realisation. Please have this faith in yourself. If you have that faith it will workout. In no way condemn yourself or say that how could I get it. In Genoa it happened, it was not such a big hall but quite a big hall and everybody got realisation. And for at least half of they were stunt they couldn't believe that they were feeling the Cool Breeze of Holy Ghost, they just could not believe it, for a half a minute.

Then they looked very happy and joyous and started smiling and clapping.

So it is going to happen to you all. I promise, but have just faith in yourself. You all can get it. Another thing I have to request is if you can take out your shoes, this Mother Earth helps us a lot.

***Contents: 1996-07-07*, Public Program, National Palace of Culture, Sofiā, Bulgaria**

I bow to all the seekers of truth. At the very outset we have to know that truth is what it is. We cannot change it, we cannot transform it, we cannot describe it. It is an experience of truth. I am very much thankful to this association of Yoga, which has invited Me very kindly to talk on Sahaja Yoga. And in a place so far away from India, that there is an association, I was really quite surprised.

Now we have to understand that why do we do Yoga? What is the purpose of Yoga? And what is the meaning of Yoga? The meaning of Yoga is that you have to unite with the all pervading Power of Divine Love. In Sanskrit it is called as Param-Chaitanya, in the Koran it is called as Ruh. Also in the Bible it is described as the Cool Breeze of the Holy Ghost. And what it has to happen to us is our evolutionally breakthrough, the last breakthrough.

All kinds of Yogas, which started in India according to the different times, first of all we have three types of seeking. One created Vedas, but the first stanza of Vedas says that by reading all these if you do not get self-knowledge it is useless. People have been seeking the truth, so they took to another is the devotional side, which is called as Bhakti mala. Now this Bhakti mala was nothing but like saying the praise of God, praying to God and devotion and dedication to God Almighty.

So these two, we can say the paths, started but there was another path in India, which was the central path of seeking. And that was done by very few people and they were called as the Nath, Nathpantis. Their searching was

very deep; it started with Haṭha Yoga first to begin with. Ha and Tha meaning Sūrya Nāḍī means Sun channel and the Moon channel, balancing between the two. Then also what happened that it was really very difficult to follow the path of one side the Sun, another side the Moon.

So they started following the Sun, by which all importance was given to God. You must look after your body, you must build up your body, you must see, be able to stand on your one leg for hours together like that, stand on your heads and they went also to Himālayas do all that thing.

Buddhism also had two beautiful flowering, one was called as Zen system and another in China was called, as Lao Tse has written is his Dao. But when they took to the Sun side the development started I think in a very imbalanced manner. If you go to the right side too much then what happens, you become extremely hot tempered. You can become very aggressive. You can develop powers, of a sort of destroying others and be very powerful warriors and all that. But it had a reaction because such people became emotionally dried out. Like we can say that Germans are supposed to be very high level in IQ, means in the intelligence coefficient. I couldn't understand what happened to their intelligence, how could they kill so many children? How do they do all these horrible things? So I started telling them there has to be a compassionate intelligence. Then only the balance can come.

So in the Haṭha Yoga the part that was compassion was finished. Just body building, becoming very strong people, but for what? That can take you to the extreme

that your conscious mind can become extremely active. And then you get paralyzed. And now in America there's a new disease that has started, that called MpS disease. They become like reptiles, they can't walk, they can't stand up, but thinking is all right, brain is all right. And they have to be carried just like some big fish on the body.

So now you see we have many types of Yoga started with this, means that another was that people thought that they have to do certain things, which they have read about like Pandas and all that, they do in Rāja Yoga. They said it is for Kuṇḍalinī but you see it was an artificial type of Rāja Yoga. For example if you don't start your car and start moving the wheels, will the car move? You have to first start the car.

So when the Kuṇḍalinī, as you have seen, is awakened, then this Chakras themselves try to sustain it, go into complete closer. That is known as bandhan. But just putting some sort of an exercise and closing the Chakras what's the use, the Kuṇḍalinī it is not moving, what are you holding? Then I was surprised by one organization in America when I went there, some doctors had gone from India, they have cut their, this little tread under the tongue. And their tongue was bad in, just like a dog's tongue, you see, was not going inside. They couldn't speak. This was Yogananda's Self-realisation Association.

So I asked them, “What have you done?" They said, “We are doing Rāja Yoga and there is a thing that has to happen called as Kecharī.

So you take the tongue and push it back here, so we had to cut it." “But for what?" They said, “For stopping the

Kuṇḍalinī." “But Kuṇḍalinī is not there." Of course when Kuṇḍalinī rises automatically, spontaneously all these things happen within us, within our body. Just as you start any car all machinery starts working. There are so many such Yogas about which I've heard and I know people have been hurt with it. I have met many people who have suffered a lot because of misleading ideas. The time had to come for you to get Self-realisation, to awaken the Kuṇḍalinī. That time is now. Before this there was no time that people could get mass evolution.

Normally also in the evolutionary process, one fish came out and started crawling, then about few came out and then shores of fishes came out. Seeking today is the maximum, it was never so before. But it gets diverted and deviated. The happening of Yoga is a living process, is a living process of evolution, like this Mother Earth you put one seed, it sprouts by itself, it's a miracle. Who does that? Who creates these flowers? Is this is Param-Chaitanya, this all pervading Power of Divine Love? So this separation of two things, one side is this physical growth and physical working out and on the other side the emotional working out through Bhakti could not balance human beings. I am saying that if it is your evolutionary process, if it's a living process how can you pay for it? How much do we pay to this Mother Earth? It is built-in in the Mother Earth that She can sprout a seed and also in the seed it is built-in that it sprouts.

So firstly you cannot pay for any Yoga. You can pay for the hall, you can pay for electricity but you can't pay for an evolutionary process, which spontaneously within you,

works out your last breakthrough. And if you are sincerely seeking, it works in no time.

Even the Nathpantis who were quite *[UNCLEAR* deft] in it and travelled to so many countries like Gorakhnath, they too could not raise the Kuṇḍalinī of masses. Actually the tradition was that one Guru could have only one disciple. And it was hazardous, he had to go through so much of disciplining and all kinds fasting and all kinds of things that people got fed up with it.

Recently I've read a very interesting book by an American, called as, name is `Peaceful warrior'. Is the story of an athlete and a person who took to his Zen system of ascent. And he had to, really if you read that book you get such a fright, because poor fellow, this Zen fellow had to go for years together through various things and do all kinds of horrible things. Ultimately he receives his Realisation. This is he says, “I reached my satori state." Is that we call as the, what we call Self-realisation.

So all these things though were there, let only one single soul into Realisation.

Now today's Sahaja Yoga is different, it is the compassion of God Itself *[UNCLEAR]* that you also get your Realisation. He must have been now very much overwhelmed by the way people have been asking His blessings, that people get their Realisation in no time. It's the other way round. First you built the top of the house and then the house. First you raise the Kuṇḍalinī and enlighten the brain, little bit even.

Now supposing it is all darkness here, I can't see, I have a snake in my hand and I am very obstinate.

And if you tell Me, `Throw away.' I won't, I won't because I'm obstinate. But if there is light, little light somewhere immediately I will throw it away.

So by the awakening of the Kuṇḍalinī what happens people see what is destructive, see themselves, nobody has to tell.

Now if I tell you, `Don't do this', all the Ten Commandments, you'll all run away. But once you get this light then you become your own master. You yourself become your guide and you give up everything that is destructive. Not only that but you know everything about yourself, you get the self-knowledge, you know what centers are catching, where is your problem. For example, some Sahaja Yogi will come and say, `Mother, please, please remove my Āgñyā, it is very bad troubling me.' Actually [it] means `I'm very egoistical, there's ego in my head, please take it out.' But normally people will never say that. When you start feeling your own problems you try to solve them. Also you know how to solve them, you yourself become knowledgeable. Then you'll be amazed how you transform completely.

With Sahaja Yoga so many diseases, I've told *[UNCLEAR]* doctors' conference here you give last time and so many diseases are cured automatically. You don't have to *[UNCLEAR* put] any diagnosis. On your fingertips you know what Chakras are catching. Now if you know how to correct the Chakras you can correct yours, you can correct others also. Also on your fingertips you know what's wrong with another person. You don't see what clothes or nationality but you just see the Chakras. And you can cure another person; you can raise the Kuṇḍalinī

of others. All these blessings are there because of these modern times.

In our Sanskrit language we call it the `Kali Yuga', modern times. `Ghor Kali Yuga, Ghor Kali Yuga' means the worst times for human beings. But also promised that at these times only, those people who are seeking the truth in the Himālayas, or in the jungles, in the forests will become householders and they will get their Realisation. These are the special times; I call them the Blossom Time. Because there are so many flowers like lotuses; their brains are. Only this lotus has to open. This is the Last Judgement. Now, if you want to go to something wrong, to something stupid you can go. Also you need not have blind faith in Me. Not necessary. But if you experience this all pervading Power on your fingertips as Cool Breeze then don't doubt yourself. Because you are born at a special time.

All these centers that you have seen here are responsible for our physical, mental, emotional being and also our spiritual being. These centers if they are in jeopardy then you can have physical problem, you can have mental problem, you can have emotional problem, you can have spiritual problem.

So now we have seen through this Kuṇḍalinī awakening so many physical problems are cured, mental patients are cured, so many peoples who lost, were lost in spiritual seeking are cured and they have become so powerful, powerful in love and compassion.

[Aside:] *[UNCLEAR]*. You can't see, that's why. It's all right, nothing to see.

So if you have say any problem on human level the same problem takes its own course in the collective.

Now if I say that Sahaja Yoga can cure cancer, all the doctors may come with their short guns at Me. But it can. Why not to give the chance? But the modern mind is very complicated. Actually the mind that we have is a myth. It is created by our conditioning or by our Ego. If you have to go to reality you have to go beyond the mind. That means you have to become thoughtlessly aware. One thought rises and falls, another thought rises and falls. These thoughts are coming to us from the past or the future and we are jumping on the cusp of the thought. But we cannot be in the present.

When Kuṇḍalinī rises She elongates these thoughts and the space is created, that is the space for present. Thus you get rid of your stress and all your headaches and all your disturbed problems. Then you feel absolutely peaceful. It's important that individuals become peaceful so the whole world may becomes peaceful. At that state you become one with the whole and who is the other, to fight? Any device in methods, all fail before such a person. Today they are fighting in the name of God and religion, can you imagine? Actually Moses, Abraham were absolutely respected by Christ. And Mohamed Sāb respected Christ and His Mother much more than in the Bible.

So this is step by step how the religious idea has moved.

Now how can they fight among themselves and kill each other? It is absolutely stupid. But once you become your master, you see, you understand that all these religions in essence are the same. Actually it becomes a fact.

Because once you get these vibrations in your hand, of the Divine, you can ask any question and the answer comes like a computer. You ask any question, those who don't believe in God, let them ask first question: `Was there God?' `Is there God?' Immediately Cool Breeze will start. `Was Christ the son of God?' It is not mental, it's not discussion, it is not argument, it is just the reality.

So is compassion, is love, this is Divine, it's the giver of truth. The compassion and the truth are the same.

Supposing you love somebody you know everything about that person.

So there is no difference between the two. But this truth is full of compassion for only truth is real Yoga, real spiritual Yoga, you can feel that within yourself. You can feel it all of you. There's no problem on that. But people who are still obstinate will have to go on till that, step by step. It is very simple; it has to be because it is so widely today. It's not talking, it's not any kind of argument, any kind of exercise, it is effortless. Because you are so fortunate you are born at this time and that's the only criteria. You are not obliged to Me, it's your right to have it and to get it and to become powerful.

So many things will happen which you'll be amazed at yourself. The whole atmosphere will change. I know of very great artists who came to Sahaja Yoga and now renowned all the world. Musicians, artists, we can say doctors, all of them, they have become experts because they know the truth and your mind is no more, you are [here] with the reality.

Now supposing there is somebody who comes from the jail, from India and wears dress like a Sādhu, how will you

know whether is a gangster or he is a Sādhu? Just you put your hands towards him. Immediately it will start burning your fingers. You can know about diseases, you can know about persons, you can also know about situations. It helps socially, it helps politically and it helps in every way.

I don't know in this short lecture how much I can tell you. [That] is to get your experience and as I promised maybe that I'll send somebody who can give you a kind of courses. But you don't have to pay for anything, no money.

So if you are all ready I will tell you there are two conditions. First one is: you should not feel guilty at all. If you have anything wrong, you have done that is in the past. But if you carry it on then this centre catches here very badly and you develop troubles like angina, like spondylitis and also lethargic organs. Now, so you have to forgive yourself. Secondly you have to forgive everyone.

Now, you might say that it's difficult to forgive. But whether you forgive or don't forgive you don't do anything, what do you do? It is just a myth.

So why carry on with the myth and torture yourself? I would say don't think of them whom you have to forgive. It's a headache. Just say in your heart that: `Mother, we forgive everyone.' All right? The another thing I have to request is you'll have to take out your shoes because it helps a lot for Mother Earth to suck in our problems. You have to be comfortable. You don't have to go to Himālayas, *[UNCLEAR]*. Only thing you must forgive yourself and forgive others, that's all. You need not

stretch too much or *[UNCLEAR]* but sit comfortable state. It will hardly take ten minutes, I assure you. In the beginning it used to take for Me one hour. Now I think twenty-seven years I've been doing this job. Now it has become very fast. Now people are more aware. All right.

So what you have to do is to put your hands towards Me like this. Now, please put your left hand towards Me like this and right hand, bend your head and see for yourself if there is a cool or a hot breeze like vibrations are coming out of your fontanelle bone area. Fontanel bone area is the soft bone, which was there in your childhood. And keep your hand away from it and please bend your head. Now see if there's a cool or a hot breeze like thing coming out of your own head. Now, please put your right hand towards Me and put down your head again and see for yourself if there is a cool or a hot breeze like vibrations are coming from your fontanelle bone area. It is hot because you have not forgiven yourself or not forgiven others.

So now please do it.

Sometimes it comes close to the head, sometimes away from it. But don't put your hand on top of your head.

First you have faith in yourself, don't doubt. Now, once again, with your left hand towards Me and right hand on top of your head and please bend your head now. Now raise both your hands like this and see upward and see upward. Here you have to ask anyone of the three questions, anyone of them three times. You can call Me Mother or you can call Me Mātājī, `Mother is this the Cool Breeze of the Holy Ghost?' `Mother is this the all pervading Power of Divine Love?' `Mother is this the

Param-Chaitanya?' Ask anyone of these, one question, one of them three times in your heart. Now take down your hands please. Put both the hands towards Me like this, higher. Now watch Me without thinking. You can do it.

Without thinking. Don't think.

All those who have felt Cool Breeze or hot breeze out of the fontanelle bone area or on their fingertips or on the palms please raise both your hands. This is Bulgaria.

May God bless you.

You all became prophets. All of you have felt it, because you are truthful seekers. Thank you very much, many [thanks to you].

[Aside:] You sing one song.

They want to sing one song. You can clap, that your hands will become more energetic. Just give sometime to yourself, that's all, for your growth.

***Contents: 1996-07-09*, Public Program, Bucharest, Romania**

[Arrival at the venue for the, Public Program.] [Two lady Reporters interview Shri Mataji. Sahaja Yogi translates what the first Reporter asks.] Reporter: At Your birth it was something happened in the ward or in Your family or in the town You were born?

Shri Mataji: I have so many things, so many. I have so many things that happened.

Reporter: One example.

Shri Mataji: You see, many people had said they saw signs. Also My mother, she saw in her dreams that a Lady

in White is coming to save the world. My mother was a very intelligent woman. She was Masters of Mathematics and she was also very, very righteous person.

Reporter: If You can tell them about some visionary experience You had, something to be useful for the mankind for our path to the truth.

Shri Mataji: When I know everything, what is there to vision? When I know everything there's no question of vision.

Reporter:...

Some dream, some personal experience from Your childhood, from Your adolescence, from maturity You had, if it's possible to unveil some visionary experience You had.

Shri Mataji: I was never a visionary as such I must say, but I knew My job, I knew My mission from childhood. I was quite aware, Myself.

Second Reporter:... about this country, about Romania...

Shri Mataji: It's a very beautiful country and of such musicians that in India we call them gandharwas, means celestial musicians.

Second Reporter: And the woman, professional...

Shri Mataji: Oh, they are very good, very nice. But you must know that women have powers. You must know your powers. You should stabilize your minds and understand what you have. They can do a lot. Now see I will be seventy-four and I am travelling so much. You all can become very powerful.

Translator: The lady says You are one of the happiest human beings coming on this planet.

Shri Mataji: And also I want to make you all happy, very happy.

Translator: Thank you, Shri Mataji.

Shri Mataji: May God bless you.

[The party moves to the hall.]

Shri Mataji: It's nice wind there.

Sahaja Yogi: Yes Shri Mataji. A Divine Cool Breeze.

Shri Mataji: They are good ladies, I must say. It's always an idea that one should get a vision and accept certain missions in life.

Sahaja Yogi: We got some miracle photos this morning Shri Mataji. This morning at the railway station. You see the lights around You.

Shri Mataji: All Love.

Sahaja Yogi:... but this is the most beautiful. There are some others, but not so spectacular like this.

She would like You to sign the photograph, Shri Mataji.

Shri Mataji: Normally I never sign because I'm not an actress. That's My name, but also I have another name.

Reporter: Thank you so much.

[Transcription of Shri Mataji's talk starts here:]

I bow to all the seekers of Truth. At the very outset, I've always said that truth is what it is. Without knowing the absolute truth, there cannot be peace on this earth, there cannot be satisfaction, there cannot be happiness and there cannot be joy. We do not know the absolute truth. Whatever we know, we know through our mind. And mind is a myth created by us. This myth is created by our conditionings and our ego. And once this mind is built just like we have a computer, made by ourselves, we

start depending on it. But mind can never give you reality. One has to go beyond the mind. Unless and until you go beyond the mind, you can not know the truth. Now what is the truth? The truth is that you are not this body, this mind, these emotions, this ego but you are the pure Spirit.

Another truth is, as you see here beautiful flowers created by Mother Earth, we take them for granted.

But it's a miracle. We do not even think that it's a miracle. Who does all this miraculous living things, living works? So I have to tell you there is a All-pervading Power of Divine Love. And this Divine Love does all the living work. We have also evolved to this human stage by this Divine Love. We have never felt the power of this Divine Love. It's an energy, very subtle that works out all this living work we are talking about. Now we have to understand that all the chaos of the world, all the problems of the world and of individual human beings come to us through our ignorance, ignorance of reality.

They have been telling you about the Chakras, about the centers that we have. These are responsible for our physical, mental, emotional and spiritual being. When they are in jeopardy, then we get all these problems. But we have a power within us which is in the triangular bone, which is called as sacrum. Now this bone, sacrum bone, is called sacrum, sacred, means the Greeks knew about this. And they worshiped also the Mother Goddess of Athena. But all their mythology is finished, as your mythology is also finished.

So, there were people who were very much conscious and aware that there is a power, a Mother Power of

compassion and love. This power has brought us to this level of our human existence. But we get lost because we have a freedom to choose right or wrong. And we take to right and wrong with this mind of ours which is a very unstable guide.

For example, I saw in your markets here, also in other countries in the Eastern Bloc, so many things selling from America and England and all junk. And you such nice people are wasting your money, precious money into this junk. One thing I must tell you, Indians are that way very wise. There's a kind of a stability. You won't find one shop in India where any one of these imported things are sold. It's thanks to Mahatma Gandhi that the idea of imported things to be boycotted came from him.

So, it has helped us a lot because we don't waste our money on things which are not selling in other countries because of recession.

This stability has to come. First of all our securities are to be built, that we are human beings who have wisdom. But how do we get this wisdom? What is the way to get this wisdom within us? So, when this Kuṇḍalinī rises, She nourishes all these centers. That's how She solves our physical, mental, emotional and spiritual problems. See, these are all Romanian singers and singing Sanskrit songs and Hindi, Marathi songs so well, that nobody can believe they are Romanians. With the awakening of the Kuṇḍalinī, now they have developed a special type of creativity and sensitivity and also the wisdom that we have to be stable people. When this Kuṇḍalinī enters into our brain, it enlightens it. Brain is a reality. And then we

start seeing the different parts of our brain enlightened and we understand what is reality.

Also when this Kuṇḍalinī pierces through your fontanelle bone area, you get the actualisation of your baptism. When you get that actualisation you start feeling on your finger tips the Cool Breeze of the Holy Ghost, which is, what I say the Divine Love. You get absolutely relaxed and peaceful. How? Your thought rise and fall, another thought rises and fall and they are coming from the past or the future. But you cannot be in the present.

So, we are jumping on the cusp of these thoughts all the time. But when this Kuṇḍalinī rises, She elongates the thoughts and the space is created, which is the present. At that stage you become thoughtlessly aware. There are no thoughts, but you are fully aware.

The other day we had a conference with the Haṭha Yoga people and told them that in Haṭha Yoga there are eight parts, ashtangas, eight parts. Only a wee bit part of one of them is exercise. And this exercise is also, is to be done according to the need of the person, or it can complicate your body. It can trouble you.

So, the real achievement of Haṭha Yoga is also thoughtless awareness. What Patanjali has said? He has said that there should be thoughtless awareness and then there should be doubtless awareness. In those days, one had to work very hard to achieve it. Among thousands of people, one person used to achieve.

Also same thing about Tao or about Zen system. One has to go through a great practices years after years to reach the satori stage, they called it *[UNCLEAR]*.

Now this has been absolutely reduced to ten minutes exercise. Like we first build now the dome of the temple and then the temple. Like we raise the Kuṇḍalinī by which you get the light, light of your Spirit.

Maybe little, but you do get. In that light you see yourself. As I always give you the example of a snake in My hand. There is darkness and I am very egoistical and I can't see what is in My hand. Till the snake bites Me, I don't believe it is a snake. Anybody tells Me, I won't listen. But as soon as little light comes in, I through away that snake. In the same way, you throw away whatever is destructive in you.

I never say, `Don't do this and don't do that.' I do not say about the Ten Commandments. These are not the days for Ten Commandments. But let them have their own light. In their own light they can see what's wrong with them. They become their own masters, they become their own Gurus and let them grow in reality.

That is what Sahaja Yoga is, today's Sahaja Yoga. `Saha' is `with', `ja' is `born with you', is the right to become a Self-realised personality. In these special times, I call it a blossom time, which is definitely, believe Me, is the Last Judgment. If you want to go to hell, you can go to hell and if you want to go to Heaven, you can go to Heaven also. It is your choice and in this choice, you are free to decide what you want.

Somebody asked Me, a newspaper lady once, “What is the proof that it is the Judgment time?" I said that “you can see from..." You must have seen the photographs, miraculous photographs. There were never cameras before.

So, Mohammad Sahib said, “Don't make My picture." And Christ's pictures are, sometimes He looks like a Catholic Roman or He looks sometimes like somebody from France or somebody from England, depending on the artist.

But now, these cameras are doing wonderful work, I should say. They are producing such miraculous photographs, that I am amazed, but to prove that this is the Last Judgment, so be careful.

So, what you have to achieve is Self-knowledge, to begin with.

So you know which of your centers are catching, where are you in trouble.

Supposing somebody comes and tells Me, “Mother, please improve my Āgñyā." That means he is saying that “Mother, I'm egoistical. Please, correct my ego." Normally we would never say like that.

So, we talk the language of Chakras and centers. These give us full idea as to what is our physical state, what is your mental state, what is your emotional state and what is your spiritual state. All right.

So, now after knowing what's wrong with you, if you know how to correct it, then there's no problem.

The second thing that happens to you, that you know about others also. Because this human awareness develops a new awareness of collective consciousness.

So you can feel on your finger tips what's wrong with others also. If you can cure yourself, you can cure others also.

And that is how Sahaja Yoga is spreading like wild fire, like the seeds, you see, which just float in the air and go on spreading. Because the time is such. It's very important time, I think, that this is happening because the Divine, Itself, is anxious. It is helping so much that never it has happened before. According to Indian philosophy, there is what we call, this is Kali Yuga, ghore Kali Yuga, worst time. When people go into illusions, into bhranti, illusions. And at this time only they will take to seeking, seeking of the truth. And this Kali Yuga is now getting into another thing called Krita Yuga, where all these vibrations, or we can say the Param-Chaitanya is acting. People can't believe in it.

First of all, we have no faith in ourselves. We think, “How we can get it?" We have been conditioned by saying that we are sinners, we are good-for-nothing people. But that's not true. Nobody is a sinner.

It's just a myth again in the head. It works so fast now, so people were amazed that for this Kuṇḍalinī awakening, people took births after births and “Mother, how is it working so fast?" I said, “Nobody went to moon before this and now how we are going to moon?" The time has matured, matured human beings. Whether you are educated, uneducated, whatever you are, as long as you are a human being you have a right to get your Self-realisation. But of course we can't give Realisation to arrogant people or the people who have already some ideas about Realisation. One thing we must understand, that if we have to change the world, we have to change human beings. People think by giving lectures, having conferences and this and that, peace will come. It will

never come. A global transformation has to come for peace, for wisdom and for joy. And that's what happening.

There is so much to be said on Sahaja Yoga. Only thing you have to know that you have many powers.

First is the power of great compassion. And this compassion acts and it works. It's not just talk or it's not lip service but actually it acts. You have to just mature into that. This can happen to you today, to all of you. There are so many already, so many Sahaja Yogis here.

But after that you must grow, just like a seed that is planted and has to grow into a tree. Must pay little time, only time, not money, for your growth. You must respect yourself. Otherwise it's like a seed which is sprouted and finished. Then you will know what is your identity, what is your glory, what is your greatness. This truth is the Divine Love. If you love somebody, you know everything about that person.

In the same way, truth is Divine Love. And you become a very mature, wise person.

I am so much happy to come to Romania. In Sanskrit “ramaṇa" means to enjoy. You have to now just know your Self and enjoy your Self. As I said in this short speech, I cannot say everything about Sahaja Yoga. Only thing is that you should ask for it. I cannot force on you, because I respect your freedom. If you want to have, you can have it. And if you don't want to have, nobody can force you.

So anybody who doesn't have it should leave the hall, though it will hardly take ten minutes more for you to receive your Realisation. This is your own, you don't have

to pay for it, neither you are obliged to anyone. You'll be amazed how your problems will be solved by the help of this Divine Love.

Now I have to tell you that there are two conditions, very simple ones. First of all is not to believe that you are guilty, you have done something wrong. Whatever wrong you have done is in the past, is finished.

You are here in the present. If you feel guilty, then this center here on the left side catches. And then you develop angina or maybe the spondylitis or maybe lethargic organs. But why to have all these headaches.

Because to feel guilty is also a mental activity. If you were guilty you would not have been here, you would have been in jail.

So firstly forgive yourself. Just forgive yourself. Have a very pleasant attitude towards yourself.

Now, second is to forgive everybody. Now the center here is like this, very constricted, like this. And to open this you have to forgive. You don't have to think about the people whom you are to forgive because if you think about them, it will give you headache. In general you should say in your heart that `Mother, I forgive everyone.' These are only two very simple logical conditions.

Now, I request you to take out your shoes if possible. In England, first time when I asked them to take out their shoes, most of them walked out.

So much attached to their shoes they were. But Romanians are much wiser.

I told you it will take hardly ten minutes, hardly, really because you are so aware, you are so beautiful.

But have faith in yourself; that's very important. Now, I would request you all to put your both the hands towards Me. You can put down your fans and put both the hands towards Me. Just like this. Now, you have to bend your head and put the left hand towards us and put the right hand on the top of the fontanelle bone area which was a soft bone in your childhood. Please bend your heads.

Now, see for yourself if there is a cool or a hot breeze, like vibrations, are coming out of this fontanelle bone area. This is a soft bone in your childhood.

Sometimes you get it very close to the head, sometimes away, but don't put your hand on top of your head.

Now, please put your right hand towards Me like this and bend your head and see with your left hand.

If it is hot that means you have not forgiven yourself or not forgiven others.

So, please now forgive yourself or others. Once again. Please put your left hand towards Me and put your right hand on top of your head.

And now see for yourself. Again, sometimes you get it far away.

So, see it clearly and have faith that is coming from your head. Bend your heads. They didn't bend.

Now, please put both your hands towards the sky, like this and push back your head. Here you have to ask one of these questions three times in your heart. You can call Me `Mother' or `Shri Mataji', Now say in your heart three times one of these questions. The first one is, push back

your head and first one: `Mother is this the Cool Breeze of the Holy Ghost?' Now second question is: `Mother, is this the All-pervading Power of Divine Love?' And the third question is: `Mother, is this the Param-Chaitanya or Rūh?' Ask anyone of these questions, three times.

And now put down your hands and watch Me without thinking. Don't think. Just don't think. You can do it. All those who have felt Cool Breeze on the fingertips or on their palms or out of their fontanelle bone area please raise both your hands. My. The whole, all of them. My goodness! I bow to you, all Saints now. Your powerful, saintly path has started, life of saintliness which is very enjoyable. Just enjoy yourself.

May God bless you all.

They will now sing one song and you all should clap so that your hands will be more empowered.

Contents: 1996-07-10 **Talk to Sahaja Yogis, Airport, Vienna, Austria**

In Bucharest, there were equal number like you people are here and I didn't know how to take out My attention away from them, it was so much touching to see people so much full of love. It's a very powerful center we have I think, Bucharest is, because we have some very great musicians there, as you are here.

Also, they have, they told Me twenty-one doctors who are practicing Sahaja Yoga.

So many scientists, very open-minded people, very open-minded. And it has spread so fast, there were 6,000 people in the stadium, we could not have it in a hall, so stadium and everyone got Realisation. I was telling them

the General of the military hospitals, he came to see Me personally, he got his Realisation first, then he came to see Me.

So humble he was, all the time he was worried how Sahaja Yoga will spread, “What are you going to do?" “How long will it take?" I mean such, sweet, sweet things he asked Me. I was amazed. This man was meeting Me only yesterday, he came to the program, got his Realisation, today he is very anxious to do so much for Sahaja Yoga.

So, I said, “Why don't you come to Italy?" He said “All right, If you call me I'll come. I'll come to Pune wherever You will say, to Bombay [Mumbai] anyway." Is very surprising, also in Bulgaria, where we went to Sofiā, the people who came, I mean, the Bulgarian Government is too lazy yet to say that we are registered, so we have to go through some association.

So this time Yoga association called them and they believe in Haṭha Yoga and I mean, I told them all about Haṭha Yoga, what happens with Haṭha Yoga and how it works out and this and that. And we are doing the same but it's very quick, that's all, because it's modern times.

So they came to see Me later on and I tell you I was so surprised, they were very well read people they'd read so much about Yoga, they had been to India, this thing, that thing, but immediately they realised that Sahaja Yoga is the solution, for all the seekings, for all the problems of the world. It's very surprising how these countries, which are still not so developed, monetarily I would say, are so much in Sahaja Yoga and are so active. I was telling just now, that I think this democratic countries the money has

gone into our head and with money there is corruption, there is violence, there is Mafiā all kinds of things. With all that, still if these countries would not have been democratic I could not have entered there, just see. Because they became democratic I could go in there; we could talk of Sahaja Yoga otherwise it was impossible, to talk about Sahaja Yoga, God *[UNCLEAR]* or about anything.

So there is a big advantage that democracy started, but the situation of democracy is not all right and the people are not worried about, not at all worried about political side, they said let them fight, let them do what they like. And the people are so nice, so, so nice. Little, little presents they gave Me, even in the shop. It's different type of people and then they were telling Me about their ancient times whatever they have discovered is. And they said that before Christianity came in, people used to worship the Mother Goddess and then they showed Me paintings where a Mother Goddess is there and She's blessing some horsemen, some soldiers. They said it is 3,000 to 5,000 before Christ. That means they were very, very close to reality. Even I was surprised in Colombia and Bolivia; there are some statues that have come out of the Mother Earth and there's Kuṇḍalinī. Even the ornaments they brought as a copy ornaments, they have Kuṇḍalinī.

So I think human beings were aware of Kuṇḍalinī when they were very simple people and they knew about Divinity, no doubt about it. And they did not need it; they did not do Sahaja Yoga, or anything, just because they were there. But this so-called democracy, for such a long, is not good thing; I've reached that, because if it is too

long, people become extremely money-oriented. Money becomes so important that goes into their heads and that money, money, money; it's no end to it. In My own opinion is, money is for what, not to make a slave out of you, no, but to make a master out of you and this is where I find, people have missed, are still running after having more money, having more money, not satisfied.

But with Sahaja Yoga one can achieve that state of satisfaction. That now is sufficient, we don't want anything, what do we want? Is more than sufficient.

And today only I read in newspaper that Americans are just mad buying things. I'm also mad buying things for you, I tell you. All the time, everywhere I go, try to buy some presents, something, all the time buying things. But only things that are artistic, things which are made by hand, because now the European fashion is such a funny thing that they want everything simple, they don't like anything ornate, nothing classical. They are the ones who started everything classical, now they want everything to be simple. I can't understand, God has given us a nose which is protruding and ears protruding and are we to cut them out? So much so they don't think what will happen to the artist. Artists are creative and they want to put their exuberance into their art and we don't want to see why they are like that and we don't feel that, wear very simple dresses. You see, by this wearing a simple dress one doesn't become simple inside, not at all.

When I was in London there was one fellow, from the hippie group came to see Me, all his hair was like that you see and he was just scratching, perhaps maybe there

may be lice because I couldn't understand wearing funny dress.

So I said, “What is this, it's like primitive everything?" He said “I want to be primitive, I am primitive" I said “You cannot be, because your brain is not primitive, you are modern inside. Outside if you try all these tricks, by that you cannot become primitive, this is just your satisfaction, but why do you want to become primitive?" “Because they were better people." “Then become a better people." So this trend of madness, that we want to be extremely simple, is not necessary.

In Sahaja Yoga, we don't believe in Sannyāsa at all, no, not at all. You better get married, have children, go through it and live like normal people. By the way when I was talking, giving a lecture, I said you don't have to stand on your head, you don't have to stand on one leg, nothing of the kind. Then Ruth told Me that the gentleman who has invited Me has got his photographs where he is standing on his head and standing on his leg, standing on one hand. I said, “My God; you should have told Me it was so embarrassing." He's the one who invited Me; I'm just saying without understanding that this gentleman is sitting there. But he was quite convinced, he said, “Mother just put Your Hand on my head" I said “All right, all right-sided." The main thing, this Haṭha Yoga, I told him, there's no talk of compassion.

So only physically you will improve, only physically, what else, at the most he had a chest like this you see and all that, but what's the use. “Are you satisfied, are you happy?" “No." So the simple thing one has to really understand, to be simple is to be satisfied. And to see

things with an eye of appreciation of what people have created. In the modern thinking, see I don't know what sort of abstract nonsense they produce, is abstract. Now many people are realizing it, that one line they'll put like this and another like this, it's abstract, finished. I mean you are not abstract, first the artist has to become abstract, means subtler, that is only possible if he becomes Sahaj. Sahaj in the real sense, then he can play with colours beautifully to please others. But this is a very big problem of modern life today.

Then also I found out because of such bombardment, upon the modern mind, they have become absolutely unstable, there's no stability. Mister Armani comes out with one dress say, so everybody will buy that dress. He's now in goal thank you; I mean thank the government there. He's in goal and six others of his type.

So he takes out a dress, all the women will be dressing up like this otherwise they think they are not in. Then they will have another one gentleman coming, giving another show so all the men will be dressing up like that. This is nothing but we are playing into the hands of these entrepreneurs; because we have no stable mind, no wisdom. See once you have established what you require, what is the dress you require, what is the style you require, finished. Then you must grow inside and not outside. But this unstability has grown so much now, that if you go to somebody's house you see, suddenly you will find two legs of the pant falling on to you from somewhere, the whole house is filled with clothes, with the jewelry, with this, that and everything nonsensical.

So this modern mind has become extremely polluted; that we have no stability, no wisdom and we are playing into these things like fashions, this that. It won't work out in India I can tell you this much. This mini sarī came, mini sarī, up to the knee or maybe... You see this fashion is to expose the knees; is very dangerous, because you can get both the Nābhīs and I am suffering because of them. They open their knees in this cold weather or hot weather, either you catch the right Nābhī, or the left Nābhī and what is there in the knees to expose, I can't understand.

So they expose the knees and then it is regarded as a very big fashion that they expose the knees, you see. Then tomorrow they'll bring out something else and that's what they do.

So for Sahaja Yogis it is important that they must decide now, that's all finished, no more. I can understand a dress in which you have got some handwork done, some embroidery, some lace, all right, for men also.

Something that is some artistic thing. Now the attention is absolutely blasted by all these superficial things and to add to My pain was, that in all these countries, Eastern Bloc and Russia, which are very poor countries, imagine, one pound is equal to 5,000 lei, 5,000 lei. And they get their highest pay is about a hundred dollars per month.

So all the junk of America, which is not selling there, because there's recession, all the junk of England, all the junk from maybe from Austria also I don't know, is all going there and, of course selling at a cheaper price, but they are wasting all their money on those things.

Indians won't, I told you, this mini sarī came, it came for a short time, for a week, near Bombay [Mumbai] and then people said, you get lost, we can't do it. Once a sarī is established traditionally, for Indians, finished. Kurta pajama for men is finished, at the most they can have something shervani and all that, but then there are no every day fashions you see, of this kind coming up and who is paid for all this are these horrible entrepreneurs who are charging us for their tailoring.

So the first thing in democracy, people must have satisfaction. If you don't have satisfaction, it's not going to work out. The blessing of Sahaja Yoga is on you people, Sahaja Yogis, though we belong to the same type of country, that you have children; you have children. Normally now they are saying that the white coloured people are not producing children, everywhere in Germany anywhere.

So at least Sahaja Yogis are producing children, what a satisfaction. That we all have children and sweet beautiful children, beautiful as they are, what a satisfaction it is. That we have such beautiful children that, you see this race would have been finished. In America they say is minus, Germany is minus, everywhere it is minus, only Sahaja Yogis are producing children.

Sometimes in America they produced in one year eleven children, because one lady had three, two ladies had two each.

So she said, “Mother what are You doing?" I said “I want to have some saints in that country, you know, otherwise it's going to dogs, so better to have some and very sweet

children." Three children imagine and they were feeling rather embarrassed, I said, “Is very good, it's very good that you are having so many children." What we need is now, children and that's such a satisfaction, to Me it's the greatest satisfaction to see you with your children and, their sweet ways and methods and the way they play around, they talk, so satisfying.

So we have to seek satisfaction, this way, in our relationships. Like, you see, for My coming, you were so anxious. I mean, people don't understand, what's there an old woman of seventy-three years, all these people are mad or what. Why do they want to meet? But there is a kind of a thing that is very much a satisfaction within us. For Me and for you. Very satisfying, now what is that that is satisfying us, you cannot analyze it, you cannot explain it, you cannot, but there is a kind of a satisfaction we are enjoying.

So let us see, where do we feel satisfied? For all of us who are democratic people, there's one thing that all this nonsense plays on our weaknesses and exciting our dissatisfaction.

So our society which is Sahaja Yogis, we have to be careful. As I told you, you should be more satisfied to see something artistic, to see something poetic. This is the only way you can counterbalance the another side is. Now why our Prime Minister in India, is shamefully going to goal. Can you imagine this man? I gave him Realisation; he came to see Me three times, but once he became the Prime Minister, he wouldn't allow Me to meet him even. He was on the other line and he met this fellow Chandra Swāmī and this Guru of ours, this Mister

Chandra Swāmī, took advantage of greed and so the greed. Greed is like this, I just don't know billions and billions, what are they going to do? There's no satisfaction and now in the goal I don't know what they are going to do. What a shameful thing all over the world to see the Prime Minister of India going to goal. But this greed is everywhere.

Somewhere they are caught up, somewhere they are not caught up. But it's a very stupid thing to have greed. Because there is no satisfaction, so you fall into greed. But what are you going to do with all that, still I don't understand.

So for us, what is My satisfactions, we should have ashrams, we should have so many Sahaja Yogis staying there, we should have small little children doing Sahaja Yoga, all that is so satisfying, there's no greed about it.

The good news is that Shudy Camp is about to be sold. It's only for a small amount, about 420,000 or so but, out of which 300,000 belongs to this Mister C.P. Srivastava, but he said “now what are we going to do with this money? You better take it and you had one great desire to have some land near the river Ganges at the foothill of Himālayas, so buy that, it is very good." So as soon as this is sold out, we can buy that land, it's a very beautiful land along the river Ganges. It won't be, I don't know, the climate will be the same as you have here, but no snowing, without snowing. But summertime it will be little hot and I think you will like that. It's a land about 80 acres of land and I want to build there houses, small little houses for you, about two bedroom houses. Let's see what happens and you all can own it if you want.

But something I think Sahaja Yogis have to be aware, that so much money is needed for every kind of thing. Today for the first time I'm telling you, that lot of money has been spent and needs to be spent.

Now when we go to Daglio we don't find out from where do we get the money for Daglio. Now there's one big hanger, which we are going to put, near the river and the land we are buying, from where is the money going to come? It's not simple, it's quite expensive. But for Me it works, see now, Shudy Camp is selling. For Me everything works out.

So I think for Sahaja Yogis, satisfaction is also extremely blissful because everything will work out.

Param-Chaitanya is actually very busy now and also I think all the ganas are really playing lots of tricks, lots of tricks. I showed them Photograph, one of... and we had many miracle Photograph. But this time I was addressing the people, in Bucharest and they have shown one big white coloured vase with flowers, it was never there, but first time it appears on the right hand side of Mine, another left hand side. What are they up to? I think they were trying to adjust perhaps that. But they said they don't have anything like that.

So they are trying to help us. Now what does that show, shows that, what are you worried about? This satisfaction works out everything, but that is the thing one has to achieve, is satisfaction, I am satisfied. I am absolutely satisfied.

There was one girl who was a journalist who had come. First, she was asking Me questions when I was going just now when I was in the car. She was standing there and

she was going on and on. Then she said, “I may come tomorrow” I said “please come." By that she had received her Realisation everything and when I was coming she talked to Me. She got her Realisation and with this she was like a little baby, you know. And the way she was talking everything changed. She had asked Me a question, that you seem to be the happiest person, I said “Yes and I can make you also happy." She said, “I am also very happy." She was sitting downstairs and I said, “How long have you been sitting, why didn't you come up?" She said, “You told yesterday that you have to be in present, so I am in present. I'm not bothered." First she asked Me question, “Do you see visions?", I said “No, because I know everything, what is there to see? I'm in the present." So she gave Me back that “I was sitting here in the present nicely enjoying every moment of the present." That is what it is. Future doesn't exist for us. But every moment of our present is filled with great joy, because of satisfaction. But it's not mental; satisfaction is not mental, it's a state I think, where you are just satisfied. I don't know what hankering people have. Like some people are fond of food, let us take it like this. They like tasty food, they want to talk about tasty food and the food should be good and all that. If you have read Lal Bahadur Shastri's book that My husband has written, he said that Gandhiji said, “You should not have any sense of taste, aswad, you must develop aswad." “How to develop aswad, it is very difficult? I'm so fond of good food you see" and also he came from a society I mean, from I should say a caste, which is, My husband is also

same, all the time they talk about food, what they are going to have, what they'll have, this, that.

So one day he told his friend, “I've solved my problem" he said “how?" “I've put water in the food and I ate." But those people, who are particular about swaha, they are such a headache I tell you. In Sahaja Yoga, I now see that they do not complain so much. They are all right, quite happy, because we have in a general way, some food cooked for you and you are quite happy with it you don't complain about it. But that is one of the early hankering of human beings, is food. Try to see if you feel satisfied about food, that doesn't mean you starve, never, never, I never mean that, shouldn't starve. But you must feel, just satisfied. Now how will you do it, it is the point? If people say that Mother no, no, how to get rid of it, You tell us, I mean, it's not just like some operation that you can do it.

So main thing is the Nābhī, Nābhī gives you all kinds of hankerings. Nābhī, like you want to have good food, consume swaha, want to consume, consume, consume, but after that, Nābhī has another quality known as swadha, is to sustain. Sustain it. Into very subtle way, if you try to understand. We have eaten this; we have eaten that, we have eaten this and all that. Now, what is to be sustained out of that? The food is finished now, it's no more, nothing, it's finished, gone. Then what do you sustain? Nothing. Only hankering, Oh, there I went, had a very nice dinner, there I went and this.

So the past. The swadha is the present.

So how do you sustain it, is a very subtle thing one has to understand. When did you enjoy the most? When all the Sahaja Yogis were eating the food together, in

collectivity, that experience of collectivity of eating together. That's what we enjoyed the most, together the collectivity.

So you have become even subtler than that and more than that is when you give it to somebody else to eat. To your children, to your friends, in giving something to them. That has even a more subtler satisfaction. Like I was surprised in Bulgaria I went, they said, “Mother we want one thing if You allow us." I said, “What is it?" “We make a very good of salad in this country"; I said, “Really? All right, then what?" “We want to make salad” I said “All right, come along, what do you need for salads?" They said, “Except” she said, “except for one thing, you can get everything but we have to have a kind of a special cheese." “And where do you get that?", “Only here." “And how much is needed?" “26 kilos, at least; for Guru Pūjā." “My goodness, I said, how will you carry?" “We'll manage. Mother, please just allow." And when I said, “Allowed” they were so happy about it, as if they themselves have eaten it or I don't know what was it like; they were so happy, clapping hands. “Mother has allowed us to take that cheese” I mean just think, such a sweet experience.

I said, “We will never do like that, you see, we cook whatever is possible here only, otherwise every country will start bringing anything." “No, no Mother, this is the first time, You just allow us." But very satisfying, very satisfying. They said, “Oh no we are coming by bus, we'll preserve it well and we will bring it, it's a special type, belongs only to this place." So when you feed somebody, you get their satisfaction. It's very subtler inside you see

and when you see that you give food, to people who need food, is even greater satisfaction. Then you forget about your hankerings and a new collectivity grows, you see, starts growing. But this feeling, this satisfaction acts because it is compassion. It is compassion and this compassion acts. Say, for example, if you desire today, if you really collectively desire or feel that people from Ethiopia are starving, this will act, they'll get the food all right. This is the maha collectivity I would say, into which you have to jump.

Like I was going now, they were telling Me about Bucharest that there has been no rain at all and they are agriculturist and people are suffering. It was very hot in the train, I tell you really, we were all getting boiled up, but I said “It's all right." Then suddenly I remembered that I can make it cool also, why not try the trick and as soon as I gave a bandhan, immediately you'll be surprised, temperature came down, immediately.

So by the time we reached the station, they said the temperature has come down, it was forty degrees, today it has come down about 38 or something. I said, “Only that much?", “Yes." Then I just thought of the rain and can you imagine, it started becoming cooler, cooler, cooler, by the time I came to the program, it was all full of clouds and as soon as the program finished and I got up, it started raining.

Raining, raining, raining and it became so cold that I had to wear a sweater. Can you imagine, from 38 it came to 18 degrees temperature, just compassion, just compassion, that it's agricultural country, they are already poor there's no rain, just compassion. And I didn't

even say that there should be rain, but just that feeling, which became so subtle.

So I started with satisfaction and then I went on to compassion. Without satisfaction, you cannot have compassion. You have to be satisfied souls, then your compassion will act. But people are mostly worried about them, in the beginning. “What is it?" “Mother, I'm very depressed” another used to say, “Mother, I am like this” or one would say “Mother, I have too much ego" another would say “Mother, my family is like this, my father is like this, mother like this, this, this." Now you are changed, you have grown up, very much. But now try, to see that you don't want anything anymore, now let's give, we have had enough of it. That's very important to understand. Give to others, to your friends, it's very touching you know, very touching.

Like yesterday when I was there, the Sahaja Yogis had been to India, to study music you see and when I sat down they started Binati Suniye, in such a beautiful manner, that just tears came into My eyes, just to make Me happy you see, I don't know. Just they started that song. You see this is something is that, when you think that, we have to make others happy. All this whatever we have enjoyed, had enough now, no more. Now let us make others happy, this will work. If we want to change the whole world, I mean that's My idea is, it's the global transformation of human beings. It's not possible by My going everywhere you see, but possible by your strong desire to change the whole atmosphere into a beautiful atmosphere.

You can do it, you all can do it. Now you are so powerful, your desire was that I should come here, all right so the whole airplane, everything they worked out for Me, I had to come here. I can't help it also, it's your desire and then it's so satisfying, such a mutual feeling you know. That's where you meet, say the Ocean of your compassion and you see as if you are touching the hearts of people and the ripples come back to you.

So in small, small things there is joy, which we cannot see because we are very gross but once we start becoming subtler and subtler then we get joy out of this. I am just expressing My joy today when I'm meeting you all, I hope you also enjoy everything that you have.

Thank you.

Contents: 1996-07-12 **Quote on Czech Republic, before or after the, Public Program, Prague, Czech Republic (year not sure)**

[In the car before or after the, Public Program. Gunter Thurner asks Shri Mataji to which Chakra the Czech Republic belongs.] It belongs to the Āgñyā Chakra, just look at their noses. The noses are very straight. [A few days later, the left Viśhuddhi Chakra is mentioned which is the beginning of the ego.]

Contents: 1996-07-15**, Public Program, Moscow, Russia (other date 07-17)**

I bow to all the seekers of Truth.

I have to say that truth is what it is and it cannot be changed. It cannot be described. Unfortunately at this human awareness you cannot know the absolute truth. If

you had known the absolute truth there would have been no problem of quarreling, fighting, arguing. Because absolute truth is singular and I'm sitting before you. You all know I'm here, so you are not going to argue on that point. But when we argue we cannot see. We do not know who is sitting next to us. If there is some sort of a sound everybody will start running, helter-skelter, hurting each other. Maybe they might start fighting. But your eyes are open.

When you are alert you know where you are.

So what is the truth? The truth is that you are not this body, this mind, this ego, these emotions, but you are the pure spirit. That's why all of them have said that you have to take your second birth. That means this birth is not the complete thing. In Sanskrit also we call a realised Soul, a saint as Dvijaḥ, means born twice. Also bird is called as Dvijaḥ, means born twice. And the bird is like a small egg. Till it grows and is broken by the mother it is not a bird, it doesn't exists as a bird. And when it is matured then it comes out of the egg, but there are still some things sticking to him out of the blood and the egg and other things. Then it starts flying; the mother teaches him how to fly. Then the bird becomes free, strong enough to go around the whole sky.

In the same way, it happens with human evolution. At the human stage we are just like an egg. One side is the ego, another side is the conditioning. This is how our mind is made by us. It is a myth, mind itself is a myth. And we can make computers; we also can make our own mind.

So one has to go beyond this mind to know the reality, to know the absolute truth. This is the evolutionary state one has to achieve.

That's the last breakthrough of our evolutionary process that has to happen to most of us. What surprised Me, the way the Russians have taken to Sahaja Yoga, also people in Ukraine, also Romania, Bulgaria, Poland and Hungary, but maximum by Russians.

After all people ask Me, “How, why Russians?" Of course Indians knew about it, they have been told about it.

So they were expecting it. But Russians didn't know. They had forgotten it. They are such a clean slate. I don't know how it worked with Russians so easily. And we have now so many Russians who have achieved the state of Self-realisation. As you know how it is done; you have been already told about it. Yesterday I also saw a very beautiful tableau drama where they showed all the different Chakras of the Kuṇḍalinī. That showed that they have understood about themselves. They know. They have a complete Self-knowledge. It is not the knowledge of the book, but it is the knowledge which is absolutely a part and parcel of you. And now I find this; people who have achieved it are their own masters. They know what is wrong, what is right. They know what is destructive for them.

I always say, this is the special time of Last Judgement. People asked Me, “How do you say it is the Last Judgement? What is the sign?" The signs are; I don't know if you have ever seen miraculous photographs of Sahaja Yoga that there were never such photographs, there were never cameras and now we can see these

beautiful vibrations of Divine Love. Christ has said that you have to be born again. But it is not like some artificial certificate you should have, saying “We are born again." If you are born again then you have many powers. Firstly you are filled with compassion and this compassion acts. It works. It is the compassionate intelligence power all over.

This is the second proof, because you can feel it as Cool Breeze on your finger tips. Before this you have never felt this power, All-pervading Power of Divine Love which all scriptures have described. But now, now you can feel it, because it is a special time and you are special people.

So thousands and thousands can get Self-realisation. You see these Chakras are responsible of our physical, mental, emotional and spiritual being. All problems whether it is physical, even financial, all come from these Chakras being influenced.

But somehow with the raising of the Kuṇḍalinī these Chakras are corrected, nourished and integrated.

Then you also get connected to this All-pervading Power of Divine Love. We go into another realm of existence. Because this human awareness becomes Collective Awareness. You start feeling others.

Today I went to see a very high personality and they told Me, “Just discuss economics with him, or politics." which I don't know. Within one minute time I knew that he has vibrations. And just after two three minutes I started telling him about it and he was so much interested. And he wanted to talk to Me for hours. I had to come away and he had also his work.

So very surprisingly that in Russia we find a complete cross section of the society; people are extremely sensitive to spirituality. It is most unexpected.

But people in America are not. They take to stupid things. They asked Me, “How much money you take?" I said, “How much do you pay to your Mother Earth?" So they said, “We can't believe anything where we don't pay anything." I said, “All right this is not a business." For God doesn't understand money. He doesn't have banks. He judges *[UNCLEAR]*.

But they don't have like that. But I would like to warn you not to take to American ways and American clothes. I have seen so many shops here, maybe they are second-hand. It's all the junk they can't sell in their own country, because of recession. And why should you waste your precious money for this kind of a junk? Many ladies are also taking to the fashions. They get their knees open. It is very bad, very injurious. Their both the Chakras of Nābhī will be hurt. They can become lame or they can get arthritis or they can get anything. Sixty-five percent people of America within ten years time are supposed to become schizophrenic or mad. With your wisdom you should judge. When you are transformed I think they might also get transformed out of competition.

I'm very happy to come to Russia because people who have taken to Sahaja Yoga have reached a very great height. They are not only thoughtlessly aware, it's the first state, but they are doubtlessly aware.

Yesterday I saw so many of them as leaders of different cities, different villages. It's like one seed gets transplanted into another city, another place. It will cure

you of your sickness. First time when I came, there were so many people suffering from so many diseases, especially the children. And it seems they are all cured, I don't see them now, by their own power, by this power of Kuṇḍalinī, which is your individual mother; is waiting in the sacrum bone and knows all about your past and all about your aspirations, your future.

So She knows your problem. She is your individual Mother and She is anxious to give you your second birth. Once it happens automatically you start seeing things very clearly in the light of the spirit, because light gets enlightened, spirit gets enlightened. And you start seeing yourself clearly, understanding what you have. Then you know how to cure yourself, improve yourself. Once you become perfect then you know how to cure others and make others all right. Up to Siberia we have people. It is such a blessing of your country. I must say that it was just waiting for this. I hope those who have come for the first time will get their Realisation. But if you are arrogant, if you are critical, then it doesn't work out. You have to be humble. You don't have to pay for it now or never. And that's what is so simple.

This can happen to you just within ten minutes time. Your attention itself becomes active and it can inform about others. If you can cure yourself you can cure others. But the best thing is, inside you become absolutely peaceful and joyous. Actually you jump into the ocean of joy. All these destructive things which are destroying the young people in the West just is given up without any difficulties.

So I bless you all and I know that you all can get your Realisation tonight. But, for that, first of all you should not feel guilty.

If you will feel guilty, then you get this hurt, this Chakra caught up. One may get angina, Spondylitis or maybe lethargic organs. Whatever you have done wrong is finished for the past. I'm talking about the present. Also you have to forgive others. As you forgive yourself, you forgive others. Those who say that, “We cannot forgive. It is difficult." they should know it is a myth. Whether you forgive or don't forgive, you don't do anything. On the contrary if you don't forgive then you torture yourself.

So you can call Me Mother or Shri Mataji. You can say, “Mother I forgive everyone." You need not even think of the people whom you have to forgive, because it is a headache. But just say, “I forgive everyone in general." These are the two simple conditions that you forgive yourself and you forgive others.

Now you have to do one thing is to take out your shoes. Already taken out? Surprising, all have taken it out already. First time in England I said take out your shoes half of them walked out.

So you should be pleasantly placed towards yourself.

Please put both your hands towards Me like this. Now put your left hand towards Me, higher and put down your head and put your right hand on top of your fontanelle bone area, which was a soft bone in your childhood. Please bend you head. You may move your hand up and down, because sometimes you can get it away from the head also. But please don't put your right hand on top of the head. Now see if there is a cool or a hot breeze like

vibrations are coming onto your hand. Or through your fontanelle bone area, which was a soft bone in your childhood. Now please put your right hand towards Me and with the left hand you just see if there is a cool or a hot breeze like. Vibrations are coming of your fontanelle bone area or on your finger tips, or on your palm. Once more. Please put down your head. See with the right hand if there is a Cool Breeze like, hot breeze like vibrations coming out of your fontanelle bone area.

Now if it is hot that means you have not forgiven yourself or others.

So please forgive yourself and others just by saying “Mother, I forgive Myself and others." Now please put both the hands towards the sky and push back your head and ask one of these questions. One question three times. You can call Me Shri Mataji or Mother. `Mother is this the Cool Breeze of the Holy Ghost?' Second question, `Mother is this the All-pervading Power of Divine Love?' Third question, `Mother is it the Rūh, Param-Chaitanya?' Ask anyone of these questions. They have got it. Now bring it down it's cooled down completely.

So much cool is coming. Now please put your hands like this and don't think. Just don't think. Watch Me, don't think.

All those who are feeling cool or hot breeze out of their fontanelle bone area, or out of their finger tips, or on their palms, please raise both your hands. The whole of Moscow, the whole of Russia, may God bless you all.

But it is a collective happening not an individual happening.

So you have to go to our centers, which are very good and we have very good Sahaja Yogis. And you must grow. And get more and more Sahaja Yogis so that your country is blessed.

May God bless you all.

Contents: 1996-07-16 **Śhrī Mahālakṣhmī Pūjā, Moscow, Russia**

Tonight we are going to worship the Lakṣhmī principle within us. Lakṣhmī is the Goddess of wealth, prosperity and also of health. Actually, your country is already blessed, because you have so many things here. Firstly this country has got such a lot of petrol and if discoveries are made, there are, there's much more.

Then secondly you have got beautiful timber. Then thirdly you got lot of steel, very lot of steel, very good steel. Also you have diamonds.

So many things you have, apart from that, you have so much of heart. Also gold you have.

So all these things are in abundance in this country. Only thing is, you don't yet have somebody who'll manage to get to you people. I'm sure it will work out [applause].

But in Sahaja Yoga, we have to know that this principle of Lakṣhmī gives us a great sense of satisfaction.

If you don't have satisfaction, than any amount of Lakṣhmī cannot help you. One becomes very greedy.

You have something, but you want to have more and more and more. And for that one adopts all kinds of methods and measures. Thus you also have a very bad Mafia system. Who are very greedy.

For Sahaja Yogis one has to realise that she does not have to achieve anything is already achieved. First people try to seek food, in the Nābhī Chakra. Then they eat, that is `Swāhā'. Then it is being retained in the body. Now supposing somebody becomes very greedy of food, he gets sick, he has problems. But he goes to the second state where he sustains it and call as `swadha'. Because he eats thinking that it is as a human being his duty to eat, that's all. Not for taste, not for greed, not for showing off. In a very simple manner he eats. Like in the West I have seen people are very particular about where you put the spoon and where you put... [laughs]. They spend thousands to buy those cutleries.

Now the thing that is the worst for the Lakṣhmī principle is drinking. It is alcohol. They say in India that a bottle comes from one side and the Lakṣhmī runs away from another door.

So, Sahaja Yogis don't need to drink. They give up drinking and thus Lakṣhmī principle can be established much more easily.

Now why should we have Lakṣhmī? We should have Lakṣhmī because in the symbol of Lakṣhmī you can see the reason. First of all, the Lakṣhmī has got two beautiful pink colour lotuses in her hands. That symbolizes that a person who has money should have a very comfortable house which is very inviting.

Pink colour is for love and invitation. Now the beetle comes to the lotus and it has got all kinds of thorns on his body. [Explains aside to the translator:] The beetle comes to the lotus to collect some honey, but it has got thorns on his body. But the lotus accepts, it invites, you

see the lotus is very happy to have this beetle in it. Now the beetle is seeking the honey and it gets tired and sleeps inside the lotus.

So the lotus gives a beautiful corona, the bed for it to sleep. And all the fragrance of the lotus for that beetle. Till the morning. Then when beetle has rested well, he gets his honey and then he flies out. We can say poetically that the beetle is respected by the lotus because it is seeking the honey. Even if it has got thorns, doesn't matter.

Thus you people who have been seeking the truth have received it on your Sahasrāra which is just like a lotus. Whatever you have done, whatever was the past, is not important. You get your dignity because you are seeking the truth. Also when people get saturated with Lakṣhmī, as in the West I've seen, they take to seeking, they get fed up. Because material things is not Lakṣhmī. Because it doesn't give any satisfaction.

So the other thing that Lakṣhmī has in her hands, what happens that she puts one hand like this. This hand suggests that a person who has money has to give and share, not to take it for oneself. If they do not share, then they cannot enjoy the principle of Lakṣhmī. But giving to others is so joyful.

Another hand is like this. This hand of the Goddess suggests that those who are under your care, your relations, your friends, all those people, must be given complete protection by you. Anything happens in your family, anything happens to your relations or to your friends, you must stand by that person.

Some people try to help their relations by, say, many politicians do that way, by cheating. But by cheating, what you are doing is you are spoiling the life of that relation, you are not really helping.

So, he'll be losing his name, his dignity, everything, especially his moral character.

So with the Lakṣhmī you must have your morality intact. In a country like now say, America and all such people, there are horrible films coming and people are taking to the signs we call it aLakṣhmī.

A person who has Lakṣhmī should dress up in a decent manner. Women and men. I find on the street women walking with very short clothes. With that, what will happen your Nābhī Chakra will be caught.

And you will have problems with money.

So the wealth that you have should be seen in your temperament, in your nature, in your behaviour, in your living. Moreover, the person who has Lakṣhmī has to be a very humble man. For example, Śhrī Lakṣhmī is standing on a lotus. Lotus is the lightest flower you could think, because it floats over the water.

So her temperament should be not of a very serious type, but of a very mirthful. And she doesn't show off, because is such a simple thing like a lotus to stand on that.

So for people who have money, or who have wealth, should not try to show off by big cars and this and that. That of course does not mean that you should become Sannyāsīs. On the contrary, you should be very well dignified personalities. But there should be detachment.

As you saw Rāja Janaka, he was a king and still he was so detached that all the sages used to go and touch the feet of Rāja Janaka.

So there was a fellow called Nachiketa, he asked his master: “Why do you touch his feet? He is a king." So the master said: “Alright, you go and meet him, now." So what he saw was that Janaka had all the luxuries of life, he was living in the palace and in the procession there were thousands and thousands of people who were throwing pearls on him.

So Nachiketa thought he should get one pearl at least. Next day he went to Rāja Janaka and asked him: “Give me Self-realisation." So Rāja Janaka said: “I can give you all My kingdom but not Self-realisation. Very difficult. Because you are possessed by the idea of money.

Such a person cannot get realisation." He said: “Alright. I will live here till I get realisation." Next day Rāja Janaka took him for a bath in the river and he was enjoying the bath. And people came and told him that there is a fire in his palace. But Rāja Janaka was meditating. He didn't bother. Then they said that the people who are in the palace have run away. Then he says that the, somebody said that now the fire is coming here. Still Rāja Janaka was meditating. But Nachiketa ran out, because his clothes were outside, so ran out to save his [clothes]. And still Rāja Janaka was not bothered.

So when he came out he told him: “Nachiketa, this is all Mahāmāyā. This is how you are tested. If you are money-oriented, you cannot get Self-realisation." She is the one who is testing. All the greedy people, all the people for money's sake do all kinds of things, as you have here

Mafiās, you see, will be all punished. In any case they are not happy people, satisfied people. They are all the time worried of their *[UNCLEAR]*.

So, first thing you must have is satisfaction. This is a very important thing in modern times to understand. Because is said also in the economics that wants are not satiable in general. You want today a carpet, alright: have it. You work very hard, save money to buy a carpet. Then you have the carpet, want to have a house. You never enjoy the carpet for which you have worked so hard! Then you have a house, so when you get the house you want to have a car. Then from car you want I think helicopter maybe, an aeroplane.

This is how it goes on. And you work so hard and you have no satisfaction. Because of this in these modern times, people are extremely restless. There is no peace in your heart. But if you have this Lakṣhmī principle in you, you will feel extremely satisfied with everything that is materialistic. If you have, well and good, if you don't have, well and good.

But after that, this Mahālakṣhmī principle is awakened within you. That you start seeking. And then that is also, later on, as you have seen is granted, because you get your Self-realisation.

So nothing to copy these horrible materialistic people. But we have to be satisfied with what we have and we should express our love, by giving something, whatever it is, to the needy *[UNCLEAR]* person. I've seen Myself, I find it very difficult to buy anything for Myself. If it is expensive, I think I should not buy it.

So one time I went to a shop, I wanted to buy a particular sarī. But I thought it was too expensive, I didn't buy it.

But one Sahaja Yogi was with Me, he went and bought it and gave it to Me on My birthday. And I just started crying and all... too much.

We have stories like this in our Rāmāyaṇa also, where Śhrī Rāma ate the sour bers, ber, we call it ber, I don't know, we call it ber, we have a story like that. She told Śhrī Rām that she was an old woman from a downtrodden society, that “I've eaten every, I've just every berry with my teeth, you see and found out that there's none of them are sour." In India nobody eats anything which is touched by mouth, or any food, is regarded *[UNCLEAR]* is a something wrong. But Śhrī Rām immediately took, He said: “Oh, how sweet of you to have done this testing for me." But his brother was very angry, he didn't like it, Lakshmana. Śhrī Rāma ate it, said: “I've never eaten such beautiful bers." So his wife Sītā said: “Give me also little bit, I'm your half thing, you should give me." So when Śhrī Rāma gave her, she ate, she said: “Oh my goodness, what a beautiful fruit this one is." So Lakshmana said, “Why not give me?" He asked his sister-in-law: “Give me also” He [Śhrī Rāma] said, “No, because you were so angry." But she gave it to Lakshmana and Lakshmana said, “I have never eaten such beautiful fruits." What was in that ber was nothing but giving sense of this old lady. She didn't have anything to give, she was poor lady, so she did all this just to give to Śhrī Rām.

So the sharing of your things is an extremely joy-giving thing.

The other day we had brought some presents, I mean, nothing so great but you also enjoyed it and I too enjoyed it. That is how we all have to live [applause]. That is how all of us have to live together, sharing things. Don't think about yourself, think of others. Think what others like. In India the Gṛuhalakṣhmīs are actually very good. They know what you like to eat.

So if you go to their house, immediately they will ask “Please come for dinner." And they will make what I would like, I would love to eat, they'll go out of their way to make that thing. But not only for Me, for anyone.

Is such a joy-giving thing, to cook for others.

So the principle of Lakṣhmī is only enjoyed when you share it with others. My father was a great realised Soul and he never used to close the doors or windows in the night. And one day a thief came and took away the gramophone that he had.

So he felt very sad that he has taken away the gramophone now, what about records, he can't buy? [Laughs.] How will he play? So My mother joked that better give it in the newspaper that you better to the thief who has taken away our gramophone, please come and take away the records also? [Laughter.] This is a sign of Lakṣhmī principle. One who is satisfied is happiest when he can give something. If you give with one hand, you'll get with, from ten hands then.

So we have to learn to share. As it is, you are giving the highest thing to others, that is Self-realisation.

What more can you give? You must have seen, when you give Self-realisation, how happy you should be. The greatest happiness and the greatest joy is in giving

realisation to others. I've seen people, their faces change and the people who are giving realisation, their faces also get full of light. We are a new society. We are people of new age, where we have got our satisfaction in higher things. There are many Sahaja Yogis who have been working giving realisation, but there are many who do not. Unless and until you share your joy with others, you will not be happy. I heard the other day, one lady told Me that her father and mother are against Sahaja Yoga. I said: “What is your relationship?" She said: “I don't talk to them, I don't like them, the way they are against Sahaja Yoga." I told her: “You change your attitude.

Take some flowers for them, some presents for them. Talk to them in a very sweet manner. Because you have become such a dry person, that's why they don't like Sahaja Yoga." And it worked, it worked, the parents are now in Sahaja Yoga.

So the attitude of a Sahaja Yogi towards a non-Sahaja Yogi should be of helping, of supporting, of sharing.

But I must warn you, there are some Sahaja Yogis who will try to have their own party. They are very power-oriented. They will have an exclusive party. It is a dangerous sign, it's a cancer. Everything should be collective. Anybody who does that kind of thing you should know he is a possessed person. And you will be harmed if you follow such a person. We are all collective, we have to know everything, among each other and we have to live like one family. Not only in Russia, but all over the world. Once you develop that kind of a love for everyone, then you will be surprised you have become a

great personality. That means a drop becomes the ocean.

I can go on saying about Lakṣhmī principle for hours together [laughs]. There are nine Lakṣhmīs. But next time I'll tell you. One of them is Gṛuhalakṣhmī, is the housewife. Another is the Rājalakṣhmī, which is the, which is the power of a king, or of a person who is a administrator or who is a bureaucrat. But I would request you to understand that you have got the greatest treasure, that very few people have got in this world. Nourish it with your love. Nourish it with your compassion and peaceful existence. If there is any problem, anything, suddenly you must become peaceful within you. Then immediately you'll find solution will come within you. This is the subtle of Lakṣhmī principle.

I hope all of you will develop it and enjoy it, before I come next year, I will see that you all have, each person has given realisation at least to hundred people [applause]. You got powers. You got powers, you have knowledge, don't waste it. We have to save the world.

So, may God bless you all.

Contents: 1996-07-18 **Marriages, Russia (exact date not sure)**

Today we have come here to attend the wedding of our brothers and sisters, Sahaja Yogis.

It's important to understand that's marriage is a very important thing in Sahaja Yoga because the basis of society is a family. And our society should have very good families. That's why we are paying so much

attention to these weddings, that they should make good families.

But sometimes people are very conditioned and they don't understand what is a Sahaj wedding is.

They try to find faults with the partners and within two-three months they are again out of Sahaja Yoga.

In the sense that they want to have their second chance, third chance, fourth chance. Then I think that My attention I am just wasting for nothing at all for such people. If they don't like our first choice they should have their own. Why to bother us? They should not give us any more trouble.

Very surprising things I have seen about marriages that have been going on. One of them is, they are alright for two-three months and suddenly God knows what bhoot catches them, one of them, that they just give up on a small excuse here and there. They don't understand that how important is for them to have a good married life. They can go up to three months, four months then I don't know what happens to them and they even harm the women by making them pregnant and still they don't understand how sinful it was. In their own country they do like that they'd be punished, not only punished but they would have to pay a lot.

But they take advantage of Sahaja Yoga, marry someone and then try to be funny. Such people are really... I can't understand.

So in the beginning only when we are selected you had better say no. I could say it from the photograph itself what each girls, which boys will say no. I said you try and test Me. Exactly the same girls and boys have said no.

Thank god at least they have said, but once they have said no they should not trouble us anymore. They can select their own. We are not going to have five, six chances, seven chances. Then even up till now if you do not approve of it is better to give up, than to continue with the nonsense of [being a] hypocrite.

It's not fun, it's not some sort of a, just a game. It's a serious thing. If you haven't got that maturity, that seriousness, you should not agree to marriage. For any reason. Then after marriage you find supposedly a few things here and there, you have to continue. Otherwise you are just like other people who go on divorcing three times, four times. Especially for Russian men I must tell you I have had very bad reports about them, that they ill-treat their wives as it is, very much and they treat them just like slaves. And I am ashamed to say that so many Russian girls are coming to India and to Turkey to live like prostitutes. And I asked them why are you doing it? Some of them said we are not married we don't want to marry because they don't treat us right. And secondly some of them have said we are married but our husbands ill treat us so we are not going to be with them.

It's such a large scale. In Turkey thousands of them are coming. Thousands. They come here and marry people. Actually it's no marriage. But they say that we are going to marry. It's an Islamic country and the men can say *[UNCLEAR]* and the marriage is on. And they marry, so called, these women here. But they are prostitutes by nature. Because of this `marriage' so many ladies have to desert their husband. And then they have big

problems; they don't know what to do with their children, how to live.

So they are taking to fundamentalism, not to prostitution, but to fundamentalism.

So how dangerous it is, the men must understand. I am surprised only I used to think that Islamic people only dominate but I am surprised that there are many people even in the Western countries and Eastern Bloc, Russians especially, treat their wives just like servants and slaves. When I heard their stories I was ashamed. And I felt surprised. I used to think that Russians are specially over sensitive to Spirituality. But how could they ill-treat their wives; she's a part and parcel of their life. This is something Russians must take note of: you cannot be unkind to your wife, make her do all the work and dominate because you are the earning member.

The woman who is working in the house looking after children is doing much more important work than men do. For men it is not so difficult. But for women it's very difficult to run the house, to look after the children, to look after the husband, to manage the whole society. And you must know that in countries where women are not respected, the Gods do not reside. And in those countries where women are tortured and troubled, what will happen, their society will break. Completely. And one day they will sit on top of the heads of all the men, as it has happened in America. Once upon a time, Abraham Lincoln's time, men were very dominated. As the result today if you go there you will see them [just like] cabbages. Better than these American men. The way they are treating their men left and right because the law

is in their support. They marry seven times, become rich and man marries once, he becomes poor.

So we have to be not only understanding, that in love only you can have joy. If you really love each other you'll do nice things for each other. Think of nice days and nice moments that you have spent and you will be spending, that is the greatest treasure for all of you.

So I have to request all the people, especially here we have people from Eastern Bloc and also Islamic people, that you have to respect your women very much. This is very important.

Now we are having some marriages here, not many. We have at least 90 marriages in India, out of which one or two fail. Because sometimes the men are like this or the women are like that. But still I must say compared to many other marriages in the world, we are much better off.

I must tell you that before starting Sahaja Yoga in Russia, most of the men and women I met in Russia were divorced. Most. I don't remember even one who was not divorced. Now I am meeting very sensible people as far as marriages are concerned. Otherwise it was horrible. And one person would have one wife, then second wife then third wife and he would not even remember who is this one, is it a wife or a sister or a daughter.

So there is no fun in fighting on small things. It's a serious thing as I told you, very important.

Because it makes your society; it creates new value system of Sahaja Yoga. It creates a value system of love, affection, compassion. And it is so great to love others, it is very great to love your wife or your husband. It's a

very sweet feeling. But they are so enthusiastic about their weddings and then I don't know what happens to them.

So today again at this moment I have to tell you please rethink. If you want to marry, please marry.

Otherwise don't marry. Again and again I want to tell you, that if you don't like a person, just don't come for your wedding. I mean I will be very happy with that. But then of course you will have to find your husband or wife. We are not going to bother our heads over you. You know that I am so busy. The marriages that were fixed here, the whole night I was sitting till 6 o'clock in the morning. Six o'clock.

Despite that there are some great ladies who have said we don't want to marry. What should we say? They came all the way here just to get married, to find some nice boys and girls. I work and work and work the whole night. And then what do you find? They just say `We don't like that,' not [only] that, also they say `we don't feel like it.' Then why, why did you apply! All those who have applied have to pay for their marriages whether they like it or not. This is what we have decided this time. Because we have spent so much effort.

So whether you have appreciated or not, whether you have agreed or not please pay for your marriages. That is a compulsion.

So next time nobody will say that we don't feel like getting married here. It's not a joke.

I'm sorry I'm a little hard because I have seen some cases which just doesn't justify it; doesn't show it's Sahaja.

So Sahaja wedding is a very/for a very great work. It's not a sacrifice. But you need really wise and mature people to have a Sahaja marriage.

So please understand if you don't feel like marrying even now just say no and don't play with it. It's dangerous. You see there are so many blessings of Sahaja Yoga but certain things are dangerous, so be careful. Because you cannot hurt any Sahaja Yogi for anything whatsoever.

So if you don't want to marry you are welcome.

Again and again I am telling you that it's a very very beautiful moment when you are getting married.

It's a very beautiful time. You cannot fathom the joy at that time. And if at that time you have missed the point, then I can't help it. Later on also try to improve your understanding. It's not a mental thing to get married, it's not an emotional thing to get married. In Sahaja Yoga it is Spiritual. And so please try to understand you have to respect each other, because you are Sahaja Yogis.

And others should be respected who will show you what are the seven conditions you have to go through. Another thing I have seen the elders of the family are to be told that this marriage is taking place. We have seen surprisingly, the parents aren't Sahaja Yogis, but they don't treat the daughter in law or the son in law well. It's very surprising. It's other way round; used to be that the newly married couple didn't treat the parents well. But nowadays I find it is very common to see that the parents-in-laws do not treat right. Everything seems to be upside down these days.

So I will say that you must look after your in-laws, you must pay respects to them, you have to be kind to them.

In the same way that the in-laws must look after the newly married couple, make them happy and enjoy their happiness and joy.

So marriage is a source of joy not only for the couple, but for all of us.

All of us are so excited about it and so very happy.

But you see today you are excited and tomorrow you find you are fallen on the street. I can't understand, like a drama. It's reality, it's real life where you have to see what marriage means. Good for your children, good for progeny, good for our society of Sahaja Yoga.

One thing, a wife should not talk too much. I think some of the problems come because they talk too much. Then by talking if they have no subject then they start discussing their husband, their in laws, this thing, that thing.

If she keeps quiet it could be much better. I say for women because in this country here on the Eastern Bloc and especially Western, the women talk, men don't. And in India women don't talk at all, very little. If they talk means there is something wrong with them. They're not talkative. They keep quiet.

Because a woman is like this Mother Earth who doesn't say anything, just gives and gives and looks after and suffers. Why? The man is like the sun, he shines, he comes and goes, some sort of whimsical things.

But the sun and the earth both are permanent companions and they must nourish each other and they manage our lives. Without both of them we could not

have existed. In the same way a woman is the Mother Earth and man is the sun.

So our duty is to see that to create a complete balance we have to keep to our own life. Like a woman has to be a woman and man has to be man. It is very important that we should be proud of what you are. And we should be happy of what you/we are. We should not try to be something else than what we are. It's absurd, a sign of stupidity.

So the more you are what you are, like a woman is a woman and a man is a man, the better is the relationship. There's no harm in keeping quiet as the Mother Earth does. She bears up everything, she gives everything because she knows her personality and she knows what will give her joy, what will give her happiness.

So from many angles we have to understand that marriage is a very pivotal thing for Sahaja Yoga.

So many girls don't want to marry because they are afraid; they've had bad experiences of their fathers or uncles or someone. And so many men also don't want to marry. But forget the past. The past is not important. This is the present in which you have to marry without any worry. I am there to look after you.

If you have any problem write to Me. But just don't run away. Just don't do things without informing us. It is absurd. It's not a mad house. It is Sahaja Yoga.

So let us all enjoy this wedding for ever, not for a short time.

Thank you very much.

Contents: 1996-07-21 **Talk to Sahaja Yogis, Arrival, Airport, Borispol, Ukraine**

Shri Mataji: You have so many now Sahaja Yogis, ah? The interpreter: Yes, Shri Mataji. They are all Sahaja Yogis.

Shri Mataji: So many! The interpreter: Yes, Shri Mataji.

Shri Mataji: I'm amazed to see so many Sahaja Yogis in Ukraine. That shows how people are sensitive to spirituality, that they are taking to it so easily. They have been waiting I think, seeking all these years and suddenly now they have found the way. I see your love and your compassion-ment, your sweetness. I just don't know how to put it in words, what I feel.

Tonight for the Program I hope you'll be all there and I'll tell you how to be with yourself and how to be with everybody else. We have to bring peace to this world. And you people can do it. And the way it is spreading here it has to spread all over the world. There are some very nice girls married from here, from Kyiv [Kiev]. And they have a very-very good reports about them. Also about the men who were married. They say that they are very deep, very great Sahaja Yogis. Specially in America they are very much adored [laughs]. And they can't understand how Russians have been so great in spirituality.

Spec[ially] about the Ukraine people also when I'll tell them they'll be amazed. They ask Me, “Why Russia and Ukraine, why?" I don't know what to answer. You'll have to tell Me the answer. [Laughs.] I thank you to come all the way to this airport to welcome Me. My heart is filled with tremendous happiness. You can understand what a

mother feels when she meets her children after such a long time.

So I hope you all will come now to the Program and we have to expand Sahaja Yoga to give love, wisdom and joy to others. Thank you.

[Shri Mataji is talking in Hindi with two Indians who are living in Ukraine.] Say that you must take for a longer period in this country so that the problems of the Ukraine people will be solved. Please say it.

Indians are saying that, “You should stay here for a longer period." They are all requesting Me I should stay here for a longer period to solve the problem of the people. Indians report there are problems.

[More conversation in Hindi.]

***Contents: 1996-07-21*, Public Program, CSCA Stadium, Povitroots'kyi prospect 2, Kiev, Ukraine**

I bow to all the seekers of Truth.

At the very outset we have to know that truth is what it is. We can not change it. We can not transform it. We have to experience it. Whatever I have told you, to most of you, it has been proved. And there are many new people I see here, they all are go into experience the Truth tonight. Because we do not know the Absolute Truth. That means we are still blind and that's why there are problems on humane level as well as on global level. We do everything to enjoy life. But whatever we do has no enjoyment but a kind of a lurking anxiety.

So make yourself happy and joyous you have to know the Absolute Truth. Then you are not bothered.

We have six enemies at least. Humane beings have first the lust, the greed. Jealousies, ego, also false pride. And lastly of all is violence. When we try to use these enemies to harm others in return we are harmed. Also we harm others. We have to get rid of this humane aw within us. But by telling people, “Don't do, don't do" it doesn't work out. There has to be an ascent, there has to be a global transformation when one goes beyond all these enemies. These enemies work through our mind. And mind is a myth.

We have created our mind by reactions. We have our mind created by conditionings or by our ego. But there's nothing like mind which exists. We have become also slave of that mind. Now if you make, say, a watch you become slave of the watch. If you make the computer you become the slave of the computer.

This is a humane tendency to make something and become the slave of that.

So through the media of this so-called mind all these six enemies act on us.

So we have to transcend this area of mind and go beyond. For that arrangements are made within us. You have been already told about the Kuṇḍalinī and the centers that we have. These six centers or seven centers are responsible for our physical, mental, emotional and also spiritual being. And all our problems come through the jeopardies, when these centers go into jeopardy.

So to correct them Kuṇḍalinī has to rise. When She rises She corrects those centers by enlightening them. She integrates those centers. And ultimately She connects you to this All-pervading Power of Divine Love. Look at

these flowers. From where do they come? It's such a miracle.

But we take it for granted. These flowers are created by this Mother Earth through the same Power of Divine Love. This Power is very intelligent, at the same time full of compassion. This Power acts in every sphere of life wherever something living has to be done. And that living work is done within us also.

Once you get connected with this Divine Love your Spirit comes into your attention and your attention is enlightened. This enlightened attention acts because it gets the power of compassion that acts. When your Chakras are put right you get your physical being all right then your diseases have been cured. Many mental cases have been cured. And many people who have gone into wrong path of spirituality also get corrected. I remember first time I came to Ukraine there were so many sick people out of Chernobyl problem. Even children were suffering. Then they were cured. And today I find they're in such happy conditions. It's so many people realised, with the Divine Power acting all other problems, political and other problems will be solved. These problems are nothing compare to the power of this All-pervading Power.

So far we have been deceived in the name of God. Wrong people have taken the charge of religion.

These religions are money-oriented or they are power-oriented. By that they make everyone suffer. If there is God, Who is Love, one should not do anything wrong. If I tell you, “Don't do this, don't do that" you will not listen to Me in these modern times. But you yourself got the

light, light of the Spirit and you become your own guide, you correct yourself. I've told you before an example that supposing I'm an obstinate person and having a snake in My hand. And somebody tells Me I have a snake in My hand, I'm obstinate in darkness, I won't listen. But if there is little light I'll immediately leave it. In the same way it acts. We don't have to tell them. I have learned with great regret that there's a big drug problem here. You'll be surprised to know that in England people gave up drugs overnight when they came to Sahaja Yoga. I was surprised in Togliatti the Mafiā people have now trying Sahaja Yoga [laughs]. Only by forgiving them they have come back to a very normal life. This should happen here also. Because everybody wants peace, joy. But they are lost, they don't know how to fight these enemies. But once they go beyond this mind then they give up all this. They realise where lies the joy.

Not only that you can be enlightened but you can enlighten others. Many people I have known who were not even artists have become great artists, have become musicians, have become very well to do. It is very surprising how your powers start acting. You can give Realisation to others. You can change people.

You can give peace and joy. All these powers are within you. Like this instrument if it is not connected to the mains it doesn't work. It has no identity. It has no meaning. In the same way unless and until we are connected to the mains we have no identity. But once you are connected this Divine Power starts flowing.

Your life gets filled up with lots of miracles. In Sahaja Yoga miracle has lost it's meaning. Saha means “with” ja

means “born". That is this power of becoming one with the Divine is born with you. And you have a birthright to get it.

Specially these are very important times. What we call as the Last Judgment. But I call it as the blossom time where many flowers are going to get their fruits. These are very special times when you are tortured, you are troubled, you are unhappy and have many illusions. At this time it works so fast. I'm amazed how it is spreading. It is something you must understand is a living process of your evolution. This is the last breakthrough of your evolution. Specially in your country I find people are extremely sensitive to spirituality. I don't know how so many have taken to Sahaja Yoga. Is very remarkable. All over the world I am praising people from Ukraine and from Russia. Must be something of previous lives, I just can't explain. But in our books it written that two great saints called Macchindranath and Goraknath came to Ukraine and to Russia. And there they described that there are lots man of God living there. And they taught them about Kuṇḍalinī because I can see on your terracottas of those times there is Kuṇḍalinī everywhere and the Chakras and all those drown on those terra cotta pots.

So I think you are especially blessed people. I'm very happy I could come to Ukraine and meet you and talk to you about so simple. If you have any problems you can always write to Me. But mostly what I receive the letters are about how they are enjoying life, how they are happy.

Last but not the least you jump into ocean of joy. All the wrong things we do to get some enjoyment.

But then we don't have to do anything, we don't have to achieve anything, you are just in the ocean of joy. Joy is not like happiness or unhappiness, it's singular. That everything then starts giving you joy, everything you see gives you joy. If there is anything ridiculous you laugh. If there is anything cruel you get defective on that. And the even a gruel personality can become very nice and sweet. These are the science of saintliness. And you become saints and enjoy your saintliness. For that you don't have to give up your family, give up your household, go to Himālayas or stand on your head. It is just within you. And it acts. It will work. I am sure things would be much easier for you.

May God bless you.

[Aside:] Should we have some music little bit? Could have one song. Before no, no. Before no. Later on. First I let people to get Realisation. I'll give one Realisation then you sing one song.

Now those who do not want to have I can not force. You have to have your own judgment. But it's very easy, it won't trouble you, on the contrary, you'll feel very much elated.

So those who want to go should go now but don't disturb later on. It will hardly take five to ten minutes.

First of all none of you should feel guilty for anything. You have not to confess anything to Me.

Whatever wrong has been done it was in the past. You have to be in the present. And for that you should not be

angry with yourself for anything that was done wrong in the past. But if you feel guilty then you catch on this center on the left hand side. With that you get diseases like angina, like spondylitis, like lethargic organs. And at this moment the Kuṇḍalinī won't pass through.

Now there's another problem that you must forgive yourself; also in the same way forgive others. Many say that it's difficult to forgive. But whether you forgive or you don't forgive you don't do anything.

Actually by not forgiving you torture yourself. You just have to say in your heart, “Mother, I forgive everyone" and you'll feel much lighter. Also you should not think whom you have to forgive because it's a headache.

So you forgive yourself and forgive others. And also if you can take out your shoes will be very helpful. Please take out your shoes. This center is like this, very constricted. And if you don't forgive it won't open. And this is a very important time. If you don't forgive now you'll miss the chance of your evolution.

Now just put both your hands towards Me like this. Now put down your head and put your right hand on top of your fontanelle bone area which was the soft bone in your childhood. Now see for yourself if there's a cool or a hot breeze like vibrations coming out of your own fontanelle bone area. Now don't doubt yourself.

Some people get it closer, some people get it far away. But don't please put your hand on top of your head.

Now please put your right hand towards Me. And now again bend your head. And see with your left hand if there's a cool or a hot breeze coming out of your head. It

is hot because you have not forgiven yourself or you have not forgiven others. Please bend your head.

So now you forgive yourself and others.

Now please put your left hand towards Me. Again, once again, please put your head down and see with your right hand if there's a Cool Breeze coming out of your head. If it is still hot then please forgive yourself and others.

Now please put both your hands towards the sky like this. And push back your head. And ask one of these questions, one of these questions three times. You can call Me Mother or you can call Me Shri Mataji. Now please ask in your heart, “Mother, is this a Cool Breeze of the Holy Ghost?" Or, `Mother, is this the All-pervading Power of Divine Love?' Or, thirdly, `Mother, is this the Param-Chaitanya?' You can ask anyone of these one question three times.

Now bring down your hands. Put both the hands towards Me. Please bring down your hands. If you are getting Cool Breeze on your fingertips or on the palm or out of your fontanelle bone area, please raise both your hands. [Laughs.] Like ags. Flags of peace and joy. Tremendous, I tell.

May God bless you all.

This is the beginning but you have to meditate, that's very important. And grow into it. You don't have to pay for it. It's a living process. And you can not pay for any living process. Don't doubt yourself.

Thank you. May God bless you.

Now they can sing one song.

Contents: 1996-07-28 **Guru Pūjā, You Should Live like a Saint, Cabella Ligure, Italy**

Today we have gathered here to do Guru Pūjā. This system started long time back in India, I think even at the time of Patanjali, maybe even earlier, when there were great seekers. And their Gurus were sitting in the jungles, where they used to get permission to go there and then they would get their realisation, very few of them, one or two.

So we had many rishis and munis in the olden times in India.

So this system of Guru started. Also one of the reasons is that, that there is no organized religion in India. There's no popes, there are no priests, nothing like them. They have priests just for worshipping in the temples. But for giving realisation, for talking about higher life, they all had to go to very great realised Souls. And it was absolutely the freedom of the Guru, whom to accept whom not to accept. And everybody was tested thoroughly by the Guru if they are capable of achieving Self-realisation or not. And this test was so hard, so difficult and also to a point of cruelty, that very few could pass through that test.

It's not like Sahaja Yoga, everybody is a Sahaja Yogi, it's not like that. That, of course, made it a very narrow margin for people to achieve their realisation and these Gurus never used to leave their own seats, they call it takiya [pillow]. They would be there in their own place, all those who would like to go to him could come. If he allowed, then only they can meet him. You may go on for miles together, nothing, no obligations of the Guru that

he should meet you. Perhaps they didn't feel that love and compassion for the seekers. They didn't understand that the seekers are ardently seeking the truth and they should not suffer. That may be the reason they were not so much concerned. All the time they [Gurus] were testing their disciple. Even Rāmdās, who was the Guru of Shivaji, was testing even Shivaji for so many times, though he was a born realised.

So to get this Gurupada, to the position of a Guru, after that they had to work very, very hard to achieve a state of a saint. But in Sahaja Yoga that is not the case, as you know. I just thought, if people get their realisation, they'll see for themselves what's wrong with them, they will introspect themselves and will try to correct themselves. It is true, for many, many people, but some of them still are lingering behind and are going on and on and on thinking that they are Sahaja Yogis, they have achieved a lot, they are something very special.

So this delusion is all the time is creating this problem. This delusion makes them very narrow minded, selfish, self-centered and people can't believe how can they be Sahaja Yogis.

So the first and foremost thing we have to know that this Sahaja Yoga has worked out because Param-Chaitanya is transmitting compassion, It never did before, It never had that kind of an attitude which it is there because I am a Mother. And this compassion has worked it this way that: you all have got your realisation, you have achieved a state which we can call as a Self-realised Souls. But still, because you got it so easily, cheaply, I think still we don't

realise what we have got. Still we do not practice meditation, introspection and dedication.

Some are very much there, but mostly we are just living in the idea that we have already achieved.

So, the first thing we should introspect: Are we concerned about ourselves? All the time do we think that we are suffering, we have this problem, that problem, or this should be done, that should be done.

If the attention is on that, that all the time you are worried about yourself, then you cannot break, you cannot break through this shell of your being, which is under the domination of your mental selfishness or self-centeredness. Even self-centeredness is absolutely against your growth.

There are many people who come, I have seen, even to Cabella, I know they have to suffer a lot because they think it's a very open space where they have to live and they must make all arrangements to make themselves comfortable. Such people have to grow still much more. For a saint, any place has to be heavenly. You must have seen Me enjoying everything. I can live anywhere, I can sleep anywhere. I have no demands of any kind. But if you are worried about your body comforts or your body troubles then still you are at a body level, which you have to transcend. Worried about how you look, how you dress up, what sort of things you have to wear: all this makes you yet not a good Sahaja Yogi. This is one style of Sahaja Yogis who still want very great comforts.

So, what you have to do, if you are used to comforts: try to go and sleep on the street. I will not do that, but you can do it. Or sleep on a tree, you may fall down doesn't

matter. [Laughter.] Do all kinds of things that are necessary to punish your body to understand that you are not bound with this comfort of the body. This is one of the greatest things one has to see, that you are not bound by your body. It's alright if you have comfort, well and good, if you don't have, well and good. For a Sahaja Yogi it is very important that he should be able to live like a saint. Not necessarily that you should become a Sannyāsī, but from inside your body should be such that you can dominate your body. How can you not sleep anywhere? Why can you not sleep anywhere? Then also, that they want to have a very comfortable arrangements about bathrooms, this, that. All these ideas are there because you are very self-conscious but not super-consciousness, it's not there. You want to have everything first class and anybody who tries to interfere with that kind of a thing, you don't like it. I can understand a person who is very old, he cannot manage things, he has to have a certain amount of body comfort, but even young people these days are extremely comfort-oriented. That is not for Sahaja Yoga. Of course I've seen people in the West are better off in this matter. Because when they go to India they told Me they like [Maharashtra] S.T. buses better than comfortable buses.

So I said “Why?" “Because Mother, you can jump in the bus nicely with all the luggage" [due to lack of suspension and bumps in road], “because the windows are open, you can breathe. Very natural, very good." And they wanted to go on bullock carts also. I mean they enjoy all that.

Actually if you see you'll notice, in the Western world mostly, people are taking to a more rustic life.

They are enjoying more the rustic style of life than to this so-called comfortable, artificial life. Not so much Indians, I would say, also Malaysians. I think most of the people I have met in the Western countries are really great because they can sleep anywhere, they can eat anything. You ask them “How did you like the food?" “What did we eat, I don't know Mother?" That is the sign. That is the sign of a person who is not bothered as to what he is eating, what he's getting, what is his taste, “I like this, I like that” these words drop out.

It's not difficult, it's not difficult, you might think that I am asking you to something, hazardous thing, you see. It's not difficult at all, because if you have to impress the people around you, you have to be like a saint. And if you are a fussy person, if you are a fusspot, then you cannot impress others that you have got Self-realisation.

Many people tell Me “Mother, people had to do so much: to go to Himālayas, do this, do that and then they got their realisation. How is it these people you have blessed?" Even some great saints asked Me that. “What right they had to get their realisation? Why did you give them realisation? What have they achieved?" I said “Only their desire. Their desire was very much there that they should get their Self-realisation and that's how they got it." But now to go into only desire, is not sufficient. You have to depend on yourself, on the light of your Spirit you should see what's wrong with you. This is a very important thing. Ask questions to yourself.

“Why do I want this? Why do I need this? What is the purpose?" Because as you have seen, all the rest of the world is mad, [we] call it mad, because they are running after stupid things, they are wanting things which has no meaning to spirituality.

So spirituality itself should be self-satisfying. If you are spiritually endowed, then you are self-satisfied.

And this self-satisfaction within you will lead you to that Ocean of Joy about which I have been telling you and all the scriptures have described. For Sahaja Yogis, the word we use is nirānanda. Nīrānanda means: A joyous state, where nothing is needed. Joy itself is joy. You are enjoying only joy. Nothing is needed to make you happy. You are happy because of joy that you have, in the nirānanda state.

If you go and see how these saints lived, you will be amazed. How they managed their life, you'll be very much amazed. How many days they used to fast, without food. Never bothered! They never thought it was fasting. They just used to think, “We have no food, so no, don't eat." Of course, you don't have to go through [that], you have got your realisation.

So now you have a power to achieve this mastery. Now, you have this power.

The another thing I have noticed about Sahaja Yogis, some of them have grudges about others. Sahaja Yoga is the blessings of love, blessings of compassion. There is no place for any kind of hatred, or any kind of revenge, or anger among Sahaja Yogis. If you have that, you must conquer it. Is a good chance, if you find somebody who is very hot-tempered, who is a very angry type, go and

make friends with that person. Just see if you can carry on with that person or not. If there's a fusspot, also make friends with such a fusspot and see that you achieve that peace which will keep you above all kinds of hatred, all kinds of temper, which is a very bad thing.

But some Sahaja Yogis lose their temper very fast. I would say that they cannot be Sahaja Yogis, because if you have no control over your anger, then how are you powerful of compassion and love? But you don't even have to control it, just there. Once you have it, or that state, then you just watch and see. In the olden days, the saints, mostly, used to be very much angry type people. They couldn't bear the stupidity of the world and they used to be very, very angry type and they used to run away from people.

I know of a saint, Nityanand Swāmī, who always lived on the tree and anybody tried to come near him, he used to throw stones at. Couldn't bear the people who were all heated up and coming to him.

But you don't need that, you have a way of achieving love and affection of the people who seem to be very, very troublesome and grudging type or maybe some people who are very aggressive. This is not a difficult task if you try a little bit the other way round. Mostly people, when they find somebody who is a very hot-tempered person, they run away from them. They don't want to have anything to do [with them].

Those who are not hot-tempered, those who are good nature, you can always be friendly, what is so great about it? What is so nice about it? What is so sweet about it? But how you speak to the person, how you talk to that

person, how you manage that person: your love will definitely melt him down, because he's a Sahaja Yogi, I'm not saying for non-Sahaja Yogis. Sahaja Yogis as they are, you have to be extremely compassionate and affectionate and love.

Another thing which is extremely important for us to know, that we have got this realisation through Mother's love. Only My compassion has acted, only the power of Mother's compassion could have worked it out. Now, even if this love is flowing towards the stones, or towards the mountains or towards anything which is very solid, the ripples come back, they have to come back. In the same way, you people now, who have got realisation, have to know that compassion and love is the only power you have got, nothing else.

If you love yourself, if you care for yourself, you care for your family and care for your children, then you haven't achieved much. You're only worried about yourself, because that's your limited area where you move. But if you can break that and find out places where you have to express your love, you can.

As they say, the water finds it's own level. In the same way, this compassion has to flow to all the places, to all the ditches everywhere and should find its own level. But if you are just satisfied with yourself and you are not bothered, you are just trying to believe that you are a great soul because, you are a Sahaja Yogi, then I must say, that you are sadly mistaken. In this lifetime, you can achieve that state.

In this lifetime, you can get to that state within yourself.

Now, the third thing that troubles Sahaja Yogis is that, “Mother we want God's realisation” that makes Me laugh. You see, it is already there, already there. Like once you get into the sea and you say “Mother, we want to go to the bottom of the sea” you can always go, just slip and you will be there. In the same way, once you have developed a kind of a Self-realisation and have jumped into the ocean of this compassion, there's no need to achieve anything. The sense of achievement, “I should be that, I should be this” is all coming from your human haunting. That should be over. Now you are Godly people.

So you should not think, “I should achieve this state, I should achieve that state” but just go on slipping, just giving up all the weights that you have in your heads and it will work out. This is what I have been saying to you that: you have to dissolve yourself into the compassion.

Also, there are still very people who want to be in the front. Specially Indians will all sit together in front, I've seen that way. They have no right, they have no right to sit in front. Nobody has right to sit in front or to seek a place. They should sit wherever they get seat to sit down with complete satisfaction.

Whether you sit in front or at that corner, even in the darkness, you can get My vibrations, you can get everything.

So to be prominent, to sit some place where you are prominent, is not necessary. What is it in a prominence, what do you get? To be lost into the crowds, to be lost into the Ocean of Love is the main thing. All these are mythical that, we should somehow or other get the front

place. You see as Marathi apan manto [We say], “Samor chi zāga patkauli mi!" means “I have managed to get the front seat!" Front will be the back and back will be the front.

It is very surprising how still people are trying to achieve something so nonsensical.

So where is your mind, where is your attention, what are you thinking? If you are thoughtless you will be satisfied, you will be happy, you will not ask for anything, you'll not want anything. What is there to have? What is so important? All these ideas come from ignorance, I must tell you, from ignorance.

Once this `Hare Rāma Hare Kṛiṣhṇa' fellow came to Me. And he said that “We have heard you are a great saint, this thing, that thing and you have all the comforts of life, you have everything here, very nice, this thing, that.

So, how are you a saint?" I said “How are you a saint?" [He said] “I have given up my family, I have given up my cars, I have given up my house, I have given up my children." I said “One more thing you have given up” he said “What?" I said “Your brains!" [lLaughter and applause.] So he said, “How do you say we have given up our brains?" I said, “Very simple, I've given up nothing, because I am holding nothing! What is there to give up when you are not holding anything? Now, I would say in this house, or on My body, anywhere, [if] you think you can find anything equal to the dust particle of Śhrī Kṛiṣhṇa, you can take it. Should be equal though." Now they started looking here and there. I said “Then what have you given up? Just stones? What have you given?

Why are you boasting about giving up that and giving up this and giving up...?" They even shaved their head.

All these useless ideas, that “We have done this, we have done that." Anybody in Sahaja Yoga who thinks he is doing a lot of work for Sahaja Yoga, should give up completely! That's the sign of another ignorance. If you are part and parcel of the Ocean, everything is done by Ocean, you are doing nothing.

To have such ideas about yourself shows how little you know about your Self. You are the Ocean. And if you are the Ocean how can you claim “I've touched this shore, I have touched that shore, I have touched this shore"? No more `I' is left. Once this `I'-ness drops out then only the Universal Being within you shines.

All these things are so clearly evident in our characters.

Some people are very identified, say with their country, or maybe with their worshipping style, whatever it is. All these misidentifications have to be given up. It is very difficult for people because they are so conditioned and as long as you have conditioning you cannot rise above your mind, which is a myth, you cannot. Now, try to understand, what your conditionings are.

One of them, I would say, I have seen and I am so surprised, you go to the Western countries, all of them only sing songs of Śhrī Gaṇeśha. They know all the songs of Śhrī Gaṇeśha. Śhrī Gaṇeśha's photographs, Śhrī Gaṇeśha's everything, children also. And now I have seen that vibrations stop! Why should they stop? Why should Gaṇeśha stop the vibrations? Why they are doing it, I realised, was because I said Śhrī Gaṇeśha incarnated as

Christ. Their identification is with Christ and Christianity, in a very subtle way.

So all the vibrations stopped! Imagine with Śhrī Gaṇeśha's music, we heard in one of the Eastern Bloc countries and all the vibrations had stopped and they were singing all the songs of Śhrī Gaṇeśha and not one song of Sahaja Yoga, leave alone about the Guru, not once.

So, even there is a very subtle identification.

There was one fellow in Russia, supposed to be very intelligent, he said that “Alright, if we keep Mother's photograph and also the icons, we can get the same type of vibrations." You cannot, because icons are made by some artist's imaginary. These are not representing actually even Maria or Christ or anyone, they are all imaginary. If Italian ones make Christ, he is Italian style, if some French one makes it, he is thin like French, if you get somebody say from Holland, he will have a forehead like that. You see all of them they depict Christ as they want to. Then we have Maria the same way, Her expression, Her photograph, everything, is all according to the imagination of the artist and to whatever country he belongs, that he will do.

And they are not free, you can see they are not free, because all these artists have a certain style. Now if it is Rembrandt, it's a style, if it is, say Leonardo, it's a style. Though they are born realised, still they have a style. Nobody is like this, that he'll make today like this, tomorrow like that: there's no freedom.

They are bound by their own styles. Everybody has one style and that is the style they follow. Because, what is

the reason, the reason is, they must have done three or four types of styles, they must have done, surely, but people must have rejected, “This is no good, this is no good” so it is all the opinion of the people.

So they must have taken to one style: alright this is the style.

So you can see Christ if he's Japanese, he'll have chinky eyes, if he's Chinese, he'll have no nose, if it's Indian, he'll be dark.

So all kinds of Christs I have seen and I feel that, how can they emit vibrations? Tell Me. While with My photograph, how can you compare? Also, cameras were to be developed at this time: do you notice that point? Cameras were developed at this time, not before that. This loudspeaker was not developed before this. Aeroplanes were not developed before. I have been travelling for nineteen days, one day in the plane, second day in the, Public Program. They could not do all that. Nobody could do this.

Neither Śhrī Kṛiṣhṇa, nor anyone. They could not fly by aeroplane in those days. Now we say we have 65 countries, somebody says there's “No, 68 countries" or go on correcting. But is only possible because today, today: there are aeroplanes. They were never there [before].

So all these things are, even video, even the way you are seeing My image there, was that available before? No.

So this is a very special time, where science has also supported seekers to find the Truth, science has supported. We have to be thankful to science: that part of science which has been so much supportive. Even [if]

there was not a car, I could not have gone up to Milan even! Imagine going on a bullock cart, what would have happened to Me? So all these things are created today for you. You were also born in those times for the special reason. They could not give realisation because that time you were not there. Very few people of your calibre were there. But I wonder if you understand your calibre.

The way you are sometimes growing, shows that you don't understand your calibre. You don't know what you are, how much the whole atmosphere has worked out for you, the science has been worked out for you. Science is a gift of the nature. All this has been worked out for you to achieve the highest state in the shortest time. But for that, one has to be extremely introspecting. Instead of thinking of what you have to achieve: be introspective! This introspection will help you and you will really become real Gurus.

When you go to other villages, other places, other cities, people should know from your being itself that some great person has come. You don't have to tell, you don't have to certify, it's the simplicity of your temperament itself.

First time I went to Leningrad, nobody knew about Me. No advertisements, nothing, they just put some posters, some. And there were 2,000 people in the hall, 2,000 outside. In the hall they had to pay, alright. I was wondering what's the matter. And when I came out I gave them realisation but I said “You come tomorrow." So 2,000 from inside and 2,000 from outside and about 2,000 more came and we were all sitting on the ground. I was amazed. I said “What made you come to My

program?" [They] said “Mother, it's so obvious, your photograph!" Such sensitivity of spirituality: “So obvious, from your photograph!" And they were scientists, they were doctors, they were all kinds of intelligent people. But they could feel the spirituality from the face. That kind of a sensitivity we should have. When you don't need any discretion, nothing, you know: this is this, this is this, this is this. Don't have to judge, don't have to think about it. You cannot say who will be best fitted for this: those who have come for the first time, those who have come later on or those who will be coming, younger or older, women, men or children. It is there.

In My lifetime if I see so many of you, so much transformed, looking so beautiful, so nice, creating such a good atmosphere. It's more than satisfaction for Me. And sometimes I think there is nothing to be done now anymore, finished. But then they invite Me here and invite Me there, so I'm just doing. But to be very frank I am over satisfied.

Now, once you have planted the tree... it's like a mango tree. Once you have planted a mango tree and looked after it for three or four years, then it looks after itself. It gives fruits, it doesn't need any water, nothing, it just grows by itself. In the same way it should happen with you. You should grow by yourself.

Of course, you will find people who are stupid, who are aggressive, who are not at all Sahaja Yogis and trying to be Sahaja Yogis. You'll find all kinds.

So just see them, that's all.

In this Guru Pūjā, you have to decide that what are the criteria. First a Guru has to be without desires, any

desires whatsoever: nirichcha as they say. There is one false Guru in India who said that “If I had the powers as Mother has, then I would have become the king of this world." So people said “Then why don't you become?" Why doesn't Mother become like that? Why doesn't She become the king?" So they said “Because She is nirichcha, means She has no desires. A person who has no desires will not become anything." So, I said go and tell him “If you have desires, you cannot have powers also." It's only because you have no desires, that's why all these powers are there.

So any desire that comes in your mind, you should say “Forget it, just forget it." When the desire is overpowering, you just divert your attention. Any kind of stupid desire can take charge and how do you become desireless is by getting to the thoughtless awareness. Any crisis comes in, you should be able to rise into that state of thoughtless awareness. Just be peaceful. Look at your desires with peace. You can tell the desire, “Oh, I'm very much satisfied, now don't come, I don't want." That's how you can become desireless. There is this compassion and the compassion that becomes actually the power. [With] small, small things you can express your love, very small, small things. In very sweet ways, you can express your love. Is very important.

The whole world needs today love and peace. And you have to give peace and love to everyone that is possible. Of course [with] Sahaja Yogis it is very easy, but even non Sahaja Yogis, you must treat them with respect and love, but you should not have a desire that you should get back anything from them.

It's alright, whatever done, is forgotten. You have known so many Sahaja Yogis who came to Sahaja Yoga have gained so much and have betrayed us, it doesn't matter, it's not important. Because they are going to be losers, not we.

So, there's nothing to bother about these things.

Then another thing is: try to see that your mind doesn't react.

Some people have a habit, or I think most of them have, to react. You tell them something and they'll put their own one tail with it, something.

Never will they accept if somebody says something. If you are reacting, what will go into your heads? What will go into your heart? What will go into your attention? So the reaction itself is a sign of not proper development within yourself. This attention which is trying to go into all the areas of your mind and your body and everywhere, is not there. It cannot enter, because as soon as it tries to enter, you shut it by reacting. You cannot see anything just for seeing sake, you must react. You say “This is not good, that's not good." If I say “It is 5 o'clock" you'll say “No! It is 5 past, 2 minutes, 3 seconds!" This comes with terrible conditioning which has to go away. Not to react. Why should you react? Then the argument starts, then fight starts, then wars come in. If you tell your mind, “Nothing doing, you are a myth and I am not going to react to anything!" 99.9% problems will be solved.

Then the last, but not the least is the ego. I can't understand a saint having a ego, just can't understand.

It's so stupid to have ego. It's a kind of a domination, if slightest things are wrong, you get angry. If somebody says something, you get angry. That means your power of love and compassion is still not full.

You can of course correct people when they have to be corrected but for that you should have this power within yourself. The person should know that you are correcting that person because you love that person, not for selfishness, not for any gain. But this ego is a very big problem and that comes up by, I should say, not only ignorance but stupid ideas about yourself. If you think you are something great, already, then what can you do? Ego makes you very arrogant, horrible. But if you are humble, really, not to just to have the humility of a businessman, but if you are humble from within yourself, from your heart, enjoying your humility, then this ego can run away.

You have to ask yourself “Now what are you angry for?" Again, I come back to the same point: introspection. Because you are not here just to carry on some jobs, but you are here to become saints.

Then this ego should be made into a great instrument of love and joy. You can, it is not difficult. This one is what is ego is, reactions to things. You can react to things in a sweet way or you can react to things in a deadly way. Then the humour comes in. Also you speak as if there is fragrant flowers which are coming out. Then every action of yours, everything becomes very gentle and sweet. Have this ego that will be gentle, will be kind, will be sweet, will be forgiving, will be loving. Let's have this ego. Start with this kind of a ego, the other way round.

You'll be surprised how you can really conquer the whole world.

On this day of Guru Pūjā, is, Guru is supposed to tell something to his disciples about correcting themselves. In My own sweet way I've said to you which you shouldn't mind. I don't mean to condemn you by any chance but to give you a proper sense of introspection, proper sense of introspection by which you all get your Gurupada. My only, I shouldn't say desire, because I don't have desire.

So My only vision is, that I should see all the Sahaja Yogis drenched in the power of love, enjoying each others love, enjoying each others relationship and improving relationships. I know there are problematic people, I know they are problematic, but if you cannot solve the problem what's the use of your become masters? So, I leave it to you to solve your own problems which you are facing and introspection with love and compassion, not by condemning yourself. I am sure you can manage it.

May God bless you.

Contents: 1996-08-15 **Communications with Sahaja Yogis in London, World Geography, Cabella Ligure, Italy**

Contents: 1996-08-31 **Talk to the Leaders, 11 Questions and Answers on the Greatest Truths for Sahaja Yogis, Seminar, Śhrī Kṛiṣhṇa Pūjā, Palazzo Doria, Cabella Ligure, Italy**

[Questions put and answered by Shri Mataji.] Question 1: What is the greatest mistake for a Sahaja Yogi? Answer 1: To believe in your mind.

Question 2: What is the greatest blessing for a Sahaja Yogi? Answer 2: Collective consciousness.

Question 3: Who is the greatest fool? Answer 3: He who does not recognize the Truth.

Question 4: What is the surest thing in life for a Sahaja Yogi? Answer 4: Your Mother's love.

Question 5: What is the greatest pleasure for a Sahaja Yogi? Answer 5: Pure Joy, Nirmal Ānand.

Question 6: What is the greatest opportunity for a Sahaja Yogi? Answer 6: To give realisation to people.

Question 7: What is the greatest thought for a Sahaja Yogi? Answer 7: Thoughtlessness.

Question 8: What is the greatest victory for a Sahaja Yogi? Answer 8: Over ego.

Question 9: What is the greatest handicap for a Sahaja Yogi? Answer 9: Egoism.

Question 10: What is the greatest loss for a Sahaja Yogi? Answer 10: To lose the image of Mother in your heart.

Question 11: What is the greatest need for a Sahaja Yogi? Answer 11: Absolute faith, Nirvikalpa.

Contents: 1996-08-31 **Talk to Sahaja Yogis, Evening Program, the day before Śhrī Kṛiṣhṇa Pūjā, Cabella Ligure, Italy**

One of the musicians: Now we would play a very famous and a traditional bhajan which is the favourite of Shri Mataji, She had asked us to play this: *[UNCLEAR* Tomagajalataramajendra Bahjatabejania].

Shri Mataji: Hello, this special Bhajan they are going to now play for you is written by a great saint Tulsidasa.

The description here is of a little Śhrī Rāma while walking how he used to walk in a particular, beautiful manner. And he would fall down and again he'll get up and all that description of a child. I don't think, I haven't seen any such poetry in the Western areas, describing a little child, how he walks, how he runs, you see, this is one of the very big thing to understand. I don't know about Italian because they have lot of love for children, but the description is so beautiful, of a little baby getting up and he is an incarnation and just like an other child how he walks and how he crawls.

[UNCLEAR Tomakate] itself is a very lyrical word I should say which is going well with the tabla also, so he uses it, or we can say it's a rhythmic.

So the whole concept in India is that a child is something very Divine and if it's an incarnation the childhood of an incarnation has to be very great. I haven't seen one poet, if you find anywhere in the history of English, German, French, in Italian, where they describe a child's movement. I will be very happy, because this is how you respect and enjoy the child. All right, I am sorry to say, but our country is full of this kind of love.

Thank you! [Performance of the bhajan.] We have to be really very much grateful to these three great artists, you know them, all of them. You know Sangeeta, whom I knew since she was a little girl. Also Mr. Rono Majumdar has played before us.

I asked Baba Mama, “What is his name?" He said, “His name is Rono." I said, “How can that be, must be some other name also, so, it's all right." He says, “No, because

he never cried that's why he was called as Rono." Just like Baba Mama, you know.

Now we have before us a very great genius, this *[UNCLEAR* Sukavinda Singh Namdai].

Somehow these Namdai people have a great attraction for Sahaja Yoga. I went to Thailand there were so many Namdais. This is what we are doing in Sikhism only, but it's the Namdar is who can see that is the same that what Guru Nanaka has talked about. They are the first people to enter in. Now of course we have many. And he is, he belongs to the same sensitive sect. I think he must have been a great musician in last life also, all of them. Otherwise you cannot achieve at this young age this kind of mastery. And to do the accompaniment *[UNCLEAR* assanghat] is a very difficult thing. I think it's easy to play solo, but to go with the mood and everything of the musician and to bring out the beauty without going into competition, but to slow down at a point, to heighten at a point, comes from a very large heart and from a heart which is a realised Soul. I have seen people fighting on stage also. As you know her mother is a great musician herself. And I hope I am going to meet her. I went to Benares because she asked Me to go there. And it's as if through these musicians also our family of Sahaja Yoga is expanding so much and the way they are realizing the oneness of our lives and the oneness of our value system. As if they are all getting absolutely lost into our owned family of Sahaja Yogis. I don't find any difference. Because they all have vibrations, they all play with vibrations and nothing goes wrong. I've seen they're just like as we say *[UNCLEAR* sanjaruna]. I felt there was sanjar

in them the way they started playing. All Shaktis started moving in. And it was a remarkable thing I've seen, whether they are Christians, Hindus, Muslims, Sikhs or anything. It is this music transcends them. This [Mustatalikasar] was sitting on the stage and he just looked at Me. I don't know what he knows about Me. He said to Me: “Ma, come and sit next to me!" I was amazed how he recognized Me. I was just like any other audience sitting there.

So, I was sitting on the ground. He just called Me. I was so surprised at this gentleman Nusrat Ali Khan.

So it transcends you know this music is Divine it transcends all races all religions, all nonsensical divisive ideas, no doubt about it. And that is what is Sahaja Yoga. And so all these great talents are born today.

There where two little boys sitting here I must tell you, one of them plays very beautiful *[UNCLEAR* Mur.lī] and another plays tabla. Both of them very good and very difficult song they played. I was surprised how they have picked up and they are picking up so fast.

So the talent on the Sahaja Yogis as I told you that this music of *[UNCLEAR* Satajenom] was not only was written down in Hindi, absolutely they didn't know any Hindi, also it was composed, it was put to tune and also to rhythm, by them only.

Now, so, how our music is spreading into their hearts. And this our music which is Indian music is really is a Divine music. Also they have very beautiful which is classical music, no doubt about them and I also enjoyed that very much. But our music is a different type, because the rapport is established between the artist and

the listeners. And every time they can start creating, their freedom to create. That's what I think the Sahaja Yogis are just, all the time like to hear our Indian classical music. All the time and they appreciate it very much. Whatever country they may come from, but you'll be amazed how they enjoy the music. And this is also say one of the desires of My father. That he said that our music is so Divine it should reach the whole world.

And now for your information we have already started a very beautiful music academy in Nagpur. We bought a very beautiful land there. And I would like all of you to visit that place sometimes and see these young people within three months time they sing *[UNCLEAR* malkauns] just like any great musician. I was surprised now how these people. Romania they sing qawwalis so beautifully that everyone was amazed.

Now there is some sort of a spark in them.

So, not only is it spirituality, but the beauty of spirituality is expressed in so many ways.

I don't know how to thank you My children, I don't know how to thank you for giving this beautiful time to all of us and we were enjoying ourselves very much. And I hope you make a daisy to come to India also. Especially for My birthday we always try to invite many people. *[UNCLEAR* Machvekanete India me].

So I think I am already extending invitations and they'll all be very happy to have you there. They are all music *[UNCLEAR* bargels] I tell you, all of them are.

Contents: 1996-09-01 **Śhrī Kṛiṣhṇa Pūjā, Śhrī Kṛiṣhṇa and Sahaja Culture, Cabella Ligure, Italy**

Today, we are going to worship Śhrī Kṛiṣhṇa. See how cold it was about 3 o'clock. Now the reason is this, that Śhrī Kṛiṣhṇa did little mischief with Indra. Indra, who is a God, or you can call semi-God, for looking after the rain.

So, Indra got very angry. You see all such semi-Gods are very sensitive people, at the smallest thing they get angry and irritated and they start using their powers to express their anger.

So he started pouring rain on all the Gopas and Śhrī Kṛiṣhṇa, who were looking after the cows. And the rain was so heavy that they thought that the whole land will be completely submerged.

So Indra was very happy to spoil the game of Śhrī Kṛiṣhṇa. And, he thought he was very successful.

So, Śhrī Kṛiṣhṇa lifted a mountain on his finger and all these people who were getting drowned, went under that mountain. This is Śhrī Kṛiṣhṇa's style. My style is different. I told Indra that you can't misbehave with Me, you can't.

So far I've not harmed you in any way and I've not irritated you. Of course it's going to be Śhrī Kṛiṣhṇa's Pūjā, but that doesn't mean that you should try to show off your powers before Me.

Sometimes I wonder these Devas, semi-Gods, they are realised Souls or not, because why do they get angry like this for small things. Whatever it is, he could be reconciled and now it's become warm, I must say.

With Sahaja Yoga you can do many many things, but you must know what you can do. For that, Kṛiṣhṇa is a very good example. He started Sahaj Culture. Culture, I'm

saying, he didn't give realisation to anyone, but he gave the idea of Sahaj Culture. How?, Before him came Śhrī Rām, who was Maryādā Purushottama, who was a man very particular about everything. I mean, like he threw out his wife because he was a king and a king cannot have a scandal, especially from his wife.

So he threw her out, it was not Kali Yuga, that's why. And his father ordered him to go, not only his father so much as his stepmother, to go in an exile into a forest.

So he agreed, after all he was Maryādā Purushottama.

So whatever his father said, he agreed, whatever his mother said, he agreed and went into the forest and stayed there fourteen years.

This is the obedience to the father. There was no need, his father was not God. He was God, but in those days it was important to make people, not only respect the parents but also to obey them, that was the time. In his time there were many munis and many saints and also Haṭha yogis. And these, even before him, used to make people practice very strict type of discipline and if they did not practice the discipline, they had to do a lot of penance. And, so many people who tried also, never reached their goal, because of the strictness and complete discipline about following the path of spirituality.

Recently I was reading a book called `Peaceful Warrior'. There they have described an American seeking the truth and the Guru of that fellow really really takes into such a horrible severe task, that My granddaughter said, I am very angry with such a Guru, she couldn't bear it.

So ultimately he finds that he is the existence.

So that was the practice followed after Śhrī Rāma. People would leave their wives, children, go to Himālayas and sit there and practice meditation. It was a very rigorously followed, or I should say, a very moral society, so very moral. But it was out of fear, the whole morality came through fear, which is also repeated in other religions. Now I would say that Islam today, has taken that form, it is the fear. They are not doing it out of freedom. Also Christians, same thing and Hindus, I don't know, half way this side and half way that side. Even among Sikhs there's terrible disciplining.

So much so that, as punishment you have to clean the shoes of all the people. I don't know if it is to beat yourself with shoes or another.

But quite a lot of punishment is there.

Then came Śhrī Kṛiṣhṇa and he saw the situation, that the way people are really now fasting. If you really go through the rituals of Hindu religion, out of one week, you will be fasting for six days at least.

One day you might eat some sort of a food, then you'll have to visit all kinds of places. Now, recently they had to go, as you know, to Amarnat and so many died there.

So now they said “we have got Nirvāṇa, we died while doing this, so we have got Nirvāṇa." This kind of a very funny idea was existing. That we have Nirvāṇa now, we have achieved whatever we wanted and now we are dead, so many are dead, so those who were not dead were repenting why they were not dead, it would have been much better, they would have got their Nirvāṇa.

So, even in this Kali Yuga these ideas are prevalent. Even in India, people have very severe types, especially in

south I have seen, they do all kinds of nonsense for the atonement or maybe for something they are asking. All this nonsense was too much for Śhrī Kṛiṣhṇa. He couldn't understand that they are going to destroy their lives with this kind of ritualistic grueling, then what will remain out of them for Sahaja Yoga.

So he's the one who started Sahaj Culture. He said “let us enjoy, we must have enjoyment, Nirmalā Ānand, pure joy." How do we have pure joy by?, He had this rakhi bandhan by which, apart from your wife, everybody is your sister or mother. I must say it is quite true about Indians. Not in the north so much because of Islamic influence, but in the south it is so. In Maharashtra it is so. And then he started also this Holi, in which you should play with colours, maybe to get rid of the colour barriers we have, maybe. In America it is a very good idea to play with colours and put some black on the whites and some whites on the black and they can see for themselves how stupid it is to fight in the name of colour.

He used to play with children who were looking after cows, just like a very ordinary person. He never tried to show off his powers. He never tried to stand out, never would dress up in a very special way, never.

Just like an ordinary cowherd. And his relationship with his mother, Yeshodā, she was not his mother, was also extremely beautiful. There are so many beautiful poems written about his childhood. That, he's the one who is in charge of the whole universe. As a little boy used to put his finger into his mouth wondering, how can a Divine Virāta do that? What is his thinking like a child? All his actions of children.

Yesterday's song, as you heard it, is this. All these little, little actions are described very well. Especially by another very great poet, Surdas, who was blind. His childhood is described in a very beautiful manner and the description of his relationship with his mother is very natural and very sweet. It was not like this, as modern times, a carpet is spoiled, “Oh, the carpet you have spoiled, I'll hit you hard, this carpet you have spoiled." They have more interest in their things than in their own children. But according to our culture, if the child breaks anything, you have to say this `very good you have broken, some badha has gone away.' Never to scold a child for doing anything which you think is destructive, because he then will definitely become destructive.

So to understand a child, I think you must read those poems, beautiful poems which are written about Śhrī Kṛiṣhṇa. I don't know how their imagination reached that beautiful height of pure joy.

So towards our children also, we have to be extremely sweet and nice and forgiving. But some children, of course, I meet are difficult, but they also can be corrected if you really apply Śhrī Kṛiṣhṇa's methods to him. Now when he went to college, or we can say into the school of a Sandipanimuni, the Guru. The Guru's wife was very kind. But the Guru was strict. And his wife used to look after him and when she gave him something for food when they would go and bring some woods from the forest. It is very subtle, you know the whole thing is. He went there and his friend was carrying the food. His friend was carrying the food and Śhrī Kṛiṣhṇa was busy cutting the wood, imagine? Śhrī Kṛiṣhṇa was cutting the

wood for the mother. I mean, for the mother he could do anything, he was God.

So no work for the mother was menial or lower. But the other fellow, the friend of his, he was very hungry, so he ate all the food and nothing was left.

So when he came down, he got very much worried. He went and told his Guru that “I ate all the food and I didn't share it with Śhrī Kṛiṣhṇa." The Guru got very angry, very angry and he said “now, you will be cursed with permanent poverty." But the mother said “no, not permanent, till you meet Śhrī Kṛiṣhṇa again." That's how she tried to do it, we call it Upashad, in that you give another curse which can neutralise partly. The same friend, was Sudāmā and he was very very poor.

Now see the Sahaj ways of Śhrī Kṛiṣhṇa, he always used to remember Sudāmā and he told his wife that I really I don't know, he's cursed, I don't know what must be his condition, where he must be? Now the friendship, he was a king, such intimacy of feeling with a friend. He said “I used to go with him, I used to collect the woods." I mean, imagine all these little, little things had such a big importance for him.

So, he was not only worried about the whole world, as he should have been, but also about Sudāmā, When will I meet him? When will I see him again? Where must be his house? How he must be living? All these very delicate feelings he had for his friend. Just like a Sahaja Yogi.

In the Sahaja style, we worry about the whole world and also individually we are worried. We come to know about one person who has fallen sick, who has a problem, something is serious. All the Sahaja Yogis think of him

and are worried about him, they may have everything, but still they are worried, what is happening to such and such a person. How many of us know each others names, I mean he knows everybody's name, practically. And how we care for them, how we respect them, how we love them and how we have pure relationships. Today is also the day of Rakshābandhan, which is a very great thing that we should have pure relationships.

I've seen in, say Maharashtra, men won't go and talk to women very much and women won't go and talk to men. And once, somebody remarked, “Then what are you women doing, talking to women only?" So, I said what are we to talk to you? You are talking about your office, we are talking about our houses and homes. What is there to talk to you? The Western culture is different, they will force you. They'll make one man sit here and next to him should be a woman, somebody else's wife, then another man and then somebody else's wife. How can you have intimacy? This kind of idea, which is a-Sahaj, has slipped into immorality. There's no need for men and women to sit like that, what is the need, I just don't understand. Compulsorily you have to sit. I've had a bad time, I tell you, with My husband's job, I never liked it. What is there to talk to these men, after all, I don't know anything about banking, I don't know shares, I don't know stock exchange, what it is. Or I don't know profits and this and that, that part is zero. Then, I don't know about office, I don't know many other things men talk about, so what is there to talk to them, it is so very difficult. And whenever I said something, I really dropped a brick.

Once in a party, they were offering drinks to everyone and then this, so I said “I will have a soft drink." So the vali came and gave Me a soft drink. The vali was having a bow and a white shirt, that's all, absolutely a-Sahaj methods. Black bow, white shirt, black coat, black pant, all just the same, whether it is an ambassador or a vali. You can't make it out who is who.

So I drank, you know, so when I was finished I gave it to an ambassador, a very well known ambassador. To Me there was no difference at all, when they are just say walking the same way, talking the same way.

So a-Sahaj the whole thing is. They say they have so many Embassies, for what I don't know and they, what they have, always drinks, parties, shake hands, shake hands. Your hands will break, I tell you. A most a-Sahaj method is to shake hands.

Why not say Namaste, it is better and you know Me.

Sometimes I used to get such heat. Like yesterday you have shown that the ice melted. The same thing used to happen to Me. Mostly they were very hot people and I didn't know what to do, I used to stand on one side just feeling shy. But this method of hand shaking is absolutely a-Sahaj. And worse than that is French method, is to kiss and like it or not, you are kissed. Or to hug somebody. The first time I gave realisation to one English gentleman, he just lifted Me up like that. I said “alright, it's just out of joy he has done it, it's alright." But there is no openness, there's no openness of heart.

You go to a party, you have to be dressed up like this only, if you are not dressed up like that, then you are useless. If you go for a death also.

Somebody died, a great friend, a very nice man.

So I was told I had to wear a black sarī. Black blouse, everything black. I said, “I have no sarī, black without border, you know." So they said “you don't go." I said “Very good idea." Because I don't know these a-Sahaj methods.

You are not supposed to cry or weep there, no, you have to keep quiet. Then when you go there, the body is lying there and after a prayer is said, you are supposed to drink champagne. I mean, imagine it, how can you, no feelings, for that body which is lying there dead. And everybody very happy and if somebody looked unhappy, they would ask “what's wrong, are you alright?" No consciousness that we have lost a friend here. This is the a-Sahaj style when it comes to grief. When it comes to joy it is a-Sahaj, when it comes to grief it is a-Sahaj. We have to be Sahaj, in the sense that whatever we do, we do it spontaneously.

Not with deliberations.

We have some very anglicized people in India also. And the lady of the house died and I went to see and in India the body is taken down on the ground.

So they were discussing what to do, what time to start the funeral and all that.

So one lady, who is a very well-known person in India, she said “you should not do it before 12 o'clock." I said “why"? She said, “Because I'll have to wear white." “That's true." “And I `ll have to go to the bank to get my diamonds to match with the white sarī." I said “What is this?" Such filth of materialism. It is going too far, we are going away from our feelings, from our emotions, which

are genuine, which are there all the time, you don't have to think about them, they exist all the time. But you think “Now, should I cry or not? Should I laugh or not?" It's so spontaneous, if you have joy, you are spontaneous. You express your joy spontaneously. Of course, not in an uncultured way, but in a very cultured way.

Now, what's the meaning of the Sahaj Culture, this culture, is something that is, you are groomed, you are brought up, in a very natural manner, that you develop a culture. A small, like, a child like, simple innocent behaviour. It is Śhrī Kṛiṣhṇa's introduction of idea of pure joy, Nirmalā Ānand, which came as a great relief to Indian people because they were following Śhrī Rāmachandra. But then abandonment started. The problem is, if you make them strict, they become like starched clothes I think, that you can't wear them. Or if you allow them, no, no, you must enjoy, you must enjoy, alright, you allow them, do what you like. If you allow them to do what you like, then they start doing all kinds of things. In India, we had lots of horrible things, which I dare not even tell you, in the name of enjoyment. But Śhrī Kṛiṣhṇa himself has been very much misrepresented by stupid people like Vidyāpati. He was a great poet and he used Kṛiṣhṇa and Rādhā as Romeo and Juliet. That's the greatest insult to the purity of their relationship.

You must have seen many pictures like that, in Kangrashali and this shali, that shali. It's all nonsense.

They could not show the reality of the relationship, but some sort of a very vulgar expression. Because I think these poets and these artists at that time had some hidden suppressed feelings within themselves and they

used Śhrī Kṛiṣhṇa for that. All kinds of romanticism is attached to him.

Sometimes I feel that people have not understood Śhrī Kṛiṣhṇa.

But there's a nice story about him. That once, his wives, he had many wives, that is also another controversial point. He had many wives, because these were 16,000 powers of Śhrī Kṛiṣhṇa, who had taken birth and were captured by one king and kept in the prison.

So he had to release them, they were released.

Now how are they to live with Śhrī Kṛiṣhṇa, he was a young man, so he married all of them. That is the case of Mohammed Sahib also. He married all sixteen of them, they were his powers. For a young man to keep 16,000 women like a harem, what people would have thought of him. So he married all of them. And another point about his life is, that once all these ladies and he had also five wives. These five wives were the causal of the five elements. So he had to go.

Once, these ladies wanted to go to see one great saint. And the river, which was there, was all completely flooded. So, they came to Śhrī Kṛiṣhṇa and told him that “How are we to cross?, because this is over flooded." He said “That's very easy to cross that river." This river is called as the virgin river, Nirmada, now they are having big fights over it in India nowadays, a big politics. “So you go and tell her that `Oh river, if Śhrī Kṛiṣhṇa is a complete celibate personality, perfect Brahmacharia, if that is the truth, you go down.' "" And the river went down and they crossed over. Then they went and

worshipped the saint and when they came back to the bank of the river it was again very much flooded.

So they went to that saint and asked him “Now, how are we to go back?" He said “How did you come?" They said “this is what Śhrī Kṛiṣhṇa asked us to tell the river." “Alright, you go and tell the river that this saint has not eaten any food whatsoever, nothing” while they saw him eating plates after plates, “if this is the truth, then you better recede." So, they went down and told the river and the river went down. They were amazed that this man ate such a lot of things and this river has gone down thinking this is the truth. That means, what has been their character? They're abogis. They're abogis means, they do not get, indulge into it, they eat, alright, but they don't care, they don't have that feeling of eating and feeling of enjoying the food and nothing of the kind, they are just eating. And this gentleman with seventeen, I should say 16,005 wives, is called as Brahmachari, because they are not involved. They are in Sar state. With such a great immaculate personality like Śhrī Kṛiṣhṇa, the way they have created this nonsense of romanticism.

For America, I think they have gone too far with the freedom they have. As people with Śhrī Kṛiṣhṇa's blessings became free from all the rules, regulations and got abandoned. But America has gone much worse and not only that, but the films they are producing are very dangerous films and really damaging the whole world. They don't know what sin they are committing, for thousands and thousands of people in the world have taken to all kinds of very destructive ugly ideas. Freud,

alright, he's ousted, finished, he's done already a great harm. But what about these films, they are now very much impressing our Indian directors. I think all these directors are guiding Indians to hell. The whole thing is so absurd and so dirty.

For an Indian mind it is really inconceivable. Even, I have seen Americans can't bear it, it has gone that bad. Then other things have started with this freedom that we have. Imagine if Śhrī Kṛiṣhṇa was here, he would never have put any oil in his head, he would have never combed his hair, as he must have his top knot. And he might have worn some mod dresses from America. Otherwise, you cannot exist.

All the junk now has gone all over the world. Selling in Moscow, selling in all the developing countries.

Only thing, when it was declared that they have AIDS, people used to buy even second hand from the tourists, they threw away all that. They are carrying AIDS all over and drugs all over. It's a destructive force. It's a destructive force, which is very active in this Kali Yuga and so we have to have many Sahaja Yogis to fight this destructive force. And when they are destructive they are not hypocritical, that's they think is a very great quality. But a least with hypocrisy you can save some people but when it's just an open thing everybody starts doing that.

So when you think the time Śhrī Kṛiṣhṇa lived and the beautiful time they had, of such clean life and how he killed all these demons, is something so beautiful, so energy giving. But how many demons there are nowadays, is it one? is it two? is it ten? One is finished, another comes up like a mushroom, that is finished, third

one comes up like a mushroom. And the most fertile land is America.

So you all have to pay attention to this land of Śhrī Kṛiṣhṇa. Especially Śhrī Kṛiṣhṇa should really start using his Sudarshana Chakra, would be a good idea. The time has come. That's why I gave you the conch. To declare the time has come to clean this America. That is the thing we have to do. Today when we worship Śhrī Kṛiṣhṇa, you must awaken within you yourself, that consciousness, that now Śhrī Kṛiṣhṇa is within all of you. And by your communication, because he's collective, by your speech, by your songs, by all that you use to communicate with others, should carry the message of peace, of love, of compassion, of truth and above all of Sahaja Yoga.

May God bless you.

Contents: 1996-09-15 **Śhrī Gaṇeśha Pūjā, Without Innocence You Cannot Enjoy or You Must Fight for Innocence, Cabella Ligure, Italy**

Today, we are going to worship Śhrī Gaṇeśha. Is a very opportune time today, I feel, where the innocence, especially in the European and American countries, is under attack. There's no respect of the innocence, no value for the innocence. They don't understand how important it is for human life to have innocence being respected within themselves and also without.

The human life is different from that of animal life. Animals are controlled all the time, or we can say they are under a complete imprisonment, you can say under the will of Lord Sadāśhiva. That's why He's called as

Pashupati. But human beings have been given freedom to choose their ascent, to choose the right, to choose the truth. Only through innocence they can achieve that. Only the innocence is the source of joy. Without innocence you cannot enjoy anything fully. This innocence is today completely under challenge and to finish the innocence in a very subtle way there are very negative, cruel, criminal type of people who are working it out. Their minds, if you say possessed it doesn't look like that because otherwise they are quite intelligent. They are also, in a way, creative of horrible things.

So you can't say they are not intelligent, but from where do they get this knowledge of creating something so horrifying? In this Kali Yuga, as in Sahaja Yoga, everybody can take birth. There's freedom. It was not before so much so that all kinds of evil people have taken birth on this earth. These evil people generate evil thoughts and people catch them and start get moving with it. Even a good person can get swayed by it.

Even a saint can get swayed by it.

So these forces of evil, the forces which are working out today, are coming basically from these horrible people.

Firstly, they might have come as false Gurus teaching something nonsensical, like Rajneesh. Then from some philosophers like Freud, who is still accepted in some countries as a great philosopher and still some psychologists worship him as God. This Freudian knowledge was accepted without even thinking why Freud did that.

Freud was a Jew and he found that many Christians tortured the Jews in America. This is another anti Christ

activity. And when they tortured the Jews, this fellow thought that better to make them immoral. Destroy their innocence.

I don't know if he could understand to that point and he started theories which were so shocking that normally any sensible person would never have accepted it, but so many people accepted in America to begin with.

In America, people take to anything very easily which is absurd, which is stupid; I don't know why.

They have a special liking for such things. If Freud had come to India, they would have cut him into a hundred pieces, I tell you and thrown in the Arabic Sea. They could not have borne this idea, the way he had insulted the mother and her love for her child, the purity of her love. But Jews did not accept him, surprisingly. Jews did not accept. It's the Christians who accepted his ideas and started destroying, displeasing Śhrī Gaṇeśh.

First of all, we have to understand we are born in a very precarious, dangerous times. At the time of Christ there were very few people who followed him and they didn't understand much about Kuṇḍalinī either. They had no knowledge. They had no knowledge that Christ was the incarnation of Śhrī Gaṇeśh.

But in the Christian countries only you'll find the insult of Christ, the insult of innocence openly done, sometimes legally accepted.

So when we are born under such horrible circumstances, we have to build up a great force, ourselves, of spirituality. When I came today, there was no breeze, no leaf was moving, but you were singing songs and tremendous breeze was coming from you all and that

made Me understand that this Divine force has come into being. It is there, it's working. Not only that, but it's very powerful. Normally, the breeze doesn't come to Me, it goes the other way around. But it was such a tremendous breeze that I had to hold somebody's hand and not a leaf was moving.

So this collective force that you have, you must remember you have to fight it, not to run away; don't escape it. You have to fight it and you have to prove that innocence is to be respected.

Ādi Shakti first made Śhrī Gaṇeśh. It was the first deity was created. Why? Because She wanted to fill the whole atmosphere with Chaitanya, with holiness, with auspiciousness. It is still there. It's still everywhere you can feel Chaitanya is working, but it does not penetrate into the modern minds because modern mind doesn't know what this innocence is. They have no idea at all about innocence. The way they are going on everywhere is really something never happened on this earth.

So with the innocence comes moral life. Morality is the expression of innocence. Innocence shows a person that he's incapable of being immoral.

Once I had gone to visit a ship and I was coming out in the Customs. When I was coming in the Customs they said, “Did you get anything from the ship?" I said, “Yes, of course." So they were shocked, you know, “What did you get?" “Some cheese." “And?" “And we ate also and we have some cheese with us." “What else?" “Some books." “Books? You are not supposed to get any books from there." I said, “Why not?" He said, “You have to pay Customs." I said, “Alright, how much do we have to pay

Customs?" “You didn't read any rule about it?" I said, “No." I was innocent. I never read anything that you have to pay money for books also. He said, “No, no you are joking. Go." They thought this woman is so simple, She doesn't behave as the wife of the Chairman of shipping corporation, going in a very big car and they couldn't understand this woman is so simple that She's saying She has taken some cheese and She has taken some books.

All these laws and regulations people bind they have also come from our idea of Dharma. But the root of Dharma is innocence. All laws are made to protect the innocent, not to punish only the criminals but to protect the innocent person.

So if somebody is proved to be innocent, your innocence protects you. I have seen many a times in My life, because I'm so simple, I should say, that I had no problem, never, of anything.

This is a kind of a very powerful vibrations that come from an innocent person, like from small children.

Small children, if you see their vibrations, hundreds grown up Sahaja Yogi's may not have the vibrations of a little one, I can tell you this much. But once they start growing, then they become very intelligent, very grown up, matured and as if they have lost their innocence. This is no growth according to Me.

According to Me this is the death of innocence.

To be cunning, to be clever, to be very intelligent, so-called, it is very self-deceptive. For that, there is one blessing also. All those who have committed such

mistakes have to ask forgiveness from Sadāśhiva or from the Ādi Shakti.

But Gaṇeśha doesn't forgive. That is one thing wrong with Him: He doesn't forgive. If you have hurt Him, He'll hit you back.

As a result now, we have diseases like AIDS, all other horrible diseases that you have which are called as secret diseases. They are all because of the wrath of Śhrī Gaṇeśh. Immoral life that people have been leading as if they have a permission from God Almighty to do what they like. People are so proud, such vanity, that they think whatever they do, after all, what, nothing can happen to them. And with all these things happening in this world, people are still taking to immorality. Very openly, boastfully and I have seen that people who are elite, I have now been with elite people. They crack such dirty jokes and they're so overly smart that you just can't bear their company. They are worse than the loafers on the street sometimes.

So this disease has spread, spread among older people more than among younger people, among children.

So I think the people are now jealous of the little children. Otherwise, why should they attack younger children? What do they get out of them? In this jealous attitude they try to attack in a very dirty, funny manner. Then Śhrī Gaṇeśh, He will never forgive these people, never, never, never. First of all, He'll expose them and He will punish them for seven lives. Seven lives their families will be cursed and seven lives they, themselves, will be cursed.

That is His commandment.

But if His Mother says, “All right, forgive” or the father says, “All right, forgive” He obeys. He obeys His Mother absolutely. Never questions it, never questions, never answers back. Whatever He's told, though He's in command of all the Ganas, He's Ganadesha, but before His Mother He's just like a little baby. He doesn't challenge the Mother. Even if the Mother tries to test Him or tries to get puzzled, He never doubt Her.

In Her Māyā He cannot fall. He cannot fall into Her Māyā because He's so innocent. He's like a churned out butter out of the buttermilk.

So this butter can never get dissolved back.

In the same way, this child, which is pure innocence, never can be contaminated by the Māyā of the Mother. Māyā is the process by which you test people.

You have to test them.

See, these days people are so clever, so intelligent, that it is beyond even Ādi Shakti, beyond any Shakti, the way they try to cheat you.

So many have cheated Me, but they are back in their seats again. That's done not by Me, but by Śhrī Gaṇeśha. He's just standing on all the sides.

If you try to do anything like that, He'll hit you hard, I can't help it.

Now, this one came on this earth as our Lord Jesus Christ. Christ, I think, is more active than Śhrī Gaṇeśha because Gaṇeśha is fat, He has a big belly, I think He takes time to hit you. But this Christ, I don't know how He has hit people. All over the world there are diseases, diseases, diseases. He has killed so many people. He's the one who

used to ask for forgiveness for the people who killed him. But He is so active, I have seen, that sometimes I tell people, don't talk ill of Me, it's very dangerous. Don't talk against Me. In a very secret manner He exists and the way He hits people is sometimes, it's dangerous.

Even My eyes get filled up with tears, so I have to control both sides. One is Śhrī Gaṇeśha, another side is Christ. There are two other people, Saint Michael and Gabriel. We call them in Sanskrit language as Bhairava and Hanumāna and they incarnated as Buddha, Mahāvīra and Buddha.

And the Buddhists are really, I tell you, are another kind of perverts. It was said, Buddha said that you should not get attached to anything; you shouldn't get attached to your money, to your wealth, to your family, to anything. That time, the attachment was very great, must have been and this attachment he wanted them to remove from the minds of the people. You cannot. By removing your clothes, by wearing those saffron clothes, by shaving your heads, by walking bare feet, by torturing your body, you cannot.

That's all outside. That's not real detachment. That's not Buddha at all. Neither Christ, nor Mahāvīra.

What they said that you should get detached from within.

To get detached from within is very different than to get detached from outside. It's not how much you starve that you become Christ, or whether you move like Mahāvīra, that you become like Him, or you get saffron clothes like Buddha, you become Buddha.

So what a misconception they have of whatever was taught to people. That was the time when it was the days

of tapasya, of penance and that's why they said to do penance is best is to get rid of all these things so you will develop deeper into your being.

Even in the Christian religion they started these nuns and these, what you call them, the fathers and the mothers and the nuns and all kinds of things. This is another artificial thing they started. By doing this, do you think you can become innocent? I have known nuns who are so horrible that you can't even look at them, they emit nothing but heat. And those priests, now you have heard about them, the way they are attacking the innocence of people.

Buddhists are the worst, I should say, because they say, “Renounce, renounce everything." All right, renounce and beg.

So you renounce everything and beg for gold. What do you say to this kind of a contradiction? And we have there, like Dalai Lama, he is a universal beggar and people like it. People like if somebody is begging because their ego is pampered. Like he went to Los Angeles and all the actors and actresses had a very, very big conference and thought that by giving alms to this beggar their innocence will come back.

Can you believe such a story? Any sensible people has to understand, that by giving alms, how can your innocence come back? And so this fellow was again given a lot of alms.

He's got a lot of gold and he's really a goldy man, all the time collecting gold from here and a gold from there and gold from...

Such people, incarnations, who came just to tell us to be detached, just to develop morality. If you are detached about your sex life, if you are detached about your financial side, if you are detached even from your country, then a detached personality of that kind will become innocent and there will be no quarrel.

But it's happening the other way around now.

Same in the Islam. Whatever was taught in the Islam is taken on the other side. It cannot be in any way where Mohammed Sahib was only insisting on morality. Any kind of immoral behaviour He didn't want to have. He did say, at that time, you can marry more women because there were more women, but He never said you become prostitutes, you lead a life of sin. That was just a Samayāchār, that was only that time, that was the problem, He said, “All right." For example, divorce was not allowed at that time, but in Sahaja Yoga we do allow divorce. But I have seen that without divorce they can't live, I mean, just an impossible situation because also women sometimes are extremely cruel and men sometimes are extremely peevish.

Under these circumstances, how can they be companions? More women are immoral in this matter, I should say. First, it was the men who used to do immorality, but now the women who are not only innocence, but also Shakti, are trying to get into some sort of a shamelessness; no care of their own innocence.

Their innocence is the Shakti. If a woman is not innocent, how can she have Shakti? If she is leading an immoral life, then her Shakti will be finished. Only her morality is her Śhrī Gaṇeśha which emits this purity in her.

Now, I feel that the way people are pumping our heads with ideas, especially from Hollywood, we accept them and we forget that we are just hurting Śhrī Gaṇeśha and He'll come back on us. It starts at a very low level when we start hating our children.

The problem starts when we don't understand our children. I mean, in England they say that two children are killed every week by parents. This kind of attitude towards children.

First of all, they should not produce; if they have produced then they are Śhrī Gaṇeśhas. They have to respect, they have to love and they have to encourage. But to spoil the children is also another kind of negative force, I think.

Some people spoil their children.

Gaṇeśha can never be spoiled. You cannot spoil him, because He is beyond Māyā. But the way people run after their children sometimes is shocking. To them, that is the greatest achievement they have got, that they have a child. Even in a place like India where it's an over population, to them their children are like, I don't know what, so attached.

So this is a new attachment that has started which also gives you a kind of an immoral life, because you are Sahaja Yogis. For people who are Sahaja Yogis, all the children of the world are their own, not only your own children whom you love. All of them are Śhrī Gaṇeśhas.

Of course, if there's somebody who is not a good child or you find it difficult, is all right, but otherwise all the children of this world are your own children and you have to love them as you would love your own children.

Christ has said, “Love thy neighbour as thyself." I don't know why He said it because in all Christian nations neighbours are the biggest problem. Even here.

So I say, love thy child, love other children as thy children. Let's start at that point, maybe after that, but normally there are places where they won't allow you to take a at because you have children. I mean, imagine. Only unmarried people or barren people can live there.

And also compulsory is that you should not have any child. Even today you may not have child but once you live there you should not have any child. If you have a child then you are ousted. Can you imagine? About only thirty years back, people had twelve children, fourteen children, they were competing in that and lived very happily. And these days the problem has become like this, that you should not have many children. Those who started the problem are having no children at all. Those who said should be controlled, see, anywhere in the west the growth is minus. Who is doing that? Śhrī Gaṇeśh. You don't want children, all right. Don't have. Except for Sahaja Yogis, nobody gets child. In this place, Mohan got his child first so in the whole village there was a celebration. There has been no child born here for years together. But then, again, the problem is like this. When I say this, I find Sahaja Yogis go to another extreme. They are stuck to their children; `stuck' actually is the word, which is very wrong. I'm not saying you should neglect your child in any way, or you should in any way beat them or trouble them, all these things. You must love them in such a manner that they should know if they do

anything wrong they'll lose your love because for children love is the most important thing.

They should know this, what you don't like. You should tell them what you don't like. And you will be amazed how children will not do anything that will make you unhappy with them. Now that's a trick I think one has to learn. This is the best way to grow your children.

I'll tell you a story of My own daughter. She went to Delhi and all the girls were having sleeveless blouses.

So she asked Me, “I want to have sleeveless blouses." She was grown up, she was going to college.

I said, “All right, have it, whatever you like." She said, “By the way, why don't you wear sleeveless?" I said, “I feel shy." “Then why should you allow me! This is no criteria. Whatever I ask, you say, `yes' to me. I'm not that grown up." Even My granddaughter, she was here, she asked Me, “Nāni, why do you wear always blouses with sleeves?" I said, “Do you know these are very important Chakras, the most important Chakras for our body. If you keep them open, these two or these two, then you will have problems." “My goodness, I must wear now full sleeve." Immediately they understood.

So something deep, if you tell them in a deep manner which is respecting their innocence, they will improve. For example, a child becomes a spoiled child, he does very well in the class and all that. Now one way is to beat him up, shout at him, scold him, there are one. Another simple thing is to talk to him, “See, supposing you stand first, supposing you get good marks, you become a great man. How proud I will be. Everybody will be proud of you. But supposing you do not, then they will think, `Oh, he's

a useless fellow, he'll have to beg on the street.' " Immediately, he'll change.

The handling of the children is very important. Innocence is to be handled in a very delicate manner as you would handle a beautiful flower. It's a flower. As flower has fragrance, also innocence has fragrance.

Now this Gaṇeśha was made out of the Mother Earth. He was made out of Mother Earth. Mother Earth is the essence of innocence. See this Mother Earth, we don't look after Her, we don't give Her water, we don't do anything for Her, but how She's trying to enrich our life; how She's trying to cool us down; how She works out for us things which normally cannot be improved. To respect this Mother Earth is very important for all the innocent people.

They do. I've seen children, they respect the Mother Earth. They like to play on the mud, they like to play on sands, they want to build castles and all kinds of things they do with the Mother Earth. But they are not attached, that's one thing. They are not attached. They'll build a castle. All right, finished, now finish this. Then they go to the airport, there they find something, they all join to make it a joy. Wherever they go they find it easy to make that thing for their enjoyment. To them, enjoyment is important. To them, yesterday, as I said time is not important. How much you enjoy is important. Time is a headache for the grown-ups. Children don't worry.

You take them somewhere in a nice place so they don't want to come away. You ask them, “Let's go home." “Why? For what? Why should we go home?" They can't understand. They love all that is natural, all that is

beautiful. They don't know the value in the money form. They know the value of something in the form of love.

Now, I've seen Myself, you see, if you give something to children they'll keep it there, even Sahaja Yogis and they'll show you, “I've got it." See the essence of Śhrī Gaṇeśha is pure love. The pure love of this Mother Earth created Śhrī Gaṇeśha, or Ādi Shakti created out of the pure love.

But surprisingly, Śhrī Gaṇeśha was created before the Mother Earth, so how it is? So first He was created only as the Logos, as you call it, or we call it the Brahma-nād, Omkāra. First He was created only as the sound of Omkāra. Then this Omkāra was covered with the Mother Earth to make Śhrī Gaṇeśha.

So, Omkar is so important because it has got in it all the three powers, A-U-M. A-U-M stands for the Mahākālī, Mahāsaraswatī and Mahālakṣhmī powers, all these three powers exist in this Omkāra.

So in a dormant form, we can say those three powers exist in Śhrī Gaṇeśha.

So when we try to harm Him, then we are harming the Shakti within us, which is Omkar, which fills the whole universe, which fills all the vibrations.

In the vibrations these powers move. These three powers fill up every vibration. That's why they know, they understand and they work out the whole thing in such a manner that supposing now somebody has broken his legs, take it like that. Now, I sit down here and give a bandhan. Immediately, immediately, a power is sent, immediately.

Somehow, it is faster than all your communications that you use and immediately things work out. How it works out now it's a very complicated stuff, but it's also very uncomplicated because it is the work of Śhrī Gaṇeśh. He's not interested.

You see, if there's any problem, All right, like making a little fort on the seashore; All right, we'll melt it, finished, back again. He's not attached.

So what should we do to show our gratitude to this little child? Supposing you say to a child, “Thank you." He'll say, “Hey, what did you say?" Won't understand, children don't understand why should we thank them. We teach them to say “thank you” so even if they have to say sorry, they'll say thank you because they know only one word, “thank you” so they say “thank you." Now these children, how they play in the same way this Omkāra plays, most detached, as they call “Nishkriya", to the power; means doesn't do anything. Nothing, just paying attention. If somebody gets cured, gets saved, somebody gets vibrations, who does it? Śhrī Gaṇeśh. While He's not attached, He's not attached, He doesn't want any credit for it. It's His job. He will send one of the Ganas, all right go do [it] fast. They will run fast, more than any one of your modern, the most modern vehicle that you have as airplanes or anything.

Immediately, I'm telling you again, the word is that. Just as if you press the button, it works. But on some people it does not if they are surrounded by people who have no faith, if they themselves have half faith or something. He is the judge of your faith in the Mother because He has absolute faith in His Mother, absolutely.

In the same way, those who have absolute faith in His Mother, He looks after them. He really looks after them. Also He destroys.

Once a person told Me about a minister in India, he was a very nasty fellow, very corrupt, immoral, everything put together. He was going on, carrying on, but this was a nice Sahaja Yogi, a very good Sahaja Yogi, who told Me that this man has now started troubling him and wants him to do something dishonest.

I said, “Really?" I said: “Really?", here and there this great minister had to resign and go away. That moment. Is a fact. I can show you so many such things, but the faith of Śhrī Gaṇeśha is tremendous. He never doubts and He's not attached.

So many people sometimes, “Mother, you know we did this, we went there, we had to climb up so much and then we gave realisation only to one person." Finished. What's the use? Don't give any realisation. I have told hundred times to people, if you think you are doing any work, better not do it. It's no good doing such work. If you are attached to it, then better not do it. You do it for fun, just for joy, just for faith in your Mother. With this absolute faith you never feel fatigued, you never feel tired, you see, Śhrī Gaṇeśha's. All these bandhans, who carries? Śhrī Man Gaṇeśh Mahoday. He, with His big belly, just orders His people and these Gaṇeśhas, Ganas, are the most competent people you can find. You get Me any competent person, any scientist, no one can beat them.

How can they cure a person? Say a lady had a son in Mexico who was sick and he had a fatal disease which

was in their family but they always used to get it at an age when they were very old. But he was a young boy studying in Harvard. She wrote to Me three letters and in these three letters she was wondering, “What should I do? Should I send him to You?" And I was, you see, jumping from one tree to another tree and I said, “Where would you meet Me?" I just thought of it and fourth letter comes in that she took him to the hospital in Harvard University and there she took him to some other hospital and all the hospitals declared that he is absolutely all right, he's completely cured. But your faith, her faith, has worked. It is the Mother faith has worked for the son.

It's very easy to doubt Me, it's very easy. It's a slippery ground, I tell you, very easy to doubt. Because people doubt people for what they wear. Now they will say, “Why was She wearing such an expensive sarī?" This is a selection of Mister Guido The Great, not Mine. He forced Me to buy this. What can I do? I'm not attached, but to keep his spirits All right I wear it just to please them. Even children, you will be surprised, they feel very pleased if you do something that they like. They are very, very, I shouldn't say intelligent because I don't like that word very much, but I should say, very subtly understanding things.

One of My granddaughters, eldest one, she's a gem of a gem. I took for her a Wendy's house and she built it up. And My daughter is quite tall. She called her, “Mummy, come to my house." So this daughter of Mine went there and she entered inside the house and she broke the whole thing.

So My granddaughter came to Me, “See. Look at your daughter. You have taught her no manners of any kind." I said, “Why, what happened?" “She comes into my house and asks such an unmannerly question, `What have you got for me to eat?' Do you do that when you go into somebody's house? Do you ask such a question? And when I said, `You can't ask such a question in somebody else's house,' she laughed so much that she broke my house. Is this the way to behave? You have never taught them. Grandma you have taught us everything nice. You have never taught her how to behave when you go to somebody's house." You see? So innocent.

So innocent the whole thing was, that just to please her, even a small thing if you do, you can please them. Very small.

Now His power is Kuṇḍalinī. Well, this is another problem. She is the power of Śhrī Gaṇeśha and without Him She won't rise.

What a complication, now tell Me. Like, if my child says, “You can't go out of this house without asking me” so you can't just do anything, you are bound to the house.

So in the same way, without taking the permission of Śhrī Gaṇeśha, Kuṇḍalinī won't rise. It's very difficult, impossible I should say.

Of course, the Mūlādhāra will go on like this, pumping just like a heart, but it won't come up because Kuṇḍalinī would like to do but He won't allow Her to go.

Those who are immoral, those who have done immoral things and those who are spoiling the Gaṇeśha principle of others, are very difficult for realisation. But I have seen some people who have asked for forgiveness and the

Mother has told Śhrī Gaṇeśh to forgive, they have got realisation. Only that's the point, that if you approach through the Mother, He will forgive you. Definitely, He'll forgive you. There is such a nice relationship between the mother and child. That's something good, otherwise this fellow would have killed at least ninety percent of people in the modern times, you see.

So it is such a blessing, also, such a promise, that if we look after our Śhrī Gaṇeśh principle, keep ourselves clean, keep our eyes clean and develop pure relationships among ourselves, we'll have no problem of any kind. You'll have proper relations with your wife, proper relations with your children and proper relations in the family, proper relations in the society, proper relations in the politics, economics and all various areas in which you move.

Your innocence will tell you.

You might think that people are trying to befool you. Let them try and you see what happens. Let them try to attack your innocence and see what they get out of it.

It is such a blessing you all have as human beings, that your Mūlādhāra is so well developed and Śhrī Gaṇeśha is nicely settled down.

You all have got your realisation and now whatever we were enjoying yesterday, just like children, don't you think so? We had forgotten our age, everything, we were just like children enjoying everything, whether the dance were rhythmic, unrhythmic or inconsistent, we didn't mind.

Everything we enjoyed. No rules, regulations are needed for enjoyment. And this enjoyment, the source of this

enjoyment, comes from the innocence that we have within us.

Without innocence, you cannot enjoy anything with this mind and from this heart, because in the heart resides the father, Shiva. There are terrible people, snakes around them. Not easy, if you can stand on your feet for Fifteen years and go on saying, `Om namaḥ Shivāya, Om namaḥ Shivāya' then maybe Shiva might grant you some boon. The most difficult deity to please is Shiva. Though He is very innocent Himself, He is too innocent, so much so, just like a white cloth you can say, any bit of spot on your character: finished, condemned.

But even a Rākshasa stands on his leg for twenty-five years maybe and goes on praising Him, then He may forgive.

Śhrī Gaṇeśha doesn't forgive.

So the only person left to you is your Mother, who just forgives. I don't want to have any headache of this not-forgivingness. It's a big headache. If you don't forgive somebody, I get a headache, so I don't want Myself to do that.

So I just forgive. I forgive. I forgive all the Sahaja Yogis all the time. There have been some horrible, nasty fellows. I don't want to be angry with them because Gaṇeśha will just finish them off. Automatically, Gaṇeśha is doing something, but at least He doesn't do it so fast because they have called Me Mother and I respect it. Of course, they have been very troublesome, horrible, I know. I know why you are angry with them, but forgiveness is the best punishment by which they realise their mistakes

and out of Hundred, ninety-nine people will enjoy forgiveness than punishment.

So all this is done by Śhrī Gaṇeśha and He's all the time with you. Your Gaṇeśhas is awakened, no doubt. He's all the time with you, but some people have vibrations, they get realisation, then they are busy, say, if they are women busy with their children, they have no time for Sahaja Yoga. At the most, cleansing they will do, but for what? Why are you cleansing? Supposing this glass is cleansed, cleansed, cleansed and never used, what is the use of cleansing? They meditate for themselves, they cleanse for themselves, but never use their vibrations, never give vibrations.

How can that be? You have to give vibrations. If you don't give vibrations to others, if you don't transform other people, if you don't cure other people, if you don't teach them how to have pure love, what's the use of cleansing, coming to Pūjā, feeling nice, joyous? Finished. These are useless people, useless Sahaja Yogis. Gaṇeśha is not happy. How can He be happy? His Pūjā is to give realisation. That is His Pūjā. Supposing He is waiting there, say, for you to ask for His blessings. What is His blessing? Is to give realisation, to allow the Kuṇḍalinī to rise.

You ask for it and what do you get? You ask for your health, ask for this, ask for that. Why not ask, `Śhrī Gaṇeśh, make us good instruments of Sahaja Yoga. Give us strength to give realisation to people and talk about Sahaja Yoga.' People don't even talk about Sahaja Yoga. They are feeling shy. Why should you be shy? One day I was travelling by train, I met a lady, she sat next to Me

and she was following some sort of a cult. I don't know, some Muslim cult and the whole time she was boring Me. I started feeling sleepy but whenever I got up she was still talking about that cult. I said, “Sahaja Yogis will never do that." You must talk about it. You must tell people. You must go around. Don't be afraid, Gaṇeśha will protect you.

He'll help you, He'll be very happy. He'll work it out, everything for you. All problems can be solved.

Everything can be done. Believe in His power. Have faith in your Mother.

That is the message of Śhrī Gaṇeśha.

May God bless you.

Today of course I would like children to come up for the Pūjā, say, they should be all below six years, would be better idea. Say from two years to six years, we could have small ones. Or maybe eight years.

Then they'll grow up, I think, after that.

***Contents: 1996-09-19*, Public Program, Convocation Hall, University of Toronto, 31 Kings College Circle, Toronto, ON, Canada**

I bow to all the seekers of Truth. At the very outset we have to know that Truth is what it is. We cannot change it, we cannot transform it and we cannot describe it. Without knowing the Truth we can not solve any problem because we are in *[UNCLEAR* the/a] darkness *[UNCLEAR]*. It's very important, if you want.....

Unless and until you become the pure Spirit, you will not know the Truth. Only through the purity of your Spirit you can know the Truth. We see here beautiful flowers,

[UNCLEAR very] beautiful flowers and we take them for granted. We never even think how miraculous it is that different kinds of flowers are grown by the Mother Earth and how she has created all these colours and how they maintain their heights, all the shrubs and trees. We never even think about it; we take it for granted, but there must be some superior power which is doing all these things that we take for granted. If you ask a doctor, “Who runs my heart?" he'll say “it's an autonomous nervous system." If you say, “who's this `auto'“ that he'll be very honest to say, he doesn't know that one. They're honest, but they don't know.

So the second truth is, that all these miraculous things are done by another very subtle power which we call as the All-pervading Power of Divine Love.

Some people call it as Param-Chaitanya some people call it as Alakniranjana and some people call as Rūh. Whatever name you may give it's the same thing they're talking about that there is a power, power of Divine Love, which does all these beautiful things.

So the truth we have to know first of all that you have to become the Spirit.

English language as it is, is quite funny I must say, because Spirit can mean anything. Spirit can be also alcohol and also spirit could be the dead spirit, you see, ghosts or something like that. And could be the Spirit called that called as Ātmā, it's the reflection of God Almighty in your heart. In those [these] days of science people don't like to hear about God Almighty. Whether you like it or not, He exists, He exists, but because in His name all kinds of complications happened, all kinds of

wars and fights are organized, we'll start thinking there is no God.

It's not very logical, though, so now, how do we become the Spirit? It has been said in every scripture, for example in the Bible Christ has said “you are to be born again." Immediately people are so hypocritical, they put a brand, “we are born again” just a kind of a signboard. What does that mean when you are born again? All the Sufis of the world have talked about it. All over the world they have talked about it.

Now, what is that state when you are born again, when you become the Spirit? That is through these, fingers of yours you can feel this Divine Power for the first time. Mohammed Sāb has said that at the time of Qiyamah, that is the resurrection time “your hands will speak” and “they will tell you all about yourself, they'll give witness against you." But Muslims don't bother about that, neither the Christians when it is said that “you are to be born again” nor the Hindus when it is said that “you must to get your Self-realisation." Because all the religions have become very power oriented and money oriented, many people think they should not believe in God. And all kinds of horrible things we now hear about the people who are in charge of religion, we also feel disgusted. But whatever one may do in the name of God or religion that is not going to put any blemish on the purity of Divine Love.

So we are here, to achieve that state of Self-realisation, of knowing yourself by which the light comes in and in that light you see the Truth and we get all, which is very, very important in our life. You've been already told about

the subtle system that exists within us. We know about it in India, of course. I should say we knew, because now we are also very much enamoured by the modern thinking, but, it was not only in India.

I was surprise that I went to Bolivia and in Bolivia there are people who know about it. Bolivia, they talk about it and they told Me that “we knew about it but we did not know how to achieve it." Then I went to Kiev of all the places and they told us there were two saints who came from India, they told also the names of them, their names were Macchindranath and Gurunath and they told us about this. And they've got pictures, they've got paintings, they've got everything, all about it. But then it vanished into thin air or in the illusion you can go and see.

I was even surprised that when I went to Finland they'd given a picture of a Kuṇḍalinī. Thousands of years back must have happened, but Finland people discovered it very recently.

So this whatever I am going to tell you about yourself, this power which resides within you, has been known to human beings. But they did not know how to awaken this power which was dormant. At this time I call it special times these modern times as the blossom time. Because there are really true seekers of Truth. You don't have to go to Himālayas; you don't have to take Sannyāsa, nothing. This is the time when you are worthy of getting this. How many lives in the past you were seeking? And this is the time is already prophesized that many people who were seeking the Truth will be born as ordinary

human beings and they will receive their Self-realisation, is already promised.

The time has come for us. You are special people who are seekers. Now you can't pay for this. This I can't understand, how people think they can pay for something which is so spontaneous, natural and Divine? How much did we pay to this Mother Earth for these flowers? Did we? She doesn't understand money, as simple as that. God doesn't understand money; He doesn't understand banks, does He? It's our *[UNCLEAR* idea].

In the same way, if anybody say “I'll give you Self-realisation and the subtle knowledge, you pay me so much money” then know that he is a very great cheat. And so many cheats came all over the world, so beware of them. It's not just talking, giving lectures, mesmerizing, but it's a happening by which you are empowered.

You get your own power, which is your own; you are not obliged to Me, not at all. It's your own power.

It's dormant and when you get it you will know how glorious you are, what you have got it. First thing that happens when the Kuṇḍalinī pierces through the seventh center here. This is the actualisation of the baptism, it's an actualisation, it is not some priest putting his hand on the Fontanelle. It's an actualisation and you can feel the Cool Breeze coming out of your Fontanelle bone area. You can feel it, yourself.

You have to certify yourself and then you can feel, this All-pervading Power on your hands as Cool Breeze of the Holy Ghost described in the Bible. Then it grows,

gradually, it grows. When She passed through these different centers, She enlightens them, She integrates them. Now these centers are responsible for our emotional, for our physical, for our we can call, mental being. Mentally, is another confusing word you know. Because if somebody is mad they'll send him to the mental hospital. But mental I mean what we call intelligence bodhi.

So, this Kuṇḍalinī when She rises She integrates your personality, then she nourishes your being through these centers. I am not telling you lies; people have been cured by their own powers, not by anybody else's. All kinds of diseases have been cured, I assure you, for which you can't pay, again.

This Kuṇḍalinī is your own mother, She is your individual mother. She is your individual mother means she knows all about you. She knows your past, She knows your aspirations, She knows everything about you and She's your mother who is anxious to give you your second birth.

So, it's very important that if you are achieving the Truth, then you should not be aggressive about it; but be humble. It works out, She is your mother who gives you your second birth. Now, when she rises also, what happens that She creates peace within your heart.

We're not peaceful people, at the slightest pretext we get angry with people, we start shouting, fighting.

Why? It is because we have not felt the peace within ourselves. Those who are not peaceful within themselves cannot create peace, can they? They cannot create peace, just talking about peace you don't achieve peace.

I know people who have got many awards of peace also and you better reach them with a barge pole, very hot tempered, very, very hot they are. I don't know before getting the peace award they were we or not, but they are now, most of them, extremely hot tempered. It's very difficult to understand, from which angle they got the prize I don't know, but they did.

So, first of all, we have to be peaceful within ourselves.

So, when the Kuṇḍalinī rises, then what happens? We should watch our mind; mind is a myth, absolutely myth created by our own ego and by our conditioning. As we have created a computer, we have also created a mind, which dominates us. As the computer dominates us, this mind also dominates.

So how to go beyond the mind? What's the best way? Now what does this mind do all the time? It creates waves of thoughts, one wave rises then goes down, another wave rises goes down, another wave rises and goes down. It comes from the past or from the future, we are never in the present. If I say, you be in the present, you cannot, you cannot be in the present.

So, to be in the present, what has to happen? In between these thoughts there is the space which is the present when there is no thought.

So when the Kuṇḍalinī rises She elongates these thoughts. Like tired, you can say like tired animals and the thoughts fall off. And that's the time, we become absolutely peaceful without any thoughts. It's described in all the books, it's thoughtless awareness. Even Jung has talked about it, that we have to become aware, very aware, but thoughtlessly aware.

Now, see, I see a beautiful carpet lying here, now if I look at it, I'll say “Oh, what a nice one, now where do you get it?" If it is mine it is greater headache because I feel it might be spoiled and I should insure it and all that. But if it is yours still I will think “Oh, What a nice one, I should buy this one from somewhere." But supposing I am in thoughtless awareness. Then I just see it, just see it, I'm just a witness and all the beauty created out of this, just pours complete peace within Myself. The beauty becomes the peace. The peace giving energy and this is what happens automatically. You don't have think about it, it is spontaneous, Sahaj, `Saha' means within and `ja' is born, with you [within you it] is born the right to become a Self-realised personality, a Sufi, a saint.

It's not outward, it's not how you dress you up, it is not what you do outward. But it is something that happens within and you become a very peaceful person, you become a witness. Witness of the whole play and you just enjoy. If it is the ridiculous enjoy, you enjoy the ridiculous thing. If it is stupid, you enjoy the stupidity of it and if it is joy giving you enjoy this. This witness state is very nearby. When you cross this center here you become a witness, witness of the whole play, of the whole game and you start wondering.

What a drama it is, it's a comedy or a tragedy? But if you are involved in the drama then you think you are one of the characters and you start crying, weeping, doing all kinds of things and then suddenly the drama is over and you realise that “Oh my God, it was just a drama” same thing happens to you and you become that personality, that beautiful, magnificent personality; who sees the

whole thing, very wise, very penetrating, very deep, understanding and not getting upset or worried.

When you are in the traffic, you are afraid of it, but supposing you go, on some hill, you watch the traffic is going on. Or if you are inside the sea and there are waves high and low, you'll get worried, but supposing you get in to the boat, you enjoy all the waves. Enjoy them. But if you know how to swim, you can jump and save many.

In the same way it works out with you, your personality has to grow into that glow of divinity. It has nothing to do with your colour, religion, race. What else you divide, I don't know. People have divisions; you see they know divisive methods.

Somebody has say blonde hair, then that's another community altogether. Then somebody say has black hair, they have another community. Underneath this hair the same brain everywhere, you see, no difference. Underneath here, same heart in everybody but even if you tell them a hundred times still they are not going to believe in it. They believe that they are something different. You are not, you are all just the same, it's all skin deep but you discover not that you are not just the same, but you are all part and parcel *[UNCLEAR* of the whole].

You discover this. Through this. Because you develop a new dimension in your awareness. Which is the human awareness, which we call as collective consciousness. *[UNCLEAR* Samuni]. You become. You can feel others. You can feel the centers of others. Sitting down here you can know about anybody you want to know. Also you can

cure that person, you can help that person, you can correct those centers if you can correct your own and this is how it works.

Is absolutely scientific. Absolutely scientific. Surprising, it is very surprising, that in a place, I went to Leningrad for some specialists, they never had heard anything about Me or about Kuṇḍalinī but we had 2,000 people in the hall because there were allowed and 2,000 were sitting outside. I was amazed. I said “how are you all here?" Mother, it is so obvious and so evident. I was surprised this people so sensitive to spirituality. They would not like any false Gurus, anybody came there, no, we don't want *[UNCLEAR* all this to come]. How did they become such sensitive [people]? Because they were tortured, troubled, oppressed, had no freedom, so in their own introspection they were very mature, I must say. I just, even the scientist in this Russia; I tell you one day that country may rule the whole world, the way they are.

They didn't have this stupid freedom that we had. They didn't have all the good times we have had.

But they developed their inner being. And in that sensitivity, even their scientists, when I addressed them, they were about 250 of them. They called Me and I thought I better start on science, because they will like to hear about science, they said “Mother, No, no, don't tell us, now you tell us the science of the Divine” we've had enough of science.

That sensitivity we have lost, I think, in the West, very much, because we had so-called freedom which we didn't know how to use. In that freedom we lost, to have the freedom also we have to have maturity.

And we lost that freedom and that's why I find I mean, the maximum number of Sahaja Yogis abroad are in Russia and the minimum in America. And all kinds of stupid things they do, all kinds of stupid things.

I was wondering: What is the matter with them? Why don't they ask for reality? Why don't they take to reality? I couldn't understand.

This one fellow who said “I can make another man control his mind, alright." He asked one person from the audience, come along and gave him a pendulum in the hand, now hold it fast. He said, now I'll control his mind and he'll start moving the pendulum. My goodness, *[UNCLEAR* even...] all these people who have been to see him said, Mother we've lost our houses, our children are outside on the street, we cannot earn anymore. I said, “What happened?" They went to this man, who was moving the pendulum. I said, “Is that the worth of your life that you move a pendulum?" Have you come here, on this earth, to move a pendulum? And that's why you gave all the money. Then I realised that people think that the one who takes money must be the real person, imagine what an absurd idea.

So I have to warn you again, that you cannot purchase your Guru. You cannot purchase a person who is talking about the Truth. He doesn't care for money, doesn't want any money. How much money did we go for Christ? On the contrary, we sold him.

So, let us understand that this is something innately within you, which you have to achieve. Innately. And that you have to achieve, the Self-realisation.

There are so many things happened to you, so many things, that, it is not describable in this short lecture, but I know very great poets have come out of it, very great artists have come out of it. Musicians have come out it, but also most of the people who have come to Sahaja Yoga are very well placed in life, financially, because their attention becomes penetrating. Their intelligence starts showing business.

It's not like a man who is drunk, the way people think this is, but a straightforward. But still I find that in Canada is better, it's not that bad. I don't know how, maybe, because, you are basically farmers, maybe that's the reason that people are very sensitive and working it out well here. For you to respect yourself is very important.

Must suspect, once you get your Realisation and you should know how to use this power which is within you. If you know how to use this power which is within you, then you develop a complete confidence in yourself and you will be very different people, very different.

I've been here many a times and I'll come back again, I hope so. But one thing I must tell, first thing is you get your Realisation. In this hall there are many lights. And if you want to you to put on, only one switch is to be put on, that's all, you get all the lights.

So first get the light within yourself and then you know what you are. After that you must grow and you get all knowledge about yourself and about others.

Which is very easy and you don't have to pay for anything *[UNCLEAR]*. As simple as that. It will you take hardly ten minutes, to give you Self-realisation.

So those who don't want to have, can go. I've never seen like this before. First time I see people just walking off. If you want to go, you can go out, but don't disturb anybody. It will take hardly ten minutes.

[Trouble with the audio system:] I was telling it's better to give Me. There are always new devices coming out. Every time they develop a new system, I tell you. Is it alright? You say so, that might be the reason they are going. They can't hear Me. Now can you hear Me? This I know, but I don't know this one. Alright.

So now, the first condition is that we should be very pleasantly placed towards yourself. Absolutely, that means you should not feel guilty at all. For anything whatsoever, at this moment. Whatever has happened, has happened. If you feel guilty, then the center on the left hand side gets into jeopardy. As a result, this center doesn't allow the Kuṇḍalinī to pass through. Now, what's the use of feeling guilty? If you've done anything wrong, finished. Why torture yourself feeling guilty? If you are really guilty, you would have been in jail, not here.

So, be very pleasant towards yourself, forgive yourself completely. Also these days, it's a fashion, I tell you, to feel guilty for anything.

For example, sitting here people will feel guilty for Vietnam, I mean, you are not in Vietnam, this is all imagination, so please don't feel guilty. Now, this is one thing, the second condition is even easier, that you have to forgive everyone, without even thinking about them, so you have to just say in general “I forgive everyone” logically, whether you forgive or don't forgive, you don't

do anything, what do you do?,nothing. But by not forgiving you're torturing yourself.

So just in general, you forgive everyone, because it's a headache even to know that, those who are [have] troubled you.

So in general, you should forgive. For this center is very important of Āgñyā, is just placed like this, constricted, like a cross. And it has to open and it will only open if you forgive. Just to say in your heart just now, that I forgive everyone; just see the miracle of it.

You'll feel extremely light and happy about yourself, alright. These are the two conditions we have and if you have understood, please do it. Now, can I also request you one thing, is to take out your shoes if possible. In London, first time I asked English to take out their shoes and they walked off, you know; it was too much for them.

Alright, now let Me try, for the first time, I'm going to try this in here, it works very fast; I don't know, but we'll try, alright.

So now put please both the feet away from each other, if you are on the ground it's alright, it makes no difference. You can sit whatever [wherever] you like.

Now, put both the hands towards Me, like this. Now put the left hand, like this, further and put your head down and see if there is any cool or hot breeze like vibrations are coming out of your head, with your right hand. Now, don't put the hand on top of your head, you have bend your head, it's easier, bend your head and see for yourself if there's a cool or a hot breeze coming out of your head. Bend your head, bend your head. Now please change over.

Please put your right hand towards Me and put the left hand now on top of the Fontanelle bone area which was the soft bone in your childhood, now, sometimes it comes close to the head, sometimes away from it.

So you can move your hand up and down to see for yourself, if it is hot, then you have to forgive.

If you have not forgiven yourself or forgiven others, then it will be quite hot, so please forgive, now see for yourself.

Now, again once more, put the left hand towards Me, again once more and put the right hand on top of your head and see for yourself if there's a cool or a hot breeze coming out of your head. Bend your head please, bend your head.

Now, you can put both your hands towards the sky and now you can ask. Close your eyes and ask a question one question out of the three I am going to tell you, three times, can call Me Mother, or Shri Mataji `Mother, is this the Cool Breeze of the Holy Ghost?', ask in your heart, `Mother, is this the Cool Breeze of the Holy Ghost?', ask this question, or you can ask another question: `Mother, is this the All-pervading Power of Divine Love?' or the third question: `Mother, is this the Param-Chaitanya?' Ask any one of these questions three times.

Now, please take down your hands. Now, put both the hands like this again, little higher and watch Me without thinking. Just watch Me without thinking. Now, all those who have felt cool or hot breeze on their finger tips or on their palms or out of the Fontanelle bone area, please raise both your hands.

This is the first time you all have felt the All-pervading Power of Divine. May God bless you. I know some of you did not. It doesn't matter. We have a very good center here, we have very good people who know a lot and you should go there and they will tell you all about it. Expand your personality. Know about yourself, use your powers and you'll be amazed to know what you are, how glorious you are.

It's very amazing and what happens to you is that you jump in the ocean of joy. Not only that your attention is enlightened now, but you jump into the ocean of joy. And you'll feel very silent and peaceful.

But that's not the end of it. You have to become just a master and hardly will take a month to know about it.

Some of you might have got it already up to that point, but some of you may not.

So, just, one month doesn't mean that every day [UNCLEAR, every week perhaps they have a meeting] and please next time when I come, all of you should be there like big, huge trees of Sahaja Yoga. That's what I wish for you, all the happiness and joy.

May God bless you.

If you want to meet Me, you can come on stage, I would like to shake hands with you.

Contents: 1996-09-20 **Talk to Sahaja Yogis, Airport and Hotel, Pan Pacific, Vancouver, Canada**

[On Her arrival on Friday, when thanked for coming to Vancouver, Shri Mataji merely replied:] I had to.

[Comments. Warning: some of them might be from or 0922.] [The Chinese that She met in China She found to

be very considerate and attentive to Her needs. Like the Indians, they are very good business people largely because they do not drink.] [The upcoming presidential election in the United States does not offer any good alternatives between the choice of Bill Clinton or Bob Dole. Shri Mataji spoke disparagingly of the American president's wife, Hilary Clinton.] [The Western countries have an overproduction in manufacturing, This leads to problems, as quality is lost in assembly line methods.] [The wealth of many rich Americans is a facade. They have the appearance of wealth, but they are really in debt.] [Sahaja Yogis should trust the leaders that Shri Mataji has given them. There is no need to write letters of complaint.]

***Contents: 1996-09-21*, Public Program, Robson Square Conference Center, 800 Robson Square, Vancouver, Canada.....**

You are going to decide whether you want the truth or untruth.....

You are seeking your evolution. Not just talking. Not doing some course. But you are seeking your higher being, that you are not this body, this mind, this ego, these conditionings, emotions. But you are the pure Spirit.....

Not only are you seeking it for yourself, but for everyone who wants to have it.....

We are all in different countries. We are all brothers and sisters. We are all together, all relations.

Something happens to one person, the whole world knows about it So the loneliness of life finishes and you

enjoy the company of others. You can help everyone you want to help.....

You are Seekers of Truth.....

I am not just trying to praise you, but you are to be glorified and not to be made stupid fools.....

You jump in the Ocean of Joy. An d joy is singular, it's not like happiness, unhappiness... Everything that you see you enjoy. Enjoyment is such that you cannot describe. It is to be experienced.....

I wish some Canadians could go abroad to do this great work [of Sahaja Yoga].....

God has not forgotten us. We have forgotten [Him].....

Canada is one of the countries where I find that people are less than normal,..... take to it and find more like you and give it to them. You'll really enjoy yourself, no doubt.....

My message is that enjoy yourself Enjoy.

May God bless you.

Contents: 1996-09-22 **Shopping Chinatown, Showmart Wholesale Jewelry Center, Walmart and Sears in Capilano Mall and Birks in Royal Park, Vancouver, Canada**

I never worry about where I am going. I just enjoy. Wherever I go in Vancouver I feel vibrations.

[On the way to the north shore, the cars toured through Stanley Park. Commenting on the changing of seasons:] You have the nicest falls [autumns] in Vancouver.

[In Walmart Shri Mataji meets with two Sahaja Yoginis, Parry and Mahroo, working there. They leant their

assistance and spoke to Shri Mataji about spreading Sahaja Yoga among the Iranian people. Parry explained that she had wanted to come to the airport to greet Shri Mataji but had been unable and so was overjoyed to now be given the opportunity to see Her, Shri Mataji explained that:] It was your love that drew Me here.

Contents: 1996-09-22 **Conversation with Matt Malley in the Plane, Travelling from Vancouver to Los Angeles**

[In 1986 Matt Malley was very fond of a book of a false martial arts and Zen Guru who pushed him to get up in the morning and run far and fast into the hills of Berkeley, CA.] [In the flight, Matt Malley sits beside Shri Mataji. Out of the blue Shri Mataji says:] Matt, have you heard of a book called [name deleted]? Matt Malley [shocked and totally excited:] Yes Mother! It's my favourite book! I think that book helped me get my Self-realisation! [Shri Mataji is just looking at him with very wide eyes. Two days later, at the, Public Program in Los Angeles, Shri Mataji breaks his attachment to the book:] There is a book called [name deleted] and it says that you have to get up in the morning and torture your body! She told the audience.

Contents: 1996-09-24 **Visit to the Land of a Future Ashram, Topanga Canyon (40 kms W of Los Angeles), CA, U.S.A.**

[On arrival, Shri Mataji set in the car and some water was poured through Her hands onto the ground while Sahaja Yogis were reciting the Śhrī Bhūmī Devī mantra. Shri

Mataji got out of the car and stood on the land, surveying the possibilities. The first thing She said:] Shant, very peaceful. I'm very happy.

It's very joy-giving. It's a Divine gift.

[As She viewed the surrounding mountains, She commented that people should be able to see the mountains from the house that is to be built:] I live in the mountains.

***Contents: 1996-09-24*, Public Program, Los Angeles, CA, U.S.A.**

I bow to all the seekers of Truth. At the very outset, I have to tell you very frankly that truth is what it is. You cannot change it, you cannot transform it also you cannot describe it. At the most you can tell what it is. But whatever I am going to tell you here, you should not take it for granted, because as you know we have had lots of problems with the blind faith.

So whatever I'm saying is proved, then, as honest people, you have to accept it. Because it is for your benevolence, it is for the benevolence of your family, of your country and the whole world. What I am going to tell you is about the higher state of consciousness that you have to achieve through your evolution.

So far with your evolution we have not paid anything, we've taken for granted. Don't have to pay for it. That's one thing one should understand that it is spontaneous, Sahaja. `Sah' means `with', `ja' is `born with you', this right to be evolved, to be the Spirit.

So what is the truth? The truth is that you are not this body, this mind, these emotions, this ego, but you are

the pure Spirit of which you are not aware maybe. Now you see here, they have put it at My back, but you see, these beautiful flowers. We take them for granted; we never even think it's a miracle. Look at these.

So many flowers of different fragrance and different heights are coming up every day through the grace of this Mother Earth. But who gives this power to the Mother Earth? If you ask a doctor, “Who runs your heart?", he will say, very honest, he will say, “Is the autonomous nervous system." But if you say, “Who is this auto?" That he can't explain, that far he can't.

So I feel these are special times, very special times; I call it a blossom time when so many seekers are born to become the fruits. Honestly, they are seeking, honestly, but of course, they are mislead and are taken into some complicated life.

So this is the time of Last Judgment. Your discretion is going to help you. What do you judge as the best for you? And this way you will understand that all the scriptures have said, all the scriptures, that you have to know yourself.

Even Mohammed Sahib has said, “Those who do not know themselves cannot know God." We do not know ourselves at all. We know about everything else. People are Ph.D.'s, M.A.D.'s everything. But they don't know anything about themselves and the most important thing is that if you don't know about yourselves what are we doing about it? This is how the seeking starts and this is how people start seeking without knowing what to seek.

Now your country has one blessing, it has money, also a curse I should say. Because you have money all kinds of

people came in this country to lynch you completely. And they gave you completely wrong ideas about seeking. I must tell you something about them.

So you'll realise the difference between Sahaja Yog' and other nonsense. For example, there was in Washington: many people came after the program, were crying, “Mother, we sold our house, our children are out of school." I said, “What, what happened?" They said there is one gentleman, who has lynched us." “Who is this gentleman?" They told Me the name.

“But what did he do?" He said that “I can teach you how to control the minds of the others." Now why do you want to control the minds of others first of all?" And he called one man from the audience and gave him a pendulum and told him, “Don't move this pendulum; don't move." And the man started moving the pendulum.

So he said, “See how I am controlling him." So they became his disciples and all their money was lynched by him. I feel sorry. I asked them, “What is the value of your life? What do you think of yourself? Have you come on this earth to move pendulums?" I mean, think, God has given you brains to think. Who has moved pendulums before this? Did Christ do that? I'm just telling you because it's very important for this country. People get enamoured by all kinds of things which in India people will say, “Get lost." Firstly they don't have so much money to waste and they won't listen to such nonsense, all kinds. Now of course some are exposed, some are gone away, some are this thing, but some of them are still there. Like mushrooms, they come up again and again I find.

So I have to warn you all people that you are here to find the truth and reality. And that you can't pay anything for it. You are not obliged to Me. I am obliged to you that you are seeking, that's My job.

It has to be worked out. Unfortunately, in America we have very few people compared to other countries.

It's a very sad affair.

Because as I went to Boston the TV people asked Me, “How many Rolls-Royces You have?" I said, “I haven't any. I'm sorry. My husband has one single car. That's all. That's sufficient for us." So they said, “You mean You are not in the business?" I said, “No." “So we are not interested." How can you talk of spirituality when you have this mentality towards spirituality? How much did you pay to Christ, again? How much did you pay to Kṛiṣhṇa, or how much did you pay to Zoroaster, or to Moses? Anybody who talks of spirituality cannot be purchased and this is what one has to understand.

While even Dalai Lama, he came here and people are just giving him money. What does he do with that money? Do you find out? He is buying gold. What is the interest of a person who is spiritual in gold? What is the interest? But people don't think, I think the ego is satisfied, “Oh, I can give money to such and such person." If somebody begs they like it. I don't understand how can you blindly follow all such things. I don't want to talk about religions anymore because you know already the situation. Only thing I have to say is that all religions which were based on reality, on truth, on spirituality are today are nothing but money-oriented, also power-oriented and now find,

sex-oriented. It's a horrible thing to be done in the name of God Almighty.

So first and foremost thing we have to know that a new awareness has to come within us. It's not by chanting, by going into Himālayas, standing on one leg, or standing on your head you are going to get it. It is something within you, which is going to work it out. What did we do to become human beings, nothing. In the same way, I'm trying to tell you that it's all within you, it's there and you are going to get it. You have every right to get it. There is a appeal from Mother to Her children that they should try to understand what they want and what they should have. They have to evolve. They have to transform.

We talk of peace, peace, peace, peace, peace. I have met so many people who have got this peace award, really I tell you. Because of My husband's position, I had to shake hands with them also. It was bad and extremely hot and extremely hot-tempered, you know. My goodness, you can't face them without a barge pole. And they have got peace awards. What peace have they created? For those who are not in peace themselves, how can they give peace? The person who talks of peace should have at least a peaceful mind.

Now, so what happens when this Kuṇḍalinī rises? He has already told you that there are these Chakras and these three channels within you. And the Kuṇḍalinī which is sitting in the triangular bone is going to connect you to the All-pervading Power which does all living work. We've heard about it, but we have never felt it before that there is this All-pervading Power. When this Kuṇḍalinī rises, it's just like this instrument has to be connected. Otherwise,

it has no identity. All the time people feel, we have no identity.

I mean they change their cultures, they change dresses, I don't know, they do every kind of thing just to show they have an identity. But the identity of yours is only established when you are one with the Divine Power of love. And love is truth and truth is compassion. The compassion that acts that works is not just a compassion, but it acts. It cures people, it soothes them, it transforms them, it gives them realisation.

So when she raises, this Mother of yours, Kuṇḍalinī, I must tell you I was amazed that in Bolivia there are people called Hindos, From ancient times they know about Kuṇḍalinī, they know about the left side, they know about the right side, they know all about it. And they told that a deity, what you call Viṣhṇu, came on condor, Garuḍa and He brought this knowledge to us, imagine. Thousands of years back.

But I was surprised that in Kiev which is the capital of Ukraine, I went to see the museum, is full of paintings of Kuṇḍalinī and of the Chakras, different Chakras. I was amazed, how could it be? And then they said that 2,000 B.C. two saints came from India and they told Me the name and I was amazed how they knew the names of those people, Macchindranath and Goraknath. That time I think America didn't exist, otherwise they would have come here also and these two people went there and they taught them all about Kuṇḍalinī, but they said we didn't know how to raise, we didn't know how to achieve it.

So we just knew it, but we didn't know how to do it.

Same in India, Gñyāneśhwara has written about it. But much before that, thirteen thousand years back, another saint, Mārkandeya, has written about it. Then in the 6th century, Ādi Shañkarāchārya has written about it. And it has been written by many people in the 16th century, so many saints have written about. In the Bible, also it is there that, “I'll appear before you like tongues of flames” and these are the Chakras that you see.

In the Bible, you know, Mister Paul has done, I think, some mutation, some sort of a trouble is there.

Because Christ must have told a lot of things about it. I don't find them there. I'm surprised because He was according to us was an incarnation and He knew so much that I'm sure He must have told a lot. But as you know there was a big fight between Paul and Mathew and all of them and in that problem some things were missing, same about Quran. Quran was written after forty years the death of Mohammed Sahib, forty years. How can you remember this Quran for forty years? He did not know how to read and write. And His friends also did not know.

So His friends' grandchildren was used by another horrible fellow called Mowaja and he wrote the Quran.

So that is how, you see, a book is there. People are bound to the book. But how far there are truths in it and how far they are missing, we cannot know. But still truth has its own styles, you see, it slips into some crevices and shows itself.

So even in the Bible or Quran we see lots of things which shows what we have to do.

Christ has said, “Know thyself." “You are to be born again." So nicely, we put a brand: born-again. How are

you born again? You join an organization, become born-again, you are not. I'm sorry to say. A born-again must have the Kuṇḍalinī coming out of the fontanelle bone area, which is the actualisation of your baptism. Otherwise how are you born again just taking a brand on yourself, born-again, born thrice, born five times. But in Indian philosophy we know.

Because we call a person who is realised Soul as Dvijaḥ means born-twice and also a bird is called as Dvijaḥ. Means a bird is as an egg comes in and then becomes the bird. In the same way a human being is like an egg, has limitations and then he becomes like a bird.

So both are called as Dvijaḥ. But it has to happen. You cannot just brand yourself that I'm a Dvijaḥ.

You see, in that you get powers. And the first power as I told you is that of compassion, compassion that acts. That power comes into your hands. You can feel this power of compassion in your hands. For the first time you feel it. Now Mohammed Sahib has said it that at the time of resurrection your hands will speak, your hands will speak and will give witness against you, means they'll tell what's wrong with you. Also they have said that on your palm you will know the truth. This is exactly what Sahaja Yoga does to you.

So when She rises, She gives so many blessings; She is your mother. She is your individual mother; She knows everything about you. She knows about your past, about your aspirations, She knows everything.

And She rises with that understanding that this is My child, he is a seeker and he is to be born again.

And sometimes it's like a jet I've seen. Thousands of people get realisation. This is the special time of resurrection. And that's the first thing that happens to you that you feel the Cool Breeze of the Holy Ghost on your finger tips, Cool Breeze out of your fontanelle bone area, firstly. Now people start looking, if it is the air conditioning. It's from your head it is coming, not from air conditioning.

First thing is this that happens to you. But the second thing that happens that people who have come to Sahaja Yoga have become extremely creative. We have heard of Matt Malley now. He is one of them.

So many people have become great musicians and artist and this and that. Because you become one with that Divine Power which is the source of all creativity. Then you become a person who is a satisfied soul. You know economics very well which says that, `Wants are not satiable in general.' Today I want a carpet, all right buy a carpet, then buy a house, then buy a car, then buy a helicopter, go on buying. With the one I bought already, I'm not satisfied. They are never satiable; in general they are never satiable. But then you start enjoying, you buy a carpet. All right, you enjoy it. Now let's enjoy the carpet I bought.

Then you buy something then you enjoy that, whatever you have, you enjoy. But what you enjoy the most is the company of other realised Souls, such friendship, such oneness. No quarrel, no fights, no leg-pulling, nothing. Leg-pulling is there, I must say, a little bit. They joke around. We get people from so many countries in India living in a place, I would not say very good, but they love

it because there are Sahaja Yogis, so many of them and so much love, so much compassion, so much understanding. The whole world as if has become their own.

So the, another thing you develop is the collective consciousness about which Jung has also said it because on your fingertips you can feel the centers of others.

So you are collectively conscious. You know what's wrong with another person, you know what's wrong with you. If you can correct yourself, you can correct everyone. And this is what is the power you get very easily. You don't talk what dress the other one is wearing, what sort of a hair do he..., nothing. What you say: how the Chakras are, what is the situation of the Chakras of that person. Then you start facing yourself without introspection.

Somebody says, “Mother, You know my Chakra is catching here. That means I'm getting egoistical” but nobody says that otherwise.

So you start facing yourself, understanding yourself, correcting yourself without any difficulty. Is a very simple way of doing it. Sahaj also means spontaneous and also means easy.

Now another thing that happens to you is that you become thoughtlessly aware. Patanjali has talked about it. Now what happens that you are all the time thinking. Now this mind is a myth created by you. Is like a computer that you have created by your conditioning and your ego.

So you can be only in the past or in the future, you cannot be in the present. The thoughts are coming from the past and the future. But if I say, “You be in the

present” you cannot be. It is not possible. You cannot be in the present.

So when the thoughts rise and fall, rise and fall, rise and fall, you are jumping on the cusp of the thoughts. And when Kuṇḍalinī rises, she elongates those thought and you become silent, no thoughts. If you want to think, you can think, but otherwise no thoughts. As given this power, you start witnessing the whole world as a drama. You don't get involved into it and you can solve the problems much better.

For example, you are out of the traffic; you can watch the traffic, all right. It cannot touch you or if you are standing in the water, you're afraid of the waves, but supposing you get out of that, sit on a boat, then you are enjoying those. But supposing you know how to swim, you can jump and help those who are getting drowned, this exactly what happens to you. You can save others, you can give realisation, you can cure their Chakras.

I must tell you today that America is this center. We call it the Viśhuddhi. Is one of the most important centers, it has got sixteen petals. Today only first time I'm telling you openly. As a result, communication has to be absolutely Divine. You develop Divine communication. Sitting down here, you will know about people. You can help sitting down here. That's the power you can get if this center is cured and that is this America. It goes to all the places to cure this thing, that thing does it know. No other country does that kind of a job. Why America does, because it is the Viśhuddhi Chakra. That's the nature of that particular country which does that job. But if spirituality comes into it, then whatever they will do, will

be benevolent, will be holy, would be blissful. This is such an important center that though in America...

Of course, I mean, people ask Me, I don't know what to say because there are very few deep Sahaja Yogis I must admit.

In Russia somebody asked an American Sahaja Yogi, “How many deep Sahaja Yogis you have?" in Togliatti.

So he said, “We have fifty-six." He said, “Oh my God, you have fifty-six thousand? We have only twenty-one thousand in Togliatti." It's a serious matter. You are responsible for the whole world because this is the center you occupy.

You must have respect for yourselves, must have respect for your being and must evolve and take up the responsibility in a proper way, in a judicious manner.

All the time if you read the newspaper... I mean, you don't understand: criticising this, criticising that, criticising that.

So many critics, ultimately the critics start criticising critics. It's a mad world, I feel so. And because of your country all kinds of ideas have gone abroad. You must know this. Because you are supposed to be a very powerful country, very great country, whatever you do here goes abroad.

So you have to be very responsible. That first of all you must know what you are and you have to evolve into it, you have to develop and mature into it. That's why since long I've been coming here every year.

No I mean in the beginning I came and I got a fright. I said, “What's going on here?" So for nine years I didn't

come. I must confess I didn't come. I thought, you know, how can you talk to them? Is just, they don't understand Me. There are all kinds of funny people going around, you see and I didn't know what to say.

So I didn't come for nine years, I must say. But every year I'm coming here just to see that you know what you are, what is your responsibility.

There are sixteen petals for this center. Sixteen petals it has got and these sixteen petals are responsible for our, physically I'm saying, ear, nose, throat, on a physical level. But the same center, you see, is occupied by Śhrī Kṛiṣhṇa. And He is the one who becomes here on this center what we call the great, the great universal being, Virāt.

So we have to understand that it's not Christianity or Hinduism or all this nonsense is giving you spirituality. Your own Self-knowledge is the one, which you can all of you have, grow into it and develop.

This responsibility is very great on Americans. Of course this is the center of Christ where Optic Chiasma, where the two optic nerves cross each other, this is the cross, which He has crossed for us. Now all of them have worked very hard for you. On every center, they have worked very hard. Only thing is now we don't have to work hard, do anything but to accept Self-realisation and grow into it. Of course, now, as there are many people you see here. They come, they get realisation and then they are finished. That reminds Me what Christ had said that some seeds just sprouted and died away.

It's a very important time in the history of humanity, in the history of spirituality. And this has to happen to you.

Till I live I'll come to America to work hard. Now the amount of advertising done I was really shocked. Poor Sahaja Yogis said they have to be, “Bum, bum, bum, bum, bum, bum, bum” *[UNCLEAR* wah] and nonsensical things go into our heads very easily. And something real doesn't attract our attention. This only happens in America, nowhere. Is a typical. Because they have no understanding, as to why they are here. All the way they'll come, now they'll go to another, some Guru speaking there, the Guru-shopping very common here.

So I have to tell you very frankly that in Sahaja Yoga you have to grow. You have to grow that's all, nothing else. You don't have to pay for it. First of all I must tell you. They said if you don't have to pay then there's no credibility. What a mind it is? I tell you. And all kinds of things they have told Me. I was shocked Myself. Because in India if some Guru asks for money, they say, “You get *[UNCLEAR]*." But here if you don't ask for money, they say, “What is the credibility?", because they can sue a person.

They have all made lots of money, one are better that the other. I need not tell their names.

So like that, so responsibility of yours is to understand that you are the ones who will get the blessings for the whole world. This bliss you have to get yourself and give it to others. You can do, it's the Americans they are duty-bound, they are duty-bound. And they have to do it.

The first place I visited was America I told you. But for nine years I didn't go. I said, “Let them grow, a little mature." In nine years all these Gurus came and I don't know what they did to you.

So try to understand, you have to know the reality. As a result, what happens? All that is hanging around us, jealousies, attachments, all kinds of things, all drop out. You get detached but that doesn't mean you go to Himālayas, leave your wife. When you are not attached to anything what are you going to leave? Because you are attached, that's why you say, “I leave this, I leave that, I leave that." Like Hare Rāma people, you know.

They told Me that “Mother, we have given up everything, we've given up house, we've given up this, given up that. And You are such a spiritual lady, why do You wear this way?" I said, “We are supposed to wear in My family, supposed to. I'm a family woman." “But we have given up our family, we have given up everything." I said, “But I would request you one thing. Whatever you think in this house, because I come from a royal family, so we have lots of, you see, antiques things and all that of My fore-fore-forefathers, whatever you think equal to the dust particle of Śhrī Kṛiṣhṇa you take it away, but should be equal." Now they started looking at this and looking at that. “We can't find anything equal to that." I said, “Then what have you given up, stones? What have you given up?" So this idea also that you give up that and wear some clothes and this is all nonsense. This happens within yourself, all this dress and all this hypocrisy. Why to proclaim that you are a Sannyāsī or, or you are something? For example, another one I met in Chicago that was another one I must tell you.

So he was wearing a very thin dhoti, you know, very thin. And it was so cold I was also shivering. I said, “Why are you wearing this dhoti?" He was head of that

organization. He said, “Because my Guru has told me that you must wear a dhoti if you want to go to heaven." I said, “Really? In My country eighty per cent people wear nothing but dhoti, so they'll go first." And then the second thing was even more ridiculous. He had shaved his hair completely. And they can buy in the market this, I don't know what you call this in English, pigtail? Ya. And I said, “Why have you shaved your head? You are a young man." He said, “My Guru has said, `If you have not shaved your head, you cannot go to heaven.' " I said, “Really? Why? There are no barbers or what?" On this Kabīra has said very nicely that “If by shaving your head you can go to heaven then what about the sheep which is shaved twice a year?" All this has been said, done, but we don't understand. They gave mantras for three hundred pounds.

Can you imagine? What mantra? Inga, pinga, tinga. Now ask any Indian, he'll laugh at this. But tell it. Inga means the scorpion bite and pinga means: when a person gets possessed, he moves like that and tinga means showing like this. Now what do you say? And people are doing, sitting down, inga, inga, inga, pinga, pinga, pinga, tinga, tinga, tinga. More in America, America which is the highest in every estimate.

They should be the first to receive. But see, all such people have been befooling and we accepted.

So your attention itself becomes enlightened, attention. Your attention becomes absolutely pure, innocent.

Innocent is never lost, remember, never lost.

Some clouds are there, but is never lost. And the innocence comes back.

See Christ has said, “Thou shalt not have adulterous eyes." Meaning no lust and greed in the eye, have you met anyone in the Christian nations with that peaceful eye that Christ has asked? That happens to you. You will just become that. Your eyes get a glint, a kind of a shine and you do have become now, you can't turn your eyes like this all the time. You just get beautiful eyes, which are innocent. And a person who has this glance even once looking at a person, can give realisation, can give peace, can give joy.

Ultimately, what happens is that we jump into the ocean of joy. Joy is not like happiness, unhappiness.

It is singular. And you become extremely joyous. At the ridiculous things you are looking but you don't feel upset with it because you know how to cure it. You see something very much beautiful, you are joyous.

It's a personality that you all have in a potential state, which has to be brought out. For that you don't have to give up anything. Whatever is not good for you, you will yourself give up. I never say, “Don't do this” because if I say that half of them will walk off. But you jolly well do it yourself because you are in joy. You don't want to have all these things around. I never say, “Don't do it”, never.

That way Americans are not such complicated people, I know, but they have been complicated by these false Gurus. By sense they were complicated, these false Gurus should never have stood here. And that's the reason I've told you so much about them because I want you to get out of the entanglement of these things. But that doesn't mean you should feel guilty by any chance. Please don't feel guilty. Forget My lecture. Don't feel

guilty. That's very important that you have to have respect for you. You have to know that you are the spirit and spirit never feels guilty. It's a fashion also. To feel guilty is a fashion. But do you know by feeling guilty this center goes out of order. With that, you get what you call spondylitis, the horrible disease. You see people with the neckline walking about like dogs. That is due to this center where you feel guilty. All the time, it's a temperament. I don't know why. It's a culture to feel guilty all the time. It's a fashion I should say. Now please, you are human beings. If you are guilty, you would have been in jail. Why are you here? So please believe in yourself, have faith in yourself. You are not guilty.

Many people say, “Mother, I can't get over it." Means what? It's done long time back, finished, you can't correct it, do anything, only thing: `I'm guilty, I'm guilty.' You're standing like this. But another disease you get is angina, very common in this country.

Third disease you get could be breast cancer or could be also lethargic organs.

So first thing, you do today here when you are sitting with Me, not to feel guilty about yourself. That means you forgive yourself completely, forgive. See those people who say you are sinners and all that themselves must be sinners. How do they know you are sinners? If they have not committed any sins, how do they know you are a sinner? So don't believe them. Know that you are not guilty at all. All right, that means you should be pleasantly placed towards yourselves and forgive yourself.

Now second thing is even simpler, to forgive everyone, not thinking about them. Because if you think that's a headache also. Logically whether you forgive or don't forgive, you don't do anything. What do you do? Many people say, “Mother I can't forgive." So what? You are punishing yourself. The person who has wronged you is very happy and you are punishing yourself. What is the use of not forgiving? And logically if you just think, why to trouble yourself and torture yourself like that? So also you have to forgive yourself and others without thinking about it. Because this center is like a constricted cross, like this, absolutely.

And unless and until you forgive, it won't open. If it won't open like this, how can the Kuṇḍalinī pass? But if you forgive, it will open. Same here if you forgive yourself, this center will open.

So simple as that, very simple. The whole thing is very simple.

Again I have to say that I cannot force Sahaja Yoga on you, it's impossible. You cannot force because it is a living process of evolution. At human stage, it cannot be forced.

So if you don't want to have, I would request you to go from this hall, it's all right. Only people who want to have their realisation can get it, otherwise cannot get it. It's a very simple thing, it's within you, it's your own power which will glorify you. I will let you know that what I am saying is the highest thing you can achieve in life.

So I'll wait for a few minutes, one or two minutes, to see those who have to go can go. In the meanwhile, I would

request you to take out your shoes because that helps us.

Contents: 1996-09-25 **Iranian, Public Program, Los Angeles, CA, U.S.A.**

[Introduction in Persian language by Majid Golhpur.]

Shri Mataji: They all understand English well?

Sahaja Yogi: Yes, I think so, yes.

Shri Mataji: It's all right? Of course I can't speak American English well.

I'm happy tonight you have been able to come back again and it's a great pleasure for Me to see you here, because last time I was quite in a hurry and same thing is happening today. The program was arranged actually day before, but you had some festival.

So it was postponed for today and I'm booked to go tonight to New York.

So I'll be quite short in My speech.

So to begin with

I bow to all the seekers of truth.

First of all you must know that you are seekers and seekers of truth and not of untruth.

So one has to know what is the truth? Whatever I am telling you, you don't believe in Me, no, because blind faith has really created great problems today. If people didn't have blind faith and if they were enlightened there would have been no problem whatsoever.

So first of all the truth is that you are not this body, this mind, these emotions, this ego, but you are the pure Spirit. It is not only I'm saying, is said by Abraham,

Moses, by Christ, also it has been said by so many people who were saints in India. Apart from that Mohammed Sahib has said very clearly that, “If you do not know yourself, you will not know God." It's clearly said, “You have to know yourself." But as you know, none of these books to which we are bound are written by people who have started the religion.

In the case of Mohammed Sahib it was after forty years his death that the book was written by one horrible fellow called *[UNCLEAR* Mobaya]. He was a hater of women and he tried to change as much as possible. Still there are lots of truths in it.

So another truth that is in the Koran also, what Moses has said has been many a times written, rewritten. But Mohammed Sahib has written very clearly that, “When your resurrection will take place then your hands will speak and will give witness against you", that is what that they will tell you what's wrong with you. Your hands will tell, clearly! And that to know the truth you will feel it in the palm here, when you ask the question to the real one, you will feel the answer here.

All these things can happen only in Sahaja Yoga, in no other way, whether you are a Christian, Hindu, Muslim or Jews. We must know that we have to still step one step forward, we are not yet complete Jews, Christians, Hindus or Muslims. And that step is that we have to be born again, but it is not we are born again like the people you see, just they have a thing written down, you know, they call themselves `born again'. Anybody can say themselves `born again'. It's not like that.

We call ourselves Jews or say Muslims or Hindus, but still we are not fully that. Because a Muslim can commit any mistake, he can do any wrong. Jews can do also any wrong, also the Hindus and Christians.

They'll go to church, come back home and do some sort of a nonsense. All right? Then same about Jews and same about Muslims, same about Hindus, that means what they say, what they preach they do not practice. For which I do not blame them, because they haven't got that personality, that strength within themselves to follow it fully. There's something lacking! Like a transport minister from India came to Me in London and he asked, “Now You solve my question." I said, “What is your question?" The problem is, that the Sikh people of London refused to wear a shield, what they call, I don't know what you call here, for the motorbike people, the steel one? Sahaja Yoginis: Helmet, helmet.

Shri Mataji: Yeah, yeah, helmet.

So they said, it's not allowed in our religion. At the time of Mohammed Sahib there were no motorbikes, so He did not write about it.

So it's not allowed in our religion to wear this, because Nanak Sahib did not ask us to wear.

So He said now how to answer this question tell me. I told him it's very simple. In their book Granth Sahib is clearly written by everyone that you should not drink alcohol, clearly.

So you ask them out of all of you who does not drink the alcohol at all can do without the helmet and they couldn't find even one person in London or in England who was not drinking alcohol. They claimed they are Muslims and

they were doing the thing which was completely forbidden to them. Then I said, they are not Muslims, because they were alc[oholic]... they drink alcohol.

And they drink so much sometimes that even the people of Scotland are frightened of them. [Laughter.] It's very surprising. Now these are the Sikhs, then the Muslims are not supposed to drink, either. But the way they can drink, you know, because they say, we are this, we are that.

These religions are based on books, the whole knowledge is in the books, not in their character. And they're all the time trying to find some sort of an excuse, to do what they want to do. But why, what is the weakness in human beings that doesn't allow them to follow their religions properly? And the weakness is that all the human beings who are following these religions are seldom enlightened. They haven't got enlightenment as yet. In every scripture it is written that you have to have enlightenment.

Now what is enlightenment, is what Majid has told you. This is a knowledge, it was known to Indian people long time back, I would say to the saints, but even those saints who had this knowledge were tortured, beaten, killed, all kinds of things they did to them. Is anybody who tells the truth has to be killed by people who do not know the truth, because they are blind. Instead of knowing it, instead of learning it and improving the quality of their life they just want to torture them. It's a common practice.

Who was not tortured? Even Moses had to go to India and he died there, is a fact and I have told about this long, long time back, now people are talking about it.

And so many Jews also went to India and they are still called as Jew, like Lakshman-Jew, Nehru Jew, they're all Jews who settled down there as Brahmins. They don't know what are they supposed to do as Jews. Now it was Moses who brought, if you have read [UNCLEAR... maya], what we call *[UNCLEAR* ir-maya] in Hebrew language. He was the one who saw the people, when He came down with His ten commandments, that they were completely decadent, absolutely decadent in the worst possible position of sins.

So it is He gave this Shariat, He said Shariat should be applied to all the Jews, but I think Jews were wise enough not to accept it.

So the Muslim said, “All right, why you cannot do it, we'll do it." So they took over and that's how this religion started working on fear. Not in freedom, because you are born to a Muslim family or to a Christian family or to a Jew family you become that. Then a fear starts, I belong to this society, how can I become something else, how can I know something else, how can I read anything else? Still I must say, among all these, Jews are the most open-minded people, surprisingly. They read about all the religions, they read about other knowledge also and they want to know about other knowledge.

Maybe they are seeking.

Now whatever has happened so far, say in Germany, what Hitler has done, because he got a concept that Jews are to be thrown away, because he is a special race, calling himself Arian. And later on people started saying that Germans are the highest race, actually the psychologists also, because they have better brains.

Those who can kill small children in the gas chamber, how can they be the superior race? Superior race is that of people, who are saints, who do good to others, who are benevolent to others. They are the people who are superior, not those who try to destroy and to bring in bad things.

So this thing happened at that time. He got this idea into his head and he started misbehaving, in a way it was too much, I should say.

But when the Germans came to Sahaja Yoga they were very different people. First time I went to Russia and twenty-five German Sahaja Yogis came rushing to Russia. And I was very much touched by them. I said how are you here? They said, “Mother is it not our responsibility? So many of Russians were killed by Germans, is it not our responsibility?" Then the same Germans now, you'll be surprised, are going to Jerusalem and they have started a very beautiful center and the people are coming to them and they are more than what we have here, you'll be surprised.

Such a nice center they have started for people, because everybody wants peace, everybody wants to lead a good life, everyone wants to have a beautiful family. That's the desire if you see inside, everybody wants a benevolent beautiful society. And when these people went there, they were Germans, so called and when they talked about Sahaja Yoga, gave them Realisation, so many Jews are now changing and are becoming very beautiful people.

All your problems will be solved one day, once the Jews get their Realisation and understand and also Arafat, I'm

going to give him Realisation. Poor fellow is trying his level best, but what can he do? The first country I visited was Iran. Now you'll be surprised, first one. And I gave Realisation to some people there. That time it was all right, but then this ayatollah came and a new type of regime started. A very fundamental regime and the Iran which was once upon a time a great country is going to dogs, it's in very big trouble. Now by hating Iran or Iranians people are not going to gain anything. By saying that Iran should be banned and doomed it's not a good way. On the contrary, if Irani[an]s take to enlightenment, they will change definitely. It's all out of fear people behave like this. When there is fear people behave like this, but when there is no fear there's love and compassion.

And this can only be removed, if people get their enlightenment. This enlightenment is within you, as he must have told you about all this. I must tell you, that this Kuṇḍalinī of course was discovered or maybe has been described thousands of years back in India. But imagine, in a place like Bolivia they have a community called *[UNCLEAR* Hindosh] and they know all about Kuṇḍalinī, also they know about the left and right side, everything whatever Majid has told you. But they do not know how to awaken the Kuṇḍalinī, they don't know this. Then I was surprised, I went to Ukraine where the capital is Kiev. I went to see the museum and the museum there are pictures of Kuṇḍalinī and pictures of these Chakras, very well done and description of the Primordial Mother. They all believed in the Mother but I don't know how

somehow or other these people managed to keep out the Mother part of it.

In the Christian Bible they described God the Father, God the Son and the Holy Ghost, which is a dove, because Paul didn't want to talk about the Mother. He didn't want to talk the power of the Mother.

So he didn't describe and like that in every religion I find this kind the woman is treated as something rather low. Then came Mister Freud, also he was a Jew, imagine! And he challenged all the morality of the world. I don't know why he did it, putting the mother into a very sinful attitude towards her child.

Now we see the results of that, you must have read so much what's happening to our young girls. But according to our Indian scripture woman is the power. Mother is the power and she should be respected, not like Islamic think. But even in the Islam, you'll be surprised, Mohammed Sahib respected women very well. He respected Christ and specially for His Mother He has written very beautifully that this woman should never be challenged for her chastity, very clearly, with such a respect He has written. Even Paul didn't write, Paul calls her just `a woman'.

So when I came to West I find, of course in Iran same thing, the woman had no position. She had no position in the society and I was amazed how could they accept all these things so blindfolded. Actually we have to understand that this Kuṇḍalinī is your own Mother, She has been with you in your past, She knows all about you, about your aspirations, about your future, everything She knows and She is just waiting for an opportunity to give

you your second birth. Now think how a mother behaves, but She is a Holy Mother. She has no hatred for you, just love and love and love. She wants to give you self Realisation.

You are all out of Iran now and you are here in this country, you are Americans maybe all of you.

So the responsibility on you people is much more. You people have to get your enlightenment and all those who have come here, you can enlighten them and you can save their lives, no doubt.

This Kuṇḍalinī awakening has been said, as, is the last fontanelle bone area from where it pierces through and this is the actualisation of baptism that takes place. An enlightened person in a Sanskrit language is called as `Dvijaḥ', means `born twice'. It's not just anybody can call himself `second birth' or `I'm born again', but a person who is enlightened is called dvijah-ha meaning `twice born'. And a bird is also called dvijah, because bird is first an egg and then it becomes a bird. In the same way we are limited by our ignorance, absolutely we do not know anything about ourselves.

So we have to break our Sahasrāra, this part and become one with the All-pervading Divine Power.

So the second truth either, you see these beautiful flowers here, it's a miracle. In the same way if you ask the doctor who runs your heart, he'll say it's an autonomous nervous system. But if you say, “Who is the `auto' ?", he can't answer. This is what you have to become. Then when this Kuṇḍalinī rises, She connects you to the All-pervading power of Divine Love which creates all these living miracles. It's called Ruh, it's called

Param-Chaitanya, it's called as the Cool Breeze of the Holy Ghost. This has to happen.

You will see with this, you will absolutely relax. Your talents will grow. Yesterday we had a very well known artist here who was just an ordinary person, has become a, now, a very famous musician. We have many artists, many orators, many writers who have got a new dimension of creativity. Then comes where you feel absolutely satisfied. Not that you buy this, then you want to buy another thing, you buy another thing, buy another thing, you are never satisfied. But once the Kuṇḍalinī passes through this center, second Chakra, then what you get is a satisfying temperament. You're satisfied and you do not run after things.

[Aside:] Come in.

The greatest thing that happens to you that you develop a compassion which works, which acts.

Compassion that acts! Because your attention becomes absolutely pure. You'll be amazed, we cannot lose our innocence, it is never lost, it's eternal.

Some, there are of course some clouds, but once you get this awakening your eyes get a glint, a kind of a shining thing and your eyes become absolutely innocent without lust or greed.

What Christ has said, “Thou shalt not have adulterous eyes!" Now in these Western countries they were, they call themselves Christian nations, I haven't seen anyone like that. But that kind of thing happens to you automatically, spontaneously, Sahaj, that your eyes become absolutely innocent. And when you put this

glance onto anyone, such a person gets completely overwhelmed with joy, happiness and bliss.

But the greatest thing that happens to you that you become a peaceful personality, absolutely a peaceful personality. We talk of global peace, this, that, this and that, but if you are not peaceful within, how can you bring in peace on this earth? So actually what happens that we live in the past and the future and we're jumping on the cusp of the thoughts which are coming from the past and the future. We cannot be in the present. We cannot be.

So when this Kuṇḍalinī rises She elongates those thoughts, there's a space in between and that is where is the present.

Then you become extremely peaceful. Peaceful watching everyone like a witness. The whole thing becomes a drama, it's a drama going on whether it is ridiculous, whether it is tragedies or comedy. It's a drama! You are seeing a drama and that drama that you see, doesn't disturb you. You are absolutely peaceful within yourself. But when this state grows, wherever such a person goes, there's peace. Such a person emits peace and gives peace.

So many things can happen to you, I don't know how to explain in this short time, but the new awareness comes in within you which we call as collective consciousness. We become collectively conscious.

Means you can feel sitting down here the centers of others. If you can cure your centers, you can cure the centers of others and your brain gets so much enlightened that even a student who is not a very good

student becomes an excellent student. Your mind becomes extremely sensitive, but this mind that we know of is a myth, created by your ego and conditioning. But your brain starts emitting such knowledge to you that you are surprised how is it this knowledge coming to us.

In this short time now they have asked Me to finish the lecture and I have to have to catch the plane, so I hope you don't mind, but you better catch your enlightenment just now. It's very simple. You have to take out your shoes.

You have to know what glory you are, what greatness you are, you don't know! We have no respect for ourselves, that's the main point. Now please put both the hands towards Me like that, both the hands.

Now what I have to tell you that first of all, you should be pleasantly placed towards yourself, not to feel guilty, at all. You have done nothing wrong, why should you feel guilty? It's a fashion I think, just to feel guilty for nothing at all, because if you feel guilty, then this center catches. Here! Especially the Christians, they feel guilty. This Chakra, if it catches on left-hand side, then you get angina, one disease, spondylitis, another disease, and lethargic organs, third disease.

So why do you want to feel guilty for nothing at all, for something that has happened long time back, to get these diseases on yourself and pay doctors' bills? So don't feel guilty! You should be very pleasantly placed towards yourself. Be happy that you are here to get your enlightenment. Don't doubt yourself at all, you are all going to get it, no doubt.

So you please forgive yourself completely! Second thing is that you have to forgive others. Forgive everyone. It's difficult for Jews to do that, I know. They can't forgive. But by not forgiving, what are you doing? What do you do? Nothing. You are playing into the hands of Germans again, because you are torturing yourself.

So just forgive! Forgive! If you don't forgive then this center here, as you see on the Optic Chiasma like this completely constricted, it won't open. It will open only if you really from heart forgive everyone. Even don't think about the people whom you want to forgive. Just forgive, it will open. You feel much lighter, just forgive, because you don't do anything.

[Aside:] a little bit, all right.

Now, then these are simple things I'm requesting you to do. Only thing I have to tell you, I cannot force it on you, you have to ask for it, you have to ask for it, just you have to ask for it. Forget all your worries, everything and everything will work out. Just ask for it! Now, you can take out your glasses also, if you want to. Now you put your left hand towards Me and right hand on top of fontanelle bone area and bend your head a little bit. You must not worry about anything, don't have to pay for it, it's natural, it is living process, you don't have to pay for it, just will work out.

Bend your head. Now see, if there is a hot or a Cool Breeze coming out of your fontanelle bone area.

Please don't put your hand on top of your head, but away from it and some people get it closer, some people get it further, maybe hot breeze also coming.

Now, please take your right hand towards Me. Put it towards Me again, put down your head and please put your left hand on top of your fontanelle bone area. Now if it is hot that means you have not forgiven yourself, nor you have forgiven others, so please do it now! That's very important that it should cool down.

Now lastly, with the left hand, you just see if there's a cool or a hot breeze is coming. Left hands towards Me and right hand on top of your head, please bend your head and see now clearly if it's a hot or a Cool Breeze like vibrations coming out of your own head. Don't doubt that there is a air conditioning, it's coming out of your own head.

Mhm! Now, please put both your hands up and bend back your head and ask Me anyone of these three questions, one question three times. Any one! First is, you can call Me Mother or you can call Me Shri Mataji, `Mother, is this the Cool Breeze of the Holy Ghost?' Ask this question three times. Or, `Mother, is this the All-pervading power of Divine Love?' Ask this question three times. Or, `Mother, is this the Param-Chaitanya?' Ask this question three times. One question only ask three times, whichever you like.

Now, please put down your hands. Now, put your hands towards Me and watch Me without thinking, just watch Me without thinking. All those who have felt cool or hot breeze out the fingertips or out of the fontanelle bone area or on the palm, please raise both your hands.

You didn't feel? All right, you didn't feel? Answers: *[UNCLEAR]*.

Shri Mataji: Accept for one or two, all of you have felt it. May God bless you! For the first time you have felt this All-pervading power. It's there, it's Ruh.

You have been to some Guru? Some Guru you have been? No? I am sure, that's it, that's why.

So if you go to a wrong Guru, the Kuṇḍalinī doesn't rise immediately, but She will, all right? What's the matter, you never felt it? No? Are you a journalist? That's it. [Laughter.] I can understand! [Laughing.] Why only two persons didn't, because you meet all kinds of people in journalism and you don't know how to protect yourself. All right? But you should get it. The best way, to be the best journalist is to be an enlightened person, then you can see the person and know what's wrong with that person. All right? It's very important to add efficiency.

So may God bless you! I am very much thankful to you and I hope all of you will come to our center and grow. They had a big objection to Majid that we'll not have any such program, because they do not come, they just come as a fashion. No, take it up seriously, it's very serious, you must respect your Self-realisation, you must know you have to grow, this is a chance you should not miss! This is the last judgment, so be careful.

Shri Mataji: Yes? Lady: Why did we ask you those questions that you said to ask?

Shri Mataji: What does she say? [To a Sahaja Yogi:] You come here!

Sahaja Yogi: Yes.

Lady: She said, She said to ask those questions like: “Mother..." it is about *[UNCLEAR]*?

Sahaja Yogi: She wants to know, Lady: She told us three things. But She first -

Sahaja Yogi: Yes. She asked about the question, why in the end we asked these three questions?

Shri Mataji: Ask! Lady: But I cannot, *[UNCLEAR]*.

Shri Mataji: You will know later on, everything should not be known just now, because these questions are just like computer, you know you ask a question to the computer and the computer gives the answer, isn't it? Lady: No, but You said to ask You “Mother or..."

Sahaja Yogini: *[UNCLEAR* She...]

Shri Mataji: All right?

Sahaja Yogi: Ah, *[UNCLEAR]*.

Shri Mataji: That's it!

Sahaja Yogi: Yes! But Mother, we have a few questions.

Sahaja Yogini: She is not chosen...

Sahaja Yogi: Ah, OK! *[UNCLEAR]*. I am sorry, she is not Iranian, she...

Shri Mataji: Ahh?

Sahaja Yogi: She is not Iranian. I said perhaps we can explain her after, because Shri Mataji must leave now, but we have a few Iranian persons, Mother, she, these two journalists want also interview you, but ah...

Shri Mataji: I know, I know!

Sahaja Yogi: Yes.

Shri Mataji: But I didn't for-, I forgot about it, I'm sorry, but just now she didn't feel it, you see.

Sahaja Yogi: Ah, we have, Mother, a Persian, she did interview last year...

Shri Mataji: Yeah!

Sahaja Yogi:... she was in Canada.

Shri Mataji: Yes, I know. She was there.

Sahaja Yogi: She wants also and we have Madame *[UNCLEAR* Amelie], Doctor Amelie, she wants also to speak with You. But I think we have a short time and we cannot present You all the person here, I think. Perhaps for next time if you want come again some Iranian programs...

Shri Mataji: You see, it was done in such a different way, because I was to address this meeting day before. But because there was a festival they arranged it today and I am booked already to go, so you see, but still we managed, I am sure I will get the plane.

Yeah? Yeah?

Seeker: I have a question about the date the Koran was written, what You said forty years?

Shri Mataji: What has he said?

Seeker: You said forty years after the death of Mohammad Koran was written, but...

Sahaja Yogi: About the Koran, the date of writing of Koran. He asked ah,

Shri Mataji: Yeah of course, of course.

Seeker: *[UNCLEAR* the truth, I mean, to my knowledge it was written at His time, but as a script, but after that, after about twelve years these scripts were collected and then became this idea like this book what we have now].

Shri Mataji: What is it?

Sahaja Yogi: No, he have, he gave his idea about the date of written of Koran.

So...

Shri Mataji: That's you see because My father translated Koran *[UNCLEAR]* and He was a scholar for Arabic and also Persian.

So He said that written in Arabic is gibberish but in Persian, when they translated, it's made more sensible, but then He found a lot of disparities in things and all that, than He found out that it was not Mohammed Sahib who wrote, but it was written by another fellow who was the fifth khalifa.

Sahaja Yogi: Yes!

Shri Mataji: And whose Mother ate the liver of the fourth khalif. He was not an imam. An imam is the one who is a realised Soul and Hazrat Ali was the first who was a realised Soul, you see?

Seeker: He also wrote the Koran!

Shri Mataji: What's he saying?

Sahaja Yogi: Sorry! I think we can't continue because Shri Mataji has a short time Lady: Can I just ask one question!

Sahaja Yogi: Yes, please!

Shri Mataji: But I know a lot about it!

Sahaja Yogi: I think-

Shri Mataji: Some of it!

Sahaja Yogi: *[UNCLEAR* After this ask your question! Again your question! He doesn't!...]

Shri Mataji: Oh thank you very much!

Sahaja Yogi: Because she is waiting.

So Mother, we must thank *[UNCLEAR]*.

Shri Mataji: No, it was forty years. You see the thing was He did not write, because He did not know how to write

or read and His friends also did not know. Then their grandchildren wrote. I'm telling you authentically because My Father had a great respect for all that and He was a great scholar of fourteen languages.

Sahaja Yogi: Thank you very much!

Shri Mataji: May God bless you! Thank you! [Applause.]

***Contents: 1996-09-27*, Public Program, New York, USA**

[Introduction by David Dunphy.]

I bow to all the seekers of Truth.

I've told you many a times that Truth is what it is. You cannot change it, you cannot transform it, you cannot sale it. This is very important to understand in America that we cannot sale the Truth. Also, unfortunately, at the human awareness you cannot know the Absolute Truth.....

***Contents: 1996-09-29* Śhrī Kṛiṣhṇa Pūjā, Camp Vacamas, 256 Macopin Road, West Milford, NJ, U.S.A.**

Today we have decided to have Kṛiṣhṇa Pūjā because America is the Kṛiṣhṇa Bhūmī. It's very surprising that such a great incarnation of Śhrī Kṛiṣhṇa came even much later than Rāma and has sent His special people to live in America. Of course, there are many who are seeking in this country, no doubt. But there are many who are also misleading them. That's how you find, despite all our effort, we have not been able to expand Sahaja Yoga very much.

What one has to learn from His life is very, very important. The first and foremost thing He taught was collectivity. He used to get hold of small boys and play with them together. Rāma didn't do that. He used to get hold of ladies who were selling milk and also butter, those who used to go to fill their water in the pitcher. He is the one who collected all such people in the village of Gokul. He played all kinds of pranks on His friends and His mother and the mother's friends. Behaved just like a very naughty child, just to show that He was just like all of us.

As you know, He was the incarnation of Śhrī Viṣhṇu. First Śhrī Rāma was born, took incarnation as Śhrī Rāma, which was in the Aryan race, means that time we had an Aryan race which was sort of superior, superior race than others. But when He came as Kṛiṣhṇa, He took His birth in Yadav dynasty, you can call it. They were not superior, they were selling milk, having cowherds and doing work not of any religious style. But they were innocent simple people living in the villages and they saw the great miracles of Śhrī Kṛiṣhṇa's childhood. He killed demons. He killed Pootna. All these people were sent by His uncle Kamsa to kill him. It was to be, because He had to prove that He was the incarnation of Śhrī Viṣhṇu and He did it. As a child, how He killed those people is remarkable. And how He made them out though they were all camouflaged.

In these modern times, difficult for people to believe that there could have been any incarnation like Śhrī Kṛiṣhṇa. But in Sahaja Yoga, we have method of absolutely establishing the truth that Śhrī Kṛiṣhṇa was there ruling

on the Viśhuddhi Chakra. From His childhood, you can see He was fond of collectivity.

And He tried to create collectivity of people who were very simple, uneducated, good hearted people. And that is His special quality. And all the people of that village knew Him very well, all cared for Him. And when He had to go, they felt very sad and all of them came running and crying for Him. It was a small boy who was going. After all, what is there? A little boy from the village is going. The whole village had gathered to cry for Him.

That is what we all Sahaja Yogis have to know. As a child also, He was a very collective personality.

He actually emits collectiveness. The collective consciousness that you enjoy is because of His bliss. I find that Americans are very collective in the sense, they are more bothered about other countries than about their own. They want to go all the way to Vietnam, now to Iraq, now to some other place. Going all over the world, [laughing] they try to correct. But their own country they do not see what's wrong. It's so divided. Mainly divided on race, racial discrimination, is divided by religions and all of these are just concepts which they have accepted and are fighting among themselves.

Now after all these, there are people who believe they are born criminals and they should be criminals.

And their criminality is going very far. They are gangsters. Even small children have become gangsters.

But the worst part is that these little boys also, including others, all these criminals are regarded as big heroes.

I have seen once, a young boy wearing a shirt with another young boy's photograph on it.

So he told Me. I said, “Who's this?" “You don't know? Very famous gangster” he said. At the age of thirteen years he is a very famous gangster and this boy is very proudly putting up that, like a big hero, or you can call it like a God there.

So see the perversion to what limit Śhrī Kṛiṣhṇa's blessings have been used. That's why this country is very difficult. One after another there has been attack of negativity.

For example, first thing started by Christians, who said that Jews killed Christ. It's not true, it's not true. He was never killed by Jews. “Christ was killed by Jews” is a false statement, absolutely. Christ was not killed by Jews. How can a multitude kill a man? It's the law there. The Romans, or we can call the Roman law crucified Him.

So the Christians started nicely torturing the Jews, because Christ was killed. I don't know how to explain this. Such absurd idea. Now somebody was killed so many years back and now what's the use of killing some grandchildren of those people or great grandchildren of those people? But they did not, the Jews did not. Still this concept was there that the Jews killed. And the Christians felt they have a right to torture the Jews.

So when the Jews came here, they were never given a good position, they were tortured very much and troubled very much. It happened everywhere but very much more here.

So among Jews now came out some devils, like Freud. And he said, “All right. We must shatter these Christians

absolutely. Their moral roots must be finished." So he started his own psychology to destroy the Christians. And Christians stupidly accepted it. They did whatever he said, experimented whatever he did.

When I was once in Switzerland, two girls came and they were shaking in the program. I couldn't understand. I called them. I said, “Why are you shaking?" So they said that, “Actually we are very much degree holders in Freudian [laughing] knowledge and we have done all experiments of Freud." “And then why are you shaking?" “Because we have power to shake!" *[UNCLEAR]*. [Laughter.] So they followed this Freud and this vindictiveness that was there was not seen by anyone, even by Jews. As a result we had people who were deadly against each other and ruining each other, destroying each other.

Then this Black and White business started. All kinds of theories people are putting up to show that the Blacks are bad or the Whites are bad. The difference is only skin deep. If you want you can cut the skin and see for yourself. Inside body is the same. But it was so. This divisive method started and it's still going on. I always say, without Blacks, Americans will be left high and dry. Look at the talent they have.

Not only music. Atlanta, I saw, all the Blacks were winning and Whites were not anywhere. [Laughs.] Very nicely they used to run, very swiftly at the end of it, you see. And all the Whites were saying, “Ha, ha, ha." They were nicely enjoying their *[UNCLEAR* beauty/position]. [Laughter.] You don't have the stamina of the Blacks also.

So in games also, same thing. With all this what is going to happen to America? It's a country which has to be collective because of Śhrī Kṛiṣhṇa. All of them are immigrants here. Who is not an immigrant? Whether they came earlier or later doesn't matter.

Thank God, I have told you many a times that Columbus lost his way and came here and not to India.

Otherwise, there would have been no Indians left and no Sahaja Yoga. [Laughter.] I think it was the trick of Hanumāna. [Laughing:] He misled him and Columbus came here. Thank God. [Laughter.] Now you are in a country where you have to be collective. Kṛiṣhṇa won't spare you unless and until you are collective or you give up this nonsense of skin-deep differences. Then religious differences. He had a friend who was lame by one leg. He had some friends who were very black. He had some friends who were quite Indian white, I should say. I shouldn't say white like you people, but Indian white. He had all kinds of colours. And He took His own birth in the Yadav vansh. They were milk sellers, milkmen who used to sell milk to people. He didn't take His birth in a very royal family like Śhrī Rāma. Though He was, because later on He became the king of Dwarika. But in His style, in His behaviour, in His life, nobody could see that He was a royal personality. He could sleep under a tree. He could eat anything that He could get. All kinds of sweet, sweet stories you can read in His life, showing how He was enjoying His collectivity, never showing off. And His collectivity has to be worked out in this country. Unless and until it is done from your heart, it's not going to work out.

We had problems like this always with our collectivity here. For example, a lady, you know, she is a big lady, I think. She started correcting people. “Why do you put here? This thing is getting dirty. That thing is this and that." Such a woman should be sometimes sent to some stable to clean it. Then she will give up these nonsensical ideas that she has. If you are a Sahaja Yogi you cannot behave like this. And this kind of a behaviour can destroy Sahaja Yoga. Have you ever heard Me saying that, “This is dirty, this is not good, I don't like this"? Did I say, ever? First of all, we have to understand, if we have to be collective, we should give up these stupid ideas about ourselves.

Some people get some position, may be some money, maybe, I would say, have a background. If you are sticking on to it then you are not a Sahaja Yogi. You are saints. You cannot be demanding. You have to give and give and give. Whatever may be your position in life, if that can overpower you then you are not a Sahaja Yogi at all.

Śhrī Kṛiṣhṇa, who is the Virāt, who is the great primordial personality, didn't show any such signs of His greatness. But Americans have a specialty to show that they are something outstandingly great. But Sahaja Yogis, please don't learn those things. You have to make others unlearn. If that cannot happen, it's better to leave Sahaja Yoga for ever. Such people will make everyone miserable and destroy Sahaja Yoga in America.

Even about protocol, you should become timeless. Absolutely timeless. Now, if you are particular about time, Śhrī Kṛiṣhṇa will play His tricks and your timing will

be finished. Happened yesterday. [Laughter and applause.] So one has to know that time is your slave and you don't have to be the slave of time, if you are a Sahaja Yogi. Otherwise, you are not. That means you are guided not by the Divine. The Divine works out everything very well. But for whom? For Sahaja Yogis. But if you are not Sahaja Yogis, you'll topple down.

In every way you should find out what things we have accumulated among ourselves, which is not Śhrī Kṛiṣhṇa's quality. Now, Śhrī Kṛiṣhṇa used to steal as a child, the butter from the ladies. Why? Why did He steal the butter? Because they were selling it to the military of Kamsa, His uncle, who was a devil.

They used to go all the way to sell him in Mathura.

So He used to steal it, because children needed it and giving it to children. He didn't like this idea, why should it go to these horrible Rākshasas of Mathura? Just the opposite in is America. All the false Gurus, all the Rākshasas come here and they get all the butter. As if people have no brains to understand, while Śhrī Kṛiṣhṇa is the brain of the Virāt. But here you find that people have no brains. Anybody comes, says something, “Ah, ha, ha, great." Somebody talks big, all right. They will give away their money. They will give away their houses. Their children they'll remove from the school, for something extremely stupid. While He is the brain in the body of Virāta.

So this kind of brainlessness comes and we really start, even Sahaja Yogis start behaving in a manner that shows they are really brainless.

Apart from that, He is Kubera. He is the God of wealth. That's why there is wealth in this country.

But this wealth is all becoming debts, you see, because of the special brains of Americans. They are so stupid that whatever is selling in the market, whether they need it or not, they'll buy. Take loan, again take loan, take loan till they are absolutely indebted. Now here in the country of Kubera you should be really rich. Rich doesn't mean just to have bank balance, but means by temperament.

Now it's much better but once upon a time, Americans were the most miserly Sahaja Yogis. They used to send Me candles as present and I used to hide that. I said, “Baba why do you send candles, even? Don't send anything, because everybody is going to see those candles and what are they going to say about it, that candles have been sent." Now, this I am talking for introspection.

Are we collective? Are we willing to share everything that we have? Do we look down upon people who come from other countries? Do we have racialism in us? Thirty five Sahaja Yogis came from Australia, to America as if this is some Haj. They went back with very bad vibrations. Out of them half were thrown out of Sahaja Yoga. Imagine Australia is a country where they used to send all the criminals.

So first and foremost, to judge yourself is to see your vibrations. That you should meditate and judge your vibrations if you are really collective or not. Because you are not like that, Sahaja Yoga does not spread.

I have seen people from Hare Rāma Hare Kṛiṣhṇa. Poor things have found nothing. They get up at four o'clock,

start their Hare Rāma Hare Kṛiṣhṇa bhajan, four o'clock. Then the whole day they wear a very thin dhoti in which they are shivering. They shave their heads and put a pig's tail here which is bought in the market. If you see their dedication you'll be surprised. How they are so much dedicated, when they haven't found anything whatsoever? What about the nuns? You see them, you will be amazed. One fellow came from the Catholic Church to us. He was trying to be a priest. He said, “Mother, Sahaja Yog, you don't do anything." I said, “What do you want to do?" “No, there we could not eat any meat on Fridays. On Saturdays, we could not drink anything. Then on Sundays, the whole day we had to fast and pray to God." “Then, what about the rest of the time?" “The rest of the time, we had to remember Bible by heart and then recite it. And if we made even one mistake, the Father would give us a nice beating." That's another problem with Sahaja Yoga because it is Śhrī Kṛiṣhṇa's play. It's so simple. You don't have to do anything of the kind. No disciplining, nothing. Left to you, you are your own master. You are your own Guru. But these things which are lingering in your mind, which was just the opposite of Śhrī Kṛiṣhṇa's life, which you have acquired in this country, are still there, here and there, here and there left.

Some of the people are really still so much busy with themselves. They look so pale, thin, I tell you, I can't believe they are Sahaja Yogis.

So when we see Śhrī Kṛiṣhṇa's life, the way He lived. And then He went to help the Pāṇḍavas. He told Arjuna that, “I can be your charioteer. I can drive your chariot. But I

will not fight." Arjuna knew that He was all powerful, if He is there everything will work out. “And all My army, I'll give to Kauravas, to see the balance." He said, “All right." He didn't fight to show off, I am this, I am that. Like here, “Mother, I am the leader". [Laughter.] “I am the leader." “Can't hear, I can't hear." [Laughter] “Mother, I am this." You are a Sahaja Yogi. It's a very great name that you have achieved. The highest position you have achieved. There's nothing more to be achieved. Like somebody asked Me, “Mother, the Indians in India never catch. Why do we go on catching all the time?" I said, “Because Indians in India know they have achieved it now. Nothing to be achieved. You want to have God's Realisation, I don't know what other Realisation." They don't think like that. They say, “We have achieved now. We are in the sea. It's for us to swim over." All these things some of you have crossed over, some of you have absolutely lost them. But some of you are still there. They are the most dangerous thing as Christ has said, “Be careful of the murmuring souls." I don't know how to stop this little rat-like people, who are cutting the nest of Sahaja Yoga. I've been reported about many and I am really shocked. After so many years of My visit how can people talk ill of each other and can create these problems? Śhrī Kṛiṣhṇa's friendship is well known, you know with Sudāmā how He behaved. All His beautiful manifestations must show in your character. Then only this country can be saved. I must say it's nowhere, we have Canada, we have people also I am told from Austria. From all over, from England. But still, we are not so many people as we should have

been. If you just take Austrians, they must be double of this.

If they could do it, why can't we do it? Because we do not introspect and we do not grow out of our egos.

They will say that, “Why didn't Kṛiṣhṇa meditate?" [Laughs.] You have to meditate on Śhrī Kṛiṣhṇa. If He meditates what will happen to you all? On the whole, I was very happy with the other day's program, somehow. Despite, as usual, in New York, our inability to really do good advertising, unsystematic everything. Despite that we had so many people and I put the responsibility on them. Because that's the thing, it is Śhrī Kṛiṣhṇa's responsibility.

And that is what is your responsibility now. You are responsible for America and Canada, South America.

You all are responsible and you people should be such that people who see you listen to you, are with you, should know that these are the Gopa and Gopis of Śhrī Kṛiṣhṇa. Unless and until that happens, this America is the most difficult place.

Sometimes I feel it's not Gokul but Mathura.

So it is for you and otherwise you cannot enjoy. If you live with your all old clothes, you can't enjoy.

I must say this time there were so many people and I have asked them to promise and put a bandhan on them and I'm sure they will try to keep My promise. I am sure. But it is you people who disappoint them. When they see you, they are disappointed. Actually, here is the first time, Vishwa Nirmalā Dharma has been established as a religion. It is. But the rest of it is zero.

So all this differences and divisiveness has to finish and we should be one in the collective nature of Śhrī Kṛiṣhṇa.

First, meditation is very important. Introspection is very important. And also, meeting each other, talking to each other, knowing each other is very important. It has worked all over. It has worked out in India tremendously, Russia tremendously, Bulgaria tremendously, so why not here? It's no fashion for brainless people. It is a living process which has to take place where you must mature. And what I find that Americans are not matured. But you are now mature. You are now mature people. And I hope you will all behave like mature people henceforth.

So may God bless you! There are Śhrī Kṛiṣhṇa's names they have written down and I would request leaders to come on the stage. Now try to understand every word, every name of Śhrī Kṛiṣhṇa.

[Hindi.] Also, you say the name first and then they will repeat it. Name and the meaning and they will repeat it.

What about the children? They can also come.

Firstly let us do little bit of Gaṇeśha Pūjā.

If there are children.

[Hindi.] Very few children there are.

Just a minute *[UNCLEAR]*, Gaṇeśha Mantra.

Contents: 1996-10-20 **Navarātri Pūjā (9th Day), Faith is the State of Being One with the Reality, Cabella Ligure, Italy**

Today is a special day, as you know we are worshipping the Goddess, who came on this earth nine times before, to kill all the demons and all the negativity and relieve all

the bhaktas to worship. All her work has already been described. Despite that they find, new type of devils, new type of negative people, have come back. Perhaps it had to be. This had to be maybe, after all it is Kali Yuga and the drama of Kali Yuga would not be performed unless and until they are there.

So to complete this drama, they came. But this time is going to be a very different type of war. It's going to be the war of the peaceful people and the peaceful people are the most successful people in every walk of life, even in a war. It did not work out before.

They say that when Genghis Khan came, he went to a very big monastery of Buddhist, near Gaya and killed all of them, there were about 30,000 of Buddhists there and they didn't say a word and they were all killed.

So people started disbelieving in Buddhism. They said “What kind of a Buddhism is here, why didn't Buddha save them." That's human style of thinking. Buddha should have saved these 30,000 people who were peaceful, who were resisting, in a manner that was no resistance and so they were all killed by this horrible fellow called Genghis Khan. But you will be surprised in this Kali Yuga, this Genghis Khan has been praised by many authors and there are books written about him. He was not a Moslem, but some sort of a crackpot. He finished off many mosques, he destroyed many beautiful buildings and also he came to India and ruled there for a short time. All that's a history.

In the same way there have been wars between Christians and non-Christians, between Moslems and non-Moslems. All kinds of wars we have heard of where

only the faithful got lost, the real people got lost, the one who worshipped God with full faith, got lost.

So many people became atheists and they said there is nothing like God, nothing like his Divine power, it never existed, we were stupid, we were foolish, to follow all this. And those who were in charge of religion took full advantage of that and said that these people were sinful people, these people were not Godly people and that's how they were killed by us and we were victorious. The idea of victory they had, that they have been successful and so many people have been butchered by us.

So we come to Kali Yuga and in Kali Yuga the same thing has started, in a subtler way, in a different way, it has started that there's a big war going on between the people who are anti-God and who are using God for their own purpose. Very dishonest, very corrupt, very cruel people and they are using the flag of God, that banner which they have no right to use. Then there are Sahaja Yogis, who have got their realisation and they have to fight them.

Now the difference in the previous wars and this war is very different. In those wars, you see all those who were supposed to be victorious, this was after all the nine battles of the Divine Mother, the negativity that came up and which became successful, started feeling very confident that we have achieved what we wanted. But in Kali Yuga, in the light of Kali Yuga, all those historical victories are regarded as shameful things, as something very aggressive and nonsensical. This is now being described everywhere.

Like the white skinned people went to America and killed all the rest of them there. Now, that is coming into light. All these people who thought themselves to be victorious, their children, their grandchildren, their progeny, are ashamed of them, ashamed to call that they were their forefathers, up till the last war.

This awareness, which has come, is the real victory of modern times, of this Kali Yuga. That everything that was accepted as a part of the game, as the lifestyle, you can call it, is now being challenged in modern times everywhere. Whatever is aggression, whatever is oppression, whatever is cruel, is now punished also.

You see so many war criminals might have escaped but so many went into trials, it never happened before, nobody took Genghis Khan to a trial. Now in a very subtle way, all these aggressive people are getting now afraid that they will be questioned and they maybe tortured. It started, I don't know where, but definitely at the beginning of the Kali Yuga.

If you remember in this country there was a great aggressive man called Mussolini and ultimately he was hanged. In Germany there was a very powerful man called Hitler and Himmler and all this. God knows what happened to them, even the Germans don't want to take his name, they are all ashamed of him. Then we had somebody, say in England, Warren Hastings, who came to India, he was put to jail.

This was never done before. If Napoleon aggressed people, he thought he was very victorious, but he could not continue with it, he had to face it. You see anybody, who has been aggressive, who has been dominating, who

has been very cruel, demonic, has been taken to task, mostly in his lifetime. Now, if not in his lifetime, afterwards, he was maligned and he doesn't have a name like `a hero' or anything, people don't want to erect their statues.

So the awareness has come in the mind of the people. Like a person like Stalin, who ruled Russia once upon a time, today you can't see even one statue of Stalin, these are modern times. See the power of modern times and that is frightening to those people who think they can get along with whatever they are doing. It is going to be very soon understood by them, that they have to stop all this nonsense, otherwise they will suffer. It's not those whom they are dominating but those who are dominating, who will suffer.

They will suffer physically, they will suffer mentally, they will suffer emotionally and also their fame will be in the mud.

So today's victory of the power of the Divine Mother, is doing one very great work, is to expose and this exposure will be condemning publicly those people who are doing wrong. If you see from that point of view you will understand how we are victorious now.

Many of you felt very sad that I didn't get the award. This award makes no difference to Me and to you also, I must tell you. Because you have come without Me having any award and many will come without having any award as such. But, this time, for the first time, if you notice, the people who got the award are condemned. Even now they are writing against it, even now they are criticising.

So those who have been, they thought they were very smart, but the smartness is out now and I don't know how long will it go on. Because even today if you open a newspaper, you will find something about it, that how stupidly they have done it, they can't understand what was the reason they have done it. Not only the people who selected are criticised, but very much more the people who are selected.

Now, as being Sahaja Yogis, we have to know what is the difference between the consciousness at that time and awareness at this time. That time it was necessary to kill those demons, finish them, but they are back again on the stage.

Now, at this time, when it is Kali Yuga, they are exposed, they are condemned, they are put in the jail and they are now punished publicly.

So the collective awareness has got such a great victory, I think, over these people whom so many came, killed and died without getting any punishment out of it, without getting any defamation out of it. Now let us see what is consciousness and what is awareness.

It is a subtle subject, which I think you all can understand. Conscious is that, when you are made conscious, you become conscious about it. Like I have my hand here, alright, but normally I am not conscious of it, that I have a hand. If a man is sleeping, he's not conscious that he is sleeping. When you tell me you have a hand, I become conscious, or something pricks me, then I become conscious. Otherwise I am unconscious about it. I'm absolutely unconscious about my eyes, I'm seeing everything. But supposing I become blind, I can't

see, then I become conscious of my eyes that I've got, my eyes through which now I cannot see.

So once you say there is this hand, the consciousness is there. This we can say, is the knowledge about the hand, that you get knowledge about the hand. But once you are not conscious of the hand, that knowledge has disappeared.

So, to say there is ignorance or there is knowledge, both things are just the same. You are not conscious of your hand, so you are quite ignorant about it. Now supposing somebody says `your hands are very beautiful,' somebody remarks like that, then I become conscious of my hand, which is beautiful, otherwise I never knew they were beautiful.

So, normally all human beings live at that level, that somebody has to tell you. Now, somebody said “you are wearing a very nice sarī” alright. Then I look at it, “Yes, it's very nice, I never knew." So, somebody has to tell you, then you become conscious, otherwise you are not.

So, we all human beings, at that level, are like that.

Now, what is awareness? That's a different thing. That means, if I see somebody is attacking me, I put my hand, like this, that means I am aware that I have a hand, I'm not conscious but I am aware that I have a hand, I have to use it. Like here in Italy you go on using your hands all the time, like this.

That means you know, you are aware, that you have got hands, that you have to use them for expressing something more, sort of emphatically.

So we are sort of also aware of our body, we are aware of others, we know about others, we know what sort of a person another one is, up till you are Self-realised.

After Self-realisation, what happens? It is very interesting. After Self-realisation you go beyond both these things. Consciousness and awareness. Because you go beyond thought. You have gone beyond thought, means what?, anger, all kinds of ideas, all kinds of aggression, everything is manoeuvreed or worked through your mind.

So if your mind is lost, what will you do? There's no mind anymore. You exist with reality.

So there is no mind to communicate, we call it thoughtlessly aware, means what? We have conquered all our enemies by giving up one enemy, that was our mind. There's no mind to suggest, there's no mind to tell you.

So once there is no mind, you are lost [dissolved into the ocean, into thoughtlessness].

Now, it is being said that you ask a question to yourself `who am I?' As soon as you ask this question you become thoughtless, so you get lost, you cannot answer this question. Otherwise you might say, I am a woman, I am this, I am that, I am a bishop or I am a pope, I am this, I am that. But once you are a realised Soul, who will tell you who you are, because the one which tells you is the mind, which doesn't exist, no thought. Means you get just dissolved into yourself. This is what is reality. But you are aware also. Now, that's another point. If you ask yourself a question, you are not there, but you are aware. If your Nābhī is catching, immediately you know my Nābhī is

catching, I have got liver. You don't have to ask questions. Or somebody is standing near you, left Swādhiṣhṭhāna, oh my God, it is this one. If somebody is very angry and hot tempered, immediately you'll feel such heat from that person, oh God, I'll run away from this man.

So this is a new realm you have entered into, reality, which you were never aware of before.

Now, supposing there's a very bad man standing near you. He might be a thief, he might be a murderer, anything. You will not be even conscious of it, leave alone aware, normally. But once you are a realised Soul, you become aware of the whole, that is reality. What are the problems in the collective, you become aware of the collective. You become aware of the problems of the whole world. Now this awareness is very different.

The first awareness, as I told you, is like this. That if somebody tells you that you are this and this, you become aware of it. In this nobody has to tell you, it's just there. You are there, you know what it is. And this is what you have achieved, in these modern times. Which is the blessing of the modern times also, that we know now who we are.

You always say, we are the pure spirit, yesterday also I heard it. Are you sure? What makes you believe that? That you are the pure spirit. I mean you haven't seen your spirit, have you? You haven't seen yourself, what you are. Then, how do you say that you are the pure spirit? It's just you're saying something, because I say so. But you are the pure spirit, because whatever is the description of the pure spirit is given, that it is aware of

the Divine Power. It is aware of the Divine Power and that is how you are the pure spirit. Because only through pure spirit, as your personality, you can be aware of this All-pervading Power. This is written in all the Shāstras, in all the Scriptures, everywhere. And what do you know about yourself, that you are the spirit. Because you know about your own Chakras. You know about your own Nāḍīs.

Now, what has happened is that you are separated from yourself and you can see yourself. You see yourself very clearly and you start seeing yourself as the present and the past and the future. In the past, what I was, you see you are shocked, “Oh, my goodness, I was like this." You see it, through this present state, in the present state you see. Then you start forgetting it, forget the past, forget the past. Then still you have the future, then you start thinking about the future. First future they think about their own children, their wives, Sahaja Yogis also. What will happen to my children, what will happen to my wife? Then they think, what will happen to Sahaja Yoga? Then they think what will happen to Mātājī? Also they think, what will happen to this world? Because your awareness has expanded. You are not in the limited sphere now, anymore. You can think of your children, you can think of your wife, also you can think of the whole world and all the problems of the world you think.

So you have reached that state, alright, up to that state we are. Now what is the thing that covers up all this, or gives you solutions, say for your children, for your family, your wife, everyone, what is the solution? Your Mother believes in giving the solutions, not only the problems. Because, these days, there are not problems that existed

in the Navarātri, they no more exist, that you can take a sword in your hand and go and kill somebody, no, it doesn't, it is not possible.

So, today's problems as they are, as we see, within us, we see the problems, we are aware of it and we want to do something about it. Whether we are in the past, present or future, we see the problem.

So now, what is the solution? We have no weapons, nothing to fight. We don't know also, so many do not even know how to hold a sword in the hand. And so many don't even want to hold it because they are so much in compassion, in the ocean of compassion enjoying themselves nicely. They are enjoying their own compassion and the compassion of others, compassion of their Mother. But then how to solve the problem? The problem can be solved if you become really powerful yourself within. Where is your attention? You have to move inward. Where is your attention? You have to become very powerful. I have done My job, I have given you realisation, you have grown so much. I have explained to you, I have told you everything this time. I have given you lots of love, ocean of love I should say, as you call it, whatever it is. But now you have to nourish yourself, you have to become powerful within yourself.

So what is the way you can become powerful? First you must believe that you have transcended your human personality and you have now become a super human being. First of all this must come, this is what we call as faith. This faith is not false faith, it is not blind faith that you believe into something, but it is a fact. I have, a hundred times, I have told you, that you have to have

first of all faith in your ascent, in your position as Sahaja Yogis. For this, meditation is very important, very important. Without meditation you cannot have full faith in yourself. Because you can't know yourself, by saying `who am I?' You cannot. You try now asking the question, `who am I?' you'll be lost.

So what should be the faith then, because when you ask this question `who am I?', you are lost.

So, you reach a stage where I have to tell you that faith is not mental, it is not emotional, it is not physical, but it is a state of your own being which we can call as a spiritual state. In the spiritual state, nothing can disturb you, nothing can overpower you, nothing can dominate you, because that state if you have, that means you are part and parcel of reality, then you are an honoured member of the God's kingdom. Then you are the most revered personality. Then you are like a deity, then you are like a gana. In that state, when you are, it's a state, again I say it, beyond the human state, you are extremely powerful.

There is a story about Nizamuddin, a great Sufi in India. There was a horrible king, I think Godshah, he called himself. And he [Nizamuddin] would not go and bow to him and he was very angry and said, “I can only bow to God and to nobody else." This Shah said, “If you don't come and bow to me tomorrow, I will cut your throat." And that night the throat of this king was cut. It is a story, but it is a real story.

Somebody came and cut his throat, it was not Nizamuddin Sāhab, he would not do that.

So that state, if you reach, what we call, is a state of Śhraddhā, a state of Śhraddhā which is enlightened, enlightened faith.

It is a new type of mechanism. That is, you become part and parcel of the whole; that means the moon, the stars, you see. I tell you, I never told the sun that it should be there for the Pūjās, last time, this time, I never tell him, there's no need to tell, it is all done. I don't tell all these vibrations to make a cross or to show all these miraculous photographs, I don't tell them, there's no need to tell. They just do it by themselves, I am sometimes surprised how the ingenious methods they have of their own, how they manage things, I am Myself surprised. I didn't tell them that these two persons who were selected for this award that they should be so condemned by every newspaper.

It all works automatically, it just works. Only thing, if I have anything, is just complete, complete faith that I am at that state and that's why there is complete patience, sabhuri. Complete patience. And that is what we have to learn. It will all happen in any case, because you are all at that state. Only meditation is important, very important. For Me not, but for you all. If you all can meditate now, just for ten minutes also every day, it will help you a lot. Now why do we have all these statues?, the Mother, Hanumāna and Gaṇeśha, Christ. Because to begin with, human beings cannot understand anything which does not have a form. They cannot go deeper unless and until there is a form. But they went to another limit of using any stone, anything as God and all. But now you have discretion, you know what is to be worshipped,

what is to be treated as a higher personality, that you know. But before that, they would worship all kinds of people, like now people worship the Pope, you know that, very well. But now what to do, they are not only blind, they are not only unaware, but they are also not conscious of it. They are all at such a level that you cannot tell them.

So you are a new type of people, I should say, who have tried to fight it out, to struggle it out, to know about the absolute truth. Unless and until you know the absolute truth, you are nowhere, you have no discretion, you have no understanding, you have no wisdom. But once you know the absolute truth, then you should not by any chance be half way this and half way that. That's a very dangerous state of affairs.

Say a seed is sprouted, it is neither a seed nor a tree. If it doesn't grow, it is useless. That happens to your awareness, I'm again talking of your consciousness, awareness and then you are neither here nor there.

There are many people who come to Sahaja Yoga, perhaps maybe to find some peace. But I get letters, my father is sick, my mother is sick, my sister is sick and then otherwise, my husband is fighting with me, I'm seeking a divorce or thirdly I've lost all my money, I must have some money. Fourthly, I am a great artist, but my art is not selling. All these stupid problems they bring. My children are no good, they are troublesome, then my wife is fighting with me, my mother is fighting with me, brother is fighting with me.

Now I said, what sort of Sahaja Yogis these are? The state of being one with the reality, means that the whole

of reality is at your feet, the whole of it works for you. Now once you even get a glimpse of that state, I tell you, you become so much peaceful within yourself. If you say I am the king, I am the king. If you say I am the beggar, I am the beggar. What difference does it make to that state, which is like the purest of pure gold, which cannot be tarnished.

Such a state of mind we have to develop, it's more a challenge to us. We are Sahaja Yogis, alright, we have got realisation, alright, we can sing very well, alright, we have achieved good positions, alright, we are nicely married, alright, we have got nice children, we have got everything, we have got jobs, this, that, now. Suddenly one negative force comes in to trouble you, so what? So what? Otherwise how will you know what you are? If there is no darkness, how will you know you are the light? It's a challenge to your own state, at what state you are. The word state is not so explanatory, in Sanskrit it is Swarūpa.

Swarūpa. Swa is yourself and rūpa is form or state. That state is possible for all of you by saying, `not this, not this, not this, not this'. As it is, your mind has reached that state that there is no mind, you can do that. But you have to develop a kind of a personality that realises what you are. But in that realisation, you are just aware of it, not conscious of it.

I'm for example, like that. I'm aware I am Ādi Shakti, I am aware I know, but when you say `Mātājī', I also say `Jay Shri Mataji', I forget it that I am the one you are talking about. This is actually, should be the state, that you are aware, yes, you are aware in the sense, I don't know how

to say, but I'm aware I am that. If you ask Me `Mother, are you Ādi Shakti?' I say, `Yes, I am.' Because I know that, that I am. But when you say `Jai Shri Mataji', I forget that I am Ādi Shakti and I also say `Jay Shri Mataji' with you. I forget and I have to tell, “No, no, you can't say it." It is very interesting. Now, you make Me sit here like a queen and give Me presents, this thing, that thing, alright. That's your idea. But to Me, you see, I am complete in Myself, I think so. [Hindi.] I've got lost into Myself. Alright you do this, alright, if you do that, even if you don't do it, it is alright. To Me, it makes no difference, it may make a difference to you, but to Me it does not. Like, I've been saying, now don't give Me any presents, don't give Me any presents, all these days.

So, the only argument is that the whole year we give you once, so why should you Mother object, because you give us joy. Alright if you think it gives you joy, you can do it, but to Me it doesn't matter. Because, I don't think I am there. I'm just seeing you sitting here, alright, they are all realised Souls, alright. But I am one of you. I don't think I am very special. But if you ask Me, then I will say, alright I am Ādi Shakti. But I don't think Ādi Shakti is very special also. Because I have no mind, but otherwise I don't think I am somebody special. Because somebody is somebody, so what.

Now supposing, sun is sun, so what, he is the sun. If somebody is Ādi Shakti, so they are Ādi Shakti, so what. But for you it is creditable, because you were not born realised. You got your realisation, so you are special, you are great, you have achieved something. I have achieved nothing, I have been like this and I will be like this.

Whether I fight the devils, or I sit before you, makes no difference, I will be like this.

But for Me, you are great because you have achieved this.

Today to see you on this Navarātri day, so many people sitting to worship Me.

So many people are here, so many Sahaja Yogis, it's so remarkable, it is not My achievement, I tell you. It's your seeking.

Because I have been on this earth many a times before, that you know. But we never had like this, so many came and got crucified, died, this, that, but I never had people of this calibre.

So again we come to the same point, that we should be aware of ourselves, complete Śhraddhā in yourself. If you have some Śhraddhā in yourself, you will have Śhraddhā for Me also. Because we are not different. If you believe this is water, then everywhere there is water then I believe that that is water, isn't it. Because I know this is water, so wherever in the world there is water, I know it is water.

So if you know you are a Sahaja Yogi, anywhere there is a Sahaja Yogi you will know there is a Sahaja Yogi, that's a Sahaja Yogi. But as far as you are concerned you forget how great you are and how far you have come. I am very proud of you, you don't know, but because I am a humble person, I don't know how to show off.

So I have such nice children, so many of them, so lovable, those bhaktas for whom she killed so many demons and all that. They are not like you, you are much

better, much higher, of a much greater quality. But you must know that you are and don't behave like those people who were of a very rudimentary nature, you have grown up, you have prospered and now the fruits we can see.

I don't know what to do for you really, but have faith in yourself, then you will see how much faith you will have in reality. That there is reality with you at every step, every moment. No fear, no sense of achievement, nothing. Done now, finished. When there were five Sahaja Yogis, I was happy, when there are so many, I am happy. But when I see so many, I feel there are so many powerful personalities who are one with reality.

This collective oneness, was never so. And so, I will say that on this day, what we have to do is to kill the devils within ourselves, that's all. If you want to really worship Me, that's what you have to think, what are the devils within you, that's all.

So you don't have to worry otherwise for outside devils, they cannot do anything to you.

May God bless you.

Contents: 1996-10-28 **Quote, Arrival, Airport, Cairo, Egypt**

Shri Mataji [to the Israeli Sahaja Yogis]: Why have you come?

Israeli Sahaja Yogis: Mother, it's our job to make friends with the yogis from Egypt.

Shri Mataji: It is so joy giving to see your love acting on others. Small, small things and very big things all work out with love. Making friendship without any ulterior

motive, without any gain is one of the signs of your ekhakarita [collectiveness].

Israeli Sahaja Yogis: [Request Shri Mataji to come to Israel].

Shri Mataji: I very much want to come there once this bombing business stops!

Contents: 1996-10-29 **Talk to Sahaja Yogis, Honesty and Money, Suite, Hotel, Cairo, Egypt**

At the time of Moses, isn't it, so I am very happy that you could all come here and visit this ancient place and see for yourself. We have to fight against all this nonsense that is going on to make the country weak, this is how any country will be weak if you divide the country, all these divisive methods make the country weak. When you join them together then only the strength will come. But if you want to divide the country these divisive methods *[UNCLEAR]* so new methods of how to unite how to bring them together but I think without realisation it is not possible. Because I have reached that conclusion.

Because mentally what can you decide, now they will think of Hitler, but whatever it is *[UNCLEAR]* can do a lot now, at least they can get after the swiss bank *[UNCLEAR]*. They should put attention to the swiss bank, why not? There is one fellow who has started it in America his name is E Anatole who has got from the Jews, he is an Italian and not a catholic and he is being supported by the Jews of New York who are very powerful that they want to know about the swiss bank that would be the best thing *[UNCLEAR]* that would be best that they find out about the swiss bank, but it should be done in a very

proper manner I think first what you should find out whether their secret *[UNCLEAR]* are in the bank itself kept in safes, so interpol should take it, stop all the banks and search out these names and to whatever money is owned by others they do not have any money they are masonic people horrible and also they are joined with Catholic Church, the Irish Catholic Church, who have been so nasty with Jews as you know very well. There are criminals joined together, absolutely criminals. Now I am in Italy I know what it is. All Kinds of criminality, from India they took away money *[UNCLEAR]* by force and that money was taken to vatican was given as a donation to Vatican after all Vatican is Gods thing, yes? So it went to Vatican then Vatican converted it to gold bars some of them believe in gold bars not in money.

So it was all converted, was taken to Torino, there the house of our Prime Ministers wife, Rajiv Gandhis' wife Sonia and then that they took to a bank in Switzerland, somebody saw it and those gold bars were put in a particular bank, now we are poor people in India, this is the trouble. Now this is only a wee bit of one *[UNCLEAR]* now in our country our politicians and Prime Ministers except for Bahadur Shastri, who are absolutely corrupt. One by one they are going to be as in Italy, since I have been in Italy, [laughter] now when I was in India this thing started, even just imagine unashamed, but if there is no bottomless pit of swiss bank where will they send the money you see. You must write to the Jews in America what they are doing. In Brazil the Supreme Court President and the Law Minister they met and they told Me that there cannot be any law as long as America and

the Swiss Bank are one. It's surprising. They said we impeached one president, impeached one president in Brazil, you know that.

Sahaja Yogi: Yes of course.

Shri Mataji: He is now a highly paid professor in Harvard University.

Sahaja Yogi: Yes.

Shri Mataji: Jews can do a lot if they take sense into their heads that is the point instead of that what are they fighting? Jews should manage the Swiss Bank. Imagine these people they [measured] the teeth of the people who died to make them into gold bars and who carried them was this red cross, can you imagine this Red Cross. If you should happen to find My lecture when in Basle I gave left and right to this Swiss Bank especially to this lecturer you must read that lecture, a very powerful attack against the Swiss Bank. Since then they are after us, nobody should say you know whatever they are doing. I am not afraid of anyone and you should not be afraid of anyone after all what can they do to us. I think you all should all write to the Jews in New York that whatever you do you have to do this and to also your Prime Minister why are they after the Palestinians what are they going to get out of them. Get after the Swiss Bank.

Sahaja Yogi: This will solve the problems quickly. This will solve the problems between Arabs and Israel very quickly. This will solve the problem between arabs and Israel very quickly. Your idea we solve the problem between the Arabs and Israel very quickly when they go to the Swiss Bank.

Shri Mataji: Openly you were surprised I went down for a lecture at this women's conference in China, I was one of the main speakers so a big paragraph on the Swiss Bank I spoke clearly then afterwards after the lectures were over so many ladies gave their responses, they said the person who has really beat the point is Shri Mataji because Swiss Bank is our enemy. They were from all over the world they had gathered there they said because of Swiss Bank we are poor why can't people see this point, bottomless pit all our money is going down there. But you Jews can do this work I tell you as Jews, they are no more Jews I know but still still whatever it is. And another great point is that they are masonic people this Swiss Bank, masonic people, so they are secretive. Did you read that book `In the Name of God' in English language, did you read it? You read it, you read all the tricks of these people. This Swiss Bank has got masonic people there and this masonic law was also part and parcel of their catholic church *[UNCLEAR]*.

The centuries or the centuries that are there are all Swiss in the Vatican. Now this Vatican counterfeited nine billion dollars, counterfeited, do you know what means counterfeited? Yogi replies “yes fake, fake the money, fake money" what is fake, yes fake fake and gave it to their own customers in their own bank up to such a point the book says that the last book was a very good man but he was killed within thirty-five days by this book that is what it says, I don't know.

I met the author Allen and he told Me I have all the documents with Me so they cannot charge Me.

Now the only point is that these Christians started saying as a view other religion is stupid, they started saying that Christ was crucified by the Jews, now tell Me any country can the multitude crucify a person? There should be someone body who is a magistrate or something isn't it, how can a thousand people say I will kill him, or kill him? And then they get after all the Jews these Christians you know and troubled them and tortured them.

So now the Jews are sitting on their head and Freud you know wanted to make Christians really anti God so gave his own tips because he was a Jew. That is how the Western culture became so *[UNCLEAR]*. That is how the fundamentalists became so strong, it is a vicious circle.

But in Sahaja Yoga we don't say don't do this don't do that, we just don't do it isn't it, a wrong thing automatically isn't it. But I don't say I never said you don't take drugs did I? Never, you just didn't do.

So big responsibility on the Jews I tell you to get out of this Swiss Bank. They are the best because their forefathers who were gassed they took out teeth, I mean it is such a horrible thing to do and made them into gold bars. 3, there 3,000 gold bars, shameful people. Also in, what happened in Rome they didn't allow what they didn't give protection to many Jews I think... Guido “Ah the point, Yes actually they never protest, they never say anything against and on the contrary they were protecting the Nazis so they were hosting the nazis in the churches and then they were helping the nazis go to South American." So many war criminals, they took away in the submarines to Argentina, I have seen them in Argentina I have seen them there. You see they have

taught them all german things and goose step and identity and all that and when Argentina was attacked because of that island I was just thinking that it should be lost to them because this German thing has to go. They are building up huge big things there *[UNCLEAR]*. I don't know how many miles together for a third world war these Germans these war criminals. They are still hiding they are still in Argentina, so they took all the war criminals with them in the submarines what do you say to that? So for Sahaja Yogis it is important to write to all the Jews what are you doing about it, whatever people would like to know. And I will get you all the addresses of all the Jews in New York, I have already sent Linda there to find out. Divert their attention from Palestinians to this. It should be diverted to something constructive what is the use even *[UNCLEAR]* Palestinians what will they get, little land more so what will happen what is such an achievement? I just didn't understand, Israelis must now realise war has to be stopped, they have suffered a lot with wars, no more wars, no more wars at any cost we don't want war, but get out of this. You see as far as peace is concerned I will manage that bit, but poverty only this Swiss Bank has to go. There are only two problems we have, one is violence the other is poverty, the violence part I can look after, violence I can manage, but the Swiss Bank. Italian magistrates went there I was told to find something, they couldn't find because there are numbers, but now find out, the numbers only are kept in a vault, so they should break the vault instead of fighting the Palestinian people they should fight the bank, the Swiss Bank. See that's important, not for

money but on principle, they can save all the world by that. They are already doing it but if you people write you see they will feel no sort of energy about it. Since I have said it in China it has started working out I know.

[Enquired about Her socks at this point.] So you see Sahaja Yogis should have some jobs and that is, I have asked Linda and she will be sending you the addresses and you all should write combined. What will you do with the land in Argentina what will you do, what will you achieve. Now this war in say, going on, another war, which America is joining with Saddam Hussein if these people Americans are so very sympathetic say for bhootish so why don't they take all of them, they are not money, back to America, in the lower part of America in the south part it is all vacant, nobody lives there, these are few bhootish, take them there, they will never be troublesome people you don't know I have had inner Bhakti they are not very sensible, they are not only rustic they are like *[UNCLEAR* Kalpanis] they are fighting cocks very big fighters, you cannot talk to them they are not sensible at all they are like nomads, nomadic people they are nomads I think, but gypsies are better than this and these bhootish who protect them they are throwing these things for Saddam Hussein. What is it after all? Take these bhootish and put them in America somewhere they will be alright there is a lot of room there.

Now you are Italy, just there is so much of land it is so much wasted so of much land in such a poor country and such a small population, but they don't want any immigrants to come in, they brought some snakes 3,000 snakes and put them in the jungle we had because

somebody told them for ecological balance we must have some snakes, in the winter all the snakes died. This solution did not work, I mean in England you will be amazed half of the England is just vacant, half of the England has very few population isn't it? So why not put some of the people there? Then Australia I am surprised, Australia is a barren land and there now they don't want any immigrants there I mean this world belongs to the whole world and if there are more people somewhere why not have some of them there? Some of the people are protesting Chinese are protesting about the *[UNCLEAR* suppression/immigration] laws in Australia. Australia is so big and so difficult you have to go from one place to another in the night you don't find even one single place. It is only there Koala Bears are prospering, Koala Bears are prospering too many koala bears, crocodiles are prospering.

Guido: Rabbits, rabbits.

Shri Mataji: Rabbits are prospering they are so much of lambs they are killing lambs but they will not, one of very surprising things, have human beings there. After some time you may just find the rabbits living there. Australia the growth of white skinned people is minus, America is double minus, Europe minus. All the white skinned people are disappearing, they don't think from a global point of view. The whole thing is limited isn't it? They never think what we are doing what good it will do to the whole world never. They must somehow or another get some Palestinians in Sahaja Yoga also.

Sahaja Yogi: we have one?

Shri Mataji: Yes? Really? You have one?

Sahaja Yogi: He is actually in Israel.

Shri Mataji: I didn't see any.

Sahaja Yogi: He is really from Germany.

Shri Mataji: Really?

Sahaja Yogi: Actually he is a Palestinian, it's a start.

Shri Mataji: One person? Well get more.

Sahaja Yogi: We have no Sunnis Shri Mataji we have no Sunnis in Sahaja Yoga, we have virtually no Sunnis in Sahaja Yoga.

Shri Mataji: No what?

Sahaja Yogi: We have Shias in Sahaja Yoga, within Sahaja Yoga we have had no Sunnis naturally to join Sahaja Yoga?

Shri Mataji: Well you are a Sunni, a Sunni I know of Haṁsa is a Sunni, he is not a Shia, Zaphar is a Sunni, only Iranians are not. Majid? Majid is sufficient for all the Sunnis and all actually they are all conditioned, they have to be Sunni and they have to be Sunni and Arabs, it is a very difficult combination.

It is very easy to get a Berber, Berbers are easy to get into Sahaja Yoga because they are not so conditioned like Achalan?

Sahaja Yogi: He is a Berber.

Shri Mataji: Achalan is a Berber?

Sahaja Yogi: He is not he is a Sunni, he is a Sunni but Berber. He is supposed to be Arab. In Algeria the... no no no Bedouin are actually Arabs.

Shri Mataji: So now it is your responsibility to get some other...?

Sahaja Yogi: It is very difficult to get this combination of Arab and Sunni, very difficult, they are much more fundamentalists in general than Shias?

Shri Mataji: Are more fundamentalist?

Sahaja Yogi: No I think I said, I was in Bahrain before, I am Sunni I met many Shaid, Shia from Iran and Bahrain. Sunni are moderate.

Shri Mataji: Moderate?

Sahaja Yogi: Yes, yes... Shiad are not really and I read their books. I read many books on Shaid.

There is no middle way no go between, only right or left.

Shri Mataji: The Shaids?

Sahaja Yogi: Yes. But here in Egypt we are Sunni but we respect, Sunni respect, but we respect the names of Shaid Islams. But Shaid does not respect the Shias or Sunni, you know Saddam Hussain, the Hussain Shaid Mosque of Shaid Hussain I am going to take some friends to it, it is Shiad it is Hussain one of the grandfathers.

Shri Mataji: I know I have been there, I have been to all these now.

Sahaja Yogi: Exactly yes, close to Rāmallah. He was decapitated, they hated the Kaballah and he asked God to send punishment and torment on the people in K because they cheated him.

So Shaids I think Shaids are very hard and you cannot talk to them. I tried to meet some Shiads, you would be amazed all the Shiites of the whole of Europe has taken to Sahaja Yoga.

Shri Mataji: Really? All?

Sahaja Yogi: Oh yah yah yah,

Shri Mataji: What was his name? Ayatollah Rohani another one he was assistant who was Prime Minister, `The former PM' the former president, they have taken to Sahaja Yoga,

Sahaja Yogi: Yes Great Yes.

Shri Mataji: Now you see these theories also talk about when it is living Sahaja Yoga. I have seen it. Because this gentleman came to My program to get realisation, can you imagine this?

Sahaja Yogi: No No I can.

Shri Mataji: Can you imagine this man, have you met him?

Sahaja Yogi: No.

Shri Mataji: This Ayatollah Rohani his brother was elected instead of this what's his name *[UNCLEAR]* in his place.

Sahaja Yogi: Oh, yes yes.

Shri Mataji: His brother was supposed to become the new *[UNCLEAR]* terrorist humorist. The Ayatollah of Ayatollahs, there is a name for it and they took somebody else's name, common name, something like that, Hassan and left Iran after the Ayatollah Khomeini controlled *[UNCLEAR]* in Iran.

I know this story.

There was another story later where recently there is a rank the Ayatollah of Ayatollahs, the Ayatollah he died and he was supposed to be replaced by the brother of Rohani and of course they put him *[UNCLEAR]*.

[UNCLEAR] Russia and all that and he has tremendous respect for him.

Gentleman: I know I saw him you know Mother to mark the death of Hussain they cut with the long swords, hit their heads...

Shri Mataji: What's that? Gentleman: Yah the Shaids.

Shri Mataji: Aah hah.

Genetleman: And they catch Yesus, you know Yesus?

Shri Mataji: Huh.

Gentleman: They hit blood everywhere,.....

Shri Mataji: I remember that *[UNCLEAR]* we were not there, they are repenting. But out of that all the people came to Sahaja Yoga, they gave up all the nonsense, you see they gave up all the nonsense, they are and became great Sahaja Yogis you would be happy to meet them, we have some great Sahaja Yogis you would be happy to meet them specially Majid, Majid he is the last word, the way great Sahaja Yogi is and the one you have in Rome?

Sahaja Yogi: Ali?

Shri Mataji: Ali so this is stupidity this was not told by Hazrat Ali that you should hit yourself for anything it is only ritualism they have to challenge to make a big show that's all, all this nonsense it has no meaning.

In Sahaja Yoga you will discover who was Hazrat Ali, who was Prophet Mohammed, who was Fātima, they are not like, like somebody coming up, they are ancient and who they are you will discover. In our ancient books it is written about Prophet Mohammed, Mahā Meda, this is the Meda. Mahā means the great, that part he resides, we believe he is the incarnation of the primordial master, see the Islamic version the poor fellow has no place at all, they don't even think he was Divine. Was he like a

radio or what, can he become like that? *[UNCLEAR]*. They think he came to his manna, can he become like that? This was all done by I think this fellow was, was Marweia,

Sahaja Yogi: Marweia.

Shri Mataji: They did all this harm to him and another was Osman, they killed him we called him *[UNCLEAR]* like ribbons now.

Sahaja Yogi: He was a ribbon? Like ribbons? They entered on Osman *[UNCLEAR]* his wife was sitting beside him, they want to kill him, so his wife tried to protect him by exposing her hair, her head, it was a disgrace at the time, any man enters at the woman and she exposes her hair at this stage he should quickly do like this, they refused to leave, she exposed her face to make them shame and leave the room, do you understand, as if I entered the room?

Shri Mataji: Yes I understand yes.

Sahaja Yogi: Yes sorry, as if I entered the room and I saw a naked woman I should quickly do like this, they refused, they refused to leave and raised their hand with the sword and they tried to protect Osman so they cut her finger this finger, but they killed him.

Shri Mataji: They killed him?

Sahaja Yogi: Yes.

Shri Mataji: All history is full of this nonsense.

Sahaja Yogi: Yes. There was a war, a war between his followers and the Ali *[UNCLEAR]*. What do you think of this fellow, this Marweia fellow *[UNCLEAR]*. His mother ate the liver of the fifth calipha [caliph]. Yes yes. He is the founder of the Marweia family and the ruling…

Shri Mataji: My father told Me all this because he translated the Koranish texts to Me. My father was a great scholar of fourteen languages.

Sahaja Yogi: Fourteen!

Shri Mataji: He was a member of our parliament and a very well known man, he told Me so many things of what Islam was, is no more.

Sahaja Yogi: Exactly yes.

Shri Mataji: Islam means to surrender, surrender to the Divine, the Islam word means that. But everywhere, the bible has changed so much, the bible is so much changed, you can't believe it, the things they have said, Christ has said something, they have said something, because I have Divine eyes I can see what they have changed, the way they have interpreted everything, human beings are such they can spoil everything, that's their speciality.

So you can go in a forest it will be very clean there, one human being goes to live in a forest, you will immediately know what is in the religion 287

Sahaja Yogi: This is human beings.

Shri Mataji: Ruined and all the religions are like this and by ruining them they are ruining the people also and people believe, I really, sometimes I feel such pity, the faithfuls you know, the way they pray, the way they do, the poor things they have no connection with God, what are they praying they should be with a connection with God they are praying, without a connection with God what are they praying, to whom are they praying, just think of it, you have no connection at all and are just

praying morning till evening. There was this fellow a Sheik in Maharashtra, he was a musician and a poet also, he told Me by doing the Namas both My knees broke.

Sahaja Yogi: But Mother I came to you and in five minutes you gave me realisation.

Shri Mataji: I said this you all did in your sweetness and innocence, But I can not do to you that anymore you see there is a big Sahaja Yogi now you see, there are many like that, many, In India you see also there are so many false Gurus and even if there are real Gurus they are very hard. They haven't got a Mothers side with them. Once, one story I will tell you there was one Guru, one Master, he was supposed to be very good, so he was living on a big mountain near Kolhapur, one doctor lady came to see Me and she said “Mother I went to this Guru and he told me `why are you coming to me, there is somebody, the Ādi Shakti sitting there, so why do you want to come to me?' So I said I have come to you and I bowed to him." So when I went to Kolhapur I said let Me go and see this fellow Guru *[UNCLEAR]*. He had lost his legs completely poor thing, because he used to sit in the water, he felt the heat of the people so much that he always used to sit in the water and lost his feet completely. *[UNCLEAR]*.

So I had to climb quite a lot, so the Sahaja Yogis said “Mother you have never been to any Guru, why do you want to go to him?" I said you see the vibrations and you will know what a Guru means. When I went to see this Guru it was raining and raining and raining, very hard and this Guru was sitting outside the cave, very angry, just imagine, so I went into his cave and sat down.

So this Guru Mahārāj came and sat on his err, I mean they brought him you see he cannot walk, he came on a tiger, he came and sat on his *[UNCLEAR]* as we call it, he said “Why did you not allow me to stop the rain, you wanted to take down my ego?" He was supposed to be able to stop the rain, that's what they said, he can stop the rain, “So why didn't you allow me to stop the rain?", cos he knew what I was, that was one thing, so I told him, “See you are an aesthetic, you are a Sannyāsī and you have got a sarī for Me and you know I won’t take anything from a Sannyāsī son, so I had to get drenched. If I was not drenched with water how will I accept a sarī from you." Immediately, absolutely, he started crying and of course he sat with Me and he was talking on another level, not on a human level, but other level about Gods level, doesn't matter. Then he said “Now I have to tell you that I cannot be of much use to you but if somebody troubles you send him over to me, I will put him right." He had a very big name in Maharashtra *[UNCLEAR]*. He is a very big man, he never beats anyone and all that. One fellow came to Me and he started “Mother you must not give realisation to everyone, you try to give realisation to everybody *[UNCLEAR]*." He was giving Me a big lecture so I told him, I said alright you go and see the Guru Maraj he has called you, he felt very enamoured on my *[UNCLEAR* progress] “Oh the Guru Maraj has called me." So he went to the *[UNCLEAR]*.

After one month, I was sitting one month where I had a program and this fellow came with both his legs around his neck dangling like that. “What happened, what has happened?" He said “Guru Maraj, be praised, the blessing

of the Guru." “What happened?" “Mother I didn't do much I just told him Mother should not give realisation to everyone. Anyone comes in she gives realisation. She has no discrimination and all that.

So in the night when I was sleeping his *[UNCLEAR]* came perhaps and threw me in a *[UNCLEAR* cut], I came down about 80 feet down, yes I saw and I broke my legs.

So after two days somebody brought some chapattis, eat... 80 foot, he might have come down on the other side from where is but... then he ate." “Then what happened?" “I was lying like that for four or five days and nobody bothered about me, after five days some people came, lifted me, took me and gave me a bath and all that” so then this Guru said “put these broken legs on your neck and go dangling to your Mother, who will cure you, not me." My really? Tears came into My eyes, so I said “What?" So I fixed his legs you see, he is still there, fixed his legs and so I said “what did you say?" “No I just said Mother has no discretion she gives realisation to everyone and all that. But what a punishment he gave him." You see that is what Gurus are, if they are real Gurus they don't want money, but they hit you hard, I know that, but I didn't know they were as cruel as this. The next time I met him, this fellow I told him “what do you mean by being so cruel to these people?" He said “Thank God he didn't die, such people should not live who talk such ill of Mother." Such Horrible things I said *[UNCLEAR]*. I said “I am not going to send anyone to any Gurus now, I am finished." There are some real ones who are real, who are extremely harsh, very harsh and troublesome, but this is the job of love, if you have an

ocean of love within yourself you don't have to torture anyone for that, it's not necessary. By talking to you you got your realisation, I didn't do anything to you, just for talk. If it was talk it is there and now it is becoming very easy, formerly I had to work at least for fifteen to twenty minutes and with the English even more... [Laughter.] *[UNCLEAR]*. One of the early ones *[UNCLEAR]* but now yesterday you saw, for five minutes, so now it takes on speed.

I have to leave tomorrow, I am sorry to say, I would have been so happy to stay over here with you, but I may go tomorrow, but he should look after these people and they they will look after you. Yes? I think now it is time. May God bless you. Very good, the Kuṇḍalinī here is very good.

***Contents: 1996-11-07*, Public Program, Friday before Diwali Pūjā (Dantheras Day), Basement Hall, Ritz Hotel, Lisbon, Portugal (scheduled; other day 11-08)**

[The electricity goes off in the middle of the talk, the candle on the little table next to Shri Mataji being the only light in the whole for quite some time until ore candles are brought in.] [Shri Mataji requests the translator to speak via the microphone. he tries but after some time he gives up as he feels it is pointless. Shri Mataji gestures to him to keep using the microphone.] Translator: Shri Mataji, it doe not work, there is no electricity.

Shri Mataji [to the translator]: That's precisely why I want you to speak via the microphone, because I am trying to fix the electrical fault.

[Shri Mataji gives him one more sentence to translate and with some reluctance he renders the translation via the dead microphone. There and then his voice reverberates very loudly and the microphone starts working again.] [When electricity is restored, Shri Mataji continues the talk:] You have to be connected to the mains.

.....

[Five minutes bhajans.]

Contents: **1996-11-xx Quote on the Meaning of Sintra, Sintra (29 kms NW of Lisbon), Portugal**

[The Pūjā was held in Centra, in the outskirts of Lisbon where the apparition of Virgin Mary took place.

Shri Mataji mentions it is a very special place for Śhrī Mahālakṣhmī Pūjā as Sintra refers to the central channel of Śhrī Mahālakṣhmī power.] In Nagpur the orange is called Cantra because Nagpur is in the centre. Centre is where everything configurates. It is derived from the Latin word `kendra'. In Sanskrit `kandrit' means to concentrate. Dhyān means attention. When you use your attention to concentrate, it means you put your attention there and then push it out. First you concentrate, then you emit from there. The center is where everything comes and is then distributed. Our centers [Chakras] are filled with energy [parasympathetic], which is then distributed to the whole body. For instance, when you concentrate you use your Āgñyā, you then move to the

left or the right. But then as a pendulum it moves to the left.

Contents: 1996-11-10 **Diwali Pūjā (Diwali Day), What State You Have to Reach, Quinta do Mar, Sintra (29 kms NW of Lisbon), Portugal**

Today, we are going to worship the Mahālakṣhmī which I think is very much worshipped in this country where they worship Her as Maria and also there's a swayambhū of Maria, you must have seen. And also there was an apparition of Her. First I never believed that it could be, but then after feeling the vibrations, now I know it was true, that She did appear here in an apparition. She appeared before Me, also, you must have seen, in a photograph. This is the principle by which you have risen to this state. The central path of your ascent is created by Mahālakṣhmī power for the Kuṇḍalinī to rise.

In the temple of Mahālakṣhmī in Kholhapur they always sing the song of “Ude, Ude, Ambe." So I asked the people there, “Why do you sing Ambe's song in Mahālakṣhmī's temple?" So they said that, “We don't know why we do it, but is it wrong?" I said, “No, because only in the Mahālakṣhmī channel Kuṇḍalinī can rise and Kuṇḍalinī is the Kumba." That's how, you see, they understood and they were really amazed that I explained it very well `cause from ancient times this song has been sung there and they never knew why this song is sung.

Coming to the point of Mahālakṣhmī, we have to understand what does it do, what it's help is that this Mahālakṣhmī channel or the Mahālakṣhmī's powers have

created within us a proper balance, a proper route for Kuṇḍalinī to rise.

Left and right has been balanced and She is the one who creates and makes a wider path for Kuṇḍalinī to rise. This is the path of compassion and love.

Through that compassion and love She creates this path because She knows that if the path is not wide enough the Kuṇḍalinī cannot rise. Ultimately, one reaches a state where you start seeking and when you start seeking, your Mahālakṣhmī principle has been awakened. That is awakened and sometimes it is very strong. Then you start seeking in a mad way. I am sorry to say that many are already lost in seeking, but there are so many who have now come to the right path and to the right ascent.

Another thing this Mahālakṣhmī principle does is to allow the Kuṇḍalinī's power to go to different Chakras also. To make a way to different Chakras and corrects all the Chakras. She is a very flexible force, I should say, which guides the Kuṇḍalinī into different Chakras and She understands which Chakra needs the help of the Kuṇḍalinī.

So you must have seen that when the Kuṇḍalinī rises how She pulsates, where She goes, where She shows the need is of your awakening.

All this works out because She is full of compassion and love that you should get your absolute truth.

We have many problems as it is, you know, in Sahaja Yoga because when people are ascending they carry on with them some of their past stones and they cannot climb. They try then they fall, they try then they fall, then they go up again, they fall. But today I'm going to tell you

about what is the state one has to achieve. As Śhrī Kṛiṣhṇa has said it in the “Gītā", describes Sthita-pragñya, the second chapter, but it's very difficult to understand Him, He is not so clear-cut as your Mother is.

So people don't understand what He is saying. And they ask the question, “How, how do you reach that state of Sthita-pragñya? How do you get to that stage?" But Gñyāneśhwara, when he wrote his `Gyāneshwari', he called it as the Sahaja Stithi, means the state of Sahaj. He didn't call Sthita-pragñya.

He called it as Sahaja Stithi, meaning the state of Sahaj.

So he describes the Sahaj in a very beautiful manner and very subtle. Of course, Gñyāneśhwara also, very few people understand, I think.

A person who reaches that state is like a mirror and so many faces pass over that mirror, so many look into that mirror, so many decorate in front of the mirror, but mirror is the same as it is.

So the person who is a Sthita-pragñya or the person who is Sahaja is not bothered about what is facing him, who is facing whom, where he is. He stays within himself. He contains within himself. Like the sun. If the sun plays with his different rays, he is not lost. All the rays again return to him. In the same way, all the senses that we have, all the senses that are there do play around, but for a person who is in a Sahaja state it doesn't matter, it makes no difference. He's not involved. He just plays around. Again, all of them come back to him. This is a state you all have to achieve. Then you are really Sahaja Yogis. But I still find people lost, getting money out of Sahaja Yoga, some people lost getting out of leaderships,

some are lost in getting jealousies and envies and all that.

So that means a lot of work has to be done, still, within. There is no need to work as such if you leave everything. That's why I always say meditate, because when you meditate, what happens, that all these things that are pulling you down are finished.

Gradually they disappear because you become yourself. You get contained by yourself and you are never bored. I am never bored. I don't know what boring word means, you see. When it is with you or alone, I never get bored. What is there to get bored? If you are not involved into anything you never get bored.

Another thing is you rise above all these things, like greed. Now people who are greedy are still involved making money here, making money there, all that thing. Those people who are still full of lust are still making, organizing, some things like that. But in a Sahaj Stithi you just watch. You are just a witness.

You are not lost into anything that is pulling you down.

This state is not difficult to achieve for you, at all, because you have crossed over your mind. Now all these things come to you through your mind. I've already said that mind is a myth, which you must accept. Myth is that this mind gives you ideas.

Some people think, “Yes Mother, but, yes Mother, but,." This “but" is coming from your brain, from your mind. The brain is reality, but not the mind. The mind says “but" and then you start feeling very depressed sometimes, unhappy, because some people feel even

bad because they are very good people, that there are so few Sahaja Yogis.

Doesn't matter. Just watch and this watching state, this witness state is the Sahaja Stithi. In that you become so subtle, you become yourself, meaning so subtle that nothing can disturb you, nothing can change you.

Now see the nature as it is. You know there are ninety-two elements and ninety-two elements, none of them can be, say for example, you cannot make silver into gold. Gold into silver.

The atoms are so arranged that they have certain valencies and apart from atom, even molecules are so arranged that they have their own structure. You cannot change. If you try to change then you will create bombs, atomic bomb, this bomb. It's absolutely destructive. It's only human beings who can change, who can transform.

Now look at the blessings that you are a human being and you can be transformed and you can be made into a new element that is the Self. This is the specialty of human beings. But if somebody there is a false Guru or somebody, he tries to do something, you'll explode. I have seen people who have been to false Gurus, they still faint, they still have problems, they still get troubled more than people who have been without them. They are also all right now, most of them are improved but this is one thing one should understand, that in one way when you are analyzing and when you are breaking an atom or you are breaking a molecule and trying to transform, it explodes. It doesn't work out.

The other way round is that when you try to synthesize, then you can form anything in the nature.

Like, this has now been brought out by synthesizing, this plastic is created by synthesizing.

Matter can be synthesized and can be brought together and human beings have to get synthesized also.

They can be synthesized better than matter because they change, they transform.

Now say example, there is gold. You make gold into ornaments, make into anything. It remains all the time, all the time gold. Gold is gold. It is there. It is not that by changing them into ornaments it changes. Its element is there. Gold is there. But for human beings they get transformed. When they are synthesized.

This is a very big difference between the matter and the nature and human beings. Matter, nature, are different absolutely from human beings. Human beings, once they are transformed, it's like a living process. They become like flowers but still it is not that you see in the nature. It's not the same as you see in the nature because nature doesn't have a mind. It doesn't have a mind. It just is under the control of the Divine or nature that it's working out that way. But here you are under your own control. Here you can control yourself. In this synthesis which is growing inside you what you find, that you are completely in control of yourself. You know what is happening to you.

Now you start seeing yourself separating from all these things.

Some people come and tell Me, “Mother, see, my ego is very bad, you just take it out." He sees his ego, he sees what is the problem is.

Somebody says, “Mother, my Nābhī is very bad, I'm still busy with the money." He sees it. First starts the knowledge about yourself, we call as Self-knowledge. But one has to even go beyond Self-knowledge. By that knowledge, what do you do, we have to see? When you have the knowledge, first we say there's no knowledge, people have no knowledge, they are ignorant, there's darkness, all that. Now the light has come, you can see. You can know what's wrong within you. Now you start separating yourself from all those things that you see as wrong with you. You see them getting out.

So many nonsensical things there are. Like, we have jealousies, envy, greed and lust. I mean, it's horrible things to say on a Diwali function, see.

So the Diwali is that one by one so many lights are enlightened and you start seeing it first. First you start seeing what is wrong with you and then, as you see it, you don't want it. Then you work out to get rid of it, to become clean.

Now this also knowledge disappears. You don't have to have any knowledge. You are there. You are there. There is no need to know about your Chakras, you are just there. At that stage nothing matters.

You become just like a stone, I can say. Stone with a brain intact and a heart intact and a liver intact.

You just don't mind anything, don't get upset with anything. You just enjoy the love and compassion that's flowing. And the ripples that come back to you, even that is lost after some time and you are just nothing but Sahaj. That is the state people achieved. In those days they achieved this state.

But with that, what lacking happened, that they'd get lost. They all got lost. They couldn't do anything to others. One person getting it, becoming great, finished. Or two persons at the most.

So now Sahaja Yoga stands first of all at the knowledge state, where you have the knowledge. First, you should first of all have full knowledge about yourself. The Self-knowledge should be complete. Then in the third stage we should say that when the knowledge is full you should get rid of all those things that you know about yourself, which are useless, which are hampering your progress, which you know is wrong.

Like, I see some dirt falling on My sarī, I'll just clean it out like that. Then you start separating yourself into that Sahaja state. But still in Sahaja Yoga you develop another dimension which is collective consciousness. That is the modern Sahaja Yoga. In the olden days they didn't have this, so they just all got lost. Now you have collective consciousness and in that collective consciousness you start feeling others, feeling for others, compassion for others and you start working out for others.

In that also, sometimes, you know, when you are working around, you think how much money I can make, what I can achieve as a leader or some sort of thing is still there.

But this collective consciousness starts growing. When it starts growing then you become as I said, drop in the ocean, means complete ocean. You become complete ocean.

So the ocean has its own Maryādās. It doesn't bother. It has to live with its Maryādās, it lives with its Maryādās. It

doesn't want to cross any boundaries, all right. Accept it. It will not cross its boundaries.

In the same way it happens that you are very self-contained. You are not selfish, but you become very self-contained. You are contained within yourself. I know many Sahaja Yogis are angry that I have not punished many horrible people who have been troubling Sahaja Yoga. I don't have to bother. There's Param-Chaitanya which is doing a lot of work. Let it look after it. Why should I bother about anyone? You see, after all, things are working out so why to interfere? My job is just to watch, just to see.

That's sufficient. There's no need for Me to kill anybody in this lifetime or to destroy. They are destroyed by themselves. I have told you that I need not expose people, but whichever country I go, I find people get exposed.

I run away from there, really, sometimes, thinking, God knows what more is going to come. Even little attention on any country, it just works out. Even without My knowledge, “Oh My God” I said, “When did I do that?" So one has to become, of course, he becomes the power of Divine Love, no doubt. He becomes the power of Divine Love, but he doesn't handle it. Left to this Divine power which is working, which is also separated from Me, you'll be surprised. I am alone. Absolutely alone. Even this power is separated from Me, but this power knows what is good for human beings, what is good for Sahaja Yoga. It works on it's own. I don't interfere. It's a reflex action, believe Me, it's a reflex action. Maybe you might say, “Mother, you have made it." All right, whatever it is, but I

don't interfere with it. I don't have to tell anything to it. It just works and it's working so well.

I'll give you an example. Once in England long time back, they said, “Mother, we want to have a very long summer." I said, “Why do you want to ask such things?" “No, no, Mother, we must have a long summer, a very long summer, very,." Three or four times they said it and it was a very long, horrible summer in London. And it's not like India where we have air conditioning, fans, something we have, at least hand fans. There was nothing there.

So we didn't know. We had a little gallery, we used to sleep in that.

So we went to the shop in England and we asked in London City, for a fan.

So they said, “All right, after three months. You order us." After three months when it will be very cold they will give us the fan.

We said, “We don't want any fans." So My daughter sent two fans by plane. And that's how we managed. You see, Indians, we feel very hot because we have had a lot of sun in our country, we feel much hotter than any one of you. The way you sit in the sun, you know, we can't understand. You know, in India they used to say an Englishman and a mad dog can only go in the sun.

So our situation is like that, that we cannot go in the sun because we have had too much.

And this summer, you see, was so tremendous, so tremendous that after that one thing good happened.

That ochre colour appeared on the leaves and then gradually the red and all that of the autumn season was best at that time and then one Sahaja Yogi dreamt that, “Mother asked me to drive in Her back yard." So he told everybody that, “Mother has been asking me to drive in the back yard." So I telephoned to him, I didn't know he had dreamt like that, that, “Can you come along for a while, I want to go and see this autumn all over England." So he came and we were driving, miles together and then they told Me, “Mother, it was so, he told us that that was My back yard." Can you imagine that he was driving for miles together, beautiful, just like Canada, the whole England was filled with the beauty of autumn.

So even if there's something like that happens, it is compensated. It is compensated and so beautiful it was, all the people were out in the autumn to see the beautiful colours of the nature, of different greenery, yellow, ochre, all kinds of colours were there. Surprisingly, in that country you never see all that. And because of the sun shining so bright, it was compensated. It was compensated by this Param-Chaitanya.

So the Param-Chaitanya is looking after this. All these things are managed by Param-Chaitanya. I am doing nothing. I am Nishkriya. I'm just sitting down and watching. To Me nothing matters. You see, it's working out slowly and steadily. Ha, if you tell Me something supposing, they said, “Mother, we prayed to You and it happened." All right, maybe, these people must have heard, around Me, not Me, you see and they must have done the job and for that I'm not responsible, in no way.

Like one lady in Mexico had a son, was very sick and was about to die. She wrote a letter to Me, three letters she wrote that, “My son is going to die, he's a young fellow, studying in Harvard." I didn't do anything. I never wrote to her. Fourth letter came that he's completely cured. Now I didn't do that because I was just sitting in one place and how is it, it has worked out.

So everything, you see, you think I do is not done by Me. Is done by this Param-Chaitanya. Because I'm also separated from you, completely, absolutely separated.

So they say, “You pray, now." You can pray. If you pray, you pray to these deities that are around, you pray to all these ganas and all that, not to Me. Because I have nothing to do with it. You see, they don't tell Me that I have to do this or I have to do that, so why should I tell them do this or do that? It is like that.

And in that state only we can say you are in a Sahaja state, where you don't desire anything, you don't want anything. I do everything. All kinds of things, I am doing. Like the sun is doing, I am also doing in the sense that I'm looking after things, flowers, this that. I am also receiving presents from you, I'm receiving this from you and then see, I don't receive anything. I don't have anything. I have no interest in it. But you want to give for your joy, all right, have it. You want to put flowers, all right, you can have flowers. Even if there's flowers or not makes no difference to Me as a person, I'm saying. But as Your Mother I love you. All of you I love. But I don't do anything as such to love you. And everybody says, “Mother, You love us so much." When? When did I love

you. I never even kissed you. But you always say I love you very much.

So what is this. Who is working it out, this? Is something which is not Me, beyond Me. This is the state in which, once we rise, we call it as Sahaja Stithi. In the Sahaja Stithi you think you are doing nothing. Everything is working out.

But at this stage if I tell you, you say, “Oh, we are not doing anything. Why should we spread Sahaja Yoga, it's not our job?" Just now, that's not your stithi, that's why.

So you have to rise up to that state. That's only possible when you are in the knowledge state, where you have Self-knowledge, the knowledge of the whole world. But if you go beyond knowledge then you must have seen many a times, I just say something. I just say something and it is there. I never feel vibrations of anyone or anything. I don't feel My Kuṇḍalinī, either nor any Chakras, nothing, but I know, know automatically like a computer. But that computer also I am not. Just it's trouble, it's difficult to explain to you what is this stithi is because you have to achieve it. Once you achieve it then you are in a very subtle state and that subtle state is nothing but bliss. But that bliss also you cannot enjoy. I don't know how to enjoy everything. Supposing now you say, “Jay Mātājī." I forget even you are calling Me. I also say, “Jay Mātājī” finished.

See it is such a simple thing one has to understand that the state in which one has to rise is a state where without doing anything, everything works out. If that is your state, all right. But it's not so.

So you have to rise up to that state by doing. First you have to do it. First you have to know and then knowledge has no need, you don't have to know, but first that has to be worked out and brought to that level.

Now Diwali has the significance that on Diwali day, what we do, we put lights all over.

So that we put Sahaja Yoga everywhere. But does the light know about itself? Does the candle knows about itself? She enlightens everything but she doesn't know. Like the moon, which is giving moonlight, does it know itself? Does he enjoy? Nothing. In the same way it happens that on a Diwali day you are, what you are doing, is enlightening people, you are enlightening them, you are doing all this for them, it's a good idea.

You must do it. But also know that you have to become the lamp yourself which doesn't know yourself.

So there are two messages. The first one is that we have to enlighten the world, we have to enlighten others. This is the first one. Then we have to become that which is the light itself and light itself doesn't know. Yesterday you were singing, “You are the light” you are this thing. All right, so what? I was just saying, `Yes, I am the light, I don't know Myself." That's the state where you don't know you are the light. You just don't know that. It doesn't come into your head. Even so many times you have sung, you have said thousand names there are, everything, but it doesn't come into My head that this is Me you are talking about.

Now when I say this I don't know how you will react. Because human beings are queer birds, you see.

You tell them something. Maybe that your ego might come up and you say, “Yes, yes, I am also just the same." There are many, many who came like that, that, “I am higher than Mātājī." Ba, ba maybe, I don't know. There are many who said that, “I am Kalki." Nowadays there's one fellow going round saying, “I am Kalki, I am this, I am that." All right doesn't matter. You be that, very good idea.

But if I say I am Ādi Shakti that means I don't know what I am, really. I had to say because people said, “Mother, you have to declare." Declare what? Whatever I am, that I am.

Now I find by declaration you people started growing more, so all right, have it that way. But there is no need for anyone to declare anything or to say anything. That is the state one has to achieve.

But to get to that state you have to work. And work is to spread Sahaja Yoga. You have to enlighten many lights. That means you will realise that you are the light which is enlightening all that and then in a subtle way you will realise that, “I am the light." Many Sahaja Yogis are doing a lot of work and working it out, spreading Sahaja Yoga. It's a very great thing that has happened. In so many countries, the way it has spread, it has removed the darkness of religion which was outside. It was darkness of so many, racialism, thisism, thatism, all it has removed.

So this has worked out, the cleansing. For you to have the clean water to swim.

Once you start doing that then you realise gradually that now the sea is clean, we just watch, we just see how it is

working. I hope in your lifetime only, you achieve this state where you achieve your complete work of Self-realisation to others.

Those who do not give Self-realisation to others, who just come for the Pūjās, this thing, are mediocres.

They cannot rise very high. This coming to Pūjā is what, like, you just rise higher with the Pūjā then again you go down.

But those who steadily grow will grow into this state, I am sure, in My lifetime I should be able to see such people who are such that if they stand here they emit peace, they emit light, they emit everything.

Because they are the light. They don't have to enlighten, but they are the light. Such a stage has to be developed and to be worked out within yourself. And this state has been described by so many poets, so many saints and everything, but they were at that stage and people thought, what is this they are talking? They thought they were mad. Even for Christ, they thought He is to be crucified, because they couldn't understand it.

Now you are gradually growing one by one, step by step, so now you understand this. You understand Christ, you understand all these people and at this stage you have still to work. Those who do not work for Sahaja Yoga cannot rise higher. You have to work for Sahaja Yoga, you have to spread it more, you have to work it out, enjoy each other, this brotherhood, everything. All the qualities of a beautiful personality should be there.

Unless and until you achieve that state, then you can only rise higher to that stage which I am describing is a Sahaja Stithi. In that state you will be perfect.

But you must get rid of all these things and today is a day, also of Mahālakṣhmī. The first thing is, I think, this madness about money. This should be understood that it's real madness. Those who are rich have no money. You ask a rich man, he'll say, “Oh, I have no money." Why? What is all this? “This is no money".

You ask the poor man, he has no money. A rich man has no money.

So it's a kind of a greed which is never satisfied, which never helps you. All these little, little things have to first drop out. Then your work should cleanse you. In your work you will know whether you are cleansing or not.

In the work you will know how you are doing your work. Once that is done, then I think I am sure some of you will achieve that state in My lifetime, in your lifetime.

That's what I want today to tell you, on a Diwali day, that we have to become subtler and subtler and subtler.

We should not be influenced by outside things. Like, the outside thing is that, some sort of a fashion starts. People who follow fashions are stupid. They are like blind mices [mice]. Anybody can lead them into anything, now do this, they do it. That, they do it.

So if you try to follow any kind of a thought which is given to us by somebody else, in that thought you'll completely lose yourself and you'll become, “I am this, I am Christian, I am Hindu, I am Muslim, I am Muss leman." Stupidity. You are yourself. You are the Spirit. And when you become the Spirit then you start knowing so much and that knowledge is very important.

This is the gap between a saint and a normal human being, which you have crossed gradually so you know what are the problems of the human beings are and dealing with human beings, you know how to deal with them.

In Sahaja Yoga only the collective consciousness, in modern times, has come. This collective consciousness, also the saints had, but they would not say. They would not say anything. They would not bother.

All right, this fellow has this Chakra, let him go to hell. Doesn't care. It's not a question of not caring, but not bothered. They were sitting in a state which was just recording, all right. An ugly man goes before the mirror, all right, if a beautiful person goes before the mirror is all right.

In the same way these people start allowing people to pass through but we have to understand, still we have to grow. We have to still grow by working it out. Those people who are working it out and spreading it all over are the ones which are really very much there and to them, I must say, the Param-Chaitanya is just their servant.

I have seen people who desire something, it works out. They ask for something, it works out. For that, now, what should we have, is the point.

After getting realisation, after getting everything, what should we have that we develop is the faith.

Faith in yourself. Faith in that you are the Spirit, that you have the light and you have to enlighten others.

This faith when it grows deeper and deeper then you think, oh, what I am. I am the Spirit. If you are the Spirit then this whole nature is with you. I know of some Sahaja Yogis. One of them was a fisherman.

He was doing Sahaja Yoga work [in 1981]. He has tremendous faith in Me and somehow he was going to another village to do Sahaja Yoga work. When he came out of his little hut he found it's all full of clouds, black clouds.

So he raised his hand and said, “See now, I'm going for Mother's work. And you dare not start raining. You keep as you are, hanging there till I finish my work” you see. Because he was going by boat. And other Sahaja Yogis thought, “What is he talking about?" They all got into the boat, they reached the other village. They gave realisation to others, he finished his lecturing, everything, he came back on the shore and he entered his house. When he was closing the door, “All right, so go ahead” he said. And he managed.

So the complete faith that this Param-Chaitanya is like your servant, is all the time waiting there to serve you. Whatever you say will happen. But first you must have complete faith in yourself that you are a Sahaja Yogi.

Even now I find, you see, people have some lust, some sort of a horrible things in them.

So first you must be established in Dharma. Dharma, is, as you know, is righteousness. If you are in the righteousness, there's no question. There's no question that this Param-Chaitanya won't obey you. But supposing you want today something and it doesn't work out, then even to get disappointed itself is not a very good thing.

Disappointment also is a sign of your immaturity. What is there to be disappointed? Maybe that that was good for you.

Supposing I lose My way. I'm going this way and I lose My way, I don't know where to go.

So I get lost, it's all right. What is there? Wherever I am, I am there. How can I be lost to Myself. And then what I find, that I had to go that way because I was to meet somebody, I've been wanting to meet somebody and meet that person there. Can you imagine? Such things happen with Me and even if I don't meet, so what? I was to go that side. I have to leave some vibrations, perhaps. It's like that.

So once you know that whatever you are doing in command, full command, full faith, actually the whole authority comes to you through your faith which word is satta in Sanskrit, meaning the truth.

The truth gives you the authority. If you have the truth with you, you have the absolute truth with you then you have the authority and the authority is such that that authorizes you, not others, but to you.

This authority that you have works and works. I've seen with simple Sahaja Yogis, very simple uneducated also, are very powerful Sahaja Yogis, are very powerful Sahaja Yogis. But they have one thing, is faith, complete faith.

Then another word in Sanskrit is titiksha, means patience, suboori, patience. You must have patience.

If you don't have patience, you want immediately something to be done. How will you see the whole thing working out? Many people are extremely jittery and very

fast running. This world is running so fast and you are the ones who have stood out and watching this rat race. You are not one of them.

So must have titiksha, means you must have patience.

So you must have faith in yourself fully and also patience, how Sahaja Yoga is working out or how this Param-Chaitanya is working out. If it works this way, all right, that way, all right. It is some meaning.

If it works this way, there's some meaning. If it is that way it has some meaning.

Now another thing which is important is the faith in your Guru. If you have faith in your Guru, Param-Chaitanya is kind to you. It's very helpful. But if you doubt, then Param-Chaitanya also doubts you because Param-Chaitanya knows you through your Guru, whether it is Me or any other real Guru, it's the same. But with Me, of course, because, you know, I'm very forgiving so people start taking liberties.

With another Guru, you see, he will beat them. He'll do all kinds of horrible things to you if you are not there.

So I've told you many stories about the Gurus, how they treat, good Gurus, their disciples.

But I forgive. I don't say anything. Let it be, it doesn't matter. Because I think by leaving them alone only, they will rise and they will come up to this stage. But it happens sometimes that it may work the other way round, that if they are forgiven, then they take it for granted.

So the faith in yourself is with patience you watch and do not get disappointed with anything whatsoever. Now, just

imagine so many people have got realisation, so many saints in this world, have you seen? Yesterday I was surprised the way the French were singing so well. You know, first time I had to take a harmonium to teach them how to sing one line. Half an hour I tried, I couldn't do. The same French have reached that state of creativity.

You see, all your potential will rise. It will express itself, but be careful not to get into ego about it.

Gradually it will flower and others who are surrounding you will get the fragrance of it and they'll come to Sahaja Yoga. That is the blessing at that time, the blessing of the real Divine will be that you'll be raised to the state which we call as a perfect, `pūrnattwa', complete. That completeness will come. But you judge yourself. Are you absolutely one with Sahaj? Are you absolutely dedicated to Sahaj? Or other things are more important to you than Sahaja Yoga? Then, go ahead.

There is something to be understood very clearly that there's no competition in Sahaja Yoga. Cannot be. There's no competition. There's no envy, there is no back biting, nothing. It is, you are different people. You are saints. Your style is different. You are absolutely above all these things. You cannot be dishonest, you cannot cheat people, you cannot do this. And if you are doing that, even now, then please try to understand that you have still to grow into it.

Some big people think they are very high up in Sahaja Yoga. It's not so, it's not so. If by thinking what you are, then you are lost. What you have to do is to understand “What have I done? How many people have I given realisation, to how many people have talked about it?"

People are shy, even, to talk about Sahaja Yoga. I have seen one lady was travelling with Me. Very hot. I said, “Ba, ba who is she, this one? I don't know." So she told Me the name of her Guru. She said, “My Guru is like this, Guru like that, like that." I said, “My God, this heat coming out of this woman and she's talking so much." But a Sahaja Yogi will not tell anybody what is Sahaja Yoga.

They feel shy. They'll have a hundred friends, they'll meet a hundred friends but they will never tell them what Sahaja Yoga is. They'll be shy to tell them. Ah, they wouldn't mind going to parties, you see, if the others are drinking they'll say, “All right, I don't drink." But they'll not say, “I'm a Sahaja Yogi, I cannot drink, by nature I cannot drink." They will not say that.

So this is the third point, one has to know the announcement. You must have faith in yourself and you must announce. All the saints announced. They were killed for that, you saw how Socrates was given poison. Doesn't matter. Nobody's going to kill you now, in these modern times, there's fundamental rights to exist.

So nobody can kill you, take it from Me, but you must announce. And the announcement should be with full faith and understanding about Sahaja Yoga, how important it is.

The purpose is to transform the whole world. With your transformation the whole world transforms.

It's a very complicated thing, otherwise, Sahaja Yoga is extremely complicated because how it works.

The other day, you remember, the mike had failed completely and I was giving the lecture and still I was

talking. The mike had failed but everybody was listening to Me. What had happened? Did I enter into the ether? What happened? I don't know. I didn't even know that mike had failed. I was thinking there is mike, that the way people were listening to Me, but then they told that half lecture was without the mike. And everybody was absolutely listening to Me.

You see, it is something that one has to wonder and appreciate what things are happening now, where are we going. We are going into the Kingdom of God and all the blessings, all the bliss will be on you.

Then this bliss, knowledge, everything becomes one, nothing but bliss and you are in that state of bliss which you don't even know, you are just there. The greatest bliss is that you don't know even anything, you're just there.

I hope all of you achieve that state with this Diwali being done in Portugal, which is a special place, I think, of Mahālakṣhmī because She appeared here as they say and also this swayambhū that we have, also is that of Mahālakṣhmī face, so I'm sure it will work out for all of you.

It's a little subtle state I'm talking about but it is, I have to tell you, that one has to rise up to that state and that state is very, very easy to achieve for you. It slowly, gradually it, then you don't have to do anything, you go into a village and everything would be there.

See, now, what happened. I went to Cairo. Everybody was saluting Me. I was wondering, what has happened to them? I went to Leningrad, thousands came to My program. I asked them, “How did you come to My

program?" They said, “It's obvious from Your face, it's obvious." They just saw a small, little advertisement in the newspaper, “It's obvious that You are Divine." That should happen. And then you can announce that Sahaja Yoga is the only way, then you can announce. There's no harm. People feel very shy to say something to their friends and things. And you must know that all of those who you love, who you know, will go to hell or where, they'll hang in the limbo or what? If you have achieved it you should pull them out also. They may not. They may not be seekers, doesn't matter now. I think we are finished with the seekers now, must be, we must have people who are not so seeking, it looks like that.

So may God bless you all.

Contents: 1996-11-25 **World Philosophers Meet on the 700th Birthday of Śhrī Gñyāneśhwara, M.I.T. College, Pune, Maharashtra, India**

I bow to all the seekers of Truth.

At the very outset, we have to know what is the truth. Whatever I am going to tell you, you should not believe it blindfolded. We have had enough trouble with the blind faiths.

So I would just request you to keep your mind open to understand what is the truth.

First of all, I am so enamoured to see so many people trying to understand divinity of Śhrī Gñyāneśhwara.

He was too great. He was too subtle. And I don't know how many people really could understand Him without being themselves Self-realised, without being knowing their self.

Even Mohammad Saheb has said that “If you do not know yourself, you cannot understand God almighty." Everybody, even Christ. Christ has emphatically said it. I don't want now to tell you how many people have said that “You have to know yourself." Whether it is Jainism, Buddhism, any `isms' that has sprouted but how many of them are trying to know the self? The problems are coming in this country, or in all the countries, all over the world because of complete ignorance about themselves. We go on giving lectures: “Don't have this. Don't do that. Don't have enemy.

Don't hate people." All sorts of lectures are going on. That has been done many a times now. People can't give it up. They will have some difficulty in giving up this or that.

It has to be understood that still human beings have to rise higher than what they are. They need a transformation. Talking is not going to help. Words are not going to help them. I'm sorry I have to say this. I'm so happy there are people who are willing to listen to this. Ādi Shañkarāchārya has said very clearly, “Mother remove my shabda jalam” it's “Remove this mess of words." The truth is that you are not this body, this mind, these emotions, this intelligence, this ego, these conditionings, but you are the pure spirit. We see here beautiful flowers. We take it for granted. We don't even think that this is such a miracle, that the Mother Earth is producing different type of flowers, different type of fragrance. We don't understand that we ourselves are a miracle. We have no valuation of our own life because we don't know ourselves.

What Śhrī Gñyānadeva has described in His Amṛuta Anubhav [Experience of Ambrosia] is something which you can only really appreciate when you know yourself. For example, He was a master of similes, I must say. And He has tried to convince the so-called intellectuals and rationalists through His own great expertness in using similes. One of the similes, there are so many of them, He talks of the Amṛuta Anubhav is the experience of the Ambrosia. Experience, again it is the experience, not just talking about it. And this experience, He has described like this, beautifully, that there is a picture, you see, beautiful painting where you see the rain and see the nature and all the beauty that nature can provide. You're watching it.

You're enjoying it. But you are just seeing it superficially. You have to enter into that rain. You have to enter into that area of beauty. Otherwise we are just superficially doing everything.

He has given so many similes that in this short lecture I may not be able to tell. *[UNCLEAR* Or/Oh] one after that, He has tried to describe the state we call Sahajavastha means the state of oneness with the Divine, can call it Sahaja. Sahaja means... means one with you, this spontaneity. This state when it you achieve, I should say, not achieve but it happens to you. When you have this experience of Sahajavastha then what happens to you? He says, “Like at the sun. Sun has got its rays and the rays go and play all over but again they go back." In Marathi it is, [Marathi]. “They get content in themselves." In the same way, a person who is a realised Soul, he is

doing every kind of thing outside but he's absolutely absorbed inside.

Because inside you are so glorious, so beautiful that one has to really rise to that height of Sahajavastha, state of Self-realisation.

It is not at all difficult, this is *[UNCLEAR* positive]. The theory about getting Self-realisation when people hear about it. *[UNCLEAR]*. They want to say so many things that you get frightened. You have to stand on your head. You have to go to Himālayas. You have to stand on one leg. All sorts of thing people... For that, Guru Nanak has said, “Kahe Nanak bin āpa chinhe, mite na bhram ki kāi." [“O servant Nanak, without knowing one's own self, the moss of doubt is not removed."] “Without knowing yourself, you cannot understand." Every one of them in the 16th century and whose Gñyāneśhwara near 12th century, has said the same thing, all of them say the same thing because truth is seen by everyone the same way. Now one can say they were also tortured and troubled. I agree. Because of ignorance. It's complete ignorance and this ignorance we can easily prevail upon by becoming ourselves.

Today I am going to tell you, we have within us all these powers. As Śhrī Gñyāneśhwara had described in the sixth chapter, that there is a force called Kuṇḍalinī within us which when awakened gives you the self. But as you know everywhere, there are fundamentalist, we call them Dharma-martanda. And they said that “This is something that one should just avoid, this we cannot." Because they can't do it.

So that was not read anymore. Neither people ever tried to have.

But in these modern times, it is predicted that is going to happen to thousands of people [and UNCLEAR]... it has happened also. A specialty of this age, that it is happening all over the world. I am surprised Myself. This is the power that you have within yourself. I am not obliged. Neither you are obliged. It is your own power that rises and gives you this Selfhood which is being described by Śhrī Sant Gñyāneśhwara. And this state of Sahajavastha is very easy to achieve.

But people don't want to have something simple, you know. I was surprised, like blind people they can't find anythings. They go round, round, round, round like that they go round, round, round. It is very simple. It is within you, is your own.

Now look at this mic, just now it failed, so you understand. If it is not connected to the mains, if it is not at all connected to the mains, it has no meaning, it has no identity.

So it has to be connected to the mains. Now what is that mains is? That is the All-pervading Divine Power of Love. By saying, “We must love, we must not hate” it's not going to work out. I can understand. Unless and until you are one with that Divine Power, you cannot get the power of love. And this is very easy to achieve.

I'm not telling you something very fantastic. There are so many sitting here who have known this and have had it. But you should have an open mind. What are the hurdles? First I said ignorance. Another is rationality. This

mind, I would say, is a myth. It is made by us through our ego and our conditionings.

And when we use this mind to transcend or to go higher, it cannot work out because it is artificial. How will it work out? It will only work out when you take to the gifts that you have already within you. Now this is the gift of evolutionary process. You are a human being but you are not yet perfect. That's why all these problems. Integrate religions through your mind. Integrate this by your mind. It will not work. I tell you, it will not work. The integration must take within, first of all. And then you see for yourself that this is all falsehood.

All religions themselves should have been self-oriented but they are not. They are money oriented, power oriented, this oriented, that oriented. Because of ignorance only, again I am saying. Why did they torture Śhrī Gñyānadeva? Why? When He's not here, we are celebrating. What happened? Why? Because He had the truth with Him. The one who has the truth is always prepared. He knows that He'll be tortured, He'll be troubled. And nobody is going to listen to such a person. That's a fact. We have seen all the saints have suffered. Not only in India, all over the world. Wherever there have been people who are saints, who have talked of divinity, of the truth, they have suffered. Nobody accepted them.

For example, in England, William Blake, they thought he was a mad man. When everybody is mad, I mean, if you go to a mad house, to a lunatic asylum, all the lunatics think that you are mad. Same way it has been happening. It's very sad.

So many have come on this earth. Not only in India, as I said, all over I find them. They were Sufis. They were people of great talents. But they suffered. All of them suffered.

Even Socrates had to take the poison.

So you can imagine the people who have been getting involved into some sort of a destructive behaviour towards saints because they were blind.

So one has to forgive them. Because blind man can hit anyone.

They can't help it. But what about today when we are so much enlightened, you know, people are talking big things and all that is happening in this world.

What is it that is keeping us away from the truth? And that is again, I should say, the hurdle is of Mister Ego. I'm sorry to say. This ego comes because we think we know science. We can't even make one drop of water, we can't even make our own a little amount of Mother Earth, we can't. Humble down and see for yourself whatever science has achieved is nothing compared to what exists. With science you cannot reach reality. But from reality, you can come to science. Because in the light of reality, you can see how far we have come in science and how far we have to go.

It is very very important because I think you people represent a very acme, I should say, of human beings. And I would request you, all of you, to understand that unless and until you get your Selfrealisation, no use talking about anything. In Marathi, say [Marathi]. You have words and words you eat and words you talk and words you give. These are empty words. But when the

Kuṇḍalinī within you rises, I... I don't know if I am suppose to tell... talk about Kuṇḍalinī or not, but I can't do without it, that power that is in the triangular bone, which is in the sacrum bone. Why was it called the sacred bone by Greeks? This sacrum bone contains that power, three and a half coils, which rises through your six centers.

Now these six centers are responsible for your physical, mental, emotional, also spiritual being.

So when She rises, spontaneously, you don't have to do anything, spontaneously It rises and pierces through your Fontanelle bone area. And you become one with this All-pervading Power of Divine Love. In Sanskrit it's called `Param-Chaitanya'. You do become.

So, it has to be an experience and the experience that you can feel this power on your finger tips.

Imagine, the fifth imam has said that “When the time of kiyama, transformation, will come, your hands will speak and give witness against you. You will know the truth on your palm." This is exactly what happens. And you know the absolute truth because everybody says the same thing.

So how will you quarrel? How will you fight? How can you have wars? [Laughs.] No question.

Such description of such people is in Pasaydan, absolutely the same. That they become your relation [Marathi]. They become your relations. All other relationships drop and you become one with all of them, whether they are Christian, Hindu, Muslims, or anything, whether they are black or white, whether they are from Russia or from England. You should see how the world

becomes one. But people don't like if you talk of global oneness. They don't like it.

There was a big thing against Me that I'm talking of global religion. And why? Because they want to have different religions to fight. That's all. Why do they want to have different religions? Just to fight. Otherwise I don't understand why it's essential to have different religions. And when people who are rationalists, they see the religion the way it has been created, a new atmosphere of hatred, no peace at all, then they criticise, naturally. Because what is the outcome of it? I don't blame them for that.

The fighting comes because, again, of ignorance. We have nowadays, wars after wars, cold wars, I don't know, all kinds of wars in the name of God. Can you imagine such a thing can happen? How can we fight in the name of God? How can we have killings, violence in the name of God? Now one may say, our value system is finished. Why? How are you going to put it right? What is the solution? Only solution, you have to have Self-knowledge. That gives you the strength. That gives you a kind of a personality which is described by Śhrī Gñyāneśhwara. That is the personality we have to achieve. And that is not, not at all difficult. It works out in no time. But you are still adhering to some ideas. If you are in the clutches, I always say, of the crocodile and don't want to come in the boat, what can I do? In the name of God, these are crocodiles. Or maybe some other name you can give it too. And thus people are lost.

When you see, you just cry and weep. You don't know what to say, when you hear that this, uh this, whole

community was tortured because they follow a particular religion. Then another community is trying to attack because they are following another religion. When we say, in essence all religion are the same, is just same. It is not that it is a part and parcel of our understanding. To understand Gñyāneśhwara, I would say, first you must have your Self-realisation. Otherwise you can never understand Him. I've heard the lectures on Śhrī Gñyāneśhwara from many, many people and the life they lead is surprising. How can they do it? I am talking about the power of love, love of God. Once you achieve that power, this power can do so many things of which we are not aware. We don't know what things we can do. This Kuṇḍalinī which rises, She is your own Mother, your personal Mother. She knows everything about you. She knows what are your problems of the past and what are your aspirations. And She's your Mre... Mother. And She's anxious to give you, your second birth.

Now when you were born, your mother took all the problems. In the same way, She does it. Many people have talked so much against Kuṇḍalinī. When the Kuṇḍalinī rises, this happens, that happens.

Now I've been doing this kind of work for the last twenty-five years or so, I've never seen any one person suffering or having all these symptoms that they describe. On the contrary, first when She rises, you become so peaceful.

Now how do you become so peaceful? A thought rises and falls. Another thought rises and falls and we are all the time living on the cusp of these thoughts. These thoughts come to us from our past or from our future. But if I say, “Be in the present” you cannot. When

Kuṇḍalinī rises, what She does, She elongates those thoughts, actually She does.

So within you, there is a state which we call as thoughtless awareness, which is called as Nirvichar Samādhi, thoughtless awareness. You are aware, you're absolutely aware, but there is no thought.

At this time, your memory becomes just like a photogenic memory. Your temperament is so detached.

Supposing your are sin... standing in the water or in the sea and the waves are coming on you, they are frightening, there are all problems but once you get onto the boat, you can watch them, enjoy the fun, see for yourself what's coming up. But supposing, if you can, become a great swimmer, you can go down and save them, those who are getting drowned. You can do it. It's not difficult at all. But you have to become that. And that is within your reach. All of you can get it. It's not difficult at all.

For that, what do you have to do? Nothing, Effortless, Sahaja. Sahaja has double meaning. Sahaja, saha means `with' and ja is `born'. `Born with you' is this power `to become one with the Divine,' this Yoga. And that is what He has described. Everybody, Guru Nanak has `Sahaja Samādhi lago.' None of them has said that “By standing on your head, you can do it." I asked one fellow, why are you standing every day on your head. “Because the Kuṇḍalinī will rise." I said, “Does it move with the gravity or with love?" All funny ideas we have, I tell you. And with these funny ideas, where are we going to reach? No where. We have reached no where so far. When I see all these people, you know, My husband was in the U.N. He

was Secretary General of the Maritime Organization and I met so many great people, very great, shaking hands with them. I was surprised, Where are they living? What are they doing? They are not united at all.

I have a feeling, I must tell you, to get united, first of all, you have to become Self-realised. Then what happens, the second state comes in which we call as `collective consciousness'. Your consciousness becomes collective. You don't have to say, “You are my brother. You are my sister." Nothing, you just become, you just become moral. Becoming is the point, I'm saying. When you become moral, I don't have to tell, nobody has to tell you, give lectures or anything of the kind.

I have seen people, I must tell you, drug addicts, overnight they have given up. Alcoholics, overnight they have given up. I never told them. If I say, “Don't drink” in a big hall in London, half of them will walk out. I dare not say such a horrible thing.

So I don't say. I say, alright, you be seated, have your Self-realisation.

The greatest blessing of this Kali Yuga, this modern times is this, the greatest blessing is this, that there are so many seekers of truth are born. Christ never had so many. Even Gñyānadeva didn't have. Till the twelfth century there was not many. Till the sixteenth century, there were not many. But today, there are many, many seekers, beautiful seekers. They might have taken drugs, doesn't matter. They might have tried anything, doesn't matter. Whatever has happened in the past, doesn't matter. They get it.

And that is the state Gñyāneśhwara has described.

If you read His Amṛuta Anubhav, you will know that He is describing that state.

So then people can say, “Oh, it's very difficult. How can we give up these, how can we give up all these enemies of ours? We cannot." But they just drop out. Because also you develop this new awareness, new dimension in your awareness, of collective consciousness by which you not only, know yourself but you know the centers of others, centers of people who are far away, who have died. Then you know where is the problem. Then you don't talk in the language, “He is a Christian." Nor, “He is a this thing or that." But what you say is that “This is the center is catching." Alright? If you know how to cure your center, you can cure the centers of others also. For that, you don't have to be a doctor or anything. I did medicine, I agree, because I had to talk to doctors, to psychologist. I thought I'll have to break My head to talk to them. But now I was surprised that so many doctors, also, have understood that behind all our personality, all our body there is a subtle system that works it out.

We have to handle everything through this subtle system.

When we were studying medicine, now it has advanced so much that I don't know what to say because we used to remember everything in about the prescription of every little thing. Today, only antibiotics.

Bringing to the hands something *[UNCLEAR* just this] and things like that. Now once *[UNCLEAR* you're a] Self-knowledge, you can cure others through collective consciousness. You can easily cure others, not only you cure yourself.

Of course, I don't know if you know, there are many people who have been cured through Sahaja Yoga. Cancer, of course, even AIDS, I must say. It can be cured. But we are not here to cure. That's the main thing, once you say, “You can be cured” all the mad people are standing in front of your house *[UNCLEAR* saying, “I want to get."] No, that's not so. You're cured in the sense that inside you are cleansed completely. “Cleans me" said that, “so I would be whiter than snow." And a person is amazed at himself. How? What has happened? Where is that gone? Where is that hatred? Where is that anger? Where is that envy? Where is it gone? It's like a lotus that comes out of the water and flowers and gives fragrance to that pond, making it so beautiful. The time has come today for thousands and thousands and thousands to... to become lotuses. Is the blessing, as I said, this is the specialty of the modern times which, of course, we don't very much appreciate.

Everything that is constructive starts working within us, whatever is destructive, just drops out automatically, automatically. Like a person who is not blind, say, there's light. You can see who is sitting there, how you have to walk, this is the road, you have to come, nobody has to tell you. But supposing you are absolutely blind, there is darkness. What will happen? Just a chaos. And that is the chaos we are facing now.

To achieve that peace all over the world, transformation of human beings is very much *[UNCLEAR* needed]. Try anything else. They have tried. Does it work? Transformation of human beings in large scales will achieve that so that you enter into the kingdom of God.

Not only that, but you are helped, supported and looked after all the time. Whatever is promised in the scriptures, you're amazed that you get that.

Is not falsehood. In no way it is falsehood. But to achieve it, you have to rise into the realm of Divine Love. Unless and until you are there, in that Divine atmosphere, it's all talking, talking, talking. When they told Me, I have to speak, I said “Uh? It's difficult you know because I have to tell them the truth." I'm sorry I had to tell you because how long are we going to postpone it? It has to work out in this great city of Pune. It's called as Puṇya patanam. I built My house also here.

But it's not so, I must say. They were after My life for nothing at all. Alright, doesn't matter. But on the whole, people, here, have to really know that they must have done some great deeds, some Puṇyas that they are born in this Pune. And the way they are going on, I think they have forgotten completely. They have no idea as to what they were. But for people who are really now serious about it, who are thinking that “we should solve the problem of the world" have to accept that the transformation of human beings is needed.

For that you can't pay. First of all, one should know, you can't pay. It's a living process of *[UNCLEAR* humility/humanity]. If you put the seed in the Mother Earth, how much do we pay to Her? God doesn't understand money, first of all. He doesn't understand banks. This is our headache. We have created it.

So it has nothing to do with money. It is just love and love which is pure. In Sanskrit, it's called nirvajay, means

that you don't even pay the interest on it. That is how it is and so powerful, so beautiful.

It does not only give you good health. Health it gives, it gives you tranquility, peace. Unless and until human beings really become peaceful, peace, which we call as global peace, cannot come. At least the people at the helm of affairs should be peaceful. But they are not. All their greed, all their power hankering will drop out, like autumn leaves, once they get their Self-realisation.

It is very important that we should know our value system. What we have is only mental and which can go out of order just like this mic. But when it happens to you, you become a personality of emitting peace, emitting love, emitting value system to others. You, yourself, enjoy yourself. You all the time, I don't know how much more can I describe Sant Gñyāneśhwara. You become the witness of this world. And you start enjoying the humor, all the stupidity and all the blindness of this world.

There's no need for Me to give you a list of things that can happen to you. But first and foremost thing that happens to you, that you know the absolute truth, absolutely, on your finger tips. English language has used this “on your finger tips" I don't know, from where the English got this idea. On your finger tips, you know the truth. On your hand, you know the truth about everything.

Then if you have the power to correct others, if you have the power to know and correct without telling them, you can correct. Now I'm working, they say, in more than 65 nations. Those people who come here, in a seminar, I've

never seen them arguing, no. Of course quarreling is out of question. Fighting is out of question. They come from different countries, different cultures, different religions... nothing, just love and no lust and greed in it. Nirvajay. No lust and greed. Just pure enjoyment of love.

The greatest thing is your attention. Your attention becomes enlightened, again I am saying. Means what? You can put attention anywhere and can find out about that. If you put your attention anywhere, you can work out whatever you want to do. Your attention becomes so powerful. It's a fact, I'm telling you. And the last of all, you jump in the ocean of joy. You enjoy everything. If it is ridiculous, you enjoy.

If it is stupid, you enjoy. If it is good, you enjoy. Because you are a witness. You are not involved. It is such a state, one has to achieve. This is the experience one has to...

I mean, in this small, I would say, lecture, I cannot tell you all that can happen to you, how great you are, what are the possibility, I can't tell you, I am sorry. But once you have the experience, your self will come and tell Me, “Mother, this has happened. *[UNCLEAR* Whichever happened...]." [GAP of 10 seconds]... of love pouring. His collective consciousness, by which I can tell you one thing, one little thing happens to one person, he has the whole of them. They know in the whole world, this has happened. They all pray. They all think about it. But now these prayers are not empty prayers because you are one with the Divine. Without the connection, what's the use of praying? Without the connection, what's the use of asking anything to God and blaming Him for everything? You first get your connections. Unless and until you are

connectioned Him, how can you say that God has been very unkind, He's done this, He's done that? So, in this short lecture I've been I able to at least say to you that there lies a great potential within you. Through your Divine personality, you'll be amazed how things will work out.

I am especially very much enamoured by Mister and Mrs. Mogul. I have their photograph with Me, all the time. And I was so surprised how this sensitive personality has seen the beauty of Gñyānadeva.

It's something and it has worked out so miraculously that we came in contact with him, really it was so miraculous. Unbelievable.

And it has worked in this way that they have such a nice collection of people who can do a lot, they are so important. They can do a lot, if they have Self-knowledge, if they become Self-realised. Not that I condemn any science, no. I do not condemn any religion, nothing. But, even science is not sufficient to solve the problems of the world. One has to understand.

So, this is I am talking of metascience.

I've written a book which is all full of mistakes, I think. Because in India, they make so many spelling mistakes. Three times I've corrected, every time they have made so many spelling mistakes. Then what to do? So I've got now, I think this is the latest and there will be less spelling mistakes, you see. Despite that, I must say, our English, whatever it is, is not that bad. We make spelling mistakes, that's all.

So, I try to write it in English. It is just My witness state in which I saw the Western life, now how it is. And what is

the problem of Western life. About India or Indian life or Indian culture and all that, I have still to write something when I get some time. I can do it but this is just to show how Western life is in trouble. What has happened in the Western life. And how things have taken this form. If you could read that book, it would be a nice idea. I don't think I'm going to sell them. But, there are limited numbers so I would request somebody to distribute it to, I would say, Mister *[UNCLEAR]* Kulkarni can do that. She distribute these books to people whosoever wants to know about Self-knowledge.

So thank you very much.

May God bless you.

Claus Nobel: Your illuminating message of spontaneous Self-realisation brings genuine hope to a highly distressed and confused humanity. Sahaja Yoga as discovered by you, heralds the genesis of a new Golden Age epoch for mankind. This epoch in human history will constitute a much needed giant leap forward in the evolution of species Homo Sapiens.

Contents: 1996-11-25 **Conversation with Claus Nobel, World Philosophers Meet on the 700th Birthday of Śhrī Gñyāneśhwara, M.I.T. College, Pune, Maharashtra, India**

Claus Nobel: [offered to start a center at the Columbia University and enquires how much would she charge].

Shri Mataji [smiling]: Nothing! Americans can't understand Me because I am not asking for money.

How to penetrate that will of theirs? Claus Nobel [protests]: Mother, in a consumerism society like our's

nothing is valued unless there is a price tag. What is the harm in putting a small tag as token fee?

Shri Mataji: How can you pay for God? Americans have to grow out of their self interest only then they can enjoy Sahaja Yoga.

Only when we give can we enjoy ourselves. A miser does not enjoy his wealth. Gold does not know itself.

A beautiful woman cannot enjoy her beauty; she can see her reflection in a mirror.

Self-realisation has to be reflected in the universe for us to enjoy our own reflection.

Sahaja Yoga is the reflector of Brahma Chaitanya.

Through it the Brahma Chaitanya becomes aware of its consciousness and enjoys its beauty. Thus there is much greater joy in giving than in receiving Claus Nobel [bowing at Shri Mataji's Lotus Feet]: Let Thy will be done.

[After Shri Mataji's speech Arvind Thakur's friend comes and asks him: “How do I go ahead and speak to Mother?" In that much time Shri Mataji sees them and asks Arvind:] Who is he? [Arvind introduces his friend to Shri Mataji. Shri Mataji calls this boy (Arvind's friend), catches his two hands and makes several crosses on his hands and She tells Arvind to tell him to take care of his liver or else he would get cirrhosis. Then Shri Mataji gives this boy Self-realisation. The next day this boy's dry hands are pink and soft. Lucky boy, but still he could not come to Sahaja Yoga because of his conditioning.] [To ArvindL] How are you? Arvind Thakur: By your grace Mother I'm fine.

Shri Mataji: How are you feeling now? [Arvind is speechless. The next day onwards his problem of breathlessness is over completely.]

Contents: 1996-11-25 **Dinner and Conversation with Claus Nobel, Pratishthan, Pune, Maharashtra, India**

[Shri Mataji invites Claus Nobel for Dinner at Pratishthan and shows him the earthen dam She had built to harvest rain water. It was Her dream that every village in India should have safe drinking water. To provide safe drinking water his friend, Mr. Mortenson who was a Professor at Columbia University and an adviser to the King of Morocco on water management offers his services.] [After dinner, Claus Nobel invites Shri Mataji for a World Peace Summit in New York along with the American Native Indian Chiefs. She explains that She had blessed them during Her various visits to America but they only sought Her blessings for regaining their land from the government as reserve sanctuaries. They had no interest in their ascent.] Claus Nobel: What is the description of a realised Soul according to Saint Gyāneshwar?

Shri Mataji: You can only understand his description after Sahaja Yoga. He wrote about the Kuṇḍalinī but his followers called Varkaris had no interest in their ascent. They take two cymbals and go to Pandharpur. It takes them one month to reach there. Women carry Tulsi in heavy earthen pots on their heads and take a procession of his palanquin to Alandi. They have created a cult and forfeited his purpose. They missed the point of his Pasayadan. As the Moon does not run after the moonlight

and the Sun does not run after the sunlight in the same way a realised Soul does not bother about his own glory.

He gets completely contained within himself.

[For a better understanding of the essence of Saint Gyāneshwar, Shri Mataji presents him a copy of Meta Modern Era. Before taking leave, he requests the boon that his wife, whom he loved more than his life, should not leave the world without him.]

Shri Mataji: No couple departs from the world together. One has to go before the other but the happy memories of the departed soul live on.

[He thanked her profusely and took with him her promise to visit America.] [The following week he called from New York to thank Her for enlightening him, he had read and re-read Her book and said it was the Bible of modern times!]

Contents: 1996-12-21 **Śhrī Kārttikeya Pūjā (Marathi+English), Śhrī Gñyāneśhwara, Park (200 m from ISYRH Center), Washi, Maharashtra, India**

[Shri Mataji talks in Marathi: MISSING.] [Shri Mataji talks in English:] I am sorry, I had to speak in Marathi language because I had to tell them something which I don't want you to know. [Laughter.] Today is a great day, I should say in a way, because I am going to tell you one thing great. That is Śhrī Gñyāneśhwara in Marathi they call it `Dnyaneshwara', He was the incarnation of Kārttikeya. And Saraswatī, who was a virgin, she looked after Him like Her own son. He was the brother of Śhrī Gaṇapati but She looked after Him. And then also there's description

how He was born and all those [things], is very interesting.

But here in this place, in this Maharashtra, He took His incarnation. And also there were many great, great, very great saints in so many numbers took place, took their birth in this Maharashtra. But such horrible people, they tortured their lives. Worse than Christian Inquisition I tell you; worse than any inquisition anywhere. Individually they attacked. And that same people are born again in this great country of Maharashtra.

They are very talented people; they write very well. Their language is so rich. You can see that, what description of a realised Soul, given by Gñyāneśhwara, is so beautiful. He says that, “The moon doesn't run after moonlight, the sun doesn't run after sunlight. In that way a realised Soul does not bother about his own glory. The sun shines till it shines, then it takes back all his rays. Whatever work the rays have to do they do it. And the sun is just watching, watching all the work, then he takes them back. And he gets completely contained within himself." Samavun ghene, completely contained within himself.

The description He has given of realised Souls is so beautiful, if you could just experience it. Namadeva, who was born much later, said that even one line of Gyānesha [Saint Gñyāneśhwara, fondly called by a short name] if you could experience, you had that. I wish you all could read Amritanubhava in English, understanding how He describes a realised Soul and you'll find that within yourself it has happened. You are different from others very much. You'll be amazed how you have got such beautiful description of your Self.

I was talking about Maharashtrians; they are extremely talented people. See their music. In music no one can beat them. See their drama. In drama no one can beat them. You can see from films. In Maharashtra only great films were created.

The another one is Bengal, which is, I would say, different but of the same level. It's such a talented people here, it shows that God has a special blessing for these two, and, should be, Maharashtrians should rise very high.

But all the time complaining about others, talking ill of others and something very low they do. I'm surprised [by] it, I hope you don't pick up anything from them.

And also the fussiness that is of the North Indians; that's also not a very good thing.

It's surprising how you people have adjusted yourself to this country, which has all kinds of parasites.

Because you live with vibrations, you feel the vibrations. It's something so great to see you all here and I'm telling them that they should try to understand you people. Really I'm very proud of you all who have come all the way here. In this Pūjā I am thinking of so many great saints who were born, who were great Gurus, mahāGurus. Of course Gyānesha, I must say, is the king of all those high, highly evolved souls, no doubt.

So we are now having a Pūjā on the twenty-fourth of December because it's a Datta Jayanti, Dattātreya's birth. And so we'll be having on the twenty-fourth night. In any case it's a Christmas Eve. We could all start with that and also Dattātreya, who took His form in Maharashtra. Maharashtrians understand Dattātreya. They understand the Nath Panthis.

These Nathas went all over. They went to Kiev. You'll be amazed, they went even up to Bolivia, those who are from Maharashtra, from Rahuri. Can you imagine? Such great people they were and that is what I expect to happen in this Maharashtra. And I'm sure one day I'll be very much happy with all of them; not few.

There are some very great Maharashtrians, no doubt, but all of them have to join together because I talk of synthesis, not of divisive method.

I hope they understand the inner feeling that I have, otherwise all the good diamonds will be selected and the ones which are defective will be thrown away. What's the use? But all of them are capable of achieving any height. They may belong to any caste, community, doesn't matter; but they are born in Maharashtra, which is such a great country.

So today they wanted to do Mahālakṣhmī, this thing, we already have Mahālakṣhmī temple. And they have a great blessing of Mahālakṣhmī also, in a way, but they lack: one is the wisdom and the second the spirit of Kārttikeya. The spirit of Kārttikeya, that pure, absolute dynamism which doesn't indulge into nonsensical things and useless things; which shows results.

May God bless you all!

Contents: 1996-12-25 **Christmas Pūjā, Ganapatipule, India**

Today, we are celebrating the birth of Jesus Christ. The birth of Jesus Christ is very symbolic, because he was born in such a manner that even the poorest of poor

won't be born in the stable. And he was put in the bed which was made of dried grass.

He came on this earth to show people that for a person who is an incarnation or who is a highly evolved soul, is not bothered about the comfort of the body. His message was so great and so deep, but he had disciples who were not prepared for the battle they had to fight. Is the same thing that sometimes happens with Sahaja Yoga. He had only twelve disciples, we too have twelve types of Sahaja Yogis and all of them, though [they] try to dedicate themselves to Christ, fell a trap, some of them, to the worldly aspirations or to their own hankerings.

His message of love and forgiveness is the same even today. Preached by all, all the saints, all the incarnations, all the prophets. They all have said about love and forgiveness.

If it was challenged or people felt that this won't work out, they were asked to have faith in what he said. But they were simple people in those days so they obeyed him.

Some of them definitely were very good, some of them half-baked and few of them were people who were doubting.

He came on this earth to prepare for us our Āgñyā Chakra and despite all his efforts one finds very difficult and the people who follow Christianity have the worst type of Āgñyā. Worst type! Extremely aggressive, extremely planning type, futuristic. I mean all the troubles of the right side are found in those countries who claim to be Christians. Even the early Christians who were Gnostics, `gne', `gne' in Sanskrit means `know',

though [they] had the knowledge, the beginners were also suppressed and tortured by the people who were supposed to be in charge of Christian religion. And so many Christians were massacred by the so-called Christian priests and Christian churches and still it is going on. What you find in the west is a great influence of these churches on the minds of the people. Otherwise they are supposed to be intellectuals, otherwise they are supposed to be analytical, otherwise they are supposed to be something very brainy. But when it comes to temples and churches, when it come to religion, when it comes to Christianity, I think their brains are blocked, completely blocked, by some sort of a mesmerism. They just can't think that there could be something very wrong with these people.

When living in Italy, I found or I was shocked how this catholic church was working out and what the priests were doing and all kinds of scandals much more than we have in our country! Money bungling and molesting women and having children, I mean every sort of dirty habit they had. Supposed to be priests. They were called `fathers', they were called `mothers', they were called `sisters', they were called `brothers'. And to Me it was really a shock, I didn't know that such things are happening in the name of Christ. What Christ tried to show through his birth: there is no need to have very comfortable, great birth in a big hospital in London, no! The simplicity of his birth should have made all the Christians extremely simple and not at all money oriented. For money they went all round, crushed so many people all over the world, when you go to Brazil or

to Chile or to Argentina, you do not find a single man belonging to the aboriginal people and they're so unkind to them. Unbelievable how aggressive these people are. Even in England, where theres protestants I find the same thing among them. You must go on saying “thank you, thank you" morning till evening, otherwise you are finished.

Racialism. What was the race of Christ? Was he a fair man? No! Was he a white person? Not at all! What was His colour? He was brown like Indians. From where does this racialism come to these Westerners? I just don't understand. It has nothing to do with Christ or if it is real Christianity.

You go anywhere, you'll be surprised, how the faithful, simple-hearted people are misused by these churches. They're used for voting, they're used for money, for everything, to such an extent that money was made, artificially counterfeited in billions, by the church itself.

Such autocracy, such control, such authority they had that whatever they did was, the pope is infallible, whatever he does is alright. No idea of sinning, no idea of hell, no idea of Christ, which was nothing but purity and innocence.

Christ had taken a hunter and hit all the people who were selling in front of the temple, because God cannot be sold. They were not selling God, they were selling only goods, but he said the respect of the temple, talked about the respect of the temple.

Another great thing Christians have done, is to blame Jews for killing Christ. Wonderful! Put all the blame on others, this is the speciality of Christians even today, is to

put the blame of what wrong you are doing on others, very common. And this is what you see very clearly in those countries, who call themselves Christians. They blamed Jews. First of all, those who were Jews at that time might have been Indians later on. Alright, so they don't believe in reincarnation. I mean to say the same Jews who were there are born again.

Thirdly that the Jews never killed Christ, never, because in the multitude how can you decide? Is the judge who decided and ordered, he was a Roman.

So the Roman empire didn't want to take the responsibility of His death so they said Jews have killed Him.

So Mr. Hitler got after them and he really tortured them, really it's too much, one can't even understand how can, he believed in catholic religion, how could he kill small little children, in the gas chamber? But now the same people who were tortured are also becoming very aggressive and now they are against the Palestinians and the Palestinians on their own are Muslims and the Muslims are playing a havoc all over.

So when you go through the history and see the life of Christ, what do you find is aggressiveness from one to another, from that to another, passing from one to another. If somebody slaps somebody, the another person will try to kill that person.

So this religion has created this divisiveness; people are just killing each other in the name of God, in the name of religion. Even in Sahaja Yoga, you'll be surprised, I have seen people taking advantage of My name and trying to get into some mesmeric groups. I can't understand.

Using My name, using My photograph! So beware this should not happen to you people. Using the name of Christ, the Incarnation of Divine Love, they are doing all these works of violence, hatred, of cheating, I mean very debased people.

And from one to another it passes, to the another it passes.

Same thing happens in Sahaja Yoga. If I told somebody that you are no more a leader, somebody else is the leader, immediately that person gets angry, he forgets what good Sahaj has done to him, he just forgets. If I tell him the leadership should pass to somebody else, finished! Then he forgets that whatever good was done to him, whatever Sahaja Yoga has done for him, he's living only because Sahaj has helped him.

So this leadership goes into the heads of people.

Sahaja Yoga is not here to make leaders out of you, no never. It is just for convenience we have leaders and if they become inconvenient we have to change it, that's all, as simple as that.

But still I find this idea of authority is something very great and they start using it left and right, everywhere it is happening practically in every country, has happened and still happening which is a very sad thing. This will never bring forth My efforts.

My effort is to synthesize the whole, not to divide, by no chance to divide. Only thing, whatever is wrong, whatever is unholy has to be brought to your notice. See as a housewife, when we clean the rice, there are some white stones in it, we take them out. We don't cook rice with that stone, do we? And such stones have to go out.

So some of them are just like stones. You cannot change them. Namadeva has said that they are like a fly, who when lives gives us trouble by coming on our food and by making us feel nauseated and if by mistake we take her inside in our stomach, she is dead but still she troubles us.

These are all Rākshasas, I should say. They can never understand Sahaja Yoga and they will always try to trouble us.

But what must the people who have achieved Sahaja Yoga should do. Should they also take to such methods? I have never blamed anyone for anything. Like, people say, “Mother he didn't give any money to Sahaja Yoga so he has lost all his money." I never say like that “He should have donated some money!" I never ask for donations, I never ask for money. Every time I say it's all sufficient. Don't need. I have never asked for a single pie from anyone to be given to Me even when I needed because I know I don't have that problem.

From the life of Christ one has to understand. He had no problems. He was fearless. He knew he was the son of God. He had no problems at all. He faced everything, even his crucifixion. And people, I think, liked his crucifixion or what? They carry the cross. Of course is the transformed symbol of Swastika no doubt but still. He had to sacrifice his life. He sacrificed his life for all the human being not for only white or black, brown or blue but he sacrificed his life for all of us so that we could cross over our Āgñyā. The condemnation we should do is not of others but of ourselves. We can call that as a

crucifixion of ours by which we see as Sahaja Yogis where are we going.

I'm told there are some 80-90 Sahaja Yogis who have come, who were mesmerized by some people.

How could Sahaja Yogis be mesmerized? Is it possible? They never must be praying, they may not be doing meditation. How can they get into it? And now they are asking for forgiveness. I forgive but that doesn't mean they will be alright. We cannot fix them anymore.

We do not put spoiled apples with the good ones, do we? This [is] no wisdom. They are already spoiled and they should keep out till I say. They should not attend any center, they should not come to any Pūjā.

They should let them cleanse themselves. Though a rotten apple cannot get well they can.

They should try to understand that they were not Sahaja Yogis. If a Sahaja Yogi can get mesmerized, then what's the use of doing Sahaja Yoga. What's the use of getting your Kuṇḍalinī raised? That means that they are very poor Sahaja Yogis. Surprisingly I have not seen this kind of a phenomena in the west, very surprising! Western Sahaja Yogis, whatever they were, they are great Sahaja Yogis, I must say if you consider the number of good people there. They have given up so-called Christianity, they have given up all this nonsense, drinking, drugs, womanizing, everything they have given up. And I haven't met one person who has taken to drinking again or who has taken even to smoking.

This Yoga Bhūmi of yours, which is India. How could it happen here? Specially in Maharashtra. I think some devilish people are born in this Maharashtra all the time

because how is it they tortured each and every saint? How? How is it, they have been so much enticed by somebody who is saying something which I have never said? Shows a very low type of people, very low. And they must have been always being born in this Maharashtra, I am sure and again they are born today.

I never wanted to talk about this at the jubilant time like this when Christ was born. Yes, it's a thing of jubilation because He came as a Savior. He did everything that is possible under the sun. For us it's alright but what about Him, what did we give Him? In the same way many Sahaja Yogis go on demanding, Mother we can't even meet you, we can't even shake hands with you, we can't even fall at your feet. We can't do this, we can't do that. It surprises Me.

“You must do this, You must do that." All the time lecturing to Me.

What you must do? You must do, is to meditate and to believe that this Param-Chaitanya is My power and that you have felt My power within you. The more you are away from you the better you will be.

Absolutely, I can't understand the demanding nature of some Sahaja Yogis. They have got their Jāgruti [awakening of Kuṇḍalinī] which would never have happened.

If Christ wanted, He would have killed all of them and lived very well, but I think He must have been fed up with the stupidity all around.

So at this time, we have to understand that such a great Incarnation came on this earth. Of course he couldn't give Realisation. Imagine the people who were about to

crucify Him, how could he give realisation? Supposing somebody comes with the dagger at Me, can I give them realisation? It's all right. Nobody listened to Them, nobody thought anything of them but not you! You people have got your realisation. You are born again people. You are great people. Your potential is there. Instead of utilizing that now, what are you doing? How many people are really involved in Sahaja Yoga? Introspect. They have their own business, they have their own this thing, they have, How many are really involved in Sahaja Yoga? He had only twelve disciples, except for one or two, all of them dedicated without realisation, dedicated fully to the work of Christianity and which spread because they had not much idea about the whole thing.

The Christians that they had were just converts, useless people and I would say that if they did not do any justice to the birth of Christ, one can understand.

But what about you people? Who are born twice, who have got their Self-knowledge, who are so equipped with all the powers, who are connected with this all power, what you can call the power of Divine Love? All your powers can be utilized, can be known. It's like some dynamic machine which has started. Few wheels are moving but there are so many wheels after wheels and so much you can do. I cannot blame the Christians who are so stupid because after all they never got their awakening. Only some priest would bring some water, put it on their head and baptized them, finished. But what about you people? I have lived because of you, because I wanted to see that you people mature. That's

the idea of the Mother is. There are many who are matured, I would not say, but still many have to be matured. Doesn't mean that you should be able to give big lectures, or write books or anything. But within yourself you should mature. Your own personality should flower into the fragrance of love of divinity.

This is what I would say is the difference between Me and Christ. He said “Baba I had enough, No, No, No more! With these stupid people." Not Me, I knew what was the world like. I knew what had happened to this world. Today the world is much worse, because all the religions are fighting among themselves, firstly. All the politicians are trying to be very badly corrupt, competing in that corruption. Nobody has sense of truth and honesty. Everybody is involved in the advertisement, newspapers, media, this, that, which is the most corrupting influence today.

With all this background, I know by the year 2000, Sahaja Yoga will come out in the whole world as something very great... [Applause.] You did not allow Me to complete the sentence, if you people become real Sahaja Yogis. All of you. All of you who are attending to Me here. Even this much group if it becomes real Sahaja Yogis. It doesn't matter if I cannot meet you personally. It doesn't matter if I cannot go to your places. It doesn't matter, nothing matters. Christ's disciples worked when he never existed.

So it's not important, what is important is that you are the people who are responsible for the emancipation of this world, for the synthesis of this world, to bring peace and joy and happiness to people.

Just now when I was coming, people spread the shawls. It reminded Me of Christ when he came, they brought palms leaves to wish him and spread their shawls on the ground for him to go and where does he go? To Gallows. He goes to cross, he goes for his death.

When you show your love for Me, you have to know that you have to love the whole work of Sahaja Yoga. It's not some personal relationship with Me that is going to work out. All these Western countries in the influence of Christianity will go down, you will see. They are going down already because there's is no morality. There's recession, all kinds of problems, their children are wavered, they are drinking, smoking, doing all kinds of things.

Even their influence on us is corrupting us. Antichrist activity, throughout if you find. It's nothing but antichrist activity. Who is the Antichrist? They are describing he is the antichrist, that fellow is the Antichrist. That's not the thing. There is an antichrist within us, who accepts all these things which are against the purity and love of Christ.

So first of all among yourselves.

What is he going? Sit down! You must teach your children some manners. This girl who was drowned is because you neglected the child. The father, where was he? I don't know. I can't understand how can a child be left like that. It's important to discipline your children.

... if you have a neighbour, you've had it. He will try to find out where you go, what you do. He will have a binocular to see and you make any noise, you are finished but even if you sing, you are finished.

In that way, Indians are better. They don't have that noise difficulty. We don't have. Indians can live in the noise. I wanted to find out why Indians are so adjustable to noise. They don't mind noise. I found out the reason is that in the west people are under stress and strain and that's why they can't bear. But in India, people don't know what is stress and strain is. Still that has not developed, I don't know how to that extent. That disease has not come.

That might be the reason that they are so much frightened of noises. People will come from villages here. They'll sleep on the station, nothing happens. The trains are coming and going, nicely sleeping.

Imagine in the west, thank God, in Italy we have neighbours little far away, we had a little trouble. But in England, we had to go on changing our ashram from one place to another, run away from here to there, because of great neighbours, we had one of them had the name Mr. Peace. I don't know who gave him that name. Such contradictions in life. Such horrible contradictions. I don't know how will they learn how to love their neighbour. But Indians do.

Somehow they don't have this problem, not much.

Sometimes they have but not so much. But if there is a music supposing, all the neighbours will join, bring tea, bring this, they'll be enjoying the music.

But there the collectivity is so little I think, I can't understand how can they call themselves Christians.

Only they go to church, well dressed and our Mayor told Me that for fifteen minutes hardly we can sit.

We start looking at the watches. Fifteen minutes. And after half an hour, we all run out of the jail and how is it these people are sitting with you for hours together. I said, I must be mesmerizing them.

I mean they are not so collective, unless and until they drink, they cannot be collective. Unless and until they get intoxicated, they cannot talk to each other. They are all the time tired. They are supposed to be Christians. They are so tired, you see them in the films or anywhere, they come and sit down “hah!" What has happened? Young people. All the time thinking, thinking, thinking, which comes from Āgñyā.

Which comes from anti-Christ activity! Anti-Christ activity, thinking, thinking, thinking. What should we do tomorrow? What is to be done and all that.

Still we have to hope that this kind of religion will finish. All such religions must finish. They have to go now, it's too much. You cannot support them. They are so much full of anti-religious temperament that you just can't bear them. Better to finish Islam, Hinduism, Christianity, Sikhism, Buddhism, Jainism, all isms one after another. To what religion did Christ belong? I don't know.

You belong to one religion which is Sahaj. Which is the universal religion, which is the pure religion, which is born within you. You don't belong to any other religion because there is no religion in that.

So by the time 2000 years, I hope all these religions will run away from this earth. [Applause.] All of them fighting for nothing at all, killing each other for nothing at all. They want, they want to fight, they like to fight. Why blame Koran, why blame Bible, why blame Christ, why

blame anyone. They want to fight. They are of divisive nature. They want to have separate nations, separate communities, separate this. Once you start separating you are antichrist. Absolutely.

In Sahaja Yoga also I say that you are one identity, you are not separate country, separate organization, separate this, doesn't exist in My own idea. Doesn't exist. I never thought of it. We are all children of one Father and of one Mother. We have no business to think we are separate. Even now, I have seen groups are made very easily. How? The groups are made. Like I find Maharashtrians are sitting together.

[Marathi.] Then we have group of the North Indians. Indians are quite separatist I tell you, somehow, by temperament. North Indians also have separate separate ideas. “You must come to Indore." Why? Is it not a part of India? They can't come to Delhi? “You must come to Kanpur, You must come to Allahabad, you must come to Indore." You must go to every village, every place. Why? You are born today in Delhi, tomorrow you will be born in some horrid place, then, “This place is mine. This is my house... must come to my house." That's another headache. “You must come to my house." Mine, mine, mine, mine. Once you start that, you are finished, you are no more belonging to Christ, no more. This is a very, very common program, even today that, if you see around yourself, must be people from your own country. Just see around yourself, are you sitting with another people? Who is the other? In Sahaja Yoga, who is the other? We are all one and this unity we have to learn, if you really love Me and Christ.

All this groupism and all this has to end now among Sahaja Yogis, must end. We are all one identity, we are all one living body. We are all one living organism. We cannot say we are separate. Can this hand separate from the body, can it exist? Once you start giving it up, you will be surprised, you will have real enjoyment. But once you have all these ideas about my, my, you can't even enjoy Sahaja Yoga. Cannot enjoy anybody else, `my wife, my children, my house,' my this, my that. That awakening has to come within. “I don't belong to this country." Many girls you see and boys have written, “We'll have Indian marriage." Only the age of the woman is thirty-five years. Only! Now where will I find a husband for her in India, must be some widower or somebody.

Must have an Indian marriage! Can you beat that? Such people, is impossible to marry them. I give you choice, all right have a choice. I also have a choice, I can't marry you! That is My choice! You have the freedom to say where you want to marry, alright marry. But as far as I am concerned, I can't marry you like that. You have to marry wherever there is a good match for you. Many Indian girls have married with Indians boys and have suffered a lot, such a lot, you won't believe! [Hindi.] Not in Sahaja Yoga any more! We have not been able to organize even one marriage of a Hindustani with an Hindustani, not possible. That's not the desire of the Divine. Why don't you find in your own community somewhere [the] same thing. As in India, is very particular. Very very particular. Like when My daughter was to be married, they said “No! He his not a Srivastava. If he is a Srivastava also, he is not the same

Srivastava. Even if he is the same Srivastava, his this thing is different!" I mean. I said, “Now this is going to finish." Because I had all My elders living and they were after Me. I said “Whether he is a Srivastava or not Srivastava I am going to marry them, finished!" My husband agreed. Same with My grandchildren. If you get Srivastava, well and good, otherwise forget it. Maharashtrians also same. Maharashtrians who have become Christians [are] also the same, you be amazed, Christians! Now they are saying we are Dalit Christians, means who were converted from the lower caste into Christianity. Now there is a new caste that's come. Once you have become Christian, what is your caste? You are Christian, not that. They are Dalits and they are higher Christians. They will not marry in the Dalit and Dalit won't marry in the higher. Supposed to be Christians, following Christ, going to church regularly, well dressed. Even if they do not have a proper suit. They must wear like English some suit, borrow it and go to church because according to Indian Christians, Christ was born in England. [Laughter.] Really, you won't believe. Unless and until you wear a suit and a tie, you can't go to the Church. Can you imagine, anybody, going with a dhoti to church? [More laughter.] Impossible situation.

Even in My time, thank God I didn't marry a Christian, but My own sisters and all were forced to wear veils and not the sarīs, wear the frocks and the veils. Can you imagine the wedding dress. We, Indian women, can't do without the sarīs. But they were forced.

So many women married the way English marry.

And I was amazed even the Japanese who are Christians come to Australia and dress up like these English brides and get married, because they are Christians. That shows that they believe that Christ was born in England or what? Actually, for Christians it's not necessary to worry about any dress. All this nonsense comes from the West that you must dress up like this, you must have your spoon here, fork here. Did Christ eat with fork and spoon? He was born in the manger. It's impossible to understand these people are Christians.

So much worried about the spoons and forks and they came to your house for dinner, they lift the plate to see from what company you have bought it. [That's] very important! Such silly people! I tell you they call themselves Christians. Christ was born in the manger and [they are] so particular about nonsensical things.

You see one must understand the greatness of His birth, in which he has shown that he was born with the cows tied there and the calves were there. He was born in the manger.

Not only the Christians abroad but they are also in India the same, you can make out a Christian in no time. See them on a Sunday morning. That way My father opposed it, he used to wear kurta, because Christ wore kurta. He didn't wear suit, did he? And so superficial they are. Nothing to learn from them.

They will put here on top [a label written] `Saville Row', on top of the suit! Such stupid people, I tell you and the Indians are following them left and right, I can't understand. They are anti-Christ. Don't follow them on these points.

Indians have at least certain sense of dignity. If you have any, why should you wear a suit on a May day here? In this heat? We are Sahaja Yogis. We have to wear a common dress of a common man.

Whom are we going to impress except for this Param-Chaitanya? They are extremely superficial extremely meticulously particular about their dress, how they live and it's really horrible.

I have seen this and that is the reason I think I should warn you. Don't take to that culture, that is anti-Christ culture. Absolutely anti-Christ in every way. In every way they have insulted Christ out and out.

You people should not anymore insult Christ. In a simple way you live. I mean now this sarī, they forced Me to wear is like a big bag for Me but what to do. Yesterday also they forced Me, today also they forced Me. I am supposed to wear all this because I am Ādi Shakti, supposed to be. If I was Christ, I would have been better off. He was much more free than Me! Now, with all this what we have to know, what is the message? What is the message of Christ? That you develop your spirituality, your divinity by which you know what is the dignity of a Sahaja Yogi is. He was your eldest brother I should say. His lifestyle you should follow. Absolutely not afraid of anything, not worried about any job, nothing, not worried about any business anything, absolutely free from all worries.

So many examples we have, beautiful examples of his life, but when we see Christians, we try to reflect it as an expression of the life of Christ and that is where we make

mistake. They are, by no means they are for Christ, they are, by no means, following Christ.

So as Sahaja Yogis, we have a different culture. We have a culture where we respect morality. We have dignity, we have our own personality. We are fearless, we don't tell lies, we don't cheat and we can never get mesmerized.

So we have to have, now we can call it `the Mother's culture' and which is not in any way showing off, or in any way taking to artificial things. The whole thing will change, the whole concept will change, whole idea will change, once you understand that you are now in `the Mother's culture'. Now they have forced Me, so I am wearing all right. You want Me to wear, alright I'll wear. But normally if you leave it to Me what do I wear, you know that. Secret is out already! If you want to give Me presents, give Me, I never asked you for presents, nothing! Forcing the presents on My head! Alright, for your joy's sake you have it. What to do? But one thing I must request these Maharashtrians. They are not going to give Me anymore, anymore, again anymore what they call is the `Oti' part. My Oti is overfull. Absolutely, nobody has to give Me Oti. If somebody gets married, if somebody has a child, somebody has anything, they'll bring the Oti. There is no need to give Me any Oti, you can go to the temple, you give your Oti there it is resold and resold and resold in between the sellers who are Gujaratis, the brahmins who are the Pūjāris make money.

So no more Oti, nobody is going to give Me any Oti whatsoever.

On a Christmas day I have to say one thing, what did we give to Christ. And the second question what are we

going to give to Mother. This is very important. I don't want anything from you, nothing. I am fully content with Myself.

What I want is that you must dedicate yourself to Sahaja Yoga, to truth and to love. I will be very happy and also not to talk like, what you call, Christ has called them, “murmuring souls", talking here there, one saying there. All this. I don't like at all. I don't like it and it should not be done. If you do like this, you will fall, fall very badly.

This is the last judgement. Either you'll go to heaven or you'll go to hell. It's already working out like that.

So let's see. Where are you? So I have to again and again tell you as your mother, I have to correct you and tell you that remember this is the last judgement and please, do not take anymore to the activities which are anti-Christ.

You can judge within yourself, [whether] whatever you are doing is not good and for that, best thing is to dedicate yourself to Sahaja Yoga. But not to make money out of Sahaja Yoga. Not to make politics out of Sahaja Yoga. But make Sahaja Yoga like a big, huge, big tree and it will work out. I know it will work out. You have the potential. That's why you are here.

May God bless you all!... They believe in the most expensive sarī: You see My conditions.

Contents: 1996-12-29 **Marriages, Ganapatipule, India**

So, one should marry with a very open heart because you are marrying in Sahaja Yoga. Is no other biding force for you but your love and affection and care for each other.

Now as you have got a bride and you got a husband, I will tell you one thing that Sahaja Yoga will grow much

more now, because of you being there as couples who follow Sahaja Yoga and who'll have children of very great spiritual character. There are many saints who want to be born on this Earth. All these saints will be born to you because you are Sahaja Yogis and you are at a level of that great consciousness which we call as Ātmā sākṣhātkare.

I wish you all very great love, prosperity and joy and that you all develop in Sahaja Yoga in a very great love and understanding, forgetting what these... what was your past, what was your religion, what was your cast, what was your country, everything forget.

We are all really human beings and now we are realised Souls so there is no difference like this and all of you should prosper in such a manner that other people should see you and try to follow you. It is a big, it is a very big responsibility, I hope you understand and realise.

Thank you.

May God bless you.

Now, first thing you have to do is accept the The Vishwa Nirmalā Dharma, this is the religion which is a universal religion which encompasses all the religions, respects all the great incarnations, knows about them and all the good things that are told in all the religions it accepts. It's one religion which is not outside, outside religions have created problems you know they just create differences and divise people, it is divisiveness, it divides people. But this is one, but this religion was there amongst Sufis amongst all the saints all those people who were born realised Souls, they had the same religion and that

religion of humanity we follow. This religion is not outside it is inside. It's inside yourself, it is awakened and here we respect all the great incarnations, all the great religions we respect, not only that we follow, but we do not believe in any differentiation or superiority so the first you have to accept that you belong to this religion then there won't be any fights about small things, like I belong to this caste, this community, this religion, this country, nothing, you are beyond that and that's what we have to establish if we want to have real peace and joy and blessings of the Divine, so this is the first thing that we have to do is to accept.

Contents: 1997-01-00 **Meeting with an Astrologer, Pratishthan, Pune, Maharashtra, India**

(other month 0200) [A renowned astrologer of Pune prays for the restoration of the vision in his left eye. Shri Mataji gives vibrations to his eye and not long before restored his vision. Tears of gratitude stream down his cheeks and he begs permission to cast Her horoscope. As he begins reading into the nine houses of the horoscope he prays:] Shri Mataji, you have accomplished your mission and now you should withdraw from public life to take rest.

Shri Mataji: I have no desire. I am only on this earth for the love of My children and till My last breath I will do everything to protect them.

Astrologer [back to the horoscope]: Between 2003 and 2005 the whole creation would be on the brink of collapse because of the attack by the negative forces. According to your horoscope, you would muster all your

power to fight it. In the decisive battle you would no doubt succeed in saving the world, but it would take its toll on your physical body. By your Divine Shakti you could revive it, but it will lose its power of movement.

Shri Mataji: [asks him to read the 9th house].

Astrologer [put his finger on it and with a perplexed look points]: It shows resurrection! In the manner that Christ had resurrected, you too would resurrect. Within three years your body would emerge even more powerful than before. The Kuṇḍalinī of the seekers would rise spontaneously in your auspicious presence.

There would be such power in your eyes that even a fleeting glance would destroy the lurking negativity and cure the sick. Whoever would come in your august presence would receive the greatest blessing of their lifetime. You would recede into a long period of silence, but your children will receive your guidance in their Sahasrāras.

[He prostrates before her and humbly offered a Sanskrit prayer in praise to the Goddess which described her as `Kataksha, kataksha nireekshana' (Even her fleeting glance blesses a devotee)].

Shri Mataji: I do nothing at all! When you see something you react. The difference is that when I look at something I do not react. When I look at you, your Kuṇḍalinī reacts and rises. When I am not there My children can pray before My photograph for guidance.

Contents: 1997-03-16 **Shivaratri Pūjā, Power of Rudra and Desirelessness, New Delhi, India**

First, I speak in Hindi language and then in English. We are such a cosmopolitan people that I don't know what language to take to.

[Shri Mataji talk in Hindi:] Today we are going to worship Śhrī Shiva. The aspect of Śhrī Shiva is found in our heart. Whenever somebody becomes the Spirit, I am not saying gets enlightened, but when the Kuṇḍalinī gets awakened this principle of Śhrī Shiva gets enlightened. This light first comes into our brain and our heart and thus for the first time there is Yoga i.e. union of the brain and the heart. Otherwise normally there is no relation between mans? heart and his brain. They each run in separate directions.

This light which is emitted from the spirit, flows through our hands and fontanelle bone areas as vibrations.

This fact, you all know very well. But the next thing which we have to understand is that, when this light comes within us, little by little we see that our life gets transformed. All our anger and all other bad qualities disappear. Little by little we gain everything we desire and gradually we develop Śhraddhā [faith] within our minds.

With this faith we develop the tyag buddhi i.e. quality of sacrifice. We don't give any importance to material things. Like Śhrī Shiva who is avadhūt, who has sacrificed everything, so we also become. He has no concern with outside things. His hair is loose and unkempt, He is unaware of what He is wearing, what He is doing, He has no thoughts at all. He has given all of this work to Nārāyaṇa, Śhrī Viṣhṇu. Śhrī Shiva is freedom itself and He wanders everywhere wearing only a tiger skin and His

vehicle is Nandi, the bull. Nandi is not like a horse, which you can control.

So Śhrī Shiva goes wherever Nandi takes Him. Śhrī Shiva never thinks of things like `What will people say, What others will think of Me riding around here and there half naked on Nandi' because He is totally within Himself, basking in his own Joy.

You must have heard the story of His marriage. When Śhrī Shiva arrived at his marriage place and Śhrī Viṣhṇu saw Him he wondered what kind of useless fellow was going to marry his sister. How could my sister marry him? But Śhrī Pārvatī knew that Śhrī Shiva was the perfect husband for Her, the one who is free from all outside attachments. When we see the incarnation of Śhrī Shiva we have so much love for him and we think that Śhrī Shiva is the source of everything. But when this light of Śhrī Shiva comes into the Sahaja Yogis, their own lives also get transformed. I have seen that men and women before coming to Sahaja Yoga are very much concerned about their external beauty. Their whole attention goes into thinking about what to wear today, what to wear tomorrow and these days it has become a very big business, with so many beauty parlors appearing. The women have become very lost amongst all of this.

But when you get enlightened inner beauty, then all of this outer beauty loses its importance. The same thing happens with physical comfort which gets transformed into a kind of spiritual comfort and you stay quite distant from your own human comfort.

Now just look at these Western Yogis. They live in big houses, have cars and all kinds of royal comforts but when they come to India they adjust with every situation. But this is not the case with the Indians.

Wherever they go they need their bathrooms, en suite and all the rest of their comforts. Until today they have still not risen above this. The yogis asked Me to buy some land for an Ashram in India. But our Indians will never live in an Ashram. This Ashram which we have built in Delhi and spent so much money on, nobody wants to live in it. I said, all right, we will pay a salary for you to live there, but still nobody is willing.

In My birth place at Chhindwara, I spent lot of money on the house and asked the retired Sahaja Yogis to go and stay in that house, because it is a hill station with very good clean air; but nobody wants to live there. Everybody thinking of their own physical comfort. But these Western people don't have this problem, they are very happy in the Ashrams. My house, my place, my wife, you should make the food like this, I will only eat this food, we are so lost in this taste of food! But the Western yogis aren't like this, they eat everything. Indians eat their food with such great relish and interest. I know that when the Indian Yogis come to Cabella, they bring their own food, stuffed in their pockets, packed in so tightly they can't get it out. One must meditate and then only all these habits will leave you.

One small thing we have to understand that we are lacking in Tyag i.e. Sacrifice. This time they told Me that, Mother You are going to buy land and have so many expenses, so we will collect a little extra money as Pūjā

Dakshina. You can't imagine how many letters I received asking Me to reduce the amount of Pūjā Dakshina. Pūjā happens in Delhi only once and yet so many letters coming from people who will spend their money on pān to throw away afterwards, but of course can't give Dakshina for Pūjā.

Until today I have never asked for any money from you, I finance everything Myself. But just see, today half of the pendal is empty, why, because they don't want to pay the Pūjā Dakshina. I find this all so surprising. If there was a false Guru, he would make you shave off all your hair, wear red clothes and stand on your head. But I don't want all of this because this is Sahaja, everything should come in a Sahaja way [spontaneous]. In the past I have seen so many people sacrificing in the course of their lives, but these days nobody wants to sacrifice anything. I know that if My mother who had only six saris was given a seventh, then she would give the seventh one away.

And when the Indians come to Cabella, I get so surprised, they even ask for separate rooms, they can't stay together with everybody else. The one who cannot live with all the other people is not a Sahaja Yogi because he thinks that he is something special, that he needs his own special arrangements. This type of person cannot be a Sahaja Yogi, he is just a Sahaja Yogi for namesake. The one who is the devotee of Śhrī Shañkarjī must be like Him. Wherever you ask him to sleep, wherever you ask him to sit, what ever you give him to eat, he never complains. He is not bound by time and he will never demand anything..

This type of man can be called a Sahaja Yogi. If you go to any other so-called spiritual place, they will take all your money, all your hair and goodness knows what else. This kind of thing doesn't happen in Sahaja Yoga but we must work to lose these conditionings which we find built within us. We must pray to see `what can I give up?' Until this desire is installed within you, you can't call yourself the devotee of Śhrī Shiva.

Shri Mataji has all types of the devotees, no special kind in particular. All types of devotees so that whatever they do, after all she is Mother, She will forgive them. But in being forgiven you do not reach this level. We need to ask forgiveness from Shiva all the time because we are always doing something wrong which we shouldn't do. We make this mistake, that mistake, I need this, I need that, I want this, I want that. Until you still have this `want' within you, you will have to continue asking forgiveness from God. And this is my house, my wife, until we break down all these ideas inside of us, we can never call ourselves Shiva's devotees. On this point, it is surprising to see that the foreigners have progressed so well, even though they had never heard of Shivaji. And here we are, the Indians, still stuck with this and attached to it.

To become Shiva means to give up all the anger and hate, all jealousy within us. But even after coming into Sahaja Yoga, people are not able to see themselves. There was a mother-[in-]law who was mistreating her daughter-[in-]law and when I asked here why are you mistreating her, she replied but I've never mistreated her! Really! If you go to the movies and you see a

mother-in-law mistreating her daughter-in-law, you will start crying and then you will go home and mistreat your own daughter-inlaw.

Or otherwise the daughter-in-law mistreats her mother-in-law. But she will say that I have never mistreated anyone! If you keep up this practice of lying you can never progress in Sahaja Yoga, because it has transformed your life.

Your life has become like gold and you can never tarnish gold, nothing can spoil it.

So now that you have become this, assume it. Why do you want to be the slave of all these worldly things? This is the character of the Kuṇḍalinī, that she makes you completely clean, pure. You should work for it of course, but I don't need any special effort from you because I am enjoying Myself, simply that you should also reach this state. You should also have this joy and should think that if all this is to have the joy, then by self introspection and by asking questions to if what you are doing is right, a lot of things could be corrected.

It is true that Sahaja is very easy and that is why it is so difficult. If somebody comes with a bit stick and orders you, come along, everybody shave your heads, put on red clothes, don't eat for fourteen days, finished, you would become all right. But that which is Sahaja [spontaneous] has to be done with your heart, with your mind and intelligence, should be welcomed and you have to make yourselves all right.

Why did I do that, should I have done this? In this way you give up a lot and in this way you become your true

self and have no desire for anything, just, content where you are, without problem.

And most surprising is that when the Chaitanya knows that you desire nothing, She will lay everything before you... It will happen, it will and then you will see that you will want for nothing But for this you must have full faith. Today we have praised Śhrī Shiva so much and he likes people who are without desire.

This is the difference between Me and Śhrī Shiva, that I like all kinds of people but not him. People are so involved into all of this, wear these clothes and if we don't wear them, what will happen? But this renunciation is not outer but inner, you become a renunciate [Sannyās] from within and when you reach this state you will never be dissatisfied. Wherever you are, you will enjoy.

In the past there were the Nath people who were nomadic and travelled all over the world and gave their teachings to so many people. I was so amazed to see how far these people had reached. When I went to Columbia I heard that these people had come to Bolivia. If you go to Bolivia you have you are amazed because it is so high up. In those days everything was on foot, so I just couldn't understand how they had reached there. They had also been to Russia and many other countries. How they managed, where they stayed, what they wore, nobody knows. They were in the state of `dasha' and when this state is achieved you become like a kind of Superman. Like Sāi Nāth of Shirdi, was appearing everywhere and was helping everybody. People would say that we had see you there, yes he would say it is

possible, why not. These people became so subtle because this wanting in them had disappeared and they became subtlety. But this subtlety is to be attained through Shivaji's Pūjā.

[Shri Mataji talk in English:] I am talking to them about Shiva's worship, what should happen to you. But today, I am going to tell you about the internal happening within us when you get your realisation. There are eleven rudras placed here, eleven rudras. They are particles, we can say, anshas, they call it, of Shiva's powers and all of them try to take out or to remove all the false ideas we have about life. When the Kuṇḍalinī rises they all get enlightened, eleven of them. And, say for example, Buddha had a part of that, Mahāvīra had a part of that. Now, all of them what they do is to control us from falling into the prey of various things, like we have an ego.

So, Buddha will look after the ego part. He will see that you get shocked by your ego.

You will be quite amazed how you could be so egoistical and so insulting and so humiliating. But when this rudra is not awakened, when there is no light in this rudra, then what happens? You start justifying yourself. You think whatever you do is correct, whatever you've done, whatever you've said, whatever you have achieved, you think is your right. You've done nothing wrong. For that, this Buddha's rudra has to be awakened.

On the contrary, if you go on pampering your ego, if you go on becoming egoistical, you become absolutely a right-sided personality. Once you are a right-sided personality you will know what all the symptoms there are of such a person. Now, for that if you just watch and

introspect and see for yourself what ego has done to you, what wrong ideas you had about yourself.

So that's why Mohammed Sahib has said, “Beat yourself with shoes." He didn't know what else to tell. Because this ego business can really burst you, your head completely and you may land up into so many difficulties. Ultimately, I have seen people developing this yuppie's disease where the conscious mind becomes absolutely useless, cannot move. Consciously people cannot move. Unconsciously they will, but not consciously. And this disease is so horrible. A person becomes like a reptile. You have to carry them on your body. They can't walk on their own. They can't sit on their own. In a very young age this can happen. This is happening in America also. I have seen two, three cases here, in India also such a thing is happening.

So if you do not try to see your ego and control it and feel repentant about it. In Sahaja Yoga, there is nothing like repentance, we don't believe in repentance. Because we believe that you all have got your realisation. You are beyond any mistakes. It's not true. We have to repent. There's a, in English, there is a word, sorry.

Sorry for everything, they will say sorry. Even telephone if you pick up they say `sorry'. I say, “Sorry, for what?" But this sorry itself is very empty. It has no meaning. It has no depth. When you say `sorry' you have to see why you are saying `sorry' and what is to be corrected.

This is a very big problem of today's generation where people have developed such tremendous ego, because all our economic growth, all our industrial developments, all our big, big organizations, all of them have given us a

way that we should all develop our ego. If we don't develop our ego we will be lost, we are nowhere. And that's how we start pampering it and then this right-sided problem starts.

Then as a reaction it goes to the left side. Actually, in the head it is on the right side. Here is the right side ego comes up so the left rudra is that of Mahāvīra.

So people do things which are sinful, which are wrong, which are against Śhrī Gaṇeśha.

Then also there are controlling powers of Mahāvīra who controls. He says, “You will go to hell. This will happen." He describes all the hell, all kinds of hell, that you'll go to hell and you'll be burnt alive, I don't know all kinds of things He describes to frighten you. But that hasn't helped.

So people start getting more onto the left side and I should say, through this rudra when this rudra gets helpless, then a tremendous depression comes in. One feels very depressed.

“Oh God! What a depression I have! I am so sick. I am this thing." And then you try to frighten others with your depressions. You show sort of a, what you call, emotional blackmail you do. All kinds of things you will do and beat your head and do all kinds of things. Could be through ego, could be through this left side problem of the left rudra.

These two rudras are very important because they are directly connected with our left and right sympathetic nervous system.

So, it's very important to see that you don't fall prey to these rudras. These rudras are to be satisfied.

So to be normal at least look after these two rudras, which are: one is one who controls the ego and another is self pity. `I just can't do it, I'm this, that' and all kinds of depression.

All this works out into physically also into very serious problems like cancer. If the rudras are caught up, you develop cancer. But all this portion gets swollen up. It's called as the medha. This all portion gets swollen up and you can see a cancer patient having a swelling all over. At least would be here or may be there. Because such a swing in the nature of a person that you can't say from which rudra they have developed these psychosomatic troubles.

Psychosomatic troubles, all of them, come because the rudras have become ineffective. It can be due to the depressive nature or oppressive nature. It could be due to many other factors also. But all these factors are nothing but part and parcel of Śhrī Shiva's or Sadāśhiva's powers. He is the one who is full of karuna, full of compassion. He is the ocean of compassion. If you ask Him forgiveness, He will forgive.

Whatever you do instead of feeling guilty if you ask for forgiveness, then He forgives. But if you think you, whatever you've done is good, you've never tortured anybody, you have never made anybody suffer.

Then, it knows. Shiva knows everything, isn't it? And, because it knows, it starts giving up.

So there's a big combination of your will power to be there and the combination of the blessings of Shiva.

When the Shiva blesses you, your will power also heightens. But you must have full will power to know that you have to be of a higher level of personality. He was not at all a mundane guy. I mean He was, supposing ask Shiva to go to some party and all that. How will He look there? People will laugh at Him.

When I met some hippies, I said, “Why are you having this kind of hair?" So they said, “We want to..." They are all primitive.

So he said, “I want to be primitive." I said, “But the brain is modern. What's the use of having primitive hair?" So, deception! Deceiving yourself is not going to help. Best thing is to face yourself and understand what wrong you have been doing. If it works out, I tell you, so many Sahaja Yogis you are sitting here.

If you correct yourself and become that, I am sure all the problems, political, economic and all stupid problems we have will be finished. But today it's such a mixture, due to Kali Yuga, that even the worst people are carrying on.

Now, we have a responsibility to save this world. We have a responsibility to create a great, honourable life, which is not superficial, which is not just to show off. But inside it should develop so that this light of your spirit spreads and enlightens this world.

It's very important to understand all these troubles and, I should say, diseases, psychosomatic diseases, and all other problems which are in a collective way we can call of the Kali Yuga like political, economic, all these problems, only are created by human beings.

They are not created by the Divine Force. But Divine Force tries to neutralise them if there are many Sahaja

Yogis who are practicing Sahaja Yoga in the real sense of the word. If that could be done, if that could be achieved, then I think we can do a lot, a lot for the betterment of humanity and that's why we have got realisation. It's not only for yourself, it's not only for your family, it's not only for your city or country, but for the whole world. Sahaja Yoga is going to work out.

Now, if you have to do competition, you must only do competition in your ascent and in nothing else.

But people are so superficial that they think by showing off or by becoming something, a big Johnny, they will achieve something of a very great level. It has to be a very humble attitude towards yourself also, so that you understand that whatever you are doing is for the betterment of global problems. Absolutely we can solve because you are the channels of the Divine. If I could do it alone, I would have done it. But I can't, so that's why I had to gather you all and to tell you that you become all the channels. But in the meanwhile you enjoy, you enjoy life, every second becomes a joy, which is also the gift of Shiva. Shiva is the one who creates this great admiration and great appreciation of every moment, everything that is there.

And, that is the state we have to achieve by not condemning yourself or not by pampering your ego, but by seeing what you are. That's the main thing one has to see, what problem you have and what is troubling you is yourself. If you could just come to that point of understanding, I am sure, I am very, very sure that you will be such an asset to help to make this world look at itself and change, because superficially you cannot

change such deep rooted problems. And, you are being so blessed by Kuṇḍalinī that you can really become a great torch, I should say, torch on the path of truth, love and joy.

May God bless you!

Claus Nobel's message: In the northern hemisphere of our Earth, March 21st represents the Vernal Equinox.

This date signifies springtime, birth, renewal and the time in our calendar when the life giving forces of light conquers the one of coldness and darkness. Among the 365 days of the year, your altruistic and compassionate soul decided to launch its mission for `Peace on Earth', on the very day that stands for love, life and light. An all-important day, which I clearly recognize as the threshold day for the much awaited genesis of righteous and dignified human evolution.

[Shri Mataji talks in Hindi:] When all the world is sleeping a Sahaja Yogi is awaken and when all the world is getting

up a Sahaja Yogi is sleeping. The meaning of this is that when the attention of a Sahaja Yogi is towards a particular thing, the people's attention is not towards it. Their attention towards other things because they are away from the reality. Those people are stuck to money or they want to have power in their hands or many other things and they are completely lost away from reality.

Some people say this is the reason or that is the reason and they will try to give their own point of view.

But I think that this is because of the ignorance. In ignorance man does all sorts of wrong things. A kind of blindness spreads on them and they get completely covered by this deep blindness. Suppose this place becomes dark, then a big havoc would be created.

Some people will try to run outside or try to push each other, some people will get injured, some people will trample on others, anything can happen. When we live in this darkness we are in the situation of a blind man. But when we get our Realisation, when our Kuṇḍalinī gets awakened and when we are facing the Reality, then no one can describe the glory of the Truth.

When I asked someone “what did you get in Sahaja Yoga?", the person replied: “Mother, I cannot tell You what I got but I got everything." Everything means what? Me also, I can say today that I got everything. When I was small I told to My father that the number of stars shinning in the sky, I want the same number of people to shine in this world and spread the light of the Divine. My father said that it is possible but try to awaken the collective consciousness and don't give any speech, don't

write anything, otherwise a new Bible will appear, or a new Koran and a fight will start.

So first You try to awaken the collective consciousness. And then the awakening of the collective consciousness started in Sahaja Yoga, but I am going to tell you today about the problems of this work.

It is very auspicious to have the collective consciousness all over the world, in all countries in large number of people having achieved the Truth. But it is painful when I think that we have not paid so much attention to it. The door was open and all types of people came inside with all their negativity. But when this type of few people come in Sahaja Yoga they are very harmful. Namadeva and others, they were really saints. They clearly said those who are bad cannot become good. Their habits can never be improved.

For example he said, take one fly. If it drops in the food it will try to kill us and if it dies and goes in our stomach we will also die. This fly cannot be treated. And this type of people are sticky so in Sahaja Yoga these things should be cleared out. Till it is not cleared we will never rise. For example if anything is stuck on the feathers of a bird it cannot fly. That's why in the happiness of heaven which is actually Mother's protection, we cannot fly like a bird because in our feathers also some things are still stuck.

This day is very auspicious and people think it is a very big day and on this day there was a big happening, which has been predicted by many people. But today you all will have to do a particular work.

You have put so many balloons on the walls that people become happy and imagine that even the rubber has got

so much of power that it gives us joy and happiness and that it could become such a beautiful thing. And we, we are human beings and then we are Sahaja Yogis supposed to be higher people. In order to get to that level, what do we have to do? I had a sad experience which I will tell you as a story. This I am specially saying in Hindi, because it is specially seen at the Indians. But not in English, not at the foreigners, they are very dumb about it. In our country, in India, there were many people from different countries settled, for example, from Pakistan, from Bangladesh, from Śhrī Lanka. This is Our Mother, Our `Bharat Mātā'. But people divided it and destroyed it. Why? Because there were some people who thought that they should become leader and a big man.

So why shouldn't I do something to become a big man. If he becomes a Prime Minister, I can also become a Prime Minister! Jealousy is the first thing. If jealousy comes, he thinks that even he should have his own country. If he can divide the country then he will have his contribution and have a control over it.

In many big families it happens that people think they want a separate house and stay separately, have a wife, children and live together; but not interested in other things.

So there is a tendency of separating things in human beings. And because of this, Bangladesh was created. I was surprised that people had asked for Bangladesh and wanted to govern it.

So if you take an example of Islam or any other Dharma, but with some reason or the other there is this separation. And today Bangladesh is in such a situation

that people tell Me, “Mother, please don't go there, otherwise You will have tears flowing continuously." Pakistan is also in the same situation. Ceylon, which is Sri Lanka, is also in the same situation. All these partitions which have been created and they thought of governing, their Prime Ministers have been killed by their own people.

So from some jealousy, more jealousy is increased and then we start having groups, continue fighting and still want to have separation. But what are we going to get out of it? Sahaja Yoga is completely against it we cannot do any separation, we have to unite them. Sahaja Yoga is working on synthesis and if there is no idea of synthesis you better leave Sahaja Yoga. Now it happened that there was a Sahaja Yogi who was taking out bhoots of people. I told him to stop it otherwise the bhoots will catch him. But he was fond of it and maybe people were paying him or calling him a famous man.

So he formed a new group. Even some Sahaja Yogis who were in this group got separated and they made a new association. About Me they didn't have any doubt. But as for the leaders, they criticised them, saying they were of no use, but we are the best and pure people and disciples of Shri Mataji. Without My permission, without My decision, they formed a big group, showing My photos. I was not aware of anything what business they are doing, saying this leader is not good, that leader is not good. If there is anyone bad, I will know it. If they respect Me they should surrender to Me. Let Me decide if the leader is good or not. But you have no right to tell him what he is doing, why he has done this? Now some

people will say why should we have a leader in Sahaja Yoga? They are present because I cannot keep relation with everyone.

So one person can become an intermediate to keep relation with everyone.

So this person was angry on the leader. If any leader has any defect or any problem this I will take it out. And if you have any, you can write to Me.

In this way a group of 70-80 persons was formed whose faces I had never seen, never heard of them.

I don't know if they are Sahaja Yogis or not. This person said that he was the incarnation of Kalki.

So if he is, let him be. I don't say anything but please keep away from Sahaja Yoga, he has no place in it.

People considered him as Kalki, started touching his feet and he started taking money from people. All the defects he was showing about the Sahaja Yogis were present in him and so he was exposed finally.

So this type of jealousy and ambition took place and those Sahaja Yogis who were stupid went in it. It is very surprising. As it is the last judgement, everyone is being selected. But at least ask Me, take My certificate. But these people say Mother we believe You. But what I do, you don't believe. After doing all this these stupid people came to Ganapatipule, they threw stones on Me. They lost their senses without realizing what they were doing, what they were saying. It is absolutely like a drinker's behaviour. These people created a big show. They came in the program. They had such bad vibrations. I was surprised they were going to stay in Sahaja Yoga. Instead

of clearing their own vibrations, they were clearing other people's vibrations.

So such people should leave Sahaja Yoga. If one of such a person stands out others also start supporting him, thinking they would be able to go to heaven. considering that they are doing a great work.

Sahaja Yoga is a collective work, it is a collective organization. I told them that they were defending Me by creating this separation. They replied that I was abusing them. I am explaining that there were against Divine, that's why there was an earthquake. And after this also I don't know what will happen because the Divine will not spare them. Me, I am a Mother. I will forgive everything. But the Divine will never leave them. It's better if they stop all this business. But they have not yet changed. In Dehradun, nowadays, they are continuing the same thing. On one side there is `Jhara khand' and on the other side there is `bhoot khand'. If these 3-4 Sahaja Yogis are out of Sahaja Yoga, there are many people stuck to them. But for these people I have no worry even if they go and dive in Ganga. But they cannot stay in Sahaja Yoga, cannot take My name and keep My photographs. This is a very sad thing. The man with whom I had so much of confidence, who worked so much, these people are after him, telling how he has such a big car. This they should have asked Me. He does his own work, his own business. And anyone has any complain about it, they should write to Me directly. Today I didn't want to speak about this, but there was no other chance.

So on this auspicious day I had to say this inauspicious thing. If you want to do such type of business please go

out of Sahaja Yoga. It's not a problem for Me. In Sahaj Yoga there is no compulsion. I never forced My family members. Even when I know there will be nothing better than it, if My family members will come in Sahaja Yoga. If you want to do it, do it; if you don't want, don't do it. But don't do this type of business. That means you can never be a Sahaja Yogi. From Sahaja point of view, to do this behaviour with a leader is a big sin and then to form a group is the biggest sin. If you want you can write a letter to Me. I will understand with the vibrations if you are right or he is right.

And when they write rubbish things I don't pay any attention. But what about themselves, are they very clean people? If you are not clear, what about future? You have your children, your neighbours, what will they think about your leader? Then what they will think about you, why you are following such people such people. Shri Mataji doesn't have any brains to choose such people? This kind of things take place and Sahaja Yoga goes down. Up till now nothing has gone down, I have tried to save the people to the maximum. The more is the number of Sahaja Yogis better it is. But I also think, that in the heaven of truth, to go in it you will have to prepare for it and if there is less place, God will try to cut off the stupid people. But you should not fall in this trap. If you are realised, it is for yourself not for others. Try to find your own mistakes. For example, people come in Sahaja Yoga to earn money. If we tell them that you have not come in Sahaja Yoga to earn money, it does go in their brains Today I have to say that people are still stuck on this money problem. Christ has said that the first ones

will be the last and the last ones will be the first. I cannot see it in people.

In the beginning when people came to Sahaja Yoga, the people from Bombay used to say: “Mother, You should take at least 1,000 Rs from us." I said: “I cannot count the money, I cannot keep them properly, I don't know anything about banks.

So, when we will have our trust, you can put the money in it." Not because I wanted to My honesty, but I cannot do any accounting. But when you know all this accounting, you should know that in the name of Dharma, if anyone is taking money, it cannot be useful, they will have no benefit out of it. We found an association for the ladies who were poor, Muslim ladies without husband coming from Rajasthan, Bihar. But for this I don't need any money from you. There is always some arrangement. But I thought maybe you can get some blessings, so you keep 500 Rs instead of 108 Rs. There were many letters from people about this change of 108 Rs to 500 Rs. If you have to pay in one year 500 Rs, you don't want to give anything but you are just taking Puṇyas. Then how will you see your Lakṣhmī Tattwa. You have to always give for Lakṣhmī Tattwa. People have become mad for these 500 Rs.

Sometimes they give 500 Rs to have a haircut. Then I realised that they are not yet deep. The generation before was not like this.

So even now our attention is still on money. They say that they will give 108 Rs or they will not come any more. It is good if you don't come. You can go out permanently. It is better, because Sahaja Yoga is not for beggars. First

clear up yourself and then help the beggars. If we asked some more money for beggars, you have become angry. But I don't need any money. And also you become angry on leaders.

People said: “Mother, who has suggested you that." I say that there is not anyone born to give Me any suggestion! Me, I do according to Myself. I am a very simple lady but I am very tricky. That's why, don't try to fool Me. If you cannot give even a little bit of money after so many years that have past, after treating so many people, giving so much money as a gift, but for such a small thing you have changed your mind.

I felt very sorry about it. Before also the same thing happened. The people from Bombay asked to do the Pūjā in Bombay [Mumbai]. I said that I had a very bad experience last time when a Pūjā was done and only a quarter of the people paid the money for food. I had to pay the money for food and they did My Pūjā and I had to pay for them. Specially the people from Bombay [Mumbai] and from Maharashtra are very miserly. They would give any money to Brahmans in temples but they want to eat for free. A quarter of them paid for food, a third paid for Pūjā 11 Rs. And they came in Sahaja Yoga. They would better take a bowl and sit in front of a mosque like beggars.

That's why I say I don't need any money as a donation. But I just tried to test them. But I am surprised with this testing. There is not a single person so poor who cannot afford 500 Rs. And it was said that those who cannot afford need not pay. People were calling for a reduction of money trying to bargain. But with this you have been

tested how deep you are. For an Indian is very important to take the attention away from money. Why do you have so much your attention on money? I have awakened your Lakṣhmī Tattwa. The more you will give the more you will get. To give any person is so joyful. When you give Me something I accept to make you happy. Otherwise I don't need anything. I have no place in My house to keep things. I said I am going to sell all My jewels so that I can do all the work. They said you do whatever you want, but we will give the gifts. This is all for your happiness. But this you Indians should understand. At the time of the independence My father sold all the properties and the jewels, went in jail and there My parents were put on ice. But nothing affected Me. It was a joke for Me.

Those who have played tricks with Sahaja Yoga, I am going to get rid of them, it is sure. And be careful, if anyone is against any leader, he will get out of Sahaja Yoga completely. There is no doubt about it. If you are not capable of Sahaja Yoga, don't come in it.

I made an effort to say all this. And when I slept I didn't know what I will speak today with you. I am seven years old. But the work of the elders is to give advises to the younger people, to tell them what is life. You have not come in Sahaja Yoga to spoil your lives. Because if you want to be in Sahaja Yoga you have to see the two sides: one is the mountain and the other is the valley. If you want to climb it, you need to have desire, power. If you don't have pure desire it will not work. I didn't want to say all this today but at the time of Shivaratri the things were so much out of the limits that I had to say it. I could speak on Shivaratri because Śhrī Shiva is always

forgiving everything but that also within limits. And when Śhrī Shiva gets angry you know what He does. I am scared of Śhrī Shiva Sahaja Yoga knowledge is free because of our previous life. But after coming in Sahaja Yoga if you still are going in the wrong direction, it is better to leave. I have thought and thought and I have spoken. Normally I don't think, I am in Nirvichara. I have said it because I consider you as My children. That's why, when you are falling lower and lower by your defects, I cannot stand it. It is very sad.

There is everything in Sahaja Yoga: peace, joy, your questions are solved immediately. You know it, you have experienced it, no need for Me to tell you specially.

[Shri Mataji talks in English:] That was for Indians, not for you people. I have to tell you thank you very much for this celebration, for all these beautiful balloons; but, looking at these balloons, we have to also see some of them who have lost their air completely. This is another problem we face in the West because to have ego itself, according to the Western culture, is a very great achievement. And when we start living with our ego I know how one looks like. He really looks like a stupid fellow. When he talks, when he describes himself, you don't know where to look because just feel like laughing at his stupidity. Ego is the outcome of stupidity. I don't know what to say; how to give a simile to ego, because it's just bloated and makes you float in the air and when it bursts you are down on the earth. But you are not down on the earth the way Sahaja Yogis should be down to earth; but you are completely finished. All your arrogance goes to waste.

You can never understand Sahaja Yoga if you have this ego in your head. I have known people who have this ego. They have come to Sahaja Yoga and still they want to think that they know more than anybody else. To know about yourself you have to go deep down and to go deep down you have to give up all this idea which makes you float in the air. Imagine if you have a big balloon attached to you. How can you go deep down into the sea? You cannot. That kind of a air which makes you float in the air, absolutely in an area of stupidity, what else, I mean English you will think there are no words, stupidity means everything. Then you may think no end of yourself. You may think whatever you like, you can behave the way you like and all that but what do you achieve? You achieve nothing out of it. Whatever you achieve people are jealous of you. They want to harm you. You have no friends. Nobody cares for you and in Sahaja Yoga people know who has got this problem.

So, I've seen people when they start talking they say, “Ah! We know, we know him." Once I had an experience, long, long time back in Pune where the people who were owning that wada said that we cannot have Shri Mataji's program because She is not a Brahmin.

So the Sahaja Yogis said, all right we'll give it in the newspaper because She is not a Brahmin we cannot have a program.

So, these people came to My program and the owner of that was sitting on the gallery on top. He couldn't even walk. He was suffering from some sort of a funny disease.

So these people suddenly start. I didn't know.

They didn't tell Me anything. They didn't tell Me that these people have protested or whatever it is.

So they all started shaking like this, like this, like this. I said, “What is this?" So I said, “What is it?" They said “Mother, stop it. We know You are Shakti but stop it. It's too much, too much." “But what did you do?" They said, “We didn't do anything. We just said this is a Brahmin's thing and a Brahmin's wada and this area is mostly resided by Brahmins, so we thought that You cannot have your program." I said, “Really, that's all?" “Yes, yes, that's all. But it's, you see on the other side, you see those people? They are also shaking with Your power." So I asked them, “Who are you? Are you also Brahmins?" They said, “No, no. We are certified mad people from Thana." “And how are you here?" They said, “There was one fellow who was mad was cured by You." “Really?" “So our superintendent is here. He has brought us here. We are certified mad. Certified." My goodness, these people looked at Me. I said, “See now, you tally. You are shaking and they are shaking. Now you tally. Where are you?" And they all became Sahaja Yogis. Not only that but the gentleman sitting upstairs I told him, “You get up and come down." He came and since that day he has surrendered his life and did a lot of work in Pune.

So what I'm saying that anybody who talks like that; that “This is wrong, in Sahaja Yoga, this should not happen, we should not have paid so much, or this leader is not good"; should take a paper, thin paper, on his hand and put it before the photograph. If you can stop the shaking then you are all right. All of you can try this. Then try on the right hand. Very practical. If the paper is shaking that

means Mister Ego is shaking and you know how to treat your ego in Sahaja Yoga, thanks to Mohammed Sahib. He has told us how to treat it.

Now these two problems are within us. One of them is our conditioning and another is this ego business and we make our mind out of that and we are playing under the governance of these two things which we have used to make this mind. Now you have to be careful. You find out with left hand. Now let's see. If the left hand is shaking then you are conditioned. If the right hand is shaking then you are egoistical.

So now you treat it. You treat these two things. Before Me you'll get vibrations all right because you see I am your Mother. All right. But that doesn't mean you are all right. You try on My photograph; that's much more sharp.

So being Mother you know I play around. I think, I don't know what I should say, but maybe you may not feel that way. But before the photograph you put on the left hand side a newspaper or a little paper or a thin paper. On the right hand side another paper. One by one you try and judge yourself, what are you? After all you have not come here in Sahaja Yoga to emancipate Me. You have come here to evolve yourself and because of that you have to face yourself and see for yourself what is within you which is very strong, which is troublesome, which is dragging you down, which is killing.

Sahaja Yoga is nothing but Ocean of Joy. I thought that in My absence you'll be all enjoying it all right; you do. Airport I have seen sometimes I am late because of the plane, about four hours, five hours and everybody is so fresh and so nice early in the morning. I said, “What's

happened?" “The whole night we have been enjoying Mother." So what you enjoy in that is collectivity: Sangat. That collectivity you should enjoy only by getting rid of your nonsensical boundaries that you have built and then you see the joy. All the time you'll be floating in joy. There is a sense which people have which you may not have before realisation.

Some of the people, I was amazed how deep they are, how they took to Sahaja Yoga. Supposed to be very great men. Supposed to be people of very great principles but very hot-tempered, intolerant about people and they take to Sahaja Yoga just like this because inside there's a big depth, so that everything is absorbed without any problem. Everybody can achieve but one has to be careful as to the two wheels of our mind.

One is the ego, another is the conditioning. All kinds of conditionings are there, especially in India. In the West it is all kinds of egos you know, different, different types. I have seen so many types and varieties of egos, I was surprised; to face that. I didn't know what to say. It's a very, very subtle thing which people have carved out of their minds.

So for you today it is to be decided that you are only still small children and like small children you must have a very clean heart to accept, to absorb the beauty of peace that is within you; and also the beauty of purity. Without purity you cannot enjoy anything.

So in Sahaja Yoga though we have so many people I must say the purity of these few saints, who lived earlier, we have to yet achieve. For example, yesterday they were singing about Ali. I was so very happy because He

was an Incarnation. And His purity people are singing now; not at that time. He was killed at that time, He was tortured. That always they do.

Then we have many others. We have here Dam Dam Sahib. See what a great thing to come to. We have here Nizamuddin Auliya. We have so many people in our country itself that nobody, no other country can claim. They have one, say in England they have William Blake or this and that. We had so many people. Why? Not because we were very good people, but because we were to be improved. Things had to be done.

So they were born. Though this is a Yoga Bhūmi anywhere you go in India, I was surprised, in Haryana so many great saints lived there. But they were all tortured, troubled, never understood. It was so painful and hurts you how this stupid, ignorant, blind people tortured them.

So now it is our duty of Sahaja Yogis to, first of all, find out who is a saint. Even among Sahaja Yogis, as I described in Hindi language, there are people who try to trouble, trouble others. If you have no recognition and understanding of what is the truth, what is love, what is pure compassion, then you are not a Sahaja Yogi. It's like an obtuse angle you see, you have. You look at a person with an obtuse angle you don't see anything, one-sided. Now, at this juncture when I am so very old now; I have to request that you turn your eyes to yourself. Introspect. Because among you there are some people who will try to divert your attention, will try to say things. Very easy to say, “He is very dishonest, he is very immoral"; very easy to say. What are you? We have to now understand

that Sahaja Yoga is to be consolidated through synthesis. We are believers of synthesis. Any divisive thing that comes into your mind you should just throw it away. This is a request on this day I make you, that you please introspect. Unless and until you introspect you cannot even respect yourself. You cannot even love yourself. If you love yourself you will introspect and find out what's wrong. Supposing I love this sarī, then if I find any doubt about it or see any dot somewhere or something I'll get it cleaned. I'll not be proud of it, wear it and go round saying, “Ah! See I've got so many spots." In the same way, you should be not proud of whatever aSahaj temperaments you have within yourself. And don't talk like that. Christ has called them `murmuring souls'. He said, “Beware of the murmuring souls." I would say: “Throw away all the murmuring souls." That's the only way. In Hindi as they say `bakwasi'; their name is bakwasi; means the ones who just chatter, chatter, chatter; talk all nonsense about others.

He doesn't know what he is. It is much more in India, I must confess. I'm sorry, though I'm an Indian.

It is a habit of talking ill of others, sitting down just chit-chatting. They will not talk of Sahaja Yoga.

How many people know Sahaja Yoga in the proper way? I mean if I have to give degrees, what degrees I should give to you? Tell Me. You don't know even about your vibrations. Of course you are Sahaja Yogis because you have fallen into this trap of achieving evolution. But how many are really grown up into it? You can.

So I have to again and again tell you, to make Me happy, you have to give up all these nonsensical, cheapish talks;

but try to understand from each other what we know of Sahaja Yoga. Discuss it and contribute to this knowledge by describing your experiences of Sahaja Yoga. There are many who do it. I am not saying they don't do. But even there's one bad fellow he can spoil all of them; like one bad apple can spoil all the apples.

So what do we do, throw away the apple out of the basket.

It is important see, even I feel all this, standing like a witness to you, silent witness. When I see big, big mountains and I think they are like great saints who are watching and they are trying to record what is happening in this world because they also understand. They also know. I have to again and again, tell you that today is the day to see your own self, your own Chakras, your own, I should say, defects. That will give you permanently the joy that is promised. You will get thoughtless awareness. Also you'll get doubtless awareness. But never get into the trap of your conditioning and of your ego.

This is what I have to tell you today, on this day where you are celebrating, that you celebrate your own birthday. Celebrate it. See for yourself what you have achieved and what you are going to achieve.

It's time for you to celebrate than to celebrate My birthday. I'll be very happy to celebrate your birthday than to celebrate Mine.

So may God bless you.

Today, I was thinking, that we had given a nice chance to children to come up. But all the leaders are also My children.

So they should come here on the stage and can say Atharva Sheersha. Not the children which are really children, in the real sense of the word, but those who have become child-like. All such people should come up and say Atharva Sheersha, We all should say Atharva Sheersha. It's going to be a very small Pūjā because you are worshipping Me as I am. It's not like anything.

[As Sahaja Yogis begin to offer country presents:] When you give Me something I only take it to make you feel happy. I don't need anything. There is no place in My house to keep anything. You give it out of so much love, I am tired of fighting with you people, of saying don't give Me sarīs, I don't need jewelry, I don't need anything, I am doing it for your joy.

[Praises the efforts of Lucknow to resurrect the Muslims:] And that's how the power of Sahaja Yoga should be used to resurrect people!

Contents: 1997-04-06 **Address to Doctors during the Conference "The Art of Healing and `Sahaja Yoga', A Special Session on Alternative Medicine", Indian Medical Association, FICCI Auditorium, 1 Tansen Marg, New Delhi, India**

I bow to all the seekers of Truth. At the very outset, I have to tell you that Truth is what it is. You cannot change it, you cannot transform it, you cannot explain it, only thing you can experience it. In this Kali Yuga there is

a special category of people born in all the countries very surprisingly, who are seekers of Truth. And William Blake, the great poet of England has said that these men of God will be born during this time and they will know the truth.

So many have said about this. Even in our old books of prophesies, you have known so many of them but especially the one which is described in NĀdi Granth written by Bhrigu Muni is clearly said that at this time people will know the Truth through the Kuṇḍalinī Awakening.

The knowledge of Kuṇḍalinī was known to us, I don't know how many years back, you cannot say because our history is so unknown but at the time of a great saint called as Macchindranath and Gorakhnath, they were indulging into awakening of Kuṇḍalinī but the condition was that one Guru should give Realisation to only one person. Went on like this till the twelfth century when Gñyānadeva first of all asked his Guru, his own Master was his own brother, asked him that “you please allow Me to at least write about Kuṇḍalinī." Because in the Gītā, it was not described. Though Śhrī Kṛiṣhṇa has talked of Sthit Pragñyā [Unmovable in all situations] and all those things but he didn't talk about: How to get it? What is the mechanism within us which works it out? Then he wrote it in his Gyāneshwari which is just a, I think, explanation of Gītā very clearly that there is a power within us. In the sixth chapter he wrote about Kuṇḍalinī but the people who were in charge of religion didn't want that.

So they said, “This is a Nisiddha [prohibited] part and you should not read this part of Kuṇḍalinī." But in the sixteenth century under the guidance of Guru Nanaka,

Namadeva, Kabīra, all these people clearly, clearly, very clearly wrote about Kuṇḍalinī but the way it was mutilated by people which is very surprising. Every thing has been mutilated but this one was very surprising because Kabīra was in Bihar and he called Kuṇḍalinī as Surti. Very clearly he said about Surti but in Bihar Surti is what you call tobacco. They call tobacco as Surti, so you can imagine what is the mutilation.

Now this power is within you. If I am telling you something today you need not accept it. Blind folded acceptance is of no use. We have had enough problems with blind faiths.

So first of all you must get the experience and then you will not doubt it.

This science was known to us since long but as it was only done for one person or say ten persons at the most I decided to find out a method by which an en masse realisation could be given. Luckily My father was a very social person and I could meet many people. Even My husband's life was such that I could meet many people.

So I worked out the permutations and combinations of human problems and then I discovered how we can easily solve this problem of Kuṇḍalinī awakening. Because there are problems on the way of its ascent then Kuṇḍalinī doesn't, Kuṇḍalinī doesn't come up.

Now there are seven Chakras basically within us. These seven Chakras are responsible of our physical, mental and emotional being. There is no doubt about it but you have to first find out and then believe in it. Don't believe because I am saying so or anybody says so. You have to experience it and feel it. There are many ways we can

also judge for example in the Koran, Mohammed Sahib has said, “At the time of Qayamat, means this time of Resurrection, your hands will speak." He also call it Qayamat means those who will not accept will suffer. But who will accept there hands will speak, there mouth will be shut and their hands will speak. This exactly what happens in Sahaja Yoga that once you get your Self-realisation you can feel those subtle centers within you.

These subtle centers of energy are seven in number and are acting for giving us all kinds of energies.

Now the problem is how to make people believe in Kuṇḍalinī. It's a difficult task because you are all intellectuals and you have had your medical education from England and all those places you see. It is more westernized and to believe in something Indian is rather difficult for people that it's all Indian after all.

But actually even in medical science we have to understand the limitations of a science. First of all science is amoral. Secondly, it does not go to the roots.

So it starts like we have to treat a tree.

So we treat the leaves, treat the branches but Sahaja Yoga is going to the roots, is the knowledge of the roots.

And the roots are the seven Chakras and our Kuṇḍalinī. Of course without medical science you cannot also understand Sahaja Yoga that is also one of the things because you can relate very easily. It is very scientific.

Now there are three Nāḍīs also left, right and center. Left is called as Iḍā Nāḍī, right as Pi fingalā and the center one is called as Suṣhumnā Nāḍī. Kabīra has described it very clearly and it is in the Granth Sahib also written

down but nobody tries to understand or to go beyond the words. Just go and read the words that is not going to help. You have to go beyond it. It is like this, you see a beautiful picture say where it's raining, it's very beautiful and you are seeing it, that's all. But you are not inside it to experience it.

So to enter inside was difficult one because of the tradition of giving to one person only or to few persons and secondly the greatest objection came from people who were incharge of religion those days.

Now a days those who are intellectuals, you should say, medias and other people who have a feeling that they know everything. They don't want to take anything that is [UNCLEAR... to begin with/or stupid]. This is one of the reasons why people don't turn their eyes to the great knowledge we have in this country. I am so very happy today that Indian Medical Association has given Me this honour first of all because I could never imagine in My lifetime I would be able to talk with you. I also did My medicine and I knew how difficult it was and how people were blind.

So I used to think how will I explain to them like Kabīra has said, “Kaise samjhau, sab jag andha?" [How to make them understand when the whole world is blind?] But the time has come because there are seekers now. And they should also know one more thing that this country is the Yoga Bhūmi. They have given us science all right but we will give them Yoga. We will give them the real basic knowledge what is the foundation of Medical Science, is the foundation! Now by experimenting this and that also

you have seen that it is neutralised by challenges. Every theory is neutralised so that means it is not Absolute.

So we have to go to something that is absolutely Absolute. You have seen that Einstein found out something then our people are after him this is wrong, that is wrong, it is going on like that. All the time something comes up, people go on criticising and the whole knowledge goes into oblivion.

So now we have to understand that if this is the Yoga Bhūmi, this is our country and if it has given us such a knowledge, why should we not also listen to it, because not only that it will flower your knowledge of medicine, not only that but it will give you such a confidence while practicing, while talking about medicine.

Now as it is a subject, is on medicine I would like to speak on one of the centers which is very important because doctors are always affected by that center.

So I better tell them what can go wrong with doctors and what they should be careful about, theek hai [all right].

It is to be understood that there is a center, is the second center which we call as Swādhiṣhṭhān. This center is very interesting. It comes out of the Solar Plexus we call it as Nābhī Chakra and like a lotus and it moves all round you see, as you can say in gross way it is Aortic Plexus. It supplies energy to Aortic Plexus. It is not Aortic Plexus but supplies energy to Aortic Plexus.

Now this center is very important because it gives energy to our liver, to pancreas, to our spleen, to our intestines, to our kidneys, can you imagine such an important center it is! This Swādhiṣhṭhān. But the most important work it does is very... which I don't know you will accept

or not but it supplies energy to our grey cells which we are using all the time. When we are thinking too much, when we are acting physically and mentally, this center has to supply energy to our brain, we can call it to our grey cells which we are using all the time. When we are doctors, we are using our grey cells how much? We have no idea.

There is nobody who has found out how much we use our brains but we are going exhausting our brains and also we are very futuristic. All doctors are futuristic. May be they want to find out something in the pure sense of the word or may be they have certain ideas or may be it is money, may be anything but they are very, very futuristic and in that trend of futuristic behaviour also there is a big competition so they don't know what to do. They have to be futuristic and think but what will happen.

Now in this kind of movement of the mind what happens we start becoming very right-sided, extremely right-sided. Now as a result of that, as a right-sided man, you know I would say what medically can happen, of course also happens lot of things mentally also. But what can happen medically, this Swādhiṣhṭhān Chakra which has to supply to your liver, “Why do you call it liver?" Because of liver we live. Liver is very important in Sahaja Yoga. I know that in medicine we don't know much about liver and it is absolutely curable in Sahaja Yoga. But now what happens, liver is the one which takes all the poison of the body and throws it into the circulation. That everyone knows, all right! Now when liver is looked after it is normal, then we have also a pancreas, then we have

spleen and also kidneys and the last part of intestines, intestines as a whole but the last part is very important.

So such a man who is always thinking all his energy is going to his brain and all these organs are neglected and he can be affected by any one of them.

So the first thing he is affected is bad liver. Now this bad liver because it cannot throw its heat, which is the poison of the body into the circulation. What happens that it starts, heat starts rising, this heat goes higher on the right side. We call it right Heart which is the center which controls the lungs.

So such a person can get Asthma. Now Asthma has been cured through Sahaja Yoga, very simple way. But it can be cured, it gets Asthma, we say it is incurable because we do not know about Swādhiṣhṭhān.

Now this same thing happens to our... when it moves to the left side pancreas. Mostly people who are sitting on their chairs and thinking too much and planning too much get diabetes. Sugar doesn't give you diabetes. In Maharashtra, I don't know may be here also in the villages, a villager will take sugar in such a way that the spoon must stand at the right angles. That's the way a tea has to be made otherwise it is not tea. He never gets diabetes because he earns without any insurance or anything, spends it sleeps off.

Next day he earns. He does not have botheration about future, what he should do? He should accumulate money or he should give it to somebody, nothing. He just lives with himself. Now this goes to pancreas, gives you diabetes, this heat.

Then it goes down then the kidney, kidney it coagulates. Now for kidney if you go to dialysis, I must tell you not that only you die, but you die bankrupt it is a fact. Now in no way I want to criticise doctors, they have to earn after all, but there is a simple way of curing this kidney trouble. And once this kidney is cured, it is cured forever.

So by helping Swādhiṣhṭhān you can cure also kidney.

But the most difficult thing is the spleen. Now in modern times we are very hectic for example most of the doctors have to get up early in the morning on duty. In the college we also used to do the same thing.

Then we have no time to eat our food properly nothing. And we take our breakfast with us sometimes.

In America I have seen doctors even brushing their teeth in the car [laughs]. It is the limit of things.

So in this kind of a hectic life you see what happens the spleen, poor thing which has to produce RBCs for emergencies gets mad. She can't understand, “What is the matter with this gentleman?" and it cannot also a sort of cooperate with all the madness we have.

Then we read newspapers. Reading newspapers in the morning is a very dangerous thing because everyday you see something horrible and you get such a fright. For example these days our country is in doldrums. I never read it in the morning at any cost. But if you read it early in the morning any newspaper then finished, you will get some... They only tell you about what has gone wrong; disasters, accidents, if not that then political crisis, this that which upsets you. Whether you like it or not but it upsets you, so reading newspaper early in the morning.

Then just running forward, no time for wife, no time for children, nothing. Formerly I remember that husband used to eat nicely at about ten o'clock. The wife used to fan him because there might be some flies around. She used to fan and relaxed way they used to eat food and live relaxed. Now what you call in Urdu language Kashmakash [mental struggle] is so much that people are just running mad. They don't know what to do. Now they go to the office, then they find, doctors especially, the boss is angry or there is some very serious patient has come, somebody has died by mistake. I mean doctors are completely treated like criminals in America, absolutely like criminals.

So this is also coming here. If they do anything wrong by mistake, they do something, finished. Their practice is gone, they are put in jail. I mean after all they are human beings but this consideration is not there. And so this futuristic life makes them really crazy people. Then they become very hot tempered. Liver gives you heat, you become very hot tempered at the slightest thing, you just shoot off and start saying things which you should never have said. Then you feel guilty. When you feel guilty you catch this center here, left Viśhuddhi we call it by which you develop spondylitis. If not spondylitis, there is something horrible thing can happen to you.

Now according to Sahaja Yoga we have two types of heart attacks. One is a active massive heart attack and another one is what you call lethargic like angina.

So the first one which happens is the massive one where same thing the heat reaches the heart. Now say there is a boy who is playing tennis at the age of twenty-one or

twenty-two and is drinking also, competing with his father.

So he get that massive heart attack and it is absolutely fatal. He cannot live after that. This is a very common case you must have also seen. I am not telling you something out of the blue. But the another one is if you continue with this kind of thing then may be one day you might get massive heart attacks especially the industrialists.

Industrialists are so much futuristic, so much calculating that they don't calculate that this will entail their own heart trouble.

So this heart suddenly collapses and they die. This is a, we call it an active heart attack due to over acting.

Another one is lethargic heart attack like angina, that is if this center [Viśhuddhi] is caught here, if you feel guilty.

Some people are very sensitive and very formal type you know, they feel guilty. I should have done this. I have known people who have been crying all their life, “I spilled coffee on the table of such and such." I say, “Let it be, now gone finished. Why are you bothered?" But they'll go on and on and on. It's a habit they have formed to feel guilty about them.

So about anything they start feeling guilty.

In India we are not so much I think formal type of people, thank God.

So I find less cases of this but still there are many people who develop this left side. Not only with that you develop your spondylitis but you develop a situation where heart cannot pump blood for your brain that is angina. Nobody

knows that it comes from this left side problem; left side problem. It comes from other things also but one of them is feeling guilty.

This is something I am telling you which is not yet told in the medical science but I am sure one day we will have it from India. We will tell these people what we know about the roots of trouble. The root of trouble is like that.

So now the last but not the least is the effect of Swādhiṣhṭhān is this heat reaches the brain. And gives you paralysis on left hand side because you know it crosses over nerves.

So it gives you a terrible paralysis on the left hand side but you feel it on the right hand side. Also nature is the one which tries to stop, if you don't stop, it says, “All right, I will stop your right side." Left side will be all right.

Now the one side of life is also right side. Second side, another side we can say is the side which is left side. And the left side and right side when they meet, you get psychosomatic trouble. With this Kuṇḍalinī rising what happens that it nourishes those centers for example see this is one center formed by two left and right side. This is a center; left and right side. Now the Kuṇḍalinī passes through this. But supposing you are using right side too much like this and suddenly left side breaks sometimes then what happens that your connection with the main, you should say mains is lost. You are on your own and cancer starts. Now this cancer can be cured also; I am sorry to say but it is a fact. It can be cured. Cancer can be cured, not at a galloping stage I think but at an early stage. We have also tried some galloping stage people. They have improved but still I would say it is not

guaranteed at that stage. After all nothing is guaranteed but still it works and it has worked. Now when this cancer is caused you see, what is our job is to push back this left side with the right and also through Kuṇḍalinī awakening to nourish, nourish the center.

You see this is the basis for our health, our... you can say mind, everything it's a mental, physical and emotional but also spiritual because when Kuṇḍalinī rises like this; it goes crosses over this Fontanelle bone. This is Kabīra has said, “Shunya shikhar par Anāhat baje re." Nobody can explain what does he say, “Shunya shikhar par Anāhat” is the heart beat. How can a heart beat come up shunya shikhar means on the Fontanelle bone. He was not mad but the people who do not understand cannot think that this Kuṇḍalinī reaches here. It does; you can see for yourself, it does reach here and once it breaks this [Fontanelle bone], sound finishes. Then on your nerves, you are amazed on your central nervous system you start feeling the Cool Breeze of the Holy Ghost as they call it in the Bible or they call it as the Alakh Niranjan or they call it as Brahma Chaitanya. You start feeling it on your fingertips, on your hands, you can.

If you experience that, still you go on saying, “No, no, no. I do not believe in them." It's all right but if you really start moving into that line and start feeling that then you are amazed because when the Kuṇḍalinī rises as I told you She helps you physically. I have told you about only one Chakra but there are seven Chakras.

So all the seven Chakras it gives permutation combination of these three channels. It cures all. As a result you start enjoying your life. You become what you

call a person who is a witness to this whole thing. The whole thing becomes just a drama and you start *[UNCLEAR]* seeing it so clearly.

This is first thing happens to you.

Now if you have something serious or say something you have to operate somewhere then you are nervous already, “How can I do it?" If you are nervous, then how can you operate? And also because of specialisation you can only do one part. I have known people, surgeons also, who have opened the body they said, “No this is not my job. This is the job of that doctor." So you know the complete knowledge of medical science, complete! It's not only surgery, it's not only what you call medicine and others; we have learnt so many.

So all that becomes a totality. In totality you know what is wrong with it on your finger tips. For diagnosis, you know a patient dies after it. If somebody goes to say Houston for diagnosis, you should insure him because may be he might die with diagnosis only.

It's like this, here diagnosis is only on finger tips. On the finger tips you can feel very easily what is the central catch. Now if you learn or if you know what are these centers meant for, if you know what they are related to as far as your physical side is concerned for doctors, then you will know that this person is suffering from this disease. Even small children, say ten children, you tie up their eyes and ask them, “What is this person suffering from?" So immediately supposing they give this [Viśhuddhi]. You ask that fellow, “What about your throat? Is it all right?" “Ah no, it is not all right, but how

do they know!" Because on the finger tip they know, they show the finger.

So everybody will say the same thing because it is Absolute.

This All-pervading Power about which people have talked about, they have called it Brahma Chaitanya.

They have called it all kinds of things but they don't know what it is. It is this power that starts flowing and when it starts flowing through you, tremendous things happen, tremendous things happen. I have known so many bureaucrats you see, were so much worried, upset; because they were honest people and were suffering. They took to Sahaja Yoga. Their lives are changed now, they are enjoying themselves.

They are not bothered. Because this not only guides you, this not only gives you knowledge but also protects you all the time.

I have seen many doctors who are doing say heart trouble. Heart patients they are looking after. There are doctors who are curing cancer patients. I met one doctor who has a dialysis hospital; got his kidneys.

I said, “Doctor, how have you got this?" So he is just treating only people for dialysis and he gets his kidneys.

So there in no protection. You should also have the protection as a surgeon has. He will tie up his hands and every thing. But then otherwise normally doctors have no protection of any kind when they treat another person and if they are sensitive, they may catch from them slowly, slowly the diseases, which they are going to cure. This is also a point nobody thinks of. We are not

machines, we are human beings, we are not stones but we are sensitive and when you see somebody suffering you catch from them. You definitely catch but in Sahaja Yoga you know you are catching. In Sahaja Yoga you know what you are catching and you know how to clear it out and how to protect yourself.

Now this is what one doesn't understand that all human beings can get their Self-realisation, all of them. Only thing if you are thinking that you are a great scientist and you are above everything and you have read everything. I don't have to know anything then it doesn't work. It cannot force. Sahaja Yoga cannot force on you its knowledge, nothing. It respects you, respects your freedom. Freedom has been given to you whether you take to it or don't take to it, is your own. But if you want it, if you are really desirous of getting it then you get it. But with that you get knowledge not only about medical science but also about people. Now there are so many type of Godman coming now. How will you know they are not correct? How will you know that Guru Nanaka was a great, not only saint but an incarnation? How will you know about Christ? How will you know about any one of them because you don't know the Absolute.

You are born like that but once you are born in Sahaja Yoga, you become a Yogi. And then you know exactly that they are all one. All the Sufis are one, all these great Prophets are one. All these we can call them Prophets and also incarnations, they are altogether one. Christ himself has said, “Those who are not against us are with us." But how many Christians understand this.

So there is no need to have different, different religions. It in one big huge ocean of knowledge which has different, different, we can say ports but that doesn't mean the ocean is different.

All your problems will be solved as far as integration of religions are concerned and you don't have to give up anything but respect everything in the right manner that you know about them. There is nothing to discard, nothing to condemn but to just, to know about them, that you are amazed how they are talking the same thing what you are talking.

I have read a book written by a one great suff from Turkey and another I have read it with our Nizamuddin here who had written something and his disciples just the same, they write the same thing. I mean there is no difference because absolute knowledge is the same only expression may be different. They might use different expression.

So you get out of this madness of religion also. Religion can never teach you to hate anyone, can never, because I am talking here about the power of love. This All-pervading Power is the power of love. It guides you, it looks after you, it cooperates, it coordinates. It is so efficient a government that I don't think we can ever imagine how efficient it is and it works just like this.

Sometimes it is very amazing.

I will tell you now, today a case of a lady which is a true case. Is she here now? Response: *[UNCLEAR]*.

Shri Mataji: Mexican, no? She might be here, see, there is a lady, you are there... she is a lady here.

She was working with the U.N. and when I went to New York, she got her Realisation and she became a very ardent Sahaja Yogi. It rose to that thing where we call Śhraddhā. Then she wrote to Me three letters telling Me about some disease her son has got who is only eighteen years of age studying in Harvard University or something.

She said, “Mother this disease some people get it in my family at old age and they die." It's a special Mexican disease, it's a big name as usual you see. [Laughs.] So I was thinking what to write to her and we just paying attention. And she said, “Should I bring my child there, what should I do?" And all that and the fourth letter I find that the doctors have said that he is completely cured. There is nothing in it, just imagine how quick it was. [Clapping.] I mean, I was amazed. There are so many cases like that but this is something remarkable. Where is Mexico! I was in Pune and just see how this Param-Chaitanya has done it. How it is kind! It is the power of love of God which looks after.

After all the One who has created us, the Creator is going to look after us. Isn't it? But we should have also little attention towards finding out what is the truth. Don't accept anything, you have to find out the truth first of all and everybody has said that it is the same thing. Everybody has said you should know about yourself. Guru Nanaka's thing I will say: `Kahe ray Ban khojan Jai, Sada Niwasi Sada Alepa, Tohey sang samai Pusp maday jo Bas Basat Hai, Mukur Mahey ras chayi Taisai hi Hari basay nirantar, Ghat hi khojo bhai Kahay nanak bin āpa Chinay, Mitay na bhram ki kai.' He said you must know yourself. “Know thyself" Christ has said. Everybody has

said you should know yourself. Now what is that knowing yourself? That is nothing but you are.

The principle is that the truth is this that you are not this body, this mind, you are not this emotions, you are not this ego, you are not this conditionings but you are the pure Spirit. All our saints have said that.

Now we are not on that path. We are not looking out for what are we. If we are the Spirit, then how are we to become the Spirit? Now anybody who starts talking like that, I mean, I was very much opposed by many people because they thought I am just telling lies, I am this thing, that thing, but when they got sick, they came to Me. That's not the way. The way is to try to know that we do not know the absolute. Once you become little humble about it that we don't know the absolute.

So the religion and science become one because you can explain it scientifically as Doctor U.C. Rai has done.

Scientifically, you can explain what happens. Now you don't have to become what you call Karmakandi, ritualistic, no need, there is nothing to be done ritualistically, nothing. Once you are really realised, you have to do little meditation everyday in the evening. Now what I also would I should say this Param-Chaitanya that it gave us a chance to have a hospital in Washi and the results are very good in Washi. They never use to charge anything for the outdoor patients but they said, “Mother, please allow us to take ten Rupees." I said, “All right, take ten Rupees." Is all right for *[UNCLEAR]* but the people who are living inside, they are also paying little amount, nothing compared to what people pay in the hospitals

and Doctor Rai is so sacrificingly accepted and the doctors are coming from Russia all the way, you know.

Russian doctors are wonderful doctors. They are very great scientists, I must say. They have gone very far in scientific approach. They have tried to find out the energies, which are subtle energies and lots of thing they have done but specially, they are very much interested in working through Sahaja Yoga and they are coming down here to work. Now I would not expect our doctors to come and work like that but at least for once a week, they can give some time and they can practice Sahaja Yoga just as a blessing to the people.

Our country is full of very poor people, very, very poor people, extremely poor and we feel very much concerned. People always ask Me, “Yours is such a Yoga Bhūmi then, the, why the people are poor?" The poor they are, because they do not follow the right path, you see if they follow the right path, Lakṣhmī is also there to bless you. There is nothing to worry about money, nothing to worry about anything and you become a person who is absolutely in balance. As soon as something comes up, some crisis comes up, immediately you all become silent and you start seeing what's wrong, what is the problem because you are not silent, always in the conflict. You cannot see the problem clearly and you cannot solve it but, you actually, you don't solve any problem. It is this, I must say this power. I also tell them I don't do anything, I am just sitting down, this power is doing everything. They don't believe it but it is a fact.

I am not doing anything, I am just sitting, I am not planning, I am not doing anything whatsoever but this

power does everything for us so why should I do it. But, it's rather difficult for human beings to leave things to this power.

Even some doctors who have been practicing Medical science have had very funny experiences. Like there's one Doctor Amjad Ali in Australia who is very well qualified and he was experimenting [laughs] on some sort of “kya kar rahe they."

Sahaja Yogi: [is telling something to Shri Mataji].

Shri Mataji: So you see that what he found out, when he went close to them, they start becoming smaller. He could not experiment. He said, “How my experiment will go, I cannot, as soon as I go near them, everything disappears, all the disease disappears, so what can I do?" I said, “You don't experiment with that but you can experiment with the people who are already sick and do something about it." So there are many things like that and another person told Me that in England there is a craze for research.

So one scientist, they told him, “You find out what is minus 273, the absolute zero." So he said, “I cannot because the formula is such that some heat will remain always there." I said, “All right, do one thing, you go and tell them this is absolute and how can we find absolute." We cannot find Absolute. It is absolutely, absolutely beyond us. Then I said, “You use vibrations and you use this Divine vibrations." And he achieved it. He got his doctorate and he did it.

So they asked him, “How did you do it?" He said, “I cannot explain to you. Because if I talk to them they will never listen to me. These scientist, you know, they think

no end of themselves. How can I tell them that I did it with this Divine Power?" They cannot believe that there is another big power. After all who runs our heart? Ask the doctors who runs our heart. They will say Autonomous Nervous System. Now who is this Auto? Ask this question... second one... you can't answer, who is this Auto. Auto you don't know. They will just, but, they are honest because they say we don't know and they have put it the name `Autonomous'. Now I am talking of parasympathetic nervous system. As you know very well and we know very little about parasympathetic.

It's a fact.

How far our people, I will tell you that in very simple words what is parasympathetic. Now when there is some emergency, our sympathetic nervous system which is to the left and right side go into motion.

Like, we have to run, then if you are running, our heart will start pumping blood but what brings it back to normal, is the parasympathetic, in simple words.

[Aside in Hindi:] kuch kuch to doctors bhi hai aur kuch kuch aur bhi hai thoda.

So this parasympathetic nervous system, when it is filled with energy, when it is filled with energy it just settles down. It gets nourished and then it starts working in such a beautiful manner that you achieve so many things which you could not normally achieve. First thing that happens that you become a very peaceful personality, very peaceful, because we are thinking.

Now the thoughts are rising and falling, again thoughts are rising and falling, again thoughts are rising and falling. All the time we are jumping on the cusp of the

thoughts. But there is a space in between and that is in Sanskrit called `Vilamb'. But we can call it pause in English language. Now this is the time where we never see that point. We never are there.

So when we are jumping, we are jumping in the future or in the past. For example, just now, you are sitting before Me, may be you are thinking if they will get a train or not, a bus or not, this and that, or may be you are thinking about your past. But you cannot be in the center. This is the big problem. You cannot be in the present. If I say, be in the present, you cannot.

And in the present is reality. In the present is totality and in the present is silence. You don't think.

So, according to even patanjali, you have to become Nirvichar. These thoughts which are bombarding your head, you have to become in charge of them, I mean, you have to be in control with them.

So what happens you become Nirvichar, without any thoughts. It's a thoughtless awareness. And this thoughtless awareness is the one that gives you complete peace within yourself. People talk of peace, other, I know of people who have got peace awards, big, big, such hot tempered people that you have to approach them with a barge pole. I don't know from what angle they are talking about peace but they have got peace awards, you know, big, big people like that I have known who have got peace awards. Peace has to come within. When human beings become peaceful, there won't be any quarrels, no fights, no wars and no politics. If you are peaceful, then you are so satisfied, you are as in Hindi, they say `apney me hi sama jatey hai'. You are satisfied

with yourself. You don't get into the mad rush of approaching somebody, encroaching somebody, aggressing on someone, no, you are with yourself in complete peace. As a result so many things happen. May be I am the oldest person living here. Nobody can be more [laughs] in age because I am seventy four now. I will be seventy five.

So you can imagine but at peace when you are, you are not having any such ideas of aggression, aggression or anything. You become absolutely peaceful and this peace is very required today for this world to come to something which we call as a peaceful world.

By fighting, by quarreling you can never achieve peace. I have seen people going with the ags, now fight for peace and fight for this, no need. If you become peaceful everything works out so well and, He, this Param-Chaitanya is with you to help. There is no need to fight anybody, to aggress anybody or to trouble anybody. This is very important for doctors and for also business people.

The problem of business people because they told Me there are some business people also is their stress which is a common disease. They are the same, very futuristic, you know, all the time calculating, very, very futuristic and in America, a new disease has developed, they call it yuppies disease.

[Aside:] What is the name? Samaj liya na. In that [laughs]... naya nām nikla hai na par mai usko yuppies disease kahti hu.

... that disease is such a horrible thing it is that your rational mind just goes out, your conscious mind just

goes out, you can't even lift your hand, you can't even lift your fingers and people carry you just like what you can call a reptile on your body. You can think all right, you can talk all right, you can plan all right, calculate all right but you cannot walk, you cannot lift your hand, you cannot do anything. This is a new disease that has come in America and is spreading all over and I have seen one patient also here.

So what I am trying to say that going with this your stress, all kind of things can happen.

Now why this stress is there, that also we should know. First of all, the Kuṇḍalinī has started working in this Kali Yuga in these times. Secondly, if you see these two centers, two Nāḍīs or two channels, we call Iḍā and Piñgalā.

So the Piñgalā Nāḍī creates Ego within us as it is shown here, you see, the yellow one. It creates a balloon like, then the second one is the Iḍā Nāḍī which also creates a balloon. Now Iḍā Nāḍī creates the ego balloon and the left side one creates the superego, means, conditionings. Now if you are identified with something, if you are conditioned within you with something, then these two are. But when you are too much right-sided, these are all, you see the ego moves and covers the left side.

So there is a blockade, complete blockade.

Now whatever problems you have they can not pass out of your body. That makes you weaker and weaker and that's how you have stress. With this Kuṇḍalinī, these two move out and is opened out and you become one with this Divine Power. Now as far as the brain is, for there are some Nero surgeons also, as far as the brain is

concerned we know that we use wee part of our brain, very little part of our brain. But once you get this Kuṇḍalinī get it enlightens so many areas of your head that you just know.

Sometimes people ask Me, “Mother, how do you know?" “I know. I don't know how I know." There is no technique for it. Just I know.

They say, “Mother, how do you know this thing? How do you know?" Somebody wrote Me a letter and I said, “Who has written this letter, I know." And I told them.

They said, “Mother, how do you know?" I said, “I know for definite this is the one who has written." I don't know that person. I have never seen him. I have never seen his hand writing but I said, “I know who has written this letter." Just I know but I wouldn't say that it's something great that I should know because I just know without any work, without any thinking, without any managing just automatically I know everything.

So once you become that, you don't have to worry.

Now, for example, I know also a lady doctor in Delhi, no in Bombay [Mumbai]. She is the one who is a surgeon, she said, “Mother I could know that this man has tumor, very much low in his brains but it will come out." So she said, “Then I was just giving vibrations first. I said, let me try first the vibrations on that." They said, “No, No, there is no tumor on that side." She said, “It is here. I know I can feel it, it is here." They wouldn't, they started arguing with her and then they found out the tumor where she said, exactly there. They said, “How do you know?" She said, “I don't know how do I know." So even the children can tell where is the problem, in your head, in your brain,

what is happening? Now to look after your brain is very important that you don't go into imbalances because if you go into imbalance, your right side will develop or your left side will develop. Actually the right side develops on the left and the left side develops on the right. Now also I don't know how far the medical science has gone up to the understanding as to left and right side are two different complimentary systems.

[Aside:] I don't know if that they accept, do they? But in Sahaja Yoga you will discover that there are two complimentary systems. One is right-sided, one is left-sided. And when the right side is too much then the left side might act or when the left side is too much, then right side may act. You see it's a complimentary two systems and if you go on one system all the time then you become right-sided or left-sided.

Now left-sided are the people who are not futuristic but who are the people who live in the past. Now of course I mean don't want to just now discuss about it very much because it's also more confusing for people because they don't want to believe that there is something like dead souls or they don't want to believe in the viruses being dead vegetables and things like that but it is. On the left hand side we have got all our past since our creation.

So if somebody gets virus you give antibiotics, you do what you like, it won't go. Only Sahaja Yoga can drive it out. Only through Sahaja Yoga you can cure viruses because only Sahaja Yoga can act on the left side. Many mad people, crazy people have been cured through Sahaja Yoga.

Also it gives you a good idea about how you can show people, who is mad and who is not mad? Like I had a program in Pune in the beginning and they arranged it in a hall which was owned by some Brahmins.

So when I went there, they said, “No, no, She is not a Brahmin so we can't give Her the hall." So Sahaja Yogis were mischievous, they said, “All right, we will give it in the newspaper that they are refusing because She is not a Brahmin." “No, no, don't do like that we will have it." So I didn't know what was happening behind the back. When I went there, I was sitting there. Very interesting I saw about twenty-five people sitting in front of Me shaking like this you see.

“Mother, stop it, stop it, we know Your power, stop it." I said, “I am not doing any thing you are..." They said, “Now, also there are people who are shaking like this." So I said, “Ask them, who they are?" They said, “We are certified mad from Thane. We have come here with our superintendent because You had cured one mad man." So they said, “Are we also mad?" “Yes, there is something wrong." So the thing was they were thinking the Brahmins are the highest or something like that. Is all nonsensical ideas because Brahmin is that which knows the Brahma which knows All-pervading Power and because of these funny ideas they have tortured all the saints. Specially in Maharashtra people have tortured all the saints all the time.

So where you have so many saints and so many people then you must know that it was just to work out the brains of these close minded people. But to open them out is only possible I think when they are in difficulties.

When they are not in difficulties they don't want to accept. Supposing they are sick then they will come to Me. Now if you cure somebody sick, you see once he is cured, he is finished. He doesn't do any Sahaja Yoga, he doesn't want to help anyone.

But if there is a person who is healthy, who is perfectly all right and who is knowledgeable, if he comes to Sahaja Yoga he will be such a help to this, I should say to this poor country. This country is suffering from tremendous poverty. Now only saying “Garibi Hatao, Garibi Hatao, Garibi Hatao." I know of one gentleman who was a great corrupt fellow and who used to live in one small room with a little cot. I said, “Why do you live like this?" He said, “Because, everybody is Garib so I want to live like Garib." I said, “Why don't you give all this money to these Garibs? Why are you lying like this?" He said, “All right, you suggest to Me any organization which is absolutely above board and I will move." That was a difficult thing, a decision but what I am trying to say only by saying people are Garib, Garib. You have to attend to that and is only possible through Sahaja Yoga. How? Sahaja Yoga is practiced mostly by middle class. Both the sides, are one side are the poor, another side are the rich, rich are very few but more by the middle class. Then it's like a river which expands you see on both the sides. This time I was, I mean, I have been always thinking that I have to do some thing for the poor people, something, always and I have done also on My own but I wanted Sahaja Yogis to contribute, Indian Sahaja Yogis.

So I told them I want to start a place where we could have these women who are standing on the roads with

their children asking for alms. We can have something to help them. Immediately, I was surprised Sahaja Yogis contributed to Me for that and I was so amazed at their enthusiasm. I said this is the generosity. This generosity that has come to Sahaja Yogis and then when they said, “Mother this is we have got all this through Sahaja Yoga." We have improved so much that we don't have to worry. And they so generously I mean a person becomes extremely generous. He becomes very peaceful, he becomes generous and he starts enjoying the generosity. I mean people earn such a lot of money. Everything they should do there is no harm.

In Sahaja Yoga, there is nothing like Sannyāsa. Nobody has to take Sannyās. Nobody has to go out of his family, out of his... nothing. It's all here. Why to go anywhere? So you have to be a very normal person but one thing is important, you must have the pure desire to get your Realisation. If you don't have that pure Realisation then it doesn't work out. Apart from that it might work but you go on dropping down because if you want to make money out of Sahaja Yoga or if you want to say achieve some power out of it. You see, you are so powerful that you don't have to ask for power or anything. You don't know how it works and how it gives.

First of all, only we have to believe that we are reflections of God Almighty. We are not just human beings. Specially, to be born in India you must have done lots of Puṇyas, otherwise you can not be born in this great country I can tell you. All this you see is all nonsense that is going on, is just skirmishes on the periphery but if you see the culture, the love, affection

we have, the understanding of value system we have, you can't imagine. When you go abroad, you are amazed, you don't know how to tell them, they are so stupid, I tell you very stupid people, nothing to learn from them. I have been fighting with the stupidity of people specially, Americans, I sometimes, I think that they are not yet grown up as human beings. The way they talk, the way they understand. They only like people who will come and tell them stories and make fool out of them, make lot of money. To Me they said, “We can not take to Sahaja Yoga." I said, “Why?" “Because you don't take money, what is your validity? If you don't take money then you have no validity, why should we believe in you because..." I said, “Supposing I take money, then?" “Then we can prosecute you." I said, “Go and prosecute all these people who have looted you." Nobody could prosecute them.

So this is we should not look to them for understanding of life. They have not yet understood. We have to look to ourselves. We have such a heritage, you can imagine thousands of years back, we have been talking of Brahma we have been talking of absolute truth. In what country they have this kind of [knowledge]. No country.

So first of all we should be very proud to be an Indian. That's very important.

Even Sahaja Yogis from abroad they dress up like Indians and they have taken to our culture, our style of culture. I need not tell you about the Western Culture as I was really shocked. Then I thought I better write down something about them as a witness whatever I saw.

So there is nothing to learn from them, nothing to learn but one day will come, they have to come here. All the doctors have to come here. I am very thankful, very, very thankful to this Indian Medical Association especially. I never expected and I am very grateful to them for this because I know in this country if the doctors take it up, all over the world they will have to understand [everyone claps]. The value of our knowledge of life and of Medical Science. I would say that I have seen so many people sitting here I don't know how many are doctors, how many are from industries and how many are Sahaja Yogis.

Whatever it is, one has to know that all of us are blessed by the same reflection of God Almighty within ourselves which we should [experience]. After that you will tell Me what has happened to you, what you have felt and what you had. It's a thing, is a matter of your right to have it. It's your right to have that power but you have to ask for it. If you don't ask for it I can not force it on you. Nobody can force it on you.

It is a very spontaneous happening and it works out, so fast, so fast, I must tell you in Russia, this hall of course has fallen short but in Russia you always have it in big-big huge places with sixteen thousand, eighteen thousand and they are so much. I don't know endowed with Śhraddhā so much that in the program only they get it. Only in the program, I could not understand and they had a meeting of the scientists there, about two hundred and fifty scientists came.

So, I started telling them about science to begin with.

I said better be on their level at least to talk to them.

So one of them got up and said, “Mother, don't tell us about this science, we know everything. Now, you tell us the science of God, science of Divine. You tell us about this." I was amazed, “Look at these Russians." So I found out all these countries like Bulgaria, Russia, Romania and all these five countries. There the people are like clean slates, they have no conditioning, they don't know anything about God, they don't know anything about books, nothing. Absolutely, they are not conditioned and the way they have achieved this Sahaja Yoga I have been really amazed at this. Romania I was amazed and I just told them one paper I read, not read I never read I told them about one thing and the medical, same thing like this, was there and they gave Me a Doctorate, not honourary but real Doctorate on that knowledge. Can you imagine? I mean it's not possible. First, I didn't know, I have never known these things, so one of My disciple, “Mother, you have became a Doctor!" I said, “That I think I have already." “No, no this is a real Doctorate, real." I said, “Really, how they have done?" Such sensitive people but this sensitivity comes perhaps may be that they were very much oppressed and troubled and also they had no conditioning of anything. And it's very surprising they have no sense of possessiveness. There Government said, “You take your own ats and look after." So, they said, “No, no, no we don't want. You look after." They said, “All right whatever cars you have given, you take them." “No, no, no, no. What a headache. You better look after. What is the use of taking them? Because after all when we die it will be left here." So such unconditioned minds and such clean slates I tell you.

In the same way we are also very much, Indians are very much capable, very much more capable than they are. Once they get it, they get it and they can go very deep into it because our life is very deep.

Our, culture is very deep. We have had thanks to all Saints and all the Sufis and all the incarnations that basically our genes are very good.

But with Sahaja Yoga you can even change the genes, we have shown you. You can change the genes also in Sahaja Yoga and we should not accept anybody because he says, “His genes are bad, so he should be allowed to be what he is." It's not that. Everything changeable and to say that genes are just the cause of your own style, it's not so. Because one child will have different genes, another child will have another genes.

So how can that be? So it's not from the parents, it's not from anything, circumstances but it is with your own reactions to things that you develop genes.

So what happens with genes is that you become a very, very religious man, very religious in the real sense of the word. Not religion because you pray too much nothing but inside, inside you are so religious and religion is what is love, love for humanity is religion and that become so innate and so in born and you enjoy. It's a loving thing. You enjoy giving your love to others. Even those who hate you, you love to give them love because you think hatred after all is due to ignorance, is not because he hates you really but ignorance. And you start seeing the whole thing in a very different vision.

So I have a great vision of our country achieving that en masse emancipation, awakening and so let the whole

world come here. Once, they came just to give us slavery. Now, let them come here to learn what is Divine. And you all can do it very well. You don't have to read many books, nothing of the kind. We don't give also books to people because if you give them books they will just become masters of the books and will not achieve anything they should go deep down. First of all they should be themselves completely one with the Divine.

Otherwise they are not entitled. They have no powers. When you are not empowered, how will you do the job? But for that you don't have to spend too much time, five minutes in the morning, ten minutes in the evening, if you can meditate nothing like it and you will be surprised that all your thought process will slow down so much so that you can see clearly what is the right, what is the wrong. What's going wrong with you also because you get Self-knowledge and also with others because you develop a new dimension which we call as collective consciousness, Samuhik Chetna, collective consciousness. Sitting down here you can feel vibrations of Mister Clinton or you can feel the vibrations of any person anywhere sitting down here.

Now if you know how to correct these vibrations, your own vibrations, you can correct the vibrations of others. You can correct the vibrations sitting down here of other people who are far away. But of course you can also correct the vibrations of people who are with you in your family. There are people who are mad, you can correct them.

So we can have very good families and we could have very good marriages.

It has many dimensions, Sahaja Yoga but today is the day I want to really thank you all the medical science people and the industrialists that they should now take to Sahaja Yoga and make the best of their lives. Lives which are brought in this great country of Yoga where you can easily achieve in this country.

It is so full of vibrations, so full of vibrations you won't believe. I was coming from London with My husband and I told him, “We have touched India." He said, “How do you know?" I said, “See the vibrations all around. It's only in India you feel these vibrations." So he went to the pilot just to find out. He said, “Sir, only a minute back we touched India." So this is such a great country you have. [A very big applause.] And if we could just develop that feeling that we are Indians and it is our responsibility to see that our knowledge goes all over and let people take advantage of it. By that we don't criticise any one, by that we don't condemn anybody I have told you but we give them the basis of all the knowledge and that is in Sahaja Yoga you can do it very well.

I would say that instead of reading the book better get your Realisation because Kabīra himself has said it, “Padhi Padhi pundit murakh bhayo, pundit bhayo na koye, dedha hi akshar prem ka, seekhe to pundit hoye." Thank you very much.

[Doctor U.C. Rai is asked to make a presentation on Sahaja Yoga.]

Contents: 1997-04-06 **Talk to Unity International Foundation, Hotel Claridges, New Delhi, India**

[Unity Award was conferred upon Shri Mataji. Governor B. Satyanarayan Reddy is normally reserved only for the head of states but an exception is made as Shri Mataji worked much more than any head of state or United Nation for World Peace.] [SYNOPSIS!] [As far as efforts are concerned, people have done lots of research, lots of conferences and also they have tried to convince people that without unity we cannot exist. The reason is that, this world is one, we are all part and parcel of this world. But we are not connected as we are in this body that even if you get a pin prick the whole body knows about it. Because, we are not awakened, our awareness is not such that you can feel this collective awareness within yourselves. This collective awareness has been talked long time back, but not clearly. In the collective awareness what happens is that the Kuṇḍalinī, which is your own power, rises and as a result of that you become part and parcel of the whole and become aware of others and this we call as collective consciousness. To understand properly we must have the experience of becoming one with the All-pervading Power of Divine Love. We have heard about it in the Bible, in the Quran. In all our Indian scriptures, it is described that there is a very subtle power which does all the work for us. Now few people believe that it exists and when I tell them they think it is something beyond our intellect, but you have to go beyond your mind. This mind of ours which we consider to be very precious is just made by us through our ego and our conditioning. Mind is a myth because it is created by us and we play into the hands of our mind like we use our computers! Computer has been made by

us but it is ruling us. In the same way, this mind controls us and we also take guidance from this mind which is a myth. If I say that, you should not be shocked, because you are very much identified with this mind, but I must tell you if this mind goes off the track, it can make anyone mad. It can get identified with any person or stupid thing as something very useful.

So it can lead human beings to wars, all kinds of things that will remove unity from our hearts. For example I was talking to someone who wanted to have a separate state.

I said, “Why do you want to have a separate state?" He said, “then we can have two Prime Ministers." I said, “why", because he wanted to become the prime Minister.] [Our country has been divided into three more countries, like Burma was a part of our country, Sri Lanka, Pakistan, also Bangladesh. Now if you go to these countries you will be surprised that they are in a mess.

The people who fought, who wanted their freedom and separation, most of them were murdered, Sheikh Mujeeb-ur-Rehman, Bhandaranaike, Bhutto. These are the people who wanted to have the position, so they started saying we must have a separate state, separate identity. For whom it worked? But still they don't see the point, by getting separated from the main line, how much they have suffered!] [I have seen in Russia, now Bela Rousse is trying to come back in Russia and I asked the Ukraine people why have you separated from Russia? So to have this idea that we should separate from one country to another country, I have not seen any country achieving any better. When you get your Self-realisation, then what happens that you develop within yourself a new

dimension by which you feel the collective consciousness. You can feel on your finger tips, what is wrong with you and what is wrong with others.

So, once that happens the unity comes so fast, I am Myself amazed how things are happening in Sahaja Yoga.] [I went to Russia? I was shy of talking, but when I went for My first lecture I was amazed. There were 2,000 people sitting outside and 2,000 people sitting inside the hall. I could not understand, how could these Russians take to Me so easily. But they said what about us, we can't come inside this hall because it is full. I said it doesn't matter I will come back. Then I talked to them and all of them got realisation.

I came out they were still sitting there. They said what about us, I said alright, come tomorrow I will be there in the morning. In Russia we have lots of big beautiful gardens so I said you better come, I will sit on the stairs. You will be amazed, about 6,000 people came. Those who were inside, those who were outside, many others, I said how have you taken to Me? What have I done for you? What makes you think that I can give you something special? They said it's so obvious. I was surprised at their sincerity and I found Russians, also other Eastern Bloc people are extremely sensitive. One of the reasons for their sensitivity is perhaps because they feel that they were oppressed or whatever it is, but the thing is, they have lost their sense of conditioning. They are not possessive. They were told by the government that you can take your ats and live there happily. They said no, no we don't want ats. They have no sense of possession at all. Their's is a clean slate. Another thing,

they do not have any conditioning because they were not told about any religion, they were not told about God, about all these things which are creating problems in our country. I was so surprised that these people took to Sahaja Yoga so easily, in the next program that I had, there were 10,000 people. It was amazing. I don't know Russian language. They were so sweet and so nice and there we had a program of 250 scientists. I must say Russia has developed science in such a subtle manner, they have very great scientists and they all were there and I started telling them about science. If I start on something else, I thought it won't be so good, so let us start on science. One of them got up and said, Mother we have had enough of science, can you please tell of the science of the Divine. One thing I have noticed about them is that they are really very introspective. I asked them, are they worried about the coup that is happening in Moscow? They replied why should we worry, we are in the Kingdom of God.] [Intellectual people have their brains very much with their thoughts and their ideas.

Somebody meets one type of a person, he becomes very right-sided. Another meets another type he becomes identified. You go and listen to somebody's lecture, that lecture goes into your head, so all the time your brain is covered, all the time by these outside items which are not yours. Unless and until they are your experiences, they are not clear. To get that experience is very easy. Of course our country is a country of great Yoga, I must say. Even in China when I went there they came and asked Me, “Mother is this the treasure of our rich Chinese?" Treasure of spirituality is India. They have read about it,

they know about it, they are just waiting to get something out of us but here I find not that much. Here we have no time to pay attention to ourselves, to know yourself which is told by every one. Christ has said, Mohammed Sahib has said, unless and until you know yourself, you cannot know God. You should know yourself, there should be Self-knowledge and this knowledge takes you beyond your mind and beyond science.] [Science as you know has its own limitations, first of all it is amoral. There is no morality and so with science you cannot go any further, you can kill people, you can destroy countries and you don't feel anything because it is immoral. Now morality doesn't mean outside restriction but it means compassion, love, pure love, you understand what is to be done. But if you artificially practice something like a moral, such people can become extremely dry and also hot tempered. It should come from within that you should know that you are nothing but a pure spirit. You are not this mind, you are not this ego, this emotion but beyond that you are the pure spirit. Even knowing is not enough, you should become.

Becoming is the point. If you become that then you will be amazed how great you are. Not only that you become collectively conscious but also you become a fountain of love and compassion. Unless and until that happens, you cannot bring unity e.g. now I have been working in Sahaja Yoga which I would not call government level, or in any way official level. I never tried to disturb My husband's office or anything, but I just started on My own. First of all with several hippies, gradually it grew

into such a sweet thing that we could get into Russia, into Eastern Bloc, all the European countries, we went to America and to South America. Because, just people felt that. See because if one person gains that from South America, he says what about South America? When are you coming to South America? We need you very much there. When I went there I found there were so many seekers, they were not interested in power, money, nothing, just seeking.] [Now, I must tell you a sweet story, twice they have shown their sweetness. First when I went to Russia, there twenty-five Germans came to Moscow. I said how are you here, they were Sahaja Yogis. They said, Mother, don't you think that we Germans have killed so many Russians, don't you think that its our duty that we should come and give them what we have got? Such love and such compassion! These Germans are so soft and so gentle that you won't believe that they have anything of Hitler in them.] [Then they went, Austrians, they are also Germans, they went to Israel. I said why did you go to Israel, there was no arrangement or anything, just they went and stayed there. They said Mother, the thing is that we felt very responsible for these Israelis, Jews, because so many have been killed in our country and we cannot forgive ourselves and so we have to do something about it. Imagine Germans knowing Israelis and talking to them and caught hold of some young people say about thirty or so. But I was amazed that I asked the Israelis, I said how are you here? They said why not, we want to make friends with Muslims, so we have to be here. I said very good idea. Automatically, they are working out this unity. I don't tell them, they just

do it on their own understanding. What is needed is an inner understanding, inner unity not outside. This is what is that we human beings are capable of doing tremendous thing if we fall into the ocean of compassion and we do it in such a sweet manner that you can't believe that they are human beings, that they have gone absolutely beyond the limitations of human life.] [The other day I read a news about a gentleman who was saying that I am going to start a Jihad. For what? To get rid of all the immorality they have in the West and all sorts of things, the drinking and all other things.

So one Sahaja Yogi telephoned to Me that Mother what is the need to do Jihad for all that, just do Sahaja Yoga, you will get rid of all these things. We all were drunkards, we all were doing all sorts of nonsensical things, we were doing immoral things, you don't have to do Jihad for that, you just get it yourself.

So much clean and so much above all that all things, in Sanskrit we call it `Upadhi', they just fall of, it happens. I assure you it can happen to you also, it's nothing special, because this Kuṇḍalinī when it rises, it does work out. She is your own Mother, she knows everything about you and the way she gives you your second birth is very good, you all are capable of getting it, especially Indians. We have so many `Sufis', like lotuses they have come out and the rest is still the same. Now, we have to understand that we Indians are born in this great country of Yoga because of our previous life. The problem is that we are not taking advantage of the Yoga Bhumi, which is in your power and can give you all the blessings of the Divine. We have tried and we have noted down.] [The

Meta science part is there. There are so many things I can tell you that you have the souls, so many things that have not been explained so far, through Sahaja Yoga, for example, the first Chakra which we call Mūlādhāra, this Chakra is made of carbon atoms. Now if you take a look at carbon atoms what you will see, you will be amazed that when you see from left to right it looks just like Omkāra, the same thing looks like Omkāra but if you see from down upwards, you will see alpha and omega. Christ has said, I am the alpha, I am the omega and he is the incarnation of Śhrī Gaṇeśha. It can be proved.

Another thing is that, once you get your Self-realisation you start feeling Cool Breeze coming out of your hands and you can feel the All-pervading Power all around you. Now with this thing you can say that what centers you are catching because there are seven centers on the right hand, seven centers on the left hand. You can easily feel on your finger tips the different centers. Even a small boy or anybody can feel that. Anybody can tell you what's wrong with you or you can even tell them what's wrong with them. If you take about ten children, tie up their eyes, they are realised Souls and you put somebody before them ask the boys, what is he catching, they all raise one finger, all of them the same, because it is absolute knowledge. Suppose they raise the index finger, something wrong with the throat, he will say how do you know, I have not spoken, how do you know? I said it is communicated by this knowledge, through this power that this is wrong with this man.] [We are in this country, also suffering from lots of false Gurus, some of them, really have come out making big money and especially

they take to the rich. They go in any city and find out, who has big position and they approach them. These people actually you can find them out on your fingertips. Because if anybody is like that, you just start feeling. It is written in the Quran that your fingers will speak, that your hands will speak at the time of `Qayamat' at the time of resurrection, they will speak and tell you about yourself and others. Supposing you know how to control and also how to correct your centers, you can correct the centers of others. Because all these seven centers are responsible for your physical, mental and emotional being and above all your spiritual being.

So you can; and that's the personality where we have a complete human being, not only within himself but there will be no conflict, he will be absolutely peaceful and outside also he will be very genuine and very loving and he will win over. We had a Sahaja Yogi, I think in London and then he went to Italy. In Italy he told Me, “Mother, I am feeling very frustrated, I am feeling very lonely, there are no Sahaja Yogis." I said, “Alright” then we had a program and so many became Sahaja Yogis and then we are amazed that how in Rome, how many thousands are there who are Sahaja Yogis. Like this Sahaja Yoga started spreading, not by Me so much but by people who went from here to see. Like one seed that is transferred from here to there, like that many seeds are transferred, they sprout and Sahaja Yoga tree prospers. Among these Sahaja Yogis there is so much love, it's very surprising, extremely surprising.] [Now in Africa also there are 400 very strong Sahaja Yogis, I have never been to Africa so far. It is amazing that there are 400 Sahaja Yogis in one

city of Africa. Now what they are doing? Just collecting more, more and more of Sahaja Yogis and that's how they are working.] [This is what it is that, if you are wanting to have peace of mind, this is what you call a Mother's temptation, `Pralobhan' as they call it. The Mother says alright take your medicine, then I will give you a chocolate. In the same way you can say, if you really want to have peace of mind, if you really want to have unity, it will work out. It is a very great `Vidyā' as I told you in the very beginning and if you have this `Vidyā', Sahaja Yoga will work very fast because that's the only way in which you can get natural, spontaneous, inborn love between people. We have programs every year, every month. We have a program in a very far fetched place called Ganapatipule. There people come from all over the world, some are rich, some are poor. We don't have much arrangements there, you see, for these people because we don't have much money. Whatever it is but they come there, they are put wherever there is a place, they enjoy themselves. I said don't you think it is uncomfortable, they said “Mother we are just seeking the comfort of the spirit because spirits are so comfortable." They don't bother Me, it's not good or that is not good, nothing. Just they enjoy that, you should see the way all the nationalities enjoy themselves.

Such a peaceful understanding, such a beautiful flow of enjoyment. Of course, they pull each others legs sometimes, that's alright, but all the time they are full of joy and happiness. All these petty things like rivalry, competition, all this drops off. They have no liking for all this because they have already become saints and this is

said by so many that these are men of God and they become the inheritors of the Divine Love. They are not only capable but it is their birth right. We have so many of them now, surprising, I never knew there could be so many Sahaja Yogis, I could never understand because only one or two here and there used to be like Sufis, they suffered so much and then running to one unit in turkey, one in Tunisia and one everywhere. I went to Tunisia, I was amazed how people got their realisation and all these petty problems have finished, of course it cures you. That's nothing great, it cures you and gives you complete mental peace, completely, you are at peace with yourself and with others because you develop a witness state by which you just watch, you don't react just watch and this helps you to understand yourself better.

You just change completely the panorama of your being and people who come close to you are amazed.

What has happened to this gentleman, such a fighting fellow? How has he become so tolerant, how has he become so quiet and how has he become so much interested in others? The personality, the human personality as described in our Shāstras is like an egg. A bird is born twice and also a person who knows the Brahma is born twice. Now once you become one with the Divine, you are born again in the true sense of the word, it is not like you put a signboard `I am born again.' But if you are born again you have a power and the greatest power is that you love and you enjoy your love. This power works.] [Now we have a lady here from Mexico, I will tell her story. She met Me because she was

working with the U.N. in New York and she got her realisation, she went very deep in Sahaja Yoga. Then she retired and went to Mexico and her son was studying, very, very young. She wrote to Me “Mother there is some disease which only very few people in my family get when they are sick, at a very old age. They get a sickness and then they get this disease but they are very old, they just die when they get this. But unfortunately my son has got it, he is a young boy and I don't know what to do." So I started wondering what I should do, I was just putting My attention on it.

So first letter came it was like this, second came, in the third one she was saying should I come, bring the child to you and all that and the fourth letter came saying that, “Mother I am amazed, my son is completely cured." It's not a miracle, it looks like that but so many patients have been cured.

So many have changed their lives through Sahaja Yoga.

So curing is just a `Pralobhan' as you call or a temptation for you to understand more than it. This is not the end of it. I met so many wrestlers who said, “Mother, give me peace because I am on the verge of collapsing." So I can't understand someone who has the best health, best muscles and everything should think that it's better that I should get peace.

So to get peace to get collective consciousness and to become one with the Divine Power, it is the greatest opportunity to all of you and to all the world, enjoy the inner unity that exists.] [Now this is the point, that's very important, I cannot force you. It is your freedom. You have to use your freedom. I have seen some people who

have got their realisation, they go very deep into it but some take, they say just alright, it's like the parable of the Christ that some seeds got sprouted and fell on the marsh, but the depth, people just jump into it. I am Myself surprised how people all over the world have worked it out and how such love and unity of a real nation of absolute understanding and joy giving unity exists!]

Contents: 1997-04-07 **Article from Hindustan Times, New Delhi, India**

“If a person wants to have peace in mind and unity of mankind, practicing Sahaja Yoga is the only way out” said Dr. Nirmalā Devi, founder of science of Sahaja Yoga and the personality who had spread across its message in various countries of the world. She was speaking at a function organized by Unity International Foundation in the capital [New Delhi] on Sunday. Former Governor G.C. Saxena and Mr. B. Satya Narain Reddy graced the occasion. Dr. Nirmalā Devi said that the concept of collective consciousness in the people is very important for world peace and this can happen only when Self-realisation occurs. She also informed about the medical benefits of Sahaja Yoga and its popularity in various countries of the world.

“Sahaja Yogis all over the world are very much aware about each others' problems and they are capable of doing wonderful things” she said.

Mr. R.N. Anil, Secretary General of the Unity International Foundation, New Delhi also announced the conferring of the Unity Award for International Understanding to her

later this year. Dr. Umesh Rai, Director, International Sahaja Yoga Research and Health Center, New Bombay spoke on the medical benefits of Sahaja Yoga, particularly in diseases where modern medicine has no cure. He said that a number of psychosomatic diseases have no cure in modern medicine and a patient has to be put on medicines all the life.

“Sahaja Yoga is very useful in the management of hypertension, epilepsy, insomnia, diabetes, migraine, bronchial asthma along with a host of other related diseases” he said. Dr. Rai said that extensive research and practical experience has shown that psychosomatic diseases are managed much more effectively by the practice of Sahaja Yoga. Commenting on the epilepsy patients, he said that forty per cent of the patients are not cured by traditional medicines. On the other hand, 80 per cent of the patients are cured by the practice of Sahaja Yoga. He dwelt in length on its benefits in patients having hypertension and also heart disease.

Sahaja Yoga was discovered by Dr. Nirmalā Devi in 1970 and is gradually becoming popular in a number of countries all over the world. For the treatment of patients, an institution has been made operational in Mumbai where treatment is done by cosmic vibrations. Her program of Self-realisation is now practiced in 65 countries all over the world.

(Gudi Padwa Day) from Sahaj News, Issue 104 (***1998-06-27***), p.1 To Sahaja Yogis, all My blessings, I felt surprised

and became joyous to hear that you are doing such deep work even in jail. I never dreamed that Sahaja Yoga work will reach to jails. It is a pride for a mother that such work was carried out by you in a very Sahaj manner.

This is a work of love.

So there will be love flowing amongst each other, not only that, but love for others will also be felt and it will be taken care of that nobody will be harmed from us.

You all are in My Attention and I am asking you to send your photos to Me.

Always your mother, Mātājī Nirmalā Devī.

[Local newspaper published an article `YOGA WILL TRANSFORM PRISONERS' LIFE IN JAIL!']

[Shri Mataji takes the flowers from the little children.] [To the big children:] I can't take the flowers from each of you, but do not worry. I know you all very well!

Contents: 1997-05-03 **Talk to Sahaja Yogis, after Evening Program, the day before Sahasrāra Pūjā, Cabella Ligure, Italy**

Today's program was really very, very joyful, very masterly. I must say credit goes to Germans as well as to the Austrians for doing everything so perfect. The first half we were amazed how people from the west can play so well on Indian instruments with Indian ragas. It's an impossible task. I mean, in India, they spend at least ten to twelve years to reach that stage and in three months' time they all have achieved so much.

And Baba Mama was saying that it is due to their realisation perhaps, that they pick up all these things in three months' time. I was surprised Myself in three months' time how he could play so well.

Then other programs also were very interesting, for example the way they showed about this music being conducted so well.

I mean, you have to pay fifty dollars to see this program! And has to be pin-drop silence and must sit in your place sort of fixed, permanently as if...

And this was so remarkable and so professional, so, so beautifully done, without one mistake anywhere, in such unison, also is that the blessing of Sahaja Yoga, I don't know.

No conflict, nothing; but sometimes you find, say you go to some big orchestra program or some sort of what they call it, where you find people are jealous, they are feeling angry, we can see from their faces they are not enjoying each other.

But I found that they were not only enjoying, but they were encouraging each other and were treating them in the collective consciousness. Which is a very good sign for an orchestra like this from eight countries, could have been impossible.

Impossible to have such unison, such understanding and such beautiful rendering of these difficult people, like Vivaldi I think is quite an intricate fellow and I loved him very much when I heard him first.

And though he was an Italian he was quite, I must say, he was musical, in every way, very honest and very musical.

This is what is of every country, wherever there is music, I find there is a Divine play through them and they forget their nationality, they forget their problems of their own community and creed.

Same with the Germans and Austrians: Austrians are known of course for having very good orchestra and music and all.

But this orchestra was really Divine.

Because you could see on their faces such joy while playing, enjoyment, even the conductors were so sweetly conducting.

It's a very different atmosphere and different styles where everybody enjoying, you see, playing so well.

I could enjoy all that much more than any other places I've been to. Very beautifully done and it really shows how Sahaja Yoga can be so creative. And also can be so much collective, giving so much joy to themselves and to us also.

Sometimes You felt You are sitting in a very big hall or somewhere with a big music is going on and suddenly You find “These are My children playing so well." I'm so proud of all of them, very much proud of all of them. And then the, even the rap was quite nicely done I must say, you had to show that part, also the other side of it. And the films were another very, very well done films, very much carrying the message of Sahaja Yoga.

On the whole, if you see, every, every, every piece of work was so beautifully organized and arranged that I don't know how you people have developed all these capacities, to rush, run the stage and to manage the

drama and the films and things like that. Even the drama was so good, the play was so beautifully performed. If you, I don't know if you have been anywhere near a company which does drama: they are so nervous, shouting, screaming all the time, you know? And getting so very upset that you don't know how they are going to perform. And then sometimes, you know, they just make such horrible mistakes while rendering their speeches and all. In England there are very good, I must say, drama houses and 357... But nowadays they make such horrible ones that you can't see anyone of them. It's horrible, I don't know what cheap things they are producing, taking such a lot of money. And in that cold, you see, there's always very cold in those halls, I don't know why. You just can't bear to see those horrible plays.

One day you people, those who have performed here, I am sure will be going to the masses and you will be going to these big halls and playing such beautiful orchestra and showing such beautiful plays and dramas. Also the film was made with very great understanding of the subject. I would say that we should put our hands on all kinds of art styles and try to see what we can produce, because there is so much talent in Sahaja Yoga.

This is only in five countries we have got all these talents, but otherwise if you see in every country we have such talents and with Sahaja Yoga, see, they have become real artists and great artists, so we should utilize them and try to make something creative, because nowadays the whole world is nothing but art. Because people want to see good plays, they want to hear good

orchestra and also they like to have something very much, what you can call, musical dramas and all that.

So I would say that we all can work it out very well and find out the talents within us, which is amazingly is hidden there. Because now you are realised Souls, you'll find it's very easy. I've known people who could never get onto the stage to speak even, absolutely so frightened, so I pushed some of them up.

And now they are very great orators. As great orators they have occupied very high positions in life now and they are doing very well.

But this is what it is: you must have courage and you must have faith in yourself, that you have achieved something, you can express yourself very well. That is going to give you a very good exposition I should say, or a rise in the whole atmosphere of art. There you will be recognized, I am sure you all will be recognized, because you have special talent like this artist has: he is a realised Soul, but you are all realised Souls.

So also in painting you can work it out, I was happy so many Sahaja Yogis are learning.

So it's [a] very good idea. And also I am also very much touched that this academy of music, which you have started in the name of My father, because he was very anxious that our Indian music should go all over the world. And this Academy is doing a very good work and is creating such great artists, that unbelievable they are.

Very, very, really talented people. But still, the way they have prospered looks like Sahaja Yoga miracle.

And this Academy was, Baba Mama was telling Me that he can have for three months over here in Daglio, three months during summertime, for the Sahaja Yogis to come and learn, so all of you will become great artists *[UNCLEAR]*.

It's only Italian government should give us visas, you see, they're very difficult. They are the most difficult people I don't know, Italians: who wants to settle in Italy? But they are very troublesome. And if they allow us to start this academy here, with all the rules and regulations and things, whatever it is, then it's a good idea, we can start it.

We have Daglio already here and during summertime people can come and learn. And you learn so fast, in three months you become experts! In tabla like Allah Rakha, sometimes, in sarod... I mean, really you outbeat all these great artists.

So it seems you have entered into a new realm of special energy and dynamism.

May God bless you all.

Contents: 1997-05-04 **Sahasrāra Pūjā, At Sahasrāra You Stand on Truth and Go Beyond Dharma, Cabella Ligure, Italy**

Today we all have assembled here to worship the Sahasrāra. As you have realised that Sahasrāra is a very important part of the subtle system. Of course this is a great day, in 1970, that this Chakra was opened out. But by that, what you have achieved, we have to see it.

First of all when the Kuṇḍalinī rises she goes to your void, where is your Dharma. And your Dharma gets

established at the Nābhī Chakra, we can say, around the Nābhī Chakra. Your Dharma gets established which is the innate pure universal religion, is established. But then the Kuṇḍalinī rises higher. Despite the establishment of the Dharma we start becoming little bit aloof from other societies, because we find they are adharmis, they have no Dharma. Also I think we are afraid that we might get caught up with their adharmas.

So at that stage we don't want to cross the limits of Sahaja Yoga. We want to keep to Sahaja Yogis, to Sahaja Yoga program and to our personal Sahaja life. Of course it's important, because first this Chakra must be fully nourished. And this Chakra is actually moves round the Nābhī Chakra, which we know as Swādhiṣhṭhāna.

This Swādhiṣhṭhān Chakra is, in a way, very important because it supplies energy to the brain.

So when Dharma is established the subtle energy pushes through the Kuṇḍalinī more energy for the Sahasrāra. And also the energy for Dharma which was in the Swādhiṣhṭhāna, also starts flowing with it. It crosses over and starts rising in the Sahasrāra.

Till then we are, I would say, we are not yet full Sahaja Yogis. Because one can become fanatic about Sahaja Yoga.

I have seen people who are so fanatic that they cannot even meet people who are not Sahaja Yogis.

They cannot even talk to people who are not Sahaja Yogis and all the time they are frightened of meeting people who are not Sahaja Yogis. Of course, you need not meet people who are evil, people who are against Sahaja

Yoga, who talk against it. But those who are seeking the truth, it is our duty that we have to go to them.

So when it reaches the state where it is established in the brain. That time we go beyond Dharma.

Dharmatīt. We become beyond Dharma. Means that Dharma becomes part and parcel of our being. We cannot lose it.

Sahaja Dharma becomes, within us, a part and parcel. Which is a very great achievement because then you don't have to do any rituals. You don't have to worry about meeting other people. You don't have to worry that your vibrations will be harmed. Then you don't catch from anyone. You don't catch also other negative forces. No one can harm you. That I call as the completion of your Śhraddhā.

That time Sahasrāra is so fully enlightened that you become Dharma. For example we can give the example of Christ. Christ saw a prostitute being stoned. Now Christ had nothing to do with a prostitute, I mean just the opposite of it. But when he saw she was stoned, he took a stone in his hand and he says that those who think, who have not sinned at all, can throw a stone at Me and everybody was stunned.

Why is he taking the side of a prostitute? He is a religious man. He should also put stones on her. But He was standing on truth. That's exactly what happens to you when it is established in Sahasrāra that you stand on truth.

There's a little difference in the, I would say, in Dharma and in truth. A Dharma person might become too Dharmic, illogically Dharmic. Can go to the right or to the

left. A Dharmic person might think he is the superior person to others. That, why should he try to save anybody else, let them go to hell. Who cares? This kind of an attitude can come in a person who is Dharmic. Also I have seen some Sahaja Yogis, who start new methods in Sahaja Yoga. You do like this, so it will be alright, you do like that, it will be alright. Because they are not stagnated at the point of Dharma.

So they start telling people that you do this way, do that way. But when you rise to the point of truth, then you don't do any rituals, you don't need any rituals. You are not bothered, because you are in Dharma and here you are standing on the truth, and truth is much greater than Dharma.

For example a person who is standing on truth. He doesn't care for any absurd ideas about religion.

Even about Sahaj religion. He doesn't care that “After all this is Sahaja, this is not Sahaja." He goes beyond. In the sense he sees a global truth within himself. He sees the truth which is all-pervading. Not only sees, but he knows and he feels and he is in that truth.

So when Dharma flowers into truth, it's a very beautiful happening and that should happen to all of you.

So many things can linger on, if you are only on the Dharma level. I've seen people going into ego.

Making money.

Sometimes they don't even ask Me and go on doing things, which they should not do.

They do wrong things which are not good for Sahaja Yoga. There is no humility about it. And they don't

understand that whether this Dharma is standing on truth or untruth.

So we have to go to the foundation of Dharma, which is Truth. As described before it's a Tree of Life which has got its roots up in the brain and the branches in the body.

So you have to go to the roots of everything and that is the place where you reach when you are absolutely established in Sahasrāra.

In the Sahasrāra are the roots of all these ideas we have, or we can say all these swarūpas we have taken. We have now become Dharmic. What is the root of Dharma? Why should we be Dharmic? What is the need to be Dharmic? There are many people in this world who are extremely adharmic, living very well. According to, I mean, outward expression we feel that they are very happy people, they are all right, they are enjoying themselves, while we are deprived perhaps of all the so-called enjoyments of these people.

So at the state of only Dharma things become very important to us which are... may not be standing on truth. There are so many things like that, I can point it out to you, that, how Sahaja Yogis falter. Even after achieving Dharma state they falter. I have seen people giving up their drugs, alcoholism. Giving up other kinds of addictions. Even their language improves and their, we can say, behaviour is changed. They become humbler people, no doubt. But still they are conscious that they are standing on Dharma. This consciousness has to disappear! At the state of Sahasrāra this consciousness disappears because Truth is love and love is Truth. That

is the point where the Kuṇḍalinī meets the Heart Chakra. As you know the Pīṭha of heart is here.

So when the Kuṇḍalinī pierces through the Heart Chakra, what starts flowing in the brain, in the Sahasrāra is the Truth, but Truth that is love.

There's a difference between Truth as itself and Truth that is love.

So out of love for that prostitute that Christ stood back her *[UNCLEAR]*. He stood on the roots of Truth, no doubt, but what was flowing through his heart was the love, the Pure Love.

So now when we have pure love for someone, we see the whole thing in a different manner. We see a person in a different manner. And it becomes very sweet.

Otherwise truth can be very bitter, can be very painful, but Truth which is adorned with love is just like a flower without the thorns.

It's very interesting how a person who is pouring with love and is standing on truth. That's the personality you have to become. Now in the expression of love we can take an example to understand it.

Supposing I meet somebody and he is telling all kinds of horrible things about another person.

So I feel tremendous love for him as well as for the person whom he is telling all this things.

So now I take to lie, a complete lie which is the truth also in a way. I tell that person, “See what are you talking? The person about who you are saying all this has been just praising you all the time and here you are talking like this!" Now, this is not the truth, actually. But you take the

help of the lie, the other side of the truth, to bring out a friendship between the two persons.

So this is what is the work of love, that, it tries to bring people closer to each other. To say things by which they become one, united.

So all the divisive methods that we have used so far just disappear and we try to understand what is the method by which we can join people's hearts. As it is you are in Collective Consciousness. But this Collective Consciousness if it is superficial you can achieve great results like as you have done it.

Maybe you can build beautiful ashrams, you can do all this. But when it is filled with love, Collective Consciousness, then the joy is complete of Collective Consciousness.

Now people talk of peace. You can not have peace without this new awareness, we call it Collective Consciousness. But in that also there has to be the main Tattwa, principle, of love.

For example now Sahaja Yogis say from Germany and Austria are going to Israel. It's very fulfilling.

I was happy that they have chosen for this Pūjā people from Israel. And then I found Israelis coming to Egypt. Forgetting all that Muslims have done to them. It's really remarkable how people get attracted towards expression of their love to their fellow men, to other Sahaja Yogis. And once it starts growing, you will be surprised how we can change this world.

Most of the problems, human problems, are due to hatred. And it is very commonly used: “I hate, I hate." It's

absurdity. It's a sin to hate someone. Why do you hate someone? You can hate the sin, you can hate the evil, but you should not hate people just for hating's sake.

This hatred that we have is responsible for all the problems we have had so far. Because one person becomes very powerful. By dividing people he becomes very powerful. And these divisive things have really crushed so many countries.

For example our country was divided by the British. Now they are having the division. This doesn't stop. By dividing us what has happened [is] all the countries who have gone away from India are suffering very much. Those people who tried to divide the country thought that they'll become Prime ministers, this, that, most of them have been murdered by their own people. You can see clearly how hatred manifests itself. It starts from a small point and it manifests all over. Very clearly it can be seen in any country being divided. There is no need to divide any country. That creates more hatred and more trouble. In the same way in Sahaja Yoga. We should not think of having divisions.

Now we have got a beautiful land, as you must have heard about, near to Ganges. Now people are thinking if they can have separate houses, separate compounds. Why? You know how to live collectively, you enjoy collective life, so why do you want to have separate houses? What secrets are we going to have from each other. After all, whatever we do is known on the vibrations, you cannot hide anything, so why have separate houses? Why do you want to have some privacy? Because in Sahaja Yoga there's no privacy.

We know about everyone, what are they up to, what are their problems, what Chakras they are catching.

Isn't it? So there is no secret about anything in Sahaja Yoga. Everyone knows about everyone.

So what's the use of having privacy also, I can't understand. It's like this, you see, still the mind is working like that.

Then they are thinking of inheritance. Alright, I was saying that you can have inheritance, but if your son is not a Sahaja Yogi, what to do. We cannot keep a culprit there, to trouble everyone. It is not the rules and regulations that are going to keep you happy and joined together, but it is the pure, Collective Consciousness and It's love. Because as you know we have no proper organizations, we have no clergy ship we have nothing like that. Leaders also can shift, more times than Ganges river can shift it's course.

So there is nothing like that. It's all on a shifty sand we are standing, all the time and Your Mother is another one who tries all kinds of tricks. The reason is, I want you to stand on rocks. And this rock is emitting love, is emitting that Divine Love. And the joy of that love is really so beautiful.

For example people would like to have their separate bathrooms, especially Indians. Suddenly they have become Britishers and Britishers have become Indians. Indians want to have their separate bathrooms, I don't know why. And this is a very common disease with Indians and it is also spreading to other people, I feel sometimes, that they want to have their separate bathrooms. In a collective life there's no need! You don't

even know, I mean if you ask Me, I wouldn't even know if I have been to bathroom or not. Just go there, come back, finished! I've no time for all that.

In the same way you also should have a concept of a society which is living like a ocean. If ocean rises, they rise, if falls, they fall. Just one unison of love. I am expecting that kind of a society at the foothill of Himālayas. And I'm sure you, all of you, will realise that, Himālaya being the Sahasrāra of the world.

Luckily I wanted it to be done before the Sahasrār Pūjā and it is done. With the blessings of Himālayas I should say. But Himālaya is also like a Sahasrāra where the Kuṇḍalinī has risen, where the vibrations have come out. And in the sky you can see the vibrations. But this Himālaya is ruled by a wrathful God called Shiva! That's the dangerous part of it.

So we have to be very, very careful. If we try to play around, if we try to take to hatred among ourselves, take to divisive methods, take to something that is not Sahaj, this wrathful God is sitting on our head. He is also in Mecca. This is Makkeshwarshiv there. If you try to misbehave, he comes out with his wrathfulness.

Anywhere you are, you have to be very careful that this Shiva is everywhere! Like one of these lingas of Shiva is in Berdi Baidnath, that is in Maharashtra, at Latur. As their people started another kind of Sahaja Yoga. Also they were drinking on the day of the Śhrī Gaṇeśha's insurgent, so the wrath of Shiva linga came and there was such a big, huge earthquake, in [which] many people were lost. But none of the Sahaja Yogis and their center was saved completely. Now we had a big fire also, as you

know last time [in Ganapatipule] and nothing happened to you, you are under protection. You are all the time protected. There was no wrath of Shiva that could work out anything. Fire could not do anything to you because you are under protection. But this protection is Your Mother's love. Is not anything else but the love of Your Mother, which is very powerful and which is protecting you and helping you. In the same way you develop that kind of love for others, for other Sahaja Yogis, for other people, for other things, for this Mother Earth, for all that. Your love can not only protect you, but protect others also.

Your attention as long as it is on yourself will start becoming smaller and smaller. “I should have this, I should have that, I like this, I like that." All these topics will fall. You will never say “I like this” no question! What do I like? It's difficult for Me to decide, if I like anything. “This I like, that I like. I like to be this way." Who are you? Ask yourself the question. Who are you? If you are the Pure Spirit, it is nothing but love. And in love you think of others, the problems of others you try to make others comfortable. You try to look after others and you don't just look after yourself and bother about yourself.

This is what you have to reach. Though you may be Dharmic, you may be in every way Sahaj, but still, unless and until you reach that state in your Sahasrāra I wouldn't say that you are alright.

You have to work it out. For that of course meditation is very important, but the thing that stops it, is your mind. Is your mind that goes on telling you. All the time you watch your mind and how it tries to guide you, how it

tries to tell you, “Now what about me? What about my house? What about my children? What about my country?" Like that you go on “My, my, my, my, my” ultimately you end up into nothing. But when you say, “You, You, You"... Kabīra has said a beautiful thing about it, he says that, when the goat is living, it is saying “Mai, mai, mai" means “I, I, I." But it dies, then they take out the intestines and put it on a dhunki, which they put it for the cleaning of the cotton and [at] that time, what does this dhunki says? “Tuhi, tuhi, tuhi” “You are the one, you are, you are, you are." And that echoes all over. In the same way you have to think from other's point of view. First of all, Tuhi, when you say, you say it to your Guru or to God that “You are the one, I'm no more, I'm dissolved, I'm finished, I am become one with this ocean of love." And then you say to others, “You are, you are", that is Sahaj Culture.

See, so, lots of falsehood will follow. Falsehood that surrenders you and others. Like people try falsehood by saying something: “I love you very much” and on the back they plan something very bad.

They can do anything. Not Sahaja Yogis, they don't do it, I must say that they have reached that state where they don't do it. But still if they don't do it, they are conscious of it. All the time they are conscious, “We don't do this, we don't drink." So what? “We don't fuss about food." I mean all their things they have achieved, they are very proud of it, you see, very proud that, “We are like this, we are that." You see, because you are the Pure Spirit, because you are that, so you have become that. How can you take pride in something what you are? Like

somebody asked Me, “Don't you feel very proud that you are Ādi Shakti?" I said “What?" [Laughter.] I couldn't understand the question. I said, “See now, if I'm Ādi Shakti, what is there to be proud? Because I am that. What is there to be proud? If I was not that, then I would be proud of it, but I was.

So what is there to be proud of?" [Laughter.] Like the sun, you see, it shines, is not proud that “I am the sun!" Or if you are born, say, with your eyes and nose, a face like a human being, you are not proud, “I am a human being! I am a human being!", Are you proud? In the same way if you are that what you are, you are not proud, you are not conscious about it. Not at all conscious. I mean, I never tell Myself I am Ādi Shakti. There is no need to tell, but it is so, what to do? Now God has chosen Me, I should say, to be the Ādi Shakti, alright, I can have it.

But I just don't know what is there, as if like some people think that Sahaja Yoga has been bestowed upon them like some Lordship or something like that. [It's] not that. It is what you have become! When you become, one must understand, that you have become that. Like supposing a stone becomes gold.

Then it is gold. It won't be proud that “I am gold." Gold is gold. Why will it be proud of that? In the same way this consciousness of being a Sahaja Yogi drops out. Still it lingers, so one has to be careful.

That once you are a Sahaja Yogi, you are a Sahaja Yogi, so what? “I'm a Sahaji” so what? Nothing so great. It's like saying that “I have a nose” you see. To be proud of to say “I have a nose” you see. What is there? Nose is already there, what is there to be proud of? But this pride

has to go away. That's very important to realise, that “I'm not there, I am no more. I am one of the whole. [It has] become the ocean, this drop of mine. I don't know if there are any boundaries left in me." This kind of consciousness develops in you, when your consciousness is filled with joy only. Just with joy and bubbling with love. Bubbling with love. You go on, you see, expressing your love whether you talk or you don't talk, whether you say about it or you don't, whether you are smiling or not. This joy is in your heart.

Now the Heart Chakra here [in Sahasrāra], the Pīṭha of the Heart Chakra, gets filled with the light of Truth. But the Truth is not such an absurd thing that we know of as Truth is.

Somebody asked Me “What is the truth?" So I said that “It was written, long time back, that you should speak the truth and speak something that people will like.", “Satyam vadet, priyam vadet." Then people said “How can you meet these two things? Truth may not be palatable and could be something that you say which people like maybe false.

So how to make these two things meet?" So Kṛiṣhṇa gave a very good answer. He said, it's like this, “Satyam vadet, hitam vadet, priyam vadet." You say the truth, truth you must say, but that truth should be good or should be liked or should be appreciated or should be nourishing for your spirit, by which there is benevolence (hita) which creates benevolence and then a thing has to be priya. In the beginning people may not like and say that he said horrible things to me or whatever it is, but at the end of

it, he will say that “See, it's so good that this was said to me that I have done something” perfect.

But in any case there is no need to say something very harsh or hard to anyone. That is not your job to go on correcting all the rest of the people. To begin with many Sahaja Yogis I have seen have been saying, “You've got this Chakra caught up, you've got that Chakra caught up!" All this is the play of ego.

You have no business to condemn anyone. You have come from such a condemned condition yourself, so why are you condemning others? Only thing is, if you are capable, if you are equipped, if you are matured enough in Sahaja Yoga, then you will just take it up as a great challenge of love. And you will do it. But you won’t go on condemning that person, finding faults with that person. It's a very good excuse if you don't want to do it. Supposing somebody is sick and the doctor doesn't know how to cure, so what does he do? He says “You see, you are sick because this happened, because you went in the cold, because this..." “Arey babāa! Yes, but now I am sick.

So what about curing me?" “No, because you did this, because you did that, you should not have done this!" All about the past mistakes he'll go on.

In the same way we go on, that “You did like this, you were like this, you went to the farlana Guru, you did this kind of a mistake, That's why you are like this." No! Don't tell him anything! Just work it out and it works. Of course you can ask, if he has been to some [false] Guru, but don't condemn, don't criticise, there is no need to

condemn anybody for what mistakes they have committed.

This is all coming from the consciousness that you are better equipped, that you have all the knowledge.

You have, you're very knowledgeable people, I must say, very knowledgeable. You are the gnostics, all that I accept, but as long as you are aware of it, you are not.

Once you are not aware of it then you are that, what is called Sahaja Yogi.

So I would expect all of you to have this new development in their Sahasrāra. In your Sahasrāra. In everybody's Sahasrāra. We have to think of the whole world. We cannot just think of Sahaja Yogis and also about the seekers. Seekers are there, alright, but what about the rest? There's are so many problems they have. And so many things are to be done.

For example, now we have a problem in India of poverty.

So I'm trying to do something for them.

You have problems in your countries. Should find out what problems there are. You can start some sort of a movement for them, try to help them as far as possible. It's not missionary-like, that you convert somebody for some sort of a reward, or for some name you have to do. You just do it for your pleasure.

Because it's your pleasure to do it.

That's how you will go to the society and you won't be afraid that you will be caught up. I know of one couple when I asked them “Why don't you start working it out?" So they said, “Mother, we are afraid our ego will come

back." I mean they are afraid of themselves only, [laughing] that their ego will come back.

So all these problems should be dropped out and you should reach that state where you don't have all these fears, all these nonsensical ideas about yourself. You are powerful. You have powers. Not only that but you have been specially bestowed with those powers. But if you don't use it then what are you? If the lamp is not enlightened then what is this lamp for? Just for decoration? So this has to be used. And this has to be used without feeling that awareness within you that, you are something great, better than others, something selected or also they say that “We are chosen." So, this can spread very fast with such grace and understanding. All kinds of stupid people are there, it's alright, you know they are stupid people. Just laugh at them, make fun of them and that's how you can solve the problem. But even that, you should do it in such a way that you don't hurt them. That whatever you do, you should see from the results, what works out. Results should be such that you should see how it works out with some people. That's the intelligence, I think, that's the superior intelligence by which you know how to say things, what to say things, how to work it out. Love, this Divine Love gives you a complete control over yourself. And you know everything, how to behave, how to talk to people, how to manage them.

I don't know what is the worst thing among human beings. According to Kṛiṣhṇa it was temper, hot temper, was the worst thing. But according to Me it is jealousy.

Jealousy of any kind is absolutely, I should say, like a scum. In Sahaja Yoga also people feel jealous and they may not say so because I don't like it, but they may create a problem. They may try to create problem among each other.

So one thing you should have a watch on your mind, if there is any kind of jealousy. I'm rather worried sometimes supposing I want to give some present to some people. Then I'm worried that I shouldn't do something that will create jealousy. We should not. Mother might have forgotten or, it's alright She is running short of it, it's alright.

But people have that kind of a very sharp sense of jealousy even in Sahaja Yoga. Now supposing I meet somebody and I don't meet somebody else, finished! That person develops a jealousy for the person whom I meet.

Sometimes people pester Me too much. “Mother, I must meet you, I must meet you” I don't know why. Why do you want to meet Me? I am all over, everywhere as you say, then what is the need that you should meet Me and talk to Me, what is the need? Is not for you alone, I am, I am for everyone, but some people think that they have a special right on Me and they think that I must meet them, individually. Otherwise they feel very bad.

All these things have to go away in a big way when you become as I said the ocean. Then you are not bothered, what shore you go, where you travel, you are not bothered. You are only with the ocean moving up and down. That is how it's a living ocean of love. And that's what we have to develop it. Without dominating others,

without showing off. It should be, the whole thing should be contented within ourself.

In Hindi is said better “Apne me samaia hue." You should be all within yourself and that's the most enjoyable thing, because, you see, what we want, supposing I want something for Myself you see, so I'll strive and get it. But this is something, if you have within yourself, you, fully filled within yourself.

So what is most important, what is so much needed? Nothing.

You are completely filled with yourself, contented with yourself and then you want to share. This is the ideal way of dealing with Sahasrāra, I think and I am sure a day will come, this whole world's Sahasrāra has to be opened out. This is what we have to do it and we are not going to disappear into some exclusive places. That is just for meditation you can go there. But not for escaping the world, that is not the idea.

Idea is for meditation, for your growth it would be a nice place to go to. It's very important to understand how valuable you are, how remarkably important you are. Born at this time, got your realisation. For what? To emancipate this world, to transform human beings, to take the whole of this world into the realm of God. That is what you are here for.

May God bless you.

Contents: 1997-05-24 **Talk to Sahaja Yogis, after the Evening Program by Spanish Sahaja Yogis, the day before Śhrī Ādi Shakti Pūjā, Cabella Ligure, Italy**

It has been a very-very joyful evening for all of us. And we thank all the people who have brought all kinds of entertainment for all of us. I am really amazed, because last time I could not go to Spain, despite they had invited Me, but I think somehow it has taken roots there. There are so many people who are now involved in Sahaja Yoga.

It's very important that places like Spain should have many more Sahaja Yogis, I think, I always thought, because it is a country visited by so many people, so cosmopolitan and there are quite a lot of Turkish influences also. Despite that we found it was not so much encouraging and Jose was extremely upset with the whole thing and he said, “Mother, what has happened to these people here?" It's alright now, as you see, it's very encouraging. We have so many beautiful singers, musicians from Spain and there are so many people here who have come to entertain you with their beautiful, melodious music. Especially their rhythm is something really extraordinary. Indian music has a rhythm of its own, but it's very bound by its systems, while I find here is absolutely a freedom to play whichever way you like, your tabla whichever way you like, your rhythmic patterns; which is a very great thing to achieve also that freedom, despite the fact that it keeps the rhythm on.

Now, the another thing we have to now say about the way Belgian people have sung very well and the way they have shown their love. Belgium is another very important country, where, of course, there is European, as you know, capital and it is a very important country

where I am very happy that Sahaja Yoga is taking its roots.

Last time I was so happy because the leader from Belgium used to always say, “Mother, now what to do? This Belgian government is funny and the Belgian people are funny" and all that. Suddenly he said, “It has become different now." I said, “Why?" “Because newspapers are only writing against the Catholic Church and they have forgotten us completely." [Clapping.] That is a very, a promising thing that people are now taking to Sahaja Yoga in Belgium in such a serious manner. And they must understand their responsibility as they have got the capital of Europe with them.

So they have to be people of very lofty ideas and of very high culture.

I must say for art, they are real artists there. They really respect art and they have a great sense of art. Even now, after all this modern art has come, all these things have come, but I think that the number of artists we have in Belgium in Sahaja Yoga are the largest in the whole of Europe.

It is surprising, but there are so many artists in our Belgian Sahaja Yoga that sometimes I feel that it is a combination, say music coming from Spain and from Belgian this art is coming. It is really great.

Now we have Holland and Holland also now coming up in music, I must say. But the way they showed the Sahaja Yogis to begin with, how they are and how gradually they change when their ego and their superego burst out. It is very realistic.

I have seen this. I am sorry. I've seen it, you see, sometimes, that some Sahaja Yogis, you see, in the beginning, they are, not all of them like that they were showing in Holland. But some Sahaja Yogis in the beginning we just don't understand them, what they are talking about and see, they just start talking so big and as if they have read too much maybe, or they are too much conditioned, whatever it is. Then you just look at them with understanding there's something wrong somewhere. And ultimately really the conditioning goes away and the ego also bursts out and then they become very good Sahaja Yogis.

But so many Sahaja Yogis are there who just jumped into Sahaja Yoga. That's something also very remarkable. But sometimes, who jump very fast, do not go very deep. It's a very funny thing about human beings I can't understand. That sometimes they take time to take to Sahaja Yog and once they take to Sahaja Yoga, they go very deep. And sometimes they take no time.

They just jumped into it and then afterwards you just don't understand why they are still at the same point, same height, they're still not going deep into it.

So it's all, has something to do, I think, with all the education one must have had or maybe the way they are brought up, or maybe their childhood, or maybe some psychological problem or could be some sort of an egotistical treatment they have developed or some sort of a complication within. But that doesn't matter. Ultimately everybody comes up and becomes a very good source of Sahaja Yoga.

Sahaja Yoga is now on your shoulders. You have to look after it. You have to spread it. Music is one way you can spread. In India, in Maharashtra especially, every Saturday they take a truck. On the truck so many musicians go from places to places and they arrange the program there, give a program and then talk about Sahaja Yoga. Like that is spreading very fast that way, even in Delhi.

In Delhi I was surprised, which I used to think is nothing, absolutely an empty shell, but Delhi has become so great now, because the people started going around to other villages and spreading Sahaja Yoga and developing that confidence within themselves.

The confidence comes when you give realisation to others. Apart from that, the joy that you get by giving realisation is the greatest, as if, like a mother when she gives birth to a child, how happy she feels.

In the same way you also feel that you have been able to give realisations to others and that is how Sahaja Yoga spreads a lot.

Now from Finland, I am very happy, that people have come all the way from Finland, because so far I didn't go to Finland and they have been doing some work also in the Belarus... *[UNCLEAR* is that right]? Yah.

So you see it is a thing, they are moving out from their place and going to these places which...

which I may not be able to reach and other Scandinavian countries are also represented here.

And I wish I could go some time to Scandinavia to spread Sahaja Yoga there. I have been there, but, I have been to

Finland also as, I must say, but I didn't do any work for Sahaja Yoga there.

So, you see, Finland I went later on, but other Scandinavian countries also. I wish I could go and... if my health permits and my age, as you know, is ? travelling becomes rather difficult for Me. But in that case, I would request all of you to do something in all these countries where I may not have touched or maybe Sahaja Yoga is not growing.

Where Sahaja Yoga is not growing, you should go all out to help them. It's a very remarkable thing how we come from different countries and different cultures, speaking different languages and how we understand the language of heart, language of love, which is Divine Love.

So tomorrow will be our great Pūjā of Kuṇḍalinī, they call it Kuṇḍalinī Pūjā, or Ādi Shakt Pūjā, whatever they may call it. But I think I will be able to say something new tomorrow for all of you to enjoy.

I cannot entertain as you can entertain, but somehow I have seen that my... whatever I am saying you all listen to me so intensely that must be some entertainment there, I think so. [Laughter.]

Contents: 1997-05-25 **Śhrī Ādi Shakti Pūjā, You Must Give this Love to Others or Respect the Mother Earth, Cabella Ligure, Italy**

Today we are going to do the Pūjā of Ādi Shakti. It's a difficult subject to talk about because it's not easy to understand that Ādi Shakti is the power of Sadāśhiva. Sadāśhiva is the God Almighty, She is His breath, as some people call it, some say She is the desire and some

say that She's the entire power of Sadāśhiva and Sadāśhiva cannot do anything without Her powers.

This subject has been described by many people in various books in different ways. But actually we need not go to the background of the creation of Ādi Shakti, for that at least you need seven lectures. But we'll come to the point where Ādi Shakti started working on this Mother Earth.

The first thing is, we must know, that She created a Kuṇḍalinī in the Mother Earth itself and She created Śhrī Gaṇeśha out of the Mother Earth, it's very interesting.

So the Mother Earth becomes a very important thing for us. If we do not know how to respect the Mother Earth, we do not know how to respect ourselves. The expression of Ādi Shakti within you is the Kuṇḍalinī, no doubt. That is the reflection of Ādi Shakti in you. But the reflection in the Mother Earth is also expressed, as you all know, in different places, different countries, different cities as the manifestation of Chakras and Ādi Shakti's creations. It was very important first to create a very holy Mother Earth for human beings to be born on there.

So the reflection of the Ādi Shakti, as Kuṇḍalinī first, was on the Mother Earth. The Kuṇḍalinī is a, we should say, is a wee part of the Ādi Shakti, or we can say that, She is the desire, pure desire, of the Ādi Shakti.

So Ādi Shakti is the desire, complete desire of Sadāśhiva and Kuṇḍalinī, Ādi Kuṇḍalinī, is the desire, complete desire, of Ādi Shakti. Now this one was first expressed in the Mother Earth, inside the Mother Earth. Inside the Mother Earth, the Kuṇḍalinī came up in such a way that it cooled down the inner part of the Mother Earth, as much

as it could and then it manifested on the surface of the earth as different Chakras.

So it's a tremendous similarity that we have with Virāta, the Mother Earth and the human beings. If all of them are being reflected by the Ādi Kuṇḍalinī, so there has to be a great connection between them. It is not understood by human beings how they are connected to this Mother Earth. This Kuṇḍalinī passed through different centers, creating different centers in the Mother Earth and ultimately broke through Kailāśha. And, I don't know how many of you have been to Kailāśh, you'll see tremendous vibrations flowing out of Kailāśh.

Now the way we insult our Mother Earth, what we are doing is we are insulting the Ādi Shakti.

So many ways there are, we should respect the Mother Earth. I mean it was in India, the first time, to begin with, when you got up from your bed and you touched the Mother Earth with your feet, you had to say “Oh Mother Earth, please forgive me because I'm touching you with my feet." All the movements of Mother Earth are controlled by this inner Kuṇḍalinī, which is the reflection of Ādi Shakti. The gravity that it has also is the manifestation of the Kuṇḍalinī of the Mother Earth.

Now, why we are suffering in this beautiful planet is because we do not respect what we have to respect the most. Mother Earth is to be respected, meaning what?, meaning that whatever is created on this earth, by the movement of the earth, by the sea, by all the elements, has to be respected. Today's problem is pollution, all kinds of things people talk of. The reason behind it,

people never understood the importance of all these five elements, which are supportive of our lives.

So to respect the Mother Earth people do Bhūmī Pūjā, many people, when they are building a house, they will do the Bhūmī Pūjā, means they will respect the Mother Earth. Because if She is not being respected maybe there could be an earthquake, which means that this Mother Earth understands, knows and acts. It acts in such a manner that human beings don't understand why such things happen.

Now, we can say that, in a place called Latur, it was Śhrī Gaṇeśha's 14th day and they had to submerge the statues into the sea or into the river, so they went all out, singing and dancing. After coming from there, they all started drinking and drinking is not liked by Mother Earth at all. If you are drunk and you are walking on the road you will fall down. It so happened with their drinking that a big earthquake broke in and all those who were drinking, all of them were engulfed into that earthquake by Mother Earth.

Only our center, which is there, was surrounded by a big gap but nothing happened to our center and not one single Sahaja Yogi was ruined by that. We can understand because we are Sahaja Yogis, how the Mother Earth has acted to save those people, who were Sahaja Yogis.

So the understanding of Mother Earth about saints is very great. She knows who is a saint, She knows the feet of a saint and that's why, you know, so many things were created, like Moses went to the sea and the Mother Earth came up for them to walk through. If all the Jews had

walked, it would not have worked out, but it was Moses and his saintliness that the Mother Earth herself came up and helped. In the same way when Rāma was building a big bridge between Lanka and India, the Mother Earth came up as a bridge.

So we should not try to curse the Earth for any mishaps on this Earth. If people are saintly they will be always protected by Mother Earth. She will always try to give them whatever they want. You can see in a minute way, that supposing now, in our Cabella here, the roses are of such a big size, such a big size roses, you won't find such a big size in the whole world but we have here, such big ones. In Pratishthan, we had flowers of sunowers so big as that, one man could not lift it. Now, how is it, all this is happening in particular places? It is the Mother Earth who knows, who is living here, who is walking on Her back, we should say, or on Her soil, because Mother Earth understands vibrations.

Now, certain places, we say that are very Holy. How have they discovered that these places are Holy? Because of magnetic forces. The magnetic forces in England, I was surprised, were crossing each other at a place called Oxted, where we lived. They were crossing since long, but we lived there later on.

So Mother Earth also organizes and arranges things for saintly people. It is very interesting to see how the Mother Earth guides you in a proper way. I mean, I don't know how many instances I can give you but we don't understand the value of the understanding of this Mother Earth and Her loving protection for all the saints. In the same way, we have to understand how the whole

atmosphere, the rain, comes in at the right time, the moon, the sun, everything works out in such a beautiful manner because they know it's a saint. They know these are saintly people sitting here. They know that they are pure people, that they are the essence of life and they should be looked after, they should be cared for, they should be bothered for. It is not bothered about people who are of no use.

For example now for Hadj, so many people went and so many were killed.

Some went to Amarnath and they were killed because they were not saints, just ritualistic people, going for a ritual which, in the discretion of the Mother Earth, was of no avail and of no advantage to them. But nobody learns from this, nobody learns. When so many people were going to Amarnath and were killed, Pakistanis said “see they should not have gone to this Amarnath, it's a false place, why did they go there? and by going there what is proved that, it is not a Holy place." But when the Hadj thing took place, they had nothing to say, they didn't know how to explain this Hadj business and the dying of so many people. The reason is this, that these people have been going to Hadj all the time. Once there was a stampede with 32,000 people being injured, troubled and killed. Now this is it. Now, what is Mother Earth suggesting that going to these people, Holy places, they are really Holy, no doubt, going to these places, you are not doing any spiritual ascent. You are not achieving anything by going to these places which are really Holy. That cannot be challenged, they are Holy places. You must be knowing that I was born in Chhindwara and

Mecca and Chhindwara are on the same Cancer Line [Tropic of Cancer], how is it? What is about Mecca? Mecca is Makkeshwarashiv, it's a Shiva. Why did Mohammed Sahib ask people to worship a stone, he didn't believe in stones, he was against all kinds of idol worship, then why did he say this black stone, which is there, has to be worshipped, for that people have to go there. What was the reason? Because he could feel the vibrations, he could feel that it's a Swayambhū, so he said it.

So all the Moslems like mad are going there, by going there nobody has improved, I have not seen anybody improve by going to Mecca.

It's just a kind of a ritual they think if they go there when they will die tomorrow they will tell God see now we have a certificate, we have been to Mecca.

Like our Pope once upon a time used to give a certificate, that when you go to heaven, you can show the certificate that now you are a real Christian. In this way, all these artificial things came up, but there is reality within, the difference is the reality is for the real people and not for false people. But this ritualism has grown too much. Like in India we have many Swayambhūs created by the Kuṇḍalinī, again I would say and which are really worshipped. I've been to most of them and I was surprised that most of the Pūjāris were suffering from some sort of a serious disease. Like one was a paralyzed fellow. He said “we are serving this God here and you said it was a Swayambhū, then why is it that we are suffering from these diseases?" I said “because, you are just making money, you can't make money out of God. If

you don't want to serve God, you don't stay here, but if you want to serve God, then stay here, you can, but don't make money out of this." It's very common, I have seen, that those people that make money get paralysis, I have seen it.

It's a very deep understanding, all these elements, Mother Earth, everybody, has about everything.

Because their Kuṇḍalinī is not like your Kuṇḍalinī, which is, though in itself is pure, but because of your human endeavours, human mistakes, ego, superego, all sorts of nonsense, the Kuṇḍalinī is not so sensitive, nor does it tell you what is happening. It has to be very alert, sensitive, spirituality within you, by which you can say immediately what you think, what you know, what you understand about anything, but the problem is that this doesn't exist. Why is it you should not be so sensitive? On the contrary, I have seen, if their mind works against somebody, they start saying “you are catching on this, you are catching on that, you are catching on that." Actually the person who is saying that is catching.

So with this, one has to understand that, if we are the true reflection of Ādi Shakti, then we should be pure, absolutely pure, like the white stone, even one black drop, that's why I wore today the white sarī, falls on the white, it shows. You should be so white, that anything, any minute black spot, also should be seen by you and in others also to be felt by you. If that height is achieved by pure life, by pure thinking, by pure heart, it is not necessary to manipulate anything, no need at all. It's all natural like the Mother Earth, does she manipulate anything? Nothing. Just see how spontaneous she is, you

put a seed in the Mother Earth and you see how it sprouts. She's so spontaneous, her activity is so spontaneous, we never wonder about it. See different types of flowers, different types of fragrance, different types of scrubs and trees, how she grows with such balance in every place. In every minute atom and molecule of that Mother Earth there is sense.

So before us is the best reflection of the Ādi Shakti and that is this Mother Earth.

So first we must respect the Mother Earth. I like you people because you are sitting on the ground, it is very good. For meditation if you can sit on the Mother Earth it will be extremely good because the special quality of the Mother Earth, which also I have unfortunately, that I suck your problems, she too sucks your problems and when she sucks your problems you get rid of them without any difficulties.

So, if you cannot say, sit on the ground, then you take a stone, to sit on, or you can have marble, or something which is natural on which you should try to sit. But if you sit on the plastic and do your meditation, I don't know what is going to help you, the plastic? That's why I request you always, that you use natural things, because natural things can absorb your problems very well. Unnaturally also, we live otherwise, you see it is on the physical line also on mental line. On mental line what do we do, that we go on arguing, explaining, it's going on and on and on, there's no end to it. One should get headache, you see, actually with all that. But if you are spontaneous, if you are very spontaneous, immediately you will know what the other fellow is trying to do, or to

say or to communicate. You don't need much thinking about it because you can absorb even the thought of another person. Absorb doesn't mean that you take the bad thing of that person but it's like a sieving out. You absorb what the other person is saying and you sieve it out.

Now the problem of this Ādi Shakti is this, that I decided that I will have all of you enter into My body, absorb all of you. It's a very dangerous game, I know, but I did it, because I am supposed to do it, at this stage of time, that I should absorb you, all of you, in My body.

So with you, all your problems have gone into Me, all your troubles also have gone into Me. But by absorbing it, you see it's like the ocean to which you have put yourself and you're cleansed, but what about the ocean? Ocean has got still your problems and things lingering and they are very troublesome.

So the best thing would be for you to cleanse yourself. Cleansing is very important through introspection.

But it doesn't mean thinking, it never means thinking. But introspection means meditation and that you all should meditate.

I must tell you, we had a meeting of the leaders and they came out and sat in the drawing room. As soon as they had assembled I had such a serious pain in the stomach and I had such a bad diarrhea that you can't believe. Now, who has got those problems, I don't know. Who has brought these problems, I don't know. But as a Mother, as a Mother, I don't mind anything, as long as you all get well and purified.

Just as the Mother Earth cares for you, I also care for you. And just like the Mother Earth loves you, I also love you, whether you are bad or good, it is not the point. But to be kind to Me, if you could try to be really good Sahaja Yogis, not the showoffs, not business like, not only thinking type, not argumentative, not criticising others, if you just try to meditate every day ten to fifteen minutes, I tell you, My health will be first class. Because I have taken your injections inside and they start torturing My life for nothing at all. You see so, now it is a risk I have run and I am sure you are all very sensible people and you will understand that your Mother shouldn't suffer. This is every day crucifixion for Me sometimes you know and I don't know what to say.

For example, the other day in Delhi. One gentleman, who is a leader, came to Me, to see Me and My one foot started going like that and paining so much. I mean, I didn't know what to tell him, that you get out now?, because I just can't hurt him, you know, but I said, “what's the matter, where have you been, what did you do?" So he realised and he went out and really it improved. Nearness also, I think, has an effect because if a man like that, or a lady like that, is full of problems and she comes very much closer to My attention, then I have to take up the cross, it's like this. A very simple understanding should be, that why are we in Sahaja Yoga? We are in Sahaja Yoga to ascend, to go higher and higher, as you sang yesterday. It was very entertaining yesterday the way you talked about your ambition to be higher and higher. Really it was very joy giving, no doubt. But what are we doing about it, what are we trying about

it, we should say. Seriously we must think, are we meditating, are we all doing something to elevate others also, to give realisation to others? Especially women, I have seen, don't do much of this, which is very bad, because you are the mothers. You have to go all out to give realisation to others. But men are more active that way and women are not.

So it works the other way round. Now on one side the men are, I think, active but don't meditate, women meditate and men do the outside work, it's sort of a part-time, or you can call it a good labour division, that you meditate at home and we will all go out. It's not going to work out.

So one has to meditate and one has to also go out to spread Sahaja Yoga. Both things have to be done.

Supposing now you meditate and you don't spread Sahaja Yoga, you will never ascend. Because after all this Kuṇḍalinī, you see, she's a sensible woman, she's very sensible. She thinks, why should I make her a saint? What is the use? Sahaja Yoga is not individualistic, it's not for one person to become a saint and sit somewhere, it's not like that. It's not meant for one person, for oneself, it's not individualistic. It's a collective happening.

So if you are not helping to the collective, Kuṇḍalinī says alright, you are alright as it is, just like our body. You see, in our body if one organ says, alright, now I am alright, I am not going to work out. Or one cell says, that I am not going to now grow, it is alright, why should I worry about the whole body. It won't work. It's a living, it's a living organism, I have told you a hundred times, when it is a living organism it has to grow, it has to grow and also to

absorb. To have energy you have to meditate and you have to grow.

If you don't grow, you are finished. You are no more a Sahaja Yogi. I wouldn't call a person a Sahaja Yogi who has not even given one person realisation. He cannot be a Sahaja Yogi, a Sahaja Yogi has to give realisation to others. Apart from other activities, the main activity should be how we give realisation to others. Unless and until we really look after that side of life we can never, never grow in Sahaja Yoga.

For example now, take My position. I'm alright, I'm complete, I have no problem. But why did I work so hard and wanted so many Sahaja Yogis, why? What was it? I don't have to grow either, I'm overgrown already. I don't have to do it, but why? What is the need? The need is like this, the need is of love. I have so much love that I have to channelize it. If I don't I'll suffocate, I can't love Myself.

So this love has to spread, for that I have to have you people who can take this love to others and make them happy, this is a kind of a vision I have and in this special time, it was promised, by many people, by many saints and it is so obvious that you are all specially chosen for this kind of thing. Now how far you understand your importance, is a different point. You do for your emancipation, alright, you meditate.

But if you are not channelizing the love, the Divine Love, what is the use? Now supposing I repair something very nicely. I repaired this machine nicely [microphone], put it right, everything and I don't speak, what is the use of having this? In the same way, if you work very hard, I know people who get up at 4 o'clock, have their baths, do

meditation, sit down, in the night again they sit down for meditation.

But they never go out, they never talk to others, they never spread Sahaja Yoga. They do not give Divine Love to others, so how can this great problem of this world be solved, that it has no love. It has never known Divine Love, it has to be given to them. They have to feel this Divine Love, this power of Ādi Shakti. They have to know it, otherwise you are being selfish, I would say, that you had a nice time having all of this and you are not giving it to others. This is the reason why Sahaja Yoga sometimes fails to create a proper balanced personality in a human being.

Some people are like this, that now supposing a Sahaja Yogi has married another Sahaja Yogi, take a position like that. Now My desire is that they should develop a complete understanding of each other, love for each other but a love for Sahaja Yoga and for others. This is the only way we can justify marriage in Sahaja Yoga, otherwise why should they marry? But it doesn't happen like that. What happens is once they are married then either they will quarrel, they will ask for divorce, if that doesn't happen, luckily, because in Sahaja Yoga it is so easy to get married, you know. If that doesn't happen, then they start having their own family, their own homes, they are again becoming very small, very very small, very limited. Did you come to Sahaja Yoga for that? You have to realise your responsibility. See this Mother Earth, how she knows her responsibility. She's just made out of nothing but soil and mud, but look at her. How's she conscious, how she's particular, how she works it out,

how she's attentive, how she's careful. While you, though you have been blessed so much by everything, are you thinking of giving it to others? With twelve disciples, whatever was the problem of Christianity, I mean it was not a good job, I must say, but still Christianity spread out. Islam, was not a very good job either, it spread out. All those bad jobs have spread out so much, so why not the good job of Sahaja Yoga? It has to spread, it has to go to various places. Try and find out where you can go and talk about it and do something good to others and help them, somehow, to rise above these common existence of misery and unhappiness and destruction. The time is very short and I think if you see the time, the rate at which we are moving is not proper. We have to be much faster, we have to go much ahead and we have to create much more Sahaja Yogis through our consistent, very intensive effort. But it is a side issue, by the way, Sahaja Yoga is by the way and this is why we are failing in our responsibility. We have to learn from the Mother Earth. You might say that Mātājī, how can we be like you? After all You are Ādi Shakti. Many people say that. You are Ādi Shakti, so what, you see with one finger you can move things like that. But why should I, why should I, what is the need? So in that reflection that you are Me, in that reflection that the Mother Earth is Me, in that beautiful creation within you, you have to become very sensitive to the need of the world. What is the need of the world. Today, if you fail, the whole thing will fail forever. Only very few will be there.

So the need for you is to spread Sahaja Yoga, because this love is not only for you. It is not only to be enjoyed

by you. It is to be enjoyed by as many as possible in the whole world.

So today we have to decide that, as the children of Ādi Shakti, we have to go all out, everywhere, every corner, we have to shout and we have to tell loudly what is the time in which we are living and what is the responsibility that you have to fulfil as Sahaja Yogis. There must be some reason why you are here.

Like in the beginning, Sahaja Yogis used to ask Me “Mother, was I this last life, was I Shivaji last life." I said, “What's the use?" You might have been anything, but what you are today, is much higher. You have to understand. You might be, say Napoleon, you might be one of the kings or maybe one of the queens somewhere, so what, what did they do? Did they raise anybody's Kuṇḍalinī? Did they have any power? Even the disciples of Christ or even Mohammed Sahib's disciples, anyone, do it, did they have any understanding of Kuṇḍalinī? Did they have any love for others that they should give them realisation? There were some Sufis, they never gave realisation to anyone. There were so many saints who never gave realisation to anybody. Mohammed Sahib never gave realisation to anybody. Gautama Buddha never gave realisation to anybody, think of it. Christ never gave realisation to anybody. Anybody! Kṛiṣhṇa did not do it, Rāma did not do it. Nobody but you can do it! You can do it and you know everything about Kuṇḍalinī. It's a very big thing because you are children of the Ādi Shakti. You are here and your Mother is here. It's a very very fortunate thing for Me that you are here. I'm very proud of you but again and again I have to tell you that

the work has to be with a faster speed, we have to move with a faster speed and get more people to Sahaja Yoga. It's rather difficult for Me to say something forcefully, that's not My nature you know. I can't get into tempers and cannot get angry and I cannot forcefully say something to you, but if you fail, then the only thing will be that you have failed Me completely. It means that, nothing less than that and if you don't want to do it then I would request all of you to take a vow today that you will spread Sahaja Yoga and you will talk about Sahaja Yoga, know about Sahaja Yoga. There are many who don't know anything. Also it is very surprising there are Sahaja Yogis they don't know anything and don't create problems for Me, like marriage, you can't live now with the wife, you can't live with the husband. All sorts of nonsensical problems people create for Me in Sahaja Yoga. Are you here to create problems or to remove problems of people? So, on the whole, we have done well, I must say, but it's not the final, we have to work faster with more enthusiasm and joyfully. You don't know what joy you get when you give realisation to somebody.

The most joyful moment is when you give realisation to others.

Now you just try once and you enjoy it and then you want to do it more and more and more. Now after Sahaja Yoga, the want disappears into this desire that “my God this man is going, should I call him and give him realisation?" On the street you will see someone and say `come hear, come hear, I want to give you something and you'll make him sit down and give realisation.' This will be your style, like mad, you'll say “Oh no, no, look at

this, this gentleman is without any realisation, let us give him." You'll have to go to churches, you'll have to go to universities, you have to go to all such congregations where they have no idea about what they can achieve and then tell them without any fear, without any malice. You can talk to them and you should tell them now we are hear to help you for your good.

We have not come hear for our good but for your good, now listen to us and I am sure, very sure, that the Kuṇḍalinī within you will be very happy. She is not happy you see, she is not happy with people who are not using Her fully.

So She will be very happy to help you and to do the needful for the emancipation of the whole world.

May God bless you!

Contents: 1997-06-07 **Talk to Sahaja Yogis, after the Evening Program on Śhrī Mahākālī, the Day before Śhrī Kṛiṣhṇa Pūjā, Camp Vacamas, 256 Macopin Road, West Milford, NJ, U.S.A.**

Tomorrow I'm going to tell you about it, but today, I would say, music, dancing, art, every kind of creativity will definitely bring forth the spiritual aspect of American's life. They have to come to this.

Otherwise it's not going to be appreciated, it won't be an appeal, people won't like such music. They'll try some tricks otherwise, you know that in this country we have all kinds of people, all kinds of music and sometimes extremely stupid. But, somehow they are gaining the idea that popularity now doesn't remain with all kind of strand and stupid things. They have taken, I'm sure, by

their own urge to search the reality a new type of a style, new type of a singing, in which there is a different tune, I feel, is coming up, suggesting that there's something higher that we have to enjoy. The idea of enjoyment is change.

Sometimes people feel that this country is not so ancient, it has no traditions, also people are from different cultures and so they are all mixed up, confused. But in that confusion only you are going to find the truth. And that's why everywhere in America you go you find that there are people who are working some out sort of a search of their own. Maybe it's not correct, it's not all right. Like the music now, you see, you had such serene, deep music, also some very collective music, all types of music that you could think of. And Indian music, Spanish music, also Russian music, all these have combined on the stage here. That is suggestive that one day the whole world will have sense of music. That's a different thing than music is, because music can be anything. To have the sense of music that not only entertains, but elevates you, takes you to higher realms of your existence. That is music.

You know how much I love music. It is not because I'm, sort of, fond of music, but through music vibrations can be spread much faster. And they can be also easily penetrate into your being.

So, a person who is absolutely dry, who doesn't like music at all, or the one who is, who doesn't like poetry, I mean, all the left-sided talents. Such a person is not in balance. And that's why it is important that one should try, even if you don't like, try to understand music.

The another side, it's a very funny mixture here, I find, in America. One side is this creativity which is sometimes quite mad. On the other side you find people extremely busy. Have no time to even sing something or read something, extremely, extremely busy making money. Only money is the criteria.

But the money situation seems to be very bad here to Me, for future. Because of the stupid ideas about economics here.

Whatever it is, Sahaja Yogis are going to be absolutely very rich, prosperous, well-known, because the talents they have will show. In every field of life you'll find every Sahaja Yogi will be so successful that those who were full of their ego and thought no end of themselves will realise that unless and until you have the light of your Spirit you cannot grow very further. Because in the dimensions of human mind you cannot conceive the heights which you can reach. Through music, when today you were singing I was amazed what a talent we have in Sahaja Yoga. I mean, they are not paid for, they have not trained, they have not been to universities and colleges of music, just spontaneously how beautifully they can sing and give us spiritual music which really heartens Me. I was very happy to see the progress you have made in art, I should say and the other variety of your expressions. Everything was really wonderful and I enjoyed it thoroughly. I'm sure one day all of you who are just Sahaja Yogi singers will be professionals and this and that, but don't forget Me then. [Laughter.] So it's a nice time we had this evening. Tomorrow again there is going to be Pūjā and I'm really, really I must say very happy and I congratulate you to

organize this program in America in such a beautiful manner. And all of you are such enthusiasts. They told Me how you have been contributing and they wouldn't take any money from Me, because I thought, “How could they bear all the expenses?" But somehow or other it's all working out. It's just your sweet desires, your deep surrender. Everything has worked beautifully and the oneness of all the world you can feel in America today and I hope this will go on and on and on and we'll be spreading it much more.

May God bless you!

Contents: 1997-06-08 **Śhrī Kṛiṣhṇa Pūjā, Freedom Without Wisdom Is** Dangerous, Camp Vacamas, 256 Macopin Road, West Milford, NJ, U.S.A.

Today we have decided to have Śhrī Kṛiṣhṇa Pūjā in the land of Śhrī Kṛiṣhṇa.

Though this is the land of Śhrī Kṛiṣhṇa, people ask Me why the people are not spiritual. How is it they get entangled into different types of seekings which are not leading to truth? Why is it the people in America are not so alert as to recognize what is the truth and what they have to find? Śhrī Kṛiṣhṇa's time was, as you know, at least two thousand after Śhrī Rāma. And Śhrī Rāma created lots of disciplines for human beings to follow in the path of their ascent. According to the time everything works out.

So people were extremely rigid, disciplined and it so happened that people lost the touch with the truth. They would leave their wives, ill-treat their wives, do all kinds of things in the name of Śhrī Rāma; because always

human beings take to something which is not right. The another side they never saw, how Rāma went after Sītājī to find Her and He fought the horrible Rākshasa Rāvaṇa to get back His wife.

So the other side people never see. Only this side they saw that He was very strict with His wife and if the wife stayed over in some function He got so angry and He shouted at Her and He threw Her out and all those things.

That is how Śhrī Kṛiṣhṇa came in. Always incarnations come one after another to correct themselves only. When Śhrī Kṛiṣhṇa found that it is on the other side, of ego, that men thought they were very powerful people and they could do whatever they liked and they had all the power to judge their wives, so Śhrī Kṛiṣhṇa came with a new diversion, or I should say, from a new idea about life. He talked of freedom, He talked of abandonment and He talked that life is for enjoyment. Rādhā was the source of joy. `Ra' is energy, `dha' means the one who sustains energy. She was the source of joy and His idea was, to enjoy life is the best way to live. And that's why He said that you should play Holi, you should enjoy yourselves, you must have Rās, by which you enjoy group dancing and freedom.

So people thought that's the way one has to live, is to be absolutely free, live as you like, specially in America. They thought that to enjoy life is complete abandonment: no discipline, no bindings, you can divorce your wife eight times and husbands ten times. That sort of a life started long time back, but it really prospered in America. The prosperity of this kind of a culture came to

such a level that now we don't know what's going to happen to the family system, to the joy part of it.

Again here people forgot the other side of it. Ādi Shakti first created Śhrī Gaṇeśh. Śhrī Gaṇeśh is the source of wisdom, He's the source of auspiciousness. Through Him we understand auspiciousness and He is a child. He is an eternal child. And this behaviour of abandonment is very destructive if there is no wisdom. First thing was to establish wisdom within ourselves. But we start a theory or a kind of a pattern of life without thinking, have we got the wisdom or not? Are we capable of following that pattern of life without any development of our wisdom? But the worst was when the freedom became the criteria of life, people became extremely dominating and egoistical. The first answer always you will get it, “What's wrong?" You ask them, “Why are you doing this?" “What's wrong?" “I mean, it's wrong because it is not auspicious." “What's auspiciousness?" is there, absolutely like you can call them, people without any brains, brainless people. `Brainless' means there is no wisdom. What is the power of brain is wisdom.

So life started drifting into a destructive bourn, we should say, of no return. And every kind of filth was accepted as a blessing and nobody would think that this is wrong, this is not for human life. Even the animals are all not like that.

Added to that came the stupidity of drinking alcohol. I don't know how they discovered alcohol long time back, long, long time back, but they say it came out of the manthana and out of the churning of the ocean by the suras and asuras, by the rākṣhasas and by the devas.

Must be some trick to get these Rākshasas drunk and to somehow or other manage to get the kumbha of, the pitcher of Amṛuta, ambrosia; so that these Rākshasas will be lost drinking and then the devas will get their due, which was Amṛuta, which was ambrosia. That might be one of the reasons that it was created out of the ocean, or among all the fourteen things that came out of the ocean.

So kind of a oppositions, opposite quality of things were created.

Another thing they created were prostitutes. One may ask why prostitutes came out of that manthana, because now you have freedom. You are given freedom to choose and so you must have full vision whether to choose an auspicious life, a holy life, a Divine life, or to choose destructive life. This opposition came forward because your freedom had to be respected, that was very important. In the growth of human awareness it was very important to respect the freedom of human beings. Because animals, if you see, they have no freedom: a snake will be a snake, scorpion will be a scorpion, lion will be a lion. They live with their own qualities, Guṇas; you cannot make them do something that other animals are doing. We have passed through all these different animal yonis and now we are human beings and now we have freedom.

Now why freedom, one may ask, because these days they ask such questions for everything you say, why freedom needed? Like I always told you before that in the school they teach you two plus two is four and you have to remember it. But when you grow and when you go to

college, you are supposed to have freedom to understand everything yourself. In the same manner, your awareness was to be brought to that level that you could use your freedom wisely.

Now, you have to have temptations. How can you judge a person whether he is blind or not blind? Supposing you ask a blind person, “Is this a flower?" He might feel it, say, “No, no, it's a bee." So he has to have his eyes to see and once you give him the eyes he goes amok. He doesn't know what to do, what is good for him.

So he chose all that was not at all good for him, auspicious for him and detrimental for his growth.

So the drinking started and with drinking you don't know how we get abandoned. I have heard people, that they lose their sense of relationship with brothers, sisters, mothers, everything, if you get drunk.

So many drunkards have told Me this. That is why in this country we have funny type of relationships, one can't understand, how can it be? But it is so. By drinking, all these things have happened that they don't know who is your sister, who is your wife, who is your mother. In India also we have but different type of thing, that they will ill-treat their mother, they'll ill-treat their sister, ill-treat their wives; the other way round also. But here they do not ill-treat, they love, but in a very perverted manner. You see the reaction in two countries.

So this grew up very much and today we see a country that is America in a complete chaos.

So this freedom without any wisdom at all growing, starts creating a terrible ego. When auspiciousness is given up

then Śhrī Gaṇeśha sleeps and as Christ, who is the incarnation of Śhrī Gaṇeśha, also doesn't bother.

So the rule of Christ is finished.

So what rules is the ego, this ego which thinks it is free. It doesn't know it is bound by all kinds of enemies of very horrible types. At the time of Śhrī Kṛiṣhṇa He said that the worst enemy human beings have is anger, but I think in modern times the worst enemy human beings have is greed and jealousy. Greed has no meaning these days. I mean, what do you say to a person who has three thousand shoes, I mean, pairs of shoes? Must be mad! There are all sorts of things, you know, in greed you see these days. You don't know how people are really behaving. No one can explain. I know of someone who has five thousand dogs. What is she doing with those dogs I don't know, but she has. Like all countries, even in America I think it's much worse, much worse. Now you may call it anything, consumerism or anything like that, or your economics which is, I think, very faulty, it doesn't understand human beings, whatever it may be, it can never bring benevolence, neither to the person who thinks he is rich, or to the people whom he is exploiting. As far as spirituality is concerned, they are all away from the realm of divinity.

Now the mind starts working with ego. Ego takes over like a computer and it starts suggesting ways and methods by which how much money you can earn.

So when you start earning money, then again the same Ego Mister tells you how to destroy yourself with this money. They do all kinds of things when they have money. I mean, that money is not a Lakṣhmī prasad; it is

some sort of a money that becomes like a Rākshasa or a devil and which devours you. It takes you to all kinds of wrong places. It takes you to such horrible theories that nobody would accept such theories. This ego makes you feel that, ah, yes, you are perfect, you know everything, whatever you are doing is the best.

But with all that doing, what happens? You become restless, you cannot sleep. Now with the problem here is that people have this so-called tension, stress. In our young age we never heard of this word, what is tension, stress is. Even now in India very few people know about it. Because you yourself, you are destroying yourself.

So with this money, say, you want to entice some woman, take a very low-level thing.

Then you'll run after her, give her this, give her that and spend all your money till you become bankrupt.

And then you'll start sitting and crying. And this is a common story. I don't know why don't they make films like this, to show actually what happens to a person who runs after money and he goes on then spending that money. He doesn't know what to do, you see; money also eats him, I think. On the other side we have people who are extremely miserly.

So all their, with the money only, they become so much greedy that they keep their money in seven locks and keys.

Now, they see in the world there are people who are suffering so much, who have so much problem.

Why not spend some money on them? So then there are agents come up, like our Swiss bank. Swiss bank is the

outcome of our greed, completely our greed; because we have so much money we don't know what to do, so we put it in the Swiss bank. Swiss bank says, “All right, we'll look after it." Because we are greedy as well as we are miserly. I mean, miserly people are another crackpots, I should say, the way they live. But also the people who have money are really crackpots. They have no sense of self-respect, neither self-esteem.

Now imagine eighty, ninety-year-old women going for a shake dance, as I told you. Because they have money they think they should do this, competing with the young people, because they have money. If they have money, if they get it without any, I should say, cheating or without deceiving someone, if it's a real good money they should give it to some good cause and try to propagate goodness. But money itself seems to be something very bad, like poison, because either this money makes you mad how to spend it, or mad how to save it. As if you become a slave of this money business and in that slavishness you go on drifting, drifting, drifting.

I've seen people when they talk, you don't know why they talk like that, you know. Then you discover that they have a bank account, that's why they are talking like that. If you don't have bank account then you won't talk like that. I mean, more than that also. This country is overflowing with money, with all kinds of money transactions, permutations and combinations and this and that and what you can do with money, because Śhrī Kṛiṣhṇa is Kubera. He is the Deity, or we can say He is the God of wealth. But at the same time, He is a very mischievous God. You can see clearly: this is supposed to

be Śhrī Kṛiṣhṇa's country which is overflowing with money. At the same time you find horrible things happening, worst in the whole world. I mean, no one can beat Americans, they say, in stupidity, in vulgarity, indecency, exploitation.

So this is the curse of money on human beings, which is to be understood, that freedom without wisdom is the most dangerous thing to use. It is better not to be free if you have no wisdom, because God knows what you will do if you have freedom and no wisdom. I've seen here, heard about women who are killing their children. I mean, nowhere you will find such a thing like that, killing small children. Now how this money makes you so dry that you have no, I would say, no love, no feeling. Just for killing's sake also, people kill here.

Now there are, there's another thing that this money does: it creates a disparity. There are some who are very rich, there are some who are very poor.

So those who are very poor are against those who are very rich. They can't understand why should these people have so much money, so they think it's a matter of right to snatch all that money from them and use it for themselves. But the same money can destroy them also, so snatching that money with violence or grabbing it is not going to give you any blessings.

So what is the purpose of wealth? That is very important for people who worship Śhrī Kṛiṣhṇa to know.

In Śhrī Kṛiṣhṇa's life, He saw that the women who were creating buttermilk and butter were carrying all that all the way to Mathura, where in Mathura this horrible King Kamsa was reigning. And they used to give to all the

soldiers there. He didn't want them to do that. Because they would fetch much more money, they would be paid much more, so these women were greedy about it. Instead of giving them to their own children, to their own families, they used to collect all that and take to Mathura. From very childhood Śhrī Kṛiṣhṇa used to throw stones at those pitchers and break their pitchers, because he didn't want that to go all the way to Mathura to feed those horrible soldiers.

This is what it is we have to learn, that if we have, say, surplus money or something, you have to think what you can do with it and what joy it can bring, by sharing with right type of people. Not in the pubs, no, no, I don't mean that, but sharing it for their needs and what they want. Actually a disciple of Śhrī Kṛiṣhṇa should be a self-satisfied person. Look at His life, how self-satisfied He was. Every episode about Him talks of His complete oneness with Himself.

For example, when Arjuna asked Him that “Why don't You join us Pāṇḍavas to fight with us?" In modern times in the competitive life, you see, if you see those races, they're so anxious to win, to have the higher position. Then all the big, big politicians are trying to bring down other politicians, to have their own power. But what did Śhrī Kṛiṣhṇa say, that “I will be your charioteer. I'll drive your chariot, but I will not lift My weapon against anyone." We can't think of anyone like that today. See, people will never say that, “All right, I will stay down and you'll be on the throne." Very difficult even to see one person who could behave like Śhrī Kṛiṣhṇa. Because whether He is a charioteer or He is the one who was

Arjuna, or He was the captain of the whole thing, He knew what He was. What was the need for Him to become this or that and that? But these days, you see, to become something is such a struggle going on.

Someone wants to be, say, the prime minister, that's the highest, I think, I don't know. But then some want to dislodge the prime minister. Then you start from the peon upward, everybody wants something higher, higher, higher, higher.

This is another very subtle type of greed which is working out in our minds.

Even in Sahaja Yoga I've seen that the leaders, now are settled down of course, much better, but used to be such a terrible fight for leadership. It's all a myth, actual myth, but they used to fight. And they would write letters after letters. There were groups: one group would write against another group, another group would write against this group and I used to just laugh, because there's no truth in it.

Leadership is no truth, it's just a joke. But even if I told them it's a joke, they would not understand it's a joke and not to be that serious and to fight about it. Gradually it settled down normally, better, much better, it's not so much bad. But that is what is there, this greed. That was the mistake, I think, of Śhrī Kṛiṣhṇa, that instead of anger He should have put greed as the worst thing.

Actually, you see, these incarnations don't know much about human beings and they would not know how far they will be going, same happens to Me. But they are absolutely unaware that what these human beings are, what you tell them, what they will make out of it. Their

brains are so sharp that they'll pick up whatever is wrong for them and never see whatever is right for them. Śhrī Rāma tried something, it was of no use. Śhrī Kṛiṣhṇa tried something, it was of no use.

So we come to Śhrī Jesus Christ. Nowadays the people who are something else are ardent disciples of Christ. They have no wisdom of any kind. Like mad they are going about. You read there about their organizations, you read about things that they do, you are amazed at it; you see, how can they be disciples of Christ? In no way they have any right on Christ to begin with, because they don't know anything about Christ.

First to know and then to imbibe His qualities are something very, very, I should say, impossible thing these days.

Some would say, “Why was He born in a poor family? He was born in a poor family, He should have been born to Mister Ford." Some say, I mean, you see, finding faults and criticising is the only thing left to us now because you can't do anything else, that's why. Then they would say, “Why did He get himself crucified?" He didn't crucify you. He should have crucified you, but actually He crucified himself, that was His mistake. It is also very difficult for human beings to understand incarnations, because they are in juxtaposition. They are very different things, so human beings can't understand. Now they are there to lead them, they are there to tell them what is to be done; but the way they understand, you see, it's just absurd.

For example, you know in Chicago I met the head of the Hare Rāma cult. Another puzzle he was to Me, really,

because he came in a very thin dhoti and it was so very cold and he was shivering before Me.

So I said, “Sir, why are you wearing such a thin dhoti? You are shivering, I am very sorry." He said, “Why? My Guru has told me that I should have a thin dhoti." “Why?" “To go to heaven, to achieve my ascent." I said, “Really? He told you like that? But Śhrī Kṛiṣhṇa never wore a thin dhoti." “But I am not Śhrī Kṛiṣhṇa” he said, see how the human mind tries to avoid.

So now, then he had shaved his head and had a big ponytail behind. I asked him, “Why have you shaved your head?" So he said, “Because my Guru told me that you have to shave your head if you have to go to heaven." So I said, “But Śhrī Kṛiṣhṇa did not shave His head." “No, no, but He was incarnation. I have to shave my head so I have to go to heaven." So I told him, “See, Kabīra has said, `These sheep are shaven and shorn every year twice. And if they all go to heaven where will be a place left for you?' " So he never understood Me. He got very angry with Me and he said to Me, “Mother, You are talking ill about my Guru." I said, “I am not talking ill. I am your Mother, I am just asking Me that what's the use of wearing this thin dhoti, that's all. A Mother has a right to ask." He got very angry, he went away. And he's the head of these Hare Rāmas! So to understand the incarnation also you have to be a realised Soul, otherwise you cannot, because they look very absurd. Without asking any questions if you can become a realised Soul, if you ask questions it's one degree less, without questioning if you get your realisation, without any questions, then you have the highest marks. But if you,

after questioning and this thing and that thing, then you have less marks, because your mind is very active and the person whose mind is active cannot achieve something beyond the mind. You have to achieve it beyond the mind. This is one thing at least if you all understand, I think My work is done. All tricks tried by Śhrī Kṛiṣhṇa, all disciplines put by Śhrī Rāma, all the Gurus who tried their level best to tell you what to do, is only to make you a yogi by taking you beyond the mind.

And then what happens? Then you are in connection with this All-pervading Power which is looking after you, which protects you, which helps you; in every way you are absolutely in charge of this Param-Chaitanya.

Now supposing I do not take the citizenship of America, of course I may never take, but supposing. Then this government is not in charge of Me. But if I take, of course they'll tax Me, do all kinds of things, doesn't matter, but at least they'll be in charge. But this Param-Chaitanya when it takes over, it is love, is absolute love: love which thinks, understands, coordinates, cooperates, works and extremely sensitive. It works, I'm sometimes so surprised the way it works, without fail, without making any mistakes. You don't have to even tell, because you are there.

But to believe that we are there also is a difficult task. With all the experiences you should believe that you are there, but that is also quite a difficult task.

So when we say they're established Sahaja Yogis then what we mean is this, that they are completely one, under complete charge of Param-Chaitanya. That's what we have to be.

If you want to save this country, you have to be that. No argument, no explanation, nothing; no fighting, no strikes, nothing. No placards is needed. You are the ones who will advertise Sahaja Yoga.

Every one of you should understand that your life is very important at this juncture. And you have to become that special person who reacts reality through the Divine Love.

May God bless you.

***Contents: 1997-06-10*, Public Program, Cathedral of St. John the Divine, 112 Street and 1047 Amsterdam Avenue, Manhattan, New York, USA**

Talk of Claes Nobel: Your Holiness Shri Mataji Nirmalā Devī and most distinguished Sir C.P. Srivastava and honourable count legislators *[UNCLEAR]*, Andrea Stewart-Cousins and dear follow seekers of Knowledge and Truth.

I say thank you, I say thank to you all from the bottom of my heart that you have accepted my invitation to come to the great cathedral Saint John the Divine in New York for this very important meeting. A meeting that can have historic proportions and impact related to an area that is exceedingly close to my heart and to your heart and that is the restoration of our planet. Planet Earth is unique,.....

Talk of

Shri Mataji:

I bow to all the seekers of Truth.

First of all, I have to say that Truth is what is. You cannot change it, you cannot transform it, you cannot discuss it. It is what it is, it has been what it has been and it will be what it will be. If you accept this fact that we know

truths, but we don't know the absolute Truth. And we have to know that absolute Truth which is described in all the scriptures, because they all were talking about the Truth only.

So what is the Truth? The Truth is you are not this body, this mind, these emotions, but you are the pure Spirit. You have to achieve that state of Selfhood. Unless and until you become that, you see all kinds of differences among people, among religions, among nations.

So first of all, as you have been described about Kuṇḍalinī, you need not have blind faith, because blind faith is more dangerous. We have had lots of problems with this blind faith. But you must keep your mind open, because you are seekers, special people, a special category of people, as described by William Blake, who are seeking. And as seekers, you should experience whatever I am saying and if it works, if you experience that, then as honest people you must believe it, because that's what you are seeking and this has to spread all over the world.

They have already described to you what is the power residing in the triangular bone, which is awakened and you get connected with this all-pervading power of Divine Love. Love is greater than Truth, because Love is the giver of Truth. And this Divine power of love is doing all the living work on this earth. For example, you see these beautiful flowers and we take them for granted, we don't understand how these different flowers are created, with different fragrances, with different heights, with different bushes, so meticulously. Who does all this? If you ask a doctor who runs your heart, he'll say it is an autonomous

nervous system, but who is this `auto'? Who is this auto that runs your heart, which digests your food, works out everything within yourself? So when we turn to religion also, people have not been able to explain it properly, because people to whom it was to be explained were not ready yet, I think. They couldn't understand. In every word that is written in the scriptures, there is a very, very deep meaning behind it. But as it is, as you know what has happened to all the people who are supposed to be at the helm of affairs of religions.

Now the trouble is that whatever religion we take, wherever we are born, where we are is just a chance.

You could have been born in any religion, in any city, any village. But you start identifying, it's a human nature to identify with where you are being born, who were your parents, what society you lived in, everything. All these conditionings make you think that you are that. It all settles down in your mind.

If I say something, it should not shock you that mind is a myth, created by us. Through our reactions outside, we are conditioned in our mind, we have also got our ego to protect ourselves and to react. That's how this mind has been created and this mind which we have created something like we have created a computer and we are now slaves of our mind, we cannot do without it. But to believe in your mind is not that you believe in the truth.

Mind can take you to any level of degradation or any level of ascent. But it cannot take you beyond the mind. I'm talking about the realm which exists beyond your mind which you have created. This realm of Divine Love is everywhere, it permeates into everything, it acts into

everything. We believe that there is God, that also is like blind faith, we believe that His powers are there, but now the time has come for you to feel it, to know it on your central nervous system. In Sanskrit, there is a word called `Vida', from which the word `Veda' has come. The first stanza of Vida says, reading all this, that: “If you cannot find out this all-pervading power, it is useless." Another word that we use is `Buddha', this comes from the word `bode', bode means to feel it on your central nervous system. And then Christ also said that you are to be born again, He did not mean that you put a certificate on your head `I am born again,' no! It's a happening, where there is a breakthrough in your ascent in the evolutionary process. You have reached a human level of human awareness, but you have to go beyond it and that is what is there within you, the great power of Kuṇḍalinī.

Of course, this knowledge has been used for all kinds of nonsensical things. Today only somebody warned Me that Kuṇḍalinī, they think, can be awakened through some sort of sex business. Actually Kuṇḍalinī, if you see, is placed above, see here, above the last Chakra of Mūlādhāra. That means, when Kuṇḍalinī rises, this Chakra just becomes silent. Christ has said that “You have to enter to enter into the kingdom of God, when you are like a child." Means innocent, all these excretion habits also drop out, they become absolutely silent when Kuṇḍalinī rises.

So this kind of a myth was started. I am ashamed to say that these Indians, they used it, because they thought that this kind of thing would be more appreciated in Freudian countries and they brought this kind of

knowledge. It has nothing to do with these animal instincts. You are a human being and you have to rise above this animal status.

Now, as it is, you know that people talk of great Jihads and things like that. They think that by putting people into a kind of a discipline with force, with swords in their hands. That's not the way you can achieve it. In all your freedom, you have to achieve in your own freedom. You cannot force it. Until you become absolutely free, you will not understand what is your value, you will not understand what you can achieve, what state you can achieve.

So when this Kuṇḍalinī rises, She gives lots of blessings to you. First of all, She is your Mother, She is the one who knows everything about you. Everything is recorded in Her, about your past, about your aspirations, everything. And She knows how to rise. As when you were born, your mother took all the trouble of your birth, in the same way it's a very beautiful awakening that takes place.

Now some people have written that when Kuṇḍalinī rises, there people become mad and this and that, nonsense! I have never seen, I have been working for at least twenty-seven years, I have never seen even one person suffering like that. How can it be? She is your Mother. And She gives you this second birth, She is very anxious to give you this second birth, specially nowadays in these modern times, it was to be, it is already predicted, that this is the time when many people, who would be seeking Truth in the Himālayas and all kinds of difficult places, will become householders and they will achieve this union with the Divine. This union with the Divine is

called Yoga and it's called Sahaja, meaning spontaneous, born with you. This happens to you because it's a matter of your right. As a human being, you have a right to become a higher personality. And you are suffering, you are seeking because you feel inside that there is something higher you have to achieve and you have not yet achieved that.

So the one thing that happens first of all when you rise, through the first Chakra the Kuṇḍalinī rises and what She does, She gives a blessing, a special blessing of Mūlādhāra Chakra, by which you become a very moral person, moral in the sense that the way, you see these days, our eyes are moving here and there, the way people are taking, I mean, to the extreme, if you go, I don't know what to say, because, really, I don't know from what minds these things come out, but all sorts of nonsense people do in the name of enjoyment.

You become a very sober and a dignified person. Because you know yourself, you develop that dignity within you yourself and a calibre of a very high, moral personality comes in. Then the relationships with your sister, with your mother, with your brother, with all other human beings in the society become extremely pure, it's the pure love that you enjoy. And these stupid ideas which have corrupted our society, they just drop out, it is your role, you can get it in no time. Now whatever you have done or what feelings you have been indulging into, you just forget, the Kuṇḍalinī will take care of that.

The second blessing that you get is that you become extremely creative, extremely creative. The creativity has been shown among Sahaja Yogis all over the world, I

need not describe all that. But you become creative and in a very pure personality. It's like, these days, you see, all kinds of things are created to sort of befool you. They create all kinds of nonsensical things, dirty things, filthy things, which are not digestible by any saintly person. You really become a saint in a way that your creativity becomes so better. See this beautiful cathedral was created by faithfuls who believed that in America one day, this place, there will be so many seekers of Truth and they'll get the blessings. They did not create it to have some sort of a filthy, dirty, we should say, entertainment. Then you are entertained by something very pure, something very, very beautiful, in the real sense of the word.

But the highest thing that happens to you that you develop a new dimension in your awareness which we call as collective consciousness. You become collectively conscious, Jung has talked about it, you become collective, conscious, means you start feeling others on your finger tips. On your finger tips you can feel yourself. Now these Chakras, as you have been told, are denoted on your palms and you can feel on your finger tips your own Chakras and the Chakras of others, the centers of others and your own.

So who is the other? You become collectively conscious. I am saying again, you become! It's not lecturing, it's not saying. Then see how many problems get solved, you know. For example, we indulge, as he said that we are really creating problems for our Mother Earth, but actually because we are not collectively conscious. Once you are collectively conscious, you are in your

awareness, then all the time you think that: `What will harm others? Should I smoke or not? Why should I smoke? It will harm others.

Should I start a pub or not? No, because it will harm others.' All these wrong things that we are doing for money or for anything whatsoever, drop. We just don't do wrong things, just don't do. Why? Because we are collectively conscious.

.....

***Contents: 1997-06-16*, Public Program, Thinking Takes You Nowhere, Los Angeles, CA, U.S.A.**

I bow to all the seekers of Truth. At the very outset, we have to know what truth is. Absolute truth cannot be changed, cannot be described, cannot be transferred. It is, it will be and it was.

So whatever I am going to tell you today, you need not accept it with blind faith. This blind faith has done so much trouble in this world. People are fighting in the name of religion, in the name of God, as if all of them are blind and don't know what to [do].

So the absolute truth, whatever I tell you, you are not to believe it, because I am telling you. But you have to experience it. If you experience and still you are not been able to settle yourself, with yourself, then no one can help you. But as you are the seekers of truth, you have every right to know it. And at the very outset, I have to tell you, you can't pay for it. You just can't pay for it.

Those people who are making big money here, in the name of God, in the name of truth, in the name of spirituality, don't know that you cannot sale it. At least

you must know that none of the Incarnations, who came on this Earth like Christ anyone they didn't charge any money. This is a simple thing which you let you know that what is the truth is the truth and it is above you, your money, status, your personality.

So the truth is that you are not this body, this mind, these emotions, these reactions, this ego, but you are pure Spirit.

And that is what you have to know. Spirit is the only way, which will enlighten your life, which will give you peace, which will give you wisdom, which will give you protection. Anything that is Divine is coming from the Spirit.

So by standing on your head, by fasting yourself, also killing others, you cannot get it. It is something within you. And as you have been told about this power, it exists in all the human beings. Whatever may be the race, whatever may be the religion, whatever may be the nationality? This is based in the triangular bone of every person, only awakening of it is important.

Not this knowledge, was not known to Indians or to many other countries. I was surprised in Ukraine, they knew about it. And also in a place which is *[UNCLEAR]* Bolivia, *[UNCLEAR]* they knew about it.

Of course they don't know how to awaken, but otherwise they knew there is a power within us, which has to arise. It is the way you get connected like this instrument here. If it is not connected to the mains, has no meaning, has no identity. In the same way, unless and until we are connected to the Divine, we have no identity. We may

brand ourselves, these and that and that but that is no identity, is falsehood and can change every moment.

Now I don't know how to bring Americans to this subtler understanding of this subject, because by nature, they are shifting. Today I am giving you a lecture is alright and, it is a Guru shopping than go to another place or you do another Guru shopping, I must tell you very frankly, because America is the only country where Sahaja Yoga has *[UNCLEAR]* failed very badly. On the contrary, Russia, you will be amazed, Russia, of course I am not the communist that way, but the operation of communism and not so much of money orientation, consumerism Russians are like clean slates. They don't know anything about religion, God, nothing. But they have grown inside and you will be amazed that in one village, called Togliatti, we have twenty one thousands practicing Sahaja Yogis. They are just like our yogis, very high level people there. I was amazed how they got it so nicely. And they have no sense of possession at all. You will be amazed that their Government told them, you can have your ats, you can have your cars, they said, no, no, no. You better look after, we don't want to have headache. They don't believe in insurances, it's nothing. Sense of possession is so little, that I think their energy is not wasted on that.

And once they have come to Sahaja Yoga, they are very well settled down.

So what, five six years back, I think, they said a joke that there was an American Sahaja Yogi, who met Russia Sahaja Yogi and the Russian asked how many Sahaja Yogis you have? He said, we have fifty six, so Russian

one says, “Oh my God, you have fifty six thousand, we have only twenty one thousand." It is a very sad thing. I have been, the first country I visited was America. I came to Los Angeles, but somehow I don't know if you are really seeking the absolute truth or not. And I again, they have called Me, have come. These people have hopes.

But such a, slow moving train, I tell you that you are amazed, of course India I can't say about India, because we have traditionally understood, what is spirituality? All the thugs and all the thieves have come here, exported nicely and they are settled down here and they have so many disciples here. I am surprised of course they are sent away, they go into trouble. But what is the wisdom part of it is that we should see what do we get out of our seeking? What are we seeking? What do we want to be? And that one has to learn. [The last], I think twenty six years, twenty seven years, I have been doing Sahaja Yoga. The first country, I visited was America and for nine years I did not touch it. The reason is, I feel that they are people everywhere. That is not only Americans, are the people *[UNCLEAR]* but I feel there are seekers, Lots of seekers in this country. And they are in delusion that they can purchase their spirituality. If you can purchase your Guru, he cannot be your Guru; he must be your servant that you can pay for it. This is one fact I would all of you to remember, because what happens, I come, give lectures, do this, finished. You are seekers, all your life will be seekers unless until seek the absolute truth. Whether you go from one place to another, whether you go from one Guru to another, makes what. You are moving about like this all the time. And the reason why

they cannot mature your spirituality because they are so shifting.

So one has to mature in a very subtler way and that is that you have to be first connected with this All-pervading Power of Divine Love. We have heard about it. In this Bible it is there. It is there in Koran. Of course in all the Sanskrit literature, by different names, they described, but there is an All-pervading Power of Divine Love. That's what we have to get connected to. That is the Yoga. That is the unity and you all have right to get it. Not only because you are human beings, but because you are seekers and seekers of truth. They all have a right to ask for it. And that is why; I come again and again to your country. To see those seekers, which are lost, so many are already lost. But those who are still there, let them have the beauty of their being, the glory of their being and let them know what they are. For these you don't have to exert. You can't read it in the books. It is just happening that takes place this Kuṇḍalinī rises, very, in a very strictly manner. In the short time, you can feel the Cool Breeze on top of your fontanelle bone area and on your finger tips. That is My job. That's why I am here. But your, is to understand what you are? Unless and until you become realised Souls, means connected with this All-pervading Power, all these whatever, Mister Yogi has told you, has no meaning.

All these centers are within you. No doubt. And they look after your physical, mental, emotional being.

This happens automatically there, because you are desirous of your ascent. Whatever we do with our mind, we have to know this mind is a myth. Many people, I am

told here in this country, are making big money in telling you how to use your mind and how to move pendulum, all sorts of non sense. Do you want to have the power to move the pendulum, so when this power rises, spontaneously within yourself, then these centers which have gone into jeopardy, have created all kinds of problem in you, just get corrected.

I am not telling you lies, when I say, Sahaja Yoga has cured, Cancer, even AIDS. And you can get rid of all your allergies and this and that non sense, if you become the Spirit. Because Spirit cannot be attacked, is beyond the mind. But this mind of yours, which you are so proud of, is created by you only. Just like we have created computers, this Spirit is completely finished and you are just living with this mind which guides. One day this computer will become our master, in the same way, we are playing into the hands of this mind. It is created by us through our conditionings or may be by our ego. Now this mind makes you think, think, think, think like mad. And this thinking takes you nowhere. For example, if you start understanding your mind, you will know that it only thinks about the future and about the past, what is the present? Can it bring to the state of present? Past is finished and future doesn't exist. Present is the reality. If you want to know the reality, you have to be in the present. Now how will you be in the present? As long as you are moving with your mind, you cannot. You have to go beyond the mind.

So there is a state which we call as Thoughtless Awareness. Jung has described it as, surprisingly as Thoughtless Awareness.

That means you go beyond your mind. There is no thought and you are absolutely aware. And the whole personality, you see becomes a personality of emission of light, emission of joy, emission of wisdom because beyond that all these lies. You have not touched that point. That's why you are worried; you are upset, you are sick. But once you cross over your mind than you are in connection with this All-pervading Power.

People talk of peace and peace and award of peace and this and that. But I have met them many. They have no peace in their hearts. I don't know how they got awards. They are very hot tempered people, you know shaky type, can't think it. This peace award, peace is within and that is what we have to do.

Instead talking about peace, create peace in human beings, by transforming them. If you are standing in the water, the waves of the water rise and fall, rise and fall, that is what happens to you, that thoughts jumping on your *[UNCLEAR]* of your thoughts. You are and you are afraid of the waves. But supposing you get on to a boat than you can watch them. And you can enjoy them. But supposing you learn how to swim, than you can jump in and save many others who are still lost. This is exactly what happens in Sahaja Yoga. That you go beyond your mind. And you see your stupid mind and you laugh at it.

You laugh at it. And you are at peace, because when the Kuṇḍalinī rises these thoughts get elongated and there is a space in between. That is the space where there is peace.

So your attention stops at that point, where there is peace. You become extremely peaceful. And you don't

have to worry about your own protection. People say Mother if you are peaceful and somebody attacks you, what will happen? All right if somebody attacks you there is this All-pervading Power that can protect. There are so many examples in Sahaja Yoga, where this power has saved so many people. Now we can trust any kind of nonsense but the truth is that this power protects, because it loves you, it cares for you.

Recently when I was coming at the airport, four Sahaja Yogis and their little child came, they had tears in their eyes and I said what's the matter. They said Mother, You know, we are protected. They had a very bad accident and this car was finished and everything was absolutely useless. Even to call it a car while all of them escaped, without a scratch. This is only one of the examples I am telling you. This I have to tell you because otherwise you won't understand how important it is? This is nothing. This is nothing that you get. You get your own powers, because you become collectively conscious, collectively conscious. You can feel others on your finger tips their Chakras and you can feel your own Chakras also on your finger tips. If you know how to correct these centers, you can correct others also. You can cure others also. You can give realisation to others. That is how Sahaja Yoga spreads. And you will be amazed, how many other qualities you get. I don't know how far Yogi has told about every Chakra's. But every Chakras, the center when enlighten gives you special, very special qualities. For example we have say somebody who could not even write an essay, he started writing books. Another one who was Chartered Accountant, who never knew what is,

language is, is started writing poetry. All kinds of creativity, comes to you.

Secondly you become religious, you become, it is not question of just saying I am Christian, I am Hindu, I am Muslim, no you become. Means in you, religion innately acts. I never told anybody don't murder, don't kill, all these don'ts of the Ten Commandments that are given, but it automatically as happens.

People just don't like to do; they don't want to do anything that is not religious. Religious doesn't mean that you dress up well and go to Church, come back home and sing few *[UNCLEAR]* but religion is within yourself and that religion of Divine Love, which is pure, which is absolutely pure.

So this Kuṇḍalinī purifies you completely. Her purification helps you to see the world in a different way. You become the witness. Witness of the whole drama, don't get involved into but you see the drama and you know the solutions. Also there is this power all the time which is looking after you and help you.

Believe Me there is this power, once you become one with that power than believe Me you are all the time filled up with this power and this power looks after, gives you wisdom. Everything that you could think of, but you believe there is such a power itself, very difficult for human beings. This is the big problem. But supposing I say there is supposing, now you can verify, you can verify if such a power is there or not. And after verification, if you believe there is such a power of love, than all your problems will be solved. You go beyond all these concepts of stupidity, which is divisive. Anything,

you know can divide us that's typical of human beings. They want to find out ways, how we are different from others all the time. Because they are in circle by their conditioning, by their ego, I mean their mind. From the childhood, you know gets into their head; they can't get out of it. I see the problems of this country are nothing but of their mind. All these problem cannot be solved by forming organizations, by strikes, by no no no a human being has to be transformed. Once human being is transformed, than he becomes a very very beautiful personality. You don't have to fight; this power will fight for you. You don't have to argue; don't have to do anything that's why calling it Sahaja. Saha means with and Ja is born. [Born] with you is this power, which you have to achieve.

Now this Kuṇḍalinī is your mother. Also in many religions, they don't even believe in mother as Goddess, but there is. This Kuṇḍalinī is a mother. She is very careful; when she is giving you a second birth like your mother borrow all the problems in your childhood, in your child birth. In the same way she does everything very smoothly, very beautifully. And she gives you this connection with this Divine.

So you develop a new awareness, a new dimension of your awareness call as collective consciousness. When there is nobody is the other just think of that. Just think that this finger is hurt, the whole body feel sorry for that. When you become part and parcel of the whole, when the macrocosm become microcosm become again I will use the word become, become, become. It's not imaginary, it's not only thing. Than who will fight, who

will fight, who you are. The same as the other is. Just think how you people can solve the problem. Not much is needed; just you become connected with this Divine Power. And respect yourself; you have to respect yourself as Divine people. And you have to get out of all the conditionings you have added and you have to get out of all these non sensical ideas, which are separating you.

You are the leaders who will take this country away from all kinds of madness that is going on. Every country has some madness, it is not yours, they are different types that is all. But what I find, once they get their realisation, we have now Sahaja Yoga working in sixty five countries, in some countries very very strong. But when they meet each other, I mean you cannot make out, way they are friendly, the way they are joyous and such pure love. There is no incident of some body's husband running with somebody's wife like that. I have not known such an incident non sensical one. We have marriages every year about at least hundred marriages. One in a million, I should say one in a thousand might not work out. International marriages and the children that are born are really the Saints, who are trying to take birth with people who are realised Souls. Very different type of society it is. They look all normal people except that they have glint in their eyes, which shines, that they have vibrations in their hands. That their attitude is very different. Such a nice race is going to come that is what is blessed. This is the Age of Aquarius. And Kuṇḍalinī has got the Aquarius as its sign. This is the specially I called the Blossom Time. Because so many seeker are borned

[born] in this time, special time, when this Kal Yug, this modern times has come.

Nobody seems to be happy. Only at this time these flowers are going to become the fruits. That is what you are. You don't know what you are. Don't judge yourself by your own ego or by other's judgements and criticism. But you are all beautiful seekers. William Black has said that there will be a special category of people who will be borned [born]. They will be man of God and they will know the Divine. This is the time that has come.

For all of you, every one of you in America, specially, specially Los Angeles, is the word used for Angeles.

So there must be Angeles around. I am sure. I am looking around for them so above all everything is this pure love. Even beyond truth it is.

So please know that this Creator, God almighty, who has created you, is not going to destroy this World. There are many like this organization, who talk, now we are all going to be destroyed you see, frightening everyone. As [if] those who say so are going to save it. Don't believe all these stupid talks and bombastic advertisements. Try to understand how who has brought you have become you to this level of human awareness is going to destroy. He is so great. He has made everything is going to destroy. He is so great. He has made everything so beautifully within us. Only we have diverted our attention to things, which are but not so important that doesn't mean that you have to give up your family, give up your house. You stand on your heads and go to Himālaya. Nothing of the kind. I have known some people who are, have sold their houses, takes out their children out of the

school to give money to the Gurus. I mean use your brains. How could you that. As a Mother I feel very sad that why should you suffer so. Such ignorance about truth. Such ignorance about understanding about yourself, you must understand that this is absolutely very easy as you have become human beings without doing any things Sahaja. In the same way you are going to be the higher being without doing anything, without paying for anything. Is something that has to happen within? And you have to become something.

So lastly I would say because, Yogi, I don't know what he has told you, when you become one with this Divine Power. You get filled with joy. And joy is singular and not like happiness or unhappiness. It is joy, a singular. It is to be experienced. You enjoy every small small things. It is a feeling, which is to be enjoyed.

And has to be experienced, will be amazed that when this happened, you don't run after non sensical things and worries and I should say destructive ideas. Enjoy yourself; you enjoy everyone you enjoy every moment of your life. Even the absurdities, stupidities, you enjoy and cruelty when you see you can destroy.

Not you but through you this Divine Power. I don't know if you are aware world is changing very fast.

All kinds of people are getting exposed.

So many things are happening. By the Year 2000, I don't know how many people will be in [jailed]. I don't know, if you have sufficient jails are not? How many people will be exposed and punished? And how many will be swimming in the ocean of joy. This is not a false promise.

You will get your realisation, just now. But as I said, you have to little bid humble down.

If you have come here to criticise than Kuṇḍalinī won't rise. She is very clever. We have to humble down little bid. The thinking that I have to be that beyond the mind, have to be one with this All Pervading Divine Power. And what you feel is the Cool Breeze. Cool Breeze of the Holy Ghost, as described in the Bible. Cool Breeze coming on your finger tips. Cool Breeze coming out of your fontanelle bone area. And you become thoughtless. It is something you have not known so far. Nobody might have told this thing.

There are not many books, so you have to first of all verifying by experiencing. Do not deny it. Because you have thought that something is different as funny. It will take hardly ten minutes. I will request you those who do not want to have it, can leave the hall. Because it cannot be forced, it cannot be forced. You have to accept that you want to become one with the Divine. This is what you have to accept. It cannot be forced. It cannot push you there.

So those who do not want to have their Self-realisation, can leave the hall, will be very kind of them. It will take hardly ten minutes as I told you.

Thank you very much.

***Contents: 1997-06-18*, Public Program, Wheeler Auditorium, UC Berkeley Campus, Berkeley, CA, U.S.A.**

[Talk by Marcus Nobel (descendent of Alfred Nobel and Vice President of United Earth):] What if Sahaja Yoga and

the teachings of Shri Mataji could transform people through Self-realisation? What if Sahaja Yoga and the teachings of Shri Mataji could activate the primordial energy of the Kuṇḍalinī and the serpent coiled three and a half times at the base of the spine, which rises up through the spinal cord and flows out through the crown of the head and could transform people's lives? What if the violence and death and destruction that happens every day in our cities became a thing of the past? What if people could live happier, healthier lives, more productive lives simply by practicing Sahaja Yoga and the teachings of Shri Mataji? What if there was a religion without dogma, without theology, without priestcraft, without tithing, a religion without religious wars, a religion without religious fundamentalism? What if there was a religion without hate, without fear and without guilt? What if there was a practice that offered only the cosmic bliss of pure Divine Love and asked nothing in return? What if human beings have evolved from lower forms of life and that we are still evolving into a higher state of consciousness, an evolution of our brain and central nervous system? What if the survival of our species and the survival of our varied and beautiful ecosystems, depended on the evolution of human consciousness? What if, instead of the thousands of generations of biological Darwinism required for biological evolution, the evolution of human consciousness could take place over the course of a lifetime? Or what if the evolution of human consciousness could take place in an afternoon? What if the simple act of Sahaja Yoga could create a profound

harmonizing effect on society and that individuals could create effortlessly greater happiness, peace and quality of life? What if there was a great spiritual teacher before you? Would you listen? Would you hear? Would you be open to the great possibilities that may be bestowed upon you? The answer to all these questions is that it can happen and is happening.

Her Holiness Shri Mataji Nirmalā Devī and Her teaching of Sahaj Yoga is a gift to all of you and all of humanity.

It is a gift of cosmic consciousness that comes from the power of Self-realisation.

[Shri Mataji's talk:]

I bow to all the seekers of Absolute Truth.

At the very outset I have to say that Truth is Truth. This Absolute Truth cannot be changed because it is absolute. It cannot be transformed, it can not be explained because it cannot be described. Truth has to be experienced. It's an experience. In Sanskrit language we have.....

You must seek out the purpose of our life and take full notice of every detail and beauty that surrounds you.....

Question: [about dreams].

Shri Mataji: I don't dream, My attention actually works. I allow My attention to go wherever it wants and work there.

Contents: **1997-06-2x Quote on Collectivity, Toronto, ON, Canada**

Loving everyone is so important in collectivity.

***Contents: 1997-07-03*, Public Program, Talk by Claus Nobel and Address by Ayatollah Medhi Rouhani, Royal Albert Hall, Kensington Gore, London SW7, UK**

[Talk by Claus Nobel:] Well, indeed, life is full of surprises, after all we are meeting here, inspired by the message and work of holy Mother Shri Mataji Nirmalā Devī and she is not here in body but she's here in spirit. Also the wonderful letter that we recently heard from Ayatollah Rohani, which speaks very highly of the work and the mission of the holy Mother, where he indicates the importance of women in the world, is neither here and frankly speaking only 36 hours ago I did not know that I would be here at the Royal Albert Hall, addressing this audience. Still I say, dear Holy Mother and I also recognize her husband, Sir C.P.

Srivastava, in the audience and I say most importantly, dear friends, fellow seekers of truth, are you out there? because with all this light I can only see about twenty people in front of me.

So, say `yes' if your here then I know [lots of clapping]. Now I can see you and I can hear you as well as you can see and hear me.

With that said, I want to say that I have a vision, I have a vision of the world that is better, saver and saner than the one we are presently are experiencing. It is a world where people live in harmony and peace with themselves and in harmony and peace with nature. Now those words are vast, it's a bold vision do I have a practical way from going to vision to reality, yes I will share that with you and I will share it and indicate the tone of the meeting by

ten small words and they indicate how this global world transformation shall be undertaken and they are right thoughts, right words, right deeds, right here and right now. [Lots of clapping.] The key word, is of course, `right'. This world is fighting about what is `right', what is right to you might be wrong to me and visa versa, it is a grey area.

So we need a reference point, so we can distinguish between right and wrong and between truth and lie, tonight Shri Mataji will show us what is right, tonight Shri Mataji will empower us to become masters of our own destiny and tonight we will be guided by the knowledge of Self-realisation in the light of truth and we shall all know absolute truth and absolute peace.

Now, a hundred years ago Alfred Nobel established a Nobel Peace prizes, these prizes represent excellence, we have prizes in chemistry, physics, medicine, literature and peace. Of those prizes I hold the peace prize to be the finest. And I want to tell you that Alfred Nobel listened to a women, he listened to his secretary, Burta from Suttonry, in Paris, a hundred years ago, when she said, “Doctor Nobel, your should use your vast fortune for betterment of the world." Tonight you are listening to another women, we are listening to the message of Shri Mataji. However, I'm very much inspired, first by my uncle and later on you here by Shri Mataji. Alfred Nobel talked much about peace, he was frightened that his awesome, explosive, dynamite which cleared up land for harbors and tunnels, could also be used for warfare, today in the arsenal of military systems it's like a small

firecracker. But at that time it, dynamite, was a most awesome destructive material.

Now, Alfred Nobel thought basically about, peace as an absence of war, but I assure you that peace is much more than absence of war. And I see that peace exists is four specific areas, the first area is the peace that the individual has in him or her self, how do we treat our mind, our emotions and our feelings? how do we treat our body? Are we slaves to other masters or are we our own master? Until we have the inner peace in ourselves, we can never have an outer peace in the world and the safest and best way of finding world peace is to have mass movements that includes all religions and philosophies, all enterprises, whether they are political or scientific nature, to realise what inner peace is and that's what we are talking about tonight.

Self-realisation. What does Self-realisation mean? Well it means that we are `realizing' something, but what is the self? Ladies and gentlemen the self in us is the Divine, cosmic powers that exist in each and every individual but which is dormant in most people around the world. The spiritual leaders from ancient laws, they knew about this and they spoke about this but this secret of secrets has been suppressed, deliberately, until Shri Mataji, with great courage and great wisdom, being an old soul, who decided by herself, to come back to the Earth at this critical time in our history, in order to share her knowledge and wisdom, which is the Sahaja Yoga, which is instant Self-realisation which is to activate the dormant principle that we all have, which is the Kuṇḍalinī and to help the Kuṇḍalinī to rise up and thus become, what it

says in the Bible, “You are created in my image" [lots of clapping].

That was the first category, first sphere, of peace, the one we have within ourselves. The next one is the peace that we have among each other, in the family, in our community, in our nation, that we have peace with other ethnic groups and with other religions that we really become true, what I call `active' listeners and as `active' listeners are able to put ourselves in the place, in the shoes, of the other party.

Only then when we have the outlook from their perspective, shall we understand what they are trying to say. We're always talking, talking, talking. My dear wife, who is not here tonight, she said, “Claus, you talk too much, you don't listen. I have started to practice, what she calls, active listening." The third sphere is the sphere that pulled me in originally. After all I am a European Swedish business man. Why am I up here speaking the language of spirituality and saying “That is where the hope of the future exists"? I'm doing so because I have a deep and profound reverence for nature. As a Nobel peace laureate, Doctor Albert Schweitzer said, after he had worked and worked trying to distill a phrase that contained everything that he knew, everything that he wanted to say through his philosophy, Doctor Albert coined the phrase, “reverence for life." Nature is nothing but a plethora of examples of life in this multifaceted version. And I tell you dear fellow seekers of truth, we, humanity today, in our ignorance, in our greed and in our lust for power, we are in the process of destroying the very thing that makes this planet unique and that is life

on Earth. [Lots of clapping.] And so far we do not know of another planet in the universe that harbors this miracle, Earth is like a blue jewel in space and there is only one Earth and this Earth is fragile and we must take care of her and we respect her, Earth is also called nature, we cannot break the laws of nature, we must live by the laws of nature, if we break them, Mother Earth will break us. And we are only one species, of, we do not know how many species we have, five, ten, fifteen millions, but this we know and this has been proven by the worlds most foremost scientists in Harvard University, United States, Doctor Edward O Wilson, we are today bringing to extinction 250 species per day, that is as if we are deliberately and willfully pulling out thread after thread after of what consists of fabric of life and Mother nature will not let us continue doing that without correcting us as naughty children.

The fourth sphere, of peace, is the peace that we should know between ourselves and God. Any religion or any group who raises their arms and destroys his and enemy in the name of God is not following what God has asked us to do. The world should not know of violence [lots of clapping]. And the world should not know a war.

I call, as we already heard, these four spheres of peace, Earth ethics. And tonight we will hear more from the holy Mother how we shall have a reference point, how we can distinguish if we have a charlatan and a fraud in front of us or if it's a genuine honest person. And you, dear audience, you have come here tonight from many different walks of life and like you, I have also been seeking for the truth, I am beginning to discern truth

rather clearly and let me tell you this, that I look upon life on Earth as a kind of a school, a school where we are learning perfection and purification. Now on Earth everything is interdependent, interactive and interrelated and on Earth and well as in heaven I guess, every action has an reaction, every effect has a cause and every cause has an effect and the Holy Mother, as I said, She is a highly evolved soul, She has learned from many, many lives, what it is all about and this what is all about laws, the unseen laws, the spiritual laws, they are always here and they work as infallible as the law of gravity works, [drops his pen onto the floor] it always works all those unseen laws, it is for us to learn and perceive that law.

I am very comfortable with the teachings of Shri Mataji and I am very comfortable with the Holy Mother herself. I say so because, in the Bible there is one saying, amongst several good ones, “You shall know the tree by its fruit” and lately I have met the young men and women, in different parts of the world and certainly from many different parts of the world and they are all shining, beautiful human individuals that radiate inner peace and balance. They are unique, you have follow and you that are in the process of following, will be I think, those individuals who should call themselves, `ambassadors for the Earth' and after tonight's session is over, I'm sure, that you shall see clearly how you shall distinguish between truth and lie and you shall realise that blind faith is of no value and that fantasists and to take up violence as a last argument, is of no value. Eventually those things will bring you unhappiness, they will bring you conflict and potentially war. Ladies and gentlemen, I

know that we hold the future in our hands, I know that the future is in your hands, I know it's in my hands and I also know that the future of the planet exists in the heart of the individuals.

Now I will close my remarks, tonight, by a fable from India. I heard it when I attended the Rio Conference '92, that was the twentieth anniversary of the Stockholm conference, that for the first time, put on, the environment on the world agenda. In Stockholm in '72 we had only two heads of state, the prime minister from India and the King of Sweden. In Rio twenty years later, we had 110 heads of states.

A marvelous declaration, was drafted, agenda 21, just last week in New York, just 70 heads of states that continued with Rio plus five but as I told Sir C P, when he asked me about how is the outcome of this conference, I said, “Well, we are talking about sustainable future but it seems to me that in U.N. there is much of a sustainable dialogue ongoing." Tonight we shall take the action.

Well, I asked the Holy man from India, the white robbed acharya and I said, “Is there hope for the future?" and He said, “Mr. Nobel I will answer you question as follows: When the dear Lord had created the Earth, he was very very happy, very very pleased, it was His finest creation in the universe and he decided to celebrate, to have a party and God invited in all the angels and all the devils, when they were there he toasted them and wished them welcome as a good host and said, `There's only one rule that you must strictly obey, while you are here, having a good time' and by the way the best food and the best wine was served, ambrosia nectar and he said, `there is

one rule and that is that while your here celebrating my creation, you may never bend your elbows.' " The devils cried out and said “We don't want any part of such a party. How can we enjoy it? Not bending our elbows." So they left. Then the party started, the angels were having a jolly good time and the dear God was very very happy! Now how could they eat and drink without bending their elbows? Well, I sense that you can see what the moral of the fable is. The Angles were feeding each other, they were sharing and they were caring and that is what we shall do in the future together. Thank you very much.

[Address by the Ayatollah Medhi Rouhani (text translated on sight and read by Dr. Derek Lee):] If we consider the most ancient evidence left by homo sapiens, we can see that man has always been aware of the existence of a Supreme Being, who is Lord of all things and of all living creatures.

Using every conceivable means, human beings of every era have always tried to show their feelings of deep respect (and reverence) towards God and to perform what is due to their Creator.

This is why Islam has always stressed the possibility of direct communication with God. Even those who have fallen into idolatry have never denied the existence of the Creator, but have simply put their idols and their images in His place. And this is still happening today. This being the case, how can we recognize a true prophet and what is his or her mission? The mission of the prophets is to reveal the Will of God, that is, to provide a logical and tangible explanation of religion as it is experienced in our daily lives.

Genuine monotheism, the belief in a Supreme Being, means (or implies) the unshakeable oneness of the whole creation, that is, the indissoluble union between man and God. Monotheism proves, then, the pointlessness of idols and of images that come between man and God. The mission of the prophets is thus to set human beings upon the right track and in order to do this, the prophets have used two parallel and complementary paths:, the way of learning, based on theology and philosophy and the way of Self-knowledge or Self-realisation.

That is why we find in our Holy Book, the Koran, both scholastic discourse and phrases which hint at the `way in' to knowledge of the Highest Self. The concrete means of putting this message into practice is what is offered to us in this age by Shri Mataji Nirmalā Devī.

To back up this Truth, if you will allow me, I will quote these words of the Prophet Mahomet, who tells us: “God is closer to man than his own veins." And the Prophet says: “With the knowledge of the Spirit, man will begin to know himself, so as to finally achieve knowledge of God." “With the purification of his inner being, man becomes conscious that he is the Spirit." It is thus that the experience of spontaneous Self-realisation, which is revealed by Shri Mataji Nirmalā Devī and Sahaja Yoga, which is the practice which she teaches, both spontaneous Self-realisation and Sahaja Yoga are in perfect harmony with the teachings of Islam. It is because of this revelation by Shri Mataji that I have wanted to speak to you tonight.

In similar vein, I should like to end my talk by referring to the condition of women in Islamic countries today. As you

know, the position of woman as mother is glorified in the Islamic tradition. The Prophet Mohamed went as far as to say: “We experienced Paradise at our mother's feet." As a wife, Islam not only acknowledges her complete right to choose her own husband, but pays homage to her in the famous words of the Prophet, who says: “The best amongst you is the one who behaves best towards his wife." Or again: “Women are sent to us by God and men are responsible for keeping them safe." Women are thus considered to be equal to men in both their responsibilities and in their legal and civic rights.

Today, unfortunately, we have seen that this great insight of the Koran is not always understood and therefore not respected in the various Muslim countries.

You, Shri Mataji, by virtue of your courage, your sincerity and your purity, by virtue of your untiring travels through the five continents, you are today justly considered to be the Messenger of Peace in the world.

Your exemplary life makes you the perfect symbol and model for Muslim women. May their quest for Justice, their desire to be able to enjoy a true spiritual life in their own dignity, may their quest find an echo in the spiritual approach of the real Islam. This will make it possible to put a stop finally to all kinds of injustices which are still being committed against women in the name of religion.

It is with this vision and with the aim of defending the rights of women in Muslim countries throughout the world and in particular in Afghanistan, in Iran and Turkey, that I address this brief talk to you Shri Mataji and to all the people assembled here tonight.

signed Medhi Rouhani.
